Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 2130) to authorize a payment to the Government of Japan. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

PROVIDING FOR COMPREHENSIVE OPERATION OF HYDROELECTRIC POWER RESOURCES OF THE UNITED STATES

Mr. BOLLING (on behalf of Mr. COLMER), from the Committee on Rules, reported the following resolution (H. Res. 531, Rept. No. 1614) which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7201) to provide for the comprehensive operation of hydroelectric power resources of the United States, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

FOREIGN INVESTMENT INCENTIVE TAX ACT OF 1960

Mr. BOGGS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5) to amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 5, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Tuesday, March 8, 1960, the gentleman from Louisiana [Mr. BOGGS] had 8 minutes remaining, and the gentleman from Illinois [Mr. MASON] had 22 minutes remaining.

The Chair recognizes the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. BOGGS].

Mr. BOGGS. I wonder if the gentleman from Illinois would reserve 5 minutes, just in case we need it for purpose of explanation.

Mr. MASON. Yes. Mr. Chairman, I reserve all of my 20 minutes.

Mr. BOGGS. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, we began debate on this measure some weeks ago. At that time certain objections were raised to the proposed legislation, and in view of the fact that we were debating the bill under a closed rule as reported by the Rules Committee, it was felt that the best way to handle the objections was to reconsider the bill in the Committee on Ways and Means and adopt, if possible, committee amendments which would meet the objections.

There were three fundamental objections: One was that the administration and the Treasury Department took the position that this proposed legislation should be limited to the so-called underdeveloped countries.

The second was that we had written in the committee a so-called gross-up provision, which is a very technical tax matter quite difficult to explain, but nevertheless we had written it into this bill and had written it in other legislation pending before the committee.

The third had to do with labor standard conditions in the other countries of the world.

I think the Ways and Means Committee has met all of these objections. On yesterday I incorporated in the RECORD a comprehensive statement setting forth these committee amendments, setting forth the objections that had been raised some weeks ago, and our effort to correct these objections.

In the limited time available I do not propose to go into these matters in great detail, but as soon as general debate is over, which apparently will be in a few minutes, I will offer the committee amendments, which we are allowed to do under the rule and then will go into a general explanation.

One of the problems we had in the committee on so-called underdeveloped areas was the problem of defining these areas. This was finally worked out by the Treasury Department working in conjunction with the State Department and actually writing into the proposed law the so-called developed countries. I might read these to you: Austria, Belgium, Canada, Denmark, France, Germany, Italy, Japan, Luxembourg, Monaco, the Netherlands, Norway, Portugal, Sweden, the United Kingdom of Great Britain and Northern Ireland, and any of the countries within the Sino-Soviet bloc. That means that the other nations of the world, including the nations of Latin America, are eligible to participate in the tax-preferral provision of this proposed legislation.

Mr. BAKER. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield.

Mr. BAKER. All Western Hemisphere nations are eligible with the exception of Canada.

Mr. BOGGS. That is correct.

I might say that with the adoption of this amendment the Treasury Department and the administration approve the bill as written. I might also say that further objections to the so-called de-

veloped countries were raised by other groups, such as the AFL–CIO, and with the adoption of this amendment they too have directed a communication to the committee approving the legislation as drafted.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Indiana.

Mr. HALLECK. I would like to corroborate the gentleman's statement in respect to the position of the Treasury Department. As I understand it, in the communication to the chairman of the committee they state:

> While the labor standards amendment and import restrictions which are already in the bill would create serious administrative problems, the Treasury Department nevertheless would support the bill as amended.

Mr. BOGGS. That is correct, and I thank the gentleman. The Treasury Department worked very closely with the staff of the Ways and Means Committee in drafting these amendments to the bill.

Mr. O'HARA of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Michigan.

Mr. O'HARA of Michigan. For my information and for the information of other Members of the House, would the gentleman be so kind as to briefly explain to the Members of the House what advantages would be obtained by possibly choosing to come under the provision, if it should become law, as contrasted with the existing foreign subsidiary provisions?

Mr. BOGGS. The only advantage that I know of would be that these companies could operate under the American flag. The present device that American business uses, of course, has to do with what the gentleman mentioned a minute ago, namely, the use of foreign-based corporations. Under this proposal, with the exception of developed countries which I read a moment ago, an American company could use the American flag in these so-called undeveloped countries. Of course, there is some question as to how much capital will be generated in these countries but it is something that we should do. We should at least give it a trial.

Mr. O'HARA of Michigan. Would the gentleman attach any significance to the requirement under the foreign subsidiary act that the taxpayer is required to establish tax avoidance as not being one of the purposes of the creation of this subsidiary, and does the fact we do not have a similar provision in H.R. 5 make any difference?

Mr. BOGGS. H.R. 5 is much more restrictive than any foreign subsidiary operations. As a matter of fact, in the case of the foreign subsidiary mere declaration is conclusive. But we have no way that we can look into a corporation organized in Great Britain, Mexico, Canada, or in the Philippine Islands. Under this arrangement the American Treasury Department has complete availability of the documents and the records of the American corporation, so that under the arrangement proposed here there is the same control that the Treasury Department has over all other domestic corporations. Under the foreign subsidiary there is none of that.

Mr. O'HARA of Michigan. I thank the gentleman.

Mr. BAKER. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Tennessee.

Mr. BAKER. Is it not true that under existing law there is no limitation upon the exports back into this country or imports of manufactured articles abroad, but under H.R. 5 to remain qualified it cannot exceed 10 percent, which is a great advantage from the standpoint of foreign competition.

Mr. BOGGS. That is true. The gentleman knows that is true because it is his amendment which created that limitation. That is another restriction that does not apply to the foreign subsidiary which the gentleman from Michigan referred to.

Mr. BAKER. On that very point, that was the main source of our opposition here, as I got it, when the bill was before the House previously.

Mr. BOGGS. I think that is correct.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Ohio.

Mr. VANIK. I think this legislation has been improved since we considered it recently, but in reference to the section relating to the activities of American banks and their branch banking activities in these countries, do those branch activities continue to be exempt or entitled to deferred taxation?

Mr. BOGGS. The answer is, again, that this is tax deferral; not tax forgiveness. And, we do not try to limit it to any particular type of corporation that qualifies under the very restrictive provisions of the language in the Act, so that if a branch bank qualifies, then it is still in the legislation.

Mr. VANIK. Well, as the legislation now stands, the activities of branch banking by American banks in these countries would still be subject to this deferral privilege under this bill.

Mr. BOGGS. If they qualify under the other provisions of the bill, that is correct.

Mr. VANIK. I thank the gentleman.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Washington.

Mr. PELLY. I wonder if the gentleman would inform me whether Cuba is included as one of the underdeveloped countries.

Mr. BOGGS. Yes, it is; that is correct. I might say to the gentleman, however, that there is very little prospect of any investment there.

Mr. PELLY. I do not think there are any profits there.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. MASON. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, will the author of the bill please tell me whether one of the purposes of the bill is to give American industry a better opportunity to compete with foreign countries?

Mr. BOGGS. Precisely.

Mr. HOFFMAN of Michigan. Well, will the bill, if we adopt it, tend to lessen the number of jobs for our local employees?

Mr. BOGGS. No.

Mr. HOFFMAN of Michigan. Are you sure?

Mr. BOGGS. Well, only as sure as anybody can be about anything, I will say to the gentleman. It is our feeling and the feeling of the people who have studied this legislation that we will actually increase the number of American jobs.

Mr. HOFFMAN of Michigan. Here at home?

Mr. BOGGS. Yes.

Mr. HOFFMAN of Michigan. I thank the gentleman.

Mr. MASON. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Chairman, I would like to hear from the gentleman from Louisiana how this bill is going to increase jobs in this country. He has just made that statement and I would like to hear his answer.

Mr. BOGGS. If the gentleman will refer to the statement which I incorporated in the RECORD today, as a matter of fact, the gentleman will note it on page A4203. The gentleman will note the areas where we sell the most and, of course, the things that we sell are the things that are made in this country, the areas where we have the most investment, you will note that the greatest one is Canada.

Mr. GROSS. What kind of investment is the gentleman talking about? Is he talking about private investment or the investments to the tune of billions of dollars that the taxpayers have in foreign aid all over the world?

Mr. BOGGS. The gentleman from Louisiana is talking exclusively about private investment. Canada, as far as I know—and I may be wrong. I see the gentleman from Maine [Mr. COFFIN] here, who has made quite a study of Canada, and he can correct me—Canada, as far as I know, has never received any foreign aid from the United States. Will somebody correct me on that? I do not think so. Canada is our best customer.

Mr. GROSS. It is the only one that has been passed over if it has not gotten some of the foreign handouts.

Mr. BOGGS. So I say to the gentleman that the best evidence I can give in answer to his question is that if past experience means anything, then it means that the areas where we use our private funds, not taxpayers funds, are the places where the most American products will be purchased. I will give you another example. Mexico is a good one. Mexico is fast becoming one of our best customers on the basis of the investments we have there.

Mr. GROSS. I am lost as far as this bill is concerned. You have backed and filled so often on this bill since it was

before the House in March. Is it planned to dispose of this bill today or put it over for another 2 months?

Mr. BOGGS. I would invite the gentleman to support the bill.

Mr. GROSS. Are you going to walk up the hill and down again, back and fill some more? How many amendments will be offered to this bill this afternoon that only a handful of Members have ever seen?

Mr. BOGGS. Two committee amendments.

Mr. GROSS. The gentleman got trapped in his own closed rule; is that right?

Mr. BOGGS. I do not believe that I got trapped, no.

Mr. GROSS. The gentleman from Louisiana had to go back to his committee in order to get some amendments to this bill, to make it palatable enough to sell to the Members of the House. He was hanging on the ropes when the bill was before the House previously, so he went back to the committee to get this monstrosity sweetened up and sugar-coated.

Mr. BOGGS. As the gentleman from Ohio [Mr. HAYS], my good friend, said the other day, he who fights and runs away may live to fight another day. Perhaps the gentleman has described it accurately, I do not know. I admire the gentleman and I hope the gentleman will support the bill.

Mr. GROSS. Are the insurance guarantees put out by the ICA applicable to Americans who take their money and go abroad under the terms of the bill?

Mr. BOGGS. That is an entirely different law. The insurance guarantees come under the mutual security program.

Mr. GROSS. I know; but are the beneficiaries of this legislation entitled to those guarantees?

Mr. BOGGS. My answer would be yes, I should think so.

Mr. GROSS. So they get the benefit of this cheap insurance as to convertibility, as to expropriation and as to war-risk damage in some cases; and then also under the terms of this bill they get a tax deferral, or preferential tax treatment?

Mr. BOGGS. As far as I know—and I cannot really tell whether the gentleman is being completely serious or not—the insurance program was inaugurated to try to encourage private funds instead of Government funds to go into these areas. There are certainly some places on earth where they could be used. I do not know whether they have been used or not. We have seen the fantastic beating that the American investor has taken lately in Cuba. Whether or not the insurance program has been of help there or not, I do not know.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. JUDD. When they get this insurance they pay a fee, a premium, just the same as anybody else does when he buys insurance.

Mr. GROSS. Sure, they do. But the gentleman is not trying to tell me that Lloyds of London would offer this insurance at the premium rate the ICA charges. He does not mean to tell me that Lloyds of London would insure against war risk damage in some of these countries where ICA is insuring?

Mr. JUDD. There are two answers. The first is that ICA has not had any losses. So obviously the insurance was not too bad.

Mr. GROSS. What does the gentleman mean by not too bad?

Mr. JUDD. The risks were not too bad, if they have had no losses. Maybe Lloyds has been unwise in not getting in on this.

Mr. GROSS. They do not miss many bets.

Mr. JUDD. The other reason, the big reason for such Government insurance, is that these investment guarantees and insurance are given for investment in projects which are economically sound, but which are in countries where there are unusual political risks. You cannot expect private funds to invest in a project which, however attractive it may be, is in a country whose political future is uncertain. Yet it is to our advantage to have investments in that particular country—and we will need to put in Government funds, if private funds are not invested.

Mr. GROSS. Give some of these countries a little time and stop giving them millions of dollars through the foreign handout program and it will be demonstrated how good they are as risks. This country has handed out neary $100 billion in foreign aid since the end of World War II and yet the climate for American investors in some of these countries, including Britain and France, is still so poor that these investors take out insurance with the ICA to protect themselves as to convertibility and the seizure of their investments. Now you want to give the corporations of this country preferential tax treatment on their investments. I hope none of those who vote for this bill will try to cry on my shoulder when they seek funds from the U.S. Treasury for their depressed areas when one of the contributing factors to unemployment and idle industry is because special tax treatment is given to those who take their money abroad and benefit from the cheap foreign labor that is to be found all over the world.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GROSS] has expired.

Mr. MASON. Mr. Chairman, I yield 2 minutes to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Chairman, I have taken this time to address one specific question to the chairman of the subcommittee. I notice from the insertion that he put yesterday into the CONGRESSIONAL RECORD that a third amendment will be prosposed, seeking to make a corporation ineligible as a foreign business corporation if it has been operating abroad under substandard labor conditions. I should certainly approve the amendment; but I wonder if the gentleman could describe or define just what is meant by substandard labor conditions; according to U.S. standards or the undeveloped country's standards—or what?

Mr. BOGGS. The gentlewoman asks a very pertinent question; the standards prevailing in the country involved.

Mrs. CHURCH. Without any attempt being made in any case to elevate such standards to meet our own standards of labor?

Mr. BOGGS. Our experience is that the American investor generally maintains labor standards that are not only comparable to that in the host country, but in most cases higher than those in the host country. I think the tendency definitely will be to elevate those standards to be comparable to ours. That is what we hope will happen.

Mrs. CHURCH. Then it is the hope of the gentleman that eventually standards abroad might be raised in order to lessen competition with our own workmen at home?

Mr. BOGGS. Exactly.

Mrs. CHURCH. I had hoped that such might be the case.

Mr. BOGGS. I thank the gentlewoman.

Mr. MASON. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. BRAY].

Mr. BRAY. Mr. Chairman, I am not prepared to speak on these two committee amendments proposed by the chairman, the gentleman from Louisiana [Mr. BOGGS] because I did not know about them until about 10 minutes ago; there are no printed copies on the floor nor is there a committee report. But I do believe that before we vote on this matter we ought to study the path this legislation has followed from its beginning.

Last year the bill was introduced. I do not know what they called it then, perhaps the Foreign Investment Incentive Act of 1959. But let us see what the intent of this legislation is. At the time the bill was introduced, under certain conditions, it gave the industry that would manufacture goods abroad, the promise to pay only 38-percent corporation tax instead of 52 percent. That is a differential of 14 percent, which is an enormous amount.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Louisiana.

Mr. BOGGS. I do not want to take exception to the gentleman, but the gentleman is referring to one specific type of operation, namely, the Western Hemisphere corporation, which was passed during the war. This is the only type of corporation which gets this type of exemption. It applies only in that specific situation.

Mr. BRAY. I am aware of that.

Mr. BOGGS. It specifically does not apply to this legislation.

Mr. BRAY. I well realize that, because you did not get by with that. I spoke against that bill last year. I pointed out how, if passed, it was going to injure American labor and American manufacturers. Then the bill was changed by the committee, because the proponents could not get by with that 14 percent less taxes.

The American corporations pay 52 percent and these would pay 38 percent. In addition to that, they would not have to pay the taxes until they brought the money back to the United States.

Then, when the bill was brought to the floor here a month or so ago, the 38-percent corporation tax was eliminated, but they were allowed to leave their money abroad without paying taxes until the money was returned to the United States.

Then after debating it over a day, the proponents saw that they were not going to get by with that, so now they come to us with the two amendments changing it, whereby they put a sugar coating on this legislation so that this is to help depressed countries. Imagine trying to set up American labor standards in Pakistan or India.

The real object of this bill is as it states, the Foreign Investment Incentive Act of 1960. I do not know how much more incentive is going to be necessary to get American corporations to manufacture their goods abroad instead of in the United States. They are doing very well on that subject. Three thousand American concerns are now manufacturing goods abroad. I discussed this matter on the floor in detail when this bill was before the House last March.

Within the last month I have had conferences with labor in four different industries in my district as to the great damage that is being done them by goods brought into America from abroad, and in two of the industries, unless something changes within 2 years, are simply going to be out of business.

America has been helping all countries and peoples of the world, but I do believe we might spend just a little time and interest in trying to look after American interests and American workingmen. Thirty billion dollars has already been spent by American money on factories abroad.

But let us get back to the intent of this bill. Once they get their foot in the door the supposed safeguards in this bill will be changed. Why do you have to give any more incentive to get American business to manufacture abroad? They are certainly doing a wonderful job doing their manufacturing abroad now.

Mr. MASON. Mr. Chairman, I yield 1 minute to the gentleman from Tennessee [Mr. BAKER].

Mr. BAKER. Mr. Chairman, in response to the last statement made by the distinguished gentleman from Indiana, I would again call to the attention of the membership that under existing law there is no limitation on imports back into this country which are manufactured abroad. Under H.R. 5, we have limited that to 10 percent. I just cannot see for the life of me why, whatever your objection might be to any other provision of the bill, that is not in the interest of the American economy.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. BAKER. I yield to the gentleman from Pennsylvania.

Mr. DENT. Is it not true under this bill imports back to this country are limited to 10 percent of dollar volume of business of the foreign corporation, and 10 percent of their total volume might amount to 100 percent of the production of any particular industry in the United States.

Mr. BAKER. That is not the case.

Mr. DENT. That is the law, as I read it, and I beg the gentleman's pardon if it is not.

Mr. BAKER. If you manufacture say $1 million worth of windows in a foreign country, you could only send back to this country 10 percent of that million dollars worth of windows which, if my arithmetic is correct, would amount to $100,000 worth.

Mr. DENT. That is in dollar volume; is that not correct?

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. KEOGH. Mr. Chairman, I arise in support of the pending bill. Our free enterprise system is, in my view, the most potent and versatile weapon in the arsenal of the free world. We can best meet the challenge of the Communist bloc in the underdeveloped areas of the world by providing incentives to induce private American capital to go abroad and take with it the imagination, the skill and the vitality that has made our economic system the strongest that the world has known. This bill would provide such incentives.

Regrettably, the rules provided by the Internal Revenue Code of 1954 respecting the taxation of income derived from abroad and the administrative regulations and rulings thereunder are predicated upon the form of business organization and transaction rather than upon substantive effect and business need. The tax consequences of operating abroad thus vary greatly depending upon whether or not the particular business is in a position to utilize a branch organization, a domestic corporation or a foreign subsidiary. At the present time the branch form of organization is at a decided disadvantage and businesses which are forced, for either legal or practical reasons, to utilize this form of doing business find themselves at a competitive disadvantage respecting businesses with more freedom of choice. American banks and American insurance companies doing business abroad are required by both practical and legal reasons to operate as branches abroad. In the case of banks, foreign depositors expect and rely upon the security of the entire capital funds of the U.S. bank and this capital strength cannot be translated into subsidiaries for the banking laws do not ordinarily permit the guarantee of the liabilities of a banking subsidiary. For this and other reasons found in the laws which regulate banking, had not the Committee on Ways and Means taken steps with respect to the provisions of H.R. 5 to permit U.S. banks to treat their foreign branches as though they were foreign business corporations, they would have continued at a competitive disadvantage in relationship to the banks of other countries.

The action taken by your committee to prevent the continuation of this discrimination against United States banks is incorporated in the new section 957 which H.R. 5 would add to the Internal Revenue Code. This section would permit banks to treat their foreign branches for tax purposes as if they were separate foreign business corporations. For the foreign branches of an United States bank to be treated as foreign business corporations under the bill, they must elect such treatment and meet the qualifications for business in general, that is, they must derive 90 percent or more of their gross income from sources without the United States and derive 90 percent or more of their gross income from the active conduct of a trade or business. For this purpose, commissions and interests and income from gains on loans and investments which are ordinary and necessary in carrying on the trade or business of banking are to be considered as being derived from the active conduct of a trade or business.

Under the bill the foreign branches of United States banks are to be treated, under regulations to be issued by the Treasury Department, in the same manner as if they were separate corporate entities except that under subchapter C the rules relating to contributions of property and to distributions are not to apply. However, distributions received by the United States parent bank from a foreign branch will be treated as dividends with respect to which a 100 percent dividends received deduction is allowed.

The bill also provides that a United States parent bank may in its first election with respect to its branches elect to treat a branch as if it were a separate foreign business corporation or combine it with branches in other countries as a foreign business corporation. The latitude provided by this election will provide the flexibility of business decision necessary to best cope with local conditions.

It will be noted that the treatment provided by the bill in the case of the foreign branches of U.S. banks does not become available until taxable years beginning on or after January 1, 1963. In my view, this is unfortunate. However, the Treasury Department has informed your committee that it does not have the personnel to issue the necessary regulations to permit the implementation of section 957 before January 1, 1963. I have been informed by the U.S. banks doing business abroad that they stand willing and able to cooperate with the Treasury Department in the task of issuing the necessary regulations. In my view the joint efforts of the Treasury Department and the banking industry would result in the issuance of the necessary regulations long before January 1, 1963, and I express the hope that it will be possible for the Treasury Department to reconsider its view of this matter when the bill is before the other body.

U.S. insurance companies operating abroad are also required in many cases to utilize the branch form. In most respects their case is similar to that of U.S. banks and I regret that the treatment provided for the foreign branches of U.S.

banks is not also provided for the foreign branches of U.S. insurance companies. However, subchapter L of the Internal Revenue Code of 1954 which provides for the income taxation of life insurance companies is a most complicated provision. As stated by House Report No. 1282 accompanying the bill, a special situation exists in the case of life insurance companies and they have been included in the ineligible category of corporations under the bill only because of the difficulty in working out the interrelationship of the bill's provisions and the life insurance company tax treatment provided by subchapter L of the Internal Revenue Code. Accordingly, they were made ineligible corporations for the present, without prejudice as to ultimate revision of this treatment until an opportunity has been presented for further study. It is my hope that the study will be completed before the bill comes up for consideration in the other body.

The life insurance industry stands willing and eager to cooperate in this study, and is, at the present time, engaged in working out the necessary technical provisions to implement a provision which would allow them to come within the provisions of the bill.

Mr. Chairman, I urge the adoption of this bill by the House. I do not need to remind the Members of this body that economic subversion is an important tool of the Soviet bloc. Unless affirmative steps are taken to place American business in a position to compete with the Communist economic policies abroad, we face the possibility that we will find ourselves excluded from the markets of the world.

Mr. MASON. Mr. Chairman, I have no further requests for time.

Mr. BOGGS. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. Under the rule, the bill is considered as having been read for amendment, and the amendment in the nature of a substitute now in the bill shall be considered as an original bill for the purpose of amendment.

No amendments are in order except amendments offered by direction of the Committee on Ways and Means and such amendments shall not be subject to amendment.

The committee substitute is as follows:

Strike out all after the enacting clause and insert:

"SECTION 1. SHORT TITLE, ETC.

"(a) SHORT TITLE.—This Act may be cited as the 'Foreign Investment Incentive Tax Act of 1960'.

"(b) AMENDMENT OF 1954 CODE.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

"(c) EFFECTIVE DATE.—Except as otherwise provided, the amendments made by this Act shall be effective with respect to taxable years beginning after December 31, 1960.

"SEC. 2. FOREIGN BUSINESS CORPORATIONS

"(a) TAX ON FOREIGN BUSINESS CORPORATIONS.—Part III of subchapter N of chapter 1 (relating to income from sources without the United States) is amended by adding at the end thereof the following new subpart:

"'SUBPART F—FOREIGN BUSINESS CORPORATIONS

"'Sec. 951. Definition of foreign business corporation.
"'Sec. 952. Gross, taxable, and reinvested foreign income of foreign business corporations.
"'Sec. 953. Reinvested foreign income account.
"'Sec. 954. Distributions, etc., from reinvested foreign income account.
"'Sec. 955. Foreign taxes.
"'Sec. 956. Special rules.
"'Sec. 957. Elected foreign branches of banks taxed as foreign business corporations.

"'SEC. 951. DEFINITION OF FOREIGN BUSINESS CORPORATION.

"'(a) FOREIGN BUSINESS CORPORATION DEFINED.—For purposes of this title, the term "foreign business corporation" means a domestic corporation which has elected the treatment provided by this subject and which for the taxable year satisfies each of the following requirements:

"'(1) It derives 90 percent or more of its gross income from sources without the United States.

"'(2) It derives 90 percent or more of its gross income from—

"'(A) the active conduct of a trade or business,

"'(B) dividends from a qualified payor corporation (as defined in subsection (c)) which are out of earnings and profits of any taxable year for which such corporation was a qualified payor corporation (or would have been such a corporation but for the 10 percent stock ownership requirement of subsection (c)(1)(A)),

"'(C) income (other than dividends) from a qualified payor corporation, and

"'(D) compensation (other than compensation to which subparagraph (A) or (C) applies)—

"'(i) for the rendition, without the United States, of technical, managerial, engineering, construction, scientific, or like services; and

"'(ii) for the use of, or for the privilege of using, without the United States, patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like properties (but this clause shall apply only to the extent that the compensation described in this clause does not exceed 25 percent of the corporation's gross income).

"'(3) It derives not more than 10 percent of its gross income from the sale of articles which are sold by it for ultimate use, consumption, or disposition in the United States.

"'(4) It is not an ineligible corporation (as defined in subsection (d)).

"'(5) It furnishes for the taxable year, and for prior taxable years affecting (or affected by) an election under this subpart, such information with respect to such corporation as the Secretary or his delegate has prescribed by forms or regulations as necessary to carry out the provisions of the income tax laws.

"'(b) ELECTION.—

"'(1) IN GENERAL.—An election under this subpart may be made for any taxable year to which this subpart applies and for which (after making the election) the taxpayer is a foreign business corporation. An election, once effective, shall continue in effect for all subsequent taxable years of the corporation making the election up to and including—

"'(A) the taxable year for which the election is revoked by the filing of a notice of revocation, or

"'(B) the taxable year for which the election is terminated by reason of the fact that (i) such corporation was not a foreign business corporation for both such taxable year and the preceding taxable year, or (ii) such taxable year is the last taxable year of the corporation.

"'(2) WHEN ELECTION MUST BE MADE, ETC.—An election under this subpart may be made by a corporation for any taxable year at any time during the first month of such taxable year or at any time during the month preceding such first month. Such election shall be made in such manner as the Secretary or his delegate shall by regulations prescribe.

"'(3) NOTICE OF REVOCATION.—A notice of revocation (with respect to any taxable year) of an election under this subpart may be made only in such manner, and before such time, as the Secretary or his delegate shall by regulations prescribe.

"'(c) QUALIFIED PAYOR CORPORATION DEFINED.—

"'(1) IN GENERAL.—For purposes of this subpart, a domestic or foreign corporation shall be treated, with respect to another corporation, as a qualified payor corporation for any of its taxable years (including taxable years beginning before January 1, 1961) with respect to which—

"'(A) at least 10 percent of its voting stock is owned by such other corporation,

"'(B) it satisfies the requirements described in paragraphs (1), (2), (3), and (4) of subsection (a), and

"'(C) it derives 50 percent or more of its gross income from sources without the United States from the active conduct of a trade or business.

For purposes of determining the tax of the taxpayer, no corporation shall be treated as a qualified payor corporation, with respect to the taxpayer or any other corporation, unless the taxpayer furnishes such information with respect to such corporation as the Secretary or his delegate has prescribed by forms or regulations as necessary to carry out the provisions of this subpart.

"'(2) DISQUALIFICATION FOR INSUFFICIENT FOREIGN INVESTMENT AND PAYROLL.—A corporation shall not be a qualified payor corporation for any taxable year if, on determining a percentage under section 954(b) with respect to such corporation (whether or not such corporation is a foreign business corporation), such percentage exceeds 20 percent. For purposes of the preceding sentence, a corporation shall be treated as engaged in only one trade or business.

"'(3) OTHER SPECIAL RULES.—For purposes of determining under paragraph (1) of this subsection whether a corporation is a qualified payor corporation—

"'(A) income from another corporation shall be treated as from a qualified payor corporation if such other corporation satisfies the requirements of paragraph (1) (without regard to subparagraph (C) thereof), and

"'(B) a foreign corporation shall be treated as an ineligible corporation if it is a foreign personal holding company.

"'(d) INELIGIBLE CORPORATION.—For purposes of subsection (a)(4), each of the following (as determined without regard to this subpart) is an ineligible corporation:

"'(1) A corporation exempt from taxation under subchapter F.

"'(2) A corporation organized under the China Trade Act, 1922.

"'(3) A regulated investment company subject to tax under subchapter M.

"'(4) A personal holding company (as defined in section 542).

"'(5) A life insurance company (as defined in section 801).

"'(6) An unincorporated business enterprise subject to tax as a corporation under section 1361.

"'(7) An electing small business corporation (as defined in section 1371(b)).

"'SEC. 952. GROSS, TAXABLE, AND REINVESTED FOREIGN INCOME OF FOREIGN BUSINESS CORPORATIONS.

"'(a) GROSS INCOME AND TAXABLE INCOME OF FOREIGN BUSINESS CORPORATION.—For purposes of this title (other than section 170,

relating to charitable contributions or gifts, subchapter G of this chapter, relating to corporations used to avoid income tax on shareholders, subpart C of this part, relating to Western Hemisphere trade corporations, and section 951)—

"'(1) The gross income of a foreign business corporation shall be the sum of—

"'(A) the gross income from sources within the United States, and

"'(B) the amount (which shall be treated as an item of income derived from sources without the United States during the taxable year) subtracted from its reinvested foreign income account for the taxable year, as determined under section 953.

"'(2) The taxable income of a foreign business corporation shall be the amount determined under paragraph (1), minus the sum of the deductions allowed by this chapter to the extent deductible under part I of this subchapter (relating to determination of sources of income), as modified by this subpart, in determining taxable income from sources within the United States.

"'(b) REINVESTED FOREIGN INCOME DEFINED.—

"'(1) IN GENERAL.—For purposes of this subpart, the term "reinvested foreign income" means the taxable income from sources without the United States (as determined under part I of this subchapter, with the modifications provided by this subpart).

"'(2) SPECIAL RULES.—In determining the reinvested foreign income for any taxable year—

"'(A) No deduction shall be allowed for income, war profits, and excess profits taxes paid or accrued to any foreign country or to any possession of the United States.

"'(B) There shall be included, as an item of income derived from sources without the United States during the taxable year, an amount equal to the taxes which (on applying section 955(c)) are deemed paid under section 902.

"'(C) If the net long-term capital gain from sources without the United States exceeds the net short-term capital loss from such sources, then the reinvested foreign income for such taxable year shall be the sum of—

"'(i) the reinvested foreign income (computed without regard to this subparagraph) reduced (but not below zero) by the amount of such excess, and

"'(ii) the amount ascertained by multiplying the amount of such excess by the percentage obtained by subtracting from 100 percent the sum of the normal and surtax rates applicable to such taxable year.

This subparagraph shall apply only if the amount of reinvested foreign income determined under this subparagraph is less than the amount determined without regard to this subparagraph.

"'SEC. 953. REINVESTED FOREIGN INCOME ACCOUNT.

"'(a) IN GENERAL.—Each corporation making an election under this subpart shall, for purposes of this subpart, establish and maintain a reinvested foreign income account. The amount in such account as of the first day of the first taxable year to which the election applies shall be zero.

"'(b) ADDITIONS TO ACCOUNT.—The amount added to the reinvested foreign income account for any taxable year for which the corporation is a foreign business corporation shall be an amount equal to the reinvested foreign income for such taxable year.

"'(c) SUBTRACTIONS FROM ACCOUNT.—

"'(1) ORDER OF SUBTRACTION.—Any amount subtracted from the reinvested foreign income account of a corporation for any taxable year shall be treated as made first out of the addition to such account for such year, to the extent thereof, and thereafter out of the most recently added amounts which have not previously been subtracted.

"'(2) AMOUNT OF SUBTRACTION.—Except as provided in paragraph (3), the amount of the subtraction from the reinvested foreign income account of a corporation for any taxable year shall be the sum of—

"'(A) the amount which is treated under this subpart as distributed from such account for such year, plus

"'(B) whichever of the following amounts is the larger:

"'(i) the amount by which the tax imposed by this chapter for the taxable year is increased by section 952(a)(1)(B) or 956(b), or

"'(ii) the ratable portion of the income, war profits, and excess profits taxes paid or accrued to foreign countries and possessions of the United States during the taxable year of the addition out of which the subtraction is made.

If a subtraction from the reinvested foreign income account for any taxable year is out of more than one addition to such account, subparagraph (B) shall be applied separately with respect to each taxable year of addition out of which the subtraction is made.

"'(3) ENTIRE AMOUNT SUBTRACTED IN CASE OF REVOCATION OF TERMINATION.—Except as provided in section 381(c)(23), if an election under this subpart is revoked or terminated, the entire amount in the reinvested foreign income account shall be subtracted from the account for the last taxable year for which such election was in effect.

"'(4) ACCOUNT NOT TO BE REDUCED BELOW ZERO.—Amounts subtracted under this subsection shall not reduce the reinvested foreign income account below zero.

"'SEC. 954. DISTRIBUTIONS, ETC., FROM REINVESTED FOREIGN INCOME ACCOUNT.

"'(a) GENERAL RULE.—For purposes of this subpart, the amount of any distribution to shareholders shall be treated as made out of the reinvested foreign income account. For purposes of this subsection—

"'(1) the term "distribution" includes any distribution in redemption of stock or in partial or complete liquidation of the corporation, but does not include any distribution made by the corporation in its stock or in rights to acquire its stock; and

"'(2) the amount of any distribution shall be the fair market value of the property distributed.

"'(b) DISTRIBUTION BY REASON OF UNITED STATES INVESTMENT AND PAYROLL.—

"'(1) IN GENERAL.—Under regulations prescribed by the Secretary or his delegate, there shall be treated as distributed to shareholders for the taxable year, out of the reinvested foreign income account, one-half of the amount determined by multiplying the portion of the reinvested foreign income for the taxable year which is attributable to the active conduct of a trade or business by the percentage determined by dividing—

"'(A) the sum of (i) the adjusted basis of the taxpayer's property within the United States, and (ii) an amount 2 times the amount paid or accrued during the taxable year for labor and personal services performed within the United States, by

"'(B) the sum of (i) the adjusted basis of the taxpayer's property wherever located, and (ii) an amount 2 times the amount paid or accrued during the taxable year for all labor and personal services.

For purposes of the preceding sentence, only real property and tangible personal property (other than property described in section 1221(1)), and labor and personal services, which are ordinary and necessary for carrying on the trade or business shall be taken into account. In the case of a taxpayer engaged in two or more separate and distinct trades or businesses, separate computations shall be made under this subsection with respect to each such trade or business.

"'(2) PARAGRAPH (1) INAPPLICABLE WHERE PERCENTAGE IS LESS THAN 10 PERCENT.—If the percentage determined under paragraph (1) with respect to any trade or business for any taxable year is less than 10 percent, paragraph (1) shall not apply to such trade or business for such taxable year.

"'(c) HOLDING OF PROHIBITED PROPERTY TREATED AS DISTRIBUTION.—

"'(1) PROPERTY HELD BY FOREIGN BUSINESS CORPORATION.—If the taxpayer holds prohibited property at any time during the taxable year, it shall be treated as having made a distribution to shareholders out of its reinvested foreign income account for such taxable year.

"'(2) PROPERTY HELD BY CERTAIN OTHER CORPORATIONS.—If the taxpayer owns (directly or through one or more other corporations) 10 percent or more of the voting stock of another corporation, it shall be treated for purposes of paragraph (1) as holding a corresponding percentage of the property held by such other corporation which would be prohibited property if such other corporation were a foreign business corporation.

"'(3) AMOUNT OF DISTRIBUTION.—

"'(A) MAXIMUM AMOUNT TO BE TAKEN INTO ACCOUNT.—This subsection shall be applied, with respect to the taxpayer, at that time during its taxable year when it results in the maximum amount of prohibited property.

"'(B) AMOUNT TAKEN INTO ACCOUNT WITH RESPECT TO PARTICULAR PROPERTIES.—For purposes of this subsection, the amount taken into account with respect to any property shall be the adjusted basis of such property, reduced by the sum of—

"'(i) any liability to which such property is subject, and

"'(ii) the aggregate amount treated as distributions for prior taxable years by reason of such corporation's holding such property. For purposes of clause (ii), a distribution for a prior taxable year shall be treated as attributable first to the properties constituting prohibited property which were held at the close of such taxable year.

"'(4) PROHIBITED PROPERTY DEFINED.—

"'(A) IN GENERAL.—For purposes of this subsection, the term "prohibited property" means any property other than—

"'(i) tangible or intangible property which is ordinary and necessary for carrying on a trade or business of the taxpayer (but only if for the taxable year or for the preceding taxable year 90 percent or more of the gross income of such trade or business is derived from sources without the United States),

"'(ii) securities of another corporation which is a qualified payor corporation (or a corporation, at least 10 percent of the voting stock of which is owned by the taxpayer, with respect to which an election under this subpart is in effect) for its taxable year ending with or within the taxpayer's taxable year or for the immediately preceding taxable year of such other corporation.

"'(iii) obligations of foreign governments, but only to the extent that the aggregate adjusted basis of all such obligations does not exceed 15 percent of the taxpayer's earnings and profits accumulated after December 31, 1960 (determined as of the beginning of the taxable year),

"'(iv) obligations of the United States, money, and deposits with persons carrying on the banking business, and

"'(v) any loan to which subsection (d) applies.

"'(B) SECURITY DEFINED.—For purposes of subparagraph (A), the term "security" means any share of stock in any corporation, certificate of stock or interest in any corporation, note, bond, debenture, or evidence of indebtedness, or any evidence of an interest in or right to subscribe to or purchase any of the foregoing.

"'(5) SPECIAL RULES FOR APPLICATION OF PARAGRAPH (2).—

"'(A) NO ATTRIBUTION THROUGH A FOREIGN BUSINESS CORPORATION.—Paragraph (2) shall not apply to—

"'(i) stock held in a corporation with respect to which an election under this subpart is in effect, and

"'(ii) stock and other property which (but for this clause) would be treated as held by the taxpayer solely by reason of holding stock described in clause (i).

"'(B) NO DUPLICATION IN ATTRIBUTION THROUGH ANOTHER CORPORATION.—If (but for this subparagraph) any corporation would be treated under paragraph (2) as holding prohibited property by reason of—

"'(i) stock in another corporation, and

"'(ii) stock or other property held by such other corporation,

there shall be taken into account under such paragraph only the amount determined with respect to clause (i) or clause (ii), whichever is the greater.

"'(C) FAIR MARKET VALUE TAKEN INTO ACCOUNT WHERE INFORMATION IS NOT FURNISHED.—For purposes of this subsection, the amount taken into account for any taxable year by the taxpayer with respect to any other corporation described in paragraph (2) shall be the fair market value of its direct or indirect stock holdings in such corporation, unless the taxpayer furnishes such information with respect to such corporation as the Secretary or his delegate has prescribed by forms or regulations as necessary to carry out the provisions of this subpart.

"'(d) TREATMENT OF CERTAIN LOANS.—

"'(1) IN GENERAL.—For purposes of this subpart, if any corporation makes a loan to another corporation which owns (directly or through one or more other corporations) 10 percent or more of the voting stock of the lending corporation, then—

"'(A) If the lending corporation is a foreign business corporation (or a corporation with respect to which an election under this subpart is in effect), it shall be treated as having made a distribution to shareholders, in an amount equal to the loan, out of its reinvested foreign income account for such taxable year.

"'(B) If the borrowing corporation is a foreign business corporation, an amount equal to the loan shall be treated, for purposes of determining reinvested foreign income, as an item of gross income received at the time the loan was received.

For purposes of applying this paragraph, each corporation in a chain of ownership (other than the lending and the borrowing corporations) shall be treated as having received, and in turn distributed, an amount equal to such loan.

"'(2) OUTSTANDING LOANS WHICH HAVE NOT BEEN TREATED AS DISTRIBUTIONS.—If any loan described in paragraph (1) remains outstanding in any taxable year of the ending corporation after the taxable year in which made, such loan shall be treated (for purposes of paragraph (1)) as made in such succeeding taxable year in an amount equal to the amount so outstanding, but the amount taken into account with respect to any corporation shall be reduced by the amount treated as distributions by such corporation for prior taxable years by reason of such loan.

"'(3) CERTAIN OPEN ACCOUNTS AND OTHER COMMERCIAL LOANS EXCEPTED.—This subsection shall not apply in the case of any loan arising in connection with the sale of property, if the amount of such loan outstanding at no time during the taxable year exceeds the amount which would be ordinary and necessary to carry on the trade or business of both the lending corporation and the borrowing corporation had the sale been made between unrelated corporations.

"'(e) LIMITATION ON AMOUNT TREATED AS DISTRIBUTED BY REASON OF PROHIBITED PROPERTY AND LOANS.—The amount treated as distributed under subsections (c) and (d) for any taxable year shall not exceed the amount of a distribution to shareholders which (after the application of subsections (a) and (b)) would reduce the amount in the reinvested foreign income account to zero.

"'SEC. 955. FOREIGN TAXES.

"'(a) YEAR FOREIGN TAXES TAKEN INTO ACCOUNT.—

"'(1) IN GENERAL.—For purposes of this chapter (other than this subpart)—

"'(A) any income, war profits, and excess profits taxes paid or accrued during any taxable year to any foreign country or to any possession of the United States by a foreign business corporation shall not (except as otherwise provided by this subsection) be taken into account for such taxable year, and

"'(B) where an amount is subtracted from the reinvested foreign income account of any corporation, a ratable portion of such taxes paid or accrued to foreign countries and possessions of the United States during the taxable year of the addition out of which the subtraction is made shall, for purposes of subpart A and section 164, be treated as paid or accrued during the taxable year for which the subtraction is made.

"'(2) YEAR FOR WHICH NO REINVESTED FOREIGN INCOME.—Paragraph (1)(A) shall not apply to a foreign business corporation for any taxable year for which no amount is added to the reinvested foreign income account.

"'(b) FOREIGN TAX CREDIT—OVERALL LIMIT TO APPLY.—In the case of a corporation to which an election under this subpart applies—

"'(1) section 904(a) shall not apply,

"'(2) the total amount of the credit in respect of taxes paid or accrued to all countries and possessions shall not exceed the same proportion of the tax against which such credit is taken which the taxpayer's taxable income from sources without the United States (but not in excess of the taxpayer's entire taxable income) bears to its entire taxable income for the same taxable year, and

"'(3) the reference in section 904(c) to subsection (a) of section 904 shall be treated as a reference to paragraph (2) of this subsection.

In applying section 904(c), no amount paid or accrued for a taxable year to which an election under this subpart applied shall (except for purposes of determining the number of taxable years which have elapsed) be deemed paid or accrued under section 904(c) in any year for which an election under this subpart does not apply.

"'(c) TREATMENT OF DEEMED TAXES.—For purposes of this subpart—

"'(1) IN GENERAL.—If any amount is added to the reinvested foreign income account of any foreign business corporation for any taxable year, the amount of taxes deemed paid by such corporation for such taxable year under section 902 (relating to dividends received from certain foreign corporations), by reason of taxes paid (or deemed paid) by any foreign corporation, shall be determined without reduction by reason of the ratio which the accumulated profits of the payor foreign corporation bear to its total profits.

"'(2) FOREIGN TAXES INCLUDE DEEMED TAXES.—Any reference to income, war profits, and excess profits taxes paid or accrued to any foreign country or to any possession of the United States shall be treated as including such taxes deemed paid under section 902, as modified by paragraph (1) of this subsection.

"'SEC. 956. SPECIAL RULES.

"'(a) SURTAX EXEMPTIONS.—In the case of a corporation to which an election under this subpart applies, the surtax under section 11(c) for the taxable year shall be determined by substituting for "exceeds $25,000" the following: "exceeds $25,000 (or, if smaller, the taxable income computed without regard to the amount subtracted from the taxpayer's reinvested foreign income account)".

"'(b) GROSS INCOME FOR TAXABLE YEAR FOR WHICH CORPORATION IS NOT A FOREIGN BUSINESS CORPORATION.—For purposes of this title (other than section 170, relating to charitable contributions or gifts, subchapter G of this chapter, relating to corporations used to avoid income tax on shareholders, subpart C of this part, relating to Western Hemisphere trade corporations, and section 951), if an election under this subpart is in effect with respect to any corporation for any taxable year for which such corporation is not a foreign business corporation, the gross income of such corporation shall include (as an item of income derived from sources without the United States during the taxable year) the amount subtracted from its reinvested foreign income account for the taxable year.

"'(c) APPLICATION OF SECTIONS 172 AND 1212.—

"'(1) COMPUTATION OF REINVESTED FOREIGN INCOME.—In computing reinvested foreign income for any taxable year—

"'(A) no net operating loss carryover or carryback, and

"'(B) no capital loss carryover,

shall be allowed from a taxable year for which the corporation was not a foreign business corporation.

"'(2) LIMITATION ON YEARS TO WHICH FOREIGN SOURCES MAY BE CARRIED.—Except as provided in paragraph (3)—

"'(A) no net operating loss carryover or carryback, and

"'(B) no capital loss carryover,

which is from a taxable year for which the corporation was a foreign business corporation, and which is attributable to sources without the United States, shall be allowed for any taxable year for which the corporation is not a foreign business corporation.

"'(3) ADJUSTMENT IN CARRYOVERS ON REVOCATION OR TERMINATION OF ELECTION.—If an election under this subpart is revoked or terminated for any taxable year, then—

"'(A) the net operating loss carryover from any taxable year for which the corporation was a foreign business corporation (hereinafter in this subparagraph referred to as "loss year") to taxable years succeeding the last taxable year for which the election was in effect shall include the net operating loss carryover (reduced as provided by section 172(b)) from the loss year from sources without the United States, and

"'(B) in determining the short-term capital loss provided by section 1212 for taxable years succeeding the last taxable year for which the election was in effect, a rule similiar to the rule provided by subparagraph (A) shall be applied.

"'(d) LIMITATION ON INFORMATION REQUIRED TO BE FURNISHED.—No information shall be required to be furnished with respect to any corporation under section 951(a)(5), 951(c)(1), or 954(c)(5)(C), for any of its taxable years beginning after December 31, 1960, unless such information is of a character which was required to be furnished under the forms or regulations in effect on the first day of such taxable year.

"'SEC. 957. ELECTED FOREIGN BRANCHES OF BANKS TAXED AS FOREIGN BUSINESS CORPORATIONS.

"'(a) GENERAL RULE.—Subject to the qualifications in subsection (b), an election may be made by a bank (as defined in section 581) which during the taxable year operates a branch in a foreign country, permitting such branch to be subject to taxation as a foreign business corporation for such year and subsequent years as provided in subsection (e). Such election shall be made in accordance with regulations pre-

scribed by the Secretary or his delegate. Each branch with respect to which such electing bank has made an election under this subsection shall be an "elected branch" for purposes of this section.

"'(b) QUALIFICATIONS.—The election described in subsection (a) may not be made with respect to a foreign branch unless such branch—

"'(1) derives 90 percent or more of its gross income from sources without the United States; and

"'(2) derives 90 percent or more of its gross income from the active conduct of a trade or business, which for purposes of this paragraph shall include commissions and interest and all income and gains from loans and investments ordinary and necessary for the carrying on of such trade or business.

"'(c) CORPORATE PROVISIONS APPLICABLE.—Under regulations prescribed by the Secretary or his delegate, an elected branch shall, except as provided in subsection (g), be considered a corporation for purposes of this subtitle with respect to operation, distributions, and any other purpose; and the electing bank shall be considered the sole shareholder thereof.

"'(d) DURATION OF ELECTION.—The election under subsection (a) may be made for any taxable year beginning after December 31, 1962, and shall continue in effect for all subsequent years until terminated, either by notice of revocation filed by the taxpayer, or by failure of the elected branch for two successive taxable years to qualify under this section.

"'(e) IMPOSITION OF TAXES.—An elected branch shall be treated as a corporation with respect to which an election under this subpart is in effect.

"'(f) COMPUTATION OF TAXABLE INCOME.—In computing the taxable income of an elected branch, there shall be allowed only such deductions and credits as are properly allocable to the operation of the business of such branch.

"'(g) PROVISION INAPPLICABLE.—An elected branch shall not be considered a corporation, nor shall the electing bank be considered a shareholder, for purposes of subchapter C, except with respect to—

"'(1) contributions of property, constituting either paid-in surplus or contributions to capital; and

"'(2) part I thereof (relating to distributions).

"'(h) MULTIPLE BRANCHES.—

"'(1) COMBINING BRANCHES IN 2 OR MORE COUNTRIES.—If, at the time of making its first election under this section, a bank makes such election with respect to branches in more than one foreign country, it may (for purposes of this section) elect to make one or more combinations of such branches and to treat each such combination as a single elected branch. If, thereafter, a branch becomes an elected branch for the first time, such branch may be combined with any other elected branch (whether separate or combined).

"'(2) BRANCHES IN SAME COUNTRY MUST BE COMBINED.—For purposes of this section, each branch in any one foreign country shall be treated as included within any election made under this section with respect to any other branch in such country.

"'(3) TREATMENT TO BE CONTINUED.—If a bank for any taxable year elects to treat its branch in any foreign country separately or in a specified combination, such treatment shall (except as provided in the last sentence of paragraph (1)) be continued for all subsequent taxable years, unless the Secretary or his delegate consents to a different treatment.

"'(i) DIVIDENDS RECEIVED OUT OF REINVESTED FOREIGN INCOME ACCOUNT.—In the case of an electing bank which receives a dividend from an elected branch out of its reinvested foreign income account, there shall be allowed as a deduction an amount equal to 100 percent of the amount received as a dividend.'

"(b) CERTAIN DIVIDENDS RECEIVED OUT OF REINVESTED FOREIGN INCOME ACCOUNT.—

"(1) Section 243 (relating to dividends received by corporations) is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"'(c) DIVIDENDS RECEIVED OUT OF REINVESTED FOREIGN INCOME ACCOUNT.—If—

"'(1) a domestic corporation receives a dividend from another corporation out of such other corporation's reinvested foreign income account (within the meaning of section 953), and

"'(2) the recipient corporation, or another domestic corporation, is in control (within the meaning of section 368(c)) of the payor corporation,

then there shall be allowed as a deduction an amount equal to 100 percent of the amount received as a dividend.'

"(2) Section 243(a) is amended by striking out 'In the case of a corporation (other than a small business investment company operating under the Small Business Investment Act of 1958)' and inserting in lieu thereof the following: 'Except as provided in subsections (b) and (c), in the case of a corporation'.

"(c) CARRYOVERS.—Section 381(c) of the Internal Revenue Code of 1954 (relating to items of distributor or transferor corporations taken into account) is amended by adding at the end thereof the following new paragraph:

"'(23) SUCCESSOR FOREIGN BUSINESS CORPORATION.—If the acquiring corporation is a foreign business corporation (as defined in section 951), there shall be taken into account (to the extent proper to carry out the purposes of this section and subpart F of part III of subchapter N, and under such regulations as may be prescribed by the Secretary or his delegate) the reinvested foreign income account, and the items related thereto (including income, war profits, and excess profits taxes paid or accrued to any foreign country or to any possession of the United States), of the distributor or transferor corporation.'

"(d) PERSONAL HOLDING COMPANY INCOME.—Section 543 (relating to personal holding company income) is amended by adding at the end thereof the following new subsection:

"'(d) DIVIDENDS, ETC., RECEIVED BY FOREIGN BUSINESS CORPORATIONS.—

"'(1) IN GENERAL.—Subsection (a)(1) shall not apply to dividends, interest, or royalties (other than mineral, oil, or gas royalties) received or accrued by a corporation which (on applying this subsection) is a foreign business corporation for the taxable year if—

"'(A) during its entire taxable year more than 50 percent in value of its outstanding stock is owned by a domestic parent corporation;

"'(B) such domestic parent corporation, for its taxable year which ends with (or within which ends) the taxable year of the foreign business corporation—

"'(i) is not a personal holding company; and

"'(ii) would not be a personal holding company if such domestic parent corporation itself had derived its proportionate share of each item of gross income derived by each subsidiary for the taxable year of such subsidiary which ends with or within the taxable year of the domestic parent corporation; and

"'(C) the dividends, interest, and royalties referred to in subsection (a)(1) are received or accrued by the foreign business corporation from another corporation—

"'(i) in which the foreign business corporation owns, directly or indirectly, more than 50 percent in value of the outstanding stock (or such lesser percentage as is the maximum percentage which the foreign business corporation may own under the law applicable to it or to such other corporation), and

"'(ii) which, for its taxable year which ends with or within the taxable year of the foreign business corporation and for its two preceding taxable years (or for such part thereof as it was in existence), has derived 70 percent or more of its gross income from sources without the United States and from the active conduct of a trade or business.

"'(2) SPECIAL RULES FOR APPLICATION OF SUBSECTION.—

"'(A) For purposes of this subsection, the term "foreign business corporation" includes a corporation with respect to which an election under section 951 is in effect.

"'(B) For purposes of paragraph (1)(B), a corporation is a subsidiary of the domestic parent corporation if it is a domestic corporation and if (at any time during the subsidiary's taxable year referred to in paragraph (1)(B)) the domestic parent corporation held more than 50 percent in value of its outstanding stock; and the proportionate share with respect to any item of gross income of such a subsidiary is that percentage which equals the percentage of stock ownership at that time (during the subsidiary's taxable year referred to in paragraph (1)(B)) when such ownership by the domestic parent corporation was the greatest.

"'(C) For purposes of paragraph (1)(C), if the trade or business referred to in clause (ii) thereof is of the same or similar or related character as the trade or business conducted by the domestic parent corporation, the percentage in clause (i) thereof shall be 25 percent in lieu of 50 percent.'

"(e) FOREIGN BUSINESS CORPORATIONS NOT INCLUDIBLE CORPORATIONS IN AFFILIATED GROUPS.—Section 1504(b) (relating to definition of includible corporations for purposes of consolidated returns) is amended by adding at the end thereof the following new paragraph:

"'(8) A corporation with respect to which an election under subpart F of part III of subchapter N (relating to foreign business corporations) is in effect.'

"(f) TECHNICAL AMENDMENTS.—

"(1) The table of subparts for part III of subchapter N of chapter 1 is amended by adding at the end thereof the following:

"'Subpart F. Foreign business corporations.'

"(2) Section 901(d) is amended by adding at the end thereof the following new paragraph:

"'(4) For special rules relating to foreign business corporations, see section 955.'

"(3) Section 903 (relating to credit for taxes in lieu of income, etc., taxes) is amended by striking out 'For purposes of this subpart and of section 164(b),' and inserting in lieu thereof 'For purposes of this subpart, subpart F, and section 164(b),'.

"SEC. 3. CERTAIN TRANSFERS TO FOREIGN CORPORATIONS AND TO FOREIGN BUSINESS CORPORATIONS.

"(a) AMENDMENT OF SECTION 367.—Section 367 (relating to foreign corporations) is amended—

"(1) by striking out 'In determining' and inserting in lieu thereof the following:

"'(a) GENERAL RULE.—In determining'; and

"(2) by adding at the end thereof the following new subsections:

"'(b) EXCEPTION FOR CERTAIN TRANSFERS TO FOREIGN BUSINESS CORPORATIONS.—Subsection (a) shall not apply in the case of any exchange referred to in subsection (a) if such exchange arises out of, or in connection with, a transfer (whether or not in liquidation) of substantially all of the properties of a foreign corporation to a foreign business corporation (as defined in section 951(a)). In

the case of such an exchange, the accumulated earnings and profits, if any, of the foreign corporation shall be treated (except for purposes of section 951) as having been distributed immediately before the exchange or liquidation to the foreign business corporation as a dividend.

"'(c) EXCEPTION FOR CERTAIN TRANSFERS BY FOREIGN BUSINESS CORPORATIONS.—

"'(1) IN GENERAL.—Subsection (a) shall not apply in the case of any exchange referred to in subsection (a) if such exchange arises out of, or in connection with, a transfer of foreign business property by a foreign business corporation (as defined in section 951(a)) to a foreign corporation in exchange for stock of such foreign corporation, if for its first taxable year beginning after such exchange such foreign corporation—

"'(A) is controlled (as defined in section 368(c)) by one or more foreign business corporations, and

"'(B) is a qualified payor corporation (as defined in section 951(c) with respect to each such corporation.

"'(2) FOREIGN BUSINESS PROPERTY DEFINED.—For purposes of paragraph (1), the term "foreign business property" means any property which is transferred for use, and within 6 months after the transfer is in use, by the transferee in the active conduct of a trade or business; except that such term does not include—

"'(A) property described in section 1221 (1),

"'(B) stock in a domestic corporation, and

"'(C) stock in a foreign corporation, unless such stock is voting stock in a qualified payor corporation as to the foreign business corporation for its last 3 taxable years ending before the exchange and, for its first taxable year beginning after the exchange (i) is a qualified payor corporation as to the foreign corporation, and (ii) derives 50 percent or more of its gross income from sources without the United States from the active conduct of a trade or business.

For purposes of this paragraph, stock which qualifies as property under subparagraph (C) shall be deemed property used in the active conduct of a trade or business.'

"(b) AMENDMENT OF SECTION 1492.—Section 1492 (relating to nontaxable transfers) is amended to read as follows:

"'SEC. 1492. NONTAXABLE TRANSFERS.

"'The tax imposed by section 1491 shall not apply—

"'(1) if the transferee is an organization exempt from income tax under part I of subchapter F of chapter 1 (other than an organization described in section 401(a));

"'(2) if the stock transferred is "foreign business property" as defined in section 367(c) (relating to certain transfers by foreign business corporations); or

"'(3) if before the transfer it has been established to the satisfaction of the Secretary or his delegate that such transfer is not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes.'

"(c) TRANSFER OF INVENTORY TO FOREIGN BUSINESS CORPORATIONS AND FOREIGN CORPORATIONS.—

"(1) Part II of subchapter B of chapter 1 (relating to items specifically included in gross income) is amended by adding at the end thereof the following new section:

"'SEC. 78. TRANSFER OF INVENTORY TO FOREIGN BUSINESS COPORATIONS AND FOREIGN CORPORATIONS.

"'(a) GENERAL RULE.—If any person transfers property which, in his hands, is property described in section 1221(1)—

"'(1) to a corporation for which an election is in effect under subpart F (relating to foreign business corporations) of part III of subchapter N, or

"'(2) to a foreign corporation,

in exchange for stock or securities in such corporation or as a contribution to the capital of such corporation, then such person shall be treated as having exchanged such property for stock in such corporation having a fair market value equal to the fair market value of the property so transferred.

"'(b) NONAPPLICATION OF SECTION 351.—Section 351 shall not apply to any transfer of property described in subsection (a).'

"(2) The table of sections for such part II is amended by adding at the end thereof the following:

"'SEC. 78. Transfer of inventory to foreign business corporations and foreign corporations."

"(3) Subsection (d) of section 351 (relating to transfer to corporation controlled by transferor) is amended by adding at the end thereof the following new paragraph:

"'(5) For nonapplication of this section in the case of inventory transferred to a foreign business corporation or a foreign corporation, see section 78(b).'"

Mr. BOGGS. Mr. Chairman, by direction of the Committee on Ways and Means, I offer an amendment to the amendment in the nature of a substitute.

The CHAIRMAN. The Clerk will report the amendment.

Mr. BOGGS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOGGS. Mr. Chairman, the bill now being considered, of course, is a committee amendment to the whole bill; so this amendment is offered, I presume, in the form of an amendment to the substitute amendment; is that correct?

The CHAIRMAN. That is correct.

The Clerk read as follows:

Amendment offered by Mr. BOGGS to the committee substitute: Page 23, strike out the period at the end of the first line after line 17 and insert ", etc."

Page 24, strike out the period at the end of line 1 and insert, ", ETC."

Page 24, strike out lines 7 and 8 and insert:

"'(1) It derives 90 percent or more of its gross income from sources within less developed countries (within the meaning of subsection (e))."

Page 24, lines 23 and 24, strike out "without the United States" and insert "within less developed countries".

Page 25, line 2, strike out "without the United States" and insert "within less developed countries".

Page 27, line 13, strike out "without the United States" and insert "within less developed countries".

Page 27, lines 22 and 23, strike out "FOREIGN" and insert "LESS DEVELOPED COUNTRIES".

Page 29, after line 8, insert:

"'(e) LESS DEVELOPED COUNTRY DEFINED; ALLOCATION OF ITEMS TO SOURCES WITHIN OR WITHOUT LESS DEVELOPED COUNTRIES.—For purposes of this subpart—

"'(1) LESS DEVELOPED COUNTRY DEFINED.—A less developed country is any foreign country (other than an area within the Sino-Soviet bloc) or any possession of the United States with respect to which, on the first day of the taxable year, there is in effect an Executive order by the President of the United States designating such country or possession as an economically less developed country for purposes of this subpart. For purposes of the preceding sentence, an overseas territory, department, province, or possession may be treated as a separate country.

"'(2) CERTAIN COUNTRIES EXCLUDED.—No designation shall be made under paragraph (1) with respect to Austria, Belgium, Canada, Denmark, France, Federal Republic of Germany, Italy, Japan, Luxembourg, Monaco, Netherlands, Norway, Portugal, Sweden, Switzerland, United Kingdom of Great Britain and Northern Ireland.

"'(3) SOURCE RULES.—Items of gross income, expenses, losses, and deductions shall be allocated to sources within or without less developed countries under regulations prescribed by the Secretary or his delegate. Such regulations shall, to the extent of the Secretary or his delegate finds practicable, be consistent with the principles of part I of this subchapter (relating to determination of sources of income)."

Page 29, strike out lines 20 and 21 and insert:

"'(A) the gross income from sources without less developed countries, and".

Page 30, strike out line 3 and all that follows through line 4 on page 31, and insert:

"'(2) The taxable income of a foreign business corporation shall be the amount determined under paragraph (1), minus the sum of the deductions allowed by this chapter which are allocable to sources without less developed countries.

"'(b) REINVESTED FOREIGN INCOME DEFINED.—

"'(1) IN GENERAL.—For purposes of this subpart, the term "reinvested foreign income" means the taxable income from sources within less developed countries.

"'(2) SPECIAL RULES.—In determining the reinvested foreign income for any taxable year—

"'(A) No deduction shall be allowed for income, war profits, and excess profits, and excess profits taxes which are allocable to sources within less developed countries and which are paid or accrued to any foreign country or to any possession of the United States.

"'(B) If the net long-term capital gain from sources within less developed countries exceeds the net'.

Page 33, strike out lines 4 through 8, and insert:

"'(ii) the ratable portion of the income, war profits, and excess profits taxes which are allocable to sources within less developed countries and which are paid or accrued to foreign countries and possessions of the United States during the taxable year of the addition out of which the subtraction is made."

Page 34, strike out lines 14 and 15, and insert:

"'(b) DISTRIBUTION BY REASON OF INVESTMENT AND PAYROLL WITHOUT LESS DEVELOPED COUNTRIES.—'"

Page 34, line 25, strike out "within the United States" and insert "without less developed countries".

Page 35, line 3, strike out "within the United States" and insert "without less developed countries".

Page 37, line 20, strike out "without the United States" and insert "within less developed countries".

Page 42, strike out lines 16 through 22, and insert:

"'(A) any income, war profits, and excess profits taxes which are allocable to sources within less developed countries and which are paid or accrued during any taxable year to any foreign country or to any possession of the United States by a foreign business corporation shall not (except as otherwise provided by this subsection) be taken into account for such taxable year, and' ".

Page 43, beginning in line 1, strike out "such taxes paid or accrued to foreign countries and possession of the United States" and insert "such taxes so allocable and so paid or accrued".

Page 44, after line 3, insert: "For purposes of paragraph (2), the taxable income from sources without the United States shall be determined by including the amount sub-

tracted from the reinvested foreign income account for the taxable year and, if the corporation is a foreign business corporation for the taxable year, by excluding the items referred to in section 952(b) (relating to definition of reinvested foreign income)."

Page 44, strike out line 10 and all that follows through line 2 on page 45, and insert:

"'(c) FOREIGN TAXES INCLUDE DEEMED TAXES.—For purposes of this subpart, any reference to income, war profits, and excess profits taxes paid or accrued to any foreign country or to any possession of the United States shall be treated as including such taxes deemed paid under section 902."

Page 46, line 17, strike out "without the United States" and insert "within less developed countries".

Page 47, lines 6 and 7, strike out "without the United States" and insert "within less developed countries".

Page 48, line 1, strike out "a foreign country" and insert "a less developed country".

Page 48, line 13, strike out "without the United States" and insert "within less developed countries".

Page 50, strike out "foreign" in lines 5, 14, and 19, and insert "less developed".

Page 52, line 15, strike out "paid" and insert "which are allocable to sources within less developed countries and which are paid".

Page 54, lines 12 and 13, strike out "without the United States" and insert "within less developed countries (within the meaning of section 951(e))".

Page 58, line 19, strike out "without the United States" and insert "within less developed countries (within the meaning of section 951(e))".

Mr. BOGGS (during the reading of the amendment). Mr. Chairman, I ask unanimous consent to dispense with the further reading of the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS. Mr. Chairman, reserving the right to object, I would like to address a parliamentary inquiry to the Chairman. Would the amendment offered by the gentleman from Louisiana be subject to a point of order?

The CHAIRMAN. The Chair desires to inform the gentleman from Iowa that under the resolution which we are considering this bill, House Resolution 468, committee amendments shall be in order, any rule of the House to the contrary notwithstanding.

Mr. GROSS. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOGGS. Mr. Chairman, the amendment which has just been offered does two things. First, it eliminates the so-called gross up on dividend income. When that was last referred to on the floor of this body, someone thought it referred to our friend, the gentleman from Iowa, but, of course, our good friend the gentleman from Iowa [Mr. GROSS] knows that it does not. This provision was written into this proposed legislation having to do with the technical matter of computing the foreign tax credit on income earned abroad. Since that time, we have held hearings before the full Committee on Ways and Means to look into the question of whether or not this formula should be changed. The committee has come to no resolution on that proposed legislation, and it was our feeling that whatever is done should apply across the board, and as I think the gentleman from New York made the point here in the original debate, if we kept this language as to the gross up in the bill H.R. 5 and did not incorporate it into any other legislation, then rather than equalizing the position of American investors abroad as compared with foreign investors competing abroad, we would actually penalize American investors to a greater extent than is now the case under existing law.

Mr. BOSCH. I might say the gentleman has put the proposition correctly.

Mr. BOGGS. The second proposition has to do with the so-called underdeveloped countries. In the debate a moment ago I read a list of the countries which are defined by the executive branch of the Government as developed countries. I might say that as far as I was concerned, again the gentleman from Iowa talks about being on the ropes and so forth. That may be true. I may still be. The only thing I am seeking to do is to pass a constructive piece of legislation which will be helpful to American business and competing abroad and not competing at home for American jobs.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield.

Mr. DENT. Is there any restriction in this legislation on a corporation that builds its plant in a so-called underdeveloped country and expands it under the new amendment you are adding and then ships its products to the developed country in competition with its product it is now shipping to those developed countries all over the world from its U.S. production facilities.

Mr. BOGGS. I would say there are a number of kinds of restrictions over which we have no control; the so-called developed countries have their own tariff regulations and their own import restrictions and quotas and so on. I cannot answer the gentleman's question categorically. It has been the effort of our Government and governments all over the world, working through a General Agreement on Trade and Tariffs, to reduce as much as possible restrictions on trade.

Mr. DENT. One of the main weaknesses of this legislation is that it gives to a corporation the right to go into an undeveloped country and build a plant and produce without restriction and ship to a developed country that we are now selling to. It does so under free tariff rules that you are talking about, because certain countries do not have any restrictions and no tariff laws against them. We can ship into any of the so-called undeveloped countries.

Mr. BOGGS. I would say to the gentleman that he does not correctly define the situation. In order to qualify as a corporation the American company must meet a whole list of qualifications. An American corporation engaged in the practice outlined by the gentleman would not be able to enjoy tax deferral on such income.

Mr. BRAY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield.

Mr. BRAY. Has this amendment been printed? I have not been able to get a copy of it.

Mr. BOGGS. The amendments were put in the CONGRESSIONAL RECORD on April 28. I have a copy of them here.

Mr. BRAY. Have there been any committee reports on this amendment?

Mr. BOGGS. No, because the committee report was previous to these amendments.

Mr. KNOX. Mr. Chairman, I rise in opposition to the amendment and take this time to inquire a little more deeply into the question which has just been raised under the provision of this particular bill relative to an American corporation locating in a foreign country, to determine where in the bill it prohibits this corporation from shipping manufactured goods from that particular plant into any other foreign country.

Mr. BAKER. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. Let me try to answer the question first.

Under the so-called area of investment provision of H.R. 5 if there is a sale of these products to any third country it would constitute what is called distribution and that would disqualify the corporation for the income preferral. It is set out very specifically.

Mr. BAKER. Mr. Chairman, will the gentleman yield?

Mr. KNOX. I yield.

Mr. BAKER. If the gentleman from Michigan will yield, I offered an amendment in the committee which was adopted adding the word "ultimate". The section now reads with that amendment in the bill: The third test which must be met by a domestic corporation if it is to be classified as a foreign business corporation is that it derives not more than 10 percent of its gross income from the sale of any articles for ultimate use, consumption, or disposition in the United States. The word "ultimate" certainly would not permit the shipping of goods to a third country and back to the United States. This is found on page 4 of the report.

Mr. KNOX. I agree with the gentleman from Tennessee, it certainly would not permit the corporation to export to another foreign country and then that foreign country export to the United States. What I am concerned about, however, is the fact that this foreign corporation could start to absorb our export market that we had in other foreign countries by the goods manufactured in this one country being shipped to another country to which we ordinarily export from the United States. I have some reservations about this legislation, and I expounded on it when the bill was before the House some 4 or 5 weeks ago. One of them is the export of dollars and the export of jobs. Just recently by the medium of the press we were informed that the United States is still $3 billion short in dollar payments. This is a matter of chief concern as far as I am concerned.

I think we may have some problem in taking care of some of our own depressed areas, and possibly we should look after them before we start to look after the underdeveloped areas of the world.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. KNOX. I yield.

Mr. HIESTAND. One other point which I think the gentleman has just touched upon, as I understand, the bill provides a limitation of imports to 10 percent of the American manufacture. There is, as I understand, no limitation for a competing Japanese, German, or South American manufacturer; they can ship in all they want to, but we are limiting the American over there. Is that correct?

Mr. KNOX. They can ship in as much as they may desire and meet the tariff imposed by the United States.

Mr. HIESTAND. But the American cannot.

Mr. KNOX. Under the provisions of this bill the American corporation will be limited to 10 percent of the goods manufactured in a foreign country and shipped directly or indirectly into the United States.

Mr. HIESTAND. That is, 10 percent of his production?

Mr. KNOX. Ten percent of that production.

Mr. HIESTAND. There is no limit on the foreign producer?

Mr. KNOX. The foreign producer is involved in the payment of tariff. They have to pay our tariffs in order to ship their goods into this country.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. BOGGS. Mr. Chairman, I offer another committee amendment.

The Clerk read as follows:

Committee amendment: Page 29, after line 8, insert:

"'(f) DISQUALIFICATION FOR SUBSTANDARD LABOR CONDITIONS.—

"'(1) IN GENERAL.—For purposes of this subpart, a corporation referred to in subsection (a) or (c) shall be treated as an ineligible corporation within the meaning of subsection (d) for any taxable year during which it operates in any less developed country under substandard labor conditions. Any determination that this paragraph applies to any corporation for any taxable year shall be made by the Secretary of Labor. Any such determination shall be final, except that it shall be subject to review by the courts (including the Tax Court of the United States) in a proceeding for the recovery of income tax or for a redetermination of a deficiency in respect of income tax.

"'(2) SUBSTANDARD LABOR CONDITIONS.—For purposes of this subsection, the term "substandard labor conditions" means aggregate remuneration (including remuneration other than in money) for employment which is—

"'(A) below the minimum standards required under the laws of the country concerned, or

"'(B) if there are no such minimum standards—

"'(i) below the average standards prevailing for other employers in the same industry in such country or (if there are no other employers in the same industry) for other employers in similar industries in such country, or

"'(ii) where there are no average standards referred to in clause (1), substantially below the standards generally prevailing in the industries of such country.

"'(3) DETERMINATION AND CERTIFICATION BY SECRETARY OF LABOR.—

"'(A) INVESTIGATIONS.—On application of any affected domestic party (if the Secretary of Labor has reason to believe that the conditions described in this subparagraph exist), or on his own initiative, the Secretary of Labor shall make an investigation to determine whether any corporation referred to in subsection (a) or (c) has operated in any less developed country under substandard labor conditions.

"'(B) ATTENDANCE OF WITNESSES; PRODUCTION OF DOCUMENTS.—For the purpose of any investigation under subparagraph (A), the provisions of sections 9 and 10 (relating to the attendance of witnesses and the production of books, papers, and documents) of the Federal Trade Commission Act of September 16, 1914, as amended (15 U.S.C., secs. 49 and 50), are hereby made applicable to the jurisdiction, powers, and duties of the Secretary of Labor or any officers designated by him.

"'(C) CERTIFICATION.—If, pursuant to any investigation under subparagraph (A), the Secretary of Labor determines that a corporation has operated in any less developed country under substandard labor conditions during any taxable year, he shall promptly certify such determination to the Secretary of the Treasury or his delegate.

"'(D) ADMINISTRATIVE PROCEDURE ACT INAPPLICABLE.—The Administrative Procedure Act shall not apply with respect to investigations and determinations by the Secretary of Labor under this subsection.

"'(E) TAXABLE YEARS AFFECTED.—No determination shall be made by the Secretary of Labor with respect to any corporation for any taxable year unless, during such taxable year, the taxpayer has been notified that an investigation under subparagraph (A) has begun, or is continuing, with respect to such corporation for such year.

"'(F) REGULATIONS—The Secretary of Labor may prescribe such regulations as may be necessary to the performance of his functions under this subsection.

"'(4) CROSS REFERENCES.—

"'For provisions relating to the authority of the Secretary or his delegate to require the taxpayer to furnish information, see subsection (a)(5) and the last sentence of subsection (c)(1)."

Mr. BOGGS. Mr. Chairman, I rise in support of the committee amendment.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Arizona.

Mr. UDALL. As the gentleman from Louisiana knows, it was my privilege to cosponsor the original bill which he introduced, and I want to state that I think the amendments he has proposed to it, and which the committee has approved, will strengthen the bill. I would further like to say that I am surprised at the tenor of the discussion here today. We are having a review of practically all our general trade policies. I think the real issue at stake—and I would like to ask my colleague from Louisiana if he agrees with me—is whether, in encouraging economic development of the underdeveloped areas, that narrowing the scope of the legislation was a very wise move by the committee. The real issue confronting us is whether the genius of American private enterprise, which we all boast about, will be given an opportunity toward helping the underdeveloped areas, and that is what we are concerned with here today. Our commerce today leaps over State lines; it goes abroad. American capital is already abroad. There is some competition, but when the balance sheet is totaled up at the end of the year we come out ahead of the game. But this legislation does not concern American foreign-trade policy. This legislation concerns putting private funds to work in helping the underdeveloped countries. Is that not a fact?

Mr. BOGGS. The gentleman could not be more accurate, and I thank the gentleman for his contribution.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from West Virginia.

Mr. BAILEY. I rise in opposition to the amendment, and I oppose the legislation in general.

Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BAILEY. On what ground may I get recognition for the purpose of opposing the legislation?

The CHAIRMAN. The Chair recognized the gentleman from Louisiana [Mr. BOGGS] for 5 minutes in support of the committee amendment, so the gentleman from Louisiana would have to yield to the distinguished gentleman from West Virginia.

Mr. BAILEY. At the expiration of the 5 minutes allowed the gentleman from Louisiana, may I be recognized to discuss the amendment?

The CHAIRMAN. If no other member of the committee rises in opposition to the amendment, the Chair will recognize the gentleman.

Mr. BAILEY. I thank the chairman.

Mr. BOGGS. Mr. Chairman, just one brief explanation of this amendment. This amendment simply puts into the law another condition in order to qualify for deferral. What it says in essence is that any American firm that goes abroad, to another country, should faithfully execute and uphold the labor standards of that country. I think from the point of view of the reputation of our country that it is wise that our people who operate in these countries should at least conform to the standards existing in those countries. There is no punitive intent involved in this proposed amendment at all.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from California.

Mr. ROOSEVELT. While I have serious doubts about the bill, I think the gentleman's amendments have most certainly strengthened it in many ways. I am not quite clear, and I wish the gentleman would elaborate for a moment, what the Secretary of Labor does to ascertain in a country what the minimum wages in that country are. Assume that the country has no minimum wage.

Mr. BOGGS. Of course, in that case he has to look to the standards prevailing in the industry.

Mr. ROOSEVELT. Average wage scales and so forth.

Mr. BOGGS. I might say to the gentleman under the procedures adopted some time ago by the President, the Labor Department has the responsibility for determining wage standards in other countries. This applies in the preparation of lists for trade agreement negotiations and so forth. So, the machinery is already in existence in the Department of Labor working through the labor attachés connected with our embassies.

Mr. ROOSEVELT. May I ask the gentleman whether the amendment he has submitted is acceptable to the organized labor movement?

Mr. BOGGS. It is; very much so.

Mr. PELLY. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. PELLY moves that the Committee do now rise and report the bill back to the House with its enacting clause stricken out.

The CHAIRMAN (Mr. NATCHER). The Chair desires to inform the gentleman that his motion is not in order.

Mr. GROSS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. GROSS moves that the Committee now rise and report the bill to the House with the recommendation that the enacting clause be stricken out.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Washington.

Mr. PELLY. Mr. Chairman, I should like to ask the opinion of the gentleman from Iowa; I should like to ask him whether he does not agree with me that perhaps this is a case when we should ask for the reading of the engrossed copy of the bill so that some of us may have the opportunity to study these amendments. Under the conditions that exist at the moment, there is a limitation on amendments and we cannot inform ourselves properly on what is in this bill.

Mr. GROSS. I think the best procedure, let me say to the gentleman from Washington, would be to adopt the motion to strike out the enacting clause. Failing in that, I think the next best course would be to recommit the bill to the Ways and Means Committee for this session of Congress. What the proponents of this bill want is to get the well-known tail in the crack in the door. That is all they want. They would accept anything; even down to the enacting clause, take it over to the other body, get what they want, and then bring it back here under the semigag rule of a conference report.

We have heard this amendment read. There has been almost no explanation, and there has been no opportunity to study it. There are not a dozen Members on the floor of the House who know what this amendment means, much less the one preceding it.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. DENT. For the information of the gentleman, this amendment is strictly a face-saving amendment. There is not anything in it enforcible. There is not any law you can point to that would guarantee anything. If it does guarantee anything, all it guarantees is that any American who invests money in Hong Kong can pay 9 cents an hour and be perfectly all right under the law. All it guarantees in any instance is a repetition of this very thing that is happening now.

Here is a letter that just came in against the minimum wage law in these United States. And what does it say? It comes from the Maidenform company. I think some of the ladies would know what I am talking about, perhaps the men do not. But the letter says that the corset and brassiere industry now is losing 17 percent of its industry to the Hong Kong market. There is nothing in this bill, there is nothing in this amendment that will protect an American worker.

Three years ago we imported 3 million cases of glass into the United States. In the past year we imported 8 million cases of glass. I want to say that if you continue to buy retail and sell wholesale you will not have to worry about being in business.

Mr. GROSS. Keep right on talking; I want to hear more. The gentleman from Pennsylvania is providing facts that all Members ought to know.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from West Virginia who has been trying to get time under this virtual gag rule and has not succeeded.

Mr. BAILEY. Mr. Chairman, for the information of the gentleman, I have been desirous of speaking on this legislation to say that it is not in the interest of our national security. Russia claims she has 75 crack divisions ready to take the field at an hour's notice. We have 21 divisions operative in NATO, including our own divisions. Within 30 days after the outbreak of hostilities those 75 Russian divisions would overrun the continent of Europe and seize all of the modern American plants that we have sent over there. They would not destroy them, but they would use them against us for the duration of the war.

This is the most silly, vicious legislation that has been proposed in Congress in the 14 years that I have been a Member of the House of Representatives.

Mr. O'KONSKI. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Wisconsin.

Mr. O'KONSKI. I think it would be interesting to know what companies already in existence would be the beneficiaries of this legislation. I think if we learn that, we would have a sad story.

Mr. GROSS. I would like to have a lot of information about this bill and what it purports to do. Practically nobody here today knows.

Mr. COLLIER. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. COLLIER. As a practical matter, let us assume we had a firm here doing $800,000 worth of business a year at the present time. Let us assume further that they are exporting $400,000.

Under this bill, would it not be possible for them to cut their production in half and establish a foreign plant and produce the goods over there, and ship it from a foreign nation, and thereby reduce by half the employment in the industry established in this country?

Mr. GROSS. I have no doubt the gentleman is correct. I make no profession of knowing what is in this bill now since it has been loaded with committee amendments that were never considered when there was general debate last March. I say again, I doubt if there are a dozen Members of the House who know what is now in this bill. This is a sad and sorry way to legislate. The bill is being written on the floor of the House and that is an irresponsible way to handle important legislation.

The enacting clause ought to be stricken and this proposal considered under full and free debate at some future time, if ever.

Mr. BOGGS. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, this legislation has been before the House of Representatives all of this session. I will say to my good friend from Washington, who complained about not having an opportunity to study the language of the bill or any amendments, that these amendments were printed in full on April 28 in the CONGRESSIONAL RECORD, with a full explanation of them.

In addition, and this is something I seldom do, I circulated all of the Members of our body attempting as best I could to explain what is involved in these amendments. Believe me, there is no intention here, no effort, and no desire to do anything that is not completely, totally above board, that anyone cannot examine under any conditions.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Washington.

Mr. PELLY. I know the gentleman has not tried to limit discussion, but many things have been brought up here which have brought questions from me. Under the manner in which this bill is being considered we cannot offer the usual pro forma amendments and then ask questions.

Mr. BOGGS. I have done the best I could to yield and to explain the legislation as best I could.

Let me say this: We live in difficult times. I would be the last person on earth to advocate exporting American jobs.

How do we judge so many of these matters? This is a piece of legislation which has the following support in the business community. It has the support of the U.S. Chamber of Commerce. It has the support of the National Association of Manufacturers.

And in the farm community it has the support of the farm groups, the Farm Bureau Federation and so on.

It has the support of all the labor organizations. I read you a letter which I have in my hand dated May 4, 1960, signed by Mr. Andrew J. Biemiller, director of the department of legislation, American Federation of Labor and Congress of Industrial Organizations. He says among other things,

Several days ago the House Ways and Means Committee adopted two amendments which it proposes to offer to H.R. 5 when the House resumes consideration of the bill. The first of these amendments is designed to restrict the benefits of the measure to foreign investment in "less-developed" countries so designated by the President. This change will hopefully increase capital investment by American business in underdeveloped nations.

The second amendment is the one we are talking about now.

He says:

This amendment will hopefully assure adequate minimum labor standards.

Mr. KEOGH. Mr. Chairman, if the gentleman will yield, does not the letter to which the gentleman refers close with a statement of approval?

Mr. BOGGS. Yes, it does. It closes with this statement:

The AFL–CIO urges you to support these amendments and upon their adoption to vote for H.R. 5.

I say to my colleagues, it is very difficult for us to comprehend some of the problems involved here. But the idea that this is some device or some scheme to deprive people of work in our country is just wrong. What this really means is that the genius of American business, as the gentleman from Arizona so beautifully stated a moment ago, can be employed in this cold war with the Soviets. The gentleman from West Virginia talks about the defense implications.

Well, anyone who thinks that the cold war is over just has to read the press and see what is happening at this very moment in Paris. I say to you, we must use every device we have at our command.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from New York.

Mr. STRATTON. May I ask the gentleman from Louisiana if this bill is designed to funnel these investments to the less-developed countries in the world, if the gentleman does not recognize that in many industries and the glove industry, for example, jobs are being taken away from people in this country precisely into these less-developed countries because of the fact that there is a great differential between the wages paid in those areas and the wages paid here in America and, therefore, this bill would, in fact, continue to take jobs away from this country?

Mr. BOGGS. No; that is not the purpose of the bill and I do not think it would have such a result.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. KASEM. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The Chair must inform the gentleman that is not in order at this time.

The question is on the preferential motion offered by the gentleman from Iowa [Mr. GROSS].

The question was taken; and on a division (demanded by Mr. GROSS) there were—ayes 101, noes 93.

Mr. BOGGS. Mr. Chairman, I ask for tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. BOGGS and Mr. GROSS.

The Committee again divided, and the tellers reported there were—ayes 107, noes 101.

So the motion was agreed to.

The CHAIRMAN. The Committee will rise.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5) to amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance, had directed him to report the bill back to the House with the recommendation that the enacting clause be stricken out.

The SPEAKER. The question is, Shall the enacting clause be stricken out?

Mr. BOGGS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 160, nays 232, not voting 40, as follows:

[Roll No. 96]

YEAS—160

Davis, Tenn.	Morris, Okla.	Walter
Durham	Morrison	Williams
Elliott, Ala.	Patman	Willis
Forand	Pillion	
Gilbert	Rogers, Tex.	

So the enacting clause was not stricken out.

The Clerk announced the following pairs:

On this vote:

Mr. Baring for, with Mr. Hébert against.
Mr. Scott for, with Mr. Morrison against.
Mr. Alexander for, with Mr. Thompson of Louisiana against.
Mr. Bonner for, with Mr. Johnson of Colorado against.
Mr. Sheppard for, with Mr. Elliott against.
Mr. Williams for, with Mr. Santangelo against.
Mr. Barden for, with Mr. Gilbert against.
Mr. Durham for, with Mr. Buckley against.
Mr. McMillan for, with Mr. Davis of Tennessee against.

Until further notice:

Mr. Walter with Mr. Allen.
Mrs. Green of Oregon with Mr. Short.
Mr. Willis with Mr. Taylor.
Mr. McDowell with Mr. Kilburn.
Mr. Brewster with Mr. Smith of Kansas.

Mrs. GRANAHAN, Mr. LOSER, and Mr. FRIEDEL changed their vote from "yea" to "nay."

Mr. WITHROW changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The Committee resumed its sitting.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 5.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose, there was pending the amendment offered by the gentleman from Louisiana [Mr. BOGGS] to the Committee amendment in the nature of a substitute. The gentleman from Louisiana [Mr. BOGGS] had consumed 5 minutes in support of the amendment.

Mr. MEADER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MEADER. Mr. Chairman, is it permissible for someone to speak for 5 minutes in opposition to the amendment?

The CHAIRMAN. The Chair will recognize the gentleman for 5 minutes in opposition to the amendment.

Mr. MEADER. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman is recognized.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Louisiana.

Mr. BOGGS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOGGS. First, Mr. Chairman, I ask unanimous consent that this not be taken out of the gentleman's time, but at the conclusion of the 5 minutes granted to the gentleman from Michigan, it is my understanding that all debate will have expired and that we will vote on the committee amendment and then return to the House; is that correct?

The CHAIRMAN. The gentleman is correct. The vote will be on the amendment to the committee amendment in the nature of a substitute and then on the committee amendment as amended.

Mr. MEADER. Mr. Chairman, I sought this time for the purpose of speaking briefly on the amendment, and also for the purpose of expressing my support of the legislation as a whole.

The amendment, as I understand it, simply requires that American foreign business corporations pay the going rate of wages abroad, which does not mean a great deal. I do not think the amendment is necessary to the bill at all.

I commend the gentleman from Louisiana [Mr. BOGGS] for having pressed for this legislation because it seems to me this is a practical step to enlist American private capital in the job of developing the underdeveloped countries of the world. That is a theme that I have been preaching ever since I came to the Congress 10 years ago.

It seems to me that economic development and the promotion of economic and political stability in the underdeveloped areas of the world and for the peoples who are emerging from colonialism and seeking to establish themselves in the world community, that that job of economic development, pursuant to our American traditions, belongs primarily to the private business community. This legislation, Mr. Chairman, would foster, encourage and stimulate private capital investment for the economic development of the underdeveloped areas of the world. It should be the role of government merely to support, encourage, and facilitate this natural economic process.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DENT. Did the gentleman from Michigan get up and ask for time to speak in opposition and would that include any of us who are opposed to the bill, since he is speaking in favor of the bill?

The CHAIRMAN. Under the rule, no one else can be recognized.

Mr. MEADER. Mr. Chairman, if the gentleman from Pennsylvania wants me to yield to him to make a statement, I will be glad to do so.

Mr. DENT. I do not think that is it. I just want to know if the rules of the House allow the time to be usurped by those in favor of the bill when some time is supposed, under the rules of the House, to be allocated to those who are opposed to the billl.

The CHAIRMAN. The Chair wishes to inform the gentleman from Pennsylvania that the gentleman from Michigan stated that he rose in opposition to the amendment, and the Chair recognized the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield for a parliamentary inquiry?

Mr. MEADER. I yield to the gentleman.

The CHAIRMAN. The gentleman will state the parliamentary inquiry.

Mr. HOFFMAN of Michigan. Is there any rule that permits any Member of the House to shape your argument?

Mr. MEADER. I think I am capable of making my own argument.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Ohio.

Mr. VANIK. Mr. Chairman, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VANIK. Mr. Chairman, regardless of what anyone says, this bill does one thing.

It reduces taxes for somebody; American business abroad.

The only issue is whether that somebody deserves this priority of treatment.

I think not. If we are to consider a reduction of taxes, there are other areas of more justifiable need.

My principal objections to this bill as amended are the provisions under which the tax deferral privilege is extended to the income of branch banking activities of American banks in foreign countries. There is no reason why the tremendous profits of these banking operations in these countries should escape normal taxation.

These banking investments are made under considerable protection of the American flag and are frequently interwoven with loans made by the Development Loan Fund, the Export-Import Bank, and the World Bank. The high risk portion of these loans are usually assumed by these other institutions which are supported by the American taxpayer.

The interest rates under which these American funds multiply in foreign lands are scandalous. They range as high as 20 percent in Peru, 24 percent in Chile, 36 percent to 40 percent in Argentina, and as much as 48 percent in Brazil.

If American capital is participating in the extortion of such exorbitant rates of interest in the underdeveloped areas of the world, the profits of such investment should certainly be subject to normal taxation, since these practices are incurring a tremendous injustice which the American people will have to correct in other ways at a cost many times the taxes involved.

I just want to say to the gentleman in respect to the amendment, I do not think the amendment improves the legislation enough to warrant its adoption because, regardless of what anyone says, this bill does one thing—it reduces taxes for somebody.

One issue is whether that somebody deserves this priority treatment. I think not. I think we have a great many other areas to think about first. It is for this reason that I oppose this legislation.

Mr. MEADER. I yield to the gentleman from New York.

Mr. BARRY. Does this not just defer taxes?

Mr. MEADER. This simply defers taxes, but it does stimulate money going into these countries.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield.

Mr. DENT. Is it not true under this bill that any profits made by an American investor in a foreign country can be used for planned expansion and for plant construction in another undeveloped country without paying taxes in the United States on any profit whatsoever?

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Louisiana.

Mr. BOGGS. The gentleman from Pennsylvania [Mr. DENT], continues to make these statements that have no foundation in fact. The answer to the gentleman from Pennsylvania is "No." He would not qualify under the provisions of the act.

Mr. DENT. Will you show me in this legislation where you prohibit, instead of encourage, development of underdeveloped countries, by taking the profits made by an investment company? I can read the bill.

Mr. BOGGS. Will the gentleman yield again?

Mr. MEADER. I yield.

Mr. BOGGS. The gentleman from Pennsylvania [Mr. DENT], has made this argument all afternoon. There is a formula set out in the bill called payroll and investment, and unless you qualify under that formula and other equally restrictive provisions, you cannot get tax deferment. As the gentleman stated, this is not a tax reduction.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. MEADER] has expired.

Mr. BECKER. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BECKER. Mr. Chairman, I just listened to the gentleman from Michigan rise to oppose the second amendment offered by the chairman of the subcommittee, the distinguished gentleman from Louisiana [Mr. BOGGS]. In the course of opposing the amendment, which according to the chairman of the subcommittee, was designed to greatly improve the bill, the gentleman from Michigan then proceeded to support the bill. This, Mr. Chairman, is what has happened to this bill from the first day it came on the floor about 6 weeks ago.

At that time, this bill, H.R. 5, was debated for many hours and then, because of the great opposition with no chance of passage, in the form the bill was offered, the Committee rose and the bill was set aside for future discussion. Now, today, the bill, H.R. 5, comes before the House, but we are told it is no longer that bill; that the subcommittee chairman, the gentleman from Louisiana, is offering two lengthy amendments that changes a great part of the bill. Under the rule today, each amendment has had 5 minutes of so-called explanation. Many Members protested that this explanation was certainly nowhere sufficient to clarify the many important issues involved.

Therefore, I feel that, when I am asked to vote on legislation of this magnitude and with a completely new concept, I cannot vote for it with any degree of understanding or intelligence, I am constrained to vote against this bill. When the original H.R. 5 was debated, there was no question in my mind that this would not only save taxes for certain industries, but would also jeopardize, to the greatest degree, employment in our country. This I cannot tolerate.

Perhaps if there had been sufficient time to debate and study the amendments that we were told would clarify this view, a more intelligent understanding might have taken place.

Mr. BOGGS. Mr. Chairman, I ask unanimous consent to extend my remarks at this point for the purpose of including an explanation of these amendments.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOGGS. This analysis is as follows:

The Committee on Ways and Means adopted two amendments to H.R. 5.

The first amendment deals with two subjects: First, it limits the provisions of H.R. 5 to income earned and reinvested in the less developed countries; second, it eliminates the so-called gross-up with respect to the dividend income received by foreign business corporations.

Limiting the provisions of H.R. 5 to the less developed countries conforms the bill to the suggestions of the Treasury Department and of the President in his budget message to the Congress this year. Under the bill as reported by the committee, the tax deferral privilege is available where the foreign business corporation derives most of its income from sources outside of the United States. Under the committee's amendment, this privilege is available only where most of the income is derived from the less developed countries. The foreign business corporation must earn at least 90 percent of its gross income within less developed countries and its subsidiaries must meet the same test in order for these subsidiaries to be qualified payor corporations.

The committee amendment limiting the provisions of the bill to less-developed countries also provides that the distribution rule relating to investment and payroll situated outside of the United States and also the rule relating to prohibited investments in the United States are to be amended to refer to investment and payroll situated in the less-developed countries and to prohibited investments outside of the less-developed countries. As a result the foreign business corporation will have the privilege of tax deferral with respect to its income from the active conduct of a trade or business only to the extent determined in relation to the ratio of its payroll and assets situated in the less-developed countries to its worldwide payroll and assets. Similarly a distribution will result if certain property situated outside of the less-developed countries is acquired by the corporation. The committee amendment does not affect, however, the provision presently in the bill which provides that not more than 10 percent of a foreign business corporation's income may be from the sale of articles which are sold by it for ultimate use, consumption, or disposition in the United States.

Under the committee's amendment the President of the United States is empowered to designate which foreign countries and which possessions of the United States shall be regarded as less-developed countries except that he may not designate any area within the Sino-Soviet bloc. An overseas department, province or possession of a country may be designated as a less-developed country even though the mother country would not be so designated. The committee amendment also specifies certain countries, in view of the fact that they are considered to be economically developed, which may not be designated as less-developed countries by the President for the purpose of this bill. These are: Austria, Belgium, Canada, Denmark, France, Federal Republic of Germany, Italy, Japan, Luxembourg, Monaco, Netherlands, Norway, Portugal, Sweden, Switzerland, United Kingdom of Great Britain, and Northern Ireland. This does not necessarily mean, however, that all countries other than the ones mentioned will be designated by the President as less-developed countries. This is a matter left to the discretion of the President.

The second part of the first amendment as I previously indicated eliminates the so-called gross-up with respect to the dividend income received by foreign business corporations. The committee has held hearings on the possibility of extending the gross-up concept to all dividend income received by American corporations from subsidiaries. This is now under consideration by the Committee on Ways and Means. In view of this it was concluded that it would be desirable to withdraw the gross-up provision in the present bill and apply the same rule in the case of foreign business corporations as is applied generally with respect to the gross-up for dividend income received from foreign subsidiaries. As a result, income on which the tax is deferred and which is placed in the reinvested foreign income account will not be increased by the amount of the foreign taxes paid with respect to this income. Also, the taxes which will be deemed paid with respect to this income will be only the portion of the taxes attributable to the income after the foreign tax. In other words, the concept laid down in the American Chicle Corp. case will continue to apply.

The second amendment relates to substandard labor conditions. A corporation will not be eligible to be treated as a foreign business corporation, or as a qualified payor corporation, for any taxable year if the Secretary of Labor determines, and certifies to the Secretary of the Treasury or his delegate, that such

corporation has during the taxable year operated in any less developed country under substandard labor conditions.

Procedures: The determination of the Secretary of Labor shall be final as to whether a corporation is ineligible by reason of operation in any less developed country under substandard labor conditions except that it will be subject to review by the courts—including the Tax Court of the United States—in a proceeding for the recovery of income tax or for a redetermination of the deficiency in respect of income tax.

An investigation may be undertaken by the Secretary of Labor, on his own initiative, or upon the application of any affected domestic party if the Secretary has reason to believe that a corporation has been operating in any less developed country under substandard labor conditions. It is not contemplated that the Secretary of Labor will undertake investigations unless he has sufficient information to warrant an investigation. Furthermore, in order for a domestic party to file an application for an investigation it must demonstrate, to the satisfaction of the Secretary of Labor, that it is affected by, and has an economic interest in, the question of whether the foreign business corporation—or the qualified payor corporation—is operating in any less developed country under substandard labor conditions. For this purpose an economic interest, for example, might involve the loss of sales, production, or employment due to the fact that a foreign business corporation or a qualified payor corporation is operating under substandard conditions.

It is not the intention of your committee that this provision be administered in a punitive fashion. Rather, it is anticipated that this provision will serve to make corporations that may have been operating under substandard labor conditions conform their labor standards to the required standards. Thus, in interpreting the language "for any taxable year for which" it is expected that the Secretary of Labor will wish to be satisfied that there is a pattern of operation under substandard labor conditions before making any determination.

The Secretary of Labor is also proscribed from making a determination with respect to any corporation for any taxable year unless the taxpayer has been notified during such taxable year that an investigation is underway. Should an investigation continue into the succeeding taxable year, the Secretary of Labor must notify the taxpayer that the investigation is continuing during such succeeding taxable year and is applicable for such taxable year as well. It is also anticipated that the Secretary of Labor will expedite the completion of investigations that he has undertaken and, insofar as possible, limit the course of the investigation to the taxable year under consideration.

Standards: The term "substandard labor conditions" is defined by comparing the aggregate remuneration for employment paid by a corporation against minimum standards obtaining in the less-developed country in which the corporation is operating. If such aggregate remuneration is below such standards, then substandard labor conditions are deemed to exist. It should be noted that the aggregate remuneration for employment includes all payments to or on behalf of employees, whether in money, services, goods, and so forth. This term comprehends not only direct wages but also fringe benefits and other payments for employment. The amendment provides a number of standards against which the aggregate remuneration is to be compared. The first standards are the minimum standards required under the laws of the country concerned. The standards required under the laws of the country are those that are applicable and generally in effect with respect to employers under the laws of the country concerned.

If there are no minimum standards required under the laws of the country, then the standards to be employed will be the average standards prevailing for other employers in the same industry in such country. If there are no other employers in the same industry because the corporation in question is the sole employer in this industry, then the standards shall be the average standards prevailing for other employers in similar industries in such country.

If the standards referred to above are not available for use, then the standards to be employed shall be the standards generally prevailing in the industries of the country concerned.

Mr. Chairman, I ask unanimous consent that all Members may have permission to revise and extend their remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. O'HARA of Illinois. Mr. Chairman, I am not a member of the great Ways and Means Committee on which Illinois is so outstandingly represented by our beloved dean, Congressman THOMAS J. O'BRIEN, and I would not presume to speak on the pending bill were it not for the fact that this is in a field of legislation in which I have some understanding from service on other committees and a great interest running back to the 81st Congress and the first year of the Truman administration.

Perhaps I should explain. President Truman had electrified the Nation with his point 4 program. The concept of that program appealed to the common sense of the American people.

In the development of that plan it was not intended that peoples in other and foreign lands could be helped by giving them doles. The concept was, and this is what appealed to the common sense of the American people, that they best could be helped by helping them to help themselves.

We thought, and I think soundly, that the best job could be done by encouraging private American capital to make investments in these undeveloped areas much as private capital in the developed areas of our own country earlier had made investments in the less developed areas. We thought that this would open the doors of opportunity and give challenge to the ambition of these peoples in undeveloped areas exactly as in an earlier period they had done to the peoples in our own then undeveloped areas.

But because of the risk of governments that might not be too stable and of currency problems a plan was devised of an insurance program guaranteeing American investors from these unusual risks. The jurisdiction then was in the Banking and Currency Committee, of which I was a new member. The present Secretary of State, the Honorable Christian A. Herter, then a Member of the House, was among the witnesses that appeared before our committee during the public hearings on a bill to establish a program of insurance for private American capital invested in these then undeveloped areas. Although a new Member of the Congress and of the committee, through the graciousness of Chairman Spence and Ranking Minority Member Jesse Wolcott, who in my appraisal constituted a team of statesmen of superlative quality, I was permitted to participate in the hearings and in the discussions in the measure of my great interest in the subject. I was enthusiastically for the program, but I did not wish it to operate without consideration of the necessity of protection for labor. That is, then as now, I could see the danger to the labor of our own country if, in the development of other countries, we were not concerned that the wages of the workers should be brought, as prosperity came to those regions, to something of our own scale.

Mr. Chairman, I think that my colleagues would find it informative and illuminating to read the public hearings of the Banking and Currency Committee when first this genuine type of legislation was before the Congress.

When I became a member of the Committee on Foreign Affairs I was no stranger to the foreign investment insurance program, jurisdiction over which had been transferred from the Banking and Currency Committee, where it had originated, to the Committee on Foreign Affairs. The program had worked well. It had not only paid its own way but it had made a profit and there were substantial reserves. I would say that its record pretty well compares with that of the Export-Import Bank, which itself at the outset had been controversial but which now is acclaimed by everyone. Mind you, this is insurance, not given away, but fully paid for by the premiums.

But last year the administration of the program, overconfident because of past successes when policies were sound, was reaching out for new and perilous worlds to conquer. It proposed to increase its coverage, without adequate additional premiums, to an extent that would have spelled complete ruin. When I presented the matter to the attention of the House in its consideration of the mutual security bill of last year I was very happy that my colleagues by an overwhelming vote struck out the provision that would have wrecked the entire program. I say happy, Mr. Chairman, not in a personal sense, but in a sense that this program seemed to me

so important if we were to work out a program of helping undeveloped areas to help themselves we could not permit the instrumentality of our effort to be destroyed by reckless administrative ambitions.

Now, Mr. Chairman, why were we interested in attracting private investments and private American businesses to these undeveloped areas? The answer is so simple that it should easily be understood by a child. We want a happy and a prosperous world. Wherever there is poverty there is unrest and there is danger. If we have goods to sell we can find no market for them in a country where there is only poverty. American ingenuity and American know-how can do so much wherever they are given a chance, and what it does in regions now undeveloped will bring back to us the blessings of a widened market and a spiritual lift of friendship.

H.R. 5, as I vision it, and strengthened by the amendments offered today, is just another forward step in the program that electrified the American people in the first year of the Truman administration. It gives American private capital a better chance to do the job. I urge its passage.

We cannot, with due respect for our taxpayers and the menace that lies in a constantly and alarmingly growing national debt, continue indefinitely to invest the public funds in helping undeveloped countries.

The money that we have put to such use, it has always seemed to me, is as water put in to prime the pump. Now that the pump is getting fairly started on the way to being primed we should not hesitate about helping the primed pump to function. I fail to see how my colleagues who have been loudest in crying out against our expenditures in our mutual security program in its economic phase can find consistency in opposing this bill which looks forward to the end of the necessity of such mutual security expenditures.

I might add, Mr. Chairman, that the general purpose of H.R. 5 is well understood in the city of Chicago. Some months ago, and I think by arrangement of our beloved dean, TOM O'BRIEN, the author of the bill, the gentleman from Louisiana [Mr. BOGGS] addressed a tremendous audience of the leaders of Chicago, giving in detail the contents of his bill. It was a most representative audience. The exporters and the importers and the manufacturers and the leaders of labor, and the experts of Chicago in foreign trade and other fields were there. In the week following Congressman BOGGS' address in Chicago I received 63 letters urging my support of this bill.

I am happy that the gentleman from Louisiana and the full membership of the Ways and Means Committee have seen fit to present amendments that meet the objections of those who have given it thoughtful study. I am especially happy that the gentleman from Louisiana has accepted an amendment protective of labor and that the bill as amended now carries the endorsement of organized labor as well as the organizations of manufacturers and other groups of our citizenry. It is essential to the well-being of our own people, as well as those in the undeveloped areas, that we keep vigilantly in mind that no permanent good will comes to them or to us unless a broadening prosperity in those areas is reflected in the wages and working conditions of the workers, more and more approaching our own.

The CHAIRMAN. The question is on the committee amendment to the amendment.

The committee amendment to the amendment was agreed to.

The CHAIRMAN. The question recurs on the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5) to amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance, pursuant to House Resolution 468, he reported the same back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. MASON. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. MASON. I am.

The SPEAKER. The gentleman qualifies. The Clerk will report the motion.

The Clerk read as follows:

Mr. MASON moves to recommit the bill H.R. 5 to the Committee on Ways and Means.

Mr. BOGGS. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The motion to recommit was rejected.

Mr. DENT. Mr. Speaker, I rise to ask whether or not I can clear the record by reading from the bill one line where I was questioned as to veracity?

The SPEAKER. All debate on the bill has expired.

The question is on the passage of the bill.

Mr. BAILEY. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 196, nays 192, not voting 44, as follows:

[Roll No. 97]

Forand	Rogers, Tex.	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Baring against.

Mr. Elliott for, with Mr. Scott against.

Mr. Santangelo for, with Mr. Alexander against.

Mr. Buckley for, with Mr. Bonner against.

Mr. Gilbert for, with Mr. Sheppard against.

Mr. Johnson of Colorado for, with Mr. Barden against.

Mr. Brewster for, with Mr. Williams against.

Mrs. Green of Oregon for, with Mr. Durham against.

Mr. Judd for, with Mr. Taylor against.

Mr. Davis of Tennessee for, with Mr. Kilburn against.

Mr. Thompson of Louisiana for, with Mr. Smith of Kansas against.

Until further notice:

Mrs. Blitch with Mr. Allen.

Mr. Landrum with Mr. Baumhart.

Mr. Vinson with Mr. Short.

Mr. Walter with Mr. Jackson.

Mr. Morris of Oklahoma with Mr. Bennett of Michigan.

Mr. Willis with Mr. Pillion.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

THREE HUNDREDTH ANNIVERSARY OF INCORPORATION OF CITY OF MARLBORO, MASS.

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent for the immediate consideration of a resolution (H. Res. 535), which I send to the desk.

The Clerk read the resolution, as follows:

Whereas the year 1960 marks the three hundredth anniversary of the incorporation of the city of Marlboro, Massachusetts, as a town on May 31, 1660; and

Whereas from the time of its first settlement in 1657 the people of Marlboro have figured conspicuously in the founding, growth, and defense of this Nation; and

Whereas the observance of the tercentenary anniversary of Marlboro will be celebrated June 10 through June 19, 1960, with impressive community ceremonies, large public gatherings, and widespread participation of Massachusetts citizens and visitors from other States and places; and

Whereas Marlboro is a beautiful community rich in historic interest, well known for its patriotic contributions, noted for its many famous sons and daughters who distinguished themselves in many fields of endeavor and many facets of American civilization: Now, therefore, be it

Resolved, That the House of Representatives extends its greetings and felicitations to the people of Marlboro, Massachusetts, on the occasion of the three hundredth anniversary of this community and the House of Representatives further expresses its appreciation for the splendid services rendered to the Nation by the citizens of Marlboro during the past three hundred years.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. BROWN of Ohio. Mr. Speaker, reserving the right to object, and I do not expect to object, I have reserved the right to object to find out if we are going to have any more legislative business today.

Mr. McCORMACK. There is no further legislative business today.

Mr. BROWN of Ohio. This will be the final legislative action?

Mr. McCORMACK. The gentleman is correct.

Mr. BROWN of Ohio. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

MARLBORO TERCENTENARY

Mr. PHILBIN. Mr. Speaker, May 31 of this year marks the 300th anniversary of the incorporation as a town of the city of Marlboro, Mass., in my district, and I am truly gratified that the House is making note of this outstanding event by extending its congratulations to the people of this historic Massachusetts community.

Actually, the history of Marlboro goes further back in time than the 300 years of progress which will be celebrated with impressive exercises from June 10 through 19. Marlboro is located in an area of Massachusetts which was settled by pioneer colonists in the very earliest days of American history.

Courageous bands of early settlers as early as 1657 carved out Marlboro from the wilderness and today many descendants of these pioneers still reside in the community. These brave settlers helped to establish a civilization, a tradition, a way of life, and a history which live to this very day in the heritage which is so fortunately ours.

These early settlers of Marlboro helped to establish for all America the basic institutions of democratic government. They helped to forge a record of magnificent achievement that lives to this day.

It is therefore fitting, Mr. Speaker, that the House should make note of the struggles and bitter sacrifices of the pioneer people of Marlboro so that we and our posterity may benefit from the remarkable legacy of accomplishment these early settlers have left us. In recognition of the incorporation of Marlboro as a town, Mr. Speaker, the House today pays profoundly felt tribute to this community and its people by the adoption of my resolution, which reads as follows:

Whereas the year 1960 marks the three hundredth anniversary of the incorporation of the city of Marlboro, Massachusetts, as a town on May 31, 1660; and

Whereas from the time of its first settlement in 1657 the people of Marlboro have figured conspicuously in the founding, growth and defense of this Nation; and

Whereas the observance of the tercentenary anniversary of Marlboro will be celebrated June 10 through June 19, 1960, with impressive community ceremonies, large public gatherings and widespread participation of Massachusetts citizens and visitors from other States and places; and

Whereas Marlboro is a beautiful community rich in historic interest, well known for its patriotic contributions, noted for its many famous sons and daughters who distinguished themselves in many fields of endeavor and many facets of American civilization: Now, therefore, be it

Resolved, That the House of Representatives extends its greetings and felicitations to the people of Marlboro, Massachusetts, on the occasion of the three hundredth anniversary of this community and the House of Representatives further expresses its appreciation for the splendid services rendered to the Nation by the citizens of Marlboro during the past three hundred years.

It is not possible for me in these brief remarks to recite in full the glorious history of Marlboro, but I would like to bring to the attention of my colleagues some of the highlights of this progressive community which I have the great honor to represent in the Congress.

Marlboro was incorporated as a town in 1660 by the Massachusetts General Court on petition from pioneer settlers from nearby Sudbury which was settled as early as 1639. It took its name after Marlboro town in Wilts County, England.

Marlboro, which became a city in 1890, now comprises about 21 square miles. The 1960 census gives Marlboro 18,759 residents, an increase of 3,003 over the 1950 count.

Like famed Rome, Marlboro is located on seven hills. It overlooks the gentle rolling valley of the Assabet in the central Massachusetts area. It is said that on a clear day landmarks some 40 miles away can be discerned in every direction from Sligo Hill since local claims have it that the city is the highest elevation 30 miles inland along the entire eastern

Atlantic seaboard. Few, if any, other communities have disputed this claim since Marlboro is 400 feet above sea level and is known as the Highland City.

Marlboro is known throughout the Nation for its famous shoe industry which dates back to 1836. By 1917, Marlboro was the world's eighth largest shoe manufacturing city, some 20,000 pairs being made daily. A few years later, it became the fifth largest shoe center in the United States, a remarkable achievement in comparison to the much larger cities manufacturing shoes. Shoe manufacturing is still one of the city's basic industries, but diversification has taken place in recent years, so much so that Marlboro now makes automobile batteries, metal stampings and dies, set-up paper and jewelry boxes, wire products, miners' lamps, industrial scale models, metal polishing plates, and industrial chemicals.

Mr. Speaker, in observance of its 300th anniversary, Marlboro has planned an elaborate program of events beginning June 10 and extending through June 19. Among the highlights of the observance will be a historical pageant with a large local cast to depict the growth and development of Marlboro from the time of its early settlement, the Revolutionary War, the Civil War, the industrial expansion, through to the World Wars I and II and Korean conflict of the present century.

In addition, a huge parade will take place on June 12 with participating units from the Army, Navy, and Air Force. Present plans call for one of the largest parades ever to be conducted in the central Massachusetts area.

At the request of the general chairman of the Marlboro Tercentenary Committee, Mr. Louis F. Ghiloni, I was privileged to extend invitations to the Marlboro celebration to the armed services and it has been gratifying indeed to obtain such splendid cooperation from the various branches of the service.

Maj. Gen. William J. Verbeck, commanding general of Fort Devens, will be reviewing officer at the parade, to which he has assigned the Fort Devens band, a platoon of troops, and color guard. In addition, Maj. Gen. J. F. R. Seitz, chief of staff, Headquarters 1st U.S. Army, Governors Island, N.Y., has requested a U.S. Army exhibit unit for display during the Marlboro celebration.

Rear Adm. Carl F. Espe, commandant of the 1st Naval District, Boston, is making available the Boston Naval Base band, a color guard, and Navy marching unit.

Col. William C. Lewis, commander, Westover Air Force Base, is insuring Westover participation in the Marlboro event. Rear Adm. Edwin J. Roland, commander, 1st U.S. Coast Guard District, Boston, is endeavoring to work out Coast Guard participation.

In addition, plans are being made for a flyover of C–119G type aircraft over Marlboro in the early evening of June 10, opening day of the tercentenary observance, through the cooperation of Lt. Col. Gardner W. Mills, Air Force Reserve, commander, 732d Troop Carrier Squadron, Medium—Reserve, Grenier Field, Manchester, N.H.

Marlboro is a city of beautiful homes and honest, industrious, hardworking people comprised of numerous, different racial backgrounds who work together with unity and loyalty to further the welfare of their beautiful city.

It is its people throughout the many generations which have transpired since its establishment who have made Marlboro the great city that it is, and is to these people, from the beginning to the present, that we pay our tribute today for what they have done in each succeeding generation down to this very hour to make this fine Massachusetts city stand out so brightly in the firmament of American communities. Godspeed to them all.

I would like to express my deep personal thanks to my good friend and colleague, the distinguished gentleman from Massachusetts, Majority Leader JOHN W. MCCORMACK, whose great interest and effective help have made possible the passage of this resolution.

I am also most grateful to Minority Leader CHARLES HALLECK; the Honorable EMANUEL CELLER, chairman of the Judiciary Committee; and the ranking minority member of this committee, the Honorable WILLIAM MCCULLOCH; and also the distinguished members of the Rules Committee, Chairman HOWARD SMITH; and ranking minority member, the Honorable LEO ALLEN, without whose kind assistance the necessary action on this resolution could not have been taken at this time.

I am especially thankful to you, Mr. Speaker, for permitting the House to depart from today's heavy schedule so that the good wishes and felicitations of this Chamber might be conveyed to the city of Marlboro on the occasion of its 300th anniversary.

NATIONAL FUELS POLICY

Mr. CHIPERFIELD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CHIPERFIELD. Mr. Speaker, I have introduced House Concurrent Resolution 666, which is designed to insure that America's fuels industries will be able to meet successfully the challenge of the future, in either peace or war.

The proposal will, when approved by the House and the Senate, establish a joint congressional committee to study the energy industries of the United States and make recommendations to the Congress for a national fuels policy. Such a policy would establish guidelines for the future conduct of America's basic energy industries—oil, coal, natural gas, and atomic power.

The Nation now has many separate policies affecting the fuels industries, but these policies are a crazy quilt of overlaps, conflicts, and loopholes administered by many different agencies. The consequent confusion is a detriment to the national security of the United States and threatens its capacity for the expansion necessary to keep pace with its growing population and ever-rising standard of living.

What is needed is a single, integrated policy covering America's vital fuels industries and this would be the end result of my resolution.

Immediate action on the national fuels policy resolution is necessary because the situation of all three domestic fuels industries is rapidly becoming critical. The petroleum industry is suffering from a huge oversupply of oil and prices have been declining for the past 3 years. The ills of the coal industry are well known, and the natural gas industry is the victim of artificially depressed prices. Unless these trends are stopped, and stopped soon, the future of this vital segment of the American economy appears exceedingly gloomy.

The following four reasons dictate the formulation and adoption of a national fuels policy without delay:

This step has been proposed by every independent commission or study group to investigate the problem of American energy resources.

This step will enable the United States to maintain a sound domestic economy capable of the expansion demanded by the dynamic years ahead.

This step will be invaluable aid in the current economic cold war with the Soviet Union.

This step is vital to provide a strong, stable energy base to meet the needs of a possible future national emergency.

This resolution is particularly important to the State of Illinois. In 1958, the last year for which figures are available, the value of fuel production in my State was nearly half a billion dollars. Consequently the health of the energy industries is vital to Illinois' economy.

I am hopeful this resolution will find speedy approval on the floor of the House and feel a similar proposal in the Senate should also be approved during the present session of Congress.

DEDICATION OF THE HORACE HARDY LESTER REACTOR FOR MATERIALS RESEARCH

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, under unanimous consent I include the following address made by me at the dedication of the Horace Hardy Lester Reactor for Materials Research, Watertown Arsenal, Watertown, Mass., May 17, 1960:

Brigadier General Rust, Major General Schomburg, Mrs. Horace Hardy Lester, the Rev. Raymond Calkins, distinguished visitors, ladies and gentlemen.

It is not unusual for me to visit the Watertown Arsenal. I have been coming out here and working with the commanding general of the arsenal for many years. Together we

have worked out many problems not only of interest to the arsenal and the people of Watertown and the surrounding communities, but also of great importance to the defense of the United States. So it is not uncommon for this Member of Congress to visit the arsenal for various considerations and for various occasions.

Today, however, the situation is different. Today this is a great occasion. At this time we are here to mark a great milestone in scientific production here at the Watertown Arsenal. For me to have a part in this great occasion is not only a deeply felt honor but I believe it is somewhat a recognition of the labors that have been devoted to the work of this great arsenal operating in the defense of the Nation.

Today we are dedicating something new. In doing this it is my desire to pay tribute to those responsible for this work. As it always has been, as it is now, and as it will be in the future, the creation of something new requires the cooperation of many minds and many hands all the way from the dreams to the final reality.

The blazing of a new trail always requires complete cooperation of many people. There are those who plan it, those who get the operations under way, those who engineer and invent the processes and elements that must be developed, and finally, those who must do the work. A tremendous amount of time is required before this atomic reactor is actually ready to be constructed. Many persons have had a part. It is to all these people, the planners and the workers here at the Watertown Arsenal, we must give our thanks and appreciation for their interest, their loyalty, and their workmanship. I am sure that everyone here will agree with me that at the Watertown Arsenal is to be found some of the finest employees and loyal workers in the entire United States. Dedicated to their work, and dedicated to their country, they strive to do a perfect job. For this, not only the United States Army, but the people of this country, are grateful. Employees of this caliber and of this quality are invaluable in the defense of our country.

In the directing of our attention toward those largely responsible for this dedication today, we must give notice to the outstanding contributions and labors of the distinguished commanding general, of the Watertown Arsenal, Brig. Gen. C. E. Rust. The work he has accomplished, the contributions he has made, the problems he has surmounted, are worthy of the highest commendation. In one year, General Rust has done an outstanding and a most remarkable job at the Watertown Arsenal. It is men of his quality and ability that provide this Nation with a sense of security and confidence in their military forces. I am proud and pleased to have had the opportunity, as brief as it has been, to work with General Rust and to know him and his charming and capable wife. I wish them every success in their future undertakings.

In this dedication today it is our purpose to show our appreciation as a Nation and to honor the late Dr. Horace Hardy Lester, who lived to observe and indeed to participate in the early phases of one of the greatest scientific revolutions people of this earth have ever experienced. We are gathered here at the site of this nuclear reactor, evidence in itself of what has been happening so fast to our way of life—nuclear energy for economical power production is near and perhaps we'll see the harnessing of the energy of the sun tomorrow.

Here with us today, participating in this dedication, is Mrs. Horace Hardy Lester, the able and charming wife of Dr. Lester. All through the years of scientific research Dr. Lester was indeed fortunate to have constantly at his side the encouragement and the inspiration of his wonderful wife. Just as he did, she too has lived to observe and to experience at first hand some of these great scientific developments which mean so much to people all over the world. Just as many of you are, I am extremely pleased to meet Mrs. Lester and to have her here with us today.

Dr. Lester saw all of this nuclear development in his day. It was not until 1896 that Wilhelm Conrad Roentgen discovered X-rays and 1903 saw the discovery of radioactivity. A nuclear reaction consumes the fuel of this reactor and releases radiation in the form of neutrons for research yet the neutron was not discovered until 1932, less than 30 years ago.

Radiation from this reactor will enable your scientists here to study, understand, and repair fundamental defects in the materials used for the production of weapons of the future. The same studies will be applicable to the needs of all of us in our daily life. Materials Research is receiving much attention and emphasis by the Department of Defense and the scientific groups of the Nation. Our military requirements in particular are extremely demanding in this age of space. The very best equipment designed by the experts is limited by the quality of available materials from which the hardware must be manufactured. This limitation is one of extreme importance to the national defense. Progress must be made in this area—we must go forward and produce more basic knowledge to apply in this area. We must do this with optimism and confidence. Your record here at Watertown warrants such optimism.

It is indeed commendable that your Materials Research Office here at Watertown employs a scientific staff of such competence that the Atomic Energy Commission has awarded license to build and operate a nuclear reactor. I know how severe the requirements of this agency must be and I am pleased, but not surprised, to find such a basic scientific capability at the Watertown Arsenal.

It is estimated that new knowledge available for adaptation to the needs of man now doubles about every 10 years. New knowledge derives directly from basic research. Dr. Lester was a strong promoter of basic research and a recognized pioneer in industrial radiography. Early in his career at Princeton he worked with the great Thomas A. Edison. Any Army officer who knew him will say that he begged willingly, prodded, and argued incessantly for better laboratories and equipment here at Watertown Arsenal. As your representative I was not spared and spent much time here and in Washington obtaining support for work inspired by people like Dr. Lester.

Dr. Lester wanted to keep this arsenal, our arsenal, in the front lines of progress and we have, with the help of such dedicated men, accomplished much. In 1948 the American Society for Metals, the largest metal society of the Nation, credited Watertown Arsenal with eight milestones of progress from 1900 to 1950, more firsts than any other single contributor. These included the first large alloy steel weldments for gun carriages, and centrifugally cast cannon tubes in the 1920's. In 1922 Dr. Lester was personally responsible for the development of radiography for foundry control. Later the spectrograph was developed for routine chemical analysis. Molybdenum high-speed steel was a Watertown Arsenal first as were cast armor plate and carbide cored ammunition. In the 1950's inspired by Dr. Lester this arsenal led the way in the development of the new metal titanium.

Now in 1960 we have here the first Army research reactor. Research must precede development and production and throughout the years it has been this capability to do high-quality research which has given us much of our workload in the shops. The welded gun carriage of 1929 helped to keep us active in depression days—the centrifugally cast cannon tube made possible an increase in our production capability in World War II of many hundreds of percent. We are now in the missile business.

It is important that the arsenals keep an "in house" capability to advise the Chief of Ordnance, prepare technical specifications for procurement of weapons and inspect the items purchased. These responsibilities cannot be delegated. To keep such a capability you must do some of the research, development, and production yourselves. Only by practicing your professions and trades can you remain capable and progressive. You are a vital part of the science-industry-ordnance team which is so important to the defense of our country. To this extent our capability for preparedness depends upon you.

You are indeed fortunate to live here in one of the most important centers of technical knowledge in the world. Within a 50-mile radius of Watertown Arsenal are 45 educational, 26 electronic, and 28 research, development, and engineering organizations. Your position offers mutual opportunity for important exchange of technical views between universities, the industry, and the Army, a rare opportunity indeed to cross the communication barrier and tell the Army's story, its needs, and its problems to the scientific community.

My message to you today is this: Continue through the efforts of dedicated people like Dr. Lester to demonstrate new and progressive ability and I assure you that I will continue as I have these many years to fight for your cause here, and in Washington in the Halls of Congress.

AREA ASSISTANCE BILL

Mr. ROBISON. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. WIDNALL] may extend his remarks in the body of the RECORD and may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WIDNALL. Mr. Speaker, today I am offering for consideration a new administration area assistance bill, H.R. 12286. This proposal incorporates eligibility criteria that the President in his veto message of May 13, 1960, stated he would accept. You will recall at the time the depressed areas bill was debated by the House, I pointed out that for 5 years the administration had been endeavoring to obtain passage of sound legislation that would be helpful to the chronically blighted and depressed areas. At that time, I offered as a substitute the administration bill that had been introduced by the gentleman from New York, Representative CLARENCE E. KILBURN. As the President said:

> The people of the relatively few communities of chronic unemployment—who want to share in the general prosperity—are, after 5 years, properly becoming increasingly impatient and are rightfully desirous of constructive action. The need is for truly sound and helpful legislation on which the Congress and the Executive can agree. There is still time and I willingly pledge once again my wholehearted cooperation in obtaining such a law.

If there is a genuine desire to be helpful to these chronic areas certainly there

is sufficient time for Congress to act. I would like to point out at this time the major items in the new bill:

First. The new eligibility criteria includes 1 more major area and 11 smaller areas than would the criteria in the original administration bill. In a spirit of compromise these criteria are those contained in the bill as it originally passed the Senate.

Second. The bill authorizes $75 million in loan assistance for the construction or refurbishing of industrial plants. It should be pointed out that the vetoed bill also provided $75 million for this purpose.

Third. Federal loan assistance is limited to 35 percent of the aggregate cost as in the original Administration bill and State or local participation must not be less than 15 percent. The balance of the funds would come from private sources and certainly a 50 percent participation can be expected for any project that offers promise of lasting benefits to the community.

Fourth. Housing and Home Finance Agency public facilities loan authorization would be doubled from $100 million to $200 million. The Agency would be required to give a first priority to applications for public facilities that will truly serve an industrial plant construction or refurbishing project authorized by the act. It also requires HHFA to accord next an equal priority to applications from (a) areas of substantial and persistent unemployment designated under the act, (b) small municipalities—which hold the only priority under existing law.

Fifth. A new section authorizes $1.5 million annually for vocational education assistance in areas eligible under the act. The original administration bill contained no specific dollar authorization.

Sixth. An authorization of $1.5 million annually for technical assistance includes studies of economic growth potential to eligible areas.

Seventh. Two million dollars is authorized annually for technical assistance to low-income rural areas and one-industry small towns to help them develop manufacturing activities and to diversify so that their economic vulnerability may be reduced.

Eighth. The bill provides Presidential appointment and Senate confirmation of an Area Assistance Administrator in the Department of Commerce. The President pointed out in his veto message that—

> S. 722 would have created a new Federal agency and would in consequence mean many unnecessary additions to the Federal payroll and a considerable delay in the program before the new agency could be staffed and functioning effectively.

Mr. Speaker, the people in these truly critical areas have a right to expect speedy action on the part of the Congress. As outlined by the President in his veto message, this is a bill that can become law.

GENERAL LEAVE TO EXTEND

Mr. SISK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill H.R. 7155 under consideration earlier today.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

THE LIMESTONE INDUSTRY

Mr. KASEM. Mr. Speaker, I ask unanimous consent that the gentleman from West Virginia [Mr. STAGGERS] may extend his remarks at this point in the RECORD, and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. STAGGERS. Mr. Speaker, the wave of destiny demands a strong America. To have a strong America, we must have strong agricultural production. We are being threatened by too many sources in the world today, and this means that we must remain stronger at home.

With agriculture holding the responsibility of keeping the "breadbasket" of the United States and the world filled, I would like to point out the following as recommended reading for each and every Member of the Congress today:

WE NEED THE LIMESTONE INDUSTRY ON OUR TEAM

(Talk by George H. Enfield, Extension Agronomist, U.S. Department of Agriculture, before the 15th annual convention of the National Limestone Institute, Inc., Washington, D.C., on January 19, 1960)

Bob Koch called me this last spring and he said, "How would you like to appear on the Limestone Institute Convention program?" You know, I was delighted. Back when I first started in agriculture after graduating at Purdue, my first job was to go into the laboratory and make tests on limestone for neutralizing value and fineness. So I thought it would be nice if I could come here and talk about your industry—the industry which makes the farmer a profit. Then I thought that I would like to come and give you an idea of what Extension really is. I thought, too, that it would be nice to come and see if there was not a possibility in making some changes. You see, we can always get crazy ideas and unless you get an idea now and then, there is no chance for change. You may think that some of these things are actually crazy. It doesn't make much difference to me though.

Now, really what is Extension? Extension is getting the agricultural and home economic information in usable form and out to the people. It is to furnish them with facts so they can make wise decisions and try to get farmers to change. Now we have been trying to get them to do something about agricultural limestone but it seems like an uphill proposition. Recently the Extension Service looked over their job and said—what is the major field of our endeavor—where should we put the emphasis?

Efficiency in agriculture was first. Further progress in the direction of improved efficiency in agricultural production is not only necessary, but mandatory. That was mandatory from the laws in the beginning. Limestone has long been recognized as one of the first steps in developing an efficient crop production program. To accomplish efficiency in all fields of agriculture, Extension has tried to cooperate with industry and other governmental agencies to hasten the adoption of proven practices and to get them universally accepted by all. As production technology increases there is a need for changes in farming practices. Those who accept change have a real opportunity to not only help themselves but to help the community and the Nation as well. Research results help us to achieve higher standards of living only if we actually get these new practices put into effect.

Efficiency in marketing and distribution is second. In this field we hope to accomplish several things. We hope to reduce the cost of marketing farm products, we are trying to expand the market, and we are trying to help people understand the marketing system. If we are able to develop a better atmosphere for the limestone salesmen to operate in, we believe we will have accomplished one of the things which we set out to do. If your salesman is the right kind of a man and we are able to keep the right kind of a frame of mind in the farmer, it should make it possible for your products to be moved more easily into the market and the farmer will be as happy to pass the time of day with your salesman as he was with the merchants in the old time grocery store.

Next is conservation, development, and use of natural resources. The close-knit interdependency of soil, water, minerals, plants, animals, and man constitutes a seamless web of life, and it defies the efforts to deal with one of these resources effectively while ignoring the other. The pressures on our resources are growing year to year. We hope to encourage the development of these resources and help plan for their wise use. This is emphasized in our efforts to use limestone products on the soil for the purpose of establishing adequate conservation crops or covers for our land.

Proper management on the farm and in the home is important. The decisions to be made on the farm today are probably as numerous and more varied in subject than in any area of industry. The alternatives are many and unless all the factors are carefully considered, the choice may not result in a greater achievement or a greater satisfaction to the family. Extension tries to make the facts available to farmers so that he and his family might make decisions that are more than satisfying to the whole family.

In family living Extension's duty is not only to make more money for the farmer but its ultimate goal is to develop a citizen that is more cognizant of his obligation to his community and the Nation. Much of the work of this area is done in the field of home economics. Our efforts are with the idea of making the home life more meaningful to all.

Youth development is another of Extension's objectives. The rapid increase in the number of youths calls for a specially oriented program. It may be a surprise to some that the ultimate goal in 4-H clubs and older youth groups is not as it was in the past—which was to make its members better farmers for tomorrow. Today we try to better equip youth for the challenge of tomorrow, whatever his field of endeavor might be. It is significant, I think, that 9 out of every 10 boys on the farm today will need to find some other livelihood than on the farm if he is going to have a job by 1975. 4-H aims to help the young people acquire knowledge and skills, enjoy useful work, develop talent, appreciate values, recognize the importance of science in agriculture and home economics, explore career opportunities, appreciate nature, cultivate principles of healthful living, strengthen personal standards, and gain abilities and understanding to work cooperatively with others.

Leadership development is one of Extension's major contributions that will be so necessary in the future. The interdependence of the farmer on the other segments of society makes it imperative that the lead-

ership be developed to act as a catalyst for the group action and the betterment of society itself and to his community.

In the Extension Service there are countless opportunities for leaders to gain stature and at the same time perform a great service to others. Leaders are not born, they are developed. In this respect Extension has not only afforded the opportunity but tries to help, encourage, and train.

Community improvement and resource development need assistance. Extension has the responsibility of developing and organizing programs that have benefited both the farmer and nonfarmer resident. Community improvement ideally should involve all the people within the area. It must be developed to achieve the greatest rewards to society as a whole and geared to the speed of change acceptable to those affected. These efforts should result in the achievements that are satisfying and mutually beneficial. In short, it should make living more worth while.

We also believe Extension has a part to play in public affairs. The complexity of public problems has brought Government intervention in many fields. People traditionally desire freedom from such actions. Extension has been looked to for a long time for help—not for the decision—on how people should think, but for the facts and all the facts so they can make a better appraisal of the situation themselves. This is really a new field, but it must be given attention if the farm people are going to be able to make the kind of decisions they will need to produce their greatest satisfaction for them.

Now let's look a little at the aglime situation. But, first, our clientele. Our clientele are farm families primarily, but it may include urbia, suburbia, and it includes farm organizations. It includes all organizations that are interested in the farm and the farm people. It includes the handlers of farm products and suppliers. This is the limestone producer, the trucker, the railroad man, and it also includes institutes like the NLI that try to help make liming meaningful to the American farm. What is the situation about lime in this country? Sure there's a need for lime. Here are two examples: New York and Tennessee. In New York from about 28,000 soil samples they find that about 70 percent of their agricultural lands are acid enough to need lime. Go to Tennessee—with twice as many soil samples tested—and you get the same kind of a picture. There is a need for more agricultural lime. Why isn't this need noticed? Why do people fail to recognize this need? Is there no profit in it? Let's look at the results from one State—Pennsylvania. This is not just a 1-year trial, but the average of 28 years. This soil is not extremely acid; it's only medium acid, a pH of 5.5. You Hoosiers know that there are many soils in your State with pH even below 4.0. Now, as a result for applying aglime there is a large increase from 64 bushels up to 80 bushels of corn. Oats are not affected much. However, the hay was increased greatly. The gross yearly return per acre, $39 compared to a $7 cost. Almost $31.50 per acre per year more than the unlimed land. Now I'm certain that even up in Vermont, where they package agricultural limestone in beautiful bags and spread it with some of the best equipment that I know of, you don't charge delivered and spread on land as much as $125 a ton. Now that's what that limestone is actually worth—7 tons spread over a 6-year period and it returned back to the farmer a little over $880. It's a dandy product that you have. Limestone—how much do we recommend and how much do we use? I didn't bring any figures because it varies from time to time, and who makes the recommendations? The recommendation, you may say, is 80 million tons annually. Some others may say 50 million tons annually. How much do we use? Sixteen to twenty-two to twenty-five million tons. But really what does that mean? It means that if you would do the job for 10 years in a row, you would just barely have the job completed. Our land needs more than 80 million tons. You need to get the job done now, not 10 years from now. Ten years from now you've got to do the job all over again.

Let's get down to farm size. I picked a 240-acre farm. And what do we see on this farm? They started out to make an estimate of how much limestone it really needed. Forty acres does not need any limestone at all. Twenty acres need 3 tons to the acre. And it looks like another 80 acres needs 4 tons to the acre; and another 100 acres needs about 2 tons to the acre. Can you see the reason for soil tests in a situation like that, and this is not exaggerated. In fact, it should be chopped up more than that. Actually, you will probably find that much difference in any one field rather than that one farm. If you put limestone on according to what you find in one field, or what the average is for the farm we would need about 3 tons per acre. Put 3 tons on fields that need two tons or less—what do you get? Too much investment and the farmer doesn't get the returns on the investments he really expects. You put 3 tons down when you need 4 tons and then what happens? You think that your darned old limestone is no good. You put 3 tons on where you don't need any at all and then what do you say? Limestone is worthless. That's the reason we recommend that you have a soil test—in order to get satisfied customers from the good product that you people are producing and selling. I have here an example now as to what we are doing. I want to show you what it's costing this farmer. Let's say he starts buying limestone like he normally does at the present time. He gets about one-tenth as much as he needs. That's about what he buys each year. Now it doesn't cost him very much over the period of time if he just keeps adding on a little bit of limestone and provided we have someone to pay for about 50 percent of the cost of the limestone delivered and spread for him. This is based on limestone normally selling for $5 a ton. I use $5 because that's about the average in the United States. Then I had someone pay for 50 percent of it. So actually our product only costs the farmer $2.50 a ton but he put on about one-tenth of what he needs to complete the job in 1960. By 1975, where will he be? This man would have about $25,000 more money to handle it but you see it is not how much do you handle, it's how much profit do you make. The profit line looks just about the same. Limestone costs a little bit; the returns are great. You say that $31.50 is too high. I didn't use that figure. I cut it less than half. It was only $15 an acre that I used in calculating these results. How much does a man really make? He has a little over $22,000 profit by 1975, enough to buy him a brandnew home or a new car every 5 years from the use of the product which you men are now producing. Now that's the way we have been trying to sell limestone in this country. Let's take a look at another situation. Now I'm going to say to Mr. X, "The sale's off. You don't buy limestone any longer for $2.50 a ton out of your pocket and $2.50 a ton paid by someone else. I'm going to charge you $6 a ton." You see, that's a dollar above the average. All right, what does it really cost? "Oh," he says, "I don't have the money." "Well, go down to the bank and borrow it. It costs you 7 percent if you go down to the bank and borrow money for limestone, that's if you can borrow it and I think you should." So if there's a little increase in the cost down here, it should cost you roughly $3,000 to get this farm limed all at one time. Now, what did he do? He bought 540 tons for 180 acres and slapped it all on according to need as indicated by the soil test. Now that's in the year 1960. Then about 8 years later he came along and put on 2 tons more on the land. You need that much for maintenance. So he put on another investment. How about his returns? His income goes up $35,000. Now let's just say the costs are high compared with the first example where the farmer never got his farm limed. Let's look at the profits if you wish. The profit situation in the first 3 years looks a little bad. You don't make money out of limestone the first year you put it on. You hardly make anything the second year. You've got to grow the crops and then harvest them and feed them to the livestock to get the return. But, after that he's $6,000 better off.

Are you limestone merchants trying to do the best job for your farmer customers and for yourselves? Why not tell him the whole benefit? Why try to clip the dog's tail off as fast as the hair grows out? The way we've been trying to sell limestone is to get the farmer to use enough limestone to correct the acidity found each year. You have been advertising limestone sales—50 percent off. Now that's what the man really hears before he opens his eyes and you haven't taken that sign down for the last 10 years. He says, "How much does it cost?" You see, he's not caring whether there's 50 percent off or not. But he finally reads the sign—limestone $5 a ton—cost now $2.50. But then let's look at what he really sees when he looks at the whole story. All sales limited to about one-tenth of the farmers' needs—see that's the way we've been trying to correct soil acidity in this country. You limit the quantity he can get. You've fenced him in.

Limestone is about the only product sold on the basis first ton one-half price—the remainder full price. What do we find in Kansas? This is a very recent survey too. One out of six farmers say at the end of the survey their neighbors are not using enough limestone. Why, they don't know very much about their neighbors—that's the only thing that that tells us. We know very well that the neighbors need more lime than that. They're very modest about what they think their neighbors need.

Three out of four people say they have never seen an ad for limestone for agricultural purposes. That is promotion work. Thirty-eight percent say they have seen demonstrations. We believe that Extension is doing as well as industry. You're getting 25 percent of the people—we're getting about 38 to 40 percent of them. Now, four out of five say they have used some limestone in the last 5 years—so they recognize the need for it. I'd ask you to remember two words—need and want. If they recognize the need, and that's something that Extension should do, want is created by a salesman. here's what we really need in this country today. Four thousand full-time limestone salesmen that are able to sell ten trainloads of limestone a year. You say that's just outrageous and no one can do it. All he needs is to sell 40 customers, on the examples I showed you, 500 tons each and he's got the job done. If you will put that many salesmen on the road—you notice I charged a dollar more for your product than the $5 average selling price. You ought to have the faith in your product and the ability of a good salesman. You need this extra dollar. This salesman ought to be an $8,000-a-year man and you may want to get on the road yourself. And then you should followup with another $2,000 expense account so he can operate like a real salesman. And then you'll need another $2,000 for promotional materials. You need another $1,000 for some research to keep your program before the people, even if it's no more than public relations. The trucker needs $2,000 extra money so he too has an incentive to do a good job when he spreads the limestone. Add another

$1,000 to the secretaries' salary so she will answer that telephone with a cheerful voice when those orders come rolling in. This will leave $2,000 for the stockholder and an extra $2,000 for the business manager.

This is our story. This is our suggestion. Let's see what industry has done. Fertilizer companies, I know, recognize the need for lime. More nitrogen is being pushed on our farmland year by year and every time they sell nitrogen they feel the need for a little more lime. If I were to go out today and try to sell limestone, I believe I would sell nitrogen because sooner or later I know they would have to come to come to me and buy lime. The more nitrogen we use the more acid our soil gets but this is no reason to stop using nitrogen. See how you create a customer? That's the way to do it—sell the other man's product and they'll come and buy yours. This is the situation I think for today. The fertilizer industry would like to have you on their team; Extension would like to have you on their team; but we need 4,000 players from your field. That's what we really need from the industry to make a success.

Gentlemen, it's been a pleasure for me. I hope it has given you some thoughts you can use.

COLLAPSE OF THE SUMMIT CONFERENCE

Mr. KASEM. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. VANIK] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. VANIK. Mr. Speaker, I want to take this time to call the attention of this body to today's substantial gains of defense industry stocks with the collapse of the summit conference.

It is indeed a strange paradox that bad news for the world should be such good news for the stock market. The defense group of stocks, aircrafts, missiles, and electronics, as well as steels, took a sharp rise in the trading which was the heaviest in more than a year, as the ticker tape ran considerably behind floor transactions.

If prosperity in America depends on expanded defense production, it is time that we find a more suitable alternative.

BIRTHDAY GREETINGS TO SENATOR JAVITS AND SENATOR KEATING

Mr. HALPERN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HALPERN. Mr. Speaker, it is my great pleasure to call to the attention of the House the fact that today, May 18, is the birthday of our two distinguished Senators from New York, JACOB JAVITS and KENNETH KEATING. I believe that it is a unique situation that both Senators from the same State will cut a birthday cake on the same day.

We in New York are intensely proud of our two Senators both of whom were former Members of this House. Their able representation of the people of the Empire State has earned them a richly merited acclaim.

I am proud to count JACK and KEN among my good friends and I want to express my heartiest congratulations and every best wish to them on this their doubleheader birthday.

In so doing, Mr. Speaker, I am certain that every Member of this House shares the warm feeling, high regard, and deep affection for both of these fine gentlemen and great legislators, and join in this sincere wish for many, many happy returns of this significant day.

ONE HUNDREDTH ANNIVERSARY OF NOMINATION OF ABRAHAM LINCOLN

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Iowa [Mr. SCHWENGEL] is recognized for 2 hours.

Mr. SCHWENGEL. Mr. Speaker, I know of nothing that the people of our country need more than an intelligent and understanding patriotism.

I believe that the study of history can be not only a most effective teacher of patriotism but maybe the only teacher of real patriotism. Our early forefathers understood this. Their successors endorsed this idea when they, in various ways, demonstrated their belief in the importance of history, including required study of American history in our public schools. They knew, as we should, that the more we know about the struggles of our Nation, the great men who initiated great ideas and led it and the better we understand the principles which sustain its people in periods of crises the deeper will be our feeling for our country.

We need to understand, too, Mr. Speaker, that our idea about patriotism can and maybe should change; ours, I believe, has changed. It has broadened since the time of Andrew Jackson and even since the Civil War period. The age we are privileged to live in may require a further extension of our idea of patriotism.

Therefore, Mr. Speaker, and because it is historically significant, with your consent and with consent of this House, I have chosen to speak today on a subject of great moment.

THE POLITICAL COVENTIONS OF 1860, OTHER THAN THE REPUBLICAN

On February 2, 1860, Jefferson Davis introduced into the Senate of the United States a set of resolutions which were intended as a final statement of the terms on which the South would consent to remain in the Union. They were as follows: First, the Northern States must repeal their Personal Liberty Acts; second, the fugitive slave law must henceforth be rigorously enforced; third, Congress must assume and discharge absolute responsibility for the protection of slavery in every territory of the United States; and fourth, the freeport doctrine, as enunciated by Stephen A. Douglas in his debates with Abraham Lincoln in the summer of 1858, must be finally and formally repudiated.

The Democratic conventions of the spring and summer of 1860 began with the meeting at Charleston, S.C., on April 23. Although the committee on the platform approved the Davis resolutions of the preceding winter, the majority of the delegates—as opposed to the party machinery—rallied to the support of Douglas, who, without a single dissenting vote was the choice of the northern Democrats. Thereupon the Alabama delegation, headed by the fiery William L. Yancey, haughtily arose and marched out of the hall, followed by the majority of equally wrathful delegations from South Carolina, Georgia, Florida, Mississippi, Louisiana, Arkansas, and Texas. This left Douglas with less than the two-thirds support traditionally necessary for nomination by a Democratic convention; the remaining members accordingly adjourned, to meet at Baltimore on June 18.

Soon after the Charleston convention adjourned, to reassemble in Baltimore, the Constitutional Union Party held its first and only general convention, at Baltimore, on the 9th of May. Most of the States were represented, though not in all cases by delegates duly elected in primary meetings and conventions. Young as it was, the party was divided into two wings. The southerners, mostly representatives of the still surviving native American sentiment, desired to nominate Gen. Sam Houston, of Texas. The old Whigs of the North did not relish such a candidacy. They were adjured not to pay too much attention to gentility, but to take a candidate who, rough as he might be, would carry many of the Southern States.

Two votes only were necessary to effect a nomination, and on the second ballot John Bell, of Tennessee, secured the nomination as President and Edward Everett, of Massachusetts, was the unanimous choice for second place on the ticket.

The following month in Baltimore the Democratic regulars split, the majority reaffirming their support of Douglas, and the bolters naming John C. Breckinridge, of Kentucky. Alexander H. Stephens, of Georgia, one of the ablest statesmen of the South, destined himself to be the Vice President of the Confederacy, an ardent foe of secession, declared that "within a 12-month of the disruption of the Democratic Convention at Charleston the Nation would be engaged in a bloody civil war." So it proved, and meanwhile Mr. Lincoln's prediction, when his friends remonstrated against what they thought his reckless "House Divided" speech in accepting the Republican senatorial nomination in 1858, declared:

> Gentlemen, I am out for bigger game. If Douglas answers this question [Can the people of a U.S. territory lawfully exclude slavery prior to the adoption of a State constitution?] he can never be President, and the battle of 1860 is worth a hundred of this.

LINCOLN'S NOMINATION—100 YEARS AFTER

On this 18th day of May in 1860—100 years ago—the Republican Party's national convention in a place called the

Wigwam in Chicago, nominated Abraham Lincoln, of Illinois, for the presidency of the United States.

Today and at the outset I want to give my thanks very personally to you, Speaker SAM RAYBURN, in particular, and to the leadership on both sides of the aisle, Republican and Democratic alike, for the help and encouragement you gave my idea for commemorating the 150th anniversary of Lincoln's birth and now this historic nomination by some commentary in this hour here on the floor of the House of Representatives which I hope will be appropriate and which will be shared with my colleagues on both sides of this aisle.

For nothing is more significant about the immortality of Abraham Lincoln than the profoundly accepted fact that while he was given to the political world by the Republicans, he belongs almost as much to the other party and that he transcends them both. He has become our most American American and he emerges in his unique greatness as the undying embodiment of democracy itself under the republican form of government.

Lincoln is now the symbol of a political credo for all mankind.

The Lincoln symbol is the credo of integrity and decency, executive strength extraordinary, and benevolence and compassion in government.

His symbol is the credo of freedom for men everywhere.

No individual in the whole of recorded history, without exception, has done what Lincoln has done in the concrete to give to politics and government, to terms like liberty and equality, such depth and the moving coloration of a compelling religious spirituality to the body politic. This divine union of an abstract idea, with action and the living reality, and the prophetic and kindly fire that touched his utterances, have placed him—and consequently the American tradition—in the very forefront of man's march to freedom everywhere on this earth.

Today we take this hour or so to do honor to his memory and to the Republican convention that launched him on the world stage and among the greatest immortals of all time.

The focus of this commemoration—I repeat—is the single fact in the life of Lincoln that this day a century ago saw him nominated on the Republican ticket to the Presidency. The reason I took it upon myself, Mr. Speaker, to ask that a special note be taken of this event and the work of this convention is because it has seemed to me that its enormous strategic importance for the destiny of our country and mankind has somehow been overlooked in the total impact of Lincoln's life and the immense tragedy of his death. For we have to remember that the logical Republican candidate in 1860 was the redoubtable William H. Seward, of New York.

There were, besides him, some other formidable personalities also seeking the Republican nomination. They were such great men as Salmon P. Chase, of Ohio; Simon Cameron, of Pennsylvania; Edward Bates, of Missouri, and John McLean of Ohio.

Lincoln, it is true, had made a remarkable impression upon those who would become the delegates to this convention and to the people in his debates with Stephen A. Douglas and in his Cooper Union speech. But he was hardly to be compared as a public figure of national significance with the eminence—as of then—of so distinguished and so well known a personality as Seward: the Seward who had been Governor of New York; the Seward who had been a Senator since 1848, the Seward who was known everywhere as the leader of the Republican Party and as an outstanding fighter for the containment of slavery and against its extension. Of course it was held against Seward that he was too radical in his views on slavery. He had frightened some of his supporters with his prophecy of an "irrepressible conflict" and shocked others with his avowal, as he put it, "of a law higher than the Constitution."

This was presumed to alienate several States from his support.

As for the other seekers-after-the-presidency it was held against Chase that he was even more radical in his opposition to slavery than Seward although he, too, had had gubernatorial experience—two terms as Governor of Ohio, and had served one term in the Senate. Bates, of Missouri, did not fit with the strong German element in the Republican Party. McLean, a member of the Supreme Court, enjoyed the following of the conservatives but was regarded as too old. Lincoln's assets were the weaknesses of his opponents, and, in part, the limited knowledge the country had of his views. Thus he was free of any labels for either extremism or conservatism. Not having held national office, except for one term in Congress, he had no record upon which political agitators could seize for anti-Lincoln ammunition. That he came from Illinois—a doubtful State—proved another asset. The fact that he was a real moderate—not an extremist on the slavery question—a man if elected who would be safe was also a very important factor in his nomination. In addition he had the rustic and the humble background that would endear him to tens of thousands of voters. Warm and affectionate slogans that attached themselves to his name such as "railsplitter" and "Honest Abe" were not only effective but they were wholly true. Yet the overall fact remains that the nomination of Lincoln is one of the greatest phenomena in the history of American politics. Lord Charnwood, among the greatest of the Lincoln biographers, writing from the objectivity and the perspective of an Englishman, says of it:

> This was the most surprising nomination ever made in America.

Perhaps one of the greatest motivating forces for the nomination of Lincoln was the basic feeling in that convention that this was the man to beat Stephen A. Douglas, the Democratic nominee.

What actually happened in that 3-day Chicago convention was as real, as true, as indigenous a demonstration of the process of representative government—good and bad—as the history of political conventions records in the annals of political life on this continent. There were some clever off-beat political shenanigans. There were rough and tumble maneuvers. There were intensely emotional doings inside and outside that $7,000 especially built cavernous barn called the Wigwam.

But, accepting all that, I am still very partial to a more contemplative and a more penetrating judgment. It is, it seems to me, that in the last analysis either an incredible and almost impossible combination of events vaguely described by some people as luck, or, as I believe, more simply and appropriately, the finger of God, determined the results of this convention. In spite of the fact that it was in the midst of so much shouting, in the tumult and the difficult confusion in that great wooden tabernacle in Chicago the right decisions prevailed. I know of few decisions in the life of man so pregnant for the good of our country and the fate of mankind as the decision by those that nominated—and therefore elected—Abraham Lincoln President of the United States in that dread, awful eve-year of the Civil War a century ago.

After the fact—and especially 100 years after the fact, it seems easy to reduce the complexities of the event down to simple analysis. Today we have whole shelves of books with detail and minutia, diagrams and diaries on the event. There is a whole library of commentary. But even now there are facets of that nomination about which, to the end of time, we can guess and speculate. But we know definitely and for certain this: Men who are free and men who are yearning to be free will everlastingly thank God for the decision by those voluntary and free citizens at that convention that vital May 18, 1860.

The Wigwam was an immense wooden box anchored against a brick wall. A hundred feet on one side and 180 feet on the other, it had excellent acoustics for an age before loudspeakers and given to stentorian oratory. It could hold 10,000 people. Perhaps four times that many sought admission. The political leaders, the delegates, the people, the roisterers and the bullies, represented the boiling point of a democratic ferment that extolled the great aims of the newly created Republican Party.

That Republican Convention represented in its composition, in its aims and in its platform the rich and the humble. It represented the vast wealth and sophistication of the East. It represented the burgeoning expansion of the West. It was industrial and agricultural and frontier. The spectacle of the country in 1860—4 score and 4 years after that great document for freedom, the Declaration of Independence—would have amazed and excited the interest and strained to the limit the capacity for wonderment of the Founding Fathers who, through implementing the spirit of that statement, set the stage for the immense growth and progress of this Nation.

For America now had the steamboat.

It had the photograph.

It had the telegraph.

It had the greatest wonder drug of its day—ether as an anesthesia.

There were farm implements within average reach.

There was the new marvel of the home and the factory; the sewing machine.

There were tools for carpentry beyond the wildest dreams of the colonial frontier: nails, spikes, screws, axes.

American firearms were being used by the royal bodyguards in China. They were preferred by the combatants in the Crimean War above all others.

There was the impact of the railroad integrating the Nation.

There was the engineering genius in the building of bridges that startled the world.

Boston had come up with an improved printing press unequaled in its day.

Many of the new things were widely available and relatively cheap.

Clocks cost little.

Steamers were fast.

Implements of all kinds saved human muscle and did much more in far less time.

That Wigwam in Chicago in 1860 reflected the immense and explosive energies for the common good released by the forces of freedom. It was the end product of free government under a Constitution the infinite decency of which—as we sit here today—is still the last great hope of mankind.

This was America.

But outside the Wigwam rumbled the impending peril of civil war. Here was the brink of war that very well might spell the doom of all that man and God had wrought on this soil in those incredible 4 score and 4 years during which America had grown from 3½ million to over 31½ million. And inside the Wigwam were men who had effected the passage a week before this National Republican Convention, of a resolution by the Illinois State Republican convention. This Illinois State resolution declared that:

> Abraham Lincoln is the choice of the Republican Party of Illinois for the Presidency.

The resolution instructed the delegates "to use all honorable means to secure his nomination by the Chicago Convention, and to vote as a unit for him." When the young Republican Party gathered for its national convention, the second in its history, on Wednesday, May 16, 1860, there was a resolute and alert, and grimly determined and dedicated group of Lincoln leaders and strategists. For example, there were at the so-called Lincoln headquarters in the Tremont House, volunteers for the Lincoln candidacy: O. H. Browning, Judge David Davis, R. J. Oglesby, Leonard Swett, Jesse K. Dubois, Charles Ray and Norman B. Judd, who was to nominate Lincoln.

There also were William H. Herndon, Gen. John M. Palmer, Ozias M. Hatch, Stephen T. Logan, Gustavus Koerner, Ward Hill Lamon and Jesse Fell. In the hands of these men—and especially of Judge David Davis—rested a mission for posterity they successfully accomplished under circumstances of the great doubt and in a crisis not fully appreciated until later. There were, to be sure, internal problems in the Lincoln strategic command—while the candidate throughout the convention was in Springfield—and there were some basic differences on procedure with the candidate himself. But the voluminous record shows that loyalty and integrity held fast within the moral context of the time. History shows that an enormous victory of immense meaning for the ages—greater than these men could possibly know—was won the fatefully consequential day.

There is a strong temptation to read the story of the Wigwam and Chicago in 1860 and imagine—out of proportion—the extent of the boisterousness and the consumption of liquor. Of course there was a good deal of that. But it could hardly be said that it was that kind of a convention. The soberest judgments and the most careful decisions were being made. Men worked at a cruel pace and afterwards—like Judge Davis—they wept almost as if they could peer down the corridors of time and envisage the greatness of their victory. That convention—that Republican Convention—dealt with many problems of its time and not alone with slavery.

The platform proper, or the discussions at the convention, or both, dealt with the issues and the ideals and principles of the time head on. While slavery was the shadow that clung like a cloud over the deliberations, yet that convention—for all its great concern with the slavery issues—had a wider and a deeper scope. Pertinent to the slavery issue finally was the reaffirmation in the platform of the thunder from the Declaration of Independence. "That all men are created equal"—giving that quotation in full. It proclaimed itself against disunion declaring the concept, I quote, "abhorrent."

The platform clamored for economy in the Federal Government asking for a return to, I quote, "rigid economy and accountability."

The platform demanded duties upon imports because, said the platform:

> Sound policy requires such an adjustment of these imports as to encourage the development of the industrial interests of the whole country.
>
> We recommend—

Said the platform—

> that policy of national exchanges, which secures to the workingmen liberal wages, to agriculture remunerative prices, to mechanics and manufacturers any adequate reward for their skill, labor and enterprise, and to the Nation's commercial prosperity and independence.

The platform favored the, I quote, "complete and satisfactory homestead measure," which at the time of the announcement of the platform had already passed the House. The platform stood against any proposed restrictions to the rights of the newly naturalized foreigners and to any changes—impairing their rights in the naturalization laws.

The platform favored appropriations by Congress for river and harbor improvements "of a national character."

The convention in this platform declared a railroad to the Pacific Ocean "imperatively demanded by the interests of the whole country."

This was a young Republican Party that looked brilliantly to the future with hope and with optimism, with action and with enthusiasm.

There was without a doubt a certain foreboding over the meaning of the monumental stakes that confronted the country. This played its part in the doubtful techniques that today engage the criticism as well as the fascination of the scholar. This manipulation of episodes on the lower level of events, and the generally rugged, frontier atmosphere of the 1860's lend themselves too invitingly to overemphasis by the journalistic approach. This is the approach that seeks more to be interesting than to be objective.

Representative government on this continent was young; it was tough; it was brazen, and it was brassy. It laved in its enthusiasms and its amazement with its own prowess. For the United States this republican form of government—by any standards—was, even then, the greatest success since Rome. If the Republican convention of 1860 proved anything it proved that what was here demonstrated, with all its tumult, its political guile, its uninhibited devices, was that government by consent of the governed—for all its imperfections—had basic soundness and was tough and flexible.

A catastrophic, bloody and dreadful test was in the offing.

But the words "conceived in liberty," and the words "dedicated to the proposition that all men are created equal"—soon to be magnificently reaffirmed—were real words, as actual and as demonstrable as life itself.

Those rock-ribbed Republicans, whether Seward men or Lincoln men, or supporters of any of the other candidates, mirrored pretty genuinely the genius of the America of that day. That Republican Convention was a nucleus of the United States in 1860: Industry, agriculture, finance, law, politics, journalism, culture—and just people. There were many examples of the so-called common man jammed inside and outside the great Wigwam. There were also so-called forgotten men, I am sure they were there, too, and in force.

Even if we had never heard of the phrase "smoke-filled room" in the political conventions of our own times, I think an excellent case could be made proving that nominating conventions, Republican and Democratic, have on the whole neither deteriorated nor improved since the convention that named Lincoln. They were basically sound and honest then, and they are basically sound and honest today, the superficial imperfections altered only by changes in habits, not changes in morals.

What were some of the episodes in 1860 moralists might frown upon?

The Seward camp appeared to have a more ear-splitting claque than the Lincoln camp was at first able to muster. They pressed close, shoulder to shoulder and fore and aft, in the rear and the galleries, and they created a vast volume of pro-Seward noise, in that hot and steaming assemblage. The Lincoln board of strategy under the generalship in this case of Ward Hill Lamon and Jesse Fell, circumvented this imbalance by the surreptitious use of a hastily acquired printing press. By this process hard-bitten Lincoln men gained admission to the Wigwam with counterfeit tickets and simulated official signatures. By being on the job earlier they took up space in the Wigwam that crowded out the Seward men who struggled to get in later.

Another incident was the mechanism of delay to achieve the defeat of Seward.

This had to do with the actual or the pretended difficulty of counting the presidential ballots because of the declared absence at that instant of the needed tally sheets. The platform had at long last been adopted. The Seward men were anxious for the balloting for candidates at once. It was a practical certainty at the time that were a vote taken immediately the atmosphere of the convention was such that Seward would be nominated.

For precisely that reason the opposition to Seward—the Lincoln group and the others—sought delay.

The circumstance of the tally sheets provided a motive. The problem was communicated, amidst the hubbub, to the Chair by the secretary, and to the assembly by the Chair. Thus the Chair announced that while the presidential tally sheets were in fact prepared—they were not yet at hand, "but will be in a few minutes."

In the confusion came the motion to adjourn "until 10 o'clock tomorrow morning." There are questions about just how the vote to adjourn happened to carry. It was reported that there was, I quote, "very little voting being done either way." Nevertheless, the Chair announced that the adjournment motion had carried. And maybe it had. That delay may have meant the difference between Lincoln and Seward as the 16th President of the United States.

William Baringer in his book, "Lincoln's Rise to Power," writes:

> Fortunate indeed for Abraham Lincoln that some Sewardites just then cared more for supper than for Seward.

Upon such sensitive and uncertain details hung what I like to think is one of the greatest decisions in the history of man.

Other incidents may be mentioned such as the seemingly reckless bartering of Cabinet posts for delegate support. They reveal the political acumen or—if you like—the human failings concentrated in a climate of great contest and explosive emotions. This is inherent in masses of people struggling under diverse leadership for great goals. But none of these incidents, nor all of them together, can, from the vantage point of a whole century mar the essential grandeur, the essential integrity, the powerful conviction, that marked the Republican Convention in the Wigwam in Chicago in 1860. And all of it expressed itself with a granite honesty, and with force and meaning, in the personality of Abraham Lincoln.

Much can be said from today's perspective of the platform. More may be said on the detailed maneuvers that ended with victory for Lincoln.

I find, for instance, electrifying the debate that ended finally by the inclusion of some eloquent passages from the Declaration of Independence into the platform. I find moving the words of a German immigrant, a citizen and a delegate named Hassaureck, of Ohio. He captured the imagination of the convention with his eloquent appeal that the platform contain the words of Jefferson on "inalienable rights" and "the pursuit of happiness." And he won.

I marvel as all Americans must, how certain seemed the nomination of Seward. Reluctantly Horace Greeley, a resident of New York but a delegate from Oregon, wired his New York Tribune after a thorough canvass—we call them polls today. I quote:

> My conclusion, from all that I can gather tonight, is, that the opposition to Governor Seward cannot concentrate on any candidate, and that he will be nominated.

Young Murat Halstead, to whose writings I am much indebted for part of the materials in this address, telegraphed to the Cincinnati Commercial:

> Every one of the 40,000 men in attendance upon the Chicago convention will testify that at midnight of Thursday-Friday night, the universal impression was that Seward's success was certain.

The same guesses were made by James Watson Webb of the New York Courier and Enquirer, and by Henry Raymond of the New York Times, and they so wrote their respective newspapers.

There is some moody and interesting comment by Lincoln himself on this relation to his candidacy for the Presidency. In 1858, 2 years before the convention we commemorate today, he observed wistfully:

> Just think of such a sucker as me as President.

On another occasion he put his lurking ambition in these words. He said:

> The taste is in my mouth a little.

As for the convention proper, his position is stated best in his own words. They include his formula for victory. He wrote:

> If I have any chance, it consists mainly in the fact that the whole opposition would vote for me, if nominated.

Lincoln added here:

> I don't mean to include the proslavery opposition of the South, of course.

Then Lincoln goes on:

> My name is new in the field, and I suppose I am not the first choice of a very great many. Our policy, then, is to give no offense to others; leave them in a mood to come to us if they shall be compelled to give up their first love. This, too, is dealing justly with all, and leaving us in a mood to support heartily whoever shall be nominated.

It is to this statement of Lincoln's more directly that I referred when I spoke of his granite honesty and the basic integrity that governed the convention.

Lincoln's political captains at the convention paid no attention to sleep—only to victory.

The story of that third and climactic day is thrilling. The meeting opened with a prayer by the Reverend Mr. Green, of Chicago. Sensing the need of his country, the feeling of so many people at the grassroots, the great responsibility that rested on the delegates at this convention, thinking probably that he may be praying for Seward, who would have to carry out the decisions of the convention, but no doubt hoping it would be Lincoln, he gave to the convention delegates a spiritual uplift and to Americans a wonderful heritage with the following prayer:

> O, we entreat Thee, that at some future but not distant day, the evils which now invest the body politic shall not only have been arrested in its progress, but wholly eradicated from the system. And may the pen of the historian trace an intimate connection between that glorious consummation and the transaction of this convention.

To catch some of the spirit of the Wigwam, I lift the following from Murat Halstead's excellent report:

> The New Yorkers were exultant. Their bands were playing, and the champagne flowing at their headquarters as after a victory.
>
> But there was much done after midnight and before the convention assembled on Friday morning. There were hundreds of Pennsylvanians, Indianians, and Illinoisans, who never closed their eyes that night. I saw Henry S. Lane at 1 o'clock, pale and haggard, with cane under his arm, walking as if for a wager, from one caucus room to another, at the Tremont House. He had been toiling with desperation to bring the Indiana delegation to go as a unit for Lincoln. And then in connection with others, he had been operating to bring the Vermonters and Virginians to the point of deserting Seward. Vermont would certainly cast her electoral vote for any candidate who could be nominated, and Virginia as certainly against any candidate. The object was to bring the delegates of those States to consider success rather than Seward, and join with the battleground States—as Pennsylvania, New Jersey, Indiana, and Illinois insisted upon calling themselves. This was finally done, the fatal break in Seward's strength having been made in Vermont, and Virginia, destroying at once, when it appeared, his power in the New England and the slave State delegations. But the work was not yet done. The Pennsylvanians had been fed upon meat, such that they presented themselves at Chicago with the presumption that they had only to say what they wished, and receive the endorsement of the convention. And they were for Cameron. He was the only man, they a thousand times said, who would certainly carry Pennsylvania. They were astonished, alarmed, and maddened to find public opinion settling down upon Seward and Lincoln, and that one or the other must be nominated. They saw that Lincoln was understood to be the only man to defeat Seward, and thinking themselves capable of

holding that balance of power, so much depended upon, and so deceptive on those occasions, stood out against the Lincoln combination. Upon some of the delegation, Seward operations had been performed with perceptible effect. The Seward men had stated that the talk of not carrying Pennsylvania was all nonsense. Seward had a good tariff record, and his friends would spend money enough in the State to carry it against any Democratic candidate who was a possibility. The flood of Seward money promised for Pennsylvania was not without efficacy. The phrase used was, that Seward's friends "would spend oceans of money."

After the preliminaries of the opening session everybody was more impatient to begin the work.

I continue quoting from Murat Halstead's report:

Everybody was now impatient to begin the work. Mr. Evarts, of New York, nominated Mr. Seward, Mr. Judd, of Illinois, nominated Mr. Lincoln. Mr. Dudley, of New Jersey, nominated Mr. Dayton. Mr. Reeder, of Pennsylvania, nominated Simon Cameron. Mr. Cartter, of Ohio, nominated Salmon P. Chase. Mr. Caleb Smith, of Indiana, seconded the nomination of Lincoln. Mr. Blair, of Missouri, nominated Edward Bates. Mr. Blair, of Michigan, seconded the nomination of William H. Seward. Mr. Corwin, of Ohio, nominated John McLean, Mr. Schurz, of Wisconsin, seconded the nomination of Seward. Mr. Delano, of Ohio, seconded the nomination of Lincoln. The only names that produced "tremendous applause" were those of Seward and Lincoln.

Everybody felt that the fight was between them and yelled approvingly.

The applause, when Mr. Evarts named Seward, was enthusiastic. When Mr. Judd named Lincoln, the response was prodigious, loud, and raging far beyond the Seward shriek. Presently, upon Caleb Smith seconding the nomination of Lincoln, the response was absolutely terrific. It now became the Seward men to make another offensive when Blair, of Michigan, seconded his nomination:

"At once there rose so wild a yell,
Within that dark and narrow dell;
As all the fiends from Heaven that fell
Had pealed the banner cry of hell."

The effect was startling. Hundreds of persons stopped their ears in pain. The shouting was absolutely frantic, shrill, and wild. No Comanches, no panthers ever struck a higher note, or gave screams with more infernal intensity.

Now the Lincoln men had to try it again, and as Mr. Delano, of Ohio, on behalf "of a portion of the delegation of that State," seconded the nomination of Lincoln, the uproar was beyond description. Imagine all the hogs ever slaughtered in Cincinnati giving their death squeals together, a score of big steam whistles going (steam at 160 pounds per inch), and you conceive something of the same nature. I thought the Seward yell could not be surpassed; but the Lincoln boys were clearly ahead, and feeling their victory, as there was a lull in the storm, took deep breaths all 'round, and gave a concentrated shriek that was positively awful, and accompanied it with stamping that made every plank and pillar in the building quiver.

The result is history.

Two hundred and thirty-three votes were needed to nominate.

Seward got 173½ on the first ballot. Lincoln got only 102.

Pennsylvania wavered, then moved from Cameron to Lincoln.

The second rollcall showed 184½ votes for Seward and 181 for Lincoln.

After the third balloting Lincoln was nominated. As everybody now knows a switch of four Ohio votes from Chase to Lincoln did it. A New Yorker named Evarts rose to regret the failure to nominate Seward but nevertheless moved that the nomination be made unanimous. However, there is no evidence that the motion was ever put before the convention. Browning of Illinois made a speech for Lincoln.

Drama, good sportsmanship, and statesmanship was never better displayed than when Austin Blair, of Michigan, made the speech of the hour by telling the convention:

Michigan, from first to last, has cast her vote for the great statesman of New York. She has nothing to take back. She has not sent me forward to worship the rising sun, but she has put me forward to say that, at your behests here today, she lays down her first, best loved candidate to take up yours, with some beating of the heart, with some quivering in the veins (much applause); but she does not fear that the fame of Seward will suffer, for she knows that his fame is a portion of the history of the American Union; it will be written, and read and beloved long after the temporary excitement of this day has passed away, and when Presidents themselves are forgotten in the oblivion which comes over all temporal things. We stand by him still. We have followed him with an eye single and with unwavering faith in times past. We martial now behind him in the grand column which shall go out to battle for Lincoln.

The spirit of the Lincoln men was dramatically described by Halstead with the following quote:

A Lincoln man who could hardly believe that the "Old Abe" of his adoration was really the Republican nominee for the Presidency, took a chair at the dinner table at the Tremont House, and began talking to those around him, with none of whom he was acquainted, of the greatness of the events of the day. One of his expressions was, "Talk of your money and bring on your bullies with you—the immortal principles of the everlasting people are with Abe Lincoln, of the people, by —." "Able Lincoln has no money and no bullies, but he has the people by —." A servant approached the eloquent patriot and asked what he would have to eat. Being thus recalled to temporal things he glared scornfully at the servant and roared out, "Go to the devil—what do I want to eat for? Abe Lincoln is nominated, G— d— it; and I'm going to live on air—the air of Liberty by —." But in a moment he inquired for the bill of fare, and then ordered "a great deal of everything"—saying if he must eat he might as well eat "the whole bill." He swore he felt as if he could "devour and digest an Illinois prairie." And this was one of thousands.

The job was done.

In Springfield during the day where Lincoln waited, a hundred guns were fired. In the evening there was a mass meeting. When someone suggested a book on Lincoln's life, Lincoln replied:

There is not much in my past life about which to write a book, as it seems to me.

Later, with a glance toward his home, he said:

Well, gentlemen, there is a little short woman at our house who is probably more interested in this dispatch (announcing his victory) than I am; and, if you will excuse me, I will take it up and let her see it.

Mr. Speaker, this National Republican Convention which I have so sketchily described is what we commemorate here on the floor of the House of Representatives today. It was undoubtedly true that, as Seward prophesied, the War Between the States was as he said "irrepressible" and inevitable. It may very well be that in any event the Union would have been preserved under Seward as under Lincoln. But the record shows that Seward, as Lincoln's Secretary of State, was a man of considerable stature but hardly of the stature of Lincoln. This we know: Had Lincoln failed of nomination much of the greatest and the most treasured wealth of the American tradition would have been lost to us and to mankind. We would have had no second inaugural. We would have had no Gettysburg Address. The Emancipation Proclamation would undoubtedly have been different. We would have lacked the enormous weight of Lincoln's thinking. The name Lincoln has touched all the world with fire and moved men seeking freedom to prodigious effort. Russia's Tolstoy, China's Sun Yat-sen, India's Nehru find inspiration in this greatest of all Americans.

Mr. Speaker, it is good to ask ourselves—and I mean especially and particularly the Republican Party of today—it is decisive and pertinent to ask ourselves what can we take from this convention 100 years ago to guide us in this hour. I believe that the Republican Party can take some of the toughness and the ruggedness, the honesty and the decision as an inspiration to guide it in this hour. I believe that the Republican Party can take some of the progressive outlook of that day and make it applicable now. It was not a convention of special interests, and not a convention that sought to poise industry against labor, or labor against industry. It was not a party wedded to the past. The Republican convention of 1860 sought the good of the railroads, of agriculture, of labor, of business in general, of home products, and of the good and welfare of all the people. The monumental and inescapable evidence of what I say is the result of the fight for the nomination itself. When, I ask, when, in the history of any people, was a choice for leadership made more emblematic of a whole people, than the nomination of Abraham Lincoln? As we reflect on our own glorious history, let us note the rich heritage that is ours. May the spirit of unselfish sacrifice for the great ideal of freedom by those people we respectfully call our forefathers—especially that of Lincoln—have full sway in our political life. This will kindle our desire, inspire our faith, and make strong our judgment. Having done this, the attainment of a trinity of true greatness that Lincoln had and we need—courage, wisdom, and goodness—will be realized. Goodness to have the right; wisdom to know the right; and courage to do the right.

Probably the statesmen and all people who have influence on the world scene would do well to study the life of this great man.

The Republican Party of 1860, Mr. Speaker, did a service for humanity that will live through the ages and it is good that this distinguished body takes this occasion to commemorate the event.

Mr. McINTIRE. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from Maine.

Mr. McINTIRE. Mr. Speaker, I am happy to join with the distinguished gentleman from Iowa in calling the attention of the Members of the House to this very historic occasion.

Mr. Speaker, 100 years ago today Abraham Lincoln was nominated by the Republican Party at a national convention in Chicago to be the party's candidate for the President of the United States. At the same national convention Hannibal Hamlin, of Maine, was also nominated for the office of the Vice Presidency.

That Hannibal Hamlin was truly a great man there can be no question, for history and authentic records reveal that he moved in a multitude of ways to preserve the well-being of our Nation and to advance the dignity of the American citizenry.

BORN IN PARIS, MAINE, AUGUST 27, 1809

A citizen of Hampden, Maine, Hannibal Hamlin dedicated the major part of his adult life to public service, serving in high offices at both the Federal and State levels of government.

His political career had its inception when he was elected to represent his hometown of Hampden in the State legislature. Serving with distinction, he was elected speaker of this body, acting in that capacity for three terms.

In 1842 Hamlin was elected to the House of Representatives where, in the course of his service, he became recognized as an authority on parliamentary law and custom.

The early years of his congressional service were marked by his firm stand on slavery, and he asserted his opposition to slavery well in advance of the time when the major political parties of the time took a party position thereon. "Freedom," he said, "is national, and slavery is sectional." He branded slavery as a curse and a moral wrong, something to be endured only so far as the Constitution required it to be maintained.

Hanibal Hamlin typified the noblest type of American manhood, having a striking appearance that glowed brightly against a background of many personal attainments. He was a tall and graceful figure, having black and piercing eyes, a skin almost olive-colored, hair smooth and thick, and a manner that was always courteous and affable. He was a human claypot into which providence had poured generous portions of talent and personality.

Being a man steady of purpose, he was fixed with strong convictions. Possessed of a soul of peace and strength of character, he clung tenaciously to his ideals and values, thereby keeping himself free from the storms of uncertainties and doubts. So constituted, he was always firmly fixed on the object of his views, always able to concentrate all of his energies in devising ways and means to make his hopes and plans materialize.

We find his steadfast nature evidenced at a time when the effort was advanced to repeal the Missouri Compromise. As a reward for his support of this repeal, he was promised liberal offers of patronage and other special forms of benefits from fellow legislators. However, believing as he did that slavery was an insidious institution, he could not be moved to enhance his personal fortunes through a sacrifice of his ideals, and he forthrightly turned these offers aside. He was a man who could not sell his soul for pieces of silver.

Hanibal Hamlin was elected Governor of the State of Maine in 1854, leaving this office after only a brief term of service when he was elected to a seat in the Senate of the United States.

His career in the Senate was no less spectacular than his previous service in other public offices, and he continued to gain high respect for his arduous application to official duties. Although a convincing speaker, he took the Senate floor infrequently, for he preferred, as he many times stated, to be "a working rather than a talking Member" of the U.S. Senate.

That he was held in high esteem by his colleagues in the Senate is indeed a rich compliment for this man, because he served in company with legislators who were remarkably astute and able. Among them were profound lawyers, eloquent orators, keen debaters, skillful parliamentarians, highly educated and scholarly men, and men whose strong native powers compensated for the lack of polish of formal education. Hamlin and his fellow Republicans were a minority in the Senate, only 20 in number. But what men they were, for the roster boasted the names of Sumner and Wilson, Foster and Dixon, Hale and Bell, Collamer and Foot, Seward and King, Simmons and Fessenden; also Simon Cameron, Ben Wade, Zach Chandler, Durkee and Doolittle, Lyman Trumbull, and James Harlan.

The crowning point of Hannibal Hamlin's colorful political life was his nomination and subsequent election to the high office of Vice President of the United States. The nomination proceedings during which Abraham Lincoln and Hannibal Hamlin were selected to represent the Republican Party as candidates for these high offices pose as one of the most exciting events in the annals of early political history.

Before the Chicago convention of 1860 the nomination of Seward was considered a foregone conclusion, but Hannibal Hamlin had determined that the man to cope with the troubled times was the great son of the West—Abraham Lincoln.

He realized that the advancement of Abe Lincoln as the Republican Party's candidate for the Presidency represented a herculean task, for the sentiment of his own State of Maine was strongly disposed toward Seward. Further compounding the complexity was the fact that Hamlin was himself a very good friend and ardent admirer of Seward.

Nonetheless, Hamlin did not feel that Seward was the man of the hour, being convinced that he was neither a strong enough candidate to win the election nor an individual possessed of the qualities required of a President for those turmoiled days. Thus subordinating his personal feelings to a deeper cause, Hamlin worked to advance the nomination of Abraham Lincoln.

A total of 203 votes was essential to a choice on the ballot, and the first ballot saw Seward, Lincoln, Bates, and Cameron fall far short of a vote necessary to nomination. And all the while the balloting was being conducted Hamlin busied himself advertising the merits of his candidate from the West, striving to convince refractory delegates that Lincoln was not only politically potent but admirably equipped to cope with the pressures of the Presidency.

That he was making progress in his efforts was reflected in the second ballot, with Lincoln claiming a percentage gain in votes substantially larger than Seward's. The second ballot had, in fact, brought Lincoln essentially abreast of his nearest rival.

Hamlin persisted in his efforts, endeavoring to pierce the armor of resistant delegates not with the hammer of harangue but with the lance of persuasion. His labors finally bore rich fruit when he succeeded in striking home with the delegates of the pivotal states of Pennsylvania, Illinois, and Indiana.

On a call of the third ballot, a general stampede took place in favor of Lincoln, the force of which swept the rail splitter into the nomination. On this ballot Seward gathered only 181 votes, while Lincoln harvested 228, this being 25 votes more than the 203 essential to the nomination.

Then, on the second ballot, Hamlin was selected as the Republican Party's candidate for the Vice Presidency.

There was a remarkable resemblance in these two men who were subsequently elected to occupy the highest offices of the land. Each was self-educated, each had sought after and practiced the law, and each had the quality of remaining firmly fixed in convictions derived from deep ponderings and critical examination.

Perhaps it was a dictate of destiny that these two men possessed of flintlike natures would stand at the wheel to steer our ship of state through the then turbulent waters of domestic and world uncertainty, each serving to bolster the other in the gigantic task of preserving the Union.

During their administration the shadow of civil war fell upon the land, and it is recorded that Lincoln frequently turned to Hamlin for encouragement, advice, and inspiration during those dark days. And Hamlin, himself possessed of soldierly instincts, enlisted in Company A of the Maine State Guards early in the Civil War, serving in the ranks several weeks when this company was ordered to duty.

It was a quirk of fate that prevented Hannibal Hamlin from becoming President of the United States, for had he continued in the Vice Presidential office during Lincoln's second term, he would have, with Lincoln's assassination, been elevated to that high office.

That Hamlin did not succeed to the Vice Presidency during Lincoln's second term was in no way owing to any act of Abraham Lincoln. In fact, when Lincoln was approached as to his choice of

candidate for that office, he made it abundantly clear that it was his private and personal belief that a renomination of the old ticket would best serve the interests of the Nation. However, political forces operating far beyond the reach of either one of these two men catapulted Andrew Johnson into the office of Vice President of the United States.

That Hannibal Hamlin harbored no resentment over the selection of Johnson to succeed him is evidenced by his conduct during the political campaign of that period. Stumping throughout the Nation, Hamlin lauded the Vice Presidential candidate, proclaiming him to be a man of real virtue and one deserving of trust.

After leaving the office of Vice President, Hannibal Hamlin was appointed collector of customs at the port of Boston in 1865. A year later he resigned that office, occupying himself with building the Piscataquis Railroad and in preparing for a senatorial contest in 1869. Successful in that election, he once again found himself in the Senate, and exercising the diligence that marked his previous legislative career, he was reelected with insignificant opposition at the end of his Senate term.

At the age of 72, after a long and varied career in public service, Hannibal Hamlin voluntarily retired from the Senate of the United States. Remarkably alert and seasoned with years of valuable legislative experience, he was urged by friends to continue in public service. He reasoned, however, that it was best that he depart the public scene at a time when his people wanted him to stay, rather than lingering on until they wanted him to go.

He retired to his quiet home on the Penobscot, submerging himself in his community where respect, honor, and love followed him wherever he walked. He emerged from retirement briefly to accept an appointment as Minister to Spain, an appointment tendered him by President Garfield. After serving a year in this capacity, he once again returned to Maine to renew his association with the friends he loved so well.

His last public effort was directed toward having Abraham Lincoln's birthday declared a national holiday, and it is reported that his powers of persuasion attained rare heights as he pleaded for this Nation to extend to Lincoln this tribute of remembrance and gratitude.

He died in 1891, on July 4, departing this earth on the birthday anniversary of this Nation, as did Jefferson and Adams. The memories of these founders of the Republic and of those, like Hamlin, who strived so hard to save it, these memories connected with the national holiday serve to deepen and heighten the day's significance as a sanction of the imperishable nature of the Union.

Great men have appeared on our national scene, being remembered by Americans because they gave of themselves something that enriched our Nation and ennobled human nature. There must be counted among these such a man as Hannibal Hamlin of Maine.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and also that all Members may have 5 legislative days in which to extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. FRELINGHUYSEN. Mr. Speaker, first of all I should like to commend the gentleman from Iowa [Mr. SCHWENGEL] for a very eloquent and provocative address on a truly great American, Abraham Lincoln. I requested this time to comment on the role which the New Jersey delegation played at the historic Chicago convention.

Compared to some of the more populous States, New Jersey sent relatively few delegates to the Chicago convention. At a meeting in Trenton on March 8, 28 delegates had been chosen, each with half a vote. There had been considerable interest, both in and outside of the State, regarding the choice of delegates. It was generally recognized that New Jersey, together with Pennsylvania, would have an unusual amount of influence at Chicago, especially if their delegations were uncommitted.

The State convention at Trenton was referred to as the "Opposition" or "Black Republican" convention. Among those chosen were Marcus L. Ward, later Governor of New Jersey, and John Insley Blair, of Warren County, the railroad magnate who played a key role in the development of the Delaware Lackawanna and other railroads. Blair kept a diary at this time which, along with other papers, is now in the possession of the New Jersey Historical Society.

One of three delegates at large was my great-grandfather, Frederick T. Frelinghuysen, at the time a 43-year-old lawyer from Newark. He later served as a U.S. Senator from New Jersey, and as Secretary of State under President Chester Arthur. According to one newspaper account, some extremists criticized the selection of Frelinghuysen, despite his "high political character," because he had cooperated at a union meeting. If I may be excused a personal reference, my twin brother, Harry O. H. Frelinghuysen, has been selected to go out to Chicago this year as an alternate delegate from New Jersey.

In any event efforts were made at Trenton to instruct the delegation to support William Lewis Dayton, former U.S. Senator from New Jersey and in 1856 Republican candidate for Vice President. The effort failed, apparently, because it was generally felt that the delegation should be unpledged and unprejudiced toward any candidate. After agreeing that hearty support should be given whoever was nominated at Chicago, the meeting broke up with cheers for New Jersey's two favorite sons, William Dayton and William Pennington, then serving as Speaker of the U.S. House of Representatives. Perhaps significantly, the only public figures of truly national significance who were also cheered were William Seward and Abraham Lincoln.

The scene now turns to Chicago as delegates gather to help choose the next President. The New Jersey delegation had its headquarters, including a handsome parlor for conferences, at Richmond House, where the followers of William Seward also gathered. Plans had been made for New Jerseyans living in Chicago to offer the visitors a warm reception, but since some delegates arrived as early as Friday, May 11, and others not until the 15th, this proved difficult to arrange.

On May 15, however, after most of the New Jersey delegates had arrived at Richmond House, they were formally welcomed to the city. Responding for the delegates, Frelinghuysen gave what was described as "an impromptu but exceedingly well-expressed speech." The visitors were then escorted on a tour of the city.

Making plans for the transportation of some 40,000 visitors to Chicago must have required real thought. Every effort was made to make the trip attractive. One newspaper advertised a $35 rate from Newark, N.J., to Chicago and return. A correspondent for the Newark Advertiser has left us an account of the special train which transported many of the New Jersey delegation, others from New York, and the delegates from Boston who brought their own band. The passengers, generally of a high order of intelligence and standing, were apparently soon able to overcome the usual taciturnity of strangers because of the common cause which brought them together.

After a rendezvous in Buffalo at the invitation of the mayor, a special train, properly decorated, with special accommodations for the delegates, left for Chicago at 6 a.m. on Monday, May 14. Crossing the suspension bridge wrapped in mists from Niagara Falls, the train was soon speeding along through the verdant, virtually untouched Canadian countryside. After taking the ferry at Windsor, the passengers continued the journey on the Michigan Central road. Every effort seems to have been made to insure a speedy trip. On two occasions engines were changed simply by disconnecting the exhausted engine and switching it off the track, with the train itself picking up the fresh engine under its own momentum. En route the inhabitants of villages and farms greeted the train with cannon, music, and cheers. At the occasional stopping places, not surprisingly perhaps, time was found for short speeches by the traveling dignitaries.

On the evening of the 15th the New Jersey delegation held its first caucus. By this time, of course, the political maneuvering was in full swing. As the leading contender, Seward naturally had many supporters active on his behalf. One evening Seward's headquarters at Richmond House was the scene of an elaborate champagne supper in the gentlemen's parlor, with everybody cordially welcome. General Nye of New York, ac-

companied by the well-known pugilist Tom Hyer, was reported to have invaded the headquarters of other hopefuls, "swinging $500 in his hands" and offering even bets on Seward. There was only one taker. Tom Hyer, incidentally, had come out on the special train. He was evidently sufficiently well known to attract the attention of the local residents, who crowded around to seek a glimpse of his "finely developed frame."

The New Jersey delegates agreed informally to support their favorite son, William Dayton, on the first ballot. Thereafter they were to be "governed by circumstances." An informal poll showed that there were six votes for Seward with eight opposed to the New Yorker. As far as the New Jersey delegation was concerned, Lincoln's name was not directly involved at this stage. According to the New York Times, the New Jersey delegates were divided in sentiment. Nonetheless they were reported to have joined with Pennsylvania and Illinois delegates in a formal call on the Massachusetts delegation to point out Seward's unpopularity.

When the balloting began, New Jersey, represented by Thomas H. Dudley, who was serving on the Committee on Resolutions, offered the name of William Dayton. All 14 New Jersey votes went to their favorite son. In that count Dayton stood fifth, with Seward first and Lincoln second.

The swing to Lincoln began on the second ballot. When the tally was made, Seward and Lincoln were almost in a dead heat. New Jersey split its votes, with 10 still voting for Dayton and 4 voting for Seward. On the crucial third ballot, the New Jersey delegation gave eight votes to Lincoln, five to Seward, with one vote holding to Dayton.

As Blair put it in his diary, and with his own spelling:

> Politicians had but little Influence. The delegates appeared animated with but one Mind. That was to Take no Trading Politicians. Lincoln & Hamlin are Such Men Taken from the People.

The Jersey delegation seems to have been animated more by a desire to "stop Seward" than to support Lincoln, about whom little was known in the East. Seward was weak in New Jersey because of his extreme views on the slavery issue. Lincoln's relative moderation on the question seems to have made him more acceptable to many members of the delegation. At any rate, the nomination was satisfactory to the rank and file of the opposition party and he was endorsed by most of the party's newspapers following the nomination.

The May 19 editorial in the Newark Evening Journal indicates why Lincoln was a generally popular choice:

> Mr. Lincoln deserves and will have the support of the common people, for he is one of them. Born and lived in poverty, he had no time for the education of the schools. What he possesses, he has got by hard knocks, as he has his position in society by untiring self-cultivation, industry and effort. * * * His personal history and rise are so extraordinary and even romantic as must touch the hearts of the great mass of the people. * * * Then he is a conservative and safe man. Whatever he does is judicious and marked with sterling common sense—a staunch friend of our institutions, the Constitution and the Union. * * *

The nomination of this eloquent and popular man has taken politicians by surprise. It crossed the wishes and efforts and contradicted the predictions of some of the most managing and skillful in such things. The people may be said to have made it themselves, and will therefore take care to make his election sure. Wherever the news was received it was celebrated with real enthusiasm. This city was a scene of tumultuous jubilation.

Meanwhile, a committee of delegates from the various States represented at the Chicago convention was selected to go to Springfield and officially notify Lincoln that he had been chosen. Ephraim Marsh, of Jersey City, and John I. Blair were among the members of this group. Blair described the incident in his diary:

> We * * * called over to see the President and lady. We spent about 1 hour. * * * We found him quite a plain man, very intelligent and cautious. His lady was quite talkative and sociable. We left with the impression that they each could fill their stations with credit to the Nation. Mr. Lincoln is not to be called handsome; says he is 6 feet 3½ inches, spare and bony, indicates a hard-working man. His lady is short, full face. I told him and her when I left that I expected to call on them at Washington when they got in the White House, but I should ask for no office. I found he was very temperate—they gave us cold water, nothing else. He neither drinks rum, chews, or smokes.

Mr. SCHWENGEL. Mr. Speaker, the distinguished gentleman from New Jersey [Mr. FRELINGHUYSEN] has been very modest in his comments about his ancestors. I should like to say that I discovered, in reading history, that the name "Frelinghuysen" is about as great and as common in the early history of our country as the name Adams. I have prepared some remarks dealing with the history and the lives of these people a little more in detail than the gentleman has, and I ask unanimous consent that they be placed in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

(The document reads as follows:)

GREAT-GREAT UNCLE OF PETER FRELINGHUYSEN

Theodore Frelinghuysen, son of Frederick Frelinghuysen. He was a Senator from New Jersey; born in Millstone, N.J., March 28, 1787; pursued classical studies and was graduated from Princeton College in 1804; studied law; was admitted to the bar in 1808 and commenced practice in Newark, N.J.; served as captain of volunteer militia in the War of 1812; attorney general of New Jersey from 1817 to 1829, when he resigned; declined the office of Justice of the Supreme Court in 1826; elected as an Adams Democrat in the U.S. Senate and served from March 4, 1829, to March 3, 1835; resumed the practice of law in Newark, N.J.; mayor of Newark in 1837 and 1838; chancellor of New York University, 1839–50; president of the American Board of Commissioners for Foreign Missions, 1941–57; president of the American Tract Society, 1842–48; vice president of the American Colonization Society; unsuccessful Whig candidate for Vice President on the ticket with Henry Clay in 1944; president of the American Bible Society, 1846–61; president of Rutgers College, New Brunswick, N.J., from 1850 until his death in New Brunswick, N.J., April 12, 1862; interment in First Reformed Church Cemetery.

GREAT-GREAT-GREAT GRANDFATHER OF PETER FRELINGHUYSEN

Frederick Frelinghuysen, father of Theodore Frelinghuysen. He was a delegate and a Senator from New Jersey; born near Somerville, Somerset County, N.J., April 13, 1753; was graduated from Princeton College in 1770; studied law; was admitted to the bar in 1774 and commenced practice in Somerset County, N.J.; member of the Provincial Congress of New Jersey in 1775 and 1776; served in the Revolutionary War; was commissioned first major in the Minutemen, February 15, 1776; captain of the Eastern Company of Artillery, New Jersey State Troops, March 1, 1776; colonel of the 1st Battalion, Somerset County Militia, February 28, 1777; served as aide-de-camp to Brig. Gen. Philimon Dickinson; Member of the Continental Congress in 1778, 1779, 1782, and 1783; clerk of the common pleas court, Somerset County, from 1781 to 1789, when he resigned; member of the State general assembly in 1784 and 1800–04; member of the New Jersey convention that ratified the Federal Constitution in 1787; member of the State council, 1790–92; appointed by President Washington brigadier general in 1790 in the campaign against the western Indians; elected as a Federalist to the U.S. Senate and served from March 4, 1793, to November 12, 1796, when he resigned; commissioned major general in 1794 during the Whisky Insurrection; trustee of Princeton College, 1802–04; died in Millstone, N.J., April 13, 1804; interment in the Old Cemetery, Manville, N.J.

NEPHEW OF PETER FRELINGHUYSEN'S GREAT GRANDFATHER—NOT A DIRECT RELATION TO PETER BUT A MEMBER OF THE FAMILY

Joseph Sherman Frelinghuysen, cousin of Frederick Theodore Frelinghuysen. He was a Senator from New Jersey; born in Raritan, Somerset County, N.J., March 12, 1869; attended the public schools; interested in insurance companies; served in the Spanish-American War in 1898 as second lieutenant, first lieutenant, and ordnance officer; chairman of the Somerset County Republican executive committee, 1902–05; member of the State senate, 1906–12; president of the senate in 1909 and 1910 and acting Governor of New Jersey ad interim; member of the Republican State committee, 1914–16; member of the New York Chamber of Commerce, 1912–26 and of the New Jersey Chamber of Commerce, 1914–25; president of the State board of agriculture, 1912–25; president of the State board of education, 1915–19; elected as a Republican to the U.S. Senate and served from March 4, 1917, to March 3, 1923; unsuccessful Republican candidate for reelection to the U.S. Senate in 1922; trustee of Rutgers College, New Brunswick, N.J., 1918–28; delegate to the Republican National Conventions in 1916, 1924, 1936, and 1944; reengaged in the insurance business until his death in Tucson, Ariz., where he had gone for his health, February 8, 1948; interment in St. Bernard's Cemetery, Bernardsville, N.J.

Frederick Frelinghuysen, great-great-great-grandfather of Peter, his son was Theodore Frelinghuysen, great-great-grandfather of Peter, his nephew and adopted son was Frederick Theodore Frelinghuysen, this man is the great-grandfather of Peter, his nephew was Joseph Sherman Frelinghuysen.

GREAT-GRANDFATHER OF PETER FRELINGHUYSEN

Frederick Theodore Frelinghuysen, great-grandfather of the present distinguished Member of the House, PETER FRELINGHUYSEN, also of New Jersey, was the nephew and adopted son of Theodore Frelinghuysen and cousin of Joseph Sherman Frelinghuysen.

He was a Senator from New Jersey; born in Millstone, N.J., August 4, 1817; was graduated from Rutgers College, New Brunswick, N.J., in 1836; studied law; was admitted to the bar in 1839 and commenced practice in Newark, N.J.; city attorney in 1849; member of the city council in 1850; trustee of Rutgers, 1851–85; member of the peace convention of 1861 held in Washington, D.C., in an effort to devise means to prevent the impending war; appointed attorney general of New Jersey in 1861; reappointed in 1866 and resigned the same year; appointed and subsequently elected as a Republican to the U.S. Senate to fill the vacancy caused by the death of William Wright and served from November 12, 1866, to March 3, 1869; unsuccessful candidate for reelection in 1868; appointed U.S. Minister to England by President Grant in July 1870; confirmed after considerable opposition from Senators Sumner and Wilson, but declined the appointment; again elected to the U.S. Senate and served from March 4, 1871, to March 3, 1877; appointed a member of the Electoral Commission created by act of Congress approved January 29, 1877, to decide the contests in various States in the presidential election of 1876; unsuccessful candidate for reelection; resumed the practice of law in Newark, N.J.; appointed Secretary of State in the Cabinet of President Arthur and served from December 19, 1881, to March 6, 1885; president of the American Bible Society in 1884 and 1885; died in Newark, N.J., May 20, 1885; interment in Mount Pleasant Cemetery.

Mr. KASEM. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I am happy to yield to the gentleman from California.

Mr. KASEM. Mr. Speaker, I rise on the Democratic side simply that we may join in tribute to the man Abraham Lincoln, to whom the gentleman has paid tribute today and that we may, oddly, extend our thanks and gratitude to that convention that nominated Abraham Lincoln to the Presidency.

We admire Abraham Lincoln for many qualities. We admire him for his vision when he, as the minority leader of the Illinois Legislature, worked hard toward the improvement of the natural resources of Illinois at a time when a primitive State was growing and needed to make investments in its roadways and harbors along the rivers.

We admire him because of his great compassion and his firm conviction on the equal dignity of every human being.

We admire him for his courage when as the President of the United States it became his responsibility and he stepped out and made a firm decision in the Emancipation Proclamation which forever ended one of the most shameful institutions in our history.

We admire him for his intellectualism; he was a deep and a profound man, and all of his statements and writings reflect that.

We admire him for his great articulateness. I, for one, have always felt that Abraham Lincoln has never received appropriate recognition in the field of writing. I think he was one of the greatest American prose artists. Also I feel that this rises out of the basic solid quality and genuineness of the man.

As the gentleman has so well said, his greatness transcends party and we like to claim him with the Republican Party as a great American institution.

Mr. SCHWENGEL. I thank the gentleman.

Mr. HECHLER. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I am glad to yield to the gentleman.

Mr. HECHLER. Mr. Speaker, I desire to join in complimenting the gentleman from Iowa for his thorough research on this very, very important episode in history, the 100th anniversary of this nomination which we celebrate today. I think the gentleman has very well recaptured the spirit of the Wigwam. I think he has demonstrated that he is one of the really great Lincoln scholars in this body. I believe that in unfolding this account he has made it live in a very dramatic way.

I wonder if the gentleman would care to comment a little on some of the sources he used in the preparation of this excellent material. The gentleman has referred to Rear Admiral Halsted. I wonder of the gentleman would care to add anything as to some of the excellent sources which he used.

Mr. SCHWENGEL. Much of the material used has come from my own collection. I have in my office a list of books that I used as reference and there were newspapers that were used as sources. I think the New York papers are very good; the Cincinnati papers and, of course, the Chicago papers. I have quite a file of those. Most of my material was gathered from those sources. There is a new book written recently by a young man by the name of Don Johnson of the University of Iowa, which is fine source material also. It is a book on "Political Conventions in American History." The Library of Congress has been very helpful—a Mr. William Coblenz helped prepare most of the material in its final form. David Mearns and Lloyd Dunlap checked the manuscript for accuracy.

Mr. HECHLER. I think the gentleman has done an outstanding job in bringing to us not only the account of the convention but also its current meaning today. I thank the gentleman.

Mr. SCHWENGEL. I thank the gentleman for his contribution.

Mr. BENTLEY. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield very gladly to the gentleman from Michigan.

Mr. BENTLEY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include as part of my remarks the text of three papers, the first one being a paper entitled "The Michigan Delegation at the Republican National Convention of 1860," prepared for me by Mr. George S. May, research archivist of the Michigan Historical Commmission; second, an address given before a joint convention of the Michigan legislature on February 13, 1958, by Mr. Arthur M. Smith, of Dearborn, president of the Abraham Lincoln Civil War Roundtable of Michigan; and third, a paper dated April 1960 entitled "Michigan and the Republican Convention of 1860," prepared by Mr. Lloyd C. Nyman, of Grosse Point Woods, Mich.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BENTLEY. Mr. Speaker, I would like to speak very briefly about Michigan's part in this famous 1860 convention. It is a particular pleasure for me to do so at this time because this week happens to be Michigan Week and it is indeed appropriate that I should mention briefly the part played by the distinguished Michigan delegation at the Wigwam in Chicago 100 years ago.

Our delegation was headed by Austin Blair of Jackson, Jackson being, of course, the place where the Republican Party had been formed under The Oaks only 6 years earlier, and who subsequently became our war Governor of the State of Michigan.

The Michigan delegation was instructed to support the presidential nomination and candidacy of William H. Seward of New York, and adhered to that position throughout the three ballots which were taken at Chicago. As has been pointed out, of course, by the gentleman from Iowa and other speakers, a switch of four Ohio votes on the third ballot gave the nomination to Mr. Lincoln.

Austin Blair, who had been one of the strongest of Mr. Seward's supporters, having made for him the seconding speech, then arose and, with what the gentleman from Iowa has termed correctly good sportsmanship, made one of the outstanding addresses of the convention, a portion of which I should like to read at this time. I quote from Austin Blair's remarks following the nomination of Abraham Lincoln in Chicago 100 years ago:

> Like my friend who has just taken his seat, the State of Michigan, from first to last, has cast her vote for the great statesman of New York. She has nothing to take back. She has not sent me forward to worship the rising sun, but she has put me forward to say that, at your behests here today, she lays down her first, best loved candidate to take up yours, with some beating of the heart, with some quivering in the veins; but she does not fear that the fame of Seward will suffer, for she knows that his name is a portion of the history of the American Union; it will be written, and read, and beloved long after the temporary excitement of this day has passed away, and when Presidents themselves are forgotten in the oblivion which comes over all temporal things. We stand by him still. We have followed him with a single eye and with unwavering faith in times past. We marshal now behind him in the grand column which shall go out to battle for Abraham Lincoln, of Illinois.
>
> Mark you, what has obtained today will obtain in November. Lincoln will be elected by the people. We say of our candidate, God bless his magnanimous soul. I promise you that in the State of Michigan, which I have the honor to represent, where the Republican Party from the days of its organization to this hour, never suffered a single defeat, we will give you for the gallant son of Illinois, the glorious standard bearer of the West, a round 25,000 majority.

It so happens, Mr. Speaker, that in spite of an obvious feeling of disappointment and perhaps an early lack of enthusiasm in Michigan for Mr. Lincoln, nevertheless in the election of that year in November, Michigan gave Lincoln a margin of 23,413 votes over Mr. Douglas, the candidate of the Democratic

Party, which was almost the 25,000 majority promised by Governor Blair in his famous speech in Chicago.

It is a pleasure to speak here on this occasion. I want to commend our distinguished friend from Iowa for his having prepared this time and made these very moving remarks about the convention. I certainly express my appreciation to him for permitting all of us on both sides of the aisle to join this afternoon in calling attention to this historic centennial. I thank the gentleman very much.

Mr. SCHWENGEL. I thank the gentleman from Michigan for his appropriate remarks. I am sure the address he referred to by the great Governor of Michigan at that time was a real mark of statesmanship, one of our great heritages, of which we ought to be very proud.

Mr. BENTLEY. Mr. Speaker, the matters which I earlier secured permission to include with my remarks are as follows:

THE MICHIGAN DELEGATION AT THE REPUBLICAN NATIONAL CONVENTION OF 1860

Michigan was represented at the Chicago convention of the Republican Party of 1860 by the following delegates: Austin Blair, Jackson; Walton W. Murphy, Jonesville; Thomas White Ferry, Grand Haven; and J.J. St. Clair, Marquette, were delegates at large. Delegates from the State's four districts included J. G. Peterson, Detroit; Alex D. Crane, Dexter; Jesse G. Beeson, Dowagiac; William L. Stoughton, Sturgis; Francis Quinn, Niles; Erastus Hussey, Battle Creek; D. C. Buckland, Pontiac, and Michael T. C. Plessner, Saginaw.

Ferry was chosen vice president of the convention to represent Michigan. Stoughton was chosen secretary to represent the State. Murphy was appointed to the Committee on Permanent Organization, Quinn to the Credentials Committee, and Blair to the Resolutions Committee.

Austin Blair, who was chairman of the Michigan delegation, was shortly nominated by the Republicans as their candidate for Governor. He was elected, serving two terms from 1861 through 1864, and, because he was Michigan's "war Governor," he is one of the State's most famous Governors. Several of the other members of the delegation also had distinguished careers as public servants. Ferry was later a Congressman and a U.S. Senator from Michigan, and was acting Vice President in 1876–77. Stoughton rose to the rank of brigadier general during the Civil War and afterwards served two terms in the U.S. House of Representatives. Hussey had been president of the famous Jackson convention of 1854 where the Republican Party was formed "under the oaks," and he held numerous public offices on the State and local level.

Michigan's delegation was pledged to support William H. Seward of New York for the Republican Presidential nomination. This pledge reflected the personal preferences of most of the members of the delegation and apparently also reflected the feelings of most Michigan Republicans. There are several reasons for Seward's popularity in Michigan. He was well known in the State, having visited and spoken in Michigan on numerous occasions. He was a New Yorker, which brought him close to the thousands of Michiganites who had been born and raised in that State. Finally, before the Republican Party had been formed in 1854, Seward, as a leading Whig, had enunciated most forcefully the antislavery principles which became such an important part of the Republican platform. Lincoln, on the other hand, had spoken only once in Michigan, at Kalamazoo in 1856 on behalf of John C. Fremont.

Before and during the convention of 1860 strong efforts were made to get Seward supporters to drop him in favor of one of the other candidates. The main argument used against Seward was that although he was strong in the so-called safe States (such as Michigan) he could not carry the doubtful States. Particularly, it was said he could not carry Pennsylvania and Indiana. Both States held their elections in October, and it was said that Fremont's poor showing in these States in October 1856 caused serious defects among his supporters which led to his defeat nationally in the November elections in the other States. However, the Michigan delegation remained steadfast in its support of Seward.

William W. Evarts placed Seward's name in nomination, and his speech was received enthusiastically. Lincoln followers then greeted the nomination of Lincoln by N. B. Judd with what the official record described as "immense applause." The Seward and Lincoln forces then engaged in a duel to see which one could arouse the most enthusiasm for their candidate. Blair seconded Seward in what one member of the convention many years later still remembered as "one of the outstanding speeches of the convention." The Seward supporters followed Blair's speech with a tremendous demonstration. "No Comanches, no panthers ever struck a higher note, or gave screams with more infernal intensity," a convention observer declared. But then Lincoln's nomination was seconded and the demonstration that followed outdid the best the Seward forces could muster. "New York, Michigan, and Wisconsin delegates sat together and were in this tempest very quiet," the same observer reported. "Many of their faces whitened as the Lincoln yawp swelled into a wild hozanna of victory."

On the third ballot, on May 18, a switch of four votes in the Ohio delegation gave Lincoln the required number to win the nomination. Evarts, speaking for the Seward forces, arose and moved that Lincoln's nomination be made unanimous. Blair then arose, and spoke for the Michigan delegation which had cast its 12 votes for Seward on each of the three ballots. The eminent historian, William Hesseltine, has called the speech Blair now made "the speech of the hour." It showed "evidence of real sincerity" in pledging Michigan's support of Lincoln.

Blair said to the members of the convention:

"Like my friend who has just taken his seat, the State of Michigan, from first to last, has cast her vote for the great statesman of New York. She has nothing to take back. She has not sent me forward to worship the rising sun, but she has put me forward to say that, at your behests here today, she lays down her first, best loved candidate to take up yours, with some beating of the heart, with some quivering in the veins [much applause]; but she does not fear that the fame of Seward will suffer, for she knows that his name is a portion of the history of the American Union; it will be written, and read, and beloved long after the temporary excitement of this day has passed away, and when Presidents themselves are forgotten in the oblivion which comes over all temporal things. We stand by him still. We have followed him with a single eye and with unwavering faith in times past. We marshal now behind him in the grand column which shall go out to battle for Abraham Lincoln, of Illinois.

"Mark you, what has obtained today will obtain in November next. Lincoln will be elected by the people. We say of our candidate, God bless his magnanimous soul. [Tremendous applause.] I promise you that in the State of Michigan, which I have the honor to represent, where the Republican Party from the days of its organization to this hour, never suffered a single defeat, we will give you for the gallant son of Illinois, and glorious standard bearer of the West, a round 25,000 majority."

So hectic was the convention proceedings that it appears uncertain whether Evarts' motion was ever properly put and acted upon. Despite what Blair said, it appears that the Michigan delegation and the hundreds of Michiganites who were at the convention were sorely disappointed at Seward's defeat. The Michigan delegation returned home by railroad and tried to work up enthusiasm for Lincoln. One who accompanied the train recalled later: "We started out in a train trimmed with Lincoln banners, but in spite of the banners and in spite of Blair's earnest speeches, we did not get a cheer for Lincoln all the way from Niles to Detroit." In November, however, Michigan gave Lincoln a margin of 23,413 votes over the Democrat Douglas, almost the 25,000 majority promised by Blair at Chicago.

LINCOLN AND MICHIGAN

(Address by Mr. Arthur M. Smith, of Dearborn, president, Abraham Lincoln Civil War Round Table of Michigan, before joint convention of the Michigan Legislature, February 13, 1958)

(Foreword, by Hon. Louis C. Cramton, State representative from Lapeer County: "Mr. President, Mr. Speaker, members of the Senate and House of Representatives of Michigan: Abraham Lincoln was born on the 12th day of February, 149 years ago in a frontier cabin with one window and a dirt floor, and through this joint session of its legislative bodies, the State of Michigan today pays tribute to this preeminent world figure ever to be revered as democracy's exemplar. We are fortunate to have with us a notable Michigan authority on Lincoln, Mr. Arthur M. Smith, of Dearborn, president of the Abraham Lincoln Civil War Round Table of Michigan, who will address us on the subject 'Lincoln and Michigan.' ")

Mr. Cramton, Mr. President, Mr. Speaker, members of the senate and house and friends, Abraham Lincoln was born 149 years ago yesterday. He lived but 56 short years. For 21 years of this time he was at home, the dutiful son of what today we call an underprivileged family. In the remaining 35 years of his life he was to become the symbol of America in the hearts of millions here and abroad. Today we pause in a troubled world to pay homage to his memory. It is altogether proper that we should do so, for Abraham Lincoln symbolizes as does no other historical figure the triumph of a man and his ideals over his environment and the partisan struggles of his time.

The Legislature of Michigan is to be especially commended on this splendid custom of meeting in joint convention to commemorate the anniversary of his birth. I am very honored, indeed, to have been asked to address you today on the subject, "Lincoln and Michigan."

The able speakers on like occasions in previous years have given you inspired word pictures of Abraham Lincoln the man. These addresses, supported by scholarly research have been executed with admirable skill. Today I shall not attempt to duplicate these efforts. Instead, I shall speak to you about Abraham Lincoln the inventor and Abraham Lincoln the statesman—because in both capacities he was so closely associated with Michigan backgrounds.

As an inventor Abraham Lincoln made it his lifelong habit to inquire into the nature of things. He exhibited what he called the habit of invention; the habit of observation and reflection. As a statesman

he relied upon these observations and reflections as he formulated those policies which preserved the Union in his time and which can save the world in our time.

Today the world needs leaders who like Lincoln are both inventors and statesmen. As inventors they can observe and reflect upon the technology which has given us jet planes, radio, radar, and television. They can see more than destruction in the release of atomic energy. Space to them is more than a tactical weapon in an unrelenting war of ideologies. Probing the world about them, inventors specialize in doing the impossible. They have vision. They have a will to do. They have initiative.

When the knowledge and skills of the inventor are combined with the attributes of statesmanship, realistic political policies will emerge—policies which the world must have very soon if mankind is to survive.

Abraham Lincoln blended the mind of the inventor with the skills of the statesman in such perfect proportions that he stands today as the one great American to whom we can turn for timely inspiration, counsel and guidance.

Here is the secret for the growth of the so-called "Lincoln Cult." There are many students and collectors of Lincolniana in Michigan who, in common with other members of this cult, share the sentiment recently expressed by the eminent director of the Lincoln National Life Foundation of Fort Wayne, Ind., Dr. R. Gerald McMurtry.

"Abraham Lincoln," says Dr. McMurtry, "seems to take hold of people as no other historical character does. He is someone they can tie themselves to. He possessed a true nobility of character, yet he was like the rest of us in so many human ways. We feel that we really know him. Yet Abraham Lincoln remains a paradox." [1]

Michigan met Abraham Lincoln as an inventor in 1848 when he looked upon our beautiful peninsula from the deck of the lake steamer *Globe*. Michigan met Abraham Lincoln the statesman when he addressed the Kalamazoo rally of Young Republicans for Fremont in 1856. This combination of inventor and statesman is indeed a paradox.

Rumor and speculation has it that Lincoln in his lifetime also appeared at Bay City, Pontiac, and Detroit. These visits have not been verified by acceptable proofs. In common with every Lincoln student in Michigan, I would like to see these visits verified. As of today, however, we know nothing about the reasons for such alleged visits nor do we know anything about Lincoln's part in them.

Despite the fact that other States were more fortunate in their contacts with Abraham Lincoln during his lifetime, Michigan today possesses a rich store of Lincoln materials and has made significant contributions to recent Lincoln studies. Thomas I. Starr found the long lost Kalamazoo speech and made it available to Lincoln students. He also published his historical researches on Lincoln and the Detroit River. Bruce Catton, noted author on Lincoln and Civil War themes is a native son of Petoskey. Carl Sandburg wrote his masterful "War Years" while living at Harbert. Valuable collections of Lincolniana are located at the Clements Library in Ann Arbor, in the Burton historical collections at Detroit, and in the Dwight B. Waldo collection at Western Michigan University of Kalamazoo. There are, in addition, a number of privately owned collections of Lincoln materials in Michigan, several of which are nationally known.

One of the best publicized bits of Lincolniana in Michigan is the Logan County Courthouse in Greenfield Village. Henry Ford, born 2 years before the death of Abraham Lincoln, was, like Lincoln, both an inventor and a statesman. We know him best as an inventor but I am sure history will also know him as a statesman. The careful restoration of the Logan County Courthouse and the choice Lincoln items collected by Henry Ford reveal the close philosophical kinship which existed between these two inventor-statesmen.

There is a strong urge to tell you more about these fascinating aspects of Lincoln and Michigan but they are a part of another story. Let us then return to the two episodes previously mentioned—Lincoln's visit to Michigan as an inventor in 1848, and his visit to Kalamazoo as a statesman in 1856.

In Kalamazoo in 1856 Lincoln said the key to the greatness of America was that "Every man can make himself." Here is the philosophy of Abraham Lincoln, the self-reliant inventor. But at the same time Abraham Lincoln, the statesman, added the qualification that such a man must be free; free that is from both physical and mental shackles and must be living in a nation, such as America, in which the government assures him the freedoms which he must have if he is to "make himself."

This blending of the philosophic inventor with the practical statesman in Abraham Lincoln provided the leadership which was extolled by Woodrow Wilson in his Chicago address at the centennial celebration of Lincoln's birth. Then as now we can join in Wilson's fervent plea, "God send us such men again." [2]

The balanced combination of inventor and statesman in Abraham Lincoln is not unique in American history. Before his time it had been possessed by Benjamin Franklin, George Washington, and Thomas Jefferson. Possessing it, each had blended an inventor's vision with practical statesmanship to leave to this Nation the political philosophy and the structure of government so revered by Abraham Lincoln.

I have told you that Michigan first met Abraham Lincoln as an inventor. As a first-term Congressman from Illinois, Lincoln returned from Washington to Springfield by way of the New England States and the Great Lakes. In the early fall of 1848 he visited Niagara Falls and embarked at Port Buffalo as a passenger on the lake steamer *Globe*. The *Globe* reported at Detroit on September 29, 1848.[3] A story in the Detroit Free Press the next day recounts that the steamship *Canada* in going down the river on Thursday night had run ashore on Fighting Island and was there when the *Globe* came up.

Here then was the spectacle—two great steamers in a great river—one passing safely to its destination, the other aground on a shoal. What visions this must have conjured in Lincoln's memory. What reflections this observation must have inspired. Here was a need. Here was a problem. Lincoln had had a personal, firsthand contact with the problems of river navigation. He had once floated a flatboat stuck on the Rutledge Dam in New Salem by the simple expedient of securing an auger from the shore and drilling a hole in the end of the boat which extended over the dam. This had allowed the water to drain out of the boat, and so increased its buoyancy that it floated over the dam after which the hole was plugged, and the boat continued on its trip to New Orleans.

Obviously, such an expedient was not possible with a Great Lake steamer trapped on the shoals off Fighting Island. There was no place to transport the cargo or passengers. There was no way to lighten the load. Lincoln must have closely observed the activities of the crew of the *Canada* in wedging under the sides of the gunwales, empty casks, barrels, and even bales of straw to increase the buoyancy of the ship and float her off the shoals.

Lincoln reflected on this problem and decided to do something about it. When he returned to Springfield, he described these events to his partner "Billy" Herndon who in after years was to write [4] that Lincoln, continued to think about this problem of riverboat navigation. As a result, he suggested attaching a kind of bellows on each side of the hull of the craft just below the waterline.[5] By a system of ropes and pulleys, whenever the keel grated on the sand these bellows were to be lowered to the water and inflated and thus buoyed up the vessel was expected to float clear of the shoal.

When Lincoln reached home, Herndon tells us that, "he at once set to work to demonstrate the feasibility of his plan. Walter Davis, a mechanic having a shop near our office, granted him the use of his tools, and likewise assisted him in making the model of a miniature vessel of the arrangement as above described. Lincoln manifested ardent interest in it. Occasionally, he would bring the model in the office and while whittling on it would descant on its merits and the revolution it was destined to work in steamboat navigation." [6] This model is now preserved and can be seen in Washington at the Smithsonian Institution.

Gains Paddock, an old resident of Springfield, remembered that when the boat model was completed, Lincoln, to prove his assertion that the Sangamon River was navigable, demonstrated his boat in one of the public watering troughs in the public square at Springfield.[7]

This invention was no passing fancy with Lincoln. When he returned to Washington early in 1849, he took the model with him and secured the services of a Washington patent attorney, Zenos C. Robbins. The model was filed, an application for patent was made, and on May 22, 1849, Abraham Lincoln was granted U.S. Patent No. 6,469.

Many Lincoln scholars have ignored these events, or have treated this invention as something of a curiosity. This I am unwilling to do. From an intimate professional association with inventors for nearly 32 years, I know that an inventor will not carry an idea as far as did Abraham Lincoln unless he is sustained by some broader vision. In all cases, the invention patented is but a means to an end—a mechanism, if you please, to give reality to a vision.

I am certain that Lincoln must have had a broader vision which caused him shortly after the war-threatened first inaugural, to think about his boat model and to have one of the Patent Office employees find it for him.[8]

What, then, can we say now, nearly 110 years later, motivated Abraham Lincoln, the inventor, to make this invention? Part of the answer to this question is found in the

---

[3] "The Detroit River and Abraham Lincoln," Thomas I. Starr. Bulletin of the Detroit Historical Society, vol. III, Nov. 5, February 1947.

[4] Herndon incorrectly tells the story as involving the "ship Lincoln was on." There is no record of the *Globe* having been involved in this episode except as passing the stranded *Canada*.

[5] This is also incorrect. Both the model and the patent show the bellows to be above the waterline.

platform upon which he waged his first campaign for the State legislature. Even at that time he had promised to work for improvement of the rivers. Lincoln was first of all a riverman who knew rivers from years of firsthand contact with them. He knew what rivers had meant to him. He knew them as nature's right-of-way to places where man wished to go. He knew the shallow streams which led to the greater rivers. He knew these great rivers as they joined the cities, villages, and peoples of the separate States and territories into one great and united Nation. He knew the need for transportation to the West. I believe he saw in the western rivers and in his little boat a ready answer to the problem of western exploration and western expansion.

Certainly to a riverman of Lincoln's experience, vision, and ability, the Detroit River with a great steamship fast on a shoal presented a challenge to his inventive mind. That his solution may have been impractical is beside the point. He had demonstrated what he was later to call the habit of invention; that is, the habit of "observation and reflection." [9]

The riverboat is but one example of Lincoln's scientific abilities. In the Lincoln Museum in Washington, D.C., there is a model of a small wagon which is attributed to Abraham Lincoln as the inventor. To date his inventorship has not been documented. If it can be established, then Abraham Lincoln was fully 20 years ahead of the art in his development of the type of vehicle steering which is common in the automobiles of today and in which each front wheel turns about its own spindle.

Many who knew him said he was a man of decided scientific bent of mind. Dr. Joseph Henry, one of America's greatest scientists, came to know Lincoln well by serving as his "scientific adviser" during the Civil War, and said that he "marveled at the President's grasp of scientific matters." [10]

Recently, I was privileged to examined the original longhand statement of Dr. John Allen which is now preserved as a part of the Robert Todd Lincoln collection in the Library of Congress. I was interested to note that this longtime friend of Abraham Lincoln had written in 1860, that Lincoln's mind was of a "metaphysical and philosophical order," and that Lincoln had made geology and other sciences a special study. Dr. Allen also comments on the fact that Lincoln "has an inventive faculty—is always studying into the nature of things." [11]

"Behind the solemn, furrowed countenance of Abraham Lincoln was an inquisitive mind," writes Benjamin P. Thomas in his foreword to the recent book "Lincoln and the Tools of War." "It ranged" writes Thomas, "over the abstract and the infinite, the absolute and the immediate. It was philosophical, and at the same time was intensely practical."

"On the practical level," Thomas continues, "Lincoln's curiosity directed itself, among other things, to mechanical devices." Thomas quotes a fellow lawyer of Lincoln's who remembered that whenever Lincoln encountered a new piece of farm machinery on his rounds of the old eighth circuit, "he would carefully examine it all over, first generally and then critically; he would sight it to determine if it was straight or warped; and if he could make a practical test of it, he would do that; he would turn it over or around and stoop down or lie down, if necessary, to look under it; he would examine it closely, and then stand off and examine it at a little distance; he would shake it, lift it, roll it about, upend it, overset it, and thus ascertain every quality and utility which inhered in it, so far as acute and patient investigation could do it."

"Living on the periphery of the machine age in America," Thomas observes, Lincoln "was keenly aware of the technological advances that were taking place about him. He pondered on the impact of those advances on mankind." [12]

After reviewing Lincoln's interest in the mechanical arts to provide superior arms for the north, Thomas writes: "That many of these devices failed does not mean that Lincoln was naive or absurdly a visionary. In many instances he was on the right track but simply ahead of his time." [13]

In today's frenzied race to train "scientists," let us remember that crash programs in scientific education may give us technicians but they cannot give us inventors or statesmen. For this we must train students in the fine art of observation and allow them the time necessary for reflection. While necessary to inventors, both are essential for statesman.[14]

Lincoln's abilities as an inventor become of added significance when they are blended with his skills as a statesman. The inventor's habit of observation and reflection gave a special quality to the statesmanship of Abraham Lincoln which the distinguished historian, Allan Nevins, comments on in "The Statesmanship of the Civil War". "The special quality of Lincoln's statemanship", says Allan Nevins, "was its extraordinary realism or practicality." Dr. Nevins then points out that what set Lincoln apart from other statesmen of his time was "his grasp of what was practicable at any given moment".[15]

It was as such a statesman that Abraham Lincoln paid a visit to Kalamazoo, Mich., on August 27, 1856. There, on that day, Lincoln delivered his address "Against Extending Slavery" and demonstrated how much he had observed and how much he had reflected upon the problems of that time. Here he was playing the role of a statesman. Standing before a large gathering, billed as a "foreign" speaker, he was to be "tested" as he faced an audience made up mainly of the more enthusiastic and radical elements of the new Republican Party.

As we now read his Kalamazoo speech, we see how patiently and how skillfully Lincoln there developed those fundamental positions which he was to state more fully and more eloquently 2 years later in 1858 in his "House Divided" speech at Springfield, Ill., and still again 2 years later in 1860 in his Cooper Institute speech at New York City.

What he observed at Kalamazoo must have been the subject of much reflection by Abraham Lincoln, the statesman.

To many in the crowd at Kalamazoo, Abraham Lincoln was nothing but a name—they had come to hear the Battle Creek Glee Club and bands from Detroit, Ann Arbor, Jackson, and elsewhere. They had come to hear their idol "Zack" Chandler declare, "Let Kansas come in as a slave State and the North will make it a desert".[16] The majority of the crowd echoed the sentiments of George C. Bates who declared that day, "Sooner than see another foot of slave territory added to the Union," he would "dash it to atoms". "Sooner", said he, "than to have the ship of state carry a crew of slaveholders, let her go down with all aboard".[17]

The crowd at Kalamazoo, as the crowds later were to do at Gettysburg and at the second inaugural, listened but did not comprehend the message of Abraham Lincoln, the statesman.

In his Kalamazoo address, Lincoln, the statesman, recognized the problems then before the people. He saw the dividing lines formed between the slave States and the free States; between the North and the South; between the abolitionists and the supporters of slavery. He knew this division threatened the Union.

Recognizing these things in his speech at Kalamazoo; sensing that he was not speaking the sentiments of the crowd; Lincoln, the statesman, urged the crowd to forget these differences and join him in the most important issue of all; the preservation of the Union. Lincoln, the statesman, saw this as the only course if this Nation was to achieve the destiny which he was certain a divine providence had planned for it.

In his speech in Kalamazoo, Lincoln urged all to come forward, and help to maintain the Constitution "for," said Lincoln, "it is the only safeguard of our liberties."

Lincoln then concluded, "Come, and keep coming. Strike, and strike again." "So sure as God lives," he said, "the victory shall be yours." [18]

The Kalamazoo Gazette reported that "Mr. Lincoln * * * made a very fair and argumentative address, but was far too conservative and Union-loving in his sentiments to suit his audience." [19]

Lincoln, at Kalamazoo, had not yet attained the stature of a national spokesman on these issues. This was yet to come in the "House Divided" speech, the Lincoln-Douglas debates, and finally in the acclaim with which the audience received his speech at Cooper Institute. In Kalamazoo, Abraham Lincoln was, at best, a successful lawyer and something of a local politician from a neighboring State. He was just beginning to be noticed as a national figure. There were those in the audience at Kalamazoo who remembered him as the politician whose devastating attack in 1848 on the venerable Lewis Cass [20] had been a deciding factor in defeating Michigan's only bid to place one of its sons in the White House.

There also were those in the audience who, like "Zack" Chandler, were offended by Lincoln's conservative views, and who were to become so openly hostile to Lincoln that 4 years later they were to hold the Michigan delegation for Seward when Lincoln was nominated for the Presidency.

I doubt if many in the crowd in Kalamazoo appreciated that they were observing the early flowering of Lincoln as a statesman. Yet, it was truly a statesman who proclaimed to the crowd:

"We are a great empire. We are 80 years old. We stand at once the wonder and admiration of the whole world, and we must inquire what it is that has given us so much prosperity, and we shall understand that to give up that one thing, would be to give up all future prosperity. This cause is that every man can make himself." [21]

Lincoln, the statesman, also spoke of our deep and abiding interest in keeping the territories open for homes of free people. "There is another thing," said Lincoln, "and that is the mature knowledge we have—the greatest interest of all. It is the doctrine, that the people are to be driven from the maxims of our free Government * * *."[22]

The vision, the thoughts and sentiments of Lincoln, the statesman, at Kalamazoo find further expression in his "House Divided" speech. Remembering the problem of so expressing them as to reach his audience in Kalamazoo, we find Lincoln, the inventor, suggesting certain technical analogies and arguments based thereon which lie at the very heart of the "House Divided" speech.

It is Lincoln as a technician, an inventor if you please, who suggests the analogy of the sand casting mold and the frame timbers[23] to support so effectively the conclusions of Lincoln the statesman, in the "House Divided" speech that the combination of the Nebraska doctrine and the Dred Scott decision was an effective machine for the extension of slavery.

The close-knit fusion of the inventor and the statesman in Lincoln is seen also in his lecture on "Discoveries and Inventions" given before the Phi Alpha Society, of Illinois College in Jacksonville, Ill., on February 11, 1859.[24]

If time permitted, I should like to take you through this entire lecture for I believe it has a great deal of significance in the Lincoln story. One noted Lincoln scholar told me a few days ago, "That is the speech of a well educated man" Coming as it does between the "House Divided" speech and the "Cooper Institute" speech it shows the scope of Lincoln's interests and the intellectual growth which was to become so apparent in the "Cooper Institute" speech.

Let us turn our attention to some of the significant portions of this speech which reveal Lincoln as an inventor and as a statesman.

"I have already intimated my opinion," said Lincoln, in this lecture, "that in the world's history, certain inventions and discoveries occurred of particular value, on account of their great efficiency in facilitating all other inventions and discoveries." These included among others the discovery of America, and the introduction of patent laws.[25]

After considering the problems in the inventing of writing, Lincoln saw it as a means of recording and preserving important observations, thus possibly leading "to an important invention, years and even centuries" later. "In one world," said Lincoln, "by means of writing, the seeds of invention were more permanently preserved, and more widely sown."[26]

Lincoln was concerned about the inequality felt by uneducated people; about how such people looked upon the educated few as superior beings. "To emancipate the mind from this false and underestimate of itself," said Lincoln, "is a great task which printing came into the world to perform."

He then speaks of how difficult it is "for us, now and here to conceive how long it took to break its shackles" in order, as he put it, "to get a habit of freedom of thought, established." "It is," said Lincoln, "a curious fact that a new country is most favorable—almost necessary—the emancipation of thought, and the consequent advancement of civilization and the arts."[27]

After reviewing the course of invention through Asia and the older countries, this lecture continues on a very modern theme. "* * * we here in America," said Lincoln, "think we discover, and invent, and improve, faster than any of them. They may think this is arrogance; but they cannot deny that Russia has called upon us to show her how to build steamboats and railroads."[28]

To Lincoln, the discovery of America was "an event greatly favoring and facilitating useful discoveries and inventions."[29]

The "strong slavery of the mind" which concerned Lincoln in this speech, had to be broken before "freedom of thought" could be established. America was the new country so necessary to this "emancipation of thought."

This, then, brings us back to Kalamazoo and to the great empire whose cause he there stated as being "that every man can make himself."

Lincoln's message at Kalamazoo, and his lecture at Jacksonville, Ill., have particular applicability to the dilemma of free men in our troubled world today. Last November, Howard Fast, after leaving the Communist Party, wrote an article, in which he stated:

"Whatever the Communist Party once was, today it is a prison for man's best and boldest dreams. Tomorrow belongs to those who break down the prison walls that enclose the minds of man, not to those who support such walls. For mankind, the promise of tomorrow always has been and always will be the widening of intellect and horizon—in ever greater vistas of individual freedom."[30]

The mental slavery as well as the physical slavery demanded by communism was abhorrent to the mind of Lincoln. The Communist ideology can exist only so long as it can forge and hold its subject peoples in the shackles of mental and physical slavery. Lincoln's concern about extending slavery into free territories as he expressed it at Kalamazoo, was "that the people are to be driven from the maxims of our free Government." Today, I am certain his concern would be directed toward communism—and this for the same reason—that it drives people from the "maxims of our free Government."

The voice which spoke through Abraham Lincoln in stating this issue at Kalamazoo still speaks to us today, but we must listen closely if we are to hear it above the noise and clash of ideologies and the shoutings of rabid partisans seeking to separate man from man and nation from nation.

The voice today, as it did in the time of Abraham Lincoln comes from the soul of a great man who is a scientist, dedicated to serving "God's lowliest creatures," and living today in primitive surroundings, beside a river which he knows well. He speaks to us today against a frontier background. With a belief in God, and a devotion to the cause of all mankind Albert Schweitzer has given us a philosophy for today and tomorrow in his "Reverence for Life," and last year in his "Declaration of Conscience." In these writings I hear not the voice of Albert Schweitzer—nor the voice of Abraham Lincoln—but the voice of a Divine Providence again speaking patiently to us, to caution, to direct and to inspire us in the never ending search for a solution to our problems of survival, in a world terrified by what yesterday were but scientific curiosities discovered in its course of man's unrelenting search for knowledge.

I believe it is symbolic of our times that today replicas of the sculptured busts of Abraham Lincoln and Albert Schweitzer sit side by side in a showcase in the Smithsonian Institution at Washington.

We need to understand the great principles and the idealism of these great thinkers if we are to profit from their example.

Turn your ears to Lambarene in equatorial South Africa, or to Gunsbach in Alsace-Lorraine when Albert Schweitzer is there. Listen as he speaks. You, too, can hear the voice. It is the voice we heard speaking through Lincoln at Jacksonville and at Kalamazoo but the words are Albert Schweitzer's:

"A man's ability to be a pioneer of progress," says Schweitzer, "that is, to understand what civilization is and to work for it, depends on his being a thinker and on his being free.

"Material and spiritual freedom are closely bound up with one another," Schweitzer asserts and then says, "Civilization presupposes free men, for only by free men can it be thought out and brought to realization."[31]

Lincoln the inventor—Lincoln the statesman—gave us the vision, gave us the courage and gave us the leadership which enabled this Nation to survive the tragedy of the Civil War and to become a world power dedicated to the principle that people are not to be driven away from "the maxims of our free Government." As an inventor, Abraham Lincoln supported other inventors in developing the war-born technology of the Civil War from which has grown the awesome technology of today whose imperative voice demands that we firmly establish here and now the principle stated by Lincoln speaking as a statesman in Kalamazoo; that peoples shall not be driven from "the maxims of our free Government."

John Wilkes Booth cut short the life of Abraham Lincoln just 41 days after the second inaugural. It is one of the ironies of history that Abraham Lincoln, the inventor and statesman, could not have lived to see and to have directed the conversion of the many war-born inventions into devices for the peacetime uses of all mankind. Lincoln, the inventor, and Lincoln, the statesman, would have seen in this a vision come true—a nation strong and united; a nation dedicated to the principles of freedom.

In his writings, Abraham Lincoln, the statesman, fixed a course of freedom for this Nation and for all "other nations so conceived and so dedicated."

Denied in life the opportunity to see the Nation strong and physically united, Abraham Lincoln, the inventor, still had one last role to play.

The crowds which viewed his funeral car; the throngs which saw the train bearing the body of the beloved leader from Washington to Springfield, Ill., viewed all that was mortal of Lincoln in a setting new and strange to them. The car which carried the body of Abraham Lincoln on this last journey was the "Pioneer," the first luxury sleeping car built by George M. Pullman.[32] Appropriately, this car was drawn by a locomotive named the "Union."[33]

Lincoln, the inventor, would have been pleased to know that the railroads along the funeral route, in order to accommodate this new car, had to lay many miles of standard gage track, widen their bridges, and cut down their station platforms. This sad last journey supplied the impetus necessary to force standardization of tracks and equipment on the railroads of America.

Thus, even in death, Abraham Lincoln, inventor, dreamer, prophet, and statesman, played an important part in achieving his vision of a Nation closely knit together.

Yes, the persistence of Lincoln, the inventor, has been rewarded. His beloved United States of America became united with the rails supplementing the rivers to join all of its parts into one great and indivisible Union. The little river boat of 1849 had been Lincoln's dream of one means to achieve this end. But the inventor of the boat became a prophet of the rails.

The eminent Lincoln scholar, the late James G. Randall, in "Mr. Lincoln," published last year, supports the picture of Abraham Lincoln as an inventor-statesman.

"Abraham Lincoln of Illinois," Randall says, "made it his business in the period preceding his presidential nomination to emphasize the peacetime pursuits of his country and to recover for his own day some of the Nation building stimulus of the fathers." "He was concerned with problems of slavery," Randall continues, "and with such a handling of those problems as would allay strife, as he hoped, but this was not all. He turned his thoughts also to discoveries and inventions, to the 'iron horse,' to 'hot-water power' harnessed to help mankind, to the '70 or 80 thousand words' of the English language to influences that tend to 'bring us together' and 'make us better acquainted,' to the harvest machine and the 'steam plow,' to the problem of 50 bushels of wheat to the acre."[34]

In passing, may I here express the hope that as the forthcoming Civil War Centennial is observed in Michigan, the Planning Commission proposed in pending Senate bill 1111 will focus public attention on these peacetime pursuits of Lincoln's day and emphasize the way in which the citizens of Michigan worked with the citizens of the other States to recover the Nation building stimulus of the fathers as the swords of the Civil War were beaten into plowshares of the peace which followed.

Today our science and technology, also born of a great war, have forced upon us new dimensions of time and space and wholly new concepts of energy. There were no sputniks in Lincoln's time; there were no intercontinental ballistic missiles; there were no atom bombs; there were no H-bombs. There were, however, grapeshot and shrapnel; explosives; gases and fire. The rifles of the Civil War had neither the range nor the awful destruction of a modern rifle. The cannons of that war had neither the range nor the frightfully destructive powers of a guided missile. The observation balloons and the crude electromagnetic telegraph of the Civil War were a far cry from the jet bombers, the space platforms, the radar, and the radio of the present age. Yet, as in all wars, all these things had this in common: they are used to kill young men; they are used to maim young men, and their use in war will solve no problems.

Today, we have the power, not only to kill and maim our enemies, but we can inflict our wrath on generations yet unborn. Upon all the generations of mankind yet to come we can inflict the terrible burdens of genes permanently damaged by the lethal rays of our atomic bombs. The inventors of the world have given us this power. With such power comes responsibility—the responsibility of world leadership.

If we are to learn but one lesson from our past history, it is that the gracious hand of an all-knowing providence has guided and directed the affairs of this great Nation through devoted and dedicated leaders, such as Abraham Lincoln, divinely inspired to accomplish, in the darkest moments of despair and gloom, the task of keeping faith in America and in keeping faith in those ideals which have made this country great.

Abraham Lincoln, the inventor; Abraham Lincoln, the statesman, has given us the pattern for such a leader. Michigan is proud today that Abraham Lincoln found here the inspiration for his invention of the river boat; the birthplace of the party which elected him to the Presidency; and the platform that day over 100 years ago, in Kalamazoo, from which emerged Abraham Lincoln, the statesman.

"God send us such men again."

Michigan and the Republican Convention of 1860

(By Lloyd C. Nyman)

The Republican convention of 1860 has found its place in the pages of history as a part of the written record of the life of Abraham Lincoln. As it was significant as a momentous event in his life, so it is significant in the history of our Nation. It was an important link in the dramatic events that preceded the Civil War. There is no doubt that the results of the convention added fuel to the flames that were smouldering in the South. It also marked the dedication of a young and powerful political party to a platform and a candidate opposed to the extension of slavery.

The role of the Michigan delegation in the Chicago convention became a minor one due to the simple fact that they had backed the wrong man. From the first they had supported William A. Seward of New York, and shared with their neighbor delegation from Wisconsin the distinction of unwavering loyalty to his cause until the last vote of the convention was cast.

The published historical events of the convention have been gathered by many authors from the Chicago newspaper files of that day, and it is doubtful if much more can be found to add to that part of the story. But, for the events relating to the Michigan Republicans, history and biography tell us little, and we must rely on the Michigan newspapers for the story of their activities. For the pungent editorials and colorful descriptions of the reporters of 100 years ago, we express our gratitude and our admiration.

A review of the editorials reveals the sharp political differences among the newspapers, and presumably, their readers. The Detroit Free Press, the Democratic paper, was solidly behind Stephen A. Douglas, the leading candidate for the Democratic nomination. The Detroit Tribune and the Detroit Daily Advertiser were pro-Seward, pro-Republican, and strongly antislavery. The Advertiser was also anti-Horace Greeley.

While it is not the intention of the writer to determine the "why" of the strong Seward sentiment in this State, mention should be made of contributing causes.

William A. Seward of New York was a popular political figure, commanding the respect of a large segment of the Republican voters. He had been Governor of New York, and was then serving in the Senate as an able statesman and adversary of the advocates of slavery. He was a leader of the "radical" antislavery group of Republicans, although he had alienated the more moderate Members by his statement that "there is a higher law than the Constitution." His campaign was in the hands of a clever political manipulator, Thurlow Weed, whose efforts to secure preconvention delegate commitments seemed to have brought Seward to the threshold of the nomination weeks before the convention.

In addition, it is pointed out by Thomas I. Starr that Zachariah Chandler was a strong factor in holding "Michigan in the Seward column at the Chicago convention of 1860, despite every influence that could be brought to bear upon its delegates by other western groups."

Chandler had spoken in Kalamazoo in 1856 when Lincoln had made his only appearance in the State, speaking in behalf of Fremont for President. "Particularly did Lincoln trample on the toes of Zachariah Chandler. * * * From that day onward Chandler never could speak or think of Lincoln except contemptuously."

Although Chandler's biographer reveals that he had cast one of the four Michigan votes for Lincoln for Vice President in 1856, Chandler, a powerful political force, apparently changed his mind, and his enmity of Lincoln may have been the strongest reason for the Seward strength in Michigan.

Abraham Lincoln was just emerging as a national figure. He was well-known in Illinois as a State legislator, a one term Congressman, and a skillful lawyer and public speaker. He had achieved prominence only 2 years before in the senatorial battle with Douglas. The celebrated "debates" were carried in newspapers across the land. Although Lincoln lost the election in the legislature (as was the procedure then), he carried the majority of the popular vote, and more importantly, brought his name before the country as the champion of the principle that slavery should not be extended to the new States and Territories.

If he nursed further political ambitions, he remained discreetly quiet. In November of 1859 he wrote in a letter, "I have enlisted for the permanent success of the Republican cause; and, for this object, I shall labor faithfully in the ranks, unless, as I think not probable, the judgment of the party shall assign me a different position."

In February of 1860, he traveled to New York and delivered the famous address at Cooper Union in which he established himself as a leader of the Republican Party, and gave the eastern politicians the impression of a man to be reckoned with.

Although his Illinois friends were urging him to declare himself on the nomination, and despite the clamor of the friendly newspapers in Illinois, he would not commit himself. He received two offers to manage his candidacy, but he replied to one offer—"Even my friends, so far as I know, have yet reached a point of staking any money on my chances of success."

But less than a month before the Chicago Convention he wrote to Senator Trumbull: "As you request, I will be perfectly frank. The taste is in my mouth a little."

The Republican State convention in Illinois named him as their unanimous choice as the "rail-splitter candidate," but even then he was cautious. He would admit only that "the Illinois delegation will be for me from the start, and no other delegation will."

But in Michigan Lincoln was not mentioned in the newspapers until a day or two before the convention. On May 2, 1860, the Republican State convention met in Detroit at 11 a.m. at Merrill Hall, situated at the northeast corner of Woodward and Jefferson, now the site of the City-County Building, and placed its faith in William H. Seward. The platform adopted that day read in part:

"ARTICLE 9

"*Resolved*, That William H. Seward, the tried and lifelong supporter of the Republican principles; the statesman of his time; eminently conservative and national in his views; commanding in private and in public life the men of all parties, North and South, is our first choice as a candidate for the Presidency; and under his leadership we shall enter the contest with an unvarying hope that a glorious triumph awaits us over the broken and unorganized factions of the Democracy.

"ARTICLE 10

"*Resolved*, That our delegates are hereby instructed to cast the vote of Michigan for

---

[34] Mr. Lincoln—James G. Randall edited by Richard N. Current, Dodd, Mead & Co. New York, 1957, p. 3.

him as a unit, and use all honorable means to secure his nomination."

The following delegates were selected to meet in Chicago:

First District: Delegate at large, Hon. Austin Blair, of Jackson; alternate, G. W. Lee, of Livingston. District delegates: J. G. Peterson, of Wayne; H. T. Backus, of Wayne; A. D. Crane, of Washtenaw; D. Cramer, alternate.

Second District: Delegate at large, W. W. Murphy, of Hillsdale; alternate, W. B. Montgomery. District delegates: Jesse J. Beeson, Cass; alternates, D. Larbelere; Wm. S. Stoughton, St. Joseph; alternate, N. D. Sheets, Branch.

Third District: Delegate at large, J. W. Ferry, of Ottawa; alternate, J. H. Andrews, of Van Buren. District delegate: Francis Quinn, of Berrien; alternates, A. H. Cary, Erastus Hussey, of Calhoun; Seth Sprague, Montcalm.

Fourth District: Delegate at large, J. J. St. Clair, Marquette; alternate, Morgan Bates, Traverse City. District delegates: D. C. Buckland, Oakland; A. T. Grossman, Geneseo; alternates, Michael T. C. Pressner, Saginaw; C. P. Parkhill, Shiawassee.

The platform commended the growth and vigor of the party, condemned the reckless expenditures of the administration in Washington, attacked the corruptness of the opposition, and significantly denounced the treachery involved in the admission of Kansas as a State.

A communication dated April 30 was read from the Sons of Michigan in Chicago, former residents of Michigan, advising that they had "secured for the use and accommodation of your delegates during the session of said convention, very desirable apartments in the Adams House of this city, one of our finest hotels * * * and tender to our Michigan friends who may be in attendance at that convention, their individual hospitality and personal service."

Advertisements in the Detroit papers announced that half-fare rates on the railroads be extended to those going to the Chicago convention. An item in the Detroit Daily Tribune of May 11 stated:

"A special train on the Grand Trunk Railroad will arrive in Detroit on Saturday morning with about 300 ladies and gentlemen, from the northern New England States, including the delegates to the convention. A special train over the Great Western Railway Monday noon will bring the remaining New England and New York delegation. A portion of the Michigan delegation will join them here.

"Mr. Thurlow Weed and ladies have engaged rooms at the Russell House for this Friday night. Persons going to Chicago from the interior will be accommodated by taking trains at 4:30 and 8 p.m. leaving Detroit."

On May 14 the Tribune noted:

"A special train over the Great Western Railway, which left Suspension Bridge (at Niagara Falls) at 6:05 this morning arrived at Windsor at 12:30. Portions of the distance were run at the rate of a mile a minute. Portions of the New York, California, Vermont, Connecticut, and Massachusetts delegations—and the whole accompanied by Gilmore's Band of Boston."

Among the delegates listed were Wm. Evarts, chairman of the New York delegation, the notorious Tom Hyer, ex-Governor King, ex-Governor Fish, and General Nye.

"The Detroit Light Guard Band played 'Hail Columbia' as the passengers passed from train to the ferryboat *Union* and the large body of Republicans who were on hand from this side of the river made the welkin ring with cheers of welcome. The passengers, while eating the splendid dinner prepared for them on the *Union* * * * were entertained by the Light Guard Band, and as soon as the steamer * * * under the command of Capt. Henry Abbot, neared the Michigan Central docks, the guns boomed and cheer after cheer went up for Wm. H. Seward and the delegations. As soon as the boat reached the dock, a rush was made for the Central train, composed of six large coaches, and all hands were seated. About two-thirds of the delegates wore Seward badges and a large silk banner, bearing upon its face a portrait of the New York statesman, was borne aloft by the accompanying New York delegation. The sight of the banner caused much enthusiasm. The feeling for Seward is very strong in all delegations. There being a few minutes to spare in the Michigan Central Depot, the Boston band played some national airs and Gen. Nye said a few words expressing the hope that he would on his return be able to stop at Detroit, and assist in ratifying the nomination of Seward. The train moved off at about 1 o'clock. The time to be made in about 8¼ hours."

The newspaper accounts of the next 2 days told of the excursion trains moving across Michigan at 40 miles an hour with demonstrations "at every stopping place." One train left Detroit with six coaches "densely crowded" and arrived in Chicago with twelve coaches. Several trains embarked from Detroit with four to six coaches. We can imagine the gay scenes as the trains, loaded with delegates and visitors, banners and flags festooning the engine and cars. "Cannons and banners met the train at all principal stations." Jackson, the birthplace of the Republican Party, must have put on a real show, with Austin Blair, chairman of the State delegation, and soon to become Governor, making a speech at the station.

"On the line of the road, the greatest excitement prevailed. In the cities, in the villages, in the hamlets, in the fields, and on the road, whether the train waited at a station or glided like a mete on by, waving handkerchiefs, swinging "tiles" (high silk hats) and shouting throats gave evidence of the deep sympathy universally felt in the cause and a Godspeed to the mission which it was bound. Those expressions were always responded to by the delegation."

From the Kalamazoo Telegraph a dispatch to the Tribune gave this interesting sidelight:

"Master Mechanic Sweet rode all the way to Marshall on the cowcatcher * * * and invited others to ride but no one accepted. * * * The train made five stops—Ann Arbor, Jackson, Kalamazoo, Niles and Calumet (Indiana). At Marshall the train changed engines at full speed. The Challenge raced ahead * * * the Racer started on * * * the train in pursuit of the new locomotive and without slacking speed the two were united without jar or confusion way to the west of Marshall. The same feat was also performed at Michigan City. * * * Tom Hyer raised $75.89 as a purse for the four engineers among the passengers."

The Detroit Daily Advertiser reported that the delegation from Hillsdale brought a curiosity made by J. D. Meers of that city, "a chair made from 24 different kinds of wood—one kind to represent each State represented in the Convention, and to be presented to the successful candidate for President."

The Niles Republican of May 19 related:

"The delegates from the New England States to the Chicago convention passed through this place on Monday en route to the Chicago Black Republican Convention. Speeches were made and cannon were fired. Massachusetts delegates were there full of treason abroad as at home. * * * The New York delegation wore Seward badges. Tom Hyer, the bully, accompanied the delegation to protect them. One of them got left by the cars and he had an opportunity to cool off in a strong anti-Seward city."

From further remarks, it can be deduced that the Niles Republican, despite its name, was a strong Democratic paper.

But the Detroit Tribune paused in its description of the gaiety to sound a sober note. "The common bond of the party is opposition to the extension of slavery in the Territories of the Union. * * * With five new Territories now awaiting organization and five more organized and still maintaining a territorial form of government, these are the strongest reasons presented why the Republican Party should be specially true to its early policy in relation to the exclusion of slavery from the Territories and the Union."

One of the rarities uncovered from the files of the Detroit Tribune was a Seward song, "On the excursion from Portland to Chicago by the Grand Trunk and Michigan Central Rail Roads" to the tune of the "Star Spangled Banner."

"The Great Bridge is finished, 'Victoria' its name,
So wood up the tender and let loose the brakes,
The engine is ready we start with the train,
From the gem of the sea to the queen of the lakes,
To Chicago we dash with the speed of the wind,
More swift than the bird with the dark raven wing,
Leaving ocean, and city, and mountain behind,
For the prairies that bloom in the verdure of spring.

"Then gather in strength then ye men of the North,
Light the watch fires of freedom from seashore to mountain,
From East, South, and West, go gallantly forth,
Up the Father of Waters, from outlet to fountain,
In liberty's voice shall the Nation rejoice,
As the sons follow right in their father's first choice,
And the white flag of freedom waves proudly and free,
From the queen of the lakes to the gem of the sea.

"The heart of the Nation beats full, free, and strong,
For freedom and justice let all men unite,
While the Empire State speaks in defiance of wrong,
And the Keystone stands firm in defense of the right.
No slavedriver's whip shall subdue the Northwest,
Or taskmaster's footsteps pollute the fresh sod,
For New England is ready to join with the West
In devotion to duty, to freedom, and God.

"If Seward or westward we following chase
Or Fremont or Fessenden lead in the race,
We pledge to the cause our thought and our days,
And follow our leader and honor the man.
Our triumph shall cease when New York's finest son,
The ablest of statesmen, the purest of men,
Shall proclaim to the Nation our victory won,
And peace and content must resume their mild reign.

"So harness the steam horse and fill up the car,
We sweep to Chicago, we annihilate space,
By the river of Erie, the distance so far,
Is spanned in 2 days of this wonderful race.
The sea and the West are united in one,
So fill up the firebox and lower the brakes,
We sweep to the West with the speed of the sun,
From the gem of the sea, to the queen of the lakes."

Whether this song was actually sung is doubtful, but certainly we can be sure that Seward's name was on every lip, and his name must have found its way into more than one melody of the day.

Thus did these trains and others bring 3,000 delegates and visitors from Michigan to Chicago—"all of the finest, and truest, and most earnest kind, and all Seward Republicans, from the crown of their heads to the soles of their feet, first, last and all the time."

Chicago was then a city of only 100,000 inhabitants, and a very young city at that. When Lincoln came to Illinois only 30 years before, the State was but sparsely inhabited, and Chicago but a village. Even in 1860 the State was just emerging from a pioneer prairie wilderness, and much of its land was still to be cultivated.

As the delegations arrived at the 12th Street depot in Chicago, they were greeted with a rousing reception. A Chicago paper reported that the "depots beat like great hearts with their living tides * * * a brilliant festival * * * an army with banners."

The accounts go on, "Michigan Avenue was finely illuminated, and as the train neared the 12th Street depot, a brilliant rocket announced it to the crowd. Another rocket streamed from Jackson Street; a cannon boomed across the basin; the bands struck up, and hearty cheers from the thousands of throats welcomed the train now nearing the depot. And the Wide Awakes (the Republican marching societies of young men) with gleaming torches, as well as the crowd, took up their line of march."

The delegates were escorted to the Adams House by the Seward men with torches blazing and bands beating a martial air. If there was any travel weariness in the bones of the delegates, it was soon washed away in the tide of the joyous welcome.

The 42 hotels and innumerable boarding houses in Chicago were jammed with upward of 30,000 visitors. One account stated that the population of the city doubled. The more than 1,000 saloons and grog shops did a land-office business, although one reporter claimed seriously, "We have yet to meet the first individual with any appearance of intoxication." Men slept in hotel lobbies, on pool tables, and wherever they might lay their weary heads.

The eve of the convention found Seward leading all the straw votes. Reports of polls taken on the trains indicated he was far ahead. Even the Democratic Detroit Free Press advised its readers that in the forthcoming "Black Republican Convention" "Seward will lead, Bates will come next, Mr. Chase will run third, Mr. Cameron next, and then Mr. Lincoln." But the possibility of Seward's nomination caused many to tremble, and the Detroit Tribune of May 17 editorialized that "the fact that a majority of the convention is in favor of Seward no one denies, but it is also certain that a majority of the convention look fearfully to the election in case he is nominated."

This was the crux of the situation. They must nominate a man who could carry the "doubtful" States—solidify the East with the Midwest—and satisfy the overwhelming ambitions of the various candidates and their powerful backers. But, interestingly enough, in the same paper in which the Tribune announced the nomination of Lincoln, it carried an item from its correspondent in Chicago that "Seward will receive 200 votes on the first ballot, and I do not think it possible to beat him, and yet there may be such a combination to do it."

The convention was held in the Wigwam, an auditorium expressly built for the purpose by a group of Chicago citizens and decorated by a committee of local ladies. It was a wooden structure, two stories high, and measured 100 by 160 feet. By our modern standards, this would be a small building, but for that day it was huge. But large or small, it was able to hold more than 10,000 people. The Detroit Daily Advertiser cites a very careful account of the number inside the building on the day of the nomination.

In the galleries	3,550
On the stand	980
Under the galleries	5,870
On the stairs	650
Within the railing	1,100
Total	12,150

And "outside the building stood an earnest impatient excited crowd of 12,000 men, making the whole number of persons in the Wigwam and around it nearly 24,000."

The building was designed to take advantage of a slope in the land by providing a series of landings on which the spectators stood "jammed in so tightly that they could scarcely move." At the rear of the hall was a wide platform on which were seated over 500 delegates and newsmen. Running around three sides of the building was a gallery so pitched that "from every part a perfect view of the stage could be had." Here sat the ladies with their gentlemen who had accompanied them, and although designed to seat 1,200, the preceding report indicates that it was extremely crowded. One reporter counted 5,800 in this section.

There were amusing tales of men bribing women to take them into the gallery to meet the rule that men were allowed only in the company of the ladies.

There was the story of the Irish washerwoman who, seeing the gentleman to his seat, retired with her bundle and her fee. However, when an Indian squaw who was selling moccasins outside was pressed into service, it was more than the doorkeepers could stand. They decided that she was no lady.

The committee of Chicago ladies decorated the interior of the Wigwam with wreaths of evergreen and other festoons. It is said that some of the evergreens were brought by one of Charles Mear's ships from his logging camp on the west coast of Michigan. Colossal statuary paintings on arched panels decorated the back of the stage. On the sides of the pillars supporting the roof were pictures of famous and distinguished men. The auditorium was lighted with gas which made it "brilliant in the extreme."

Telegraph was used for the first time at a national convention, and wires were extended into the building so that reports of the convention could be sent by an operator who was seated among the reporters on the stage.

On the opening day of the convention, the Advertiser reported that "20,000 people assembled around the Wigwam waiting for it to open and when it was thrown open the rush for the inside was like the breaking loose of a mighty river. In 3 minutes after the main entrances were thrown open, not less than five thousand people entered the hall, running and leaping like men fleeing from some great danger."

The Detroit Free Press stated that "the morning opens with much excitement. The streets are crowded, and several processions have been formed, headed by bands of music. By invitation of the Michigan delegation, the New York delegates and visitors gathered at the Adams House to march together to the Wigwam. The procession was a striking reature of the morning. They marched in sections of four, consisting of two New Yorkers and two Michigan men, numbering between 3,000 and 4,000, all wearing badges inscribed 'New York Republican Association,' 'Michigan Republican Association,' and with the name of Seward for President, a banner with Seward's likeness being carried at the head."

The proceedings of the first day, May 16, were typical of political conventions. Little transpired of interest unless it was the long debate concerning whether the convention should accept the invitation of the Chicago Board of Trade to entertain the delegates with an excursion ride on the lake, an event which would have interfered with the evening session.

The morning session of the second day, May 17, was taken up with the familiar reports of standing committees and the arguments pertaining to the seating of delegates. The slave-holding States were very nearly unseated, and the redoubtable Cassius Clay led the fight to see the border delegates take their place in the balloting. In the afternoon, the convention was aroused by the report of the platform committee which failed to include a reference to the Declaration of Independence. Battle-scarred old Joshua Giddings, of Ohio, a veteran of the antislavery fight, "took a walk" after an impassioned oration demanding that it be included. Then Delegate Curtis of New York made an eloquent speech that resulted in the insertion of the phrase "that all men are endowed with certain inalienable rights, etc.," and "venerable Giddings returned to the convention amid a great ovation."

When the platform was adopted there was a wild demonstration for about 10 or 15 minutes. When this had subsided, a motion was made to nominate a candidate for the presidency.

This, it is claimed, was the crucial point of the convention. If the nominations had proceeded, Seward would likely have been nominated on the first ballot. But, it was announced from the rostrum that the tallies necessary for recording the vote were not ready and that there would be a slight delay. At this point, a "voice" from somewhere was heard "moving that this convention adjourn until 10 o'clock tomorrow morning."

Thus was Abraham Lincoln saved for the great victory.

All that night the State delegations met in caucus. Judge David Davis, of Illinois, Lincoln's manager, strove with his coworkers to mend their political fences. Despite Lincoln's refusal to be bound by any deals, Senator Cameron, of Pennsylvania, was promised a Cabinet post. Other promises were made, and the doubtful States were one by one brought into the Lincoln camp. Horace Greeley, the famous New York publisher, shunned by the New York delegation and seated as a delegate by proxy from Oregon, of all places, worked among the Eastern States to defeat Seward. Many began to see now that Seward could not win the election without the support of the powerful Northern States. The cocksure attitude of the Seward crowd was becoming a deterrent. The fact that it had appeared that he had the nomination "sewed up" was working against him. Thurlow Weed and his cronies had done their work too well.

That night Ward Hill Lamon and Jesse Fell, of Illinois, arranged for the printing of a large number of additional tickets and distributed them to the Lincoln men. The next morning, May 18, they lined up early and entered the Wigwam and filled the visitors seats. When the Seward crowd marched gaily to the doors, they found that they could not get in. If Illinois could not outvote Seward, they were determined to outshout him. "A Chicagoan reputedly able to shout across Lake Michigan was enlisted to take a strategic position in the hall and to bellow lustily whenever he received the signal. Another man, equally endowed, was placed in another part of the hall."

The conventions of that day were saved the long and dreary nominating speeches that must be endured today. Following Seward's nomination, Mr. Judd of Illinois said simply, "I desire, on behalf of the delegation from Illinois to put in nomination as a candidate for President of the United States,

Abraham Lincoln of Illinois." The other candidates were duly nominated and equally brief seconding speeches made, including that of Austin Blair of Michigan in behalf of Seward.

But the short speeches did not limit the demonstrations. The applause grew into cheers, then prodigious shrieks, and then pandemonium. Murat Halstead reports it thus: "Hundreds of persons stopped their ears in pain. The shouting was absolutely frantic, shrill, and wild. No Commanches or panthers ever struck a higher note or gave a scream of more infernal intensity. Thousands of hats flew over the hall * * * when Lincoln's nomination was seconded, the uproar was beyond description. Imagine all the hogs ever slaughtered in Cincinnati giving their death squeals together, and a score of big steam whistles going together, and you conceive something of the same nature. The Lincoln boys * * * took deep breaths all around and gave a concentrated shriek that was positively awful, and accompanied it with stamping that made every plank and pillar in the building quiver."

Then came the rollcall—233 votes out of a possible 465 were necessary for a choice. Seward received 173½, Lincoln 102, Cameron of Pennsylvania 50½, Chase 49, and "others scattering." Michigan cast its 12 votes for Seward.

Proceeding to the second ballot, Cameron withdrew. Seward polled 184½, a gain of 11 votes, but Lincoln tallied 181, a gain of 79.

As the third ballot began, the crowd became silent, and many watched their own tally sheets as the voting progressed. When every vote was counted, Seward had 180, but Lincoln polled 231½, only one and a half votes shy of nomination.

Joseph Medill of Chicago who had seated himself in the Ohio delegation, leaned over to whisper to David Cartter, chairman of the Ohioans: "If you can throw the Ohio delegation to Lincoln, Chase can have anything he wants." Cartter, a stammerer, bounded up excitedly: "I I a-arise, Mr. Chairman, to a-announce the ch-change of f-four votes from Mr. Ch-Chase to Mr. L-L-Lincoln."

The Chicago Tribune reported: "Deafening roar of stentorian applause arose from the immense multitude such as had never been equalled on the American Continent nor since the day that the walls of Jericho were blown down." A signal was given to the men on the roof, and the news was given to the crowd outside. A cannon fired a salute, and the crowd of 20,000 on the street greeted the news with a roar that could be heard above the din inside.

The Lincoln men were jubilant. The Seward adherants were crushed. But as the States, one by one, rushed to join the winning side, Mr. Evarts of New York moved that the nomination be made unanimous. Carl Schurz of Wisconsin and Austin Blair of Michigan joined in seconding the motion, and Blair made a "touching and effective speech."

"Like my friend who has just taken his seat (Schurz) the State of Michigan from first to last, has cast her vote for the great statesman of New York. She has nothing to take back. She has not sent me forward to worship the rising sun, but she has put me forward to say that, at your behest here today, she lays down her first, best beloved candidate to take up yours, with some beating of the heart, with some quivering in the veins (much applause) but she does not fear that the fame of Seward will suffer, for she knows that his fame is a portion of the history of the American Nation; it will be written and read, and beloved long after the temporary excitement of this day has passed away. We stand by him still. We have followed him with a single eye and with unwavering faith in times past. We marshal now behind him in the grand column which shall go out to battle of Abram (sic) Lincoln of Illinois. Mark you, what has obtained today will obtain in November next.

Lincoln will be elected by the people. We say of our candidate, God bless his magnanimous soul. [Tremendous applause.] I promise you that in the State of Michigan, which I have the honor to represent, where the Republican Party from the days of its organization to this hour never suffered a single defeat, we will give you for the gallant son of Illinois, and glorious standard bearer of the West, a round 25,000 majority."

In Detroit the Democratic Free Press commented that all the black Republicans were down in the mouth at the nomination of a man who was beaten by Douglas and "whose reputation as a beaten candidate would not desert him for years."

The Republican Detroit Daily Advertiser stated "that it took by surprise the majority of citizens * * * who had confidently expected the nomination of Seward." But it added that "the wisdom of the choice was readily seen and acknowledged. As soon as the nomination of Mr. Lincoln was confirmed by subsequent dispatches, without waiting for a choice for candidate for the Vice President, extensive preparations were made for celebrating the event in an appropriate manner."

"In less than a half an hour after the reception of the news, the two brass guns of the Frontier Guards had been rolled out on the Campus Martius, and each had been furnished with 50 full cartridges. Later in the evening the whole front of the Advertiser office was brilliantly illuminated and from a central window hung a banner with the words 'Lincoln and Hamlin' in large poster type, inscribed on it. A bonfire was started in the street, just in front of the office. The whole proceedings last night were terminated with one tremendous hurrah for Lincoln and Hamlin."

Around the State there were celebrations and mixed emotions. Owosso fired 100 guns, Kalamazoo 50 guns, and Pontiac, presumably less enchanted or short of powder, fired 33 salutes.

The returning delegations from Michigan met with mixed receptions. The Niles Republican cites the reception of Delegate Francis Quinn:

"Longer faces were never seen on Main Street. 'Abominable,' said one. 'Seward has been beaten by some contemptible trick,' said another. Finally after the elapse of a day or two, Quinn arrived from Chicago. He endeavored to rally the disappointed. He went around to get a subscription of powder. Some of them refused to give a cent. But enough was raised to make about 5 small charges, and handbills appeared announcing there would be a grand ratification meeting on Main Street in front of the Inquirer office. Saturday evening came. A large number of Democrats assembled, as it was in front of where they were to hold a meeting to nominate delegates to the county convention, and several Republicans and numerous boys. There being so few present, it was resolved that they adjourn to Kellogg's Hall. Up they went some one hundred and fifty to hear what excuse Mr. Quinn had to give for the defeat of Seward."

Thos. Starr notes: "So bitter was the anti-Lincoln feeling in Michigan, sponsored by Chandler, that the special train of the Massachusetts delegation to that convention, whose leader, John A. Andrew, won the Wigwam delegates to Lincoln on the third ballot, was all but mobbed at Detroit on its return trip over the Michigan Central Railroad."

In the South, the drums of war were heard more clearly. The gauntlet had been thrown down. The "house was now dividing," and the issue would soon be drawn whether it would be "all one thing or all the other."

In Springfield, Abe Lincoln had walked from home the morning of the nomination to the public square. He visited the office of a friend just returned from the convention and listened to his account of the early proceedings. Later, with one of his friends from the Illinois Journal, he tried to pass the time away at the bowling alley, but the alleys were all busy. They tried to play billiards, but the tables were all engaged. They then went to the newspaper office to hear the reports of the balloting. Shortly before noon, the wire came announcing a great victory. "We did it, glory to God," wired Delegate Knapp. Lincoln shook hands all around and then said:

"There's a little woman over yonder on Eighth Street who is deeply interested in the news. I will carry it to her."

And he might have pondered on the prophetic words of the invocation on that historic day of the convention:

"O, we entreat Thee, that at some future but not distant day, the evils which now invest the body politic, shall not only have been arrested in its progress, but wholly eradicated from the system."

And we might well ponder the concluding sentence: "And may the pen of the historian trace an intimate connection between that glorious consummation and the transaction of the convention."

Mr. ROBISON. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from New York.

Mr. ROBISON. I want to take just a moment to congratulate and commend all who have taken part in this commemoration. I particularly wish to pay my respects to my friend from Iowa, who has rendered this tribute, for his part in presenting such a beautiful and moving

tribute to Abraham Lincoln, a great Republican and a great American.

Mr. SCHWENGEL. Mr. Speaker, one of the best accounts I have read of Lincoln's nomination in 1860 is the article which Philip Van Doren Stern has written for the NEA Service and which appeared in the Iowa City (Iowa) Press Citizen recently.

Under permission granted to me, Mr. Speaker, I include the article:

CANNONS FIRED IN JOY AS LINCOLN NOMINATED 100 YEARS AGO

(By Philip Van Doren Stern)

When the Democratic National Convention met at Charleston, S.C., in the spring of 1860, the party was so strong that anyone it nominated for the Presidency was automatically elected.

Lincoln's lifelong rival, Stephen A. Douglas, was the obvious favorite. Most people, including Lincoln, thought Douglas would surely be the next Preseident. But Douglas had lost the support of the South, and the Buchanan administration opposed him. The whole political picture changed overnight when the Democratic convention, after dragging on for nearly 2 weeks, adjourned without agreeing upon a nomination.

The historically impregnable party split into dissident groups to hold three separate conventions to nominate three different candidates, making it difficult for any one of them to be elected. The new Republican Party, which had entered the national scene only 4 years before, now had a good chance to elect a President.

The obvious Republican candidate was William H. Seward, former Governor of New York, U.S. Senator, and distinguished member of the bar. There were other possibilities—Chase, of Ohio, Bates, of Missouri, Cameron, of Pennsylvania, and many more. Lincoln was among them, but despite the name he had made for himself with Cooper Union speech and the tour of New England that followed, he was far down on the list although he did admit to a friend that "the taste (for the presidency) is in my mouth a little." When he wrote those words, he knew the Democrats were in trouble.

Something happened then that caught the imagination of the public. Richard James Oglesby, who was to become a Civil War general and the Governor of Illinois, knew John Hanks, cousin of Lincoln's dead mother, Nancy Hanks. John Hanks had seen Lincoln grow up in Indiana and had helped him cut fence rails when the family moved to Illinois in 1830. Oglesby sought him out, and the two men made a trip to a clearing near Decatur to get a few rails from the 30-year-old fence.

On May 9, at the Republican State convention in Decatur, John Hanks, a lifelong Democrat—made a sensation by carrying two of the original Lincoln rails into the hall. Lincoln was there, and he immediately became the "rail-splitter" candidate. The name stuck and became popular.

Being nominated by the Illinois State Republican convention helped, but a long, hard struggle was to be expected at the Chicago national convention on May 16—Seward's 59th birthday.

A huge wooden structure, holding 10,000 people and called the Wigwam, had been built for the convention. To it streamed thousands of visitors, most of whom were unable to get inside the building.

It was a colorful occasion, even more colorful than a presidential convention is today. And since everyone knew that the man chosen might very well become the first Republican President, there was a tense air of expectancy.

The convention was quickly organized; then a platform denying the right to extend slavery to the territories was adopted. On the third day, May 18, the real business of picking a candidate began.

That morning a thousand of Seward's followers marched to the Wigwam led by a swaggering military band. In the big hall Evarts of New York presented Seward's name; Judd of Illinois named Lincoln; other States followed with their favorite sons.

Only Seward and Lincoln got loud applause. When their names were seconded, the applause and cheering rose to a tremendous crescendo. People threw hats and handkerchiefs into the air as the rival backers tried to outshout each other. Then, according to an eyewitness, a Lincoln supporter, "Henry Lane of Indiana leaped upon a table, and, swinging hat and cane, performed like an acrobat." He shouted, too, but his voice could not be heard in that mighty uproar.

After that wild outburst, the convention settled down to voting. The first poll gave Seward 173½ votes; Lincoln 102; with the others trailing. Needed for the nomination: 233 out of 465 votes.

A second ballot was taken. Lincoln gained New Hampshire and Vermont, then Pennsylvania. These gave him 181 votes against Seward's 184.

On the third and final ballot Lincoln ran up to 231½ with only 1½ needed to win. Cartter of Ohio rose to cast four of his State's votes, and the crowd suddenly became quiet. Cartter was known for his stutter, and he stuttered as he spoke:

"I rise—Mr. Chairman—to announce the change of four votes of Ohio from Mr. Chase—to—Mr. Lincoln."

The silence held for a brief moment, then the crowd roared out. Someone signaled to a man stationed on the roof with a signal cannon, yelling to him:

"Fire the salute. Abe Lincoln is nominated."

The cannon told thousands of people outside what had happened, and the Wigwam was suddenly surrounded by a sea of noise. The roar of the crowd was punctuated by the resounding boom of exploding gunpowder as the cannon was fired, reloaded, and fired again and again.

The smell of gunpowder drifted down to the people outside; it came in through the open doors of the Wigwam, and hung heavily in the spring air.

The acrid odor was soon to become familiar to many of the young men who were shouting their heads off in Chicago that day. And they would hear the sound of cannon again. Sumter was less than a year away.

Mr. Speaker, adding to the significance of this event is an address on Abraham Lincoln which was made last year by Dr. Mordecai W. Johnson, president of Howard University. The address was made before the Michigan Legislature as part of the sesquicentennial observance of Lincoln's birth and it certainly has a place among the words which have been spoken today. Under unanimous consent I include it in the RECORD as a part of these proceedings, as follows:

AN ADDRESS ON ABRAHAM LINCOLN BY DR. MORDECAI W. JOHNSON, PRESIDENT OF HOWARD UNIVERSITY, WASHINGTON, D.C., BEFORE JOINT CONVENTION OF THE MICHIGAN LEGISLATURE, FEBRUARY 12, 1959

(Foreword by Hon. Louis C. Cramton, Representative from Lapeer County: Mr. President, Mr. Speaker, distinguished guests, members of the senate and house of representatives of Michigan, through this joint session of the senate and house of representatives of the State of Michigan, which in 1861–65 gave such loyal and heroic support to Abraham Lincoln in his wise and courageous leadership in our Nation's greatest crisis, in his demonstration of the capacity of this Nation to rule itself, joins with the Nation and the wide world today in paying tribute to him as the exponent of real democracy, the worldwide symbol for human freedom. It was 150 years ago today that this great leader was born. On this great occasion we are highly privileged to have with us to voice the day's message, Dr. Mordecai Johnson, president of Howard University, Washington, D.C., a great institution, with worldwide influence; himself a splendid example of the rich heritage of human capacity and vision his race has brought to the world since Abraham Lincoln's leadership made this Nation actually a nation of free men. It is my privilege to present to you my very generous friend, Dr. Mordecai Johnson, who will give to us today's address.)

Mr. President, Mr. Speaker, Mr. Cramton, distinguished members of the Senate and House of the great State of Michigan, I am deeply grateful to you for the privilege which you give me today of joining you in meditative appreciation of our great leader, Abraham Lincoln—the man whose name is the greatest of all names connected with popular government in the history of the world. I have come to you today, bearing in my heart a deep sense of personal indebtedness to this man, for I am a child of slaves. My father was a slave and my mother was born a slave. Both of them were set free by Abraham Lincoln. Along with the deep sense of debt which I bear in my heart toward him is another which is akin to it, namely, the sense of debt which I bear toward you and for your kindred in this State who, under the leadership of Abraham Lincoln, made so very large an investment of devotion and suffering in that cause which made it possible for us to be free. I know that if that humble minority to which I belong could be aware that I am here today they would want me to tell you that they will never forget these things. They will remember the name of Abraham Lincoln and the citizens of these free States as long as they live, and they will cherish these revered memories and hand them down to their children and their children's children until the end of time.

I want to thank the members of this senate and house because your interest in this minority is still vibrantly alive. In recent years you have responded in a wonderful manner to the leadership of the Honorable Louis C. Cramton in the house, by crossing all party lines to establish a Fair Employment Practices Act in this State, which undertakes to provide an open door of economic opportunity for every citizen, regardless of his race, creed, color, or national origin. Several years ago I had the privilege of coming here to attend a banquet which was given in honor of Mr. Cramton, at which time outstanding Members of this body and your distinguished Governor heaped honors upon him for his diligent and unwearying devotion to the passage of this Fair Employment Practices Act and for the outstanding character of his devotion to the public good. My heart throbbed with joy at this banquet, for I have known and loved Mr. Cramton for 32 years. He is the best living example of Abraham Lincoln whom I know of in this world.

In undertaking to talk with you about Abraham Lincoln today I must approach him from that angle of his life which interests me most deeply. I am a teacher of young men and women. Among my graduates who give me greatest pride are a few who have become distinguished servants of humanity in the field of the public life. I am always searching for those qualities in men of distinction which have proved effective in the public life, hoping to be able to speak with my students about those qualities in such wise as to cause them to

study and to reflect upon them, with the purpose of making these qualities a part of the basic ingredients of their lives. Of all the men in the public life of the world who have deeply impressed me in this respect, Abraham Lincoln is one who grows on my affections year by year. The qualities of his heart and mind are remarkable, beyond measure, in their fitness and power to sustain and to transform the institutions of the democratic public life. Now if you will remember that this is a school teacher and a child of slaves talking with you, having perhaps a bigger message in his heart than he is able fully to articulate, you will try to think with me as I speak. In this way your own intuitions will supplement what I have to say and may turn an otherwise stumbling effort into a matter of power.

For the purposes of our mediation I want to divide the life of Abraham Lincoln into three periods. The first period, from 1809 to 1854, I would call the period of preparation during which his great personal powers were in the making. The second period, from 1854 to 1860, I would call the period of political creation, in which, under great difficulties, he nourished and brought to leadership in the Nation a political vehicle of decisive power. The third period, from 1861 to 1865, the period of victorious achievement, during which, under the pressure of violence, suffering, and death he obtained the great political ends for which the world reveres him—the emancipation of the slaves and the preservation of the Union.

THE FIRST PERIOD OF LINCOLN'S LIFE 1809–54

The great work of emancipating the slaves and the preservation of the Union, for which Abraham Lincoln will be remembered throughout the ages, was done in the last of the three periods from 1861–65, and the decisive political events preceding this great work were brought to pass in the period from 1854 to 1860. It has been customary to pass over this first period of 45 years in a cursory manner as if it were really of very little importance. It appears that Abraham Lincoln himself rather thought of it in this way. He was a man who spent very little time thinking about the days of his boyhood and early manhood. When people tried to make a great deal of it, he said, "Why, it is a great folly to attempt to make anything out of me or my early life. It can all be condensed into a single sentence, and that sentence you will find in Gray's Elegy: "The short and simple annals of the poor." When an effort was made, just before he became President of the United States, to have him speak about this period at great length, he did consent one time to sum it up in 500 words. He wrote these words as though his real life had begun in 1854. He spoke of the limited heritage which he received from his parents. His father and mother were poor. He was born in a log cabin and lived under very crude conditions in frontier communities of Kentucky, Indiana, and Illinois where there were many animals and few men. His father was a man of little learning, and in his own boyhood he had little chance for schooling. There was only a very simple three-R school with very poor teachers available, and he was able to get only about 12 months of schooling in that. He confessed that when he was about 21 years of age he did not know very much, and that thereafter he never had a chance to learn, except by his own efforts. He reviewed the two or three little jobs he had. He mentions with some pride and joy his experience as a captain in the Black Hawk War. He calls very brief attention to his three terms in the State legislature and his one term in Congress, speaking of them as if these terms of office had yielded very little satisfaction, because he left them both for the practice of law in the small towns and country circuits, not presenting himself again for either State or national office. He described himself modestly as a man 6 feet 4 inches tall, but he did not tell you that he was also a gangling, loose-jointed, long-legged man, with long arms and big hands, a great big head, with serious lines in his face, deep and melancholy. He probably wore his clothes as if his trousers were unpressed and coat hanging loose, as long as he lived. He was just an ordinary man. One of those who knew him well says, lately, that the father of his wife spoke of him with derogation as being a man of "the poor white trash" whom he did not want his daughter to marry. In fact, that is the way he would have been classified if he had lived in Virginia whence his father and mother came.

But there was a whole lot more to the life of Abraham Lincoln in those first 45 years than he himself took time to mention. For in those 45 years this man developed by his own efforts one of the most powerful groups of qualifications for political leadership ever to be found in history. These are the qualities which made him the power that he was from 1854 to 1861, when he became President of the United States, and which led him in the years 1861 to 1865 to become the Emancipator of the slaves and the preserver of the Union.

A VIVID AND POWERFUL ETHICAL DISPOSITION

Now what are those qualities? First of all, Abraham Lincoln developed in those early years a vivid and powerful ethical disposition which he made radically applicable to every human being whom he touched—whatever his race, color, creed, sex, or national origin—and he extended it even to animals. He was especially sensitive in the presence of cruelty, either to men or animals, and often found it impossible to pass by an animal in distress.

This was no quality merely given to him. Maybe the greatest part—the instinctive part—was given to him, but he cultivated the rest of it deliberately and thoughtfully. He had the same experience that most of us have when we pass by a man or an animal suffering from cruelty or distress. He got a message from his heart which told him: "This is your kinsman and he is hurt. Are you going to help him?" Again and again in his life he tried to pass by, but again and again he would come back deliberately, thoughtfully, and help that man or help that animal. He kept this up constantly until it became an habitual disposition of his life, and it never weakened until the day he died. He was never able to look on cruelty complacently. He was never able to look at men and women who suffered from any unjust cause without feeling identified with them. This is where he got his great conviction that slavery was wrong, that the cruelty connected with slavery was wrong, that a cruel thing like this had no business to exist on this earth, and that somehow or other it ought to be done away with. There is no place on record where he ever said anything different from that. He said it over and over again, because it was a considered judgment, arising from the heart, confirmed by the reflections of deliberate intelligence and nourished as a part of his life.

A THOROUGH ACCEPTANCE OF THE DECLARATION OF INDEPENDENCE

In the second place, Abraham Lincoln was a man who had a thorough grasp of the meaning of the Declaration of Independence, and he accepted the radically transitive universal ethics of that Declaration of Independence with all his heart. I do not mean merely that he accepted it intellectually. He accepted it as a part of his very being. Abraham Lincoln had one of the most precious habits that a man can have in this world—the habit of prolonged aloneness in meditation and in thought. Being impressed by the language of the Declaration of Independence, for example, he would go off with it by himself, or he would sit alone by the fire when there was no one at home but himself or when other people were sleeping. Then, wrapping his long legs around the chair and putting his arms on the back of the chair, he would read the words alone, asking himself, "Now, just what was it that these men had in mind when they wrote these words?" Of all the politically significant words written on paper, these were the most precious to him:

"We hold these truths to be self-evident: That all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter it or to abolish it, and to institute a new government."

These words he turned over and over in his mind until the spirit of them possessed him through and through, and until he felt the electric possibilities of them in all the aspects of his being—intellectual, moral, and spiritual. Of these words he said, "I have never had a feeling politically that did not spring from the sentiments embodied in the Declaration of Independence which gave liberty, not alone to the people of this country, but I hope to the world, for all future time. It was that which gave promise that in due time the weight would be lifted from the shoulders of all men."

Whenever you hear him speak about "the Union" this is what he is talking about. He is never talking merely about the physical union of men in the physical territory of the United States. He is talking about that Union "conceived in liberty and dedicated to the proposition that all men are created equal"—the most hopeful community of life, the most powerful community of life, the most creative community of life in the world. And when he said that, above all things, he wished to preserve the Union, this is what he meant. He felt that these words of the Declaration of Independence were the electric cord sweeping through the entire Declaration of Independence, the foundation and inspiration of the Constitution of the United States, and that there was no cruelty, no evil, no neglect of human rights or human welfare that could long endure in the presence of their moving and cleansing power.

A MASTERFUL POWER OF COMMUNICATION

In the third place, Abraham Lincoln acquired in early life a masterful power of communication. In all the history of public political speech there is no man in this country who ever had a greater power than Abraham Lincoln. It was an intellectual power, because he was a thoughtful man who gathered his facts and arranged his arguments with great care. He carefully studied grammar. He studied the language of the Bible and pondered it and absorbed it in his system. He studied mathematics, not in order that he might become a mathematician, but that he might reason precisely, consecutively, and with a clear and powerful relatedness. But there was something more than intellectual power in his speaking. There was a moral power and often persuasive moral beauty in what he said. He respected and loved the people to whom he was speaking. He believed in the capacity of the most ordinary man to understand the most profound ethical and political truths, if he needed them for his life. And when he spoke to such men he was not making an oration of words. He was speaking what he deeply believed. He was speaking directly and simply as if the fate of the World were depending upon his being understood.

Sometimes when he spoke his rugged, melancholy face would light up like a lamp and throw a glow of persuasive beauty to the very ends of the auditorium. People loved him, believed in him, flocked to him, because he bought their allegiance with the gold of sincerity and clarity that came to them from a pure heart.

HABITUALLY SIMPLE AND TRUTHFUL IN INDIVIDUAL RELATIONS

Another of his great qualities—the fourth—was his habituation of himself in his actions to simple and truthful relationships with individual human beings. You can see this nowhere better than in his practice of the law. If a client had a crooked or an unjust case, he would not take it if he knew it beforehand. If he took the case and found out afterwards that the cause was crooked or unjust, he would do everything consistent with the law to get out of it. He was helpless to use his best powers in the presence of the necessity to defend cruelty or crookedness. But if you had an honest case, very often the first thing he would try to do was to see whether he could adjust it without going into court, and especially if the case involved cruelty and injustice, he would put his whole life and soul into that case. He would address himself to the jury in simple, direct, and unadorned speech, and when he came to the cruelty involved, his language would sometimes burn with a fire of indignation as if to scorch the very ground on which he stood. And when he had finished, what did he charge you? Just about what it would take to buy the groceries and to take care of the most ordinary expenses of living. He did not take your case for the accumulation of money. He took it for the joy of setting things right, for the privilege of being vehicular toward the establishment of justice.

A SENSE OF HAVING GREAT UNSPENT POWER

Along toward the end of this preparatory period of his life, the fifth quality developed within him, which is remarkable to think about: he developed a sense of having great unspent power and a sense of melancholy distress because that power in him had never had a chance to be used up fully in some great cause. He walked about conscious of that power and with the feeling that some day the occasion would arise when he would use it for everything that he had in him. He respected that occasion and looked toward it, afar off, with melancholy hope, and because he respected that far off occasion, he never would sell his powers cheaply. He would not sell them for money. He was a poor man and the powers he had could have made him a great corporation lawyer and could have gotten him riches quickly, if he had gone to the big city; but he knew that what he had was too precious for money and he would not sell it so. He would not sell it either in order to cheat people out of their votes. In the first election in which he ever sought office, he said simply, "I am humble Abraham Lincoln. I have been solicited by my friends to become a candidate for the legislature. My politics are short and sweet. I am in favor of a national bank. I am in favor of the internal improvement system and a high protective tariff. These are my sentiments. If elected, I shall be thankful, if not it will be the same." And although he went to the State capital three times and to Congress once, as the elected representative of the people, he quit them both with very great dissatisfaction of heart, because he was occupying political power and moving about among men who accepted political power without having any great cause at stake. For him to be in political office with no great cause to use up his powers, was too cheap an occupation. He did not like it. He did not want it. He stayed at home, nourishing his powers, waiting for a great and worthy day to come.

Now I want to suggest that here in this preparatory period of his life Abraham Lincoln developed five of the greatest possible human qualities: (1) A vivid and powerful ethical disposition, livingly applied to every type of human being, urging him to respect them, to deal truthfully with them and to allow his compassion to go out to them whenever they were cruelly treated or left alone with struggles that they could not endure; (2) a wholehearted devotion to the Declaration of Independence, so that the city of justice which he saw when he read it lived in his mind's eye like a city built by God. He longed to be of great use to that city, and would rather have died than to have betrayed it; (3) remarkable powers of communication: simple and direct speech to people whom he loved, unadorned and never mixed with deceit; the marshaling of facts accurately and honorably, the drawing of conclusions with inexorable logic; reverent of truth, and at times throbbing with a passionate devotion to justice which caused his face to radiate with hope and expectancy; (4) a sustained habit of simplicity and truthfulness in his everyday actions affecting ordinary people. When he practiced law in a circuit of 14 different counties, he met and served a multitude of men whose names were without celebrity of any kind. He saluted them with courtesy, served them truthfully and honorably, loved them and enjoyed their trust. They called him "Honest Abe" and knew that he was a man who was utterly reliable, who when he gave his word meant what he said and would do it, whatever it cost him in time or effort or money; (5) a great sense of power residing in him—intellectual power, moral power, spiritual power locked up with an immense energy of devotion—but power waiting for a great and worthy occasion of use, not to be sold cheaply, not to be used for the heaping up of money, nor merely to buy high office. There was only one piece of goods he wanted most eagerly to buy—a great cause that would consume his powers as a great fire consumes wood. That cause came to him in 1854 when the Missouri Compromise was repealed. The whole country was shocked with a sense of crises that swept like wildfire into every State of the North and it swept into the heart of Abraham Lincoln. He knew that his hour had come. At once he laid aside everything and straightway went where he could place himself at the disposal of a powerful inward necessity to strengthen the people in this crisis, for the life and death struggle between slavery and the Union which he loved.

SECOND PERIOD OF LINCOLN'S LIFE—1854–60

One who reads the history of the second period of Abraham Lincoln's life, from 1854 to 1860 will find him giving an unparalleled devotion to political action. First of all, he made a decisive change in party allegiance. He was a Whig, but he saw that the struggle with slavery required something better than the split allegiance of Whiggism. He looked at the Democrat Party and saw that it had kneeled beyond recovery to the slave system. He looked at the possibility of coalition across the Whig and Democrat lines, and he saw the weakest, the most flabby, the most untrustworthy combinations of men on the basis of self-interest, and his heart repudiated what he saw. He looked around again and saw a new party, with only 120,000 votes over the entire Nation, but it had a program. It said in effect: "Our program has just two parts. One: slavery is wrong; two: we are going to stop it. We are going to leave it in the States where it is already established, because the Constitution provides that it has a right to be there, but we are going to shut the door to all the western territories, and not a step in that direction will it be allowed to advance." Abraham Lincoln liked that program. It was simple. It was unequivocal. It corresponded to the way he felt about slavery, corresponded to what he thought about the preservation of the Union. It constituted a cause to which he could devote all his powers. And this he unreservedly did.

SINGLE-MINDED AND IMMEASURABLE POLITICAL DEVOTION

Lincoln was not blind. He knew that it would normally take over two million votes to bring a party to national power in this country, but the difference between 120,000 votes and 2 million votes was not big enough to overawe him. He felt and knew that he was a man of power and that with the help of God he and his earnest associates, with single-mindedness devotion, could make up that difference. This capacity for single-minded and immeasurable devotion Abraham Lincoln most certainly had. In the history of parties in this country there is nowhere a record of devotion superior to that which this man Lincoln put into the building of the Republican Party between the years 1854 and 1860. In this undertaking he subordinated entirely his personal ambition to hold political office. He saw with clear eyes that unless a party devoting its whole life unequivocally to the restriction of the growth of the slave system and the deliverance of the Union from the danger of dominance by that system, could be brought to effective power, no office would be fit to have. And so when public office was set before him again and again he would not take it. "I have a duty to perform," he thought, "I must do everything in my power to put this party into shape to come to power. This is the power that alone can be decisive". Three times in 2 years he sacrificed his own personal ambition to put somebody else ahead of him because he believed it to be good for the party.

UTMOST USE OF HIS POWERS OF COMMUNICATION

He put all of his remarkable powers of communication at the disposal of his cause. He sought out and obtained direct confrontation with Douglas, the greatest proponent of slavery, and conducted a series of debates with him, which turned out to be one of the most determinative debates ever carried on in the world. He took the program of the Republican Party and expounded it from every helpful angle that deep moral conviction and logic could conceive; he defended it from every angle that sincerity and logic could command, until by his convictions and his thought he had established it in an impregnable and persuasive position.

When he began this series of debates and speeches in the Illinois senatorial campaign in 1858 he was scarcely known outside of Illinois. When he had completed them, the most intelligent and resourceful men on the eastern seaboard sent for this man of the one-horse towns and crowded Cooper Union in New York to hear him. If ever there were any of us who felt contemptuous toward a man of no university education—toward a poor man of no cultural family background and no university education—let us read again this speech produced by one who was called "the poor white trash." Let us read again his powerful putting together of historic facts; let us read again the masterful analysis of the arguments of the supporters of the slave system; let us observe again the intellectual power and moral sagacity with which he reduced the whole thesis of the slave masters to a demand that slavery henceforth be considered not only lawful but right. Then let us behold this gangling awkward son of the frontier, ignited from the depths of his being by moral conviction about the wrongness of slavery and its fateful danger to the Union,

and with his rude melancholy face glowing with persuasive light, holding this great audience of intelligent and resourceful New Yorkers and easterners in all but breathless silence, as he commandingly called them to put aside everything and support this Republican movement with all their hearts to halt the onward march of this wrong and evil thing and to put it in a place where it could no longer imperil the life of the Union. Here indeed, once again from the humblest depths of life, there had come a man of intellectual, moral, and spiritual power of the highest significance for all mankind.

AN UNCANNY SENSE OF STRATEGY

There is just one more quality appearing in this second period of Abraham Lincoln's life which I wish to comment upon. The man acquired an uncanny sense of strategy. In the Illinois senatorial elections of 1858, he daringly followed this sense of strategy against the advice of all his friends, in a manner which was decisive in securing the national political victory of his cause.

This remarkable sense of strategy grew out of a quality in his life which only appears in the lives of men who have an unusual faith in the operative power of moral sincerity. There is an opposite but corollary conviction which they have. It is the conviction that evil is incapable of perfect organization. This means that the supporters of righteous causes are not always obliged to overcome evil by the possession of overwhelming power to break it down and drag it out. There is always operating among the supporters of evil causes a tendency toward internal disintegration and self defeat. If they can be steadily confronted with the vigilant and sustained cohesion of men of righteous purpose, who give evidence of growing power, the supporters of the forces of evil will tend somewhere to crack internally and to facilitate their own defeat. There came a time when Lincoln saw this possibility at work in the proslavery forces.

He saw it in the initial and growing opposition of pro-slavery extremists, to one of the most honorable qualities in Stephen Douglas, the greatest leader of the proslavery forces; namely, against his disposition to affirm that the doctrine of "squatter" or popular sovereignty, in which he believed, admitted the possibility that a particular territory might, by its own vote, keep slavery out of its own boundaries. Douglas had honestly affirmed this opinion in the congressional debates on the Kansas constitution, and in doing so he had greatly angered the extreme pro-slavery forces in the South. Lincoln saw that if Douglas were skillfully questioned in the senatorial debates in Illinois, he would be led by his ambition to be reelected to the Senate, to reaffirm this belief in the right of a particular territory to exclude slavery, in spite of the language of the recent Dred Scott decision of the Supreme Court, which held that there was no lawful way in which a territory could do this. Lincoln saw that in so doing, Douglas this time would anger the extreme proslavery forces in the South. Lincoln saw that if Douglas were skillbeing unendurably angered, the extreme proslavery forces would split the Democrat Party rather than to support Douglas for the presidency in 1860, and that this split would open the way whereby in the national elections of 1860 victory would be possible for the Republican cause opposed to the extension of slavery. Lincoln meditated long upon a strategem to produce these results.

Lincoln's friends opposed such stratagem on the grounds that it would make it quite possible for Lincoln and the Republican Party to be defeated by Douglas in the Illinois senatorial elections. Lincoln admitted this possibility, but counting up the cost to himself and to his party he concluded that even such a loss would be worth enduring in order to bring the Republican Party and its cause to national victory in 1860. So, at Freeport, Ill., on August 27, 1858, in the second debate with Douglas, he proposed the determinative question. Just as he foresaw, Douglas answered honestly and unequivocally: "In my opinion the people of a territory can, by lawful means, exclude slavery from their limits prior to the formation of a State constitution. * * * It matters not what the Supreme Court may hereafter decide as to the abstract question whether slavery may or may not go into a territory under the Constitution, the people have the lawful means to introduce it or exclude it as they please."

This was the answer which Lincoln sought and foresaw. It came to be the most important question and answer in the entire series of debates, for it probably determined the destiny of the Nation in relation to slavery. In Illinois, the results turned out to be just what Lincoln's friends had feared. Even some Republicans in Illinois joined with the Democrats in elated support of Douglas, and Lincoln was defeated for the Illinois Senate.

But the national results which Lincoln foresaw came swiftly to pass. When the National Democratic Convention nominated Douglas for the Presidency on a platform in support of popular (squatter) sovereignty, the hard core of extreme proslavery forces in the South were so embittered that they walked out of the convention. They were not going to endure the folly of agreeing with any condition under which slavery could be shut out of any State or territory. This exodus split the Democrat Party. Thereafter, Breckenridge was nominated to represent the hard core of proslavery extremists, and two Democrat Parties went into the national election against the Republicans who had now nominated Abraham Lincoln for the Presidency. The election was further complicated by the entry of a four-splinter party.

The Republican Party, with its declared purpose of halting the extension of slavery had been so nurtured in solidarity—so strongly cohesive—that it came out of the election with 1,860,000 votes—almost 16 times the voters polled in 1852 and 40 percent more votes than they polled in 1856. And although the combined opposition of three parties polled an overwhelmingly larger volume of 2,810,000 votes, the split in the Democrat Party proved to be decisive. No one of the three opposition parties reached a higher vote than the 1,370,000 votes which went to Douglas. The Republican Party with 1,860,000 popular votes and 180 electoral votes had won the election. The cause dedicated to the halting of slavery was chosen to control the Nation.

Abraham Lincoln awoke one morning to find that in less than 6 years he had nurtured the Republican forces opposed to the extension of slavery into full maturity and had projected them into the control of the Nation. He stood there trembling like a boy—a man whose only previous experience in public administration had been the post office job of a one-horse town, where he could carry all the daily mail in his hat, had been elected to the Presidency of the United States. By one of the most remarkable rises to power in history, he now had come to the place where he had the power to do the one thing of all he most desired—to halt the westward march of the slave system and to place it back where it could no longer threaten the destiny of the Union which he loved.

COMPASSION FOR THE PEOPLE OF THE SOUTH

Now I come to the third and last period in the life of Abraham Lincoln. In this period I wish to concentrate attention entirely upon a quality which first appeared in the early days of his conflict with the slave system, but which reached its greatest development only in this third period; namely his compassion toward the people of the South.

In the earliest days of Abraham Lincoln's fight against slavery he learned how to do what is almost impossible; how to fight an evil cause without entertaining malice and enmity toward the men who support that evil cause. He hated slavery but he never hated the slaveowners or the people of the South as a group. When he agreed, as he did agree, that the Constitution required him to leave slavery alone in the Southern States, he did not agree to this merely for the sake of taking a political position. He agreed to it because he believed in the righteousness of this position and because he intended to be loyal to it. Abraham Lincoln did not feel that the people of the South were different in any fundamental respect from the people of the North. He did not feel that they supported the slave system, because there was some peculiar element in their human makeup which inevitably required them to do this. He knew that the people of the South had not hatched the slave system. The people of the North were just as much responsible for the development of the slave system as the people of the South. Moreover, he knew that there were hundreds of thousands and even millions of white people in the South who held no slaves, and would like to get rid of the slave system, but now that the slave system had come to be the only working economic system in the South, they did not know how to get rid of it. He was not sure that he himself would know how to get rid of the slave system if he were then so situated in the South. Instead of hating the southerners, therefore, his compassion went out to them with a loving heart. He knew that the slave system was injurious to them as well as to the Nation, and he wanted to bring it about some day that they would be in a position to put the slave system aside, and to unite freely in their hearts with their brethren of the North in support of the Union. He wanted to keep them in the Union so that a Union committed by majority leadership to the proposition that all men are created free and equal could be decisively helpful to them in working out a way to overcome the slave system and to establish complete freedom from it in their institutions and in their hearts.

One of the most beautiful things about Abraham Lincoln's thinking during this period of his life was this: that although he was obliged to approve the taking of arms, and to justify and to carry through the killing of men in battle, never did he, under any circumstances, allow the actualities of war to alter his compassion for the people of the South or to harden him into hating them or into despising them. When, on the one hand, some of his advisers urged him to despise them and to let them go their evil ways into secession, and when, on the other hand, some of his advisers urged him to take advantage of the secession, to break his personal and his party pledges and vindictively to free the slaves in spite of the Constitution to the contrary, his answer was always substantially the same, "I will not do it. They are still members of the Union. It is my purpose that they shall remain so. If we keep faith with them and do our full duty in bringing the expansion of slavery to an end, we can eventually find a way to do away with slavery in their midst, with their consent and cooperation. In all these matters I am the one who is responsible, and I must have some principle of my own to act upon. It is my duty to do this and I will do it."

Not only did he persist in his compassion, he reached out his hand in loving solicitude, endeavoring to persuade them. "Brothers," he said in effect, "you have made a great mistake. You have seceded from the Union, which is precious to us all. You have taken

up arms against your country in order to advance a cause which will destroy the Union. You would not have done this but for the evil influence of the system of slavery on your institutions and in your hearts. Come now, give up the slaves. I will have the Government of the United States compensate you with money in full for every slave that you give up." This was the length to which compassion took him and held him until the day when he met the Captain of Eternity in a decisive way.

There came a time when the Union's cause had lost so many battles that it looked as if victory was going to be impossible. He saw, instead, that the proslavery armies, with the help of 4½ million slaves, could possibly win the war, destroy the Union, and set up slavery permanently. A greater disaster was not conceivable to his mind. Down on his knees, he came to recognize that the hand controlling this war was not his own. The living God Himself was now in charge of events and through these events He was speaking to him, saying "Abe, I am vetoing your plan to leave slavery alone in the South. I want the slaves set free now. As Commander in Chief of the Armies of the Union you have the right to do it, and you have the power to do it. It will bless the slaves for you to do it. It will bless the South for you to do it, and it will save and bless the Union for you to do it. I want you, Abe, to do it now." And on his knees Abraham Lincoln heard the Captain of Eternity and rose with a reverent determination to do it. On a day thereafter when he took his pen in hand to sign the Emancipation Proclamation which could, supported by the 13th amendment, free all the slaves, and free the body and the soul of the South and of the Union from the curse of slavery, he found that his hand was trembling. "Wait, a moment," he is reported to have said to the man who was near him, "I am about to sign the most important paper that any man can sign in the world and my whole soul is in it. Let no trembling of my hand appear in this signature."

And so it came about that he who in all humility had seen no honorable way to deal with slavery except to halt its western progress while leaving it alone in the South—no doubt for years and years to come—now saw that God had given him the privilege to wipe it out entirely. And he did it with a heart full of gratitude and of trembling joy.

The suffering of Lincoln and of the Nation did not cease after the Emancipation Proclamation. The northern armies lost in battle, again and again. The number of the dead piled up and up. The monetary resources in the banks were giving out. The enormous cost of the war in men was so great that riots began happening in the Northern States and some men refused to register to go into the Army. Abraham Lincoln was about to lose the election, in the midst of divided counsel and for want of face. But just a few days before the election, Sherman marched into Atlanta. Grant and his men laid hold on some victories. The people, moved by these things, flew back to Lincoln because they trusted and loved him, and reelected him President by an overwhelming vote. With the armies moving toward victory and the people once again united, what did he do, when he came to his second inaugural address? What would you have done? What would Napoleon have done? What would any conqueror in the history of the world have done, that you know about? In all probability, he would have given his heart to the hardening process of war and would have stood up at the inaugural and said to the people of the South, "You can see all the suffering that you have brought upon yourselves and your country. You can see now that your cause is becoming hopeless. You can see that we are justified in the most ruthless dealings with you in order to bring this war to an end. You are not fit candidates for merciful dealings in any way." But he did not do this. No, his compassion for the people of the South was, by this time, too great for such thinking. He did not want them to be defeated in that way. He did not want them groveling in humiliation before his feet. What did he say?

"The Almighty has His own purposes. Woe unto the world because of offenses—for it must needs be that offenses come; but woe to that man by whom the offense cometh. If we shall suppose that American slavery is one of those offenses, which, in the providence of God, must needs come, but which, having continued through His appointed time, He now wills to remove and that He gives both the North and South this terrible war, as the woe due to those by whom the offense came, shall we discern therein any departure from those divine attributes which the believers in a living God always ascribe to Him? Fondly do we hope—fervently do we pray—that this mighty scourge of war may speedily pass away. Yet, if God wills that it continue until all the wealth piled by the bondman's 250 years of unrequited toil shall be sunk, and until every drop of blood drawn with the lash shall be paid with another drawn with the sword as was said 3,000 years ago, so still it must be said, 'The judgments of the Lord are true and righteous altogether.'"

What then did he do? His compassion was so deep and so thoughtful that instead of scorning and branding his brethren, instead of threatening and humiliating them, he put his arm around them in suffering and said, "This suffering that we are enduring together, we together have brought upon ourselves from the hands of a just God who is displeased with what both of us have done about slavery." The fact is that his compassion had deepened more than ever, for just a few days before the inaugural address he had once more sought to have his Cabinet promote a joint resolution in both Houses of Congress offering the Southern States $400 million in U.S. bonds, to be allotted among them in proportion to the property in slaves which each had lost. He saw the greatness of their suffering and his heart went out to them in their need. He wanted with all his heart to hasten their recovery, and to hasten their return to the Union.

When the war was over and the victory was won, and when his advisers wanted to know, "Whom shall we seek to hang; upon whom shall we lay the retribution of death?" "Nobody" was the answer of his compassionate heart. "These are our brothers. Tell them the gate is open. Let them come home and let us work together for the rebuilding of the Union."

An assassin killed him. But what more could it mean to him to be physically shot down? For 4 long years he had been killed all the day long by the continuing obligation to carry on a war against his brothers. For him to die was nothing. He knew all along that he was expendable and might have been killed at any time. Some men looked at him lying in death and said, "Well, at last he is dead. He ought to be dead. He should have been dead long ago. Blessed be the man who killed him." But today we all know that the Lord laid on him the iniquity of us all, that with his stripes we all were healed, and that with the 4 years of his dying and at length by his physical death, God redeemed this Union from slavery and purified her soul.

How beautiful upon the mountain are the feet of them that bear the glad tidings of emancipation, glad tidings of Union, but, above all, the glad tidings of a man inwardly driven by universal respect for all mankind, a man wholly committed to that Union which was "conceived in liberty and dedicated to the proposition that all men are created equal," a man masterful in sincere and simple communication of the truth, a man pure in his heart toward every individual human being with whom he came in contact, neglecting none, a man reverent of all his powers and using them up in a great cause as if they were but wax under a lamp, a man unequivocal in his beliefs, diligent in his purposes to restrict and to overcome evil, but filled with a compassion so deep and beautiful that he always loved his very enemies.

Do you tell me that the history of the United States says that slavery was abolished and the Union was preserved by the victory of the Civil War? I tell you it is not so. There was one place in America where the slave was always free; there was one place in America where the Union was never broken—there in the heart of Abraham Lincoln. That is why we love him, black and white, North and South. That is why they love him in every nation in the world. That is why they will love him a thousand years from today. For he was liberty. He was union. He was freedom.

"O, God, what can we ask Thee?
That in every legislature in the land,
In every Governor's chair, and in
The White House itself,
Again and again we may have
One more man like Abraham Lincoln."

Mr. Speaker, the following is an address by Dr. Allan Nevins:

LINCOLN AND DEMOCRACY

(Text of an address by Dr. Allan Nevins, annual Lincoln dinner, Willard Hotel, Washington, D.C., February 11, 1960, sponsored by the Lincoln group of the District of Columbia in cooperation with the Lincoln Sesquicentennial Commission)

With those people who think we make too much of the Lincoln anniversaries, it is difficult for a reflective man to feel any patience. As the ancient Roman household found inspiration in annually celebrating the natal day of its most illustrious ancestor, our American household finds refreshment each year in reverting to the example of its greatest exponent of democracy. For it is as the essential hero of democracy that we recall Lincoln. Any just definition of democracy would note the fact that it has a different meaning in America—we hope a richer meaning—than in other lands. Politically, it signifies a form of government in which the machinery is controlled as directly as possible by a majority of all the people.

In a broader sense, democracy represents a certain general condition of society rooted in our Anglo-American origins, shaped by circumstances in which the frontier and free immigration have been prominent, and involving not only the political tenet of popular sovereignty but a related group of corresponding tendencies covering the whole field of moral, social, and even spiritual life.

In either the narrow or broad sense, democracy denotes a revolutionary movement in human affairs, which has a set of determined opponents ranging from Sir Henry Maine to William Graham Sumner, and a body of ardent champions ranging from John Stuart Mill to Woodrow Wilson. Not for Americans alone, the name of Lincoln best typifies both political and social democracy.

Lincoln's life offers a panorama of contrasts as remarkable as any in history, and the author of a recent book, "The Lincoln That Nobody Knows," indeed calls it a study in contrasts. Among the facts of his life which conflict with preconceived notions of what is probable, one paradox holds a central place. It is this:

That a man who knew democracy so intimately, in a period when it was full of violence, crudity, and corruption, should have been so completely untouched by cynicism as to the system; nay, more, that a man too clearsighted ever to be fooled by surface pretensions, too realistic and honest to conceal his convictions, should have said so little in criticism of democracy and nothing in essential derogation of it.

More caustic statements on democracy as a form of government can be found in a paragraph of John Adams than in all Lincoln's speeches; more faultfinding with democracy as a social system in a page of H. L. Mencken than in all Lincoln's works. Yet Lincoln knew far more expertly than these men the seamy side of democracy.

Lincoln's faith in the people was so simple, spontaneous, and warmhearted that we tend to accept it as inborn and unchangeable. He himself—though actually it was changeable—gave it that interpretation with reiterated emphasis.

"This is essentially a people's war," he told Congress when it first met after Sumter. It was a contest, he went on, to preserve that form of government which would elevate the condition of all men, and he was "most happy to believe that the plain people understand and appreciate this." Throughout the war, even more than before it, the people were foremost in his thoughts. He declared at one point that he could never betray "so vast and so sacred a trust as these free people have confided to me."

In his policies, he was anxious to keep the mass of fairminded people with him, taking a position neither too conservative nor too radical. "I hope," he informed Zack Chandler, "to stand firm enough not to go backward, and yet not go forward fast enough to wreck the country's cause." In keeping the masses with him, he relied upon the persuasive logic exhibited in his State papers and letters. His evident object was not to make smart hits, or win rhetorical triumphs, but to reason with and convince commonsense folk. "If ever there could be a proper time for mere catch arguments," he wrote in his December message in 1862, "that time is surely not now. In times like the present, men should utter nothing for which they would not willingly be responsible through time and eternity."

As he stated in his letter to Greeley on saving the Union with or without slavery, he would correct errors when shown to be errors, and adopt new views so fast as they should appear true views; and when he did so, he would inform the people. Down to Appomattox, he clung to the maxim he had enunciated in Chicago in 1850: "Wisdom and patriotism, in a public office, under institutions like ours, are wholly inefficient and worthless, unless they are sustained by the confidence * * * of the people."

Men may believe fervently in liberty but reject democracy; Lincoln's position was a pole apart from that of such thinkers as Burke, a passionate libertarian but no democrat. Burke wrote that he never addressed himself to the vulgar nor to that which alone governs the vulgar, their passions. Lincoln pointedly addressed himself to the vulgar and to their reason. He never abused an honest opponent. He was so anxious not to repress honest discussion that he thought posterity would more likely criticize him for excessive leniency with copperheads and traitors than for excessive severity.

He was proud that the war neither postponed nor muted a single political campaign. "We cannot have free government without elections," he declared. Pitt was said to love England as an Athenian loved the city of the Violet Crown and a Roman the city of the Seven Hills; so it was that Lincoln loved the American democracy. His mind had not bent toward abstract thinking, and we look in vain in his writings for any body of generalizations on government. We meet rather an instinctive conviction, which experience never corroded.

Yet this man who so completely accepted his identification with the common people had taken laborious pains, from an early age, to raise himself above their level mentally and morally. When Herbert Croly remarked that the youthful Lincoln was as different from the ordinary Sangamon Valley citizen of his day as St. Francis of Assisi was from the ordinary Benedictine monk of the 13th century, he offered no explanation of the fact. The people about young Lincoln, busy with pioneer tasks, were hostile to intellectual effort; young men preferred the tavern or grocery to books, and boisterous sport to study. Dueling, Indian fighting and hunting made heroes, and the admired leader was the Davy Crockett type who distained personal restraint.

One illustration will exhibit the turbulent side of frontier manners. Andrew Jackson, when in the White House, told a friend how a Tennessee bully had once tried to pick a quarrel with him by treading thrice on his foot. "As quick as a flash," said President Jackson, "I snatched a small rail from the top of a fence, and gave him the pint of it full in his stomach. It doubled him up. He fell at my feet and I stomped on him. * * * If any villain assaults you, give him the pint in the belly." This was the spirit of too many backwoodsmen who reared log cabins on Congress land, fought Indians with long rifles, and subdued the wilderness with axe, sidemeat, whisky, and calomel.

Lincoln completely transcended this environment. Where others proved their manhood by intemperate speech and acts, he trained himself in kindliness, moderation, and generosity. We need not recall the hundred examples of his magnanimity; he always followed the principle which he finally summed up in his statement that he had never willingly planted a thorn in another man's pillow, and in his letter advising a young man against a quarrel, for quarreling befogged in the mind.

Meanwhile, among a rude folk at best indifferent to intellectual effort, he found means of systematic mental discipline. "Anybody who gives me a book," he said, "is my best friend," and his instinct for books useful in maturing his powers was unerring. He trained himself to think by Abel Flint's "System of Geometry and Triginometry" as well as Robert Gibson's "Theory and Practice of Surveying"; later, he said, he nearly mastered six books of Euclid. He nourished his imagination by "The Pilgrim's Progress," "Robinson Crusoe," and "Aesop's Fables," three volumes owned by his stepmother. He corrected his English by Kirkham's "English Grammar," for which Mentor Graham said he walked 8 miles—the very copy is now in the Library of Congress—Bailey's "Etymological Dictionary," and "The Kentucky Preceptor," with its classic selections. He improved his style and cadence, and enriched his mind, not only by the Bible, but by Shakespeare and Burns, to whom Jack Kelso introduced him. From Blackstone he drew a faculty of exact statement and something of the spirit of English history as well as a knowledge of legal principles.

Altogether, he could well admonish a student later in life that any youth can read as profitably in primitive communities as in cities: "The books, and your capacity for understanding them, are the same in all places." How wide his reading actually was in New Salem days, no one can say. F. Lauriston Bullard, a veteran student of Lincoln, hazarded the statement that in these years he probably gained as much in intellectural development as Henry Adams gained at Harvard; and at any rate, he never said that his New Salem years had been wasted, as Adams said of his Harvard sojourn.

The important fact is that he trained himself to reflect, and to express his well-pondered conclusions with precision. He had a deliberate but retentive mind; like a piece of steel, as he put it, "very hard to scratch anything on it, and almost impossible after you got it there to rub it out." According to a clergyman who rode on a Connecticut train with him just after the Cooper Union address, he remarked: "I am never easy now, when I am handling a thought, until I have bounded it north and bounded it south, and bounded it east and bounded it west". If he did say this, the Cooper Union speech perfectly illustrated the assertion.

Actually, no real mystery lies behind the ascension of Francis of Assisi or Lincoln above their fellow men. As Carl Sandburg shows us, the explanation lies in native bent and inherent genius. Lincoln resembled the Robert Burns he so much admired in his inborn capacity to distill from meager materials whatever strengthened the mind and ennobled the spirit. The Scottish plowboy poring over Pope's "Homer" and Allan Ramsay's poems at his Ayrshire fireside, and the Illinois railsplitter with his Blackstone and Shakespeare, were satisfying much the same thirst.

This kindling of an adolescent flame is happily no uncommon phenomenon. We meet it in the career of the Massachusetts Senator with whom Lincoln worked closely during the war, Henry Wilson. Bound out at 10 to a farmer who put him at drudgery, Wilson managed, before he gained his freedom at 21, to read a thousand books; he counted them. We find the same natural idealism and desire to excel intellectually and morally in a multitude of other poor lads. Some came to take Lincoln for a model; David Lloyd George, for example, the orphan whose cobbler uncle sent him to a penny school in Wales until he could educate himself by reading Cassell's "Popular Educator" and a host of other works, among them "The Life of Lincoln".

What is remarkable in Lincoln—what does defy easy explanation—is that he manifested so little consciousness of the superiority he had attained. Among rude, aggressive, selfish men, he became urbane, moderate, and generous. Among unlettered, impulsive, and unthinking people he was cultivated, restrained, and deeply reflective. Joseph H. Choate has told us how he and other New Yorkers went in 1860 to hear Lincoln at Cooper Union, expecting to be assailed by stump humor, special pleading, and frontier rhetoric, and how they were impressed instead by the sinewy strength of his plain argument. "It was marvelous to see how this untutored man, by mere self-discipline and the chastening of his own spirit, had outgrown all meretricious arts, and found his own way to the grandeur and strength of absolute simplicity." Yet of condescension to the vulgar, he never showed a trace. The humblest fellow townsman he treated as equal.

In one respect, to be sure, he did assert his superiority to his opponents: in perception of truth. He was scornful of Douglas' sophistries, of Pierce's casuistry, of Buchanan's evasions and cowardices. In every other respect, he took men on his own level. Miss Octavia Roberts of Springfield, gathering material for her book on "Lincoln in Illinois," talked with a Portuguese woman who had been a servant in the old Globe Hotel when the Lincoln family once stayed there. This woman recalled how quickly Mrs. Lincoln resented what she thought saucy talk. But there is a world of meaning in her comment on Lincoln: "He was common, like someone that is poor."

In social life sheer good nature might explain much of Lincoln's outlook; but in

politics he was far from good natured—he was savagely in earnest. The political paradox in his life is all the more remarkable. He believed firmly in political democracy, but just what was it in his time? In Illinois Gov. Thomas Ford, whom he knew, wrote a remarkable State History portraying democracy in repellent hues. Ford flayed such predecessors as Thomas Reynolds with a merciless scalpel; he showed that little men were leaders in the first generation of statehood, how mean their motives, how sordid some of their acts. Nor were the people exempt from acid criticism.

The Illinoisans had cruelly maltreated Black Hawk and his Sauk and Fox Indians; they had murdered Joseph Smith and his brother, and driven the Mormons across the Mississippi at the point of the musket; they had indulged in wild financial excesses during the internal improvement era, and had wavered on the brink of debt-repudiation later. The shabby side of political morals was lighted up by the conduct of Gov. Joel A. Matteson, one of the few men Lincoln despised, who, after nearly gaining that Senate seat that Lincoln sought was proved guilty of theft from the State treasury, and compelled to restore nearly a quarter of a million dollars. The Alton riots and murder of Elijah P. Lovejoy gave the Illinois Shield a sorry blotch.

In the Nation, political democracy had equally inedifying aspects. From Lincoln's point of view the Mexican War was impossible to defend. Slavery undermined the political integrity of the Government, and a succession of weak Presidents—the commonplace Fillmore, the forcible-feeble Pierce, the timid Buchanan—had no policy but one of dodge and delay.

Thaddeus Stevens said that the House of Representatives, when he entered it, was a place of Bowie knives, revolvers, and howling demons. It was a sad light that was cast on democracy by Bleeding Kansas, the assault of Brooks on Sumner, the eclipse of civil liberties throughout the South, the territorial greed embodied in the Ostend Manifesto, and the bloody raids of filibusters in Central America. For that matter, how the Civil War itself would have shocked the Fathers of the Nation as a negation of all their hopes. Punch published an apt cartoon which depicted the shade of George III poking the shade of Washington in the ribs against a background of fighting troops, and ejaculating: "What d'ye think of your fine Republic now? Eh? Eh?"

Lincoln of course had a large firsthand experience of the demagogic, log-rolling, planless side of democracy. As a young legislator, he had played his part in the craze which fastened an almost hopeless debt on the young State for a system of public works vote without surveys, estimates, or careful discussion; he had been one of the adroit lobbyists who had removed the capital from Vandalia to Springfield. He had seen all the vicious features of the spoils system in the Jacksonian Era, and the bad results of a blind party adherence to a military hero. As he expressed it, the Democrats were a horde of hungry ticks who stuck to the tail of the Hermitage Lion until after his death. He thought the acts and policies of the proslavery administrations just before the war disgraceful. "Our Republican Robe," he said, in his Peoria speech of 1854, "is soiled and trailed in the dust."

Nor should we forget that in his wartime dealings with democracy, Lincoln experienced three painful failures. His passionate desire during his first 5 weeks in office was to avert war, an end toward which he strove at any cost, save the sacrifice of principle; he was thwarted when the hotheaded southerners fired on Sumter. In the next 17 months, his principal effort, next to the prosecution of the war, was to persuade the Border States to accept his plan of gradual compensated emancipation. He put the utmost intensity of feeling into this effort. "Oh," he said to Isaac Arnold and Owen Lovejoy on July 13, 1862, "how I wish the Border States would accept my proposition. Then you, Lovejoy, and you, Arnold, and all of us, would not have lived in vain." He believed that acceptance would lead to an early termination of the war. But the very day after his conversation with Arnold, the border Congressmen said, "No."

Maryland, Delaware, Kentucky, and Missouri rejected his plan. In the ensuing 18 months his principal aim, next to conquering the South, was to persuade the majority in Congress to adopt a moderate scheme of reconstruction. Again, he failed, and in 1864 had to veto the vindictive Wade-David bill. The policies on which he most set his heart, in short, broke down.

Meanwhile, he might well have complained of public impatience, of the failure of the people to keep the armies sufficiently filled to avert a draft, of the widespread profiteering, cheating, and skulking, and of the mischievous effort of the Senate to dictate a new Cabinet after Fredericksburg.

He never complained except of individual men, and never lost faith. His best trusted associate, Secretary Seward, did sometimes grow utterly discouraged. We who bear the responsibility in Washington, Seward wrote his wife in 1862, see the war as a sad, painful, fearful reality. "To the public, who are not directly engaged in it, it is a novel, a play. * * * They weary and grow restive if the action of the war drags, or loses its intensity. They pronounce the piece a failure, and propose to drive the manager out of the theater. Who could believe that nations could be made or saved in civil war, when the people act like this?"

After the elections that year, Seward honestly feared that partisanship might effect the national ruin. On another occasion he wrote his wife that nothing preserved his faith in American democracy but reading history. "Selfishness crops out in everything, everywhere. It offends and alarms us constantly; but we learn from history that selfishness always existed, and always was more flagrant than now."

Gideon Welles likewise lost faith. When he watched the defeatist antics of Fernando Wood, he concluded: "But the whole city of New York is alike leprous and rotten." In such vicious communities, he thought, free suffrage was debased, and some outside control was needed. In his youth, he had believed that the popular voice was right, "but alas, experience has shaken the confidence I once had." In short, he doubted that democracy could succeed among "the strange materials that compose a majority of the population in our large cities," for demagogs would obtain the mastery.

Thaddeus Stevens felt a deeper mistrust. Called the Great Commoner, he was supposed to cherish a special feeling for democracy. Yet during and after the war, he came to a sardonic belief that misgovernment was chronic, and when near his end he sadly commented: "With all this great struggle of years in Washington, and the fearful sacrifice of life and treasure, I see little hope for the Republic."

These were men whose belief in democracy was shaken by the stormy time; many others never had a real faith in democracy. The planter statesmen of the South in the era of Jefferson Davis, Howell Cobb, Robert Toombs, and Judah P. Benjamin were like Calhoun in being natural antidemocrats. Representing a minority even in the cotton kingdom, they had to guard a great special interest, and so combated every theory of government and society which weakened their position.

By 1860, many of them openly repudiated the ideas of Jefferson. When Alexander H. Stephens, defending the Union before the Georgia Legislature in 1860, asked what form of government could be preferred to America's, Robert L. Toombs interjected: "England."

Of a different type were some of the Northern radicals, humanitarians and egalitarians, but not true believers in democracy. Of Charles Sumner, for example, it was truly said that he had unbounded sympathy for the poor Negro, but none to spare for the poor white man.

And in a still different category fall those who, reared in Lincoln's generation, turned against democracy as postwar materialism engulfed the land. Henry Adams, writing a novel entitled "Democracy," saw little hope for it. Ambrose Bierce, an Indianian sprung from the plain people, decided that popular government was one vast fraud. In "The Devil's Dictionary," he suggested his creed. "Politics: The conduct of public affairs for private advantage." "Deliberation: The act of examining one's bread to see which side it is buttered on." "Pocket: The cradle of motive, and the grave of conscience."

Mark Twain's disillusionment became so abysmal that in his last years, seeing war, greed, and cruelty rampant, he used to speak of "the damned human race." Doubtless he should not be judged by words he wrote after a long series of private misfortunes and bereavements had deepened his bitterness. But even when fairly young, he was cynical about democracy, as his novel, "The Gilded Age," shows. His approach to pioneer communities, to legislatures, to lobbyists, to business, to Mississippi steamboating and California mining, was primarily satiric. In "Life on the Mississippi," he wrote a paragraph on the frontier which Lincoln would have thought but wryly amusing:

"How solemn and beautiful is the thought that the earliest pioneer of civilization * * * is never the steamboat, never the railroad, never the newspapers, never the Sabbath school, never the missionary—but always whisky. Such is the case. Look history over; you will see. The missionary comes after the whisky—I mean, he arrives after the whisky has arrived; next comes the poor immigrant with ax and hoe and rifle; next, the trader; next the miscellaneous rush; next the gambler, the desperado, the highwayman, and all their kindred in sin of both sexes; and next, the smart chap who has bought up an old grant that covers all the land; this brings in the lawyer tribe; the vigilance committee brings the undertaker. All these interests bring the newspaper; the newspaper starts up politics and a railroad; all hands turn to and build a church and a jail—and behold, civilization is established forever in the land."

Of this cynicism, this disillusionment, we find not the slightest touch in all of Lincoln's writings. When he saw our Republican robe soiled and trailed in the dust, he blamed false leaders, not the people. We must purify the robe, he said, and as soon as he became Chief Magistrate, he set himself to the task. While he never defined his concept of democratic government in detail, it was undoubtedly that which John Stuart Mill had enunciated in 1835. "If the bulk of any nation possesses a fair share of * * * wisdom," wrote Mill, "the argument for universal suffrage is * * * irresistible; for the experience of ages, and especially of all great national emergencies, bears out the assertion that, whenever the multitude are really alive to the necessity of superior intellect, they rarely fail to distinguish those who possess it." They so distinguished in 1860; they chose even better than they knew. They elected a leader whose type of democratic leadership meant a happy blend of Jefferson's profound if rather uncritical faith in the people, and Hamilton's sense of the importance of a constructive plan.

It would be as hard for us to conceive of Lincoln writing sourly and satirically of the people and popular government as of Walt Whitman so writing. Whitman held that the entire Nation shared the guilt of slavery; he pictured the ugly, debasing side of war in contract-hungry cities, in Washington, and on the battle field with relentless pen. But he felt certain the people would emerge from their bloody ordeal with a truer bond of comradeship. With a perceptible degree of purification, Lincoln also felt that. He felt it much more strongly than Whitman, because he had a better understanding of the historic roots of democracy; for as a lawyer and politician, he had given careful study to the basic documents which between 1170 and 1790 established the American system. From the time he first read them in an appendix to the volume of the Statutes of Indiana which he early acquired, he had steeped himself in these writings of the founders of the Nation. To him, they were sacred. Of the Constitution, he said in Congress in 1848, that it should not lightly be touched: "It can scarcely be made better than it is." For the Declaration of Independence he felt a still deeper reverence, and when its spirit warred with the letter of the Constitution, he stood by the Declaration. Every nation, he said in Chicago in 1856, needs a central idea. "The central idea in our political public opinion was, and until recently continued to be, the equality of men."

It is not enough, therefore, to say that Lincoln's spontaneous, optimistic belief in democracy was founded on the same rock as Whitman's, a sympathetic appreciation of the virtues of the common man. In part it was. He was a citizen, as Lord Charnwood says, of that far country where aristocrat and democrat are judged by simple worth alone; and like Whitman, like Burns, he had a profound sense of the greatness which is often found in men of low as of high station. Mere rank meant little to him, as he showed when he once offended Secretaries Stanton and Welles by sending them a document with the endorsement: "Referred to Mars and Neptune."

But an important part of the foundation rock of Lincoln's conviction was his thorough study of the theory and early development of democratic government. How well he appropriated what is valuable in the teachings of Washington and Adams, of Jefferson, Hamilton, and Madison is evident in the Cooper Union Address and First Inaugural. Compared with Whitman, he was an expert political scientist. He also had, what Whitman lacked, a powerful sense of ideological world mission of democracy. He knew that democracy might not be so efficient in a brief crisis as a dictatorship, of which men like General Hooker spoke longingly during the war. But he also knew that in the long run, government of the people has greater endurance and stability, and a larger power to call forth and educate talent, than any other; and at Gettysburg he expressed his long-held confidence that its example would ultimately convert and conquer other peoples.

But the largest reason, I think, for Lincoln's fervent belief in democracy reached a little deeper than the considerations just named: it lay in his increasing conviction, from 1848 onward, that the masses of the North were becoming possessed by a great moral idea, which would ultimately regenerate the country. They were rising to meet the demands of a cause larger than any they had known since 1789.

Other men caught glimpses of this ocean-heave of American democracy. Carl Schurz, for example, wrote a German relative just after the election of 1856:

"The last weeks were a time when public matters made much more demands than ordinarily upon the American system. You over there in your decrepit Europe can hardly imagine how a great idea can stir up the masses of the people to their depths, and how an enthusiastic struggle for principle can thrust aside for a certain time all other interests, even the materialistic ones. * * * A general struggle of opinions among a free people has in it something unbelievably imposing; and you never see with greater clearness what a far-reaching influence political freedom exercises upon the development of the masses."

This German Forty-eighter knew inspiration when he saw it. Just the same view was expressed by the illustrious English liberal, Richard Cobden, who toured the United States in 1859. He found the North in the grip of stirring emotions. They were a sign, he saw, of vigorous health. "The concentrated earnestness with which political parties were at work in the United States," he wrote later, "inspired me with full faith that the people of the country would, in spite of the difficulties and dangers of their political issues, work out their salvation."

Lincoln felt the popular pulse begin to beat with new energy when the Wilmot Proviso almost passed Congress. He felt the movement grow in urgency and strength as Mrs. Stowe published "Uncle Tom's Cabin," as the Underground Railroad gave defiance to the Fugitive Slave Act, as millions of Northerners rose in wrath against what they deemed Douglas' betrayal of freedom in the Kansas-Nebraska Act, as the new Republican Party swiftly became a giant of crusading idealism. This popular espousal of a new moral idea gave Lincoln's house-divided speech and his debates with Douglas a grip on the attention of the whole Nation. The North was presenting the impressive spectacle which gave the French liberal, Elie Gasparin, his title for the powerful book he published early in the war, "The Uprising of a Great People."

The war brought the upheaval to its climax. It was no surprise to Lincoln that depressing as was the amount of confusion, selfishness, and limpness revealed by the conflict, far greater was the display of heroism, devotion, and generosity.

The plain people rose to save the Union and vindicate the type of government which would elevate the condition of all men. Countless soldiers proved ready to give the last measure of dedication. Countless mothers were proud to lay their costliest sacrifice on the national altar. Proud was the word the mother of Robert Gould Shaw used when she was told that Governor Andrew had offered him the command of the Negro regiment, the 54th Massachusetts: She said, "I would be nearly as proud to hear that he had been shot." Later she heard that too.

There were countless fathers like Commodore Smith, who, said Hawthorne, uttered the finest short speech of the war. His son commanded the frigate *Congress* in Hampton Roads when the *Merrimac* began battering her to pieces, and the old commodore knew that his boy would die before he hauled down the colors. When informed that the *Congress* had surrendered he said, "Then Jo's dead"—and Jo was dead.

There were countless public officers as devoted as the much-tried Stanton, whom an aid once surprised with his head bowed on his desk, weeping and exclaiming over and over, "God help me to do my duty." In the face of a nation giving so much to a sacred cause, Lincoln would have felt it treason to humanity to utter a word that would be construed as disheartened or cynical.

When the war ended, the historian John Lothrop Motley wrote from Austria to a Boston friend to say how glad he was that the nightmare of fire and blood had ended. "Believing in no government but that of the people, respecting no institutions but democratic institutions," he felt sure "that the future of the whole world is in our hands if we are true to ourselves." He paid tribute to Grant as a master of the art of war: "What could be more heroic than his stupendous bashfulness?" Of Lincoln he wrote that he was afraid to speak for fear of overenthusiasm. "But I am sure that through all future ages, there will be a halo around that swarthy face, and a glory about that long, lean uncouth figure such as history only accords to its saints and sages."

We may be certain that Lincoln would have shrunk from this as overenthusiasm indeed. But the President would heartily have endorsed the statement which Motley sent at the same time to the author of "Tom Brown at Rugby":

"MY DEAR HUGHES," it ran, "the true hero of the whole war—the one I respect and admire even beyond Lincoln and Grant (although I have not yet found anyone who is willing to go quite as far as I do in regard to both these men)—is the American people."

Mr. SCHWENGEL. Mr. Speaker, in closing may I close with words on this subject that were used in this Hall by that great historian-poet, Carl Sandburg, incidentally, the only private citizen who never held high office who has ever addressed a joint session of the Congress. The speech he made on that occasion has now been translated in over 34 languages at the request of that many foreign countries to be used in their educational institutions and in their public libraries.

Mr. Speaker, you will recall at the close of that great speech he asked:

And how did Lincoln say he would like to be remembered? Something of it is in this present occasion—in the atmosphere of this room. His beloved friend, Owen Lovejoy, had died in April of 1864. Friends wrote Lincoln and he replied that the pressure of duties kept him from joining them in efforts for a marble monument to Lovejoy, the last sentence of his letter reading:

"Let him have the marble monument along with a well assured and more enduring one in the hearts of those who love liberty unselfishly for all men."

Today we may say, perhaps, that the well assured and most enduring memorial to Lincoln is invisibly there—today, tomorrow, and for a long, long time yet to come. It is there in the hearts of lovers of liberty—men and women—this country has always had them in a crisis—men and women who understand that wherever there is freedom there have been those who fought, toiled, and sacrificed for it.

Mr. SCHWENGEL. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include various newspaper articles, and speeches.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from Iowa.

Mr. JENSEN. Mr. Speaker, Abraham Lincoln has for a century been the most popular subject in America.

I will not belabor this afternoon's memorial to him with more than a few

words. But to me they are significant. They concern Mr. Lincoln's connections with an enterprise of great importance to the largest market area in my southwestern Iowa congressional district.

And in a collateral sense it is important to the whole Nation, because it involves the vital railroad industry.

Lincoln made an important contribution to the history of railroading in Iowa and America when, as President of the United States, he was confronted with the problem of locating the eastern terminus of the Union Pacific.

While stopping at Council Bluffs in 1859, he had met Gen. Grenville M. Dodge, who had just completed extensive railroad surveys west of the Missouri for the Rock Island Railroad. Lincoln recalled this visit when Congress passed the act providing for a transcontinental railroad and promptly called General Dodge to the White House for a conference.

These two meetings with Grenville M. Dodge, now of revered memory in Council Bluffs, more than perhaps anything else, fixed Council Bluffs, Iowa, as the eastern terminus of the Union Pacific.

A memorial to Lincoln has been erected on the bluff at Council Bluffs overlooking the Missouri River, where he and his Iowa friends stood in 1859 and looked westward across Nebraska.

A painting of the historic conference between Lincoln and Dodge occupies the most prominent place in my personal office. I am never more than a few moments distant from a thought of Lincoln. I consider that his unrivaled spot in human history is due to the fact that he belongs to everyone. We Republicans regard him as our patron saint, but we can share him with the whole world. He was truly America's right man at the right time.

Mr. BRAY. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from Indiana.

Mr. BRAY. Mr. Speaker, we, in Indiana, are especially proud of Abraham Lincoln because it was in the rolling hills of southern Indiana where Lincoln grew up and developed his great character which is now revered throughout the world.

We are also proud of the part that our State played in the Republican National Convention that nominated Abraham Lincoln for President in the "Wigwam" in Chicago a hundred years ago today.

From a very early age I have heard Hoosiers talk of Indiana's part in the nomination of Lincoln. A few days ago I had the opportunity to discuss Indiana's activities at that national convention with Mr. Hubert Hawkins, secretary of the Indiana Historical Society, which organization, incidentally, is 130 years old. Mr. Hawkins gave me a brief account of Indiana's part in that important convention. This account was documented by Kenneth M. Stampp's "Indiana Politics During the Civil War," published by the Indiana Historical Bureau, 1949; an article by Charles Roll, "Indiana's Part in the Nomination of Abraham Lincoln for President in 1860," published in Indiana Magazine of History, March 1929; and Reinhard H. Luthin's "The First Lincoln Campaign," 1944.

Moderation on the slavery issue and the sectional conflict typified the Indiana Republican Party in 1860. The failure of John C. Fremont in 1856 to carry the State was remembered as an evidence of the weakness of the extreme antislavery position with Hoosier voters. Consequently, the candidacy of William Seward of New York evoked little enthusiasm in Indiana. Friendly consideration was, however, given to Edward Bates of Missouri, Abraham Lincoln of Illinois and Judge John McLean of Ohio. Schuyler Colfax of South Bend led a strong group of Hoosier editors in supporting the Missourian and he enjoyed the influential backing of Horace Greeley. Bates' prospects for Hoosier support were weakened by the sturdy opposition of the German element in the Indiana Republican Party led by Theodore Hielscher, editor of the Indianapolis Freie Presse, who refused to forget his cooperation with the Know Nothings, a nativistic movement. Consequently, the Indiana delegation to the Chicago Convention was uninstructed.

With an electoral vote of 13 and 26 votes in the Republican convention Indiana constituted a prize worth any candidates seeking. With the same number of electoral votes as Massachusetts, Indiana ranked fifth in the Nation and only Ohio had a stronger political voice in the Old Northwest. Hoosier support was all the more sought after because of Indiana's status as a doubtful State. Lincoln recognized this point in a letter to Caleb Smith:

> We might succeed in the general results without Indiana, but with it failure is scarcely possible.

Lincoln's adherents in Indiana worked hard in his behalf between the mass convention at Indianapolis and the Chicago convention. Cyrus M. Allen, Henry S. Lane, and Caleb B. Smith spearheaded the Lincoln drive.

The Indiana delegation reached Chicago on May 12. Representatives of Bates, Lincoln, and other candidates assiduously wooed the Hoosiers. An informal poll on May 15 indicated that Lincoln was in the lead. The final decision was made on the morning of May 17. A Bates supporter, John Defrees explained:

> We Bates men of Indiana concluded that the only way to beat Seward was to go for Lincoln as a unit.

After the 17th, the Indiana delegation was solidly behind Lincoln.

Once committed the Hoosiers did yeoman service in rallying additional support of the Illinoisan. Henry S. Lane, Republican candidate for Governor of Indiana and chairman of the Philadelphia convention, was one of those who spent the night of the 17th seeking votes from undecided delegations. One witness saw Lane "at 1 o'clock, pale and haggard, with cane under his arm, walking from one caucus room to another, at the Trement House." Lane told the delegates that Seward's nomination would insure his defeat in Indiana. A report was widely circulated that the Republican candidates for Governor in Indiana, Illinois, and Pennsylvania would give up their candidacies if Seward were nominated. Being well aware of the Hoosiers natural love of politics, I can picture in my mind the great zest and love of political battle with which that Hoosier delegation entered into that great drama that would influence world history, the nomination of Abraham Lincoln. I envy those Hoosiers of a century ago.

On Friday the 18th Lincoln's nomination was seconded by Caleb Smith and Henry Lane led the Hoosiers into the wild demonstration. When the balloting began, Indiana's 26 votes were cast for Lincoln. This vote was pivotal. Only one other State, Illinois, demonstrated such unanimity in support of Lincoln on the first ballot and it undoubtedly had an important psychological impact.

Indiana never wavered in the subsequent balloting and Lincoln was nominated on the third ballot. The Hoosiers returned home with the jubilant consciousness that they had contributed decisively to the nomination of Abraham Lincoln, a candidate who had spent 14 important years of his life in Indiana. They were even more elated by the conviction that they had secured a nominee who could carry Indiana in November.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from Ohio.

Mr. BOW. Mr. Speaker, I appreciate the fact that the gentleman from Iowa [Mr. SCHWENGEL] has called the attention of the House and the country to the 100th anniversary of the nomination of Abraham Lincoln as the Republican candidate for the Presidency. As it has been pointed out, Ohio had a great deal to do with Lincoln's nomination. Realizing this, I asked the Canton Repository, one of Ohio's outstanding newspapers, in my congressional district, to check on the editions of their paper of a hundred years ago to determine what part, if any, our congressional district might have had in this nomination. It turned up some very interesting facts.

Abraham Lincoln's nomination 100 years ago today as the Republican candidate for the Presidency was assured by the dramatic announcement of an influential man from Massillon, Ohio, in my congressional district.

He was David K. Cartter, chairman of the Ohio delegation to the Republican national convention in Chicago's huge wigwam.

The wooden wigwam, which could hold 10,000 persons, was constructed especially for the 1860 Republican convention.

U.S. Senator William H. Seward, the preconvention favorite, led Lincoln on the first two ballots.

Seward's margin on the second ballot was three votes—184 to 181—with 233 of 465 votes needed for the nomination.

The third ballot began. New York switched its vote from Seward to Lincoln, whose total rose to 231½, only 1½ votes away from the nomination.

Mr. Cartter commanded the attention of the packed convention hall as he rose. He possessed a booming voice and he stuttered.

What he then was to say would start the tall, unhandsome man from Illinois on the way to the White House.

"I rise, Mr. Chairman," began Mr. Cartter, "to announce the change of four votes of Ohio from Mr. Chase, of Ohio, to Mr. Lincoln."

The nomination was assured. A cannon was fired on the Wigwam's roof to tell the world that "Honest Abe" was going to represent the young Republican Party at the election the next November.

After the delegates made Lincoln's nomination unanimous, Mr. Cartter submitted the name of Hannibal Hamlin, of Maine, for nomination as Vice President.

Hamlin was nominated on the second ballot, according to the account in the May 22, 1860, edition of the weekly Ohio Repository.

Lincoln remembered Mr. Cartter after he got into the White House as the Nation's Civil War President. He appointed the Massillon man as Minister to Bolivia and as chief justice of the Supreme Court of the District of Columbia.

According to an account in E. T. Heald's "The Stark County Story," Mr. Cartter was active in a move to bring the railroad through Massillon.

The charter under which the Ohio Legislature granted construction rights to the Ohio & Pennsylvania Railroad was the result of a meeting in Massillon in November 1847.

The meeting was called after Mr. Cartter headed a committee which in a meeting at Pittsburgh in 1846 failed to convince officials of Pittsburgh and Allegheny, Pa., that a railroad should be constructed through Massillon from Pittsburgh to Chicago.

Dr. Isaac Steese, a prominent Massillon banker and landowner, attended the convention with Mr. Cartter as a delegate. Dr. Steese's vote likely was one of those which Mr. Cartter switched over to Lincoln.

Dr. Steese and others organized the First National Bank of Massillon during the decade before the memorial convention in the Wigwam. He was president of the bank—then Stark County's largest—until his death in 1874.

"It was said that not 20 men in the Nation were better informed on politics in the large sense of the word," wrote Mr. Heald of Dr. Steese. He also was interested in farming and other business undertakings.

Dr. Steese's daughter, Annie, married Frank L. Baldwin. She later donated her home and grounds for the Massillon Public Library and Museum.

Another Stark Countian who attended the 1860 convention was Thomas W. Saxton, junior editor of the Repository. He was the son of John Saxton, founder of that newspaper.

I am indebted, indeed, to the Canton Repository for the research which made the facts I have cited here available to me.

I think it is most interesting to know that my congressional district, which gave the Nation William McKinley, was also responsible for the nomination of Abraham Lincoln, and that the same man who cast the votes to assure the nomination of Lincoln placed in nomination Hannibal Hamlin, of Maine, as Lincoln's running mate.

Mr. PIRNIE. Mr. Speaker, in the sequence of events preceding the War Between the States, few had such profound significance as the nomination of Abraham Lincoln for President of the United States. Today we celebrate the centennial of that nomination.

One of the finest contemporary newspaper reports of the Republican Convention of 1860 was published by the Washington Evening Star. This account has been reprinted in the Sunday, May 15, edition of that newspaper with an excellent commentary by Staff Writer John W. Stepp. This article accurately depicts the drama and excitement surrounding the convention, and inclusion in the RECORD will assure proper preservation of this succinct account of one of the most momentous events in America's rich political heritage:

THE STAR STORY OF THE EVENTS LEADING UP TO THE CIVIL WAR—THE REPUBLICAN CONVENTION OF 1860

(By John W. Stepp)

The Republicans were confident of prevailing in the 1860 presidential election, regardless of their choice of a candidate. After all, the northern and southern factions of the Democratic Party had split—hopelessly, it seemed—on the slavery issue in their convention 2 weeks earlier in Charleston, S.C.

As the Republicans convened on May 16, the man who seemed most likely to become their standard-bearer was William H. Seward, Senator and former Governor of New York, who was resolutely antislavery in his views.

Abraham Lincoln's celebrity, such as it was, stemmed chiefly from his debates with Stephen A. Douglas, the Illinois Democrat, in the 1858 senatorial campaign, and from his address in February 1860 in New York's Cooper Union.

Missouri Judge Edward Bates' appeal was to the conservative wing of the party.

THE LATEST NEWS—TELEGRAPHIC—THE REPUBLICAN CONVENTION—SPECULATION AS TO CANDIDATES

CHICAGO, May 15.—Nothing is of course determined as to the candidates. The friends of the different men proposed are all confident of the success of their favorites.

Lincoln is urged by the delegates from Illinois, but his alleged want of administrative ability is the objection raised against him. After a complimentary vote for him, Illinois will likely go for Bates.

[From the Evening Star, Thursday, May 17, 1860, p. 3, col. 6]

THE REPUBLICAN CONVENTION

CHICAGO, May 16.—Long before the hour for the meeting of the Republican Convention today, the vicinity of the wigwam was thronged with thousands eager to gain admittance to its spacious enclosure. It is estimated that 30,000 strangers are in the city. Within the scene was very exciting.

As soon as the doors were opened the body of the wigwam was solidly packed with men, whilst the seats in the galleries were packed with ladies. The interior was handsomely decorated with evergreens, statuary and flowers. It was estimated that 10,000 people were within the building.

[From the Evening Star, Friday, May 18, 1860, p. 3, col. 5]

THE REPUBLICAN CONVENTION, SECOND DAY

CHICAGO, May 17.—The platform, as reported, resolves as follows:

"Congratulates the country that no Republican Congressman has countenanced threats of disunion and denounces these threats as an avowal of contemplated treason.

"That the new dogma, that the Constitution carries slavery into the territories, is a dangerous political heresy.

"The reopening of the slave trade is denounced."

[From the Evening Star, Saturday, May 19, 1860, p. 3, col. 6]

THE REPUBLICAN CONVENTION, THIRD DAY

CHICAGO, May 18.—The convention now proceeded to ballot for a candidate for President. The first ballot resulted as follows: Seward 173, Lincoln 102, Bates 51, [Simon] Cameron 50.

There being no choice, a second ballot was had, as follows: Seward 184½, Lincoln 181½, scattering 38. Whole number of votes 404; necessary to a choice, 203.

The third ballot then took place, and a general stampede of all the forces opposed to Seward took place in favor of Lincoln. It resulted as follows: Lincoln 228, Seward 181.

Mr. Lincoln was therefore declared the nominee. The result is said to have been brought about by the Pennsylvania friends of Mr. Cameron. [Mr. Cameron was a political boss of the Keystone State.]

During the preliminary proceedings, Lincoln's friends exerted their lungs to the utmost, and showed a noisy predominance over Seward's forces.

. . . On motion . . . the nomination of Mr. Lincoln was made unanimous.

. . . On the second ballot Senator [Hannibal] Hamlin [of Maine] was nominated [for Vice President].

HOW THE NOMINATION WAS RECEIVED

The intelligence of the nomination, when conveyed to the people outside the wigwam, created a scene of the wildest excitement which beggars description. Cheer upon cheer rent the air, while cannon sent forth their roar after roar. At least thirty thousand people participated in the excitement.

SKETCH OF MR. LINCOLN

The Hon. Abram [sic] Lincoln, of Illinois, who has so unexpectedly become the nominee of the Republican party for the Presidency of the United States, is known to a very limited extent, never having exhibited any ability as a statesman, or particularly distinguished himself in any other way. He was born in Hardin County, Ky., February 12, 1809; received a limited education; adopted the profession of the law; was a captain of volunteers in the Black Hawk war; at one time a postmaster of a small village; four times elected to the Illinois Legislature; and a representative in Congress from Illinois, from 1847 to 1849. A couple of years ago he was the Republican candidate for U.S. Senator, in opposition to Mr. Douglas. Both gentlemen stumped the State, and their discussions excited much attention throughout the country, as they were marked by great ability. The contest resulted finally in the return of a Democratic Legislature, and the reelection of Mr. Douglas to the U.S. Senate. Since that time, Mr. Lincoln has been prominent as a politician and traveling stump orator in behalf of republicanism, having within a few months past delivered several political lectures in various cities and towns at the North. He is a speaker of considerable ability.

Mr. WIDNALL. Mr. Speaker, there is more than sentiment for Abraham Lincoln in our thoughts as we observe today

the 100th anniversary of Lincoln's nomination as Republican candidate for President of the United States. There is, more importantly, the recognition that many of the great advances that have resulted in the United States becoming the foremost power in the world today—economically, culturally, militarily—can be attributed to sound principles as set down and adopted at that second Republican Convention in Chicago, May 16, 17, and 18, 1860.

Today, 100 years after Lincoln's nomination as Republican candidate for President and subsequent election, this Nation celebrates a century of progress—continual advancement for a better and more purposeful life.

Lincoln, one of the most quoted of all Americans, is popularly known for his many immortal phrases on moral issues. Among the sagest of all his counsel was the following statement that is so timely and carries such import for us today:

"That the people justly view with alarm the reckless extravagance which pervades every department of the Federal Government; that a return to rigid economy and accountability is indispensable to arrest the systematic plunder of the public Treasury by favored partisans."

Mr. Speaker, a sound fiscal policy is today as much a part of the Republican Party's philosophy as it was 100 years ago, and we who are privileged to be affiliated with that party are as dedicated to its principles as were the first Republican leaders. Last year, in what unquestionably was the greatest expression of public opinion directed at Congress in my 11 years on Capitol Hill, Mr. and Mrs. America, with singleness of voice and purpose, demanded that their duly elected Representatives in both Houses of Congress live within the Nation's collective means. The public insisted that wasteful, deficit spending be halted and that the Federal Government demonstrate fiscal responsibility.

There are a number of vital items of legislation that this Congress must enact if it is to discharge its responsibilities and keep faith with its citizens. I urge my colleagues to be guided by these principles in the relatively few weeks remaining of the 86th Congress, and that all sincere effort be made to pass such legislation as we can reasonably expect will meet with the approval of the President. I am sure, in this connection, that his demands relating to the key bills before Congress are most reasonable.

Representative FRED SCHWENGEL is to be commended for taking this time so that we can all pay tribute to one of our Nation's most courageous leaders.

Mr. DOYLE. Mr. Speaker, if I could be permitted to repeat everything said by my distinguished colleagues, who have spoken so inspiringly and informatively of Abraham Lincoln on this 100th anniversary of his nomination for the Presidency of the United States, I would feel I would not be saying a bit too much about Abraham Lincoln and his influence on the life and destiny of our Nation; yes, Mr. Speaker, on the life and destiny of the whole world. In several nations where I have traveled officially as a member of the House Armed Services Committee, I could observe very attractive statues, lifesize, of this illustrious Civil War President.

For many years prior to my first coming to this great legislative body 14 years ago, I had the great privilege of being president of the Abraham Lincoln Club at Long Beach, Calif. I am sure that there are many thousands of Californians who are appreciative of his place in history for understanding between people of the human race which was the policy and practice of President Lincoln—both in and out of office.

One of the paragraphs in his message to Congress in 1861 which I always remember and emphasize as very, very appropriate always, is as follows:

> The prudent, penniless beginner in the world labors for wages awhile, saves a surplus with which to buy tools or land for himself, and at length hires another new beginner to help him. This is the just and generous and prosperous system which opens the way to all—gives hope to all, and consequent energy and progress and improvement of condition to all.

I love to read and reread this statement by him during the debates with Stephen Douglas in 1858:

> When I was a boy, I spent considerable time along the Sangamon River. An old steamboat plied on the river, the boiler of which was so small that when they blew the whistle, there wasn't enough steam to turn the paddlewheel. When the paddlewheel went around, they couldn't blow the whistle. My friend Douglas reminds me of that old steamboat, for it is evident when he talks he can't think, and when he thinks, he can't talk.
>
> * * * * *
>
> Senator Douglas is of worldwide renown. All the anxious politicians of his party have been looking upon him as certainly at no distant day to be President of the United States. They have seen in his round, jolly, fruitful face post offices, land offices, marshalships and Cabinet appointments, chargeships and foreign missions, bursting and sprouting out in wonderful exuberance ready to be laid hold of by their greedy hands. And as they have been gazing upon this attractive picture so long, they cannot bring themselves to give up the charming hope. On the contrary, nobody has ever expected me to be President. In my poor, lean, lank face, nobody has ever seen that any cabbages were sprouting out. These are disadvantages all taken together, that the Republicans labor under. We have to fight this battle upon principle, and principle alone.

I recall the following quotations of his:

> With malice toward none; with charity for all;
> With firmness in the right, as God gives us to see the right,
> Let us strive on to finish the work we are in;
> To bind up the Nation's wounds;
> To care for him who shall have borne the battle,
> And for his widow and orphan—
> To do all which may achieve and cherish,
> A just and lasting peace among ourselves
> And with all nations.

> Stand with anyone that stands right. Stand with him while he is right and part with him when he goes wrong.

Mr. Speaker, lastly, we Members of this great legislative body should not be remiss in remembering that Abraham Lincoln was a duly elected Member of the House of Representatives in his day and was a member of the Illinois delegation in the House from March 4, 1847, until March 4, 1849; and while he and his wife were here in Washington during that period they lived at Mrs. Spriggs boarding house here on the Hill where the Library of Congress now stands. In checking through my reference file about him, I find that on Tuesday, April 26, 1949, I made remarks in the House of Representatives entitled "Lincoln, Martyred Friend of the South." Every year since that it has been an inspiration to me to participate in doing something to remember him.

Mr. BASS of New Hampshire. Mr. Speaker, I am happy to join in this discussion led by my able friend and colleague from Iowa [Mr. SCHWENGEL] and relate to you something about Lincoln in New Hampshire.

We owe our chief knowledge of this subject to Judge Elwin L. Page's book, "Lincoln in New Hampshire," published in 1929. The author in his preface states that upon reading Dr. William E. Barton's "Life of Lincoln" he was struck by Barton's emphasizing the failure hitherto of Lincoln biographers giving adequate consideration to the effect of Lincoln's speeches during the latter's visit to New England in February and March, 1860.

In the winter of 1860 Lincoln delivered his famous speech at Cooper Union—the speech that first brought him seriously to the attention of the East; that predisposed the anti-Seward faction in Lincoln's favor, and which consequently brought about the latter's nomination the following May in Chicago.

Lincoln spoke at Cooper Union on the evening of February 27, 1860. The following evening he spoke before a large audience in Railroad Hall, Providence. The next day, February 29, he was on his way to what must have seemed to him a far northern country indeed—the State of New Hampshire. On Thursday, March 1, he spoke at Concord in the afternoon, and at Manchester in the evening. At Concord he was introduced by Gov. Frederick Smith, who presented him to his audience as "the next President of the United States." As Dr. Barton remarks, "Such an introduction was exceptional," and the author adds ironically that at Norwich, Conn., where Lincoln spoke later, the speaker who preceded Lincoln "went the full length of the general imagination and suggested Lincoln might be the next Vice President."

On Friday, March 2, Lincoln spoke at Dover, and finally, the next evening, at Exeter, spending Sunday with his son Robert, who was attending the famous preparatory school in the town. This speech in the little town on Saturday evening, March 3, 1860, marked the final appearance of Mr. Lincoln in the State.

In all, Lincoln spoke 11 times in New England. As Barton says, biographers of Lincoln have not considered adequately the effect of these New England speeches. Several of these biographers, for example, state that Robert Lincoln was at Harvard at the time of his father's tour of New England. On the

contrary, having failed to pass his entrance examinations for that institution, he was at Phillips Exeter Academy, "boning up." Robert did not enter Harvard until 7 months later; one of his father's reasons for coming East was to look into his son's situation; had Robert been safely matriculated at Harvard in the winter of 1860 his father might not have delivered the Cooper Union speech, and the New England tour might not have been made.

Barton describes the situation in the following words—his book was published in 1925, the year before Robert Todd Lincoln's death:

Robert T. Lincoln is a very reticent man, and for the most part declines to speak for publication concerning his father; but one thing he modestly affirms, which is that he made his father President. In the autumn of 1859, Robert went to Cambridge expecting to enter Harvard. He was required to submit to an entrance examination covering 16 subjects, and he failed in 15 of them. The Lincoln family wrote him not to return home, but to enter Phillips Academy at Exeter, N.H., and complete his preparation. This he did, and at the end of a year was able to enter Harvard and complete a regular course. But Mr. Lincoln was somewhat anxious about Robert's studies, and one of his reasons for being ready to visit New York and speak at Cooper Institute was to visit Robert and see how he was getting on at Exeter. Robert T. Lincoln believes that if he had failed in less than 15 studies his father might have been less solicitous, and might not have delivered the Cooper Union speech, or having delivered it, might have returned from New York direct to Springfield. As it was, he determined to visit Robert and make a few speeches in New England.

As to the Lincoln speeches themselves in New Hampshire, there are, alas, only two summaries in reportorial fashion—that is, in the third person. They, however appear to be fairly adequate, considering the lack of press facilities in little New England towns 100 years ago, and the probable lack of shorthand skill on the part of the reporters. The two summaries which have come down to us appear in the Manchester Daily American for March 2, 1860, and the Dover Inquirer for March 8.

The concluding portion of the Dover report is most certainly reliable, for it is, almost word for word, a literal transcription of the final exordium of the great Cooper Union address: indeed, it is quite possible that Lincoln read from proofs, or the morning issue of one of the several New York papers of February 28, which contained the full text of the address from the original manuscript Mr. Lincoln turned over to Horace Greeley's New York Tribune. Mr. Lincoln's last recorded words in New Hampshire, via the Dover Inquirer, were as follows:

To satisfy them [the slaveholding States] said Mr. Lincoln, is no easy task. We must not only cease to call slavery wrong, but we must join with them in calling it right. Silence will not be tolerated. Douglas' new sedition law must be enacted and enforced. We must arrest and return their fugitive slaves with greedy pleasure. We must pull down our free State constitutions. The whole atmosphere must be disinfected from the taint of opposition to slavery, before they will cease to believe that all their troubles proceed from us. Wrong as we believe slavery to be, we should let [it] alone in the States where it exists, because its extirpation would occasion greater wrongs, but we should not, while our votes can prevent it, allow it to spread over the national territories and overrun us in the free States. Neither should we be diverted by trick or stratagem, by a senseless clamor about "popular sovereignty," by any contrivances for groping for some middle ground between the right and the wrong—the "don't care" policy of Douglas—or Union appeals to true Union men to yield to the threats of dis-Unionists, which was reversing the divine rule, and calling, not the sinners but the righteous to repentance—none of these things should move or intimidate us; but having faith that right makes might, let us to the end, dare to do our duty.

To Judge Page's delightful and exceedingly valuable book "Abraham Lincoln in New Hampshire," which has rescued and preserved Lincoln's New England tour from obscurity, we owe the following charming account of Mr. Lincoln's last day in New Hampshire:

On that Sabbath just 1 year before his first inaugural, Abraham Lincoln shuffled off the thought of politics and gave himself to rest. Early in the morning he walked out Front Street and along the muddy road toward Kingston. Arriving at a fork some 2 miles out, he took the right hand, leaving Kingston road, and wandered on another mile. Then he heard the pleasant roar of a river a bit to the left. Following the sound, he bore off on a crossroad and came upon Pickpocket Bridge. There he found young William H. Belknap, an Exeter printer, hanging over the rail and watching the swollen stream tumble down the falls. Lincoln joined the youth in gazing at the fascinating spectacle. As seems usually to have been his custom when other human beings were near, he engaged the youth in conversation. What was said was of little moment and was soon forgotten, but that chat with Abraham Lincoln was a lifelong satisfaction to the future townclerk of Exeter. The story that during his Exeter stay Lincoln saw a small boy fishing for eels near the Great Bridge and borrowed his crude alder pole to try his luck may be untrue, but is in keeping with the simple manner of Lincoln's casual contacts with the townspeople.

Lincoln worshiped that Sunday in the Second Church of the New Parish. The meetinghouse stood in the corner of the Academy yard near the present site of the public library on Front Street. The edifice was removed years after Lincoln's visit, and the parish has ceased to exist. The pew in which he sat has been preserved with great care and is now in the First Church. It was the property of Commodore John Collins Long and Mary Olivia Long, true representatives of the Exeter aristocracy of the day. The minister of the church at the time was the Reverend Orpheus T. Lanphear.

After the service Lincoln walked with Robert to the boy's lodgings in the Clarke (or Simeon Folsom) house on Hemlock Square, at the corner of High and Pleasant Streets, just over the Great Bridge. In their crossings of the river, however, the two usually took the rather shorter way over the lower bridge at the island and thence out Pleasant Street. In the portion of the house fronting on this street, in the left-hand, second-story room, the Lincolns had their Sunday dinner.

During his days in Exeter, Lincoln was seen much in Robert's company. That is one point upon which the evidence is clear and full. The father entered with real zest into the boy's interests and his companionships with the other students. This was the prime object of his trip into New England, and in spite of political calls he accomplished it. For these purely private pursuits he had Wednesday evening, Saturday afternoon, and all of Sunday afternoon and evening.

Lincoln appears in these contacts with the boys and with the townspeople he ran across to have been ever simple and sociable, a man thoroughly enjoying his brief snatches of holiday. A story was told by Albert Blair of a little gathering of academy boys in Bob's room on Sunday evening. Into the chatter Lincoln entered with true boy-like spirit. Bob remarked that one of the party, Henry Cluskey, played the banjo. "Does he?" said Lincoln in his high-pitched voice. "Where is the banjo?" "In my room," replied Cluskey. "Can't you get it?" "Oh, I don't think you would care for it, Mr. Lincoln." "Oh, yes. Go get it." And so the owner of the banjo went and fetched it from his room several blocks away, and played upon it. Lincoln listened with unaffected pleasure. "Robert," he said, "you ought to have one." What the youngsters chiefly remembered about their friend's father was that when he talked with Bob, or the boys gathered around, the deep seams of his face broke into a series of twinkling lines. Every boy was at once drawn to him, as he was to them.

The holiday—

Writes Judge Page—

was all too short. At a few minutes before 7 on Monday morning, March 5, 1860, Lincoln boarded the train at Exeter for Hartford, where he was to deliver a major address. Never again would he breathe the bracing air wafted down from the White Mountains, to meet and mingle with that from the caves of the misty Atlantic.

And thus—

Concludes Judge Page—

Abraham Lincoln passed from the sight of New Hampshire, but not from her memory.

Mr. MACK. Mr. Speaker, all of us in Illinois, as throughout the Nation, Democrat and Republican alike, revere the memory of Abraham Lincoln.

It is fitting, therefore, that, although a Democrat, I feel privileged to join in this tribute to Lincoln on the occasion of the 100th anniversary of his nomination by the Republican Party of 1860 as its candidate for President of the United States.

However, I cannot let this occasion pass without paying tribute to another great American, another stalwart son of Illinois, that great leader of the Democratic Party, Stephen Douglas.

If, as many historians say, Lincoln's debates with Douglas gained him national stature and led to the presidential nomination, it was because Douglas already had risen to preeminence in the political life of this country.

It was the mark of the man that Douglas, once Lincoln became Chief Executive amid the flames of civil war, forsook partisanship and loyally supported his Commander in Chief.

An interesting account of this final episode in the stirring life of Illinois' "Little Giant" is given in the following account prepared at my request by Mr. John T. Rodgers, editorial specialist with the history and government division of the legislative reference service of the Library of Congress:

ABRAHAM LINCOLN: STEPHEN A. DOUGLAS

The great political battle, formally opened by the ominous "House divided" speech at Springfield, Ill., on June 16, 1858, was at last

decided—insofar as it could lawfully be decided—by the returns as they filtered through from the North on the evening of November 6, 1860.

And the defeated—but still indubitably great opponent of that most fateful political field? I cannot, I feel, do better than to quote from Miss Tarbell's "Life of Lincoln," which, after three score and 5 years, still casts an indefinable charm. Speaking of the inaugural ceremonies on that foreboding March 4, 1861, Miss Tarbell writes:

"A few moments' delay, and the movement from the Senate toward the east front began, the Justices of the Supreme Court, in cap and gown, heading the procession. As soon as the large company was seated on the platform erected on the east portico of the Capitol, Mr. Lincoln arose and advanced to the front, where he was introduced by his friend, Senator Baker, of Oregon. He carried a cane and a little roll—the manuscript of his inaugural address. There was a moment's pause after the introduction, as he vainly looked for a spot where he might place his high silk hat. Stephen A. Douglas, the political antagonist of his whole public life, the man who had pressed his hardest in the campaign of 1860, was seated just behind him. Douglas stepped forward quickly, and took the hat which Mr. Lincoln held helplessly in his hand. 'If I can't be President,' he whispered smilingly to Mrs. Brown, a cousin of Mrs. Lincoln and a member of the President's party, 'I at least can hold his hat.'

" 'Douglas' conduct cannot be overpraised,' wrote the 'Public Man' in his 'Diary.' 'I saw him for a moment in the morning, when he told me that he meant to put himself as prominently forward in the ceremonies as he properly could, and to leave no doubt on any one's mind of his determination to stand by the new administration in the performance of its first great duty to maintain the Union.' "

"Immediately after the firing on Fort Sumter, Douglas accompanied George Ashmun to the White House, at the latter's suggestion, to assure the President of his support. He was cordially received and heard the President read a draft of the proclamation calling for 75,000 volunteers to suppress rebellion. His only criticism was: 'I would make it 200,000.' Otherwise their accord was complete. In the columns of the newspapers next morning Democrats read the President's proclamation and a dispatch (written by Douglas) announcing the determination of Senator Douglas fully to sustain the President in the exercise of all his constitutional functions to preserve the Union. From this time on Douglas was in frequent conference with the President. It was on Lincoln's advice that he left the Capital to rouse the people of the Northwest to the seriousness of the crisis. He spoke twice on the way, both times with obvious emotion, deprecating secession and pleading for the support of the Government at Washington. On April 25, he made a remarkable speech to his own people in the capitol at Springfield. Fifty years later, men who had been his political opponents could not speak of it without emotion. 'I do not think it is possible,' wrote Horace White, 'for a human being to produce a more prodigious effect with spoken words' (Herndon-Weik, Lincoln II, 126–27). His great sonorous voice reverberated through the chamber until it seemed to shake the building, stirring men and women to a frenzy of excitement. In a few weeks that great voice was still. Stricken soon after with typhoid fever, he battled resolutely as ever with this last foe, but succumbed on June 3, 1861, his last words a message to his two boys bidding them to obey the laws and support the Constitution."

Thus did not the least of the sons of Illinois pass over the Great Divide, his last thought—his very last breath—in support of the Union he so dearly and zealously loved.

LINCOLN AND WISCONSIN

Mr. LAIRD. Mr. Speaker, the gentleman from Iowa has done a real service to take the leadership in commemorating the anniversary of President Lincoln's nomination as the first Republican President on May 18, 1860. I would like to add some Wisconsin Lincoln history to our proceedings today.

1. LINCOLN IN THE BLACK HAWK WAR

Mr. Speaker, on April 6, 1832, Black Hawk and his band of Sauk Indians crossed the Mississippi River from Iowa into northern Illinois, angry at the treatment his people had received and intending to start an Indian uprising if he could.

Upon news of the invasion, Gov. John Reynolds, of Illinois, called for volunteers. Abraham Lincoln, then 23 years old and living in New Salem, responded promptly to the appeal, and while serving in the campaign spent some 11 days in southern Wisconsin.

Telling later about his experiences, Lincoln said he served nearly 3 months in the war, met the ordinary hardships of such an expedition, but was in no battle, although he "had a good many bloody struggles with the mosquitoes."

On April 21, 1832, the recruits from New Salem met on a farm 9 miles from the village and formed a company of mounted volunteers with Lincoln as captain. A week later they were mustered into the State service, becoming a part of the 4th Illinois Regiment of Mounted Volunteers. After an excursion into northwestern Illinois, the company was sent to Ottawa on the Illinois River. There on May 26 Lincoln reenlisted for 20 days as a private and a day later transferred to still another company, the Independent Rangers, which company was mustered out on June 16.

Lincoln at once reenlisted for another 30 days in the Independent Spy Corps. On June 22 this company left for northwestern Illinois and began a march up the Rock River in pursuit of Black Hawk's main force.

On July 1, 1832, the army crossed Rock River at Turtle Village—today Beloit, Wis.—the soldiers sleeping on their arms behind log breastworks that night, to be ready for surprise attack. On July 6 the army marched up the east bank of Lake Koshkonong and made camp 4 miles above the mouth of the White Water River. There at General Atkinson's headquarters Lincoln and his comrades in the company were honorably discharged "with the special thanks" of the general on July 10.

Lincoln and a companion returned by horseback and canoe to New Salem, reaching the village soon after July 17.

Numerous stories of Lincoln in the war have been told, most of them without documentation. One is that while captain of the company the men reached a narrow gate. Unable to remember the command for single file, Lincoln ordered them to fall out for 2 minutes and reform on the other side. Another is that when asked if he was afraid of Black Hawk, Lincoln said, "Well, I guess not. I'm no chicken."

The experience did teach Lincoln to appreciate how fighting men thought and felt. In the war he faced danger, often expecting Indian attack at night. He learned what war meant to the common man, and perhaps carried his sympathy for the private soldier into the Civil War.

2. LINCOLN'S SECOND VISIT TO WISCONSIN, SEPTEMBER 30–OCTOBER 2, 1859

Mr. Speaker, on September 30, 1859, Lincoln delivered the annual State fair address in Milwaukee. The State fairgrounds then were located near what is now 13th Street near Wells.

The Milwaukee speech stands as Lincoln's only formal address on the subject of agriculture. It was carefully prepared, as though he fully appreciated its importance in a commanding agricultural State. It reveals Lincoln as one of clear vision on the future of farming; in fact, some of his prophecies now seem amazingly accurate in the light of present technical developments for scientific and less burdensome farming.

The speaker evaluated boldly the respective rights of labor and of capital as he saw them. He was outspoken also in advocating a broad educational policy for his fellow citizens, having particular reference to the need for a blending of schooling and occupational training for workers.

That evening Lincoln spoke extemporaneously at the Newhall House in Milwaukee and the next day, October 1, delivered two antislavery speeches in Rock County—one at Beloit in the afternoon and one at Janesville in the evening. The two local newspapers reported the speeches in the form of editorial reviews, with scarcely a direct quotation from the speaker.

The Beloit Journal—weekly—October 5, 1859, reported that a large crowd and a band met Mr. Lincoln at the station. At 2 o'clock a packed hall heard him introduced by Mr. Bannister, president of the Republican club.

"Then 'Old Abe' commenced the clearest and most conclusive vindication of Republican principles, as well as the most unanswerable demonstration of the fallacy and utter absurdity of the Douglas doctrines, which we ever listened to."

The Beloit address was heard by several prominent Republican leaders of nearby Janesville, including an ardent abolitionist, William H. Tallman, who persuaded Lincoln to ride with him in his carriage to Janesville and deliver an address that evening. Lincoln consented, and after the speech that—Saturday, October 1—night, spent the night, the next day, and the following night at Tallman's house.

The Janesville speech was reported in the Janesville Morning Gazette, October 4:

When Mr. Lincoln made his appearance he was greeted with cheers, and was introduced to the people by Dr. Treat, the president of the Republican club. * * * When he came to make his points tell, and to

drive home his logical conclusions, the evidence of his profound thought was apparent, while his powers of satire and wit flashed out brilliantly, and rather startling the audience by their unexpectedness.

The Tallman house, the only identifiable house in which Lincoln is known to have slept while in Wisconsin, is now a public museum, the headquarters of the Rock County Historical Society.

3. BIRTH OF THE REPUBLICAN PARTY

Mr. Speaker, the Republican Party was born in 1854. There is no dispute as to the year of its formal organization, although debate still goes on as to the exact birthplace. Most historians accept Ripon's claim as the birthplace of Lincoln's party.

The first recorded meeting of "Republicans" was held by a number of Whigs, Free Soilers, and Democrats in the Congregational Church at Ripon on February 28, 1854, at the call of Maj. Alvan E. Bovay, a prominent Whig. A resolution was adopted providing that, if the Kansas-Nebraska bill passed, the existing Ripon party organizations should be abandoned and a new party, to be called the Republican, should be formed.

When the bill did pass the Senate, Major Bovay called a second meeting, which was held on March 20 in the Ripon schoolhouse. By a house-to-house and shop-to-shop canvass, he obtained attendance of 53 voters, out of not more than 100 eligible in the town. The meeting voted to dissolve the local Whig and Free Soil organizations, and a committee of five was appointed to form the new Republican Party.

Many years later Major Bovay said of the schoolhouse meeting:

> We went into the little meeting, Whigs, Free Soilers, and Democrats. We came out of it Republicans, and we were the first Republicans in the Union.

The spring and summer of 1854 saw many other meetings, held under one banner or another, that brought Republican organizations into being in Michigan, Ohio, Iowa, and Maine.

The most notable meeting—notable because it was a formal convention that adopted a platform and nominated a full State ticket—was held "under the oaks" at Jackson, Mich., on July 6, 1854. The convention resolved "that we will cooperate and be known as Republicans until the contest be terminated."

The movement begun in the Ripon church and "under the oaks" at Jackson had changed the political face of the Nation.

The little Ripon schoolhouse, still standing, is labeled "Birthplace of the Republican Party."

4. THE CONVENTION AND ELECTION OF 1860

Mr. Speaker, at the Republican National Convention held in Chicago May 16–18, 1860, the Wisconsin delegation consistently cast its entire 10 votes for William H. Seward on each ballot.

Carl Schurz, one of the delegates and chairman of the Wisconsin delegation, seconded the nomination of Seward and after the nomination of Lincoln by the convention made a brief speech in response to a motion by Mr. Evarts, of New York, that the nomination of Lincoln be made unanimous.

Schurz said, in part:

> The delegates of Wisconsin were instructed to cast their votes unanimously for William H. Seward. * * * We stood by Mr. Seward to the last, and I tell you we stand by him yet, in support of Abraham Lincoln, of Illinois. * * * Again, do we stand by Mr. Seward as we did before, for we know that he will be at the head of our column, joining in the battle cry that unites us now, "Lincoln and victory."

5. CARL SCHURZ AND THE CAMPAIGN OF 1860

Mr. Speaker, from the close of the Wisconsin State convention, March 1, until after the November 6 election, Schurz was almost constantly busied with work for the national cause. On May 30 at the Milwaukee ratification meeting he delivered one of the best of his short speeches, pointing out how the convention had refused to compromise Republican principles. He paid a high tribute to Seward. Then he spoke of Lincoln, using language which must have introduced him most favorably to the millions, especially in the East, who had been taught to look upon the Illinois lawyer as a second- or third-rate man.

After lecturing throughout the country in the summer and fall, Schurz returned to Wisconsin for the last 2 weeks of the campaign. He made numerous speeches in the city and county of Milwaukee and covered, by team, a large share of the great German community near Lake Michigan. The results in Wisconsin, as well as in Indiana, Ohio, St. Louis, and Pennsylvania, spoke of his almost superhuman effort to swing the German vote for Lincoln.

In the election of 1860, Wisconsin cast 86,113 votes—56.6 percent—for Lincoln, 65,021 votes—42.7 percent—for Douglas.

Mr. Speaker, the information I have used today has been collected by the Wisconsin State Historical Society from the following sources: Edward P. Alexander's "Lincoln Comes to Wisconsin;" Publications of the Lincoln Fellowship of Wisconsin, 1943 and 1949; Joseph Schafer's "Carl Schurz."

Mr. CANFIELD. Mr. Speaker, 100 years ago today the Republican Party made one of the wisest decisions in its history. It chose as its presidential nominee a tall, somewhat ungainly man who represented Illinois in our own House of Representatives. We pause in our legislative duties today to pay tribute to the nomination of Abraham Lincoln.

Can words ever describe our feeling for this humble giant of a man? I think they can, Mr. Speaker, for it was Lincoln himself who showed us how powerful, how effective, how moving simple words could be. Of course, it is presumptuous of us to suppose we could say anything to match the classic words of Lincoln; we can only find consolation in the thought that Lincoln was but a man, and his example showed us the heights of wisdom man can attain.

Recall that Lincoln lived before the development of mass communications, that such a thing as a "TV personality" was undreamed of. Yet he was able to bring tears to the eyes of grown men when he spoke, affect an audience so deeply that it could not applaud, unite a Nation divided. He has been called the Shakespeare of politics, and this is entirely fitting.

That his words guide Republicans today is testimony to the enduring quality of his prose. We still hold that "the legitimate object of government is to do for a community of people, whatever they need to have done, but cannot do, at all, or cannot, so well do, for themselves—in their separate and individual capacities."

For the last 20 years I have been privileged to represent in the House of Representatives more than 350,000 fellow residents of New Jersey. They will never know the daily feeling of honor and pride that I have experienced in the knowledge that they have chosen me to speak their will in the same body that once knew Abraham Lincoln as a Member. Yes, the Republicans chose well at their second national convention on May 18, 1860, and Americans everywhere will always applaud their action.

Mr. CUNNINGHAM. Mr. Speaker, I am happy to join with the gentleman from Iowa in this observance of the 100th anniversary of the nomination of Abraham Lincoln to the Presidency.

Mr. Speaker, Nebraska was a territory in 1860 when Abraham Lincoln was nominated for President by the Republican Party. Nebraska was allotted six votes at the Chicago convention. A. S. Paddock, of Fort Calhoun, Nebr., acted as vice president of the convention, each State and Territory having a vice president and secretary. H. P. Hitchcock, of Omaha, acted as secretary from the Nebraska Territory.

Other members of the Nebraska delegation to the convention included O. H. Irish, Nebraska City, a member of the committee on permanent organization; John R. Meredith, Omaha, committee on credentials; Samuel H. Elbert, Plattsmouth, committee on business; A. Sidney Gardner, committee on resolutions, Phineas W. Hitchcock and E. D. Webster, both of Omaha.

Paddock later served as Senator from the State of Nebraska from 1875 through 1881. Members of the Hitchcock family also served the State in high office in later years, Phineas W. Hitchcock being elected a delegate to Congress from the territory to the 39th Congress and serving as Senator from 1871 to 1877. His son, Gilbert M. Hitchcock, was a Representative in Congress in the 58th, 60th and 61st Congresses and served as Senator from Nebraska from 1911 through 1923. He also established the Omaha Evening Herald and purchased the Omaha Morning World, which now exist as the Omaha World-Herald, Omaha's only daily paper. Mr. Hitchcock's widow is now a resident of Washington, D.C.

On this occasion I wish it were possible for me to say that Nebraska's six votes in the 1860 convention were solidly for Lincoln, but that was not the case. In fact only one of Nebraska's votes was cast for Lincoln on the first ballot, with two for Seward, two for Chase, and one for Cameron.

On the third ballot, when Lincoln was nominated, our Nebraska delegates still cast only one vote for Honest Abe. But of course the nomination was made unanimous a few minutes later, after Nebraska and many other delegations had switched their entire vote to Lincoln.

Although Nebraska is the only State to honor Lincoln by naming its capital city after him, he apparently never set foot in our State. In 1859 he came as close as Council Bluffs, Iowa, across the Missouri River from Omaha, and made a speech there. Willian J. Petersen in his book "Lincoln and Iowa" reports:

It attracted a good crowd, even though it was unscheduled, and it elicited conflicting reactions from the Republican and Democratic editors of Council Bluffs. The friendly Nonpareil praised his "masterly and unanswerable speech" and the "dexterity with which he applied the political scalpel to the Democratic carcass." The Weekly Bugle spoke in a derisive vein of Lincoln's effort, but admitted that his defeat by Senator Douglas had "magnified him into quite a lion" at Council Bluffs. Lincoln stayed at the Pacific House on this occasion and made his speech in Concert Hall.

Since this is also the 100th anniversary of the founding of the pony express, it is interesting to note that the pony express carried President Lincoln's first inaugural address across Nebraska. The distance from St. Joseph, Mo., to Denver, Colo., 665 miles, was covered on this historic trip in 69 hours.

Nebraska has long been proud of the fact that it is one of the major railway centers of the continental United States. Without a doubt, it is due to Nebraska's vast railway system that it is now the No. 1 stock market in the world and that it is attracting new industry every day. It was in 1863 that Peter Day, chief engineer of the Union Pacific Railroad, received a telegram in Omaha which announced that President Lincoln had fixed the initial point of the railroad on the "western boundary of the State of Iowa, opposite Omaha."

What is said to be the last signature of President Lincoln appears on the commission reappointing Alvin Saunders of Iowa to be Governor of the Territory of Nebraska. The commission is dated April 13, 1865. Governor Saunders states in a note written in his own hand at the bottom of the document:

The signature of President Lincoln attached to this commission was evidently the last official signature made by him—he signed it before leaving for the theater where he was assassinated, and left the commission on his desk without stopping to fold it, and where it was found when the room was opened after his death. These facts were communicated to me by one of the clerks.

In 1867, shortly after the admission of Nebraska to the Union as a State, it was decided that the capital would not remain in Omaha. Senator J. D. H. Patrick of Omaha moved that the new capital should be named after President Lincoln. The name was promptly approved, and the capital of Nebraska is still named Lincoln in fond memory of that famous President.

The Lincoln Monument stands on the west side of the Nebraska Capitol lawn as an additional tribute to that famous American. It was designed by Daniel Chester French and was completed in 1912. The following description of the statue is found in "Nebraska, a Guide to the Cornhusker State":

Abraham Lincoln is portrayed standing in a meditative pose, with head bowed and hands clasped, before a large granite tablet on which the Gettysburg Address is engraved.

The original model of the statue is in the Lincoln Tomb in Springfield, Ill., while a replica of the statue is to be found in the Chicago Museum of Art.

Mr. REECE of Tennessee. Mr. Speaker, the historic Wigwam Convention, which nominated Abraham Lincoln for the Presidency, assembled in Chicago 100 years ago, May 16, 1860.

Mr. Lawrence Sullivan, coordinator of information for the House of Representatives, has reconstructed that convention from the rich Lincoln Archives in the Library of Congress.

Because that event "opened a new era in our national history," I include Mr. Sullivan's summary of the convention in the proceedings of the CONGRESSIONAL RECORD, together with two brief quotations from Abraham Lincoln in the years 1860 and 1861, expressing his great humility as he left Springfield, Ill., for Washington.

The article and quotations are as follows:

CHICAGO'S FIRST NATIONAL CONVENTION—ABE LINCOLN'S NOMINATION IN THE HISTORIC WIGWAM 100 YEARS AGO THIS WEEK, OPENED A NEW ERA IN HUMAN HISTORY

(By Lawrence Sullivan, Coordinator of Information, U.S. House of Representatives)

The convention which picked Abraham Lincoln as its presidential candidate assembled in Chicago 100 years ago this week. The Republican Party was only 6 years old.

Few participants in that historic convention suspected that their deliberations would lead to the abolition of human slavery in the United States, in less than 4 years.

The convention assembled in the newly constructed Wigwam on Wednesday, May 16, and Lincoln was nominated on Friday, May 18.

Years later the distinguished British historian, Lord Charnwood, described the convention's choice as the "most surprising nomination ever made in America."

The Wigwam, completed only a month before, accommodated almost 10,000 persons. Constructed entirely of rough lumber the magnificant edifice had cost $7,000. The city of Chicago, then less than 30 years old, had reared the Wigwam in a bold bid against mighty New York and stately Philadelphia for its first national political convention. The rugged, blustering West was emerging as the new power center of U.S. politics.

Lincoln did not go to Chicago for the convention, but remained at home in Springfield, close to his family and intimate friends. He had confided to young reporter Henry Villard months earlier that his wife, in 1859, had predicted his election some day to the Presidency of the United States.

"Just think of such a sucker as me as President," Lincoln said laughingly to Villard.

Like many other convention winners through the years, Abe Lincoln never publicly announced himself a candidate for the Presidency. But he did move about the country freely after the celebrated Lincoln-Douglas debates of 1858; and early in 1860 he ventured as far as New England, and to the historic Cooper Union in New York City, for speaking engagements.

Upon his return to Springfield, early in March, he began writing personal letters to prospective convention delegates in Illinois, Indiana, Ohio, Kansas, and Kentucky. On May 12, 4 days before the convention assembled in the Wigwam, two trusted political intimates from Illinois, Jesse K. Dubois and Judge David Davis, were in Chicago "ready" in Lincoln's words, "to confer with friends from other States."

To another friend Lincoln wrote in confidence a few months before the convention, "The taste is in my mouth a little." And to a Chicago banker who had invited him to bed and board during the convention, Lincoln wrote a few days before May 16: "I am a little too much a candidate to stay home and not quite enough a candidate to go."

Murat Halstead, telegraphed to the Cincinnati Commercial May 16, that 25,000 visitors were in Chicago for the convention. The current of the universal twaddle as the convention opened, he added, was "that Old Abe will be the nominee."

Halstead remarked his journalist roommates had been irrepressible to a late hour, and he had caught them playing cards early next morning to determine who would pay for a round of gin cocktails before breakfast.

Horace Greeley, the distinguished New York abolitionist editor, and himself an aspiring darkhorse before convention, was a striking figure in the crowded hubbub of Tremont House, the Republican headquarters hotel.

Lincoln's friends won their first victory in the platform committee, where they were successful in defeating the abolitionists' demand for a total denunciation of slavery. The Lincoln moderates carried the day with a plank ignoring slavery in the original States, but forbidding any extension of slavery into new territories as they might be organized. The platform also called for a railroad to the Pacific Ocean, to be assisted by Federal grants.

The first rollcall for President gave William H. Seward, New York, 173½; Lincoln 102; Edward Bates of Missouri 48; Cameron of Pennsylvania 50½; and Salmon P. Chase of Ohio 49. The total vote was 465, with 233 necessary to nominate.

As the second rollcall began the rumor spread that Pennsylvania's votes for Cameron would swing to Lincoln. The final tally on this rollcall showed Seward 184½; Lincoln 181.

The Seward forces realized they were defeated. They saw now that Lincoln's personal preconvention canvass of the delegates by mail already assured him a vast majority of the 100 scattered votes still to swing to make a nomination.

Early in the third rollcall, word spread through the Wigwam that Lincoln was the man. About midway in the call, Ohio interrupted to switch 4 votes from Chase to Lincoln—sufficient to make the required majority of 233 for Abe. At this juncture, Halstead noted, "there were thousands cheering with the energy of insanity."

New York then moved to make the nomination unanimous.

Lincoln's political genius had found succinct expression in a preconvention letter to an Ohio delegate: "Our policy, then, is to give no offense to others—leave them in a good mood to come to us if they shall be compelled to give up their first love. This, too, is dealing justly with all, and leaving us in a mood to support heartily whoever shall be nominated."

This firm policy of peaceful coexistence with all the "favorite son" candidates at length paid off when Seward, the uncompromising firebrand abolitionist, failed to command a majority on the second ballot.

The 1860 Wigwam convention, in short, demonstrated the prescient wisdom of Lincoln's original position in the 1858 debates with Douglas. "I did not at any time say I was in favor of Negro suffrage. . . . I declared against it." He had frankly admitted a total lack of Federal authority to abolish slavery in the original States, and was inclined personally not to "disturb" existing slave areas, but only to limit the spread of slavery to new territories. In the convention, this proved to be the political middle-ground which finally won the majority from the hardshell abolitionist, Seward.

Carl Sandburg emphasizes that Lincoln and Douglas were so close together in their fear of political sectionalism that several prominent Republicans had suggested Douglas, the Illinois Democratic Senator, reelected in 1858, might make a better Republican presidential nominee than Abe Lincoln in 1860.

In their great debates, both men, in Illinois, had sought to subordinate any question which tended to draw a sharp political line between the North and South. To this end, Lincoln was at pains to make clear he did not insist that Missouri should emancipate her slaves. Questions touching racial equality, intermarriage and such, he dismissed as "false issues."

Douglas likewise ignored all arguments for complete abolition, and agreed with Lincoln on the exclusion of slavery in all new territories. Lincoln demanded this exclusion by congressional enactment, while Douglas would leave the question to popular vote in the new areas as they approached statehood.

Lincoln was in the telegraph office in Springfield when news of the second ballot flashed from Chicago.

"I've got him," he exclaimed as he read the tally showing his own gain of 79 votes, against a gain of only 11 for Seward.

Then Lincoln and his friends moved over to the Journal office to await the third ballot. Soon Mr. Zane, the editor, rushed into the room with the Wigwam decision, calling for three cheers for the next President. Bedlam broke in all Springfield.

When a friend suggested a biography in book form, Lincoln replied, "There is not much in my past life about which to write a book."

After shaking hands all around, Lincoln joined the street crowds outside the Journal, saluting and greeting all who approached him. At length, glancing toward his house he said, "Well, gentlemen, there is a little short woman at our house who is probably more interested in this dispatch than I am; and if you will excuse me, I will take it up and let her see it."

About 6 weeks later, on July 4, Lincoln wrote his old Springfield friend, Dr. A. G. Henry, now in Oregon, to the effect "* * * today it looks as if the Chicago ticket will be elected."

November 6 again confirmed Lincoln's X-ray political judgment. The popular vote stood: Lincoln 1,866,452, Douglas 1,375,157, Breckinridge 847,953, Bell 589,581.

The electoral vote: Lincoln 180 (18 States), Breckinridge 72 (11 States), Bell 39 (3 States), Douglas 12 (1 State).

Had the Lincoln opposition got together on a fusion ticket, the results would have been different only in New Jersey, California, and Oregon, for a total of 11 electoral votes. Lincoln still would have won with 169, a clear majority in his own right.

That's how things went a hundred summers ago.

LINCOLN'S POSITION ON SLAVERY

Wrong as we think slavery is, we can yet afford to let it alone where it is, because that much is due to the necessity arising from its actual presence in the Nation; but can we, while our votes will prevent it, allow it to spread into the national territories, and to overrun us here in these free States? (Cooper Union, N.Y., February 27, 1860.)

LINCOLN'S FAREWELL TO SPRINGFIELD FRIENDS, FEBRUARY 11, 1861, AT THE RAILROAD STATION AS HE LEFT FOR WASHINGTON

My friends: No one, not in my situation, can appreciate my feelings of sadness at this parting. To this place, and the kindness of these people, I owe everything. Here I have lived a quarter of a century, and have passed from a young to an old man. Here my children have been born, and one is buried. I now leave, not knowing when or whether ever I may return, with a task before me greater than that which rested upon Washington. Without the assistance of that Divine Being who ever attended him, I cannot succeed. With that assistance, I cannot fail. Trusting in Him who can go with me, and remain with you, and be everywhere for good, let us confidently hope that all yet will be well. To His care commending you, as I hope in your prayers you will commend me, I bid you an affectionate farewell.

Mr. ARENDS. Mr. Speaker, I cannot allow this anniversary day to pass without my boasting of the fact that Abraham Lincoln was nominated to the Presidency in Chicago, Ill., as the son of my home State of Illinois.

To be sure, Kentucky has its claim. That is where he was born. And Indiana has its claim. That is where he was raised as a boy. But it was in Illinois that he rose to greatness.

It is with pride that we make these special claims. At the same time, we recognize that Lincoln does not belong to any one State. He belongs to all Americans. He belongs to the ages.

Chicago was impressed with its responsibilities as the host for the nomination convention in May of 1860. They erected a special building for the occasion at the southeast corner of Lake and Market Streets. It was called the Wigwam. It was characteristized at that time as a "gigantic structure, the largest audience room in the United States."

An advertisement in the Chicago Tribune urged citizens to donate all the chairs they could spare for the gallery. It is an interesting fact that to get into this gallery for the convention gentlemen had to be accompanied by ladies.

The Chicago Tribune reported that this rule for gallery admission led to many curious bargains. Schoolgirls were urged to accept a quarter or half dollar to escort a gentleman to the gallery. Some of the enterprising girls found they could make considerable pocket money by entering different doors with different gentlemen.

Although women did not have a vote in those days, they demonstrated their party loyalty by tastefully decorating the convention hall. And so, from the very day of the foundation of our Republican Party women have played a part in our party's activities. Today they play a part beyond measure.

All this is Americana, never to be forgotten. In reviewing the life of Abraham Lincoln we are constantly inspired. His words and deeds show us the way in our efforts to serve our beloved country.

Mr. SMITH of Kansas. Mr. Speaker, many Kansans are aware of the effect Lincoln had on the controversy over whether Kansas should come into the Union as a Free or Slave State.

The Kansas-Nebraska bill was the basis of the famous Douglas-Lincoln debates in their campaign for Senator from Illinois. Douglas, the Democrat, won. Douglas became the leader of the northern Democrats in the Senate. The chief political issues that were fomenting in the 14 years period just prior to the Civil War was an attempt on the part of the Old Whigs and northern Democrats to chart their course through the political seas so as to avoid the rocks of discord caused by the slavery question. The alinements of some of the political leaders in various States were constantly shifting from Whig to Democrat and from Democrat to Whig.

Both of these parties took no positive stand on the slavery question. Lincoln, in his debates with Douglas, strongly indicated the necessity for a positive position on slavery when he said:

> This Nation cannot survive half slave and half free.

This statement was the harbinger of a new party.

Throughout the New England States the tide was rising for a more positive stand on the question of slavery. The start was made at Ripon, Wis., in 1854, to organize a new party which would take a definite stand on slavery. This new party—Republican—strongly offered the Kansas-Nebraska Act, which would leave it to the settlers whether Kansas and Nebraska would be slave or free. In 1856, Lincoln supported John C. Fremont, Republican candidate for President, making some 56 speeches in his behalf. Buchanan, the Democrat, was elected. Lincoln returned to his law practice in Springfield, Ill.

The Republican Party was kept alive over the question of slavery. The moneyed and illustrious-named American key people needed to keep the new party functioning were to be found in the eastern part of the United States. Chief among them were William K. Seward, of New York. Seward became the chief spokesman for this newly organized party. He and his friends, during the years of 1858–59, were constantly on the alert and formulated plans to name the Republican nominee for 1860.

Lincoln—at the insistence of his midwestern friends—was also active. It is common knowledge that Lincoln came to Kansas in 1859 at the insistence of his Kansas friends, in order to build him up to be the Republican nominee. Lincoln was received enthusiastically wherever he stopped and spoke. He was promised by his warm admirers the Kansas votes at the coming Republican Convention in Chicago.

But then, as now, there is many a slip between "cup and lip."

Herewith is a letter from the Ewing collection manuscripts from the Kansas State Historical Society. This letter was written by Thomas Ewing, Jr. It explains the feeling that existed in

Kansas. They wanted positive action and Seward seemed to have the qualifications demanded.

Here is the letter:

LEAVENWORTH, KANS., *May 6, 1860.*

Hon. ABRAHAM LINCOLN,
Springfield, Wis.

DEAR SIR: You will probably have observed that the Kansas delegation to Chicago were instructed by the convention by which they were selected to cast their votes (if they should have any) for Mr. Seward, and that Mr. Wilder, who is for Mr. Seward from choice, was chosen as the delegate from Leavenworth, over Colonel Delahay who was understood to be strongly in favor of your nomination. I have desired that you should know how both those things happened—and as I cannot be at Chicago, where I had expected to talk the matters over with you or with some of your personal friends, I shall take the liberty explaining them to you directly by letter.

Here as nearly everywhere in the North, Mr. Seward has more ardent, zealous and earnest admirers than any other candidate—and they are in the radical wing of the party which has possession of nearly all the presses, and controls all the minor conventions and less important movements of the party. As it was by no means certain that the Kansas delegates would be accorded seats in the national convention, or the right to vote, the great majority of the party took no interest in the movement, and the meetings called to appoint delegates to the Territorial convention were scarcely attended at all except by the managers. In that convention no interest was taken in any subjects except in selecting the delegates, three of whom are first for Mr. Seward from choice, but all of whom regard you as a highly acceptable and available candidate. The convention selected men who had done good service for the party and received no honor or reward and who well merited the compliment of an appointment, none of whom were selected with reference to their preferences among the gentlemen named for the Chicago nomination.

In the apportionment Leavenworth was accorded but one delegate, Wilder, who has done a great deal of hard work for the party here, had announced himself as a candidate for the place more than a year ago, and the place had been accorded to him without dissent, until the time for selecting delegates to the Territorial convention was near at hand. Colonel Delahay then, feeling assured that the great majority of the Republicans of Leavenworth favored your nomination, became a candidate in opposition to Wilder. The colonel was on all hands regarded as one of our best men and as representing truly the preferences of the majority of our Republicans, but he had just had one of the best offices of our poor Territory. Wilder had worked as hard, had held no office, and had all along been accorded this place, and as he had a big start, and the most money, the colonel could not make the race against him.

Our delegation at Chicago will, in perseverance of instructions, if given a vote, cast it for Mr. Seward. Three of them will adhere to him pretty tenaciously. Mr. Seward and Chase dropped, I think you would be the next choice of every man in the delegation.

Yours very truly,

THOMAS EWING, Jr.

In the three ballots necessary to nominate Lincoln Kansas regularly cast its six votes for Seward. Kansas Republicans joined the Lincoln parade too late to do much good except to have their final votes recast with the winner.

Mr. SILER. Mr. Speaker, I am pleased to join with the gentleman from Iowa in commemorating this 100th anniversary of the nomination of Abraham Lincoln to the Presidency of the United States, and include herewith material abstracted from "Caucuses of 1860: A History of the National Political Conventions of the Current Presidential Campaign," by M. Halstead:

THE CHICAGO CONVENTION, MAY 15

The crowd is this evening becoming prodigious. The Tremont House is so crammed that it is with much difficulty people get about in it from one room to another. Near 1,500 people will sleep in it tonight.

The Bates movement, the McLean movement, the Cameron movement, the Banks movement, are all nowhere. They have gone down like lead in the mighty waters. "Old Abe" and "Old Ben" are in the field against Seward. Abe and Ben are representatives of the conservatism, the respectability, the availability, and all that sort of thing.

First day—Official roll of the convention

Kentucky, 12 votes:

At large: Geo. D. Blakey, Russellville; A. A. Burton, Lancaster; Wm. D. Gallagher, Pewee Valley; Charles Hendley, Newport.

Districts:

1. Abner Williams, Covington; H. G. Otis, Louisville.

2. Fred Frische, Louisville; E. H. Harrison, McKee.

3. Joseph Glazebrook, Glasgow; Jos. W. Calvert, Bowling Green.

4. John J. Hawes, Louisville.

5. H. D. Hawes, Louisville; Lewis M. Dembitz, Louisville.

6. Curtis Knight, Kingston; Joseph Rawlings, White Hall.

7. A. H. Meriwether, Louisville; Henry D. Hawes, Louisville.

8. H. B. Groaddus, Ashland; L. Marston, Millersburg.

9. Edgard Needham, Louisville; J. S. Davis.

10. Jas. R. Whittemore, Newport; Hamilton Cummings, Covington.

A Committee on Permanent Organization was constituted as follows: [List given.] Kentucky, Allen J. Bristow.

A DELEGATE FROM KENTUCKY. Mr. President, I would suggest that the name of all the States be called. [Applause.]

The CHAIR. Tennessee, Arkansas, Mississippi [great laughter], Louisiana, Alabama [laughter and hissing], Georgia, South Carolina [laughter], North Carolina [feeble hisses and much laughter]. I believe that includes the names of all the States.

The Committee on Credentials was made up as follows: [List given.] Kentucky, Charles Hendley.

The committee on business was constituted as follows: [List given], Kentucky, Louis M. Dembitz.

The convention had proceeded thus far with its business, when a communication, inviting the convention to take an excursion on the lake, was received and accepted, and then indefinitely debated, much time being frittered away.

The committee on resolutions was appointed: [List given], Kentucky, George D. Blakey.

The favorite word in the convention is "solemn." Everything is solemn. In Charleston the favorite was "crisis." Here there is something every 10 minutes found to be solemn.

A new ticket is talked of here tonight, and an informal meeting held in this house since I have been writing this letter, has given it an impetus. It is "Lincoln and Hickman." This is now the ticket as against Seward and "Cash" Clay, of Kentucky.

Second day, Republican Wigwam, Chicago, May 17, 1860

The convention was proceeding into battle. War then took place about credentials. A great deal of speechmaking followed. David Wilmot made an attack on delegations from slave States that had no constituencies. The next thing was a speech from Dr. Blakesly, of Kentucky, who mentioned that Kentucky had voted for Wilmot for Vice President in 1856, in the Philadelphia convention. He inquired whether he could be forgiven for that sin? Cries of "yes," and he sat down. First knockdown blow for old Kentucky.

Third day

First ballot:

Kentucky: Seward, 5; Lincoln, 6; Wade, 2; McLean, 1; Chase, 8; Sumner, 1. The leading contenders were William H. Seward, of New York, 173½; Abraham Lincoln, of Illinois, 102.

Second ballot:

Kentucky: Seward, 7; Lincoln, 9; Chase, 6.

Result of second ballot of the leading men: Seward 184½; Lincoln 181. Cassius M. Clay, of Kentucky, received 2 votes.

Third ballot:

Kentucky: Seward, 6; Chase, 4; Lincoln, 13.

While this ballot was taken amid excitement that tested the nerves, the fatal defection from Seward in New England still further appeared. The number of votes necessary to a choice were 233, and I saw under my pencil as the Lincoln column was completed, the figures 231½—one vote and a half to give him the nomination. In about 10 ticks of a watch, Catter, of Ohio, was up. Every eye was on Catter. He said: "I rise, Mr. Chairman, to announce the change of four votes of Ohio from Mr. Chase to Mr. Lincoln." The deed was done. There was a moment of silence. Then, there were thousands cheering with the energy of insanity.

One of the secretaries, with a tally sheet in his hands, shouted, "Fire the salute. Abe Lincoln is nominated." As the cheering inside the Wigwam subsided, we could hear that outside, then the thunder of the salute rose above the din.

Ten States and the District of Columbia insisted upon casting unanimous votes for Old Abe before the vote was declared. One of the States was Kentucky.

During the dinner recess a caucus of the presidents of delegations was held. After dinner we had the last act in the drama.

The nomination for Vice President was not particularly exciting. Cassius M. Clay was the only competitor of Hamlin, who made any show in the race; and the outside pressure was for him. At one time a thousand voices called, "Clay, Clay" to the convention. If the multitude could have had their way, Mr. Clay would have been put on the ticket by acclamation.

First ballot for Vice President: The two leading contenders were Hamlin 194 votes; Cassius M. Clay, of Kentucky, 101½ votes. Kentucky cast 23 votes for Clay.

Second ballot: Hamlin 367 votes; Clay 86. Kentucky cast 23 votes for Clay.

Now that the business of the convention was transacted, we had the usual stump speeches, and complimentary resolutions, and the valedictory from the chairman, and the "three times three" upon adjournment for the candidate.

The city was wild with delight. The "Old Abe" men formed processions, and bore rails through the streets. A hundred guns were fired from the top of the Tremont House.

Mrs. ST. GEORGE. Mr. Speaker, on this day, when we are looking back 100 years to the nomination of President Lincoln, I would like, Mr. Speaker, to speak about another, who also played a great part in that era, and who also

was a candidate for the high office of President 100 years ago.

He was passed over for a far greater man, but William H. Seward was a great man in his own right and would probably be remembered more today had his career not been overshadowed by the man whom many consider the greatest and first American President. Lincoln was a true product of our own country; he was born well after the colonial times. In this he was different from the Founding Fathers, and for this reason his influence was altogether different from theirs.

Lincoln had the supreme gift of a great administrator, he knew how to choose the right man for the job he wanted to fill. This he did, regardless of personality or past differences.

He chose William H. Seward and surely never regretted that choice.

Seward was born in Florida, Orange County, N.Y., 1801. He graduated from Union College at 19.

He taught school in Savanah, Ga., to help defray his expenses and was admitted to the bar at Utica, N.Y., in 1822, at the age of 21. He then moved to Auburn, N.Y., where he made his home and entered upon the practice of law. He entered politics as a National Republican, a party whose only title to fame seems to have been that it was anti-Masonic. This party's life was of short duration, roughly 6 years, and Seward then changed his allegiance to the Whigs.

He received the Whig endorsement for Governor and was elected in 1838 and served for two terms, having come back after being defeated by one William L. Marcy. Seward, as Governor, favored public works and a liberal spending of public money, although the State was financially embarrassed at the time he took over the reins of government.

Seward was at heart a liberal and somewhat of a trailblazer. He was an early political opponent of slavery, but never a follower of such men as Garrison who devoted themselves to moral agitation.

After his second term Seward retired from public office and distinguished himself as a lawyer in his hometown of Auburn.

When the Whigs came back into power in 1849, for a brief period, they nominated and sent William H. Seward to the U.S. Senate. It can be truly said in this case that the office sought him; he did not seek the office. In his first prepared speech in the Senate he made the rather startling statement, and I quote: "There is a higher law than the Constitution." He was violently attacked by the Democrats for his statement and immediately tried to temporize and explain it away. This seems to have been one of the keys to his character. He believed supremely in compromise, and to use a modern term, never going beyond what the traffic, in this case public opinion, would bear. He also stated at this time:

An irrepressible conflict between opposing and enduring forces, means that the United States must and will, sooner or later, become entirely a slave-owning Nation or entirely a free-labor Nation.

This statement he also tried to retract after a storm of protest broke over his head.

By 1854 it became evident that the Whig Party was moribund and Seward worked energetically and successfully to bring the remnants together into the newly emerged Republican Party.

Many expected that he would receive the nomination of this new party that he had done so much to create, but the party passed him over twice, for Fremont in 1856 and Lincoln in 1860.

Lincoln immediately appointed Seward Secretary of State. Although it seems hard to realize today, most of the Cabinet and many of the people considered the new President as somewhat of a nonentity and looked to Mr. Seward for guidance through the very difficult times ahead. Seward felt much the same, not out of vanity, but simply because he felt that his experience as Governor of New York and in the U.S. Senate fitted him for the arduous days ahead.

Seward felt strongly that the Union could be saved without a war between the States. He even had a fantastic idea of provoking a foreign war to unite the country and save the Union. Here President Lincoln stepped in and proved to all that he was indeed the helmsman of the Ship of State. The very first one to acknowledge and follow the President's leadership was William H. Seward.

Seward remained on as Secretary of State after the death of President Lincoln. He himself was attacked in his home by a fellow conspirator of John Wilkes Booth at the same time that the President was assassinated. Mrs. Seward died as a result of the shock and his son and two others who came to his assistance were wounded by the assassin.

Seward was an interesting character. He probably had more of the characteristics of a diplomat than any of the politicians of our country. He was a great believer in the adage that: He who fights and runs away will live to fight another day. This is, of course, the basis of true diplomacy.

Seward had visions, sometimes quite fantastic ones, but he was always willing to listen to reason and give up anything as impossible, for instance, as the consolidation of the Union through a foreign war. This faculty for broad and far-reaching undertakings is probably best exemplified by his purchase of Alaska from Russia for $7,200,000. This was long known, in fact still is in some quarters, as Seward's folly.

So here, once more at a crucial time in the history of the country, we had a man in high place, willing to give his life and talents to his country and his loyal devotion to his President without any personal ambition whatsoever.

As long as our country produces such men she will be great and we will be free.

Mr. DAGUE. Mr. Speaker, the centennial anniversary of the nomination of Abraham Lincoln in the Wigwam at Chicago on May 18, 1860, will undoubtedly produce claims from many sections of the country that a certain State or locality had much to do with the selection of our first Republican President. In this connection it is not my inclination to belittle any such claims, but rather to reemphasize the important part played by the Keystone State delegation to that fateful convention when the Nation's future was in such precarious balance.

Two of the leading candidates were William H. Seward, of New York, and Simon Cameron, of Pennsylvania, both of whom were considered as "shoo-ins" by their respective delegations. Seward, however, was handicapped by the vigorous opposition of Horace Greeley who wielded a powerful influence across the Nation and also by the flat statement by Gov. Andrew Curtin, of Pennsylvania, who predicted a 50,000 Republican majority from his State but not if Seward was the candidate. At this juncture Cameron, who was guaranteed Pennsylvania's 56 votes on the first ballot, plainly indicated that he was more interested in being appointed Secretary of the Treasury and promised his delegates to Lincoln on the first ballot if he was assured of that post. From then on, despite Lincoln's refusal to be bound by any deals, Pennsylvania was in the thick of it on the Emancipator's side and joined in the jubilation when he was nominated on the third ballot.

My primary purpose, however, of injecting myself into this discussion of the political maneuvering leading up to Lincoln's nomination, is to bring forth for the record the part Chester County, Pa., my home county, had in preparing the way for the solid support Lincoln received from Pennsylvania shortly after that State's delegation arrived in Chicago in that fateful month of May 100 years ago. In 1955 the Republican County Committee of Chester County celebrated its 100th anniversary and on that occasion published its anniversary booklet from which the following article is taken:

LINCOLN AND CHESTER COUNTY

(By Priscilla Lewis Cox Southwell)

This is an old county one of the original three first formed under William Penn. West Chester is an old town too. Yet few will take note as they pass of the historic buildings and distinguished landmarks where so many county leaders lived, where so much of our county future was shaped.

At 28 West Market Street were made decisions that affected the Republican Party here and in the Nation too. The modest brick building 100 years ago contained two offices from which Abraham Lincoln was started on his way to become the first Republican President.

Two men had offices there and were joined in a common political aim—to give to the lawyer from Illinois enough recognition in the East to secure his nomination for President in 1860.

Joseph J. Lewis, a well-known lawyer, and Samuel Downing, a printer and publisher, were both at 14 East Market Street (since renumbered 28 West). Joseph J. Lewis was born in Westtown in 1801, burgess of West Chester for 5 years, delegate to the Harrisburg Convention of 1832 where the Whig Party was formed, and provost of the law department of Lincoln University. He was active in a period where political concepts and governmental control were fluctuating, a

half-century in American history where the lines were being drawn between what constitutes the two major political parties today.

One of his most famous cases was the defense of Casper Hanway, tried for treason. He had tried to prevent a Maryland slaveowner from recapturing a runaway slave. The Maryland man was killed, and Casper Hanway brought to trial. Joseph J. Lewis defended him and secured his acquittal.

About the same time in West Chester Samuel Downing was publishing the Chester County Times, a newspaper later absorbed by the American Republican. It was known for its abolitionist sentiments. Hence it is logical that these two men came together with kindred feelings about the threat of slaveholding in new States.

This feeling between the slave States and the free really prompted the formation of the Republican Party and in a sense drew the lines between the North and the solid South. The Democratic Party became allied with interests seeking to extend slaveowning, the Republican with those who wished for freedom in new States as they entered the Union.

In Chester County such beliefs appealed to a citizenry whose ancestors were largely Quaker, innately respecting the individual man. There had long been an underground railroad in the country, with stations in West Chester, Longwood, Willistown, and Uwchland, to name a few.

So here on Market Street were two men who sympathized with all the speeches being made by Abraham Lincoln out in Illinois. How they came to publish his autobiography introduces another Chester Countian.

In Toughkenamon, New Garden township, in 1808 was born Jesse W. Fell. He went west in 1828, to Illinois in 1833. When Lincoln was in the State legislature from Sangamon County, Ill., he and Jesse W. Fell lived in the same boardinghouse. They became friends, and the Lincoln-Douglas debates were undertaken at the urging of Jesse W. Fell.

In 1858 Fell began to think of Lincoln in terms of the Presidency. He had an essential humility which appealed to people, and his efforts on the slavery question were making him prominent and popular in the Midwest.

Then Jesse W. Fell remembered his own native State of Pennsylvania. He knew the weight that it carried in choosing the candidate for Presidency and was convinced that if Lincoln could become well known in the East, the Pennsylvania delegation with those in Illinois and Indiana would insure his nomination, regardless of any favorite son backed by the New York delegates. At that time New York and Pennsylvania had the most delegates at the nominating convention.

In Bloomington, Ill., a newspaper was also being edited by another Lincoln admirer, Edward J. Lewis, brother of Chester County's Joseph J. Lewis. Here originated the connection between Lincoln and this county. For Lincoln was persuaded to write a brief autobiography to be sent back to Joseph J. Lewis here.

Brief it was, only three pages in his own handwriting, of which, he said with characteristic and cadenced simplicity:

"There is not much of it, for the reason, I suppose, that there is not much of me."

These three pages are now in the Library of Congress, and a photostat copy in the Chester County Historical Society. When Joseph J. Lewis received this short autobiography, it constituted all that was known of Lincoln's life. For many years even Lincoln himself did not realize that his ancestors had lived near Morgantown, Pa., before they migrated to Kentucky.

Out of these simple pages Joseph J. Lewis reworked the first biography of Lincoln. Samuel Downing, his friend and associate, printed it. Almost at once it was reprinted in the New York Tribune and Chicago Press and Tribune, then in many other papers over the country. To this national recognition has been attributed Lincoln's nomination in 1860.

All this originated in the building that stands quietly on West Market Street, where today our Republican Representative PAUL B. DAGUE and the Republican County Committee, with C. Gilbert Hazlett as chairman, have their offices—where nearly 100 years ago two Republicans helped to start Abraham Lincoln on his way to become the first Republican President of the United States.

In commenting on Mrs. Southwell's article I have only one or two things to add. First, it might be mentioned that Lincoln's great-grandfather, Mordecai Lincoln, once worked at a forge in northern Chester County. Also it seems appropriate to call attention to the fact that the Jesse W. Fell who is reported as having played such an important part in the Lincoln buildup is an ancestor of former Gov. Adlai Stevenson, a fact that only emphasizes how so many otherwise brilliant people slip away from their conservative moorings. That my office was located for some 10 years at 28 West Market Street, West Chester, the scene of much political activity in the last century as well as in this, has no particular significance.

Mr. WALLHAUSER. Mr. Speaker, today we are privileged to celebrate a momentous anniversary in the history of our Nation. It is the 100th anniversary of the nomination of Abraham Lincoln as the Republican candidate for the Presidency of the United States of America.

In paying tribute to the memory of this great and beloved man, who gave so much to our country, I would like to emphasize three expressions of philosophy by President Lincoln which appear to me to have a strong bearing on present-day events.

They are:

First. On government:

In all that the people can individually do as well for themselves, government ought not to interfere. * * * In leaving the people's business in their hands, we cannot be wrong.

The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all or cannot so well do for themselves in their separate and individual capacities.

Second. On liberty and security:

It has long been a grave question whether any government, not too strong for the liberties of its people, can be strong enough to maintain its own existence in great emergencies.

Those who deny freedom to others deserve it not for themselves and, under a just God, cannot long retain it. * * *

If there is anything which it is the duty of the whole people to never entrust to any hands but their own, that thing is the preservation and perpetuity of their own liberties and institutions.

Third. Peace and war:

The man does not live who is more devoted to peace than I am. None who would do more to preserve it. But it may be necessary to put the foot down firmly.

ONE HUNDREDTH ANNIVERSARY OF THE NOMINATION OF ABRAHAM LINCOLN

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, 100 years ago today, Abraham Lincoln was nominated for the Presidency. In the same year, 1860, he was elected the first President of the newly established Republican Party. He and his Vice President Hannibal Hamlin of Maine carried forward a program based on unity, progress, individual rights, and liberties. So vital have these principles appeared to the citizenry that of the 18 Presidents we have had since 1860, only 4 have been Democrats.

Few men in history have kept their courage so high through one failure after another as did Mr. Lincoln. A deeply religious man he never faltered once he had set his course. His consistent faith in the wisdom and understanding of the Eternal Father of all mankind gave him an inner strength, a balance, a steadiness which carried him through what to many seemed insuperable difficulties.

With it all he was a man of delightful humor, of great human understanding, simple in his own desires, gentle in his ways. It was said of him that wherever he went he took light with him. Once roused he was like a flame, but his objections were based upon fundamental principles that to him were the foundation stones of our whole way of life.

We do well, Mr. Speaker, to pause for a moment on the 100th anniversary of the nomination of one of the great men of history who served this country through a period of great darkness as its President and who gave his life in that service. Of Abraham Lincoln it can be said that he truly demonstrated that leadership is "just wisdom and courage and a great carelessness of self."

Let me leave with you a few lines written by James Thompson McKay known to us as "Lincoln's Burial or the Cenotaph":

And so they buried Lincoln? Strange and vain!
Has any creature thought of Lincoln hid
In any vault, neath any coffin-lid,
In all the years since that wild spring of pain?
'Tis false—he never in the grave hath lain.
You could not bury him although you slid
Upon his clay the Cheops Pyramid,
Or heaped it with the Rocky Mountain chain.
They slew themselves; they but set Lincoln free.
In all the earth his great heart beats as strong,
Shall beat while pulses throb to chivalry
And burn with hate of tyranny and wrong.
Whoever will may find him, anywhere
Save in the tomb. Not there—he is not there!

CALENDAR WEDNESDAY

The SPEAKER pro tempore (Mr. BASS of Tennessee). Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 5 minutes.

Mr. BAILEY. Mr. Speaker, the use of Calendar Wednesday procedures is orderly, and in line with long-established rules of the House.

In 1949, the so-called 21-day rule was enacted. A year later, the late Representative E. E. Cox, of Georgia, offered House Resolution 133 to repeal the 21-day rule. On January 20, 1950, it was debated. During the debate the following statements were offered in support:

Representative James Wadsworth, of New York. Two hundred and eighteen Members could take a bill away from us by signing a petition; and if we would only use Calendar Wednesday, the standing committees would have Wednesdays to call up bills which they have reported and which are upon the calendar.

Representative Christian A. Herter, of Massachusetts. I think we should go back to our orderly procedure, and then on Calendar Wednesday allow the committee chairmen to bring up bills that they may not have gotten a rule on from the Committee on Rules.

Representative JOSEPH W. MARTIN, Jr., of Massachusetts (then the distinguished minority leader). The adoption of this rule will not prevent legislation from coming to the floor. Through the vehicle of Calendar Wednesday, any committee can instruct its chairman to call up legislation. The will of the majority of the House cannot be refused.

On January 3, 1951, at the beginning of the 82d Congress, the late Representative Adolph Sabath, the then chairman of the Committee on Rules, called up House Resolution 7, which reenacted the rules of the 81st Congress. Judge Cox of Georgia proposed a substitute which went back to the rules prevailing before the 81st Congress and repealed the 21-day rule.

Once again the principal arguments in favor of repealing the 21-day rule were the citations of the discharge petition and Calendar Wednesday. The theme of the proponents of repeal was to return to orderly procedure. Some of the distinguished Members who spoke to these points were:

Representative LEO ALLEN, then as now the ranking minority member of the Committee on Rules, who said:

There are two ways that the membership of this House can get bills to the floor for final determination. You have the right to sign the discharge petition, which takes effect when 218 names appear thereon, and on Calendar Wednesday you also have the right to be recognized, so the Rules Committee does not have absolute power on any bills.

Representative Herter, now the Secretary of State in President Eisenhower's cabinet:

We have had in the rules of the House for many, many years a provision known as Calendar Wednesday. Why not return to what was an orderly method of procedure?

Representative Carl Curtis, of Nebraska said:

The notion that the Rules Committee can thwart the will of the majority is without foundation of fact. A petition signed by a bare majority can bring a bill to the floor. In addition * * * we have Calendar Wednesday. * * * A vote against the Sabath proposal and in favor of the Cox proposal * * * is a vote for orderly procedure.

Representative CLARENCE BROWN, then as now, a member of the Rules Committee, said:

In addition to that (the discharge petition) there was and is a provision in the rules establishing Calendar Wednesday * * * on which day the roll of the legislative committees are called and, if a majority of any committee wants to bring up any bill, it can do so when that committee is called.

COLLAPSE OF THE SUMMIT CONFERENCE UNDERSCORES NEED FOR A NEW AIRCRAFT CARRIER

The SPEAKER pro tempore (Mr. BASS of Tennessee). Under previous order of the House, the gentleman from New York [Mr. STRATTON] is recognized for 15 minutes.

Mr. STRATTON. Mr. Speaker, the sobering news from Paris this afternoon that the summit conference on which so many of the hopes of the world had been focused has now broken up without ever getting started is a tragic development that has shocked and disturbed every Member of this House. I know we all deplore the outrageous performance of the Soviet Premier and deeply resent his disgraceful efforts to humiliate the President of the United States. In this critical hour I know we all stand with Mr. Eisenhower regardless of our own politics and completely repudiate the efforts of the Soviet dictator not only to interfere in our own domestic political elections, but also to drive a wedge between the United States and our free world allies. The President was completely right, of course, in not backing down at Paris and in not groveling in the dirt as Mr. Khrushchev said he must do. Indeed, when the day ever comes—and I know it never will come—that an American President has to grovel in the dirt before anybody, then this country is certainly at an end.

But, Mr. Speaker, while we stand together with the President it is also perfectly obvious that the disaster at Paris has altered almost overnight the whole world strategic and political situation.

We face a different world today than we faced just 2 weeks ago. And as Members of this House we must recognize the full extent of this shift and must move swiftly to deal with it. From here out the going gets tougher. From here out the true nature of the bitter struggle between communism and freedom will become more clearly apparent than it has been in the past several months.

Mr. Khrushchev thought he could lull us into sleep. He thought he could "con" our leaders, to use a vernacular phrase, into letting down their guard. He thought we would be willing to do almost anything to get peace. And when he found that this was not going to be the case after all, he blew his top, as we have just witnessed at Paris, and now has shifted crudely to a rougher, tougher line, but a line which is certainly familiar enough coming from the Kremlin, and a line which is directed to the same old Communist objective of world domination with the same old ruthless determination and energy.

It will be just a matter of time, Mr. Speaker, before the Russians put the squeeze on Berlin. We must be ready for that. And it will be just a matter of time before they put the squeeze on our other allies, too, from whose shores our worldwide military forces are presently operating. In fact, they are already putting on the squeeze, and have been since the shooting down of that U–2 aircraft.

The initial Russian attack has been aimed at Pakistan, at Norway, and at Turkey, with our other bases also coming under increasing attack.

The Governments of Japan, Norway, and Pakistan are relatively stable. We hope they will successfully weather these threats. But there is no question that the Japanese Socialist opposition will make the most of the U–2 incident in an attempt to wreck the proposed Japanese-United States mutual defense treaty, scheduled shortly for Diet debate and passage. And it is to be hoped that the rather shaky and crisis-wracked nations of Iran and Turkey will be able to withstand these latest Russian exercises in ballistic rocket blackmail.

Speaking recently at a National Day celebration at the Czechoslovak Embassy, Mr. Khrushchev warned that Soviet rockets would be used to retaliate against bases in any country that permitted U.S. planes to take off on intelligence missions over the Soviet Union.

It is conceivable, Mr. Speaker, that the Russian effort to squeeze us out of our oversea bases could be partially successful. Our Africa Moroccan airbases have already been written off. Those in Libya and Saudi Arabia are none too secure.

And the loss of any further Mediterranean, Middle East, Scandinavian, southeast Asia, or Far Eastern bases would certainly have very profound strategic consequences on our own defense structure as well as on NATO itself.

If the Quemoy-Lebanon crises of 1958 proved no further thing it showed how absolutely essential seagoing, mobile air bases are in any crises situations that may develop, from police actions to limited war or even total war.

The modern, mobile *Forrestal* attack carrier with its 100-plus aircraft can operate upon the vast ocean expanse, completely independent of any foreign land bases. Aircraft carriers operate in international waters and establish American sovereignty over that constantly changing patch of sea in which they operate. They are sovereign mobile bases of the United States. They are under tight supervision and control of our Navy. They operate without infringing upon the sovereignty of allied or neutral nations. They are not susceptible to the "zeroing in" of Khrushchev's rockets. They do not endanger the United States or our allies and friends.

Foresight is much rarer than hindsight, but it takes no great foresight to visualize a day—perhaps not too far in the future—when many of our present

fixed bases on foreign soil can be effectively neutralized either by Russian rockets or by their diplomatic and economic threats.

Surely we in Congress must act now to see that this great country of ours is never forced to defend itself without either fixed foreign bases or mobile floating bases.

And so, Mr. Speaker, as Mr. Khrushchev rattles his rockets so blatantly today across the seas there can be no more appropriate answer, in my judgment, than for the Members of this Congress to authorize construction of the new Navy carrier which the Defense Department has requested and which his actions have now made so necessary to our overall national defense in the difficult days that lie ahead.

GENERAL LEAVE TO EXTEND REMARKS

Mr. KASEM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the bill, H.R. 5, which was passed today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DOYLE, indefinitely, on account of official business.

Mr. THOMAS (at the request of Mr. PATMAN) for May 18 through May 23, on account of official business.

Mr. BREWSTER (at the request of Mr. ADDONIZIO), for May 18, on account of illness.

Mr. SANTANGELO (at the request of Mr. ADDONIZIO), for the balance of the week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAILEY, for 5 minutes, today.

Mr. STRATTON, for 15 minutes, today.

Mr. BROCK, for 10 minutes, tomorrow, and to revise and extend his remarks.

Mrs. ROGERS of Massachusetts, for 10 minutes, today.

Mr. CHAMBERLAIN (at the request of Mr. ROBISON), for 10 minutes, on May 19.

Mr. COOK (at the request of Mr. KASEM), for 15 minutes, tomorrow.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. DULSKI.

Mr. DAGUE.

Mr. STRATTON and to include extraneous matter.

Mr. MAGNUSON in two instances and to include extraneous matter.

Mr. SAYLOR and to include extraneous matter.

(At the request of Mr. ROBISON, the following Member was granted permission to revise and extend his remarks in the CONGRESSIONAL RECORD and to include extraneous matter:)

Mr. KYL.

(At the request of Mr. KASEM and to include extraneous matter the following:)

Mr. BOWLES in two instances.

Mr. JOHNSON of Colorado.

Mr. BURDICK.

Mr. HOGAN.

Mr. BRADEMAS.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 684. An act for the relief of Gerald Degnan, William C. Williams, Harry Eakon, Jacob Beebe, Thorvald Ohnstad, Evan S. Henry, Henry Pitmatalik, D. LeRoy Kotila, Bernard Rock, Bud J. Carlson, Charles F. Curtis, and A. N. Dake.

S. 2317. An act for the relief of Mary Alice Clements.

S. 2523. An act for the relief of Harry L. Arkin.

S. 2779. An act relating to the election under section 1372 of the Internal Revenue Code of 1954 by the Augusta Furniture Co., Inc., of Staunton, Va.

S.J. Res. 166. Joint resolution authorizing the Architect of the Capitol to permit certain temporary and permanent construction work on the Capitol grounds in connection with the erection of a building on privately owned property adjacent thereto.

ADJOURNMENT

Mr. KASEM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 1 minute p.m.), the House adjourned until tomorrow, Thursday, May 19, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2159. A letter from the Comptroller General of the United States, transmitting a report on the examination of the economic and technical assistance program for Bolivia as administered by the International Cooperation Administration (ICA) of the Department of State and its predecessor, the Foreign Operations Administration, pursuant to the mutual security program for the fiscal years 1954 through 1959; to the Committee on Government Operations.

2160. A letter from the Chairman, Federal Home Loan Bank Board, transmitting the Annual Report of the Federal Home Loan Bank Board covering the operations of the Federal Home Loan Bank System, the Federal Savings and Loan System, and the Federal Savings and Loan Insurance Corporation for the calendar year 1959, pursuant to the Federal Home Loan Bank Act; to the Committee on Banking and Currency.

2161. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

2162. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting a copy of the order suspending deportation in the case of Ng Ging Sheung, also known as Ng Wong San, Ng Ging Ngew, and Stephen Ng, A11056491, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

2163. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting a copy of the order suspending deportation in the case of Karl Knoepfli, also known as Charles Knoepfli, A7072404, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

2164. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation, entitled "A bill to establish a revolving-type fund in the Treasury for the Bureau of Reclamation, and for other purposes"; to the Committee on Interior and Insular Affairs.

2165. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation entitled "A bill to strengthen the enforcement provisions of the Federal Water Pollution Control Act and extend the duration of the authorization of grants for State water pollution control programs, and for other purposes"; to the Committee on Public Works.

2166. A letter from the Acting Secretary of State, transmitting the report of the President on determinations under the Mutual Defense Assistance Control Act of 1951 for the quarter ending March 31, 1960, pursuant to section 103(b) of the act for transmittal to the chairmen of the House Committees on Foreign Affairs, Armed Services, and Appropriations; to the Committees on Appropriations, Armed Services, and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SMITH of Virginia: Committee on Rules. House Resolution 530. Resolution to amend House Resolution 27, 86th Congress; without amendment (Rept. No. 1613). Referred to the House Calendar.

Mr. COLMER: Committee on Rules. House Resolution 531. Resolution for consideration of H.R. 7201, a bill to provide for the comprehensive operation of hydroelectric power resources of the United States, and for other purposes; without amendment (Rept. No. 1614). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 532. Resolution for consideration of S. 2130, an act to authorize a payment to the Government of Japan; without amendment (Rept. No. 1615). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 533. Resolution for consideration of H.R. 1157, a bill to provide for promotion of economic and social development in the Ryukyu Islands; without amendment (Rept. No. 1616). Referred to the House Calendar.

Mr. RIVERS of South Carolina: Committee on Armed Services. H.R. 8212. A bill to amend title 10, United States Code, with respect to the procedure for ordering certain members of the Reserve components to active duty and the requirements for physical examination of members of the Reserve components, and for other purposes; without

amendment (Rept. No. 1617). Referred to the Committee of the Whole House on the State of the Union.

Mr. RIVERS of South Carolina: Committee on Armed Services. H.R. 11787. A bill to amend title 10, United States Code, to make permanent the authority for flight instruction for members of Reserve Officers' Training Corps, and for other purposes; with amendment (Rept. No. 1618). Referred to the Committee of the Whole House on the State of the Union.

Mr. KILDAY: Committee on Armed Services. H.R. 12200. A bill to amend title 10, United States Code, to authorize reduction in enlisted grade upon approval of certain court-martial sentences, and for other purposes; without amendment (Rept. No. 1619). Referred to the Committee of the Whole House on the State of the Union.

Mr. RIVERS of South Carolina: Committee on Armed Services. H.R. 11952. A bill to repeal the act of May 29, 1958, which authorized and directed the Administrator of General Services to provide for the release of restrictions and reservations contained in an instrument conveying certain land by the United States to the State of Wisconsin; without amendment (Rept. No. 1620). Referred to the Committee of the Whole House on the State of the Union.

Mr. WILLIS: Committee on the Judiciary. House Joint Resolution 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes; with amendment (Rept. No. 1621). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARDEN: Committee on Education and Labor. H.R. 12125. A bill to amend the Library Services Act in order to extend for 5 years the authorization for appropriations, and for other purposes; without amendment (Rept. No. 1622). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARDEN: Committee on Education and Labor. H.R. 12108. A bill to provide for Federal grants and contracts to carry out projects with respect to techniques and practices for the prevention, diminution, and control of juvenile delinquency, and for the training of personnel; without amendment (Rept. No. 1623). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARDEN: Committee on Education and Labor. H.R. 8127. A bill to provide for the hospitalization at St. Elizabeths Hospital in the District of Columbia or elsewhere, of certain nationals of the United States adjudged insane or otherwise found mentally ill in foreign countries, and for other purposes; without amendment (Rept. No. 1624). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRICE: Committee on Armed Services. S. 747. An act to provide for the conveyance of certain lands which are a part of the Des Plaines Public Hunting and Refuge Area and the Joliet Arsenal Military Reservation, located in Will County, Ill., to the State of Illinois; with amendment (Rept. No. 1625). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAYS: Committee on Foreign Affairs. S. 1502. An act to provide for adjustments in the annuities under the Foreign Service Retirement and Disability System; with amendment (Rept. No. 1626). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Fifteenth report pertaining to selected aspects of military procurement (Rept. No. 1627). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. H.R. 9541. A bill to amend section 109(g) of the Federal Property and Administrative Services Act of 1949; without amendment (Rept. No. 1628). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WIDNALL:

H.R. 12286. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. ASHMORE:

H.R. 12287. A bill to amend the Internal Revenue Code of 1954 to repeal the tax presently imposed on the transportation of persons; to the Committee on Ways and Means.

By Mr. COHELAN:

H.R. 12288. A bill to establish a National Wilderness Preservation System for the permanent good of the whole people, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DULSKI:

H.R. 12289. A bill to prevent the use of stopwatches or other measuring devices in the postal service; to the Committee on Post Office and Civil Service.

By Mr. VAN ZANDT:

H.R. 12290. A bill to establish a program of financial and technical assistance designed to alleviate conditions of substantial and persistent unemployment in economically depressed areas, and for other purposes; to the Committee on Banking and Currency.

By Mr. FENTON:

H.R. 12291. A bill to establish a program of financial and technical assistance designed to alleviate conditions of substantial and persistent unemployment in economically depressed areas, and for other purposes; to the Committee on Banking and Currency.

By Mr. GATHINGS:

H.R. 12292. A bill to amend the Agricultural Trade Development and Assistance Act of 1954, as amended, to provide that whenever cotton is bartered or exchanged, either the identical cotton acquired from Commodity Credit or an equal quantity of substitute cotton shall be exported; to the Committee on Agriculture.

By Mr. HALPERN:

H.R. 12293. A bill to amend title 38 of the United States Code in order to provide a 1-year period during which certain veterans may be granted national service life insurance; to the Committee on Veterans' Affairs.

By Mr. KEARNS:

H.R. 12294. A bill to provide for a National Academy of Culture; to the Committee on Education and Labor.

By Mr. McGOVERN:

H.R. 12295. A bill to amend the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, with respect to market adjustment and price support programs for wheat and feed grains, to provide a high-protein food distribution program, and for other purposes; to the Committee on Agriculture.

By Mr. MAGNUSON:

H.R. 12296. A bill to provide for the striking of medal in commemoration of Century 21 Exposition to be held in Seattle, Wash.; to the Committee on Banking and Currency.

H.R. 12297. A bill to amend section 303 of the Communications Act so as to direct the Federal Communications Commission to consult with interested persons in small communities and rural and isolated areas on the technical and other problems in providing adequate television service at a reasonable cost, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SAYLOR:

H.R. 12298. A bill to establish a program of financial and technical assistance designed to alleviate conditions of substantial and persistent unemployment in economically depressed areas, and for other purposes; to the Committee on Banking and Currency.

By Mr. VINSON:

H.R. 12299. A bill to amend the Armed Services Procurement Act of 1947; to the Committee on Armed Services.

By Mr. COHELAN:

H.J. Res. 709. Joint resolution to establish a Joint Committee on Central Intelligence; to the Committee on Rules.

By Mr. EDMONDSON:

H.J. Res. 710. Joint resolution to establish the third Thursday in August of every year as Indian Day; to the Committee on the Judiciary.

By Mr. HAYS:

H. Res. 534. Resolution authorizing the printing of the prayers offered by the Chaplain, the Reverend Bernard Braskamp, D.D., at the opening of the daily sessions of the House of Representatives during the 85th and 86th Congresses; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AYRES:

H.R. 12300. A bill for the relief of Abdulkarim Ahmad Ali; to the Committee on the Judiciary.

By Mr. BROCK:

H.R. 12301. A bill for the relief of Dr. Jesus B. Verendia; to the Committee on the Judiciary.

By Mr. IRWIN:

H.R. 12302. A bill for the relief of Mrs. Hilda Yen Male; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H.R. 12303. A bill for the relief of Yip Fook Q. and his wife; to the Committee on the Judiciary.

By Mr. MULTER:

H.R. 12304. A bill to confer jurisdiction on the Court of Claims of the United States to hear and determine the claims of Mollers' Suidah Shipbreakers, Ltd., the Alpha Shipping Co., Ltd., and Lancashire Shipping Co., Ltd.; to the Committee on the Judiciary.

By Mr. RAY:

H.R. 12305. A bill for the relief of Caridad P. Buncab; to the Committee on the Judiciary.

By Mr. SMITH of California:

H.R. 12306. A bill for the relief of George Edward Barnhart; to the Committee on the Judiciary.

By Mr. TELLER:

H.R. 12307. A bill for the relief of Erasmo Ramos; to the Committee on the Judiciary.

By Mr. WIDNALL:

H.R. 12308. A bill for the relief of Pasquale Marrella; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

467. Mr. STRATTON presented a petition of 130 members of the International Ladies' Garment Workers' Union, residents of the 32d Congressional District, New York, urging the enactment of H.R. 4488, the minimum wage bill, which was referred to the Committee on Education and Labor.

EXTENSIONS OF REMARKS

A Bill To Prevent the Use of Stopwatches or Other Measuring Devices in the Postal Service

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. DULSKI. Mr. Speaker, I have today introduced a bill to prevent the use of stopwatches or other measuring devices in the postal service. The purpose of this legislation is self-evident from its title.

Recently the Post Office Department introduced a work-measuring system known as the distribution guides program. So far as I am able to ascertain, this system is based on rule-of-thumb averages which, according to the Postmaster General, were obtained from a study of some 40 post offices differing in size, in physical conditions, such as lighting, the size of distribution cases, or other equipment factors. Everything I have heard about the system indicates that it is neither a scientific nor accurate system, and I subscribe to the view of the employees of the Buffalo Post Office that it is at best a speedup system. It fails to take into consideration the many factors which enter into an effective and honest time study, and particularly fails to take into account the hours of the day during which the work is performed. Dr. Frederic Lee, in his book "The Human Machine and Industrial Efficiency," has the following to say about nightwork in comparison with daywork:

> I have shown that nightwork is characterized by certain distinctive features: It imposes on a physiological organism attuned to one sequence of events a different and abnormal sequence; it is characterized by greater fatigue than is daywork; it is interrupted by sleep; its curve of output falls off at an excessive rate in the morning hours; its total output is less than with daywork; its accident rate and its proportion of lost time are in excess over those of the day; it has a deleterious effect on health. All these features are inimical to a high degree of efficiency.
>
> Night work is unnatural, unphysiological, abnormal, and it must ever remain so. It should not be allowed for women, and resort to it for men can only be justified by exceptional circumstances.

This distribution guides program is based on a system of measurement that is faulty in the extreme. The basic measure is 2 feet of mail. Theoretically, 2 feet of mail is supposed to equal 580 pieces. Actually, 2 feet of mail can vary anywhere between 350 pieces and 800 pieces, depending upon the thickness of the mail. The unit of measurement, therefore, is elastic.

The excuse for this system, as stated by the Post Office Department, is:

> We believe that any distributor is interested in knowing how well he is doing on the job and how his work production compares. We believe that a distributor has a right to know what the yardstick is in measuring his production and the distribution guides system was developed to let the employee know just how he is doing.

In my judgment, such a statement is just so much hogwash. Whatever other reasons there may have been for the distribution guides system, certainly a desire to let the employee know just how he is doing had to be the least important. The Post Office Department certainly did not take the time, the trouble, and the expense necessary to the development of this system merely to let an employee know just how well he was doing or was not doing.

Had the Department been sincerely interested in the employee's welfare, this system or any system of this nature, could only have been developed after adequate consultation with employee representatives and with the employees being represented every step of the way in the development of the program. Time and motion studies in private industry are not made without the consultation and participation of the employees through their union representatives.

According to the Post Office Department the vast majority of the employees readily meet the minimum requirements of the distribution guides program. This being true, it would seem to me that any system which requires that employees be detailed to nonproductive duties concerned principally with weighing, measuring, checking, and tabulating output, removes from productive effort at least as many hours as the system can be expected to save.

I have introduced this legislation after consultation with the officers of Local No. 374 of the National Federation of Post Office Clerks at Buffalo, N.Y., and with their national officers, and I commend it to the serious study of my colleagues.

Grain Storage

EXTENSION OF REMARKS
OF
HON. JOHN KYL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. KYL. Mr. Speaker, one fallacy of the claim that all private grain storage facilities reap huge profits is demonstrated in the following record submitted to me this day.

An Iowa warehouse had 50,000 bushels of corn in storage. Recently the grain was shipped. Because the grain is now graded "sample" instead of "No. 1" or "No. 2," the warehouseman faces a loss of $10,000.

Now it should be pointed out that had this grain been stored by the Government there would be no recovery from this reduction in grade.

This factor was not given proper consideration at the time the Yates amendment was adopted, nor was it adequately considered when the politically inspired investigations of storage profits were made. It was this careless mass indictment which pressured the Agriculture Department to cut storage rates so drastically.

It would be beneficial to give this entire matter fresh, unprejudiced consideration.

Some Thoughts on the Summit

EXTENSION OF REMARKS
OF
HON. PAUL B. DAGUE
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. DAGUE. Mr. Speaker, like every patriotic American I am incensed over the treatment accorded our President at the now wrecked Paris conference and herewith set down my reactions, point by point, to the news reports as they have reached us by press and radio.

First. President Eisenhower, under the firm counsel of the late John Foster Dulles, steadfastly resisted the idea of a summit meeting until he was finally pressured into it by Macmillan.

Second. The British are criticizing Ike not because we spied on Russia but because we got caught at it.

Third. Walter Lippmann, the Olympian oracle, criticizes Ike not because we got caught at spying but rather because he refused to lie about it.

Fourth. Debate on our "right" to make reconnaisance flights over another nation is academic in the light of the Russian space vehicle presently passing over most of the countries of the world every 90 minutes, plus the obvious fact that in a few short months we will have in orbit observer satellites that can collect all the information, to be gleaned by a U–2 plane and no one will be able to do a thing about it.

Fifth. Mr. Khrushchev came to the summit with his own hands red with bloody repression of free people and with a record of infiltration and espionage not matched by any nation in history. And speaking of aerial surveillance, how do Russian observer planes find their way over our Sixth Fleet in the Mediterranean without violating the air corridors of other powers?

Sixth. It is reassuring to have confirmed by most editorial writers my firm conviction that Mr. K. is not the unfettered dictator some believe him to be. The wily Russian quite evidently has been brought to book by the military and political hierarchy in back of him and told by them to back away from the summit.

Seventh. Khrushchev, in my opinion, never intended that anything constructive toward peace should come out of

the Paris conference. He lives on controversy and unrest and he would stifle in a peaceful world. The U–2 plane incident gave him an easy way out.

Eighth. The effect of this summit fiasco should be the enhancement of the stature of RICHARD NIXON as our next President since he has already demonstrated his ability to slug it out with Khrushchev toe-to-toe. That the Democrat front runners are equipped neither by temperament or experience for such a slugging contest is quite obvious. As for former Governor Stevenson, in his one conference with Mr. K. he came back to America literally shaken down to his shoes.

Ninth. In summation, let us never forget that the Russian leaders are not reasonable men. They are completely ruthless in the full meaning of that term. They are amenable only to force and as a result it behooves us to keep our defenses intact and our bombers and missiles on the alert. And then as reasonable people let us abandon this fiction of international comity and let us forthwith sever diplomatic relations that we should never have entered into in the first instance.

Tenth. And as a final thought, it is gratifying to see the alacrity with which the American people are uniting in back of their President, that Democrats and Republicans have closed ranks, if not in back of Ike then in opposition to a demagog who insults our intelligence and casts aspersions on our integrity and national honor.

Soil Stewardship Week in Colorado

EXTENSION OF REMARKS
OF
HON. BYRON L. JOHNSON
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. JOHNSON of Colorado. Mr. Speaker, the conservation of topsoil is essential. We who live with aridity and wind erosion know this. Those who live with abundant rainfall also know the erosive power of water.

Next week is Soil Stewardship Week in Colorado. I take this opportunity to pay tribute to those who more than 25 years ago saw the great need for action to conserve the Nation's soil. As a result of their vision, some 4½ million farmers and ranchers have united to form 2,822 soil conservation districts. These districts include 1.7 billion acres of land, or a major portion of the United States. These soil conservation districts represent groups of landowners who have joined together to protect our land so that future generations may enjoy its blessings. All America owes them a debt. We are not really the owners of the land—we are but trustees for this generation, and we should view our obligation as involving stewardship.

The work is not finished. It may never be finished. But it is going forward. This Congress or the next one should establish a soil moisture conservation laboratory to help advance this work. The soil moisture conservation laboratory would study the principles involved in increasing the intake of water from the soil, improving the moisture retention characteristics of the soil and increasing the efficiency of soil moisture use by plants. In the great plains area, holding 8 percent of the moisture that now evaporates back in the soil until it can be put to work growing crops is equivalent to adding 3 inches to the scarce rainfall.

Such a laboratory could well be located at Fort Collins, Colo., but wherever located, it is needed.

Similarly, research in weather modification can contribute toward improving the productivity of our soil. The soil conservation program represents the finest kind of cooperation in research, education, publication and constructive action between Federal, State and local units of government. But even as we commend the soil conservation districts of Colorado, let us press forward to further the cause that they have thus far so nobly advanced.

Secretary of Defense Thomas S. Gates, Jr., Makes Another Important Step Forward Toward Unification of Defense Department Procedures and the Reassertion of Civilian Control Over Our Military Establishment

EXTENSION OF REMARKS
OF
HON. SAMUEL S. STRATTON
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. STRATTON. Mr. Speaker, the Secretary of Defense issued orders on May 12 that our long-range defense communications are to be integrated into a single communication system. The organization of this worldwide system to replace those of several agencies which now all operate over the same area is a great step forward in increasing efficiency in our Defense Department. This personal action by the Secretary of Defense, Hon. Thomas S. Gates, Jr., will most certainly improve the security and safety of this Nation.

Again, Tom Gates has given us another example of the fact that there is no substitute for decisive action applied where and when it is required. The tremendous responsibility of the Secretary of Defense has made it even more imperative that problems be resolved with wisdom and dispatch. Thomas S. Gates, Jr., since his appointment, has given new meaning to the Office of the Secretary of Defense and has restored real luster to the constitutional principle of civilian control—giving it meaning and reality—by his willing acceptance of the tremendous responsibilities which are part of his office.

His order, issued shortly after becoming Secretary of Defense, which directed that possible divergencies of opinion between the several members of the Joint Chiefs of Staff be promptly brought to his attention, was in complete agreement with the words and intent of the Constitution and the laws passed by Congress for the direction and organization of our vast defense effort. No organization can work and survive on form alone—it takes competence and courage on the part of the responsible leaders to make any organization function properly—and Mr. Gates has shown this leadership.

I understand that he has not stopped with this development, but has made it practice to meet regularly with the Joint Chiefs so that he, as the civilian head of our Defense Establishment, will have an intimate and up-to-the-minute knowledge of the major problems of defense direction and, most important, the facts behind these issues.

The directives recently issued by Secretary Gates providing for an integrated communication system is a perfect example of actual, meaningful implementation of the earlier steps taken by him.

Almost since the invention of the telegraph, the military problem of duplicating and parallel communications systems has been evident. It has been increased in magnitude by the technological advancements and tremendous increases in volume brought about by the demands of modern war. Mr. Gates, by his action, is the first Secretary of Defense who has both recognized this problem and provided a solution.

By his action, we will at once save money and resources and acquire a communication system responsible to the needs of modern war far beyond anything we have had in the past. The United States is fortunate in having a man of such competence as Thomas S. Gates, Jr., at the head of the Department of Defense.

Joseph W. Barr: Department of Research

EXTENSION OF REMARKS
OF
HON. EARL HOGAN
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. HOGAN. Mr. Speaker, I am submitting a speech which was given by my colleague, JOSEPH W. BARR, Representative from the 11th District, Indiana, before the Federal Government Accountants' Association at the Naval Weapons Plant in Washington, D.C. on May 13.

The speech, Mr. Speaker, points up the need for coordinated effort on the part of our Government in the field of research.

In the past 20 years the expenditures of the United States on research have increased about 110 times—from $74 million in 1940 to $8,400 million in fiscal 1961. In 1961 research expenditures will use up about 10 cents of every Federal tax dollar collected.

This amazing jump in research appropriations over a 20-year span seems to reflect an awareness by the people that we can survive in the sixties only through research. We do not have the population to field great land armies, so to remain secure in a military sense, we must out-research the rest of the world. Economically, research is probably the best weapon we have in a highly competitive world. Ours is a high-cost economy. From the chairman of the board, through engineering staffs, and on down to the production line, our people demand and get salaries that are very high by world standards. To support these standards and to compete, we must literally turn in a better research performance than our competitors in the world market.

These facts seem apparent and are generally accepted. There is, however, a growing concern from the voters and from the Congress that the expenditure of this $8,400 million is poorly coordinated, often wasteful, lacking in direction and purpose, and too often based on 'expediency' rather than logical long-term goals.

Research, unlike other Government functions, is not centered under a department head reporting to the President and through him to the Congress. Research is scattered all over the lot. Defense of course gets the lion's share—$5,840 million. Over a billion dollars goes to the Atomic Energy Commission, National Aeronautics and Space Administration is next with $600 million, then the Department of Health, Education, and Welfare with $375 million (mostly spent in the National Institutes of Health), Department of Agriculture gets $138 million, the National Science Foundation gets $101 million, and a group of other agencies gets $283 million among them.

In spite of the fact that research is a clearly established Government function—as clearly defined as defense, labor, or agriculture, in spite of the fact that it uses 10 cents out of every tax dollar, in spite of the fact that it is clearly vital to our continued existence, still there have been no attempts to make sense out of this sprawling mess. There is no clear line of authority to the President and to the Congress. And worst of all there seems to be no attempt to establish national science goals, to coordinate existing programs, or to give the taxpayer a break on this enormous expenditure.

In my opinion there are three areas of management problems involved that must be resolved quickly if our research efforts are to produce a reasonable return:

I

Some way, somehow, the President or the Congress must decide how much of our resources can be devoted to research. Today money is probably not as much a controlling factor as the sheer availability of scientists.

II

Some way, somehow, the Congress or the President must establish a direction and a goal for our efforts and this expenditure of tax funds. At the moment direction is imparted to research by departments concerned with their particular problems. It is only natural that people in Agriculture would emphasize their particular problems of research. It is only natural that Defense scientists would insist on the overriding importance of their efforts, and the same would be true of the doctors at the National Institutes of Health. Each group has its own ax to grind, and unfortunately the Congress judges research appropriations on this departmental basis. I think this approach is all wrong. It is not as important to argue whether cancer research is more important than research on heart disease, as to stack these programs up against the whole range of Government research efforts—space, defense, meteorology, oceanography, communications, etc. There may be some anguished howls, but in my opinion we can no longer afford to consider research efforts in a departmental context; we must line them up and give them priorities on the basis of total national interest.

III

Finally, the Executive is now faced with a management problem of the first magnitude in getting the most out of the tax dollar—this $8,400 million. As I understand it, management of research involves three basic problems: (1) What projects to start; (2) Continuing evaluation of the work; and (3) When to quit.

I also understand that the toughest problem is the last—when to throw in the sponge and quit on a line of research that is not panning out.

In the years 1957 to 1959 we probably "blew" about 4 billion in Defense research because no one blew the whistle in time. One weapon system after another was advanced to the production point and then abandoned. Someone should have and could have stopped these projects much earlier in the game when they were obviously not developing properly. This kind of waste is intolerable.

Now that we have laid out the problems, what is the answer. I know that my answer is repugnant to many people, but I predict that we will be driven into a Department of Research with a Cabinet officer reporting directly to the President and collecting under his direction most of the sprawling research efforts of this Nation. Hearings were held on this subject in 1959 and many scientists yelled "tyranny." They may have a point, but I know of no other way for this Government to get a national, not a departmental, direction to our defense efforts. I know of no other way to coordinate these sprawling projects. I know of no other way to assure the American taxpayer that he will get a fair return from his tax dollars.

The Quest for Safeguarded Disarmament

EXTENSION OF REMARKS

OF

HON. HUBERT H. HUMPHREY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 18, 1960

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address entitled "The Quest for Safeguarded Disarmament Must Be at the Heart of U.S. Foreign Policy," which I delivered in Washington, D.C., April 27, 1960.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE QUEST FOR SAFEGUARDED DISARMAMENT MUST BE AT THE HEART OF U.S. FOREIGN POLICY

(Address delivered by Senator HUBERT H. HUMPHREY, Democrat, of Minnesota, at Washington, D.C., April 27, 1960)

It may seem a long way from the real mountains of West Virginia to the metaphorical summit of next month—but it is not. Like the people of Arizona and Alabama, Wyoming and Wisconsin, like people everywhere, the men and women I have been talking with in West Virginia are deeply concerned with peace.

I have no crystal ball, and I will not attempt to predict what the outcome of the summit meeting will be. I do earnestly hope, however, that the four leaders will give serious and thoughtful consideration to the problems of arms control and disarmament, and will be able to achieve real, even if limited, progress.

I recognize that the armament race and the lack of political settlements are as closely related as, for example, racial prejudice and racial discrimination. Both are vicious circles, and it would be easy to sit down and give up trying on the theory that you can't eliminate one unless you eliminate the other.

As a practical and optimistic people, however, we Americans like to break in on these vicious circles somewhere. For example, in recent years we have been enacting laws against racial discrimination. That does not mean that we fail to recognize the need to banish prejudice by education; it does mean that we recognize that education alone would take a long, long time to achieve results, and that having to cease some acts of discrimination by law has in itself an educational effect.

So it is with disarmament and political settlements. The Soviet leaders have given little ground for hope that they are ready to consider a practical political settlement for Berlin, let alone Germany as a whole. The same is true of other political problems which clutter the international agenda.

OUR MAJOR EFFORT SHOULD BE IN DISARMAMENT

That does not mean that we should forget them, or cease trying. It does mean in my view, however, that our major effort should be in the field of disarmament—a field in which, during recent years, the Soviet leaders have done rather less propaganda and rather more serious negotiation than over political questions. If we do manage to achieve some real progress in disarmament, we can return to the political questions with greater hope of success.

There are obvious reasons for this. Unfortunate as it is that there are—for example—two Germanies, two Koreas, two Vietnams, peace can conceivably survive this division. We can live with it for the time being, even if we do not condone it. But the armaments race threatens both sides with the imminence of mutual annihilation. Furthermore—as the recent news of strikes and riots among Soviet workers emphasizes—the Soviet leaders have urgent domestic reasons for seeking to beat some of their swords into ploughshares.

SOVIET UNION NEEDS PEACE

Over a year ago, on returning from my visit to the Soviet Union, I noted Chairman Khrushchev's urgent need for peace, and predicted that he would launch a big push for disarmament. We should have been prepared—but we weren't.

The four leaders at the summit might well take their text from Shakespeare—who, I understand, is in Boris Pasternak's excellent translations as popular in the Soviet Union as in the Western World. He might have been speaking directly to the summit when he wrote:

> "There is a tide in the affairs of men,
> Which, taken at the full, leads on to fortune;
> Omitted, all the voyage of their life
> Is bound in shallows and in miseries."

Such a tide is running now for disarmament—and I profoundly hope that the summit leaders will take it at the full.

TWO STEPS AT THE SUMMIT

There are two major steps that they can and should take. One of these is to resolve the most difficult obstacle standing in the way of a nuclear weapons test ban agreement—namely, the number of onsite inspections. The second is to give directions for the future course of the 10-nation disarmament negotiations.

DEFINITE POSSIBILITY OF TEST BAN AGREEMENT

There is a very definite possibility that a test ban agreement—the first real breakthrough toward peace—may be achieved this year, even if it is not concluded in time to be submitted to this session of Congress.

Most of you in this well-informed audience are familiar with the broad features of the proposed test ban treaty. I shall review them briefly:

1. The treaty would ban permanently all nuclear tests in the atmosphere, under water, and in outer space. It would ban underground tests down to a certain level—the level suggested by the United States being 4.75 on the earthquake scale, that is 19 kilotons of TNT in magnitude, roughly the size of the Hiroshima bomb.

2. A minimum of 180 control posts would be erected around the world to monitor shocks to the earth's surface, and to identify them as earthquakes or as nuclear explosions.

3. Up to a certain number of times each year, a mobile inspection team could make an on-site investigation of an event registered at the control posts which could not be identified as being natural in origin or an earthquake.

4. A coordinated program of research would be conducted by the three nuclear powers to improve the techniques of detecting and identifying nuclear explosions.

There is also the possibility of a separate agreement that, while this research is going on—and at least for a 2-year period—the nuclear powers would refrain from underground tests.

These four points are the major elements of the proposed treaty. There are other important points, and some of them are as yet unresolved. But, at this stage of the negotiations, the principal obstacle to agreement is the number or quota of "veto-free on-site" inspections to be carried out each year.

The U.S. position is that at least 20 inspections would be needed in the Soviet Union each year to check for possible explosions of 19 kilotons and above. If a lower threshold were to be selected, say 5 or 10 kilotons, a larger number of inspections would be required.

SENATE WOULD NOT SUPPORT INADEQUATE INSPECTIONS

The Soviet Union surely knows that a treaty cannot go into effect without a two-thirds vote of the Senate—we should advise them that a treaty which provides for less than 20 veto-free on-site inspections would have little or no chance of winning Senate ratification.

I hope that they will recognize—on this issue, our negotiators have no room to yield.

WHAT CAN WE EXPECT FROM THE SUMMIT?

The achievement of a test-ban agreement at the summit meeting—or even, to be more realistic about the prospects, the removal of this major obstacle to agreement—would raise a banner of hope for troubled and fearful mankind.

Such hopes, however, might be cruelly disappointed if the summit conference stopped there—and did not make a real effort to move the general disarmament talks off the dead center on which they are presently stuck.

The problem the summit should decide is in what direction to move forward. At present, the Big Four are like the horseman of the Canadian humorist, Stephen Leacock—they want to ride off furiously in all directions.

SOVIET EMPHASIS

The Soviet Union talks of complete disarmament in 4 years. On these occasions when it mutes this particular trumpet and talks of partial measures, it concentrates on proposals for Europe alone and for the elimination of foreign bases—the old Soviet propaganda line.

FRENCH POSITION

France evidently is opposed to any discussion of disarmament measures for Europe. The United States apparently does not want to negotiate about its overseas bases.

France would prefer to talk about nuclear delivery systems rather than nuclear ammunition. The reverse is true for the United States. And any mention of a control system for either ammunition or delivery vehicles seems to send cold shivers up the Soviet spine.

IMPORTANCE OF RESEARCH ON CONTROLS

Indeed, we need to know much more about controls before we can seriously negotiate them. This is primarily an American responsibility. The Soviet Union is allergic to controls, and will accept as little of them as it can. We cannot expect Chairman Khrushchev to authorize a serious effort in this field—any more than he would set up classes to teach shrimps how to whistle.

In the entire area of arms control, only two items could be settled immediately, according to the latest U.S. proposal. One is the freezing of the level of United States and Soviet armed forces at 2.5 million. The other is the prior notification to an international control organization of proposed launchings of space vehicles.

Nothing else could be considered without very serious study. So far as I am aware, no studies have been started on any disarmament measure, other than techniques for detecting nuclear weapons tests—and this study has been proceeding on a substantial scale only for the past 3 months.

RESEARCH FUNDS ABSOLUTELY VITAL

It may be that more thought has been given to these subjects than Congress is permitted to know. But thought is not enough. The expenditure of very substantial funds is required. The Berkner panel estimated $30 million as the cost of a 2- or 3-year research program in nuclear test detection alone, and $8 million has been allocated for the first year.

SUMMIT CONFERENCE SHOULD PRODUCE GUIDELINES

One way out of the present impasse is for the summit conference to set forth directives on the next steps in arms control. With such directives, the 10-nation disarmament conferences could concentrate its efforts, instead of riding off in all directions at once. And, with such directives, our own Government would know where to concentrate major study and research in order to be prepared for the next steps in disarmament negotiations.

INADEQUATE U.S. PLANNING

We have not been prepared for such negotiations, as I have been warning for many months. At long last, the State Department itself has acknowledged this fact. I quote Mr. Raymond Hare, the Deputy Under Secretary of State:

"In reviewing our approach to disarmament, it was further found that the most serious deficiency in the U.S. approach has been the lack of adequate planning and studies in the field of disarmament."

At long last, too, there are reports of a possible upgrading of the Office of Disarmament within the Department of State. That is good as far as it goes—but it doesn't go nearly far enough. It comes late—I don't say "too late"—and it is certainly too little.

A MANHATTAN PROJECT FOR PEACE NEEDED

What we really need—as the Senate Disarmament Committee proposed as long ago as September, 1957—is a special agency devoted to the single and comprehensive problem of disarmament—a sort of "Manhattan Project for Peace."

Early in February I introduced legislation to establish a National Peace Agency. It should have the services of some of the ablest and most dedicated people in the country. It should have authority to coordinate the many different projects in the general disarmament field which are presently splintered among the Department of Defense, the Atomic Energy Commission, the Central Intelligence Agency, and the Department of State.

Its single, overriding assignment should be to find a way to end the arms race. In the existing agencies, this is at best a part-time or occasional assignment. Then, too, there is a built-in contradiction in expecting any Department of Defense to give wholehearted enthusiasm to limiting armaments—or any Atomic Energy Commission to show as much zeal for curtailing atom bombs as for developing more effective and varied ones.

The proverb tells us that poachers make poor gamekeepers. I don't apply this proverb in its totality to the Pentagon and the AEC. They can and should provide needed advice and technical services to the National Peace Agency. But, in this field, they should be valued servants and advisers, not masters.

The Department of State would continue, of course, to carry on disarmament negotiations—and I have introduced legislation to upgrade this function by establishing an Assistant Secretary of State for Disarmament and Atomic Energy affairs.

NATIONAL PEACE AGENCY RESEARCH ASSIGNMENTS

The National Peace Agency would provide the State Department, and other Departments concerned, with the fullest information and advice in the field of disarmament and related subjects. Its research assignments should include, among others:

1. The detection and identification of nuclear weapons tests.

2. The detection of missile tests and of the launching of outer space vehicles.

3. Measures to guard against surprise attack, either by long-range or conventional means.

4. Control systems to verify the cutoff of the production of nuclear weapons.

5. Control measures for reducing or eliminating the production of chemical, biological, and radiological weapons.

6. Studies of the feasibility of demilitarized zones and of the stationing of international police contingents in areas of potential conflict.

7. Political problems concerned with the inclusion of Communist China in an arms control agreement.

8. Studies of measures to slow down or embargo the arms traffic to disturbed areas, such as the Middle East.

9. Plans for the economic adjustments required in the event of a substantial reduction in armaments manufacture.

All this, and more, will be needed ultimately to achieve genuine disarmament. If the summit conference, as I hope, sets directions for next steps in negotiation, this will be most helpful in establishing priorities.

NEW EMPHASIS ON SAFEGUARDED DISARMAMENT REQUIRED

The quest for safeguarded disarmament must be at the heart and center of American foreign policy. It must be placed as far as possible within the framework of the United Nations—because disarmament is a concern of all countries, and not only of the great powers. By making our statements on disarmament in the forum of the United Nations, we can—if our case is sound—rally behind it the moral force and the conscience of mankind.

We have a better than even chance of making the last four decades of the 20th century decades of peace. The French have

a good proverb—amply illustrated by many buildings here in Washington—that nothing is so permanent as the temporary. And, if we can keep the peace for the next 40 years, there is real hope that the habit may take hold for good.

Consultation With TV Booster Communities

EXTENSION OF REMARKS
OF
HON. DON MAGNUSON
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. MAGNUSON. Mr. Speaker, today I have introduced a bill, H.R. 12297, to make a very small addition to the Federal Communications Act directing the Federal Communications Commission to consult with interested persons in small communities and rural and isolated areas on the technical and other problems involved in bringing television programs to these areas at a reasonable cost.

For 5 years now I have been endeavoring to assist the small and isolated communities of our country, particularly in the West, in their efforts to provide themselves with even a part of the television service which those of us in the large metropolitan areas take so much for granted.

The residents of these communities first turned to the FCC for assistance, but were given no help. Undaunted, in typical American fashion, they set about to solve the problem for themselves by designing and installing the relatively simple television booster stations or repeater stations. These facilities, installed and maintained at a very reasonable cost through voluntary community action have provided a decent television service to thousands of families.

At every stage of the game the local people have had to contend with the stubborn opposition of most of the members of the Federal Communications Commission and its staff. It is my firm conviction that much of this opposition stemmed from some of the worst features of the bureaucratic mind—redtape, lack of imagination, more concern for the administrator's problems than those of the people, insufficient information, delay, and timidity.

But above all, I have felt that the long and needless struggle could have been avoided if there were better communication between the residents of the isolated areas and the agency staff in Washington, D.C., a greater mutual understanding of each other's problems and points of view.

I feel that this communications gap could be bridged if the Commission would appoint five, or even three, field consultants on the television problems of the isolated communities. These specialists could operate out of scattered field offices at, for example, Denver, Colo.; Spokane, Wash.; Douglas, Ariz.; Grand Island, Nebr.; and Fairbanks, Alaska. They could travel around to the small towns to meet with the community leaders interested in television, inspect the terrain, look over the local television repeater facilities and pass on information on what other communities and the FCC itself are doing.

From time to time the field specialists would report back to Washington, D.C., on what they had learned, could pass on suggestions for improvements in the equipment or for changes in licensing procedures, and also could submit recommendations on specific license application.

With these field specialists doing their job conscientiously, I am confident that almost overnight the present feelings of mutual suspicion and mutual antagonism would dissolve.

Heretofore, with but few exceptions, every representative of the FCC who has visited these small towns has done so as an enforcement officer, a policeman, seeking only to find law violations and to close down the community-sponsored television repeater facility which offers the only means the residents have to enjoy television.

By contrast, the field specialists I envision would be welcomed as friends, not antagonists, who are trying to help, not hinder. They would work in mutual cooperation with the local residents to help work out a system for providing good television service within the framework of the administrative responsibilities of the Commission. The local people are more than ready and willing to cooperate with the Commission if only the Commission, in turn, will demonstrate it is willing to cooperate with them. I believe the field consultants quickly can bring about this much desired spirit of mutual cooperation.

There is no doubt in my mind that the Federal Communications Commission could employ these field consultants now, without any nudge from Congress, if only it decided to do so. But when I informally have suggested this course in the past, the response has consisted of a series of typical bureaucratic reasons why it can't be done: They do not have the money, they do not have the authority, they already are studying the problem and there is no need for these additional personnel, anyway. So unless the new chairman of the Commission and the men he has brought with him are motivated by the desire to solve problems and accomplish results rather than to spend their time thinking up reasons why something cannot be done, then I am afraid that some congressional action is necessary.

Last year I introduced a bill, H.R. 3737, designed to spur the Commission through creating a Community Television Bureau. Both the Commission and the Bureau of the Budget have filed the expected adverse reports.

The principal objection raised to that bill is a procedural one, namely, that it is unwise from an administrative point of view for Congress by law to create a specific bureau with statutory powers within a larger agency. Recognizing that this argument has some validity, I have taken a new approach in the bill introduced today, H.R. 12297, which consists of adding to the list of powers and duties of the Commission under section 303 of the Communication Act the simple statement that it—

(s) Consult with interested persons in small communities and in rural and isolated areas on the technical and other problems involved in providing adequate television service at a reasonable cost.

I hope that action can be taken on this simplified bill before adjournment.

Where We Stand in Space

EXTENSION OF REMARKS
OF
HON. CHESTER BOWLES
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 18, 1960

Mr. BOWLES. Mr. Speaker, one of the most effective and hard-working Members of the House is my good friend and distinguished colleague from the First Congressional District of Connecticut, the Honorable EMILIO Q. DADDARIO.

"MIM" DADDARIO long ago acquired a habit of attaining distinction in anything he attempts. From his college days at Wesleyan University in Middletown, Conn., where he became one of Wesleyan's alltime star athletes, he proceeded to compile an enviable military record in World War II with the Office of Strategic Services. In the postwar period, he became mayor of Middletown and later judge of the Middletown municipal court. With the outbreak of the Korean conflict, he returned to military service, this time in the Far East, again compiling a distinguished record.

As a member of the Committee on Science and Astronautics, "MIM" DADDARIO has made significant contributions to the pioneering work of this group. His grasp of the difficult and complex problems of the exploration and development of outer space are clearly shown in an article he has written for the May 1960 issue of the Wesleyan University Alumnus, entitled "Where We Stand in Space." Under leave to extend my remarks, I call the article to the earnest attention of my colleagues. The text follows:

WHERE WE STAND IN SPACE
(By Hon. EMILIO Q. DADDARIO)

The exploration of space and the development of its use for service to man is a major responsibility of Congress and its Committee on Science and Astronautics. Because we are not the only nation so interested, a race for space has been created with every success or failure tallied on the chart of world public opinion. We cannot ignore so great a challenge. Involving as it does both the military survival of the Nation and its economic well-being, it demands an ultimate effort. This is a capsule report on the outlook as it appears to me after studying reports and listening to statements by our scientists, military leaders, and industrialists as presented to the Committee on Science and Astronautics, of which I am a member.

MAN IN SPACE

There is great public interest in the project to put man himself into space. This represents a new frontier, one without limit, unlike the vanished frontiers of the earth's

surface. It is too early to say whether putting man into space in this manner will have immediate economic or military significance, but no one can doubt the psychological impact in the world power struggle, or the ultimate consequences both for military development and for scientific and economic endeavor.

Putting man into space successfully for any length of time is the culmination and synthesis of a great amount of our modern scientific knowledge and technical achievement. It involves reliable propulsion, materials of remarkable qualities, intricate guidance and communications, and a collection of environment controls to overcome the absence of air, the presence of radiation, weightlessness, and the fierce heat of reentry. It also requires a vast system of ground support including tracking and computing facilities and effective recovery means. To have all this combined and made to work reliably is a major undertaking resting on the base of billions of dollars of research, development, and testing.

As of this date it is difficult to predict with certainty whether it will be the United States or the Soviet Union which first achieves the successful orbiting and recovery of a man in a ballistic capsule. It would not be surprising if the Russians do it first. This is because they have had larger rocket powerplants for a longer period of time, and because they early pursued a vigorous and highly successful program of biological experiments in space which have included the successful recovery of living animals from some very ambitious vertical probes into space.

The U.S. effort is centered in Project Mercury. Although it has its limitations, it represents our first important hope for success. It is well thought out and is proceeding in an orderly way at a very high level of priority.

Particular public interest has centered on the seven chosen astronauts. Having met these young men, I can assure you that they are skilled and dedicated, and that they will bring this country success if it is within the capabilities of man.

No positive timetable can be given on such an experimental program. However, our tentative goal is to make the first ballistic-type attempt with a modified Redstone carrying the capsule and astronaut some time this year. If all goes well, it may be possible to orbit a man in 1961. It is most likely that he will orbit the earth three times in a period of 4 hours and then skip down from outer space into the upper atmosphere, beginning over the Pacific, crossing the continental limits of the United States, and landing in the Atlantic Ocean.

Follow-on projects at various stages of development or study include Dyna-Soar, which in advanced versions will orbit a man, and allow some choice as to point of landing through use of a winged glider reentry instead of the straight ballistic fall with blunt nosecone and parachute as intended with Mercury. Farther away but under study are manned space stations and ultimate expeditions to the Moon, Venus, and Mars.

COMMUNICATIONS SATELLITES

One of the earliest and surest payoffs from our space research is in the area of space communications. The most compelling urgency is to have a sure system of worldwide communications. The volume of military messages being far in excess of our commercial traffic illustrates the importance of communications to our national security. We know how vulnerable most of our communication channels are from solar disturbances and how terrible the consequences would be in this missile age if immediate commands could not be passed between headquarters and our strategic forces both on airfields and in the air the world over, and how our defensive tracking and command systems also can falter when communications become difficult. Ordinary communication channels are not only overcrowded, but can blank out for days, and yet military requirements call for instantaneous linkage.

These are the compelling arguments advanced for putting the first generations of communications satellites called Project Notus under the control of the Defense Department. Project Notus includes several parts: Project Courier will be an improvement of the Project Score Atlas which carried the President's voice and teletypewriter messages around the world in December 1958. It is called a delayed repeater active satellite because its tape recorders pick up messages for delivery on command from the ground at a later time. Project Steer will be somewhat similar, but will relay messages instantaneously by rebroadcast. It offers the opportunity for developing virtually jamproof, sunstorm-proof line of sight narrow beam signal transmission. Project Decree will come about when we have more powerful launching vehicles to place the real time repeater satellite 22,300 miles over the Equator so that its speed in orbit matches the rotation of the earth exactly enough to hold it with minor corrections in fixed position relative to the surface of the Earth. Three properly spaced equatorial orbit satellites will allow line of sight communication to all except the extreme polar regions. All these devices are practical, but will call for careful design to create reliability of circuits and a durable power supply from either solar cells or a nuclear source of energy whether isotopic battery or a miniature reactor with heat exchanges, turbine, and generator.

While we are waiting for these military projects to reach perfection, the National Aeronautics and Space Administration will be pursuing the passive relay of signals by placing large reflecting objects in orbit against which anyone may bounce signals just as the Navy is bouncing signals off the surface of the Moon. This passive satellite relay is called Project Echo and will include the placing and inflating of exceedingly thin 100-foot-diameter metal-coated plastic balloons into orbit. It is planned that these balloons will stay in orbit for a time before they gradually slow and are destroyed on reentry to the upper atmosphere.

Once urgent military needs have been cared for, and perhaps partly in parallel, we are going to see a commercial use of communications satellites. The research for this is already under way among the big telephone, cable, and radio companies. The reasons are fairly simple. Not only can such links be free from the delays of solar activity, but they offer many more channels through which information can be poured. Satellites will prove cheaper than laying more ocean cables, will provide many additional channels, and will make intercontinental television a practical thing. As of today pictures sent live across the Atlantic take hours of broadcasting and taping to produce a few minutes of pictures and the results are hardly satisfactory for regular or instantaneous use.

In contrast, the satellite planned for Project Decree will be able to carry 300 voice channels or two television channels through the 8,000 pounds of weight in orbit. This project should be a going thing, in less than 5 years, and will be just the beginning, for one industrial company has plans for an advanced satellite capable of relaying 50,000 voice messages simultaneously. Once the big 1.5 million pound thrust Saturn booster is perfected, stations of this type can be placed in orbit.

The needs for high capacity are very great. The National Aeronautics and Space Administration has shown that there were 1.5 million oversea telephone messages in 1950, that 3 million are expected this year, and that the saturation capacity of slightly over 4 million messages will be reached by 1962. By 1970 the number of messages could rise to 21 million if facilities were provided. Since no cables are planned to keep up with this project demand, communication satellites will be a virtual necessity during the present decade. The present two Atlantic cables carry only 36 voice channels each. Compared with the estimate above as to what satellites will do, one can envision the kind of "quantum jump" which is coming in our contacts with the rest of the world. Indeed, it was Arthur Clarke, author of "The Exploration of Space," who suggested to my committee that the first nation to achieve a practical television satellite might set the universal language for all the world. This will exert a force on the course of history far greater than ever previously experienced.

WEATHER SATELLITES

Although not a commercial project in itself, the weather satellite is likely to exercise a profound influence on the world economy within a decade. Leading weather experts have said that the United States alone may realize benefits from this one type of satellite in excess of $4 billion a year. Such a saving would be more than enough to pay for the entire space program.

The weather satellite is still an experimental device and is under development by the National Aeronautics and Space Administration under the code Project Tiros. This will be followed by the more sophisticated Project Nimbus. Success here will give continuous reports on cloud cover, heat balance, solar activity, and many other related matters. Weathermen on the ground can then feed the worldwide information into computers and complete studies now based greatly on theory. Only then will we begin to have reliable weather reports useful to agriculture and industry in a definitive way.

The weather satellite will have military uses as well. For example, when reconnaissance military satellites are able to broadcast the immediate position of ships at sea to missile launching pads, these ships will lose some of their present invulnerability. Information from weather satellites relayed to ships will give them cloud cover reports allowing them to keep out of sight much of the time, and thus reduce their vulnerability.

NAVIGATION SATELLITES

The Navy in particular has a very keen interest in a navigation satellite called Project Transit. In effect it will become a manmade radio star which regardless of weather can be sighted through instruments and very exact readings on location can be made through the Doppler shift of signals as it passes. It is expected that these devices will be available within 2 years to guide ships and Polaris submarines at a cost well below the presently maintained long-distance range stations. Their signals will also have practical commercial value and will be available to other countries as well.

VEHICLE FAMILIES

My discussion above is largely in terms of the important end uses which are coming most immediately. Equally significant is the development of the launching vehicles themselves.

Ballistic missile experience is the foundation of by far the largest part of our space effort. Powered with the H–1 rocket engine, the Atlas, Thor, and Jupiter have put up all but the nominal payloads of the Vanguards and the early Explorer satellites. However, the relatively limited Vanguards and Explorers of the 1958 period have provided components for the upper stages of the more versatile vehicles of the present. Still better is the new Agena second stage for use on either Thor or Atlas. It has been placing 1,700-pound Discoverer engineering test satellites into polar orbit.

The Agena B version which will be ready presently will have a restart capability in space. This development will be essential to attaining the controlled and circular orbits in space needed for the communications and other advanced satellite applications. An additional improvement because of the greater efficiency of hydrogen as a fuel will be the Centaur upper stage. This will have important military assignments and also will provide the first significant capability for lunar soft landings of instruments and interplanetary probes.

However ingenious we are with improved upper stages, our present total lifting capacity will be limited to that possible with our largest launching booster, the Atlas. Atlas has a thrust of 360,000 pounds, only about half that used for the first three sputniks and first three lunik Soviet rockets. This gives a clue to the importance of Saturn, a clustered arrangement of eight H–1 engines of the type used by our present boosters, and expected to give a first stage thrust of close to 1.5 million pounds.

Along with the big booster are to come super upper stages fueled with hydrogen, and delivering in final version 800,000 pounds of thrust for the second stage, tapering to a fifth Centaur stage. This ultimate arrangement is the kind which will carry men around the moon and perhaps support a landing there. Such landings are feasible with our present technology within a decade.

Saturn is not the end of the line in booster development. Some funding has been given the F–1 engine, to deliver from a single chamber 1.5 million pounds of thrust. With clustering in the Nova concept, we may see as many as 12 million pounds of thrust made available, the basis for a manned round trip to Mars.

Many people close to the work also wish we were pushing with more speed on Project Rover. This is a nuclear heat exchanger rocket already ground-tested which will ultimately increase tenfold the payload that can be sent on interplanetary missions. Here is an opportunity for a significant surge ahead in space for the United States.

Another possibility in the nuclear field is Project Orion, a nuclear bomb propulsion system which would propel a spaceship by firing a sequence of modest-sized nuclear weapons. Enthusiasts see the opportunity for lifting literally thousands of tons of payload by this means.

Electrical propulsion development is showing another important gain for interplanetary work. These may include electrostatically accelerated ions or electromagnetically accelerated plasmas.

All of these plans will see much further development and some applications within the next decade or two, the speed being largely a matter of how much support we give to the work.

IMPLICATIONS OF SPACE DEVELOPMENT

There is not room here to develop the full implications of our entry into the space age. I have reviewed in general terms some of the applications which will come in our spacework and the vehicles which will carry out these tasks. We must realize that our needs for scientific discovery are linked with space research and that our success in meeting these challenges affects our status as a world leader in the eyes of people all over the globe. There is no doubt that we have at this moment the technical ability and the industrial skill to accomplish leaps ahead in space. We also have the inherent abilities and skills in government and in the universities. It will all take a combination of time, money, and good management. In the background there must be attention to scientific education and training, and an understanding of the importance of this program extending far beyond the current funding of the particular projects being developed.

My review would not be complete without a clear recognition that however we may wish to dedicate space to peaceful uses and to practical applications which are financially self-supporting, there are some very urgent military aspects as well. Quite aside from the ballistic weapons which are becoming for the immediate future the mainstay of the nuclear deterrent of both the United States and the Soviet Union, space has an immediate and urgent significance of military concern. The Midas infrared detector for satellite observation of any missile launchings, and the Samos photographic, television, and electronic ferret satellite for advance warning of military activity represent key projects which involve our very survival. They represent a means to have sufficient warning of any sneak attack on this country which may in fact rule out such sneak attack as being a practical strategy to use against us. Civil defense and retaliatory strikes are back in the picture to a worthwhile degree if we could have even a full half hour of warning from Midas. The present hoped for 10 to 15 minutes of warning is almost meaningless. Modern defense involves many complex issues and forces, and space development is inseparable from consideration of our defense.

There remains the very real hope that space activity in some form will eventually rule out the waste of military preparations, and may serve as a unifying force in human endeavors. This is something for which we should all fervently hope. Meanwhile we have no real choice but to do our best to increase our understanding of the space environment and to increase the skill to use this environment. These are goals worthy of man's best efforts and high faculties.

Should the Public Interest Be Represented?

EXTENSION OF REMARKS

OF

HON. QUENTIN BURDICK

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 18, 1960

Mr. BURDICK. Mr. Speaker, I never thought the time would come when anyone would tell the American public that they are not the public. Yet that is what this administration is trying to do. It has refused to reappoint to the Federal Power Commission the only member of that Commission, William R. Connole, who has fought consistently and courageously to protect the consumer from unjustified increases in his gas and electric bills. The administration has given as its reason that Mr. Connole is too consumer minded, that he represents a special group, the consumers.

This is indeed a strange distinction. Since when are the public and the consumers two different groups? Since when are the consumers a special group? When Congress authorizes the Food and Drug Administration to protect the public interest against dangerous drugs, whom does Congress mean by the public if not the people who buy those drugs, the consumers? And when Congress tells the Federal Trade Commission to protect the public from misleading advertising, whom does Congress mean if not the people who will be fooled by that advertising, the consumers?

And when the U.S. Supreme Court ruled that the Federal Power Commission's job was to protect the public interest, whom did it mean but the consumers, the users of gas and electricity? Or does not this administration understand that the only function of the Federal Power Commission is to protect the interest of the public? And does it not know that the consumers are the public and that the only way the Federal Power Commission can protect the interest of the public is to protect the consumers? If a man does not understand this—if he is not ready and willing to do this—he does not belong on the Commission. And an administration that does not understand it has no right to make appointments to the Commission.

I am completely amazed by this reason given by the administration for its refusal to reappoint Mr. Connole. I would think that even this administration would know why regulatory commissions have been created. Utilities are given an absolute monopoly to render an essential service for the public. With this monopoly position, if utilities were not regulated or controlled, they could charge almost any prices and give almost any prices and give almost any kind of service. As an example, take an electric utility. People must have their electricity. They can buy it usually only from one source and that source is the power company serving that area. To get that service, they must pay whatever rates the power company charges. Obviously, unless there is some group to control what the companies do and what they charge, the public—the consumers—would be at the complete mercy of the power companies. To protect the public—the consumers—regulatory commissions were created. They were created in the States to protect the public as far as intrastate matters are concerned. And the Federal commissions were created to protect the public insofar as interstate transactions are involved. But every commission, State or Federal, was created solely to protect the public. It is perfectly clear that a utility which has a monopoly for rendering an essential service to the public needs no protection from the public—but just as obviously the public needs protection from the utilities. And unless they get that protection from the regulatory commissions, they are at the complete mercy of the utilities.

I saw this at first hand. For years I was counsel for a rural electric cooperative in North Dakota. I know how important good regulation is to the public. I know that because the Federal Power Commission is allowing electric power companies to keep for themselves, and not pass on to the consumers, the savings realized from accelerated depreciation, the consumers are being compelled to pay much higher rates for electricity than they should be paying. I also know that when the Federal Power Commission granted a private power company a license to build 3 small dams instead of one high Hells Canyon Dam it meant that the farmers of North Dakota would be denied the low-cost fertilizer which the high dam would have made possible.

These are only two illustrations out of many which show how costly to the consumers—to the public—poor regulation is.

If the public only realized how important good regulation is to them, they would do everything in their power to insure that only men who had the public interest—the consumer's interest—at heart would be appointed or elected to the regulatory commissions. Unfortunately, the average citizen does not realize that he pays with his own hard-earned money for the poor appointments made to regulatory commissions. He does not understand that whenever a commission allows a utility to overcharge in its rates—and this happens all too often—every consumer pays more on his utility bill; that when the Federal Power Commission allows increase after increase to the big wholesale gas companies, those companies pass the increases on to the retail gas companies which serve the individual consumer and the individual consumer's gas bill goes up. The same is true in the case of every other type of utility service.

I wish it were possible to carry this message to every one of our citizens. I wish they could be made to realize that they are directly concerned in every action that the Federal Power Commission—and every other regulatory commission—takes. I wish the public could be made to realize that they pay the cost of poor regulation both through unnecessarily high bills for their utility services and through the increased costs of the other things they must buy.

Certainly, the administration should understand these plain facts of life. Even if it did not understand these facts before 1956, it must have known about it since that time. Because in 1956 the Supreme Court of the United States, in two cases decided at the same time, made it unmistakably clear that the sole function of the Federal Power Commission was to protect the public interest. In the cases of *United Gas Pipe Line Co.* v. *Mobile Gas Service Corp, et al.* (350 U.S. 332), and *Federal Power Commission* v. *Sierra Pacific Power Company* (350 U.S. 348), the Supreme Court emphasized the fact "that the purpose of the power given the Commission is the protection of the public interest, as distinguished from the private interests of the utilities."

These decisions by the U.S. Supreme Court both gratified and shocked me. I was gratified that the U.S. Supreme Court so plainly and clearly told the Federal Power Commission what its function was. On the other hand, I was shocked that it was necessary for the Supreme Court to remind the Federal Power Commission why it was created and why it existed. You would think that the Federal Power Commission would know at least that much. Despite these decisions by the U.S. Supreme Court, however, the administration refuses to reappoint to the Federal Power Commission the only man on it who has demonstrated the ability and desire to perform his duties as they should be performed and to protect the public interest.

I was interested to see, a few months ago, an article in the magazine Fortune. Fortune, you know, is the magazine of big business. It ran an article which reviewed and analyzed the work of our Federal regulatory commissions. When the article discussed the Federal Power Commission it said that of the five Commissioners on that Commission there was only one who was doing his job and that one was William R. Connole. This was not the appraisal or opinion of consumer-minded groups, but it was the conclusion reached by the magazine of big business. I congratulate Fortune for conducting such a study and making such an honest and objective presentation. But this administration, which has proved itself to be the instrument of big business, refuses to go along even with the magazine of big business when that magazine presents an honest and fair story. Apparently the motto of this administration is: "Whether it be right or wrong, we are always for big business and against the consumer."

In a recent broadcast, NBC Commentator Martin Agronsky noted that many Senators, the mayors of large gas-consuming cities, 10 professors of law and government regulation at Columbia, Harvard, Pennsylvania, and Yale Law Schools, many consumer groups and major newspapers have urged the reappointment of Mr. Connole, and that the regulatory commissioners of Mr. Connole's home area—the New England States—have praised him as being the most preeminently qualified person in New England in the field of regulation. Martin Agronsky then comments:

> None of this seems to have registered with the President. The price of dissent, like the price of gas, keeps going up.

I would make only one addition to this splendid statement by Martin Agronsky. I would say that the price of dissent, when the dissent is in favor of the public, like the price of gas, keeps going up. I am sure that if the dissent was in favor of big business, the commissioner who dissented would have guaranteed his reappointment.

Ever since 1953, we have witnessed the deterioration of our regulatory commissions by the appointment of men who have no understanding whatsoever of their duties and functions, of men who often disagree with and disapprove of the very statutes they are to enforce. But the refusal of the administration to reappoint to the Federal Power Commission the only man on it who understands and conscientiously endeavors to do his duty—William R. Connole—and the explanation made for this refusal establish a new low.

I fervently pray that the Senate will not permit this continuing deterioration in the makeup of our Federal regulatory commissions. The Senate, of course, has no appointive powers. Only the President can make the appointment. But I sincerely hope that no man will be confirmed who does not understand that his function as a commissioner is to protect the public interest, or who does not intend to do all that he can to protect the public interest—and that means to protect the consumer.

Speech by Senator Kenneth B. Keating Before the Americans for Competitive Enterprise System, Inc.

EXTENSION OF REMARKS
OF
HON. HUGH SCOTT
OF PENNSYLVANIA
IN THE SENATE OF THE UNITED STATES
Wednesday, May 18, 1960

Mr. SCOTT. Mr. President, a speech delivered by the Senator from New York [Mr. KEATING], in Philadelphia, May 13, contains so much of general interest and is so soundly reasoned that I believe it should receive much wider attention. I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the speech of Senator KEATING before the Americans for the Competitive Enterprise System, Inc.—ACES.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH OF SENATOR KENNETH B. KEATING, REPUBLICAN, OF NEW YORK, BEFORE THE AMERICANS FOR THE COMPETITIVE ENTERPRISE SYSTEM, INC., PHILADELPHIA, MAY 13, 1960

I am delighted to be here this afternoon to talk to the Philadelphia Americans for the Competitive Enterprise System.

The purposes for which your fine organization stands are the greatest ideals of all history—freedom and its many facets. It motivates and inspires men, and has done so from the beginning of recorded time. It is mankind's eternal trump card.

Speaking to the ACES, I suppose I should have held on to my trump card, but in 20 minutes or so one can't do too much finessing with a subject as broad as that which I have chosen for today.

I want to talk today about the attitudes and ideas which people have towards government and towards its impact on our society.

Let's begin by getting things in the proper perspective.

All of us with no small anticipation have been watching the recent growth of our gross national product. This is the statistical index which sums up all of the goods and services produced in the United States. The reason for its receiving special attention in recent months is that this index is about to reach 500 billion or one-half trillion dollars. In fact, the annual rate for the January-March quarter was $498 billion, just 2 billion short of the half trillion mark.

I realize full well that we must not allow ourselves to become hypnotized by the level of this index of national output. There are still a great many questions as to what will be the course of our economy in the months ahead. However, despite these various uncertainties, there is little doubt that at one time or another we will reach and surpass the half-trillion-dollar rate. In fact, we may have already done so.

It will, I am sure, take a statistical giant to determine at exactly what time this event occurred. Maybe it is happening right now as I am speaking. Perhaps it was just at the moment that the President wound up at Griffith Stadium to throw out the first American League baseball. Perhaps it happened at 3 o'clock in the morning.

I am impressed and excited by this half-trillion-dollar figure, because in my mind it affirms and illustrates the great prosperity of our Nation—a record of which all of us can be proud. We must, of course, look to

the future more than we gloat over the past. I know that all of you are concerned, as am I, about the best and most effective route to a gross national product of $600 billion and then 700—and eventually a trillion dollars.

In 1959, total spending by Federal, State, and local governments totaled $97.9 billion. This represents roughly 20 percent of our gross national product, which means that approximately $1 out of every $5 spent in 1959 was spent for government.

On the overall, when you compare national income and total tax revenues an average of 1 day out of every 5-day workweek goes toward providing and maintaining the services of our Federal, State, and local governments. Half a day's wages each week go for national defense alone.

One mustn't take these figures lightly. Because of the high proportion of our time as well as our income which is devoted to government, there is every reason for all taxpaying Americans to take government seriously.

To an unhappily large proportion of Americans, government is like a New Year's Eve party. It comes once a year—as do elections—and the rest of the year is spent wondering blearily why such a fuss is made about it.

As a Member of Congress for over a decade and as an active private citizen for several, I have had a chance to observe and study people's attitudes toward the Federal Government and toward the various uses to which it puts the over $90 billion each year which we pay in taxes.

I want, at this point, to discuss two distinct and certainly extreme attitudes toward government. The first is that of a fellow whom I call the "rant and raver" (he's the nonmusical counterpart of the "rock and roller"). The figures which I have just cited are well known to him. He is all too well aware of them. However, he makes absolutely no attempt to learn about and analyze the ways in which the Government's resources are put to use.

Instead of breaking down the total cost of government and distinguishing between those governmental expenditures which are good and necessary and those which may be bad and unnecessary, he prefers to generalize. To him, government simply costs too much and does too little.

In his mind, the Federal Government is a giant groping carnivorous octopus, reaching in every direction and strangling every living income-receiving thing which it can lay a tentacle one. The only person to whom the octopus of big government responds is the politician—complete with frock coat, plaid pants, and stale cigar.

The politician, deft in the ways of octopi, carefully conditions the beast to spare from his stranglehold just enough voters to get him reelected. Not a happy picture, and fortunately not representative of the attitude of the great majority of informed Americans.

The "rant and raver" is most easily revealed by what I call the "exception deception." He's furious about high taxes, huge bureaucracies, and payola. The Government does too much. We ought to break the whole thing up. But, the only thing which gets him madder than the Government, is the refusal of the party or parties in power to make an exception in order to build him a dam, grant him a special pension, or build a monument for his great grandmother's third cousin, a veteran of a battle of long ago.

The second character whom I want to call to your attention is cleverer and perhaps more sophisticated than the "rant and raver." He is the "gravy train engineer." He starts with the same fundamental assumption as does the "rant and raver," namely that the Government already does too much for too many people. This is his first axiom. The corollary is that since everybody is so well subsidized, the best and only course of action for him is to see to it that he gets his full share—and then some.

You have heard this fellow many times. "Look what so and so gets and how much money goes for something even sillier—why shouldn't I get my fair share of the gravy?"

A serious fallacy common to the "gravy train engineer" is the notion that the Federal Government can do anything it wants far more cheaply and easily than anyone else. In his all-unknowing view, since the Federal Government controls and prints money, it has or can get as much as it needs.

The victim of this unfortunate misconception, which for lack of a better term might be called "mint madness," rejects all forms of therapy. He deliberately and blissfully adheres to his strange and illogical belief that the Government is so big and so unique that the only thing one needs to do to make it work is to plead successfully to an Appropriations Committee of the Congress.

The victim of "mint madness" can frequently be cured by a special kind of shock treatment administered on April 15 of each year by the Internal Revenue Service.

These two imaginary and fictional characters, the "rant and raver" and the "gravy train engineer," are, of course, extremes. And yet, isn't it true that we often recognize similar tendencies in people we know? In fact—if the whole truth be known—don't we find ourselves falling on occasion into the unfortunate habits of the "rant and raver" and his more sophisticated fictional colleague?

What then is the best and most effective attitude for the private as well as the public citizen in thinking about Government and its impact upon his life?

In my mind, it is important that we focus on the basic question as to what is the proper size, scope, and function of Government in our society. In brief, what should the Government do? What should it not do?

Let me cite some common examples of ways in which these fundamental questions relate to existing and proposed activities of the Federal Government. Should the Federal Government insure home mortgages, pay teachers' salaries, subsidize our farm economy, build public housing, underwrite the merchant marine, finance the Weather Bureau, pay for school lunches, provide electricity, build theaters, and assist private colleges?

The answer to these several questions, of course, depends upon the philosophy and ideology of every American, as an individual—and as a free man.

Knowing of the principles and purposes of the ACES, I am sure that it is within this general framework that you appraise both new proposals for governmental action and the performance of the Government in carrying out the various activities with which it is presently charged.

It is not enough merely to think about government and its overall role in our society. It is necessary, in addition, that every effort be made to be kept fully informed as to the intent and mechanics of our various major governmental programs. This is not a subject matter which should be reserved to academicians and politicians. America's vigorous free press puts at the disposal of every citizen the means by which to keep informed of the events of the day and of the objectives and activities of the various agencies of government at all levels. This is an opportunity which cannot and must not be neglected.

I want to make it absolutely clear that I do not mean to be partisan in suggesting that one take as his basic frame of reference an analysis of the proper size, scope, and function of government in our society. There are and must be honest differences of opinion between our two major parties (and amongst individuals within each) as to what should and should not be the proper functions of government. Today I want merely and primarily to stress the importance of a rational and realistic frame of reference for all informed citizens in understanding and actively participating in the vital business of government. Such a framework avoids the pitfalls experienced by the "rant and raver" and the "gravy-train engineer."

This is by no means all that I intend to say on this subject. I would certainly be short changing you intellectually if I did not address myself to the type of considerations which underlie the frame of reference which I have just described. It is absolutely imperative that every American define in his own mind those principles which are of greatest importance to our Nation and which are crucial in determining the proper size, scope, and function of our Government.

My recipe for good government depends, above all, on the wholesome taste of freedom. This includes freedom of speech, religion, thought, and, certainly of special significance to all of you, freedom of opportunity, which is basic to our American competitive-enterprise system.

The history of our country clearly demonstrates that economic expansion, stemming from the energy and enthusiasm of our American free enterprise system, has made our Nation great and powerful.

Free enterprise does not belong to one social stratum or one political party. It is an inalienable right. It encompasses and supersedes all social, political, and economic groupings.

What is the crux of freedom? Where does it come from?

I can't give you the answers. Freedom is delicate and illusive. Freedom is an intangible. One often cannot appreciate its cost and understand its value until it has been taken away. I am sure the people of Soviet Russia and of her lifeless and downtrodden satellite nations understand this proposition far better than we.

I am confident that, as ACES, your understanding of the proper role of government in our society depends primarily upon the need to maintain a structure of society wherein people can and must do things for themselves. This is freedom in the simplest possible terms. In a nutshell, it is therefore the function of government to do those things which people cannot and would not otherwise take care of on their own.

This need not be an altogether narrow and unyielding concept of a free society. It is a concept which can and must grow and change with the times. As men of vision, it is absolutely imperative that your philosophies of government borrow from the past, conform to the present, and grapple with the future.

The Federal Government does not and cannot stand alone. The relationship between the Federal Government and the governments of our 50 States is a broad and vital subject, which has been all too frequently neglected. Last year I introduced a bill in the Senate calling for the establishment of a congressional committee on Federal-State economic relations charged with the responsibility of studying this entire subject and then within a limited time reporting back to Congress with specific proposals for action to modernize and improve the links between Washington and our 50 State capitals. This bill was not approved. In its place, Congress enacted a bill setting up a commission in the executive branch to make a long-run study of this general field.

To me this isn't the solution. The best way to solve a problem is not merely to establish a commission to study it.

There are many important considerations which arise here. Our State governments have not been firm enough in asserting

their jurisdictional rights. For a subsidy—they have all too often sold themselves down the Potomac. On the other hand, the Federal Government, having preempted the best sources of tax revenue, has left the States little choice.

In giving attention, as we are today, to the role of the Federal Government in our society, we must not ignore the role of State governments and their place in the Federal system.

To sum up, in evaluating an existing or proposed governmental program, one must decide whether or not it satisfied his own personal views as to the meaning of our democracy and as to the most desirable size and scope of the activities of government in a free society.

In a democracy, every citizen can and must think about and participate actively in this process of governing if his Nation is to persevere. The vitality and lifeblood of the United States rests on a spirit of active participation in Government on the part of people like yourselves who are sincerely and conscientiously devoted to and concerned about good government.

Political participation is far more than a fine phrase. I have given you some of my own personal thoughts on this subject. Encouraging Americans to be active citizens and to get out and vote is not enough. It is necessary that we also devote attention both to the ways in which citizens should participate in government and to an enlightened and realistic understanding of the major political and governmental issues of our day.

I commend you, as ACES, for your willingness to think about and talk about the most constructive and positive approach for Americans to take to the big and terribly important business of government.

American Mining Congress Convention

EXTENSION OF REMARKS

OF

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 18, 1960

Mr. SAYLOR. Mr. Speaker, last week I had the honor of accompanying the Secretary of Interior on a visit to a coal mine. At the instance of our mutual friend, Stephen F. Dunn, president of the National Coal Association, the Secretary's party toured the Thomas Portal area of Mathies Mine, which is operated by the Pittsburgh Coal Division of Consolidation Coal Co. Other members of the group included Michael J. Widman, assistant to the president, United Mine Workers of America; Marling J. Ankeny, Director of the Bureau of Mines; Royce A. Hardy, Assistant Secretary of the Interior; Consolidation Coal executives George A. Shoemaker, Walter F. Schulten, S. M. Cassidy, and D. L. McElroy; and G. Don Sullivan and Mr. Dunn, of National Coal.

I commend Secretary Seaton for his interest in an industry that is vital to America in peace and war. On our return trip to Washington after the tour of Mathies Mine, he expressed his enthusiasm for the joint efforts of management and labor that have made this Nation's mines by far the most proficient in the world. Mr. Seaton also told me that he is eagerly awaiting Senate passage of the coal research bill so that his office will be able to undertake carrying out the purposes of the legislation as soon as it becomes law.

Mr. Speaker, the visit to the mine took place on the afternoon of May 9, which marked the opening session of the American Mining Congress Coal Convention in Pittsburgh. The morning session was devoted to a national fuels policy, in which I participated at the generous request of Mr. Julian D. Conover, executive vice president of the American Mining Congress. Among the other panelists was the distinguished chairman of the Committee on Interior and Insular Affairs, Mr. ASPINALL.

Because of my colleague's objective analysis of the Nation's fuel situation, I ask unanimous consent to have his statement printed in the CONGRESSIONAL RECORD. The coal industry is grateful that the Committee on Interior and Insular Affairs has such an energetic and impartial chairman. Without his dedicated effort, coal research legislation would not have reached the floor of the House and carried through to success in the early weeks of this session. His conscientious analysis of the need for a fuels study will determine whether such an investigation will materialize.

Following the reprint of Chairman ASPINALL's address to the coal convention, I ask that the brief remarks of Mr. Stephen F. Dunn also be printed. When I discussed the possibility of the need for a continental fuels study, Mr. Dunn referred to points that would have a bearing on the decision. His remarks are brief, but they are poignant.

The address and remarks follow:

NATIONAL FUELS POLICY

(Statement of Hon. WAYNE N. ASPINALL, Chairman, House Committee on Interior and Insular Affairs, before the Coal Convention of the American Mining Congress, Pittsburgh, Pa., May 9, 1960)

It is indeed a pleasure for me to participate in this panel of the American Mining Congress on national fuels policy.

The proposed study of fuels policy is concerned with conservation and development of the fuel resources of the country. It involves the energy requirements and supplies of future generations. It involves the continuing competition that we have between the producers of fuel and energy. I trust that in any policy that we develop we shall have a maximum degree of free competition.

This keen spirit of competition between the fuel industries intrigues me. It seems to be in the true spirit of free enterprise. It might be likened for a moment to the advertising race between cigarettes.

I wonder which is the thinking man's fuel?

Each of the fuels, of course, maintains that it is the one that satisfies.

Which fuel would I be justified to "walk a mile for?" Perhaps there is not much these days that anyone walks a mile for.

This question of a national fuels policy is closely related to my duties as chairman of the House Committee on Interior and Insular Affairs. It touches closely in my own congressional district, where all of the major energy sources—coal, oil, gas, waterpower, and atomic energy—are well represented.

The Committee on Interior and Insular Affairs, through its Mines and Mining Subcommittee, has had before it in this Congress some important mining legislation. The first coal research bill passed through Congress last September but was vetoed by the President. The second coal research bill has passed the House and is now awaiting action in the Senate. We are assured of at least $1 million to get this program started in its first year of operation.

During the past year a resolution was adopted by both Houses stating a national minerals policy, in very general terms. The President was asked to survey the functions of Government agencies and redirect them where feasible to come to the aid of depressed industries and communities. A report to Congress was requested. The report has been promised by the President's office, but has not been received.

The House has passed important legislation affecting mineral leasing on Federal lands. The legislation saves money by simplifying procedures and raises revenues by increasing the minimum rentals for oil and gas leases.

Of closer interest to the coal industry is a measure, passed in the first session of this Congress, raising the acreage of coal leases in Alaska to the same limit that applies in the other States.

I recently attended the first anniversary dinner of the National Coal Policy Conference, in Washington. The operators, owners, workers, railroads, utilities, and consuming industries making up the conference are to be congratulated on their unique organization. Like the American Mining Congress and the National Coal Association, it is doing a fine job keeping the public informed and advising those of us in Congress on legislation.

It is clear, I think, that the three great fuel industries—coal, oil, and gas—are fundamentally in agreement on one thing. That is that the ultimate consumer is really the king. The consumer should have free choice of the fuel that he wants to purchase.

No one could seriously disagree that each of the fuel and energy resources should make their proper contribution toward the public interest. The question is, In which direction is the public interest?

In our rapidly growing economy, the forces of government have become increasingly significant. It is not surprising, I am sure, when I remark that competition between fuels is marked by efforts to influence the course of government. I use the term "influence" in its general sense, with no criticism intended.

Let me give you an example.

In its report to its stockholders, a major oil company states its public relations policy. It says: "During 1959, as in previous years, we reported to the public our views on issues affecting the company's operations." The statement goes on: "We warned of the dangers of a national fuels policy, that, if adopted, would penalize consumers by reducing competition."

The writer of this statement interprets the movement for a study of national fuels policy as an effort to undermine the freedom of choice of the American public. I take it from the information that I have, however, that the Coal Policy Conference and other advocates are not wedded to any preconceived results of a fuels policy study. On the contrary, the resolution now before Congress calls for an objective study taking into consideration conservation measures and efficient uses, rather than a preconceived finding that consumer controls are needed.

My information is that the coal industry, and the industries linked with coal, are merely asking for a study which would look into the possibility of a set of rules whereby each fuel source may have a fair chance to compete with the others, with due regard to the wise use of resources. Insistence merely on the status quo—whatever it may be—sometimes does not lead to the best results.

At the dinner of the National Coal Policy Conference an address on the coal industry

was given by Dr. Joseph Fisher, president of the Resources for the Future Foundation. Dr. Fisher praised what he called the objective attitude of the coal industry toward pending legislation. He said, and I agree, that coal people realize that legislative requests should point to a gain for the people generally, not just a private gain for one firm or one industry.

I would hope that this interfuel rivalry will be exhibited to the public on an honest basis. Exaggerated statements building up one fuel or tearing down another should be avoided. Malicious or distorted statements have no place in honest advertising. They usually come back to haunt the one who thought he would gain the advantage.

On April 27 my colleague on this panel, Representative SAYLOR, addressed the House of Representatives on the recent increase in the quota for residual oil imports, placed in effect by the Department of the Interior. This is an incident that I shall leave for his discussion with you. I will say, however, that I have conferred with coal industry people on the matter, and I have suggested to them that an examination be made of the procedure used in setting the quotas. Frankly, I was surprised to find that the quotas are set without advance notice, without open hearing, and without appeal of any kind within administrative process.

A major inconsistency in the economic policy of our Government is evident. Reports received from Government departments consistently oppose financial relief to domestic mines and mining industries. The grounds cited are that financial aid is uneconomic since it would prolong or create submarginal industry. Yet tremendous sums have been spent to aid foreign minerals production, and these same departments strongly advocate a new system of financial aid to exporters to make their financing problems simpler.

It has been truthfully said that our country has deliberately exported its know-how to other lands, and has given away or loaned these countries the funds to establish great raw material exporting industries. We have lowered our tariffs to these countries. The number of U.S. industries that are being hurt or ruined is mounting yearly. The mining industry is not alone in its plight or in its plea for readjustment of the policy.

The revised version of the fuels policy resolution makes it clear that the objective of the study is to determine whether there is a need for an overall national fuels policy, and if so, whether there is a need for legislation to adopt or implement a policy. The joint congressional committee to be set up under the resolution would submit its report and recommendations within 2 years to Congress. Thereafter any proposed legislation would have to be considered by the Congress in the usual manner.

This seems to me to be a fair procedure. I do not think that it would be unfair to any particular industry or group.

These considerations have convinced me of the need for the study, and I think that the method of conducting it is feasible. Accordingly, I have joined with my colleague from Pennsylvania in introducing the revised resolution. The numbers of the Aspinall-Saylor bills are House Concurrent Resolution 661 and House Concurrent Resolution 662.

I am advised that the chairman of the House Rules Committee, Judge SMITH of Virginia, has promised an early hearing on the Aspinall-Saylor resolutions. This is favorable to the outlook for adoption of the resolution in the present session.

A source of some competition concerning the resolution is the existence of a measure to do a rather similar job as part of a larger venture. I refer here to the bill to authorize the "Resources and Conservation Act of 1960." This bill is pending before the Committees on Interior and Insular Affairs of both Houses. It provides for the creation of two new permanent agencies—a Joint Congressional Committee on Resources and Conservation, and a Council of Resources and Conservation Advisers in the Office of the President. The resources and conservation bill covers a broader scope than fuel or energy resources. The advisory council contemplated in the resources and conservation bill is similar to the agency that was recommended in 1952 by the Materials Policy Commission as a means of correlating information and policy concerning materials resources.

The coal industry and the coal organizations have done a good job of presenting a case for a study of national fuels policy. Industry spokesmen are prepared to document their case further at the appropriate time. You have many friends who will come to your support in committee and on the House floor. You are assured of my continued interest and support in this and other matters affecting the welfare of mines, mine workers, their families, and dependent industries and communities of America.

STATEMENT BY STEPHEN F. DUNN, PRESIDENT, NATIONAL COAL ASSOCIATION

I congratulate the distinguished panel members on their most interesting statements. The National Coal Association fully supports the view that Congress should initiate a comprehensive study of the fuel requirements of the United States. We are working closely with Joe Moody and his policy conference on this and other matters which we feel are essential to the national economy and security, and which, at the same time, would tend to correct inequities harmful to the coal industry.

It is no secret that chief opposition to the proposed fuels study has come from those fearing prohibition or restriction of dump gas sales. Numerous official pronouncements have been made against the practice of dumping gas into industrial markets at prices far below those charged residential customers. I should like to quote from just one of these documents. I think it is important to recall this statement from the report—issued in February 1955—of the Presidential Advisory Committee on Energy Supplies and Resources Policy. It is excerpted from the recommendation on sales below cost by interstate pipeline companies:

"Sales either for resale or direct consumption below actual cost plus a fair proportion of fixed charges which drive out competing fuels constitute unfair competition and are inimical to a sound fuels economy.

"The committee recommends, therefore, that appropriate action be taken that will prohibit sales by interstate pipelines either for resale or for direct consumption, which drive out competing fuels because the charges are below actual cost plus a fair proportion of fixed charges."

Gentlemen, we believe that the proposed study would further emphasize the need for stopping this practice which is patently unfair which illicitly usurps coal markets.

I might add that I was extremely interested in Congressman SAYLOR'S remarks about a continental fuels policy. In attempting to acquaint myself with the history of the Canadian gas cases, I observed that some 5 or 6 years ago—I believe that it was in 1954—the Federal Power Commission issued an opinion to the effect that Canadian natural gas should not be permitted to enter this country unless the American people were assured of supplies through an intergovernmental agreement. This observation seems to illustrate the possible need for a continental fuels policy so far as natural gas is concerned.

Current developments in the oil industry also seem to point up the need for such a policy. A member of the national coal staff spoke in Minneapolis this week. He sent me a copy of a current Minneapolis Tribune containing an article on plans for a series of pipelines to carry crude oil from Saskatchewan to the Midwest. The plans are most ambitious and would unquestionably have a heavy impact on U.S. energy supplies and resources. I shall send the article to Congressman SAYLOR for whatever use he might be able to make of it. Everything considered, a continental fuels policy may be necessary.

In closing, let me congratulate Julian Conover for arranging this important discussion as a part of an outstanding coal convention.

Congressman Chester Bowles of Connecticut Interviewed on "Meet the Press," May 8, 1960

EXTENSION OF REMARKS
OF

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 18, 1960

Mr. BRADEMAS. Mr. Speaker, under unanimous consent I include in the RECORD the transcript of a television program on which our distinguished colleague, the Honorable CHESTER BOWLES, of Connecticut, was interviewed.

Congressman BOWLES appeared on the National Broadcasting Co. program, "Meet the Press," on May 8, 1960, and was questioned by Peter Lisagor of the Chicago Daily News, Chalmers Roberts of the Washington Post, John Steele of Time-Life, Inc., and Frank Bourgholtzer of NBC News. Moderator was Ned Brooks.

The transcript follows:

TRANSCRIPT FROM "MEET THE PRESS"

ANNOUNCER. Now "Meet the Press," produced by Lawrence E. Spivak. Ready for this spontaneous, unrehearsed conference are four of America's top news reporters. Their questions do not necessarily reflect their point of view; it is their way of getting a story for you.

Mr. BROOKS. Welcome once again to "Meet the Press." Our guest today is Congressman CHESTER BOWLES, of Connecticut. He recently was chosen as the chairman of the committee which will write the platform for the 1960 campaign. Work on the platform already has begun with a series of regional meetings. Republican leaders this past week opened an attack on the makeup of Congressman BOWLES' committee. They said it is dominated by radicals of previous campaigns. Congressman BOWLES has been mentioned as a possible dark horse candidate for President, but he has declared his support for Senator JOHN KENNEDY. He is serving as an adviser to Senator KENNEDY on matters of foreign policy.

Congressman BOWLES was the wartime Administrator of Government price controls. He later was elected Governor of Connecticut, and he served as our Ambassador to India. He was elected to Congress in 1958. His books and articles on both foreign and domestic affairs have been widely quoted.

Mr. BOURGHOLTZER. Mr. BOWLES, if you were foreign policy adviser to a President, rather than to a candidate, in this situation

where an American pilot has been shot down by the Russians and has admitted being a spy, would you advise just admitting that he was a spy as has been done?

Representative BOWLES. You have asked a very tough one. It seems to me that the administration did about all they could with a very, very difficult, very unpleasant and highly embarrassing situation. It is pretty clear that Mr. Khrushchev knew what was going on. He appears to have the evidence with which he could confront the world and presumably persuade the world. I think it would have only made a bad situation—and I think it is a very bad situation—worse if we had tried to cover it up.

Mr. BOURGHOLTZER. On the same question there are a lot of aspects, but I am wondering particularly what your viewpoint would be, thinking of the upcoming administration, on the point of the President being unaware of such an activity, as apparently is the case in this incident. Do you think the President should be kept purposely unaware of certain Intelligence operations?

Representative BOWLES. Let's start with the fact that I believe this will go down in history as probably the most embarrassing and in some ways shocking, occurrence in the last 7 or 8 years. It is terribly embarrassing, difficult; it has put us in a very bad situation before the world. We are going to hear a lot more of it.

I wish I were talking about it 2 or 3 days from now when perhaps we will have a better chance to settle down and think it through, and certainly anything I say I want to be sure is very responsible and thoughtful, because no one has any desire to make this worse, certainly not for partisan reasons. But it seems to me the whole situation has placed the State Department in the position of having deliberately told a falsehood. We assumed they did not know the actual facts, that these facts were simply given them. As you go on to say, the President himself is placed in the position of not appearing to know a very major development in regard to our foreign policy. The Soviet Union was encouraged to be suspicious of us. They are already very suspicious on this whole matter of controls inspection. They have always charged that the reason we want this inspection is for spying work and espionage generally. They also have been granted a beautiful opportunity to use this, and they will use it certainly very adroitly to embarrass us and to weaken our already weak position as we approach the summit. And the whole world has been given a very deep contrast between our apparent desire for peace, our desire to try to negotiate a peace, while carrying on this kind of activity almost simultaneously. I think it is a very bad situation.

Mr. STEELE. I want to get one thing straight. Are you criticizing the activities of the plane, or are you criticizing the pilot getting caught?

Representative BOWLES. Let me say this: that I don't think any one of us, as simply an outsider and a newspaper reader, as I am, can know what is essential here in the way of espionage. We all are realists. We all know that this is a difficult and complex world. We know we are at a disadvantage, that the Soviet is a closed police state and has certain very great advantages over us. However, it seems to me that that is not really the point here. The point is the timing. This may be necessary under certain circumstances, depending, of course, on the technical problems, of how great our lack of knowledge really is. But the point is, we are preparing for a summit meeting. The whole history of the world may depend upon our ability to negotiate with the Soviet Union, to talk with them on a basis of mutual trust, or at least some greater degree of mutual trust. By timing this particular excursion at this particular time, we have certainly gone a long way to undermine that hope.

Mr. STEELE. Let's see if I understand. You mean these activities are all right except when we have an international meeting, is that correct?

Representative BOWLES. I don't know that they are all right at all, because I don't know the inside story of how much information we have or what we lack or what risks should be required to get it. I would assume that we should not do this sort of thing for a marginal gain. Only if the gain was so very, very vital to our security that it could be justified on the basis of our national security to the utmost degree. But the point is that here we are in a very delicate position, and certainly this would be a time to be far more circumspect than obviously these people have been. I think they have committed a very gross case of misjudgment, and I think it is highly reckless, and I think it is dangerous and hurtful.

Mr. STEELE. You are the foreign policy adviser to Senator KENNEDY and presumably will become Secretary of State if he is elected President.

Representative BOWLES. I wouldn't presume that for one minute.

Mr. STEELE. You would not presume it?

Representative BOWLES. No. There will be lots of possibilities.

Mr. STEELE. There has been talk of keeping the candidates informed about developments in foreign policy. Have you been kept informed as to these flights, either as Senator KENNEDY's foreign policy adviser or as a member of the House Foreign Affairs Committee?

Representative BOWLES. No, I have not heard of them, I have not been kept advised in any way, and I doubt that he has. I am very sure that none of us have.

Mr. ROBERTS. I would like to turn to politics for a minute. Everybody says you are a darkhorse in the Democratic outlook. It seems apparent or possible that the convention may be deadlocked in Los Angeles for some time. If that happened, and if there was a turn to you as a possible compromise candidate, would you accept?

Representative BOWLES. I think this talk of my being a darkhorse is rather farfetched. I am grateful for the friends I have had around the country who have advanced it, and I have been flattered by it, and naturally it is pleasant to know that what I have been trying to say over a long period of years has at least taken hold with some people. However, I have never taken it seriously. I have done all I can to discourage it. I am for JACK KENNEDY, first, last, and always. I am sticking right thoroughly with him, and I think he is going to get nominated.

Mr. ROBERTS. As you would say, if I was a witness on the Hill, that is not a responsive answer. Can't you tell me yes or no, if drafted would you accept?

Representative BOWLES. It is such an impossible situation I can't even visualize it. I was brought up under F. D. R. He said never answer questions that have that much "if" in them. They are too far and too remote.

Mr. ROBERTS. Let me turn it around the other way: Will you make a Sherman statement that you wouldn't accept it if it were offered?

Representative BOWLES. I think I would look very silly and presumptuous if I did.

Mr. LISAGOR. I would like to ask you in connection with an earlier question, do you think the Democrats ought to be kept informed on basic foreign policy developments, specifically on the nuclear test suspension talks? Won't the Senate have to ratify any treaty we might agree to, and do you think the Senate members, the Democratic members, the important ones, are being taken into those councils sufficiently——

Representative BOWLES. No, I don't. I think it is very bad. Let's go back to 1918: In October 1918 Woodrow Wilson made a very partisan appeal for the election of a Democratic Congress. He got instead a Republican Congress elected in the bielection, the off-year election, of 1918. He then left 3 weeks later for the peace conference in Paris taking with him only one Republican who was so far down the line in Republican circles that people didn't even know he was a Republican. While I am a tremendous admirer of Mr. Wilson, and I feel he is one of the really great Americans of all times, I think that was an abysmal political mistake. It led the way to a good deal of the misunderstanding and challenge and difficulty and final frustration in the U.S. Senate when we failed to get the Treaty of Versailles and the League of Nations through. I might say that I think this administration is making the self-same error.

Mr. LISAGOR. Would you say that they ought then to take Democratic Senators to the summit conference?

Representative BOWLES. I certainly think they should. I think they ought to be kept more carefully informed. We have not had honest bipartisanship in these last 7 or 8 years. I think it is dangerous not to have it. I think the Democrats under the circumstances have behaved with a good deal of responsibility, in the absence of real bipartisanship.

Mr. LISAGOR. On another point, in Milwaukee last night I believe you made a speech blaming a good deal of Mr. Khrushchev's bitter blasts at the United States recently on what you called China and the extreme rightists within the Soviet Union, suggesting, according to the accounts I read, that these people want to torpedo a summit conference. How do you square that kind of a statement with the general belief here in Washington that Mr. Khrushchev needs peace and needs certain relaxation in order to get his 7-year plan to work?

Representative BOWLES. My statement as it was quoted—I haven't seen the paper—that wouldn't be quite accurate if that is the way it appeared.

What I asked was the question, How much influence have the Chinese had in this situation; how much influence does exist among the old Stalinist regime within the Soviet Union? I asked that as a question, and I think it is a very proper question, too. The Chinese have always timed a lot of their intransigence in the Far East, Quemoy and Matsu and the rest, for just the periods when we were trying to negotiate and talk with the Soviet. It is my guess that Mr. Khrushchev would really like to try to develop an easier atmosphere, here. I felt this strongly when I saw him and talked with him a little over 3 years ago in Moscow. I had a long 3-hour talk with him, and I came out of it quite convinced that he wanted a détente; he wanted to see the situation ease; he felt the need of it for his own country, but he was highly suspicious and feeling his way. It would seem to me clearly that this is not in the interests, necessarily of the Mao Tse-tung government in Peking. They naturally want to keep the cold war between the Soviet Union and the United States, just as active and vigorous as they possibly can, because this assures them of a flow of material and loans and all the things they need from the Soviet Union. I would assume that there is quite a clash here, at least a potential clash, between Chinese Communist interests and the Kremlin's interests.

Mr. LISAGOR. But do you not believe that Mr. Khrushchev is secure enough today in Russia so that he can move on toward relaxation if he so chooses at a summer conference?

Representative BOWLES. I don't think we really know. I hope so. I visited Belgrade this November. I wanted to go there to talk to some of the Yugoslavs who often follow

pretty much the Soviet line. For instance, in regard to Berlin, their line is almost identical with the Soviet. But they do have some insight on what is going on in the Soviet Union and also in China. I wanted to try to probe this question with them. There is the general feeling there that Mao Tse-tung's government in Peking had some contacts and some hope for support of an extreme position from certain elements in the Soviet military. I don't think they knew it for a fact, but they are inclined to feel that this was the case.

Mr. BOURGHOLTZER. I'd like to ask a question, Mr. BOWLES, directed to your role as chairman of the platform committee. You have spoken in many of your speeches about the challenge of Soviet economic ability and their production and so on. In translating this into an American program, would you suggest that the Russians have developed the art of economic planning to a point that we should perhaps copy their planning methods?

Representative BOWLES. I don't think that is necessary. I am concerned about our slow lack of growth. Indeed, if you were to ask me what I thought was the single most important question before the American people today it would be our capacity to grow at a much faster rate without inflation, with stable prices. I feel if we can develop our growth rate to around 5 percent or 4½ percent without rising prices—I think we can do all of these things: We can build up our defenses adequately; we can tackle questions of foreign aid; we can build the schools we need; we can get rid of our slums; we can build this country as the dynamic, positive force it should be in world affairs. And if we don't grow fast enough, we can't. I think the interesting thing is this: The Soviet Union is growing at a rate of about 7 percent annually. But so is capitalistic Germany. So is capitalistic Mexico. So is capitalistic Japan. Indeed, I think the average growth rate in western Europe is around 6 percent, all under capitalism. There is nothing wrong with our system. It is simply that the system is now in the hands of rather timid people who are thinking timidly, and I just don't think they have enough confidence in the dynamism of this economy.

Mr. BOURGHOLTZER. You would say that it doesn't require a greater degree of Federal planning, then?

Representative BOWLES. I would think that the question of national goals is related to this, and I would certainly favor this. Mr. Hoover originally suggested it back in 1930. I have talked about it, and so have many other people since. I think it would be a very good thing to hold hearings every summer, let's say, before a committee or board of very highly respected Americans, representing all qualities and areas of our economy, and talk out and plan to see what our goals should be in housing, and schools, and roads, and urban renewal, and defense, and all these other facets of our economy. But I don't think the plans should have any particular bite to them in the sense that they are totalitarian or anything of that kind. I think we simply set the direction in which we like to go, and familiarize Congress and the American people fully with where we can go and where we need to go if we are going to do what we have to do in this next 10 years.

Mr. BROOKS. Congressman, you are going to have to cover a great many domestic subjects in the platform. I am wondering to what extent the South is going to be recognized in the drafting of the platform?

Representative BOWLES. The South is certainly going to have its big chance to be heard as is the East and the West and the North. All sections are. My own views on all these questions are pretty well established. I have written and spoken a lot on them, but I am simply one member of an 110-man-and-woman committee.

Mr. BROOKS. The next question that comes out of that: are you ready to risk a walk-out of some of the southern delegates if you write a civil rights plank which is not acceptable to them?

Representative BOWLES. Some people have gone so far as to become very annoyed with some of our Democratic brethren to the south and have said, "What if they do walk out; let's do whatever is required even to see that they do walk out." I simply can't accept this. I would like to see this Democratic Party remain a united party. We are the only national party, and I think this is a great advantage. It also carries with it certain problems; because it is a national party, our whole difficulty of getting a consensus is obviously much greater, but my guess is that we can work this out. There are lots of good, forward-looking groups of people in the South, who I know understand this world we are living in, who believe in the dignity of man and are willing to accept the word of that great Virginian, a former Governor of Virginia, Thomas Jefferson, who asserted in our Declaration of Independence that all men are created equal. I think we can handle this, and I think our Republican friends, I suppose, are hoping we can't, but I am very confident that we can.

Mr. STEELE. A couple of your Republican friends the other day, Senator GOLDWATER and Congressman MILLER, chairmen of the Senate and House campaign committees, said that your whole committee was masterminded by a few radicals with leftover ideas. Is this correct?

Representative BOWLES. I saw that, and I was very intrigued because he simply listed the people who have written the various council reports, the advisory committee of the Democratic Party. I know all these people very well, I think they are remarkably fine men, and many of them are my very good friends, and I admire them very greatly. So here you have definitely guilt by association on my part. But I would like to call your attention to the fact that on this very day, Mr. GOLDWATER also teed off against Mr. Eisenhower who, he said, was dabbling in socialized medicine, and he also accused Mr. Flemming of going in for a "dime store New Deal." So, I'm in highly respectable company.

Mr. STEELE. One of the gentlemen from your own State, Senator BUSH, on a somewhat different line, had a proposal that each platform plank carry a price tag, how much it was going to cost. You are Chairman of the Democratic Platform Committee. Do you think this is a good idea?

Representative BOWLES. I would be delighted to do that. I don't think it is very practical because I don't think we can always tell just what it will cost, but I think it is perfectly fine to know what it costs. I also think we ought to know what it will cost not to do some of these things. What are our slums costing us today? What is an inadequate military costing us? What is inadequate foreign aid costing us? What is inadequate education costing us? Let us know the cost of not doing things as well as the cost of doing them.

Mr. ROBERTS. I was reading a magazine article you have written about the China problem recently, and one thing struck me. The man you are supporting, Senator KENNEDY, has said publicly that if he were elected he would do something about ending the American commitment to Quemoy and Matsu, the offshore islands. But I notice you avoided that question, or did not mention it. Do you disagree with him on this?

Representative BOWLES. No. I think we are very wrong to stake the future of our American prestige and strength on two islands just off the coast of China. I also feel it would be a great mistake to get off those islands under fire and under pressure. I think that is the difficulty. When there is no pressure, I agree that we should try to negotiate our way off them, neutralize them, find some way to neutralize this thumb that we have that is sort of sticking in the Communist's eye.

Mr. ROBERTS. Do you expect in the platform this year that for the first time the Democrats will come out in favor of a two-China policy?

Representative BOWLES. I don't know, because, of course, I can't speak for this committee, but I do feel very strongly that the recognition question is pretty much a dead-end street. If we could visualize our Government calling up Mr. Mao Tse-tung and saying, "Look, we have decided to recognize your people," I think he'd get a very fast answer back which would be "Do you recognize our sovereignty over the island of Taiwan or Formosa?" And we would say, "Of course not, we will defend Formosa," as, of course, we must. I think Mr. Mao Tse-tung would then hang up the telephone and that would end the conversation. I think our China policy really ought to start with that point. What we need is a China policy that goes beyond this narrow debate, this rather sterile debate on recognition and goes to the question of how we can make some contacts with the Chinese people. I think we have something to learn from the question of the Soviet Union. From 1918 to 1933 we did not recognize the Soviet Union. We had all kinds of contacts with the Russian people, however. We sent our newspapermen there; many of them went there; many Russians came here, tradesmen, and engineers, and doctors, and people from universities, and we had contacts with China.

I happen to think that China is probably the biggest question, the biggest challenge that we are going to meet in these next 20 years. I think China is inherently aggressive in many of the situations that exist there. It has too little land, too many people, too few resources, and worse still, politically and economically and militarily soft neighbors, which almost invite aggression. We are not coping with this problem. I don't think we have a plan for what we would do if the Chinese started to move into southeast Asia. I think we should have a plan, a comprehensive one, a military plan, a political plan, an economic plan. I think that there is some hope here—it may be a very farfetched hope—that we may have some situations here where our interests cross with the Russians. It is conceivable that they are as frightened of this possible development as many of us are.

Mr. LISAGOR. You have written that there is a national consensus in this country on foreign policy. Do you still believe that?

Representative BOWLES. I believe it very deeply, and I have been all over the United States in the last many months, traveling from one end to another, talking to all kinds of people, and I feel an extraordinary feeling of oneness to a degree with all kinds of audiences.

Mr. LISAGOR. Doesn't that bring us down to the fact that you are really going to vote on personalities then in this election insofar as foreign policy is concerned? It isn't a question of which man you choose is better qualified to lead you?

Representative BOWLES. I hate to disagree when we are so close to the end of this program, but I will have to disagree with that. I do feel the approaches, what the two parties say they are for, are quite similar. They are both for peace; they are for negotiation; they are against colonialism; they are for foreign aid, and so on. When you begin to examine the way these two parties go after these objectives, you find a tremendous difference. First of all, the Republicans, I

think, accept this world of chance with great unhappiness. They would like to see everything frozen—if everything would only stand still, if only Africa would stand still and Asia and Europe and Latin America.

I think we Democrats recognize that we are in a revolutionary world of great change, enormous potential. That this revolution is not something we should be frightened of; it is something we should welcome, something we should try to influence and positively, creatively push in the direction of greater human dignity.

I think there is a tremendous difference here. Emerson once summed it up in saying that wherever there is politics you will find people grouping around two ideas, one associated with memory and the other associated with hope. I think our party is the party of hope.

Mr. LISAGOR. Could I be a little more specific: How then do you disagree with Vice President NIXON basically on foreign policy?

Representatives BOWLES. I think we disagree on approach, largely. I think his approach would be more expedient. I think his military aid program would probably be much more expedient than ours. I think it would be less creative. I think there will be less emphasis on the initiative—not necessarily because Mr. NIXON himself feels that way, but after all, he is tied to Mr. HALLECK, and I might also say he is tied to Mr. GOLDWATER, who has been brought already into this particular broadcast. He has to settle with those people.

Mr. BROOKS. Gentlemen, I am sorry to have to interrupt. Thank you very much, Congressman BOWLES, for being with us.

A Thoughtful Proposal for Shorter Campaigns

EXTENSION OF REMARKS
OF

HON. CHESTER BOWLES

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 18, 1960

Mr. BOWLES. Mr. Speaker, my good friend and able colleague from Connecticut, the Honorable JOHN S. MONAGAN, has advanced a proposal to shorten our national election campaigns. I think his suggestion makes excellent sense. I commend to the careful attention of my colleagues his article from the May 8, 1960, issue of the New York Times magazine, entitled "Campaign for Short Campaigns."

The text of the article follows:

CAMPAIGN FOR SHORT CAMPAIGNS—A CONGRESSMAN CONTENDS THAT MANY ILLS OF OUR PRESIDENTIAL ELECTION SYSTEM COULD BE REMEDIED SIMPLY BY CUTTING THE TIME BETWEEN CONVENTIONS AND ELECTION DAY

(By JOHN S. MONAGAN)

WASHINGTON.—Any thoughtful American must admit that our presidential campaigns have got completely out of hand. When it comes to the method of choosing our principal administrative officer, we rank at the bottom of the list of democratic countries.

I find myself looking enviously at the efficient, brief, and effective manner in which England and Israel, for example, select their national governments. The contrast with our quadrennial Roman circus is no compliment to our political maturity.

Our campaigns are objectionable for many reasons.

They are overelaborate. Is there any real need for the pageantry and pomp? Do they really contribute to our understanding of the basic requirements of the country? Is it necessary that we have not only buttons and posters and newspaper advertising but also the live elephants and the prancing donkeys, the squads of winsome models and the helicopter rides? Is the apathy of the voting public so abject that it can be dissipated only by this sort of emotional shock treatment?

Our campaigns generate more heat than light. What begins as a sober discussion of national problems degenerates into an exchange of epithets and limping, laboratory-created catch phrases. Frenetic politicians shout about "slave-labor laws" and "red herrings" and "traitors to democratic principles," and "20 years of treason."

In the "give 'em hell" slambang campaign, candidates of stature often are pressed into positions that are not representative of their real thinking and that are not at all conducive to the enlightenment of the public, the objective of any campaign. One thinks, as an example, of the subsequent rueful apology of the late Wendell Willkie for his assurances during the 1940 campaign of American nonintervention in the European war. He justified his promises as campaign exuberance.

Campaigns are unduly expensive. No one can say how much is really spent for a presidential election, but estimates run as high as $33 million. Democrats and Republicans spent over $7 million for radio and television alone in 1956. The Democratic National Committee as of this date is still $250,000 in debt as a result of the 1956 contest, and no one who has read of the pathetic weekend hat passing to which the Truman emissaries were forced by opposition expenditures in the 1948 campaign can be happy about a custom which requires this unseemly scramble for funds.

Inevitably, too, as the devices become more elaborate and the demands more extreme, the fundraising becomes more dubious and the resort to questionable sources and means becomes more common. The temptations inherent in this helter-skelter collection and distribution of vast sums have led to legislation like the imperfectly enforced Hatch Act and to laws limiting contributions.

They have also resulted in various suggestions—that private campaign contributions be eliminated entirely, that reasonable election expenses be paid for by the Government, or even that radio and TV networks, as public monopolies, be required to allocate regular program time to presidential hopefuls. Senator HUBERT H. HUMPHREY, always fertile in ideas, has come up with the suggestion that we inaugurate what I have called a "political community chest" which would finance campaigns by donations from millions of small contributors.

Our campaigns emphasize the unimportant. They consume time and energy with silly ceremonies—with donning Indian headdress, milking cows and laying wreaths. They require candidates to perform endlessly before audience after audience of sworn supporters instead of allowing them to preach to the unconverted or to persuade the unconvinced.

They also interrupt our dealing with the problems of the country and of the world. Once the election machinery starts grinding, the chancelleries of other nations lock up their files on American affairs and declare an unwilling recess in the discussion of vitally important international issues.

The most regrettable aspect of our campaigns is their physical effect upon the candidates themselves. Most of us can recall Wendell Willkie stumbling through the final days of the 1940 contest, his eyes heavy with fatigue and his voice reduced to a hoarse croak. And I well remember seeing Adlai Stevenson, in New Haven in 1956, so tired that he could not have said whether he was in Connecticut or Illinois, losing his train of thought during his speech through sheer fatigue, and then, after the meeting, being stood up against a wall by party wheelhorses to pump the hands of the faithful.

In spite of improved communications, the trend today is toward more traveling and more speaking, instead of less. In 1932, Franklin Roosevelt traveled about 15,000 miles and made about 100 speeches. In 1956, Adlai Stevenson traveled 75,000 miles and made 300 speeches.

It is obvious, therefore, that there are many ways in whch our campaigns can be made more effective and I suggest that it would be a distinct public service to provide some measure of improvement.

I believe that the principal place to attack the abuses which I have described is on the point that can most easily be adjusted—the length of our campaigns. If the campaigns could be shortened, I am confident that many of the other objectionable features would be reduced and possibly eliminated.

Under our present system, the Democratic convention will open at Los Angeles on July 11 with the nomination coming on or about July 14, while the Republican convention will open at Chicago on July 25 with the nomination coming on or about July 29.

Since election day will be November 8, there will be nearly 4 full months between nomination and balloting for the Democrats and almost 3½ for the Republicans. And, candidates being competitive, and campaign managers being insistent, this means that the candidates will begin peddling their wares as soon as they decently can after the close of the convention.

Surely, these contests are now too long; undoubtedly their prolongation beyond a certain stage yields no dividends for the country or for the candidates themselves. What that stage is no one can say exactly, but that it exists is certain.

My own boiling point may be abnormally low, but I feel that all the amenities and necessities of an election debate could easily be satisfied in 2 months. The British, whose campaigns used to run on for several months now hold them to approximately 20 days from the time of the issuance of the original writ to the day of election. (Churchill posted a 17-day period in the crucial postwar election of 1945). No one has ever suggested that English candidates suffer as a result.

Certainly I would not want to choke off any presidential aspirant so long as his labor served a good purpose, but when he begins to talk more and more to himself, and his audience resolutely switches to "What's My Line?" or "Gun Smoke" through sheer boredom, I submit that the time has come to ring the bell.

(It should be noted that the deadening effect of too much campaigning upon the candidate and upon the public results in part from the time involved in primaries, which must be added to the presidential campaign itself. But primaries are regulated by State law and their limitation on a national basis would run into technical and practical difficulties that would not be involved in the regulation of national elections.)

As a start toward solving critical campaign problems, therefore, I have introduced two bills in Congress to limit our presidential campaigns to 60 days from nomination to election.

House bill 9584 provides that no person nominated over 60 days before the election date shall run for the office of President. House Joint Resolution 547, which is calculated to eliminate constitutional objections, proposes an amendment to the Constitution that would place in the qualifications for the Presidency a requirement that the presi-

dential candidate be named within 60 days of election day. These bills would have no effect on the 1960 campaign.

There is, of course, no magic in the 60-day period. It simply seems to be a reasonable outside limit. (Laos nominates 45 days before the actual balloting date; the Israelis average 60 days for their canvass.) A shorter period than 60 days would be perfectly acceptable to me and I believe that 6 or 7 weeks would be entirely adequate.

In considering the advisability of shorter campaigns, it is illuminating to hear what the experts have to say. Surely no more reliable testimony could be elicited than that from men who have been through the campaign mill themselves.

Senator THOMAS J. DODD, who in 1958 battled his way through a combined primary and election campaign in Connecticut, wholeheartedly agrees that presidential campaigns should be shortened.

"Campaigns are much too long," he says, "and also much too costly. The British have real controls and enforce them and I think we've got to come to it here, too. It's the only way it can be fairly done because nowadays the amount of money spent is just shocking and unnecessary."

Senator DODD adds his opinion that the campaign should really not be of more than 4 weeks' duration.

Representative CHESTER BOWLES, who was DODD'S main opponent in the Connecticut senatorial primary contest, not only would limit Presidential campaigns to 60 days but would extend the limitation to all contests involving candidates for Congress and State office.

"This is not a question merely of ever-growing financial costs, many of which are far greater than our political parties, the candidates or their supporters can be expected to meet," BOWLES says. "It is also a serious question of the wear and tear on the candidates themselves, the nervous exhaustion, the endless speechmaking and the sleepless nights of travel and talk."

Senator HUBERT HUMPHREY, when he paused temporarily in the midst of the recent Wisconsin primary, expressed the fervent hope that the limitation might be extended to primary campaigns as well as regular elections.

Senator ESTES KEFAUVER, who slogged his lonely way through mile after mile of primary contests and then went through a presidential campaign as candidate for second place on the ticket in 1956, believes that some restriction is advisable.

"I certainly can understand," he says, "how a long campaign can be a drain on the physical and emotional resources of candidates. No one knows this better than I and I would be in favor of doing anything possible, within constitutional limits, to shorten the campaign period."

Jim Farley, not unacquainted with presidential campaigns, agrees with the objectives of shortening them, as does Paul Butler, chairman of the Democratic National Committee. Senator THRUSTON B. MORTON, chairman of the Republican National Committee, also approves the purpose of the bills.

All three, however, have some reservations—natural enough in those concerned with the mechanics of campaigns and bound by tradition.

Farley feels that "the idea is all right," but that there might be a time problem in getting the national campaign machinery under way in a shorter period. Butler says that "long campaigns impose an unconscionable physical drain on the candidates," but he is chary of any limitation "that might prevent the American public from fully knowing the candidates or understanding the issues."

MORTON says, "I certainly agree that a long campaign is tough on the physical and emotional resources of the candidates and party managers." He would move warily, however, on any limitation of the time which might be available to establish customary campaign apparatus. He has some feeling that the size of our country makes our problem different from that of the British. He also believes that the primary is a greater drain on candidates than final election, but he asserts that these qualifications in no way lessen his sympathy for the "end objective" of limitation.

I concur with everything that these professionals say, but I submit that the 2-month period, properly used, provides adequate time to accomplish the purposes they set forth.

Of course, there have been objections to my proposal. It is pointed out that the presidential nominee is the head of a ticket on which many others, including Senators and Representatives are running, and that their demands for a personal appearance by him to help them necessarily make for a long and grueling campaign. It is my opinion that the value of such appearances is overrated and that they can be largely eliminated with profit to the candidates and without injury to the ticket. Even now, off-year and special elections do not enjoy the presence of presidential candidates and they have adequately served their traditional purpose.

Some also feel that my proposal flies in the face of the American tradition of giving free rein to political discussion. Others believe that any such limitation would prove beneficial to the party that was better financed. Still others point to specific campaigns—such as the Truman 1948 election—and argue that they would have resulted otherwise but for the length of the canvass.

I find none of these arguments convincing. Proper organization can adjust itself to a different time schedule. To the Trumanites I would say that a 12-month campaign would probably have several shifts of voter sentiment depending on economic or political developments, but that is no reason to make our campaigns longer than they are.

Apathy and an unwarranted regard for tradition will suggest reasons against change. But the full realization of our democratic potentialities requires that we suppress our native exuberance, cut out the unnecessary horseplay, and get back to the real purpose of campaigns—the discussion of the issues affecting our national destiny and the selection of the candidate offering the greater evidence that he will meet those issues with courage and vision.

International Cooperation—A Forward Look

EXTENSION OF REMARKS

OF

HON. DON MAGNUSON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 18, 1960

Mr. MAGNUSON. Mr. Speaker, I recently had the privilege of listening to a thoughtfully provocative address by our colleague, Representative CHESTER BOWLES, discussing the future challenge and direction of our foreign assistance programs, both bilateral and multilateral.

The address was delivered on April 27 to the evening session of the seventh National Conference on International Economic and Social Development at the Statler-Hilton Hotel in Washington, D.C.

It is axiomatic that if we forget where we are headed, we may never arrive. Representative BOWLES, our former highly successful Ambassador to India and Nepal, here reminds us that "the purpose of economic assistance is to enable free peoples to remain free."

The speech follows:

INTERNATIONAL COOPERATION—A FORWARD LOOK

As we gather here in the interests of international economic and social development, another new nation is born. Yesterday, on the West Coast of Africa, the people of French Togo achieved their independence.

Never has the pace of history seemed quicker or more vivid.

Since the end of World War II, more than a score of new nations with a total population of 900 million, have come into being. By the end of this year we shall be dealing with 9 or 10 new fully independent states in sub-Saharan Africa alone. Ten years from now there may be twice that number.

This Revolution of Rising Expectations, so dramatic and potentially so promising, is what brings us together in this conference.

Amid all the stress and confusion of our current political campaign at least one reassuring fact shines through: Our next President—whether he be a Democrat or a Republican—will almost certainly recognize the vital importance of this revolution and propose a more affirmative course of action to cope with it.

Messrs. Kennedy, Humphrey, Symington, Johnson, Stevenson, Nixon, and Rockefeller have each made it clear that our relations with the underdeveloped nations of Asia, Africa, and Latin America will be at the top of his agenda next January.

Each has shown a keen awareness of the requirements and the possibilities. Some indeed have been in the forefront of new and constructive thinking about the policies and techniques which are most likely to enable us to play an effective role.

Yet despite this shared consensus among our leading presidential possibilities in both parties, the disturbing truth is that our oversea aid programs are receiving less and less support each year on Capitol Hill.

This year mutual security legislation has been under particularly vigorous attack.

What is the explanation? Why is such a vitally significant program increasingly treated as a legislative outcast, even by some of its erstwhile supporters?

The fault, I believe, does not lie with Congress. Instead, it lies with administration leaders who have failed to explain adequately the real purposes of economic assistance, who have failed to instill in Congress and the people any sense of the real motivation for foreign aid.

Our official explanations for foreign aid have been negative and narrow. They have failed to do justice to our real goals in world affairs.

We have said that the purpose of foreign aid is solely to block communism. This argument has helped to make local Communist minorities abroad worth their weight in American dollars.

We have discreetly claimed that foreign aid will win military allies or support for us in the United Nations. This is a futile argument because it is no more possible to buy the long-term loyalty of a nation than it is to buy the enduring loyalty of a friend.

We have cynically asserted that foreign aid will turn Asians, Africans, and Latin Americans into loyal supporters of the status quo simply by filling their empty stomachs.

This is an equally mistaken argument because a landless laborer or a tenant farmer who lacks a sense of belonging and of justice will not be satisfied with marginal economic gains.

Until we shake loose from such sterile negativism in our official explanations, our economic assistance programs will continue to be in trouble with the Congress and the people.

The time is past due to give the American people the real reason and to repeat that reason again and again until it is rooted deep in the American consciousness:

The purpose of economic assistance is to enable free peoples to remain free, to create within the framework of their own cultures and beliefs independent societies which provide an increasing measure of literacy, good health, economic progress, individual dignity and justice. Our purpose, therefore, is to help assure the non-Communist peoples of Asia, Africa, and Latin America freedom of choice, in the knowledge that free peoples—whatever their disagreements with us—will never choose communism.

Before we examine some of the practical problems with which our new President must cope in getting this crucially important effort back on the track, let us look quickly at what has gone before.

For well over a decade now our Nation has been involved in the problems of international economic development. In 1945 we vigorously supported the first steps to bind up the wartime wounds of Europe and Asia through UNRRA. In 1947 we made the momentous decision to prop up the embattled societies of Greece and Turkey.

In 1948 through the Marshall plan we plunged into the creative and massive programs to reconstruct the war-ravaged economies of Western Europe.

And in 1949 with point 4 came our imaginative decision to come to grips with the challenge of economic and technical assistance in the whole underdeveloped world.

Unhappily we were diverted in 1950 from the high-minded but realistic objectives of the Marshall plan and point 4 by the ruthless invasion of South Korea by Communist forces and by the sudden utter necessity for countermilitary action by us and our United Nations associates.

The Korean war which followed was a tragedy in more ways than one. Outside of the huge loss of life its most destructive effect was to narrow our view of world affairs.

Precisely at the time when new nations in Asia and Africa were dramatically emerging on the international stage, we began to regard the world largely as the arena for a vast and unending military struggle between the Soviet and American power blocs.

This diverted us from our budding concern with international economic and social development to an overriding obsession with military aid anywhere, and under any conditions.

Many American leaders began to test the bona fides of each new nation by its willingness to support our policies willy nilly. The doubtful or reluctant ones were written off as neutralists, as cowards, fellow travelers, or worse.

Today, 10 years after the outbreak of the Korean war we have come a long way from such narrow thinking. Our old polarized view of world affairs is increasingly accepted as out of date.

We now face the clear fact that a billion and a quarter people are alined with neither Moscow nor Washington, and we have a new understanding of why this is so.

Experience has given us a deeper understanding not only of the vital need for economic assistance but also of its limitations. We also have a clearer view of the shifting nature of the Soviet challenge under new Soviet leadership.

It is fair to say that we have arrived at a watershed in the history of the postwar era. In a very special sense it is also a watershed in the brief history of what we call foreign aid.

Behind us lie years of experimentation, of successes and disappointments. Before us lie years of unparalleled opportunity and danger.

It is a time generally for sober review and fresh thinking. And nowhere are these qualities more urgently needed than in the field of international economic and social development.

From the 1950's we have inherited policies and programs which often overlap, which often compete with one another, which sometimes hinder orderly political growth, and which are largely inadequate to the realities of the new decade.

Let us consider, therefore, some of the criteria on which a fresh approach may be based, and let us do so with particular reference to the need and the opportunity for the greater internationalization of aid.

DECISIONS FOR THE SIXTIES

I believe that most of us here tonight will agree on the following general principles:

1. Orderly political growth in non-Communist Asia, Africa, and Latin America is essential if we are to live in a peaceful and relatively free world. Continuing economic and technical assistance to the new underdeveloped nations is essential to that growth.

2. The capital needs are great and they will grow rapidly as the new nations are able to expand their efforts. In addition to responsible private investment, major government grants and loans, in both hard and soft currencies, will be required.

3. To the maximum degree possible such assistance should be placed on a long-term foundation so that the recipient nations can plan the effective and economical use of all available resources.

4. There should be greater stress on regional development which necessarily goes beyond bilateral nation-to-nation relationships.

5. The excessive budgetary priorities we have given to fragile military allies and our often grudging approach to the so-called neutrals should be revised.

6. In the words of last year's amendments to the mutual security bill, highest priorities should be given to those countries "which show a responsiveness to the vital long-term economic, political, and social concerns of their people; demonstrate a clear willingness to take effective self-help measures; and effectively demonstrate that such assistance is consistent with and makes a contribution to workable long-term economic development objectives."

Having listed our areas of general agreement, let us move from generalities to the more specific courses of action which derive from our common outlook.

It is no longer sufficient to "be for foreign aid" and economic development. It is imperative that we spell out more precisely what we need to do and how best we can do it, for history is moving fast.

THE MANY INSTRUMENTS OF AID

Our economic assistance programs have assumed a wide variety of forms over the past decade. We are confronted today with a proliferation of agencies and organizations, each of which has grown up under its own set of circumstances.

To some extent, this variety is a sign of health. It means that more and more people and governments are caring about the explosive gap between the very rich and the very poor of our world. It also means that people and governments are experimenting with different approaches to the problems of economic development.

Out of such variety—and the competition it implies—can come better techniques and institutions.

But too great multiplicity of approaches can also lead to inadequate planning, piecemeal development, and dangerously uneven distribution of resources.

Of particular importance in the 1960's will be our ability to coordinate and give proper degrees of emphasis to bilateral aid and multilateral aid—to the aid given directly from one country to another, and the aid channeled through an international body.

Let us briefly consider some of the agencies now operating within each of these two categories.

Today U.S. assistance to underdeveloped nations is given bilaterally through the International Cooperation Administration, the Development Loan Fund, the Export-Import Bank, and the Department of Agriculture.

U.S. assistance is also channeled through such multilateral agencies as the World Bank, the International Monetary Fund, the U.N. technical assistance program, and the U.N. Special Fund, the World Health Organization, Food and Agriculture Organization, UNICEF, the International Finance Corporation, and the newly formed International Development Association.

Most of these institutions and programs were established to meet specific needs. Each is performing an important function. And yet inevitably the beginnings of tension between the two forms of approach have emerged.

To a degree the administrators of nation-to-nation development and those who work through international agencies have come to view each other as competitors rather than collaborators.

Now there are many substantial reasons for the continuation of our nation-to-nation bilateral assistance. The Development Loan Fund, which deals largely in soft currencies, the Export-Import Bank, which finances American exports into underdeveloped countries, have a continuing major role to play. Other bilateral programs, like those in Korea, Formosa, Turkey, and Vietnam, have special relevance for military, political, and strategic reasons.

Having taken these factors into account, let us examine the advantages of an increasingly multilateral international approach.

Multilateral aid gives all the nations, givers and receivers alike, a vitally important sense of partnership. The psychological advantages are substantial.

Such aid often results in more for our money, both from contributors, and recipients. In next year's budget it is predicted that the United Nations Special Fund will achieve a ratio of nearly 1 to 3 in terms of matching by the recipient governments.

Multilateral aid usually assures that the underdeveloped nations receive funds only for programs rather than projects—and for programs to which their own governments attach importance.

Multilateral aid also means that technical assistance experts can be recruited over a wider area by international bodies at considerably lower salaries than are required to recruit American experts.

Finally, multilateral aid means that the United States need not bear alone the psychological reaction against the donor which frequently occurs in recipient countries when difficult, adverse decisions must be made or when the results of an aid program fail to meet expectations. Here as elsewhere the World Bank has operated with extraordinary competence.

Thus, the advantages of multilateralism are clear. But let us not overlook two formidable drawbacks to the multilateral approach.

In the first place, there has been considerable administrative confusion, overlapping authority, and bureaucratic conflict in the operations of many of the U.N. agencies.

Second, it is extremely difficult to persuade other prosperous nations to contribute their proper share to multination programs of economic aid. All too often, such programs must be largely underwritten by America.

In the absence of larger contributions from others, Congress will continue to take a dim view of bolder international concepts, which offer such promise.

Although these drawbacks are in no sense insurmountable, they must be taken into account by those of us who favor increased aid through international agencies.

I believe a fresh, imaginative review of the coordination or lack of it among the U.N. specialized agencies is long overdue. Such stocktaking would also encourage these agencies to think in bolder terms about their own functions and potentialities.

As for increased help for other nations to balance a greater effort by ourselves, this too is largely a matter of abler dramatization and persuasion, not only by high officials but by American leaders.

Another factor in a revitalized program of foreign economic assistance must be a much bolder and more imaginative approach to the problem of food distribution.

Ours is the first nation in history to solve its food problem. Yet we continue to view our extraordinary agricultural productivity, and so-called farm surplus that flow from it as a curse.

The irony of such views in a world of hungry people is abundantly clear. This year we are spending more money—$1 billion—just to store our surplus wheat than we will spend on our entire economic aid program for all of Asia and Africa.

The effective and imaginative use of our agricultural productivtiy to establish a system of "food banks" in areas now subject to frequent shortage will require careful international planning. Public Law 480 is a step in the right direction. I am convinced that a new administration, however, must seek techniques for putting our surpluses to work on a much broader scale. And we should learn how to make more imaginative use of the local currencies generated by this effort in education, public health, roadbuilding, and so on.

A new approach to the problems of economic development abroad should also take into account the need for more stable trade conditions. The economies of underdeveloped nations are largely based on the sale of raw materials to industrially advanced countries and downward speculative swings in the market can completely wreck the best-laid development plan by disrupting the flow of foreign exchange.

This situation is further complicated and embittered by the fact that these trade relations between developed and backward regions were largely formed under the institutions of colonialism. As a result, precarious single-crop economies which can be badly hurt by a relatively modest drop in the price of cocoa, tea, copper, tin, or rubber are sitting ducks for nationalist outbursts against the former imperialist powers.

A thoroughgoing effort is therefore needed to achieve greater stability in the international commodity markets. One means may be the establishment of minimum prices for basic raw materials which guarantee a reasonable return and some stability to the producers.

The establishment of maximum prices may be included in such agreements to discourage the kind of massive speculation which drove prices sky-high after the outbreak of the Korean war.

Finally, let us maintain a balanced view of the role of private capital investment in Asia, Africa, and Latin America. In the early stages of a new nation's development, two major obstacles to substantial private investment, by American, Canadian, or West European interests are apparent.

First, the primary individual needs are for the building of an economic infrastructure—roads, railroads, bridges, docks and multipurpose river projects. These developments are seldom self-liquidating.

Second, in the early stages of economic growth, political instability is likely to be great. Foreign investors therefore are reluctant to move ahead unless their immediate profit expectations are extremely high, and new governments are often unable or reluctant to accept such profits for fear of giving more ammunition to local Communist attacks on the capitalist exploiters.

What we must do, therefore, is circumvent these obstacles and to create new techniques, perhaps through management contracts and other devices, to bring America's industrial know-how to bear on the critical problems of Asia, Africa, and Latin American on acceptable terms.

As political stability grows, the opportunities for private investment in these enormously promising continents will multiply.

One of the greatest virtues of this conference is its concern with specifics. The panel discussions of today and tomorrow are geared to problems of approach, finance, techniques, and administration in various countries and regions.

To give specific illustrations of the general proposals which I have outlined, I shall refer to the development of Africa.

THE EXAMPLE OF AFRICA

The African continent presents American policymakers today with a dramatic opportunity for creative, sensitive long-term planning and decisive action.

It is a relatively underpopulated continent of enormous undetermined natural wealth. The relation between land, resources, and people is generally favorable to the use of modern technology which permits higher wages and more rapidly rising living standards. It is still largely removed from the pressures of the cold war.

And aside from the major exceptions posed by Algeria and the Union of South Africa on its northern and southern rim, it offers virtually limitless long-range possibilities for the evolution of free peoples toward self-government and economic viability.

Yet we have been tragically slow to sense the importance of Africa.

In the spring of 1960, we still have no effective policy toward Africa. Indeed, it is fair to say that we have not even reacted to Africa as Africa. Rather, our response has been to Russia's new interest in Africa or to the African attitudes of our NATO allies whom most Africans view as keepers of the colonial past.

The establishment of Guinea, for instance found the United States without even a consular agent in its capital, and we required over a month even to recognize its new government. As might be expected, the Soviet Union promptly moved in to fill the political and economic vacuum. Today 80 percent of Guinea's foreign trade is with the Communist dominated nations.

A realistic political policy in regard to the emerging new nations of Africa must be grounded in a coherent policy toward economic and technical development. And that, I am convinced, calls for much more of an international approach than we have used elsewhere.

The achievement of independence is only a beginning. It is a means, not an end.

If a new nation is to make a go of independence, it must have access to able planners, administrators, and technicians.

It must also have access to grants and long-term loans and to foreign trade that respects the long-term interests of the two parties and breaks clearly with the unequal conditions imposed by the old despised colonial relationships.

We have no desire to run Africa. We want no African satellites. Our sole objective is an independent, free Africa, developing in line with the aspirations of the African people.

If we could look forward to an Africa willing and able to remain independent and even aloof from both the United States and the Soviet Union in the years ahead, it would be a handsome bargain.

THE CASE FOR INTERNATIONAL AID TO AFRICA

Our objective of an independent self-sufficient Africa can best be achieved by avoiding to the maximum possible extent the sterile habits and approaches of the cold war. Let us hope therefore that the new administration will press for the maximum channeling of our aid effort to Africa through the multilateral agencies of the United Nations.

Meanwhile, it is encouraging to note that the Secretary-General himself is pressing for increased U.N. attention to the specific problems of Africa.

In this regard I would like to make a special plea for the strengthening of one of our most promising international agencies, the new United Nations special fund under Mr. Paul Hoffman, who served so brilliantly as administrator of the Marshall plan.

The most critical African need lies in creating the economic foundation on which a modern society can be built. As someone has put it, you cannot draw water from a tap without first building a cistern. As I have previously noted, the first order of business is the creation of the foundations of economic development: that is, transportation, roads, bridges, power, irrigation, schools, and hospitals.

The United Nations is particularly well qualified to undertake the preinvestment surveys and plans. With an increased budget, the United Nations special fund could effectively underwrite this basic task.

With Africa as well as Asia in mind, I would also make a special plea for increased American support to the International Development Association. This new agency—the brain child of Senator MIKE MONRONEY of Oklahoma—is geared to make long-term loans payable in local currencies under multilateral administration and in close cooperation with the skilled staff of the World Bank.

However, if the United Nations is to play the expanded role which all this implies, there must be improved coordination among the U.N. agencies themselves. Although criticism of interagency rivalries is somewhat less valid than it was a few years ago, the 33 U.N. resident representatives in the countries, in which multilateral programs are being undertaken should, I believe, be given greater authority. If he is to become the essential direct link between the U.N. and the local government, each representative should become the U.N.'s mission chief responsible for all international operations in the nation of his assignment.

As I have already suggested, the role of the specialized agencies, such as WHO, FAO, and UNESCO, should be carefully reviewed. Some experienced observers believe that their functions may increasingly lie in the realm of policymaking and standard setting within a more coordinated international effort rather than in direct program administration.

Yet the political realities of Africa assure that bilateral aid will continue in some form for many years to come.

The United Kingdom, for instance, will continue to channel a sizable amount of aid to former African colonies that remain within the Commonwealth. Continued economic

ties to France will result in similar relations between Paris and former French colonies.

However, our national interests and those of the new African nations will best be served by the use of international agencies serving as a worldwide clearinghouse for bilateral programs, in conducting preinvestment surveys, in providing specialized and technically trained personnel, and in fostering a regional approach.

The coordinated regional efforts of the United Nations in developing the Mekong River project in southeast Asia, and the recent success of the World Bank in dealing with the Indus Valley development suggest the possibilities.

THE VITAL CORE: PERSONNEL

This brings us to the question which in Africa may turn out to be the most decisive of all. I refer to the extraordinary dearth of administrative and technical personnel available in the new nations of Africa.

In contrast to India and the former British colonies, such Asian countries as Indonesia suffered greatly from the failure of the colonial powers to provide adequate training of administrators, engineers, and technicians for self-rule.

But how much more difficult are the prospects for the Belgian Congo, now on its precipitous way to independence, with less than 40 college graduates in the entire country? What can we say of the many areas where there are no mathematics teachers, let alone tax experts?

Africa's simple, overriding, urgent need today is trained personnel. Unless able, dedicated men and women are made available in the next decade by the tens of thousands, economic development and orderly political growth in Africa will be impossible.

Where will the teachers, engineers, technicians, and administrators be found?

Will they come largely from the two superpowers—the United States and the Soviet Union—in a massive contest for political influence? Do the urgent demands for African development require that Africa become a new battleground in the cold-war power struggle?

Right here the United Nations and its agencies may find their most decisive role—that of recruiting a major reservoir of trained administrators and technical experts available for the use of new nations everywhere; in short, an international recruitment agency leading to an international civil service.

In the decade of the 1960's Africa will largely be ruled by black men, but to a considerable extent administered by white foreigners. That must be the case until the Africans themselves can create the new generation of leadership.

The needs vary all the way from schoolteachers to nurses, from extension workers to men of Cabinet ability who can operate ministries of agriculture, industrial development, education and public health until competent national administrators and technicians become available.

Two years ago the General Assembly approved an experimental program of technical assistance in public administration. This program, called OPEX, is operating on a very small budget, and the Secretary-General has received far more requests than he can fill.

Some such approach, greatly expanded, is, I believe, essential to the success of international economic and social development everywhere, but most particularly in Africa.

Salaries would be paid partly in the currency of the country to which the new international civil servants have been assigned, with the difference between local salaries and international salaries, together with pension allowances, made up from an international fund.

The long-term administrative requirements will ultimately, of course, be met by Africans. American and European universities can do much to hurry the day by vastly increasing their scholarship programs for Africans.

In the interval, which will last at least a generation, the one way to fill the gap without turning Africa into a cold war battlefield lies in the creation on a bold and adequate basis, of an internationalized civil service, open to men and women of all nationalities recruited by and responsible to the U.N.

The problems which Africa poses to us in the crucial 1960's are many and complex. Some are unique to that vast continent, and some are common to all underdeveloped nations.

There will remain for some time, for example, extreme sensitivity to all forms of imperialism—including what may be considered, justly or unjustly, as attempts at economic domination by the former colonial powers and their American ally.

The many-sided challenge of African development as a prerequisite of orderly political growth underscores the urgent need for a new global approach to the problems of international economic and social development.

Such a new approach can only come through effective American leadership by a new administration—Republican or Democratic—in the early months of 1961. It cannot be delayed, watered down, or sidestepped any longer.

Let me conclude, then, by restating the chief lines which I hope such leadership will follow next year and in the decade to come:

1. I hope we will approach oversea economic development with a broad creative view that takes into account the need for increased international trade; for fair, stable prices for raw materials produced in Asia, Africa, and Latin America; for new techniques to encourage responsible private investments; for the more effective use abroad of our enormous capacity to grow food; and for greatly expanded facilities to train development specialists.

2. I hope that our aid efforts will be increased in size, direction, scope, and duration to meet the needs of long-term national and regional development programs and to encourage large-scale planning.

3. I hope that we will make increased use of United Nations multilateral aid as a supervisory and coordinating umbrella for bilateral programs.

4. I hope that we will press for the formation and use of a vast corps of able and dedicated international administrators and technical experts in the form of an international civil service.

The colonial powers did things to the peoples of Asia, Africa, and Latin America.

In recent years, however inadequately, we have been doing things for them.

In the 1960's we must learn to do things with them.

An approach both direct and through the United Nations must be flexible, imaginative, and positive.

It must be attuned to the varying needs, cultures, and political backgrounds of specific nations.

It must be rooted in an understanding of the full significance and challenge of international economic development as a vast new frontier for our Nation and its people.

Only if the new administration which takes office next January senses the opportunity and acts in these terms can we restore the partnership atmosphere of the Marshall plan and of Point 4. And only through such a relationship can we work effectively toward the ultimate abolition of poverty, hunger, ignorance, and disease from the face of this earth.

SENATE

THURSDAY, MAY 19, 1960

The Senate met at 11 o'clock a.m., and was called to order by Senator GALE W. MCGEE, of Wyoming.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O God of all truth, judge of all men, grant us the grace to keep our hearts with all diligence, knowing that out of them are the issues of life.

When harsh voices are strident and cruel, may we know that the wisdom of the ages is in the affirmation of the Book that reveals Thy heart—

"He that ruleth his spirit is better than he that taketh a city."

In a clamorous day filled with angry accents of unreasoning hate, give us ears to hear the voices calm and still that speak of justice and freedom and world brotherhood. In a sad and mad day, give us sanity of head and heart and a glad hope that sends a shining ray far down the future's broadening way.

"Lord, in this hour of tumult,
Lord, in this night of fears,
Keep open, O keep open,
Our eyes, our hearts, our ears.

Not blindly nor in hatred,
Lord, let us do our part.
Keep open, O keep open,
Our eyes, our mind, our heart."

Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 19, 1960.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. GALE W. MCGEE, a Senator from the State of Wyoming, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. MCGEE thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, May 18, 1960, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the bill (S. 44) to authorize the Secretary of the Interior to construct the San Luis unit of the Central Valley project, California, to enter into an agreement with the State of California with respect to the construction and operation of such unit, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. DIRKSEN, and by unanimous consent, the following committee and subcommittees were authorized to meet during the session of the Senate today:

The Committee on Public Works.

The Antitrust and Monopoly Legislation Subcommittee, of the Committee on the Judiciary.

The Subcommittee on Fiscal Affairs, of the Committee on the District of Columbia.

The Subcommittee on Flood Control, Rivers and Harbors, of the Committee on Public Works.

SOVIET PROPOSAL TO GO BEFORE THE UNITED NATIONS

Mr. JOHNSON of Texas. Mr. President, under all the circumstances, the Soviet proposal to go before the United Nations has the trappings of a propaganda circus. There is a serious question as to whether the Soviets are looking for a method of settling disputes or a sounding board for further propaganda.

Over the years, and through two Presidents, the United States has repeatedly sought to use the United Nations as a discussion body through which the issues that really divide the world can be resolved. The record of Soviet moves to block such action is well established.

Premier Khrushchev's appeal to the United Nations might carry greater conviction if the Soviets were to demonstrate a real willingness to negotiate on such issues as armaments control, the integrity of smaller nations, and the fate of subjugated peoples.

It is obvious that we are in for a period of heightened tensions. I am confident the United States has the internal fortitude to stand up to the problems before us. I hope that somewhere along the line the Soviet Premier and those who are behind him will realize the very real dangers into which they are now plunging the whole world.

VETO OF THE AREA REDEVELOPMENT BILL

Mr. JOHNSON of Texas. Mr. President, the President has sent to the Senate a veto message on Senate bill 722. I have conferred with Senators on both sides of the aisle concerning what action the Senate may desire to take in connection with this veto message.

It is now the plan of the leadership to ask the Chair to lay before the Senate the veto message on either Tuesday or Wednesday of next week, and to have the Senate decide whether the bill shall become law, the objections of the President to the contrary notwithstanding.

I am prepared to vote today or tomorrow. But in the interest of orderly procedure, and in order that all Members of the Senate may have adequate notice, and in accordance with the desires of the authors of the bill and the States which have very special interest in the bill, I believe all Senators should be on notice that very likely the veto message will be laid before the Senate on Tuesday, after the morning hour. I cannot tell how long Senators will wish to discuss it. But this measure is of such far-reaching importance and it affects the lives of so many citizens that I have no doubt that there will be several speeches on the subject, and we shall either vote on Tuesday or, if necessary, go over until Wednesday.

But all Members should be prepared to hold themselves in readiness for a vote, on either Tuesday or Wednesday, on the question of overriding the President's veto of Senate bill 722.

SENATOR JOSEPH C. O'MAHONEY

Mr. JOHNSON of Texas. Mr. President, I desire to make, in the morning hour, a very brief statement, because I shall have to be away from the Chamber, and I understand that a little later today Senators will pay tributes to one of the great men of this century. Although I have spoken earlier in regard to the retirement of Senator O'MAHONEY, I do wish to make a brief statement at this time.

I think one of the warmest friendships I have formed during my years in the Congress has been that with the senior Senator from Wyoming, JOE O'MAHONEY.

Senator O'MAHONEY is one of the outstanding figures in the history of the U.S. Senate. Every person who knows him, knows him to be a man of fearless dedication to his principles and of absolute determination to represent his people as they deserve to be represented.

All of us are familiar with the outstanding record JOE O'MAHONEY has made in the service of the United States—as secretary to a Senator, as a member of the "Little Cabinet," and finally as one of the towering giants in this body. He has been a consistent opponent of monopoly; and the comprehensive study of the Nation's economic system, conducted under his direction, as chairman of the Temporary National Economic Committee, remains a monument to him.

But behind Senator O'MAHONEY as a statesman there is JOE O'MAHONEY, the man. Basically, he is a man who embodies all of the finest qualities of his State and of the Nation which he loves so dearly. I have visited Wyoming a number of times in the last few years, Mr. President, at the invitation of this great man; and I would recommend to all the Members of the Senate and to the people of the Nation such a visit by them, because those who believe that the American spirit of adventure and of daring and of building is dead, ought to go to Wyoming and see what is happening there. There is a striving, a bustling, a hustling, a can-do feeling in Wyoming. The people of Wyoming are dedicated to progress, and they face the future with confidence. They are not discouraged by adversity, and they know how to make the best out of their resources. And this is how I like to think of JOE O'MAHONEY.

JOE O'MAHONEY has decided to retire at the end of this term. All of us can understand, and we must respect his wishes.

But a man like JOE O'MAHONEY will never really retire from the Senate, because he has put into it his courage, his imagination, his vigor, and his patriotism; and these are qualities that will endure so long as the institutions lasts.

Mr. President, one of the earliest tales I heard at my father's knee was of my ancestors' trips to Wyoming and their experiences in the cattle industry there. I am proud to say now that Texans and the sons of Wyoming have many things in common. Among them are sheep. I remember that once the Speaker said that every time he saw JOE O'MAHONEY come down the corridor, he prepared to get ready for some action in connection with the wool bill.

We look to the great Wyoming Hereford ranch for leadership in the field of some of our best bred cattle.

Mr. President, it is with a feeling of great regret that I shall see JOE O'MAHONEY leave this body, because not only do we have so many interests in common, but he is the type of public servant I should like to see every young man emulate.

The ACTING PRESIDENT pro tempore. The Chair rules that the words just spoken were among the most eloquent ever uttered in this Chamber.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORTS ON U.S. SOLDIERS' HOME

A letter from the Secretary of the Army, transmitting, pursuant to law, a report of the U.S. Soldiers' Home, for the fiscal year 1959, and a report of the annual inspection of the home, 1959, by the Inspector General of the Army (with accompanying papers); to the Committee on Armed Services.

EXTENSION OF AUTHORITY OF FEDERAL RESERVE BANKS TO PURCHASE U.S. OBLIGATIONS DIRECTLY FROM THE TREASURY

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury (with accompanying papers); to the Committee on Banking and Currency.

REPORT OF FEDERAL HOME LOAN BANK BOARD

A letter from the Chairman and members, Federal Home Loan Bank Board, Washington, D.C., transmitting, pursuant to law, a report of that Board, covering the operations of the Federal Home Loan Bank System, the Federal Savings and Loan System, and the

Federal Savings and Loan Insurance Corporation, for the calendar year 1959 (with an accompanying report); to the Committee on Banking and Currency.

REPORT ON EXAMINATION OF ECONOMIC AND TECHNICAL ASSISTANCE PROGRAM FOR BOLIVIA

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a secret report on the examination of the economic and technical assistance program for Bolivia as administered by the International Cooperation Administration, Department of State (with an accompanying report); to the Committee on Government Operations.

ESTABLISHMENT OF REVOLVING-TYPE FUND IN THE TREASURY FOR THE BUREAU OF RECLAMATION

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to establish a revolving-type fund in the Treasury for the Bureau of Reclamation, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

CERTIFICATION OF ADEQUATE SOIL SURVEY AND LAND CLASSIFICATION, EAST BENCH UNIT, THREE FORKS DIVISION, MISSOURI RIVER BASIN PROJECT, MONTANA

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, that an adequate soil survey and land classification has been made of the lands in the East Bench unit, Three Forks division, Missouri River Basin project, Montana, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation (with an accompanying paper); to the Committee on Interior and Insular Affairs.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Three letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law pertaining to each alien, and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

AMENDMENT OF RAILROAD RETIREMENT ACT, RELATING TO INTEREST RATE FORMULA OF SPECIAL OBLIGATIONS PURCHASED FOR RAILROAD RETIREMENT ACCOUNT

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to amend section 15(b) of the Railroad Retirement Act, as amended, to revise the interest rate formula of special obligations purchased for the railroad retirement account, and for other purposes (with accompanying papers); to the Committee on Labor and Public Welfare.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution of the Council of the City of New York, favoring the enactment of legislation to provide a National Youth Act with provisions for Federal grants to assist local communities in establishing expanded youth programs; to the Committee on Labor and Public Welfare.

RESOLUTIONS OF KANSAS BANKERS ASSOCIATION

Mr. CARLSON. Mr. President, the Kansas Bankers Association held its 73d annual convention in Topeka, Kans., last week. At this meeting several resolutions were adopted, two of which are related to legislative matters now pending in Congress.

I ask unanimous consent that these resolutions be printed in the RECORD and referred to the appropriate committee.

There being no objection, the resolutions were referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

TEXT OF TWO RESOLUTIONS ADOPTED BY KANSAS BANKERS ASSOCIATION 73D ANNUAL CONVENTION, TOPEKA, ON MAY 14, 1960

Resolved, That the Kansas Bankers Association, duly assembled in regular session, go on record as unequivocably opposing any Federal legislation which, by its terms, proposes to require a withholding tax on dividends or interest paid by corporations.

Resolved, That the Kansas Bankers Association, assembled in regular session, go on record as approving and recommending to the Members of the Congress all legislation designed to equalize the basis of taxation of financial institutions; and be it further

Resolved, That a copy of this resolution be forwarded to the proper officials in Washington who represent the State of Kansas.

RESOLUTIONS OF ORGANIZATIONS OF THE STATE OF NEW YORK

Mr. JAVITS. Mr. President I ask unanimous consent to have printed in the RECORD three resolutions adopted by organizations of the State of New York.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTION ADOPTED BY THE COMMON COUNCIL OF THE CITY OF POUGHKEEPSIE HELD ON MONDAY, MAY 16, 1960

Resolved, That the Common Council of the City of Poughkeepsie, composed of both Republicans and Democrats, duly elected to such office, hereby wish to go on record as endorsing the firm stand taken by our President, Dwight D. Eisenhower, at Paris during the current summit conference in upholding the united desires of our Western allies, and we express the wish that all public bodies take a similar position in order that the Soviet people be made aware of such spontaneous action that we support our Commander in Chief in his efforts to maintain peace in the world.

HOWARD H. GIBBS,
City Chamberlain.

RESOLUTION OF THE BOARD OF EDUCATION, YONKERS, N.Y.

Whereas on April 8, 1960, Governor Rockefeller signed into law chapter 418 of the laws of 1960; and

Whereas this chapter authorizes the imposition of a tax for school purposes on general telephone services on a countywide basis; and

Whereas additional funds are urgently needed by the Board of Education of the City of Yonkers to provide more adequately for the educational program in the public schools; and

Whereas the city of Yonkers is presently within $10,326.14 of its constitutional tax limit of 2 percent, and is thereby restricted in providing additional funds for the educational program; and

Whereas the Board of Education of the City of Yonkers, in order to serve more adequately the educational needs of the more than 25,300 pupils enrolled in the Yonkers public schools, wishes to utilize the revenues from this source beginning September 1, 1960, in the event that the Federal Government does not reimpose this tax: Now, therefore, be it

Resolved, That the Board of Education of the City of Yonkers, pursuant to chapter 418 of the laws of 1960, hereby requests the imposition of a local tax for school purposes on general telephone services as specified in article 24 of the tax law, a public hearing having been held on the imposition of said tax on the 5th day of May, 1960; and be it further

Resolved, That the said board of education hereby requests that the said tax become effective during the calendar year 1960; and be it further

Resolved, That certified copies of this resolution be filed with the Commissioner of Education of the State of New York, the mayor, the city manager, the members of the common council, the comptroller and city clerk of the city of Yonkers, the county clerk of Westchester County, the Honorable KENNETH B. KEATING, the Honorable JACOB K. JAVITS, and the Honorable ROBERT R. BARRY.

Resolution sponsored by:

ANITA F. WOLF,
Member, Board of Education.

Recommended by:

STANLEY S. WYNSTRA,
Superintendent of Schools.

RESOLUTION ADOPTED BY THE MEMBERSHIP OF THE EMPIRE STATE PETROLEUM ASSOCIATION, APRIL 28, 1960

Whereas Empire State Petroleum Association has continually maintained a position in favor of the removal of control of wellhead prices for natural gas as now exercised by the Federal Power Commission; and

Whereas the President of the United States has recently signified his support for legislation to bring about removal of these controls; and

Whereas there is now pending or about to be introduced before the Congress of the United States a bill that will in general accomplish this purpose: Now, therefore, be it

Resolved, That a copy of this resolution be sent to the Senators and Representatives from the State of New York and to Otis H. Ellis, general counsel for the National Oil Jobbers' Council, with the urgent request that every effort be made to promote the passage of this legislation at the current session of Congress.

HARRY B. HILTS,
Secretary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BYRD of Virginia, from the Committee on Finance, without amendment:

H.R. 113. An act to prohibit the severance of service connection which has been in effect for 10 or more years, except under certain limited conditions (Rept. No. 1394);

H.R. 276. An act to amend section 3011 of title 38, United States Code, to establish a new effective date for payment of additional compensation for dependents (Rept. No. 1395);

H.R. 641. An act to amend title 38, United States Code, to make uniform the marriage date requirements for service-connected death benefits (Rept. No. 1396);

H.R. 7502. An act to revise the determination of basic pay of certain deceased veterans in computing dependency and indemnity compensation payable by the Veterans' Administration (Rept. No. 1397);

H.R. 9785. An act to provide for equitable adjustment of the insurance status of certain members of the Armed Forces (Rept. No. 1398);

H.R. 9788. An act to amend section 3104 of title 38, United States Code, to prohibit the

furnishing of benefits under laws administered by the Veterans' Administration to any child on account of the death of more than one parent in the same parental line (Rept. No. 1399);

H.R. 10703. An act to grant a waiver of national service life insurance premiums to certain veterans who become totally disabled in line of duty between the date of application and the effective date of their insurance (Rept. No. 1400); and

H.R. 10898. An act to amend section 315 of title 38, United States Code, to provide additional compensation for seriously disabled veterans having four or more children (Rept. No. 1401).

By Mr. BYRD of Virginia, from the Committee on Finance, with amendments:

H.R. 9322. An act to make permanent the existing suspension of duties on certain coarse wool (Rept. No. 1402); and

H.R. 9881. An act to extend for 2 years the existing provisions of law relating to the free importation of personal and household effects brought into the United States under Government orders (Rept No. 1403).

AMENDMENT OF INTERNAL REVENUE CODE TO PERMIT TAXPAYERS TO ELECT AN OVERALL LIMITATION ON THE FOREIGN TAX CREDIT—MINORITY VIEWS

Mr. BYRD of Virginia. Mr. President, from the Committee on Finance, I report favorably, with amendments, the bill (H.R. 10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit, and I submit a report (No. 1393) thereon. I ask unanimous consent that the report be printed, together with the minority views of the Senator from Tennessee [Mr. GORE].

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Virginia.

COMMISSION ON PROBLEMS OF SMALL TOWNS AND RURAL COUNTIES

Mr. MUNDT. Mr. President, by direction of the Committee on Government Operations, I report favorably, without amendment, the bill (S. 3140) to provide for the establishment of a Commission on Problems of Small Towns and Rural Counties, and I submit a report (No. 1392) thereon.

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar.

Mr. MUNDT. Mr. President, coincident with these remarks, I am today filing a report from the Committee on Government Operations of the Senate on S. 3140, a bill to provide for the establishment of a Commission on the Problems of Small Towns and Rural Counties. This bill was cosponsored by my able colleagues, Senator CASE, of South Dakota, and Senator MANSFIELD, of Montana.

I am very happy to have this bill placed before the Senate for consideration through the filing of this favorable committee report. The problems of rural America—its small towns and counties—are among the most neglected.

I am sure that the people who live in the heartland of our country, in the rural areas, will be grateful that the Senate has decided to do something to help them with their problems.

We have made an effort in Congress to assist, where needed, in solving the social and economic challenges of nearly every distressed segment of American life. We recently aproved in the Senate a bill providing for a study of the problems of metropolitan areas. We have made studies for labor, for farmers, for industry, for large cities, for education, and on many other subjects. It is logical, then, that we turn our eyes toward a portion of our Nation that we desire to see survive, and that is the small town and the rural area of our Nation.

The force for good that comes from the rural towns and communities is almost immeasurable. Every group dealing with population problems comes to recognize that from the small towns comes a great ground swell of moral responsibility and strength. The support of many of our traditions and institutions comes, very often, from the training and background which people have acquired in a rural setting. Character and leadership are the real treasures of the Nation. Nowhere can they be acquired better than in a small town or rural environment. I speak of these things to indicate that a program for preservation and advancement of the small town has something more important than an economic argument to support it.

I am sure that is the reason why so many church groups, groups which deal with rural problems and rural sociology, give their support to the idea of a commission on small town problems.

For instances, most of those who have contacted me in regard to the need for establishing a commission on small town problems, indicate that they see a general breakdown in smaller towns which threatens the existence of churches and other forces for good in these areas. The economic factors which cause deterioration must be combated so that rural churches and schools will survive.

At this point I ask unanimous consent to have printed in the RECORD letters which I have received from Mr. Willis J. Ray, of the Colorado Baptist General Convention; Mr. William H. Hillmer, executive secretary, the Lutheran Church, Missouri Synod; Mr. William H. Rhoades, executive secretary, American Baptist Home Mission Societies; Mr. M. Wendell Belew, director, division of missions, Southern Baptist Convention.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COLORADO BAPTIST
GENERAL CONVENTION,
Denver, Colo., March 4, 1960.

U.S. Senator KARL E. MUNDT,
Senate Building,
Washington, D.C.

HONORABLE SENATOR: I have been advised that you have introduced bill S. 3140 which seeks to provide for the establishment of a commission on problems of small towns.

We assure you that we feel this study is essential. Many of our leaders in all walks of life have come from the rural communities. In fact I have read that 28 of the 33 Presidents have come from small towns or the open country.

We assure you that we will be backing you in the passage of this bill.

Our convention operates in Colorado, Wyoming, Montana, North Dakota, South Dakota, and western Nebraska. We have 1,500 communities and villages of less than 2,500 population, where they need help to preserve and build for the future.

Yours very truly,

WILLIS J. RAY,
Executive Secretary-Treasurer.

THE LUTHERAN CHURCH,
MISSOURI SYNOD,
BOARD FOR MISSIONS IN
NORTH AND SOUTH AMERICA,
St. Louis, Mo., March 1, 1960.

The Honorable KARL E. MUNDT,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MUNDT: I am in receipt of your letter of February 11 in which you bring to my attention a bill which you have introduced in the Senate calling for a Commission To Study Smalltown Problems (S. 3140). I have read the bill and your supporting speech carefully and want to say that I would most heartily endorse the action called for in your bill.

The church denomination to which I belong, namely, the Lutheran Church, Missouri Synod, has a membership of over 2½ million. Of these, 27 percent are members of rural congregations and represent a total of 535,000. In our statistics we designate as rural those churches located in communities of 2,500 or less. If we were to use your definition of a small town as consisting of 10,000 or less then the number would be much greater.

One of the reasons why I am particularly interested in your bill is that I have had occasion to observe how closely the life and work of our churches is related to the life and problems of the community or the small town. Anything which the Government can do to help small towns look at their problems and find solutions will also directly and indirectly benefit our churches.

On the other hand, I want to say that I believe our churches also have a responsibility to the community in the small town. We have been trying to emphasize the responsibility of the churches through institutes, conferences, and literature. I am enclosing a booklet entitled "Rural Digest," which shows the approach of our church with reference to the churches located in small towns.

And so may I again heartily endorse the legislation which you are proposing.

Cordially yours,

WM. H. HILLMER,
Executive Secretary.

AMERICAN BAPTIST HOME,
MISSION SOCIETIES,
New York, N.Y., February 25, 1960.

Hon. KARL E. MUNDT,
U.S. Senate, Washington, D.C.

DEAR SENATOR MUNDT: It was thoughtful of you to enclose in your letter of February 11 a copy of S. 3140, a bill providing for a commission to study small town problems. You are, of course, correct that the American Baptist Home Mission Societies have a very real concern for and interest in the problems of communities of the character which you describe. The proposed bill and your remarks related to it have been considered by members of our staff.

We note one point which is unquestionably clear to you but which was not particularly noted in your remarks. While it is probably true that a sizable proportion of our American population lives in communities of 10,000 or less, there is some reason to question as to whether or not all of such communities are of the distinctly rural or small-town character which you describe. We are constantly aware of many small towns which are so closely involved in the life and activities of neighboring metropolitan communities and are so distinctly in the orbit of the larger communities that their problems are substantially different from the small towns which are representative of the States which have a more rural characteristic. I am sure that any considerations which a proposed commission might give would take adequate recognition of the varying characteristics of these towns of the designated size which is specified in the provisions of your bill. Whatever may be the actual facts in this area of consideration, it is true that there remains a very significant portion of our American population with the peculiar problems of the community which you describe. Clearly these are within the range of concern of our American Baptist Home Mission Societies and any conclusions or facts which might be developed by the proposed commission would be of very substantial value to us as we project our town and country program of mission work.

In our mission work within the United States we are obviously concerned also with the development of the large urban areas and in particular we have in mind the so-called strip cities or communities which are developing as the metropolitan areas of some of our great cities meet each other and develop an almost continuous urban situation in substantial areas of our country. While it is true that the growth of these great urban areas is based to some significant degree upon the rapid increase in our population, it is also true that this growth depends to some extent at least upon the problems which are involved in the smaller communities and the movement incident to the shift of population from small communities to large. It occurs to us that the solutions which you anticipate will be found for some of the problems of the small communities may well point the way to some solutions for the congested program areas in which we have equal concern.

If the commission should be established on the basis of a plan proposed in your bill, I am sure that our staff would be grateful for the opportunity to work constructively in any way that will be helpful to the communities which are intended to be benefited by this proposal.

With appreciation for your consideration in informing us of your proposal, I am,

Cordially yours,

WILLIAM H. RHOADES,
Executive Secretary.

HOME MISSION BOARD,
SOUTHERN BAPTIST CONVENTION,
Atlanta, Ga., February 23, 1960.

Senator KARL E. MUNDT,
U.S. Senate, Committee on Government Operations, Washington, D.C.

DEAR SENATOR MUNDT: The rural church work of the Southern Baptist Convention is included in the Department of Associational Missions of the Home Mission Board of the Southern Baptist Convention. I am delighted with the bill, S. 3140, which you have introduced in the Senate. I appreciate so very much your endeavor in this field and assure you of my support.

You may be interested to know that nearly 24,000 of our present 32,000 Southern Baptist churches are located in small towns or open country. We of the Old South appreciate a need for a study in this area.

If there is any way in which I can be of benefit, do not hesitate to let me know. I will express my interest to other Members of the Senate.

Sincerely yours,

M. WENDELL BELEW,
Secretary, Department of Associational Missions.

Mr. MUNDT. Mr. President, I ask unanimous consent also to have printed in the RECORD copies of two articles which have appeared in church-sponsored organization publications in support of S. 3140. The first is one which appeared in the Methodist Rural Fellowship Bulletin of March 1960. With it, I would like to have printed in the RECORD a copy of a letter which I received from James E. Hankin, the editor of the bulletin.

There being no objection, the article and letter were ordered to be printed in the RECORD, as follows:

SENATOR MUNDT PROPOSES BILL ON SMALL TOWNS

[From the Methodist Rural Fellowship Bulletin, March 1960]

Senator KARL E. MUNDT, of South Dakota, has drafted a proposed bill for the establishment of a Commission on Problems of Small Towns. The bill is S. 2621.

The purpose of such a commission would be to make full investigations and studies of Federal policies and programs relating to the needs and problems of the Nation's small-town areas.

The commission would try to determine the present and future needs of the small towns in the field of public services, including but not limited to planning, highways, water resources, schools, recreational facilities, prevention of juvenile delinquency, municipal financing, and business expansion, including ways and means to induce new businesses to small towns.

The commission would be a Hoover-type commission with 18 members all of whom would serve without salary.

For the purposes of this commission a small town would be one with 10,000 or less population.

If the reader feels that this would be a good bill for your area, you may write to Senator MUNDT, Senate Office Building, Washington, D.C., for a copy. If after studying the proposed bill, you find such a bill was needed, a letter to your Senator and Representative could follow.

METHODIST RURAL FELLOWSHIP,
Rogersville, Tenn., February 17, 1960.

The Honorable KARL E. MUNDT,
Senate Office Building,
Washington, D.C.

DEAR MR. MUNDT: Thank you for the opportunity to read your bill S. 2621 and also your speech at the time the bill was introduced.

I have read both the proposed bill and your remarks. It is evident you have hit upon an area of great need in America. I have shared the proposed bill with our local newspaper editor and find that she is very much in agreement with your position.

Your letter came just at the time we were going to press with our Methodist Rural Fellowship Bulletin. I will clear some space and do an article on it. Around the first of March I will mail you a copy of the Bulletin.

Enclosed you will find carbons of letters to Senators KEFAUVER and GORE.

Perhaps the most helpful thing I can do is to alert our Methodist laymen and ministers of the bill in the pages of our Bulletin.

It is a joy to know of a Senator who is concerned about the problems we face in the small towns of our Nation.

If I can be of further service to you in the passage of this bill, don't hesitate to let me know.

Sincerely yours,

JAMES E. HANKINS,
Bulletin Editor.

Mr. MUNDT. Mr. President, the second article is from Catholic Rural Life, a publication of the National Catholic Rural Life Conference. In addition, I would like to have printed in the RECORD, a letter which I received from Rev. James L. Vizzard, S.J., who is the acting executive director of that organization.

I ask unanimous consent to have the article and letter printed in the RECORD, at this point.

There being no objection, the article and letter were ordered to be printed in the RECORD, as follows:

A bill to establish a Commission on the Problems of Small Towns has been introduced in the U.S. Senate by KARL E. MUNDT, U.S. Senator from South Dakota.

In a speech preceding formal presentation of the bill, Senator MUNDT called attention to the fact that we have many commissions created or proposed to study the problems involved in big government. These he described as the problems of our metropolitan areas, farm problems, labor problems, and the like. He then went on to point out that no agency of Government, no research department, no commission of the Congress has been charged with the responsibility of finding facts and making recommendations of value to America's small towns.

The Senator mentioned many of the problems confronting our small towns. Among them he listed the tendency of transcontinental highways to bypass small communities, the tendency of business to become more concentrated in administration and greater in size, the elimination of many railroad services and the high cost of adequate airport facilities.

Stating that the march of industrial and technical development has not always been in conflict with the advantages of living in small communities, Senator MUNDT pointed out the plus values of small-town life.

"Here," he said "families can be raised, free from the temptations, the turmoil and the disillusionments of life in the big city." He pointed out how air transportation has made it possible for people living in small towns to reach a city within a matter of minutes. Television, he said, brings to people in small towns the same public information and entertainment that are available to people in cities.

The Senator made it clear that he believes small towns are not on the way out. While some have faltered and failed, he told his colleagues, others have made real advances.

The purpose of establishing the commission, he said, is to "obtain reports and recommendations which will enable all of our smaller communities to do what some of them are doing presently: to analyze their opportunities, reappraise their advantages, create new enterprise, attract more people and capital, and move forward into eras of happier living and more prosperous economic activity."

NATIONAL CATHOLIC RURAL LIFE CONFERENCE,
Des Moines, Iowa, February 18, 1960.

The Honorable KARL E. MUNDT,
U.S. Senate,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MUNDT: Thanks very much for calling to my attention your bill S. 2621. You are quite right in judging that the purpose of this proposed legislation follows within the scope of NCRLC's interest.

Enclosed is a copy of a brief article which will appear in the March issue of our monthly magazine, Catholic Rural Life. As you will see, we are urging our NCRLC members to let you know of their support.

With every good wish.

Very sincerely yours,
JAMES L. VIZZARD, S.J.,
Acting Executive Director.

Mr. MUNDT. Mr. President, some of these letters and articles refer to S. 2621 instead of S. 3140. That is because on August 31, 1959, I introduced S. 2621; but on March 5, 1960, I replaced it with S. 3140, which is identical to my earlier bill except it has been expanded to include rural counties as well as small towns, and I was happy to add the names of Senators CASE of South Dakota, and MANSFIELD as cosponsors of S. 3140.

A question may be raised as to the need for such a commission to study the changing conditions and the problems of small rural towns. It should be immediately apparent that these small towns are totally without resources to assist themselves in this type of survey. They do not have the research facilities to undertake studies, nor the finances to underwrite them. They do not have organizations to bind them together closely, so that there can be communication on common problems and the factors leading to them. Whatever argument we can put forward to support a study of metropolitan problems can be multiplied tenfold when applied to our small towns.

Yearly, some of our smaller communities wither; at the same time, others flourish; and no one can explain why one prospers and the other does not.

It may happen that an activity not related to the community at all is the contributing factor in both instances. In some cases that activity may have Federal direction and control. We ought to know when, where, why, and how this happens.

In our big highway program, we are going to have an impact on hundreds of small towns in rural America. The transcontinental trunk lines make it easy for people to whiz by the small town. It throws the smalltown merchant into direct competition with the stores in a larger city which now becomes only minutes away with high speed cars and superhighways for the convenience of the people. This is progress, and no one wants to turn back the clock, but we should continue to review the new problems created by progress and to assess our situation so that we can preserve that which is good and that which is essential, even as we go forward to better living.

Other Federal activities which may have the capacity to contribute to the growth or to the demise of the small town is the Government's policy in selecting sites for Federal facilities. Efforts to channel more of the Government's procurement to small firms which operate in smaller communities can be a contributing factor in assisting these communities to survive.

However, Federal planning in its special activities as they relate to small towns is not the final answer. As we travel about, we witness one town that is struggling to survive. Farther on, we see another that is on the move, growing and expanding. To the casual observer, the reason why one does not grow and the other booms is not apparent, but there must be a reason. A study which such a commission as this can undertake is to try to find out what factors need to be considered, what efforts can be expected to succeed, and what pitfalls should be avoided.

Throughout history, Mr. President, the American small town has made tremendous contributions to the development of the American way of life. History is replete with examples of the small-town boy who gained national recognition and assumed national leadership. The existence of small towns has helped to contribute the necessary balances to check against the political and economic extremes and excesses in one direction or another which have plagued and destroyed other governments and countries.

The small towns of America provide the stabilizing forces. They are the bastions for producing the freedoms of Americans at home and for preserving the great institutions of private ownership and competitive enterprise which have teamed up to make America great and to keep it strong.

It follows, then, our Nation's welfare depends on the reservoir of strength which comes from our small towns and rural areas. It is only good business to keep them strong and to preserve them in the American tradition.

It is my hope that the leadership of the Senate will place S. 3140 on its legislative calendar for early action. I am confident the Senate will approve it, and that it can do much toward preserving and promoting that great American institution known as the small town of rural America.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. MUNDT. I am happy to yield.

Mr. CASE of South Dakota. It is a pleasure for me to be associated with my distinguished senior colleague in the presentation of this bill to the Senate. The place of the small town in America has never been better stated than it was in a poem by Badger Clark, our poet laureate in South Dakota, who passed away a few years ago.

I should like unanimous permission to insert that poem at this point in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

SMALL TOWN
(By Badger Clark)

The circling cones of bison hide,
That made the village of the Sioux,
Rose near as high, spread near as wide,
O little western town, as you!

But small-town skylines all are great,
And small-town air is clear and sweet,
And small-town folk are friend and mate,
Not flitting shadows on the street.

No smoke of factories uprolls;
No market roars with shouted bids.
The small town's finest fruit is souls;
Its prize commodity is kids.

For while the city struts in pride,
And trumpets far its loud renown,
The men who govern, there, and guide,
Are children of the little town.

That is the small town's latent power—
Some name upon its schoolroom page,
The future hero of the hour,
The future glory of an age.

'Twas always so; 'twill always be—
Small town, the great folks' starting place,
A small-town boy in Galilee
Re-routed all the human race.

Mr. CASE of South Dakota. Badger Clark points out in this poem that it was from the small town of Galilee that came He who rerouted the entire human race.

Mr. MUNDT. I thank the Senator for his very important contribution, as well as his cosponsorship of the proposed legislation.

I also appreciate the fine help we have had from the assistant majority leader, the Senator from Montana [Mr. MANSFIELD], in supporting this measure.

Badger Clark was indeed a great American. His poem was read around the world. I think it is most appropriate that the poem be published at the point in the RECORD suggested by my colleague.

UNITED STATES AGAINST LOUIS SHOMER—APPEARANCE OF CERTAIN SENATE EMPLOYEES AS WITNESSES

Mr. MANSFIELD. Mr. President, on behalf of the chairman of the Committee on the Judiciary [Mr. EASTLAND], I report three original resolutions and ask unanimous consent for their immediate consideration.

From the District Court of the United States for the Southern District of New York there have been issued and served subpenas ad testificandum and duces tecum to Elizabeth McGill, chief clerk, of the Subcommittee To Investigate Juvenile Delinquency, of the Committee on the Judiciary, U.S. Senate, and Joseph A. Davis, chief clerk, Committee on the Judiciary, U.S. Senate, to appear, produce certain papers, and testify in the pending case of *United States* v. *Louis Shomer* (C 153–26).

There has also been issued and served from the same District Court of the United States for the Southern District of New York, a subpena ad testificandum to Peter N. Chumbris, minority counsel,

of the Subcommittee on Antitrust and Monopoly, of the Committee on the Judiciary, U.S. Senate, and formerly associate counsel of the Subcommittee To Investigate Juvenile Delinquency, of the Committee on the Judiciary, U.S. Senate, in the above-mentioned case which is now pending.

The appearance of these witnesses concerns certain testimony, under oath, which was taken during the course of hearings conducted by the Subcommittee To Investigate Juvenile Delinquency, of the Committee on the Judiciary, in New York, N.Y., during May and June 1955.

Mr. President, I move that the Senate agree to these three resolutions so that the persons named may appear and testify in the scheduled trial of United States against Louis Shomer.

The ACTING PRESIDENT pro tempore. The first resolution will be read, for the information of the Senate.

The legislative clerk read the resolution (S. Res. 322) as follows:

Whereas in the case of the *United States* v. *Louis Shomer* (C 153–26) pending in the District Court of the United States for the Southern District of New York, a subpena ad testificandum and a subpena duces tecum was issued upon application of S. Hazard Gillespie, Jr., United States Attorney for the Southern District of New York and addressed to Elizabeth McGill, Chief Clerk of the Subcommittee To Investigate Juvenile Delinquency of the Committee on the Judiciary, United States Senate, directing her to appear as a witness before the said Court and to bring with her certain papers in the possession and under the control of the Senate of the United States, and to give testimony which may relate to matters which are in the possession and under the control of the Senate, and

Whereas said subcommittee held hearings in New York, New York, on May 24, 26, 31, and June 9 and 18, 1955; and

Whereas said case is the trial of an indictment alleging that Louis Shomer on May 26 and May 31, 1955, committed perjury, in violation of title 18, United States Code, section 1621, in testifying before said subcommittee at hearings held in New York, New York, on May 31, 1955: Therefore be it

Resolved, That by the privileges of the Senate no evidence under the control of or in the possession of the Senate of the United States (which possession and control extends to evidence in the possession or under the control of any committee or subcommittee of said Senate) can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession except by its permission; and be it further

Resolved, That when it appears by the order or process of a court or of a judge and for or of any legal officer charged with the administration of the orders or processes of such court or judge that documentary evidence in the possession of or under the control of the Senate is needful for use in any court of justice or before any judge or any legal officer for the promotion of justice the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; and be it further

Resolved, That when it appears by the order or process of a court or of a judge thereof, or of any legal officer charged with the administration of the orders or processes of such court or judge that testimony of an employee of the Senate is needful for use in any court of justice or before any judge or such legal officer for the promotion of justice and further, when it appears that such testimony may involve matters under the control of or in the possession of the Senate, the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; and be it further

Resolved, That Elizabeth McGill, chief clerk of the Subcommittee To Investigate Juvenile Delinquency of the Committee on the Judiciary, United States Senate, be, and she hereby is, authorized, in response to the aforementioned subpenas to attend at the trial of such case at the date and time specified in said subpenas or at an adjourned date and time and to testify and to answer such questions as may be put to her, and in the giving of her testimony she be, and she hereby is, specifically authorized to testify as to matters which are or have been in the possession or under the control of the Senate of the United States and which are deemed by the court to be material and relevant; and be it further

Resolved, That said Elizabeth McGill, be and she hereby is specifically authorized at said trial to produce and identify copies of, and testify as to the preparation, receipt, filing, transmission and whereabouts of, documents which are or have been in the possession or under the control of the Senate of the United States; and be it further

Resolved, That in accordance with the privileges of the Senate and established Senate practice designed to prevent loss of documents and interference with Senate business, no original document in the possession or under the control of the Senate shall be removed from its place of filing or custody for production at said trial: *Provided, however*, That any original documents in the possession or under the control of the Senate, which have been deemed material and relevant by the court may be inspected and/or copied by said court or any of its agents or officers, or the proper parties to the proceedings; at their usual place of custody; and be it further

Resolved, That a copy of these resolutions be transmitted to the said court as a respectful answer to the subpenas aforementioned.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 322) was considered and agreed to.

The ACTING PRESIDENT pro tempore. The next resolution will be read, for the information of the Senate.

The legislative clerk read the resolution (S. Res. 323), as follows:

Whereas, in the case of the *United States* v. *Louis Shomer* (C 153–26) pending in the District Court of the United States for the Southern District of New York, a subpena ad testificandum and a subpena duces tecum was issued upon application of S. Hazard Gillespie, Jr., United States attorney for the southern district of New York, and addressed to Joseph A. Davis, chief clerk of the Committee on the Judiciary, United States Senate, directing him to appear as a witness before the said court and to bring with him certain papers in the possession and under the control of the Senate of the United States, and to give testimony which may relate to matters which are in the possession and under the control of the Senate; and

Whereas a Subcommittee To Investigate Juvenile Delinquency, of said Committee on the Judiciary, held hearings in New York, New York, on May 24, 26, 31 and June 9 and 18, 1955; and

Whereas said case is the trial of an indictment alleging that Louis Shomer on May 26 and May 31, 1955, committed perjury, in violation of Title 18, United States Code, Section 1621, in testifying before said subcommittee at hearings held in New York, New York, on May 26 and May 31, 1955: Therefore be it

Resolved, That by the privileges of the Senate no evidence under the control of or in the possession of the Senate of the United States (which possession and control extends to evidence in the possession or under the control of any committee or subcommittee of the Senate) can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession except by its permission; and be it further

Resolved, That when it appears by the order or process of a court or of a judge and for or of any legal officer charged with the administration of the orders or processes of such court or judge that documentary evidence in the possession of or under the control of the Senate is needful for use in any court of justice or before any judge or any legal officer for the promotion of justice the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; and be it further

Resolved, That when it appears by the order or process of a court or of a judge thereof, or of any legal officer charged with the administration of the orders or processes of such court or judge that testimony of an employee of the Senate is needful for use in any court of justice or before any judge or such legal officer for the promotion of justice and further, when it appears that such testimony may involve matters under the control of or in the possession of the Senate, the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; and be it further

Resolved, That Joseph A. Davis, chief clerk of the Committee on the Judiciary, United States Senate, be, and he hereby is, authorized, in response to the aforementioned subpenas to attend at the trial of such case at the date and time specified in said subpenas or at an adjourned date and time and to testify and to answer such questions as may be put to him, and in the giving of his testimony he be, and he hereby is, specifically authorized to testify as to matters which are or have been in the possession or under the control of the Senate of the United States and which are deemed by the court to be material and relevant; and be it further

Resolved, That said Joseph A. Davis be, and he hereby is specifically authorized at said trial to produce and identify copies of, and testify as to the preparation, receipt, filing, transmission and whereabouts of, documents which are or have been in the possession or under the control of the Senate of the United States; and be it further

Resolved, That in accordance with the privileges of the Senate and established Senate practice designed to prevent loss of documents and interference with Senate business, no original document in the possession or under the control of the Senate shall be removed from its place of filing or custody for production at said trial: *Provided, however*, That any original documents in the possession or under the control of the Senate, which have been deemed material and relevant by the court may be inspected and/or copied by said court or any of its agents or officers, or the proper parties to the proceedings, at their usual place of custody; and be it further

Resolved, That a copy of these resolutions be transmitted to the said court as a respectful answer to the subpenas aforementioned.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 323) was considered and agreed to.

The ACTING PRESIDENT pro tempore. The third resolution will be read, for the information of the Senate.

The legislative clerk read the resolution (S. Res. 324), as follows:

Whereas in the case of the *United States* v. *Louis Shomer* pending in the District Court of the United States for the Southern District of New York, docket number C 153-26, a subpena ad testificandum was issued upon application of S. Hazard Gillespie, Jr., United States attorney for the southern district of New York and addressed to Peter N. Chumbris, minority counsel of the Subcommittee on Monopoly and Antitrust Legislation of the Committee on the Judiciary, United States Senate, and formerly associate counsel of the Subcommittee To Investigate Juvenile Delinquency of the Committee on the Judiciary, United States Senate, directing him to appear as a witness before the said court and to give testimony which may relate to matters which are in the possession and under the control of the Senate; and

Whereas said Subcommittee To Investigate Juvenile Delinquency held hearings in New York, New York, on May 24, 26, 31 and June 9 and 18, 1955; and

Whereas, said case is the trial of an indictment alleging that Louis Shomer on or about May 26 and 31, 1955, committed perjury in violation of title 18, United States Code, section 1621, in testifying before said Subcommittee To Investigate Juvenile Delinquency at hearings held in New York, New York, on May 26 and 31, 1955: Therefore be it

Resolved, That by the privileges of the Senate no evidence under the control and in the possession of the Senate of the United States (which possession and control extends to evidence in the possession or under the control of any committee or subcommittee of the Senate), can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession except by its permission; and be it further

Resolved, That when it appears by the order or process of a court or of a judge thereof or of any legal officer charged with the administration of the orders or processes of such court or judge that testimony of an employee of the Senate is needful for use in any court of justice or before any judge or any legal officer for the promotion of justice and further, when it appears that such testimony may involve matters under the control of or in the possession of the Senate, the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate; and be it further

Resolved, That Peter N. Chumbris be, and he hereby is, authorized, in response to the aforementioned subpena, to attend at the trial of said case at the date and time specified in said subpena or at an adjourned date and time, and to testify and to answer such questions as may be put to him, and in the giving of his testimony he be, and he hereby is, specifically authorized to testify concerning matters (documentary or otherwise) which are or have been under the control of, or in the possession of, the Senate of the United States and which are deemed by the court to be material and relevant; and be it further

Resolved, That a copy of these resolutions be transmitted to the said court as a respectful answer to the subpena aforementioned.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 324) was considered and agreed to.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MANSFIELD:

S. 3571. A bill to incorporate the Metropolitan Police Relief Association of the District of Columbia; to the Committee on the District of Columbia.

By Mr. CURTIS:

S. 3572. A bill to permit the State of Nebraska to modify the agreement heretofore entered into by it pursuant to section 218 of the Social Security Act so as to exclude service performed within such State by justices of the peace and constables, and to provide for social security coverage of certain justices of the peace and constables as self-employed individuals; to the Committee on Finance.

By Mr. JAVITS:

S. 3573. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 to provide for the further use of foreign currencies acquired thereunder for certain foreign expenses requisite to participation by foreign nations in trade fairs in the United States; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of South Dakota:

S. 3574. A bill to strengthen the enforcement provisions of the Federal Water Pollution Control Act and extend the duration of the authorization of grants for State water pollution control programs, and for other purposes; to the Committee on Public Works.

Mr. CASE of South Dakota subsequently said: Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Secretary of Health, Education, and Welfare, Mr. Flemming, setting forth what the bill which I have introduced today will do in extending and amending certain provisions of the Federal Water Pollution Control Act.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE,
Washington, May 18, 1960.

Hon. SAM RAYBURN,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I am enclosing for your consideration a draft of a bill to amend certain provisions of the Federal Water Pollution Control Act (Public Law 660, 84th Cong.) approved July 9, 1956. This bill has four principal objectives:

1. To strengthen State and interstate water pollution control programs;

2. To make more effective assistance to municipalities in the construction of necessary sewage treatment works;

3. To provide for more effective prevention and control of water pollution caused by Federal installations; and

4. To strengthen the role of the Federal Government in abating pollution of interstate waters.

To carry out these objectives, the bill would make the following changes in the Federal Water Pollution Control Act:

Extend, for an additional 5 years, the provision for Federal grants to State and interstate water pollution control agencies for administration of their programs;

Make it possible for several communities to get individual Federal grants and use these funds in the construction of a single joint sewage treatment facility;

Make all interstate navigable waters and coastal waters subject to Federal abatement enforcement authority whether or not there is a showing of interstate pollution if abatement action is requested by a State or a municipality with the concurrence of the State, and authorize the Secretary of Health, Education, and Welfare to issue final orders in enforcement actions;

Make discharges from Federal installations subject to administrative findings and recommendations in Federal water pollution abatement actions conducted by the Department of Health, Education, and Welfare.

(We also propose a clarifying amendment in section 12, which preserves existing functions of other Federal agencies in the water pollution control field.)

The proposed amendments will, we believe, provide an improved statutory base for the Federal-State water pollution control and abatement program. They contain our legislative recommendations for strengthening the enforcement provisions of the act in accordance with the President's 1961 budget message and his message dated February 22, 1960, returning H.R. 3610 to the Congress without his approval.

Before explaining in greater detail the purpose and effect of these amendments, I believe it would be helpful to put them in a perspective of the development of the present Federal Water Pollution Control Act and the programs of water pollution control in which the Department of Health, Education, and Welfare has been engaged under this law.

BRIEF HISTORY OF FEDERAL WATER POLLUTION CONTROL LEGISLATION

The first specific Federal water pollution control legislation was enacted in the 1890's primarily for preventing impediments to navigation. The Public Health Service Act of 1912 contained provisions authorizing investigations of water pollution related to disease. The Oil Pollution Act of 1912 was directed to control oil discharges in coastal waters causing damage to aquatic life, harbors and docks, and recreational facilities.

Comprehensive water pollution control legislation was nearly enacted by the 74th Congress in 1936. Legislation was enacted by the 75th Congress in 1938 but vetoed by the President because of technical defects. Again in 1940, the 76th Congress narrowly missed passing such legislation.

No further serious efforts were made to advance water pollution control legislation until 1947 because of World War II.

The 80th Congress enacted and on June 30, 1948, the President signed the first legislation in the history of the Federal Government which provided for a comprehensive Federal, State, and local cooperative approach with respect to water pollution control.

The Water Pollution Control Act of 1948 (Public Law 845, 80th Cong.) was enacted as temporary, experimental legislation which was to be reviewed after a trial period (5 years) and revised on the basis of experience. It was extended for an additional 3-year period to June 30, 1956, by Public Law 579, 82d Congress.

In 1955 President Eisenhower recommended that the Congress enact permanent comprehensive Federal water pollution control legislation. The Department of Health, Education, and Welfare prepared and submitted such legislation, and after study and debate by both Houses, the 84th Congress enacted Public Law 660, the Federal Water Pollution Control Act, which was essentially an improvement and extension on a

permanent basis of the 1948 act. In large measure, the Congress adopted the recommendations of this Department.

The basic policy of the 1948 act was declared by the Congress "to recognize, preserve, and protect the primary responsibilities and rights of the States in controlling water pollution * * *." The Congress declared the same basic policy in subsection 1(a) of the 1956 act, viz "to recognize, preserve, and protect the primary responsibilities and rights of States in preventing and controlling water pollution * * *." This policy is underlined in subsection 1(b) which provides that "Nothing in this act shall be construed as impairing or in any manner affecting any right or jurisdiction of the States with respect to the water (including boundary waters) of such States."

This basic policy is reflected in the principal programs provided both in the 1948 act and the improved, permanent 1956 act and has been faithfully followed in the administration of these programs.

PROGRAMS UNDER 1948 (PUBLIC LAW 845) AND 1956 (PUBLIC LAW 660) ACTS

The principal programs under the 1948 act, together with the improvements effected by the 1956 act, and a statement of the record of accomplishments in their administration is set forth below.

1. Collection and dissemination of information

Public Law 845 directed the Surgeon General to prepare and publish reports of studies, research, etc., made under the act. Public Law 660 broadened this duty to cover the collection and dissemination of all information, including basic data on chemical, physical, and biological water quality, relating to water pollution and its prevention and control.

A national water quality network was established in 1957 to determine present pollution conditions and long-term trends in water quality improvement or deterioration. Seventy-two of the projected 300 sampling stations needed to provide reasonable water quality intelligence on interstate streams have been established, and results are evaluated and published annually.

National inventories of municipal and industrial waste facilities have been published and scheduled for updating at 5-year intervals. An inventory of municipal water supplies in communities of over 25,000 population has been published and one for communities under 25,000 population is nearly completed. These are scheduled for updating at 5- and 2-year intervals respectively. These inventories show status and needs for water supply and waste treatment facilities. Contract award data are collected and published annually and serve as a measure of progress in meeting needs. Basic data are being recorded by modern machine tabulating methods to be quickly available to water resources agencies and others.

2. Research

Authority was conferred by Public Law 845 for undertaking and supporting research in problems of water pollution control with emphasis on industrial waste.

Although resources were limited under Public Law 845, several research breakthroughs were made. An example is the development of the sewage oxidation pond which has proved to be an efficient but inexpensive sewage treatment method for the smaller municipalities and communities. Other examples are the development of the dissolved oxygen analyzer and the carbon filter technique. The former is the first continuous recording instrument of its kind, vitally needed in stream studies and surveillance. The latter technique has greatly helped to further our knowledge of minute quantities of new organic pollutants in water. Industrial waste guides were prepared for major industries for their use in water pollution prevention and control.

Public Law 660 broadened the authority to conduct and support research by including prevention as well as control of water pollution and by adding authority to make grants for research and training projects and demonstrations to public and private agencies including universities and other qualified institutions and to establish and maintain research fellowships.

The water supply and water pollution research program has been substantially expanded under Public Law 660. Significant progress has been made through the application of the engineering, chemistry, physics, microbiological, biological, and related sciences to the problems of water supply and pollution control. An example is a greatly enlarged arsenal of tools now available for detecting new synthetic contaminants and their pollution characteristics and effects. Another is the initiation of a major research effort to develop entirely new processes for removing much more of the pollutants from waste waters than is possible by existing methods. The success of this latter project is of utmost importance with respect to the problem of increasing pollution and the need to reuse water over and over to supply demands.

3. Technical assistance

Authority was conferred by Public Law 845 for giving technical assistance to State and interstate water pollution control agencies.

The program of technical assistance to State and interstate agencies took the form of stream surveys, biological investigations, special studies of industrial wastes, solution of complex pollution problems, and the loan of engineering specialists to States to assist in water resources studies.

Public Law 660 broadened the authority for technical assistance to State and interstate agencies to include authority to provide training in technical matters, and to make grants-in-aid to public and private agencies for training and demonstration projects, and to contract with these agencies for such projects.

Technical assistance to State and interstate agencies has been widely expanded under Public Law 660, including technical training of their personnel. With the improved State programs that have been strengthened by Federal program grants, it has been possible for the Public Health Service to put more of its resources into the larger problems requiring assistance. These projects have included full-scale river studies, laboratory evaluations, special industrial waste studies, and assignment of specialized technical personnel to water pollution control agencies.

4. Program grants

Authority was conferred by Public Law 845 for assistance to State and interstate water pollution control agencies in the form of grants for industrial waste studies. Under Public Law 845, the appropriation authorization was limited to $1 million per annum and funds were made available only for fiscal years 1950, 1951, and 1952.

Public Law 660 recast and broadened this authority to make grants for 5 years to State and interstate agencies to assist them in meeting costs of establishing and maintaining adequate water pollution prevention and control programs including cost of training personnel and administration of programs in accordance with effective, comprehensive plans, subject to review and approval by the Surgeon General. The annual appropriation authorization was increased from $1 million to $3 million.

Program grants to State and interstate agencies have served the purpose of improving and strengthening their water pollution control programs, and stimulating increased State appropriations. Since 1956 the level of State appropriations has increased from $4.2 million to $7.6 million for fiscal year 1960. Federal appropriations for this purpose were $2 million in fiscal year 1957 and have been $3 million each for fiscal years 1958, 1959, and 1960.

State and interstate agencies have increased their technical and supporting staffs by nearly 50 percent. They have been able to initiate or expand pollution surveys, research, basic data collection, and more aggressive enforcement of State laws. Grants have made possible the purchase of major items of field and laboratory equipment needed to support the expanding programs.

5. Construction grants

Authority was conferred by Public Law 845 to make loans to States and municipalities to help finance the construction of sewage treatment plants.

In one respect Public Law 660 went beyond the recommendations of the administration by providing for Federal grants to localities to pay part of the cost of constructing municipal sewage treatment works. This construction grants program supplanted the loan program in the 1948 act for which no funds had ever been appropriated by the Congress.

As of March 31, 1960, a total of 2,082 Federal grant offers to municipalities have been made in support of projects costing an estimated $1.016 billion. The Federal grant offers totaled $175 million contrasted with local commitments of $841 million, showing a local-to-Federal dollar participation ratio of 4.8 to 1.

6. Comprehensive planning

Authority was conferred by Public Law 845 and continued by Public Law 660 for the development of comprehensive plans for water pollution control by major water drainage basins in cooperation with State and interstate agencies, municipalities and industries.

Under Public Law 845 the Public Health Service published 71 water pollution control program reports on river basins that were cooperatively prepared with the appropriate State agencies. These reports covered all of the major drainage basins of the country and are serving as the framework for the development of comprehensive water pollution control plans.

Under Public Law 660 the Public Health Service has expanded its initiation of major special project activities and initiated the development of comprehensive water pollution control plans. An expansion of these important activities had been recommended strongly by committees advisory to the Public Health Service and by supporters of water pollution control.

At present 24 special projects are under way and these studies cover such problems as land management practices affecting water quality, the effect of water resource projects and other construction on water quality and use, insecticide hazards, water evaporation control, radioactive pollution, development of master regional plans for water supply and waste disposal, and many others.

In addition, the Department of Health, Education, and Welfare has agreed with the Department of the Army to cooperate in the administration of the Water Supply Act of 1958 by determining municipal and industrial water supply requirements over the next 50 years and the economic value thereof in connection with authorized Corps of Engineer construction projects. Ten requests for such determinations have been complied with and work in connection with 46 other construction projects is proceeding.

7. Interstate compacts

Authority was conferred by Public Law 845 and continued by Public Law 660 to promote

interstate cooperation in water pollution control through encouragement of interstate compacts.

Technical assistance has been given in the development, negotiation, and consideration by the Congress of seven interstate compacts, as follows:

Water Pollution Compacts

Klamath River Basin compact—California and Oregon. Congressional approval, Public Law 85–222, August 30, 1957.

Tennessee River Basin compact—States eligible: Alabama, Georgia, Kentucky, Mississippi, North Carolina, Tennessee, and Virginia. States which have enacted the compact: Tennessee, Mississippi, and Kentucky. Congressional approval, Public Law 85–734, August 28, 1958.

Columbia interstate compact—States eligible: Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming. Still in process of negotiation. Latest proposal is to emphasize water pollution control.

Water Resources Compacts With Minor Provisions on Water Pollution Control

Bear River compact—Idaho, Utah, and Wyoming. Congressional approval, Public Law 85–348, March 17, 1958.

Wabash Valley compact—Indiana and Illinois. Congressional approval, Public Law 86–375, September 23, 1959.

Northeastern water and related land resources compact—States eligible: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. States which have enacted the compact: Rhode Island, Connecticut, Massachusetts, and New Hampshire. Bills for congressional approval introduced in this session.

Great Lakes Basin compact—Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin. New York and Ohio have not yet enacted the compact. Bills for congressional approval pending in this session.

8. Improvement of State laws

Authority was conferred by Public Law 845 and continued by Public Law 660 to encourage the enactment of better State laws governing water pollution control.

In 1949 the Public Health Service developed a suggested model water pollution control law in cooperation with the Council of State Governments and with State and interstate water pollution authorities which was published in 1950. Its purpose was to encourage uniform State water pollution control legislation. While Public Law 845 was in effect, 28 States passed new legislation or modified existing statutes; 7 more States have taken such action since Public Law 660 was enacted.

9. Research and training facility

Authority was conferred by Public Law 845 for the construction of facilities for research and study of water pollution and training of personnel for water pollution control work.

The Robert A. Taft Sanitary Engineering Center was completed and placed in operation in 1953. It is the largest and finest research facility of its kind in the world.

10. Advisory board

A water pollution control advisory board was established within the Public Health Service by Public Law 845 to review its policies and programs under the act and to make recommendations to the Surgeon General. The board has held seven meetings since being reconstituted under Public Law 660 and has made many substantive recommendations to the Surgeon General and a report to the President in 1958. Its next meeting is scheduled to be held at the Robert A. Taft Sanitary Engineering Center in Cincinnati.

Measures Against Pollution of Interstate Waters

In addition to the principal programs discussed above, both Public Law 845 and Public Law 660 established a role for the Federal Government to take action to abate pollution of interstate waters.

The enforcement provisions of Public Law 845 were considered to be so weak as to be ineffective, and opinion corroborated in the statement of the House Appropriations Committee in 1955 when funds for enforcement activities were denied. Indeed, only one enforcement action was undertaken under Public Law 845 when, on the basis of surveys, findings and reports, and informal requests for assistance from the State water pollution control agencies of Arkansas and Louisiana, the Surgeon General initiated enforcement action in the Corney River Basin involving these two States. Although this case was successfully completed under the provisions of Public Law 845 in 1957, this result was doubtless somewhat induced by the enactment of the new enforcement provisions of Public Law 660.

In Public Law 660 the provisions dealing with the Federal enforcement role were revised to make more effective the Federal role in abating interstate pollution. An accelerated interstate enforcement program was initiated under Public Law 660. Enforcement actions have been taken in 11 interstate pollution situations, 7 on the Surgeon General's initiative and 4 at the request of 1 or more States, and these required 11 formal conferences and 2 public hearings. These actions were taken to abate pollution in 4,000 miles of interstate streams. It is estimated that the remedial measures agreed upon at the conferences and required by findings of the public hearings will include the construction of at least $500 million worth of waste treatment facilities.

Detailed Statement of Legislative Recommendations

Now, after more than 3 years of operating experience under the Federal Water Pollution Control Act, we have certain suggestions and modifications which would further improve the program.

To strengthen State and interstate water pollution control programs

Section 5 of the Federal Water Pollution Control Act authorizes appropriation of sums up to $3 million annually, for a period of 5 years, for grants to State or interstate water pollution control agencies to assist them in meeting the costs of establishing and maintaining adequate measures for the prevention and control of water pollution. Authority for appropriation of these grant funds expires on June 30, 1961.

As we have stated earlier, in the almost 4 years these Federal grants have been in operation they have stimulated and encouraged significant progress in State and interstate water pollution control programs. Among the effects of these grants on State programs have been increased appropriations, technical and supporting staff, water quality monitoring activities (including some radiological surveillance now performed by about half the States), stepped-up enforcement, and expanded research.

Despite this progress, the current State and interstate expenditure rate of $10.6 million (inclusive of Federal grant funds) must be increased in order to make a significant impact on the Nation's pollution problem in the next decade. Lack of current data on the condition of waters in most of the States, information on industrial wastes, and new control techniques, as well as the qualified personnel to carry them out, remain serious problems.

Continued Federal financial support of State and interstate water pollution control programs is essential to consolidate and build upon the gains stimulated by the first 5 years of the grant program. Withdrawal of this support would be detrimental to the cooperative Federal, State and interstate water pollution control effort; assurance, at this time, of continued support after June 30, 1961, would facilitate State planning for effective control programs. We therefore recommend amendment of section 5(a) of the Federal Water Pollution Control Act to extend for another 5 years the appropriation authority for State and interstate agency program grants.

To make more effective assistance to municipalities in the construction of necessary sewage treatment works

In order to facilitate multimunicipal projects, we recommend an amendment to section 6 (which authorizes grants to a State, municipality, or intermunicipal or interstate agency for the construction of necessary sewage treatment works), to apply the present ceiling of 30 percent of the estimated cost of a project, or $250,000, separately in the case of a project serving more than one municipality, to each municipality's share of such project (as determined by the Surgeon General on a reasonable and equitable basis).

We also suggest amendment of subsection (c) of section 6 to permit reallocation of construction grant funds that are not obligated for the construction of approved projects within 18 months. The proposal is that these funds would then be reallotted to States which were in a position to go forward (during the 6 months that the grant funds remained available) with projects that had been approved by the State water pollution control agency. Such reallocation authority would improve the construction grant program by assuring use of the full amount appropriated for this purpose each year.

To provide for more effective prevention and control of water pollution caused by Federal installations

Section 9 of the present act gives congressional recognition to the importance of cooperation on the part of Federal installations in preventing or controlling pollution of waters into which such installations discharge polluting matter. In order to emphasize congressional endorsement of the policy that the Federal Government should participate fully and responsibility in cases where the enforcement provisions of the Federal act are invoked, it is recommended that section 9 of the act be amended to provide that summaries of conferences prepared pursuant to section 8(c)(3) shall include references to discharges from Federal installations, that notices of hearings pursuant to section 8(e) shall be sent to Federal agencies having jurisdiction over any property involved, and that findings and recommendations of the hearing board shall also include references to discharges from Federal property which are contributing to pollution found by the boards.

To strengthen the role of the Federal Government in abating pollution of interstate waters

We have carried out the enforcement provisions authorized by section 8 of the Federal Water Pollution Control Act in a vigorous manner and are happy to report that the results of this Federal-State water pollution control activity have been gratifying. Many complex problems of long duration have proved amenable to solution by the enforcement procedure provided by the Federal act. Based on experience with this procedure, we recommend strengthening these enforcement provisions.

The enforcement procedures outlined in section 8 of the act provide a mechanism for bringing into play the combined strengths of State water pollution control

agencies, interstate agencies, and the Federal Government. In harmony with the policy declaration of the act, this Federal-State cooperative enforcement program is characterized by its use of conferences and public hearings to achieve full investigation and a thorough understanding by all interested agencies of the nature and extent of pollution problems and the remedial action required. Ample opportunity for action by State control agencies is provided for at appropriate stages of these procedures.

These procedures are now authorized only for cases of pollution which are damaging to health or welfare of persons in a State other than a State of origin, and they can be set in motion either by the Surgeon General, on his own initiative, or by a request addressed to the Surgeon General by a State Governor, or a State water pollution control agency.

Our first recommendation for the amendment of section 8 would make these procedures available also whenever there is pollution affecting legitimate uses of the waters of any navigable interstate stream, whether or not there is interstate pollution. Federal jurisdiction in this kind of pollution situation, however, would be exercised only upon request by the State (or, as explained below, a municipality) and then only when the interference with legitimate uses is judged to be of sufficient significance to require the initiation of enforcement procedures. Such an extension of Federal authority could serve to improve serious pollution situations which are also of great national importance although not endangering the health or welfare of persons in a State other than that in which the discharge originates. Inclusion of navigable interstate waters within the scope of the water pollution enforcement procedures is consistent with constitutional authority over these waterways.

Our second recommendation for improving enforcement procedures is to provide a mechanism for the initiation of such procedures by a municipality adversely affected by pollution. This avenue for remedial action should, however, we believe, be limited to situations in which the Governor or State water pollution control agency has concurred in the municipality's request to the Surgeon General. Statutory recognition of the vital interests of municipalities in pollution abatement problems—and of the propriety of their setting in motion all the normal Federal-State enforcement procedures—would encourage active participation by municipal government agencies without detracting from the responsibilities of State pollution control agencies. Accordingly, with that qualification of State concurrence, we recommend inclusion of the governing bodies of municipalities in section 8(c), which specifies the agencies which may request action by the Surgeon General.

In addition, we recommend clarifying and strengthening the Secretary's role in the enforcement process by providing that the findings and recommendations of the hearing boards (after the public hearing now authorized by section 8) shall be the Secretary's findings and recommendations except to the extent modified by him and by providing for issuance of an order (instead of a notice) by him for abatement of any pollution found to exist. To afford adequate protection for the parties in interest, provision is made for appeal from the order to be taken within 60 days to the U.S. Court of Appeals; the court's review would be on the record and these provisions of the draft bill are consistent with the judicial review provisions of the Administrative Procedure Act. Jurisdiction of civil actions brought by the Attorney General, at the request of the Secretary, to enforce any order issued by the Secretary or by a U.S. Court of Appeals would be vested in the U.S. district courts.

Finally, the draft bill would amend the definition of "interstate waters" in section 11(e) of the present act so as to include all waters which flow across or form a part of State boundaries. Coastal waters would be specifically included within the definition.

The draft bill would also amend section 12 of the Federal Water Pollution Control Act to mention specifically the Atomic Energy Commission as one of the Federal agencies whose functions with respect to water pollution would not be superseded or limited by the act.

I would appreciate it if you would be good enough to refer the enclosed draft bill to the appropriate committee for consideration.

In compliance with Public Law 801, 84th Congress, there is enclosed a statement of cost estimates and personnel requirements which would be entailed by enactment of the proposed legislation.

Bureau of Budget advises that enactment of this legislation would be in accord with the program of the President.

Sincerely yours,

ARTHUR S. FLEMMING,
Secretary.

By Mr. CARLSON:

S. 3575. A bill to amend the Federal Employees Health Benefits Act of 1959 so as to eliminate any discrimination against married female employees; to the Committee on Post Office and Civil Service.

By Mr. WILLIAMS of New Jersey:

S. 3576. A bill for the relief of Imre Tokodi, Piroska Tokodi, and Eva Tokodi; and

S. 3577. A bill for the relief of Giovanni Clemente; to the Committee on the Judiciary.

CONCURRENT RESOLUTION

PARTICIPATION IN INTERNATIONAL TRADE FAIRS AND EXPOSITIONS

Mr. JAVITS submitted a concurrent resolution (S. Con. Res. 106) concerning increased participation in international trade fairs and expositions, which was referred to the Committee on Foreign Relations.

(See the above concurrent resolution printed in full when submitted by Mr. JAVITS, which appears under a separate heading.)

RESOLUTIONS

UNITED STATES V. LOUIS SHOMER—APPEARANCE OF CERTAIN SENATE EMPLOYEES AS WITNESSES

Mr. MANSFIELD, for Mr. EASTLAND, from the Committee on the Judiciary, reported three original resolutions, which were considered and agreed to, as follows:

S. Res. 322. Resolution to authorize Elizabeth McGill, chief clerk of the Juvenile Delinquent Subcommittee of the Committee on the Judiciary, to testify and produce certain records in the Federal court in the case of *U.S.* v. *Louis Shomer;*

S. Res. 323. Resolution to authorize Joseph A. Davis, chief clerk of the Committee on the Judiciary, to testify and produce certain records in the Federal court in the case of *U.S.* v. *Louis Shomer;* and

S. Res. 324. Resolution to authorize Peter N. Chumbris, minority clerk of the Committee on the Judiciary, to testify in the Federal court in the case of *U.S.* v. *Louis Shomer.*

EXPOSITIONS FOR PEACE PROGRAM

Mr. JAVITS. Mr. President, I shall be brief. I know Members of the Senate are anxious to pay tribute to the Senator from Wyoming [Mr. O'MAHONEY].

Mr. President, I am today introducing, for appropriate reference, proposed legislation which would provide for a sharp increase in the number of trade fairs held in the United States and for much greater U.S. participation in foreign-trade exhibits, as part of a new program called expositions for peace. The number of trade fairs in which the United States would take part during the next 18 months under the bill could be expanded from about 50, as presently planned, to at least 80, while the number of foreign nations—about 25—expected to participate in three or four major U.S. fairs would be doubled, so that 50 foreign countries would exhibit in large and small fairs across the United States.

The reciprocal nature of the fairs would be advanced by permitting counterpart funds to be used to defray some of the costs incurred outside the United States by foreign governments in connection with their participation in trade, industrial, agricultural, horticultural, and scientific fairs and exhibits staged in this country.

The introduction of the proposed legislation comes during the week which President Eisenhower has proclaimed World Trade Week, immediately after the successful conclusion of the World Trade Fair at New York City's Coliseum, which had some 3,000 exhibits displaying goods from 65 foreign countries.

Mr. President, I introduce, for appropriate reference, a bill to amend the Agricultural Trade Development and Assistance Act of 1954.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3573) to amend the Agricultural Trade Development and Assistance Act of 1954 to provide for the further use of foreign currencies acquired thereunder for certain foreign expenses requisite to participation by foreign nations in trade fairs in the United States, introduced by Mr. JAVITS, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. JAVITS. Mr. President, since 1954, when President Eisenhower launched U.S. participation in foreign trade fairs, U.S. exhibits have scored some notable successes—most recently in New Delhi at the agricultural fair which the President visited. There has been a significant strengthening of cultural and economic ties between us and the people of the host nation, while displays of U.S. goods have testified to our dedication to peaceful pursuits and higher standards of living for peoples in less developed areas.

We have already crossed the threshold into a new era in world trade, when U.S. businessmen must pioneer new outlets for their goods abroad, develop new products to attract oversea customers and actively support world trade in the United States and abroad which can help us to retain our status as the great common marketplace for the free world.

The key to the vast expansion of trade opportunities so necessary to sustain economic growth in industrialized and less developed nations is a new program of expositions for peace, dependent upon the legislation I am proposing today. The resolution has four main objectives: First, to step up U.S. participation and encourage individuals and businesses to take part in the various types of fairs and expositions provided for in the International Cultural Exchange and Trade Fair Participation Act of 1956 and in the Agricultural Trade Development and Assistance Act of 1954; second, to increase the number of U.S. trade fairs and expositions and encourage foreign exhibitors to arrange displays on a reciprocal basis, by making available to them technical, administrative, and financial assistance in part financed by counterpart funds; third, to encourage much more extensive participation in these fairs by U.S. labor-management, consumers, investors, and farmers; fourth, to use U.S.-owned foreign currencies resulting from mutual security and agricultural trade development programs to promote more expositions for peace at home and abroad.

Mr. President, I submit a concurrent resolution and ask that it be appropriately referred.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred.

The concurrent resolution (S. Con. Res. 106) concerning increased participation in international trade fairs and expositions, submitted by Mr. JAVITS, was referred to the Committee on Foreign Relations, as follows:

Whereas increased trade among nations is the key to sustained economic growth both for the industrialized and the less developed countries;

Whereas the export trade of the United States represents a vital and necessary part of our economy and increased exports are vital for the elimination of the international balance of payments deficit which the United States is presently experiencing;

Whereas international trade fairs have contributed greatly to the economic, and cultural ties among nations, have made the peoples of the world better acquainted with each others' productive capacity and economic capabilities and have strengthened communications and understanding among them;

Whereas exhibitions at trade fairs abroad, supported in part by the Government of the United States, have helped greatly to project our true image to foreign peoples, proven important forces in the promotion of understanding, and contributed substantially to the growth of trade between the United States and foreign nations; and

Whereas there is substantial room for the expansion of these efforts for the increased promotion of U.S. products abroad and the products of friendly foreign nations here, and for U.S. participation in foreign trade fairs and the establishment of foreign trade fairs in this country, for the promotion of peace and economic well-being for all the peoples of the world; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), that it is the sense of the Congress that—

(1) the President of the United States, acting through the Departments of State and Commerce and through such other agencies as he may deem appropriate, should provide for increased participation by the United States and by U.S. individuals and businesses in international trade fairs and expositions abroad, including trade, industrial, agricultural, horticultural, and scientific fairs, expositions, and exhibits, participation in which is provided for in the International Cultural Exchange and Trade Fair Participation Act of 1956, as amended, and in the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480, 83d Congress);

(2) encouragement be given to the increased establishment of trade fairs, expositions, and exhibits in the United States by foreign governments, businesses, and other foreign exhibitors on a reciprocal basis, by making available to them technical, administrative, and financial assistance through our missions abroad and through the appropriate use of any U.S. owned foreign currencies counterpart funds which may be available for such purposes;

(3) U.S. business (including labor-management, consumers, investors, and farmers) both for the promotion of its own economic well-being and for the further dissemination of the benefits of the free enterprise system, should participate in an increased extent in such international fairs, expositions, and exhibits; and

(4) the development of such international trade fairs and expositions and exhibits, both in the United States and abroad, should receive support through the use of U.S. owned foreign currency funds to the greatest extent compatible with other requirements for such currencies so that these funds, resulting from mutual security and agricultural trade development programs, may result in continually increased trade opportunities and thus continually increased economic well-being for all the nations of the world.

Mr. JAVITS. Mr. President, the amendment I am introducing is to the Agricultural Trade Development and Assistance Act of 1954 and would authorize the use of some of the hundreds of millions of dollars in counterpart funds now held in 60 countries to help defray costs requisite to participation in the fairs by foreign nations and other foreign exhibitors.

The balance of payments deficit of $7 billion run up by the United States in the past 2 years came as an unexpected shock to many American businesses accustomed to discounting their foreign competitors. Their reaction was quick, and so far this year U.S. exports are running ahead of our sales abroad in early 1959—but so are U.S. imports. We do not have a monopoly on ingenuity, new production methods, or attractive consumer items, but neither do our competitors monopolize initiative and good salesmanship.

If under the expositions for peace program, the United States participated in some 80 to 90 international fairs in the next 18 months instead of in some 50 exhibits as now planned, the increased promotion and sales of U.S. products abroad notwithstanding the increased sales here of goods from friendly foreign nations would furnish much needed assurance that our imbalance in international payments will be reduced.

A primary U.S. foreign policy objective is to prevent the spread of communism into the free world's less developed areas, and it is their young industries which often have a very hard time selling in foreign markets. The Soviet bloc is competing actively in trade fairs, having participated in 433 exhibits in more than 50 countries of the free world between 1957 and 1959, with the emphasis on expansion. From 123 fairs in 40 countries 3 years ago, the bloc went to 133 fairs in the same number of countries in 1958 and to 177 fairs in 51 countries last year.

It is very important to us that the citizens of the less developed areas of the free world utilize the machinery of the private enterprise system to develop their economies so they can provide decent living standards for the average individual and family. What better showcase can we find for the products of the U.S. private enterprise system than in international trade fairs on both sides of the Iron Curtain? And what better showcase can we provide the less developed nations than the display of their products in the United States, partially financed through the use of counterpart funds? Businessmen from every State and almost every nation can come to buy, to sell, to see new goods, to get new merchandising ideas, and to form new associations as these expositions spur foreign trade and foster international peace and good will.

Mr. President, I conclude upon this note: We have all been deeply moved by the situation in Paris and the breakup of the Summit Conference. I, for one, feel we are going to do two things now. First, we shall strengthen the United Nations and make it the forum for world negotiation which must now ensue. Second, we shall integrate the free world in a far more active and vigorous way than we have before.

I consider this effort in respect to trade fairs, Mr. President, to be a very important aspect to our program; a very important aspect of our new export drive, signaled by President Eisenhower; a very important aspect in regard to redressing our imbalance of international payments. A demonstration of U.S. progress, I believe, is the only thing which will convince the Communist leadership of the Kremlin of the fact that the vital, dynamic, and successful character of the free world system makes it the superior system, and that if the Communists do not negotiate with us in an honest and sincere way what will happen is that their system rather than ours will go by the board.

DEFINITION OF TERM "VETERANS' ADMINISTRATION FACILITIES"—ADDITIONAL COSPONSOR OF BILL

Mr. BARTLETT. Mr. President, I ask unanimous consent that the name of of the junior Senator from Hawaii [Mr. LONG] be added as an additional cosponsor at the next printing of the bill (S. 2201) to amend section 601 of title 38, United States Code, with respect to the definition of the term "Veterans' Administration facilities," introduced by me (for myself and Mr. GRUENING) on June 17, 1959.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PRINTING OF REVIEW OF REPORT ON EASTPORT HARBOR, MAINE (S. DOC. NO. 98)

Mr. CHAVEZ. Mr. President, I present a letter from the Secretary of the Army, transmitting a report dated May 6, 1960, from the Chief of Engineers, Department of the Army, together with accompanying papers and an illustration, on a review of report on Eastport Harbor, Maine, requested by a resolution of the Committee on Public Works, U.S. Senate, adopted December 6, 1950.

I ask unanimous consent that the report be printed as a Senate Document, with an illustration, and referred to the Committee on Public Works.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

THE SUMMIT CONFERENCE

Mr. CURTIS. Mr. President, our President, Dwight D. Eisenhower, will return today from the summit conference to a united Nation. I wish to pay tribute to my colleagues on the other side of the aisle who have contributed to this unity, for it means strength for our country.

I wish to join with millions of Americans everywhere in commending President Eisenhower for his steadfastness and his devotion to truth and principle. His leadership is appreciated by freemen everywhere.

To my mind the summit conference proved four things:

First. That it is far better for a conference to reach no agreement than to reach an agreement that is wrong in principle and that would jeopardize the future of our Republic.

Second. That the American people are alert as well as united; that they will back to the limit a Government that stands for principle.

Third. That Khrushchev is now known to the whole world for what he is—the ruthless leader of a godless ideology.

Fourth. These recent events have also proven that communism has not changed.

Father James Keller, the founder of the Christophers, in his valuable book, "Three Minutes a Day," carries this bit of history that should never be forgotten:

"War is inevitable" were the strong words used by Dimitri Manuilsky, when he addressed the students of the Lenin School of Political Warfare in 1930.

His dire forecast continued:

Today, of course, we are not strong enough to attack. Our time will come in 20 or 30 years.

In order to win we shall need the element of surprise. The bourgeoisie will have to be put to sleep, so we shall begin by launching the most spectacular peace movement on record.

"There will be electrifying overtures and unheard of concessions. The capitalistic countries—stupid and decadent—will rejoice to cooperate in their own destruction. They will leap at another chance to be friends.

"As soon as their guard is down we shall smash them with our clenched fists."

Father Keller went on to say:

This terrifying statement merits much thought, prayer, and action. Do something constructive to strengthen every weakness and thus prevent catastrophe.

VICE PRESIDENT RICHARD NIXON

Mr. KUCHEL. Mr. President, in the U.S. News & World Report for May 16 is an excellent interview with the Vice President of the United States, RICHARD NIXON, on how he has discharged the expanded and expanding duties of his office in the administration of President Eisenhower.

I think it may be said in all truth that never in the long history of our country has a Vice President been given the multitudinous responsibilities which Vice President NIXON has been given these last 7 and more years.

I would wish to add that never has a Vice President more diligently or more honorably discharged those duties. Never has one more faithfully served the President with whom he has held office as Vice President.

Mr. President, I ask unanimous consent that the complete text of the interview with Vice President NIXON be incorporated in the RECORD at this point in my remarks.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

NIXON'S OWN STORY OF 7 YEARS IN THE VICE-PRESIDENCY—EXCLUSIVE INTERVIEW ON HOW A VICE PRESIDENT FOR THE FIRST TIME IN HISTORY SERVES AS THE PRESIDENT'S DEPUTY

(Here, from the Vice President himself, are the inside facts on the country's No. 2 job, and the change that has taken place in that job during the Eisenhower administration. The extent to which a Vice President today participates in executive work has never before been revealed. What it all means, now and for future Vice Presidents, is disclosed in impromptu answers to questions in this exclusive interview.)

Question. Mr. Vice President, are you the first among American Vice Presidents to play a major role in the day-to-day operations of Government?

Answer. It is the first time a Vice President has had these responsibilities in this magnitude. In the previous administration, Vice President Barkley was a member of the National Security Council by law, as I am, and I understand he was also invited to attend Cabinet meetings.

In administrations before that, there were occasions when the Vice President was invited to attend Cabinet meetings as well as other gatherings, as the President then in office saw fit.

President Eisenhower has made it a rule of his administration that the Vice President shall attend all Cabinet meetings, all Security Council meetings and all meetings of the legislative leaders. In fact, he also includes any other meetings at the White House which might affect overall policy.

Question. What has been the President's reason for this?

Answer. I think the reason was perhaps best stated by him when I met him for the first time after he had approved my selection as Vice President. I remember in 1952 going from the Stock Yards Inn at Chicago, near the convention hall, to the Blackstone Hotel, where I talked with General Eisenhower. He said he had submitted a list of names to his close advisers and they recommended that I be selected as the vice-presidential nominee. He said that he approved of their decision and paid me the courtesy of asking if I would accept the nomination if it were offered. I indicated that I would.

Mr. Eisenhower then said that he wanted me to know that he did not want the Vice President in his administration to be merely a figurehead, handling protocol matters and, as he said, "pounding the gavel in the Senate." He said he felt it was vitally important, based on his experience in command of military enterprises in years past, that a deputy, who might at any time go into the top position, should always be completely informed on existing policies. He said, therefore, that he wanted to be sure that I participated in the meetings where policy was developed during the course of his administration, and that I would have assignments which would prepare me for the possibility that I might have to assume the highest office.

Question. Was the President concerned about continuity of policy in case anything should happen to him?

Answer. I think this was perhaps the primary reason. For example, I remember in this same conversation—and, incidentally, this shows that he is a student of political history in this country—he indicated that Mr. Truman was not informed on many of the basic and important decisions which had been made by President Roosevelt and which Mr. Truman had to execute on assuming office. Mr. Eisenhower said be believed it vitally important that this should never occur again.

So I would say his first reason was to see that, if the Vice President should have to assume the office of the Presidency, he would be prepared to do so.

I think he had a second reason, too. In the same conversation, he said that the Vice President, who is the only man in the Government elected by all the people other than the President, simply should not be wasted in a purely ceremonial position.

In other words, Mr. Eisenhower has always felt that it is important to make use of the talents of people within his official family to the greatest extent possible.

Question. Broadly speaking, what percent of your time is spent in executive work?

Answer. I would say at least 90 percent—and while the Senate is not in session, of course, 100 percent.

Question. Does your day end at any particular time? Are there sometimes night sessions at the White House, too?

Answer. Yes. If you were to include the evenings, I spend 95 percent of my time on executive assignments.

Let me put it in terms of hours: I would say that, on the average, the amount of time I spend presiding over the Senate is a half hour to an hour a day—that is, out of a 14-hour day.

I should add that I have other functions which keep me at the Capitol. I have meetings with legislative leaders, with Senators and Congressmen, and with various people who are interested in legislation.

These functions are related both to my legislative and executive duties. But as for presiding over the Senate itself, the only constitutional duty the Vice President has, I should say that perhaps no more than at the maximum 10 percent, and usually around 5 percent, of a Vice President's time is spent in that fashion.

Question. Do you have time to do this executive work?

Answer. I certainly have. As a matter of fact, I would say the Vice Presidency, if it did not include executive assignments, would be the dullest office that I can conceive of.

Question. When you talk about doing executive work, what do you mean?

Answer. Well, perhaps we could separate it in terms, first, of meetings. On the average, I have three formal meetings a week at the

White House: These are the Cabinet meeting, the National Security Council meeting, and the meeting with the legislative leaders. These meetings usually take approximately 2 hours. While they do not take place every week, when Congress is in session they are held more often than not.

As a matter of fact, I had my office do a tabulation of the meetings that I have attended since January 1953 as recorded in my daily calendar. I have attended 173 meetings that the President has had with legislative leaders, and presided over 2 of those. I have attended 217 meetings of the National Security Council and presided over 26 of those. I have attended 163 meetings of the Cabinet and presided over 19 Cabinet meetings.

Now, in addition to such meetings, there are occasions when I see the President alone, and other occasions when I attend informal meetings in his office with selected Cabinet members or other associates within the administration. In addition, I, of course, have meetings with Cabinet officers and other Government officials on specific legislation that may be under consideration at a particular time.

Question. Would you say that the bulk of your executive work is attending meetings?

Answer. I would say the rule in Government is about the same as it is in business or any other kind of activity. For every hour that you attend a meeting, you spend at least 2 hours preparing for it or executing the decisions made at a meeting.

For example, the meetings of the National Security Council require studying the intelligence reports before the meetings are held, and also consulting with various members of the Security Council with regard to decisions that are pending and with regard to carrying out decisions that are made.

Question. Do you have access to highly classified material?

Answer. Virtually all the material before the Security Council is confidential or secret in classification. For example, every morning my assistant for National Security Council affairs, Brigadier General Cushman, puts on my desk the intelligence reports from the day before from all over the world. I read these reports every day, whether there is a Security Council meeting planned or not. And I read an additional, more comprehensive, report on the mornings that the Security Council meetings are actually held.

Question. Do these reports give you a picture, so to speak, day after day and week after week of what is happening?

Answer. I get a picture not only of what is happening around the world, but, in addition to that, every morning I receive an up-to-date summary report of all actions being taken by various Government agencies affecting domestic affairs—for example, from the Department of Agriculture, the Department of Commerce—from every one of the Government agencies in which decisions have been made.

By reading these reports, and by reading the classified reports on international affairs, I am thereby able to talk with Members of the Congress with whom I may meet during the day or members of the press with whom I might have appointments, with some degree of knowledge as to what the facts are affecting a particular question.

STUDYING WORLD PROBLEMS

Question. Have you been given an insight into current developments in the world?

Answer. Yes. There is no question about that. For example, during the recent Korean crisis I received daily reports as the crisis developed.

This is true of all the various problems around the world. To the extent that intelligence information is available, I am able to keep abreast of world developments on a broad basis.

Question. How does what you have learned day by day differ from what comes out in the press either concurrently or later on?

Answer. The difference necessarily is that what comes out in the press contains no classified information. The reports that I read, for example, go into such classified matters as an ambassador's appraisal of the motives and the personal backgrounds of the various world leaders.

Such opinions could never be made public, of course, because, if they were critical, that would immediately make an ambassador persona non grata.

It is this kind of reporting that is extremely valuable in giving the President, or me, or anybody else who has access to such information, the kind of background that enables us to comment with balance and judgment on world affairs. You must know of the forces behind the action that we might be taking, or that another government might be taking, in a particular case.

Question. Would you say that your experience has given you an understanding of this country's relationships with other governments?

Answer. I think there is no question about that, and I think it is vitally important that the Vice President in future administrations be given the same opportunity that I have had in this respect.

Question. How about domestic problems? How do you become informed on them?

Answer. Well, this is very easy to explain. All that I do is simply call a Cabinet officer on the telephone, if he has jurisdiction over the matter, and either discuss it with him by telephone or go to his office or have him come to mine to discuss it. In some instances, I have one of the members of my staff get the information directly from him.

I should add that, in addition to these formal meetings to which I referred earlier, informal meetings of this type are far greater in number, of course, and consume more time than all the formal meetings put together.

Question. How many countries have you visited as Vice President?

Answer. A total of 54 in all.

Question. Were those visits usually related to some objective in foreign policy?

Answer. In some cases, yes. In other cases, the President felt that the trip would be helpful in establishing better communication between the leaders of those countries and the American Government.

For example, the first trip I took abroad to Asia, in 1953, covered 20 countries in Asia and southeast Asia. It lasted 70 days, and it proved to be very helpful in obtaining for the President direct information from the leaders of those countries with regard to their attitudes toward our policies, their criticisms—where they did have criticisms—of our personnel or of programs that we might be following.

After that trip and after each other trip that I have taken abroad, I have made recommendations to the President. Some went to him alone, others went to the State Department, with the President being informed and approving, and some were made in reports that I gave to the National Security Council. These recommendations have dealt with a number of issues.

In some instances, in the case of the State Department, I have dealt specifically with the problem of personnel. After my visit to Africa, for example, I came back convinced that we were not assigning enough high-quality personnel to the African area. I believe that the most important and explosive area, as far as the outcome of the world struggle is concerned in the next 10 years, will be Africa. There, 26 nations will be independent by about 1970.

At the time I visited Africa in 1957, it was, with some exceptions, a low-priority area in terms of the general quality of personnel assigned there. When I came back, I said that it was time we began to recognize that, while the African posts were difficult in many instances and would have to be classified as hardship posts, we should be sending our best people there. We should not be sending less-experienced people who, after service there, are promoted to easier and presumably more important posts in Europe.

I feel that the recommendations I made on Africa did have a very salutary effect. Today the State Department and other agencies have not only upgraded the importance of our African posts, but, in addition, we have an African desk in the Department—something we did not have until the year 1958.

Question. You've gone all around the world—have you been to every continent?

Answer. I've been to every continent—to Africa, to Asia, to South America, and, of course, to the Soviet Union and Europe.

After I visited Austria to investigate the Hungarian-refugee situation, I was able to make some recommendations with regard to bringing Hungarian refugees into this country on a more liberal basis than we had been following.

When I was in Central America in 1955, I saw that the Inter-American Highway was being built in a disgracefully inefficient way. Because of the way Congress was dribbling out the funds, it would not be completed for 25 years and, by that time, the parts of the road built first would already be practically useless because of the need for repairs. I made recommendations at that point that we should step up the allocation of funds to the highway to complete it in 3 to 4 years at the most, because in the end this would not only be more economical but it would also open the way for communications among and between the Central American countries and the United States. My recommendation was approved.

Had the trip not been taken, this probably would not have been done. So here is an indication of what a Vice President, or any other visitor from the official family, can accomplish.

Question. How many miles would you say you have traveled outside the United States while you have been Vice President?

Answer. Approximately 160,000 miles.

Question. Is that a record for a public official?

Answer. No, I would say that Secretary Dulles had a considerable bulge on me in travel abroad. And I might say he was a very remarkable man to be able to travel as he did and withstand it as well as he did. I am considerably younger than he was, and, despite the fact that my travel was not nearly as extensive, I sometimes wondered after I finished my trips how he was able to travel even farther and without showing any physical strain.

HOW TRIPS WERE PLANNED

Question. How can you, as Vice President, act as an emissary of the President abroad and not come in conflict with responsibilities of the Secretary of State?

Answer. This question is extremely important, and I would like to emphasize that I have taken no trips abroad which have not been approved by the Secretary of State. They were all approved by Secretary Dulles, and then, after his death, by Secretary Herter.

A Vice President, or any other Government official, cannot be useful in such trips unless he works in close cooperation with the Secretary of State. It would be very detrimental to U.S. foreign policy to have a Vice President go in and, in effect, undercut the Secretary of State in his primary responsibility for U.S. foreign policy. I have had no difficulty in this respect, because my relation with the Secretaries of State, both Mr. Dulles and Mr. Herter, has been not

only friendly but one of complete cooperation. They welcomed these trips that I have taken, and, as a matter of fact, in every instance they joined with the President in urging me to go.

Question. When you visited a country, was your position as Vice President regarded as higher than that of any Cabinet officer?

Answer. I cannot say that the position of Vice President was regarded as of greater importance. I will say, however, that the receptions that Mrs. Nixon and I have received abroad have been—with the exception of Venezuela's—extremely friendly. In effect, we have been accorded the same hospitality and the same respect that would have been accorded the President had he made the trip.

These countries all considered me the direct representative of the President and, in addition, the second-ranking elected official in the Nation. This meant that I had direct access to all the top officials of the governments, and the conversations I had were just as complete and frank, I believe, as would have been the case had the President himself been there.

VISITING WORLD LEADERS

Question. How many individual dignitaries have you talked with in the various countries?

Answer. I believe I have had extended discussions with some 35 presidents, 9 prime ministers, 5 kings, 2 emperors, and the Shah of Iran.

Question. Were officials in some countries complimented that an official as high ranking as the Nation's Vice President was sent to visit them?

Answer. That's exactly the point. The receptions were not just for me as an individual, but they were more for (1) the people of the United States, (2) for the President whom I represented, and (3) for the office which I held.

For example, when we visited Japan in 1953, there were more than a half million people on the streets of Tokyo when we came from the airport. This was repeated when we were in Manila for the 10th anniversary of the independence of the Philippines. President Magsaysay and I spoke together on that occasion, and the crowd in the great public square, where such meetings are held, was estimated at three-quarters of a million.

The most moving experience was when we came to Poland after our visit to Russia, and when, without any notice by the Government of the route we were going to take into the city—because they were making no effort to get out a crowd—over a quarter of a million people crowded the streets to welcome us.

I emphasize that these welcomes from the people were for the reasons that I mentioned above, and not personal in character.

But they do show that any Vice President of the United States who goes abroad representing the President can have a great impact upon the people of these countries and also will inevitably be received by the leaders of those countries in a way which will enable him to get information which can be very helpful in the development of foreign policy.

Question. In your trips abroad you could be called a special ambassador. How would you describe your role at home—that of an Assistant President or an Executive Vice President?

Answer. It's very difficult to classify the work by either of those terms. Let me put it this way: A Vice President of the United States can be only as effective as the President wants him to be. In other words, a Vice President has, except for his power to break a tie vote in the Senate, no power of his own.

I think perhaps the best way to classify the work of the Vice President domestically is that he serves as the deputy of the President and as the representative of the President. His position differs, however, from those of the members of the President's White House staff in this very important respect: The Vice President is an elected official of the Government. He has a position of political influence and political power that the appointed members of the White House staff lack completely and that members of the Cabinet generally do not have.

This means, therefore, that when the President gives the Vice President an assignment, the Vice President, with the President behind him, can exert more influence and can be more effective than a member of the White House staff or even a member of the Cabinet.

I go back to the settlement of the steel strike, for illustration. I am convinced, in this instance, the fact that I was Vice President and the fact that I was representing the President were decisive factors in enabling me to be the catalytic agent to bring the two parties together so that they would discuss this matter and eventually reach a settlement.

Had I simply been somebody from private life whom the President might have assigned to this responsibility, or somebody from his White House staff, I don't believe that the parties could have been brought together.

The fact that I was speaking for the President and the fact that I had the added official prestige of being Vice President in my own right formed a combination which was necessary in this instance, and probably decisive in bringing about the settlement.

Question. In the parliamentary system of government, is there some Cabinet member without portfolio who might fill the role you have come to fill?

Answer. We've often discussed such matters with members of foreign governments when I have visited other countries, but there are very few who have vice presidents, to begin with, and, second, in other forms of government there simply aren't offices that are similar to the Vice-Presidency. I suppose the closest parallel you find is a prime minister and a deputy prime minister in a parliamentary system. But the office of vice president is somewhat unique. Far more countries get along without vice presidents than have them.

MEETINGS AT CAMP DAVID

Question. Did you attend all the meetings at Camp David that President Eisenhower had with Premier Khrushchev, Prime Minister Macmillan, President de Gaulle, and Chancellor Adenauer?

Answer. I have not attended all of them. I have attended several. Some of these meetings are more social in character, and the President very properly does not invite others. However, he has been most considerate in seeing that I am in attendance when important issues are discussed, so that I might be able either to contribute to the discussion or obtain information it would be necessary for me to have in carrying out any duties which might fall upon me in the future.

I would like to add, too, that, in those cases where I do not attend such meetings, the President always makes available to me his memoranda of conversations dealing with other than purely personal matters.

In other words, even though I do not attend such meetings, I am always familiar with decisions that are made and discussions that take place. Then, when I meet these leaders—as I do when I have a dinner for them, or when they call on me at my office, or when I call on them—I am able to speak with knowledge of all the conversations they have had with the President.

Question. Do you get in on budget making and fiscal affairs under this policy of having the Vice President play an executive role in addition to the limited role common in the past?

Answer. Well, let me say first that my participation in the development of such policies has naturally increased as I have gained experience in office. For example, in each of the last 3 years when the budget was under consideration, I have consulted with the Director of the Budget and with the various departments on the budgets that they were submitting. During and after these consultations, I have had an opportunity to make recommendations in Cabinet meetings or, in some instances, directly to the President himself with regard to my views on the budget.

At the President's direction, moreover, in the past 3 years various Cabinet officers have brought their key budget decisions to me for any suggestions or recommendations that I might have.

Question. Is the same thing true in other fields? Where do you fit in when labor problems are involved?

Answer. In this instance, the Secretary of Labor consults with me to see what my views might be on legislation before he recommends it to Congress. The same, incidentally, is true of the other Cabinet officers when they face major issues which may involve congressional action.

Question. When farm policies are up for consideration, have you been kept informed?

Answer. I have not spent as much time on agricultural policy as on labor, defense, foreign affairs and overall budget policies. On the other hand, I have had the opportunity, as far as agriculture is concerned, to participate in the discussions on agricultural policy which have taken place in the legislative leaders' meetings. Because agricultural policy affects such a broad segment of the country, decisions with regard to agriculture are generally considered in the legislative leaders' meetings before they become final.

Question. Have you had to deal with any of these programs that relate to exploring outer space?

Answer. In the field of outer space I have a close association with Dr. Glennan [Dr. T. Keith Glennan, head of the National Aeronautics and Space Administration] and with members of his staff. I see him approximately once a month, and more often during the period when the budget is being made. For example, this year I felt very strongly that there should be more unified direction of our outer-space programs than had been the case previously, and also that there should be a stepped-up program for the development of large boosters.

In my conversation with Dr. Glennan, and also when these matters were discussed at meetings of the National Security Council over which the President presided, I strongly supported decisions which the President made in this area.

ACTION ON STEEL STRIKE

Question. How did you get in on the steel strike settlement?

Answer. The President has no rigid rules as to what matters I will take responsibility for. In the case of the steel strike, he was, as you know, starting on a trip abroad. He indicated prior to that trip, on a national television broadcast, that he believed it was vital that the strike be settled while he was gone.

In view of that exhortation, and in view of private conversations in his office at which the Secretary of Labor and I were present, I considered that it was our responsibility while he was gone to explore every possible avenue for finding a basis for settlement which would meet the criteria which he had laid down.

While the President was gone, we started the series of meetings with the leaders of the union and the leaders of the steel industry. These meetings culminated shortly after the President's return in a recommendation for settling the strike—a settlement recommendation which the President approved.

Question. Has President Eisenhower called on you for a wide range of tasks?

Answer. Well, of course, I am Chairman of the Cabinet Committee on Price Stability for Economic Growth and, as is generally known, I serve as Chairman of the President's Committee on Government Contracts. This Committee meets every month and has as its responsibility the making of recommendations to contracting agencies for their enforcement of the clause in all Government contracts that there shall be no discrimination in employment where an individual or a corporation has a Government contract. This is an assignment which the President gave me shortly after the administration came into office in 1953.

The President has also given me some specific assignments in the national-security area. For example, I was responsible for the development of public support for our mutual security program, for an intensive study which was made within the administration on the economic aspects of the cold war, and for other matters of this type.

Question. What role do you play in Cabinet meetings, for example? You are not a Department head. Do you have a chance to speak up?

Answer. Yes, I have always had the opportunity to express myself, not only at Cabinet meetings but at the other meetings over which the President presides. Usually it is his custom once a matter is presented at any one of these meetings, to ask the various people around the table for their comments and suggestions.

In fact, the President always invites all of us who participate in such meetings to indicate our views before he, the President, reaches a decision.

Question. Who makes the decisions in meetings? Are they committee decisions?

Answer. I think one of the essential rules for any orderly government is that there can be only one man who makes the final decisions. I, for one, have never believed in government by committee, because what happens then is that the decisions made represent the least common denominator of what everybody will agree to, and this means leadership at its lowest level, rather than at its highest level.

Now, I know that there have been those who have suggested that the President believes in government by committee, that he does not make decisions or overrule members of his official family on issues. Nothing could be further from the truth. The President is a very patient man. He always invites full and free discussion. He tries to bring about agreement among all of the members of his Cabinet and Security Council when important decisions are being made.

But, in the final analysis, the President recognizes that the Cabinet and Security Council are advisory to him only.

The President, during the 7 years that I have been with him, has never put a matter to the vote of the Cabinet, the Security Council or the legislative leaders. I believe he is absolutely correct in following this practice because, in the final analysis, he, the President, should make the big decisions rather than pass the buck, in effect, to his advisers. I don't mean that he isn't affected by what we all say, but he himself, after he hears what we all say, announces the decision.

Of course, there have been instances in which the view adopted by the President has been the view held by others in his official family than myself.

But I would say that the number of cases in which this has happened has been very small compared to the number of cases in which I have shared the views that the President has eventually approved.

Question. If an accident happened and you were required to take over the Presidency, would there be much of a gap in your familiarity with the duties to be performed?

Answer. As far as information is concerned, there would be no gap—no significant gap whatever.

Question. How about familiarity with the problems of the Government itself on pending matters?

Answer. I would say there would be very few pending matters in Government with which I would not be familiar. I do not mean that I am aware of all the conversations the President has with his Cabinet officers, but it would take a relatively small amount of time for me to get up to date on all the matters under discussion and consideration by the President.

Question. Examining this problem impersonally and looking ahead many, many years, do you think that the system which has been instituted by President Eisenhower, whereby the Vice President has been kept informed daily of what's going on in the Government, could have an effect eventually on the efficiency and effectiveness of our governmental system?

Answer. I most certainly do. While I speak as a not-unbiased observer, I would still say that, when President Eisenhower's administration is judged, it will receive high marks in several areas. From a long-range standpoint, one of its most important achievements—one of the President's most significant achievements—has been upgrading the office of the Vice-Presidency.

As a result of what President Eisenhower has done, I believe neither political party in the future will ever again look upon the Vice-Presidency as simply an office to be used for purposes of balancing a ticket geographically or religiously or politically. I think that in the future both political parties will recognize, first, that a vice-presidential candidate must always be qualified and prepared to serve as President.

In addition to that, his views must be close enough to those of the President so that he will feel completely confident in using the Vice President to the utmost in foreign policy and domestic assignments.

In the future, building on the precedents that the President has established in this administration, even greater use can be made of the Vice President. I think that, as a legislative troubleshooter at home, as a coordinator and executor of administration policies, and as a representative in the foreign policy area, the Vice President can serve the President immensely in the years ahead.

In the foreign-policy area particularly, this is not only constructive but I believe absolutely essential. The burdens of international affairs upon the President have become increasingly great as more nations have acquired their independence and as U.S. responsibilities in the world have increased.

In the future, the Vice President can assist the President by visiting countries that the President is unable to work into his schedule and by carrying out specific foreign-policy assignments which the President and the Secretary of State find that his particular office qualifies him to execute.

GAINING PUBLIC SUPPORT

Question. If this formula of the Vice-Presidency is continued in the future, irrespective of party, would you expect a Vice President to become a logical choice or at least be given serious consideration as a possible nominee for the Presidency in future years?

Answer. Without referring to my own situation, I would say that one of the reasons Vice Presidents have been buried politically in times past is because they simply have not had enough important things to do. If the Vice President does have assignments of importance, he inevitably will be in the public eye and will develop political support in his own right. For that reason, I would say that, if future Presidents use their Vice Presidents as President Eisenhower has used me, we can expect future Vice Presidents to be among those who are most seriously considered as presidential candidates.

Question. Do you think that the Vice President of the future who serves as deputy to the President is likely to have an advantage over other candidates who might be in the running for the party's nomination?

Answer. Again, I may have a prejudiced view in this respect, but it seems inevitable that one who is familiar with all aspects of the major problems confronting the Nation has a head start on others who have to learn the issues pretty much from the ground up.

While the fact that an individual has served for a certain number of years as Vice President and has had the opportunity to obtain information on the working of the Government, both at home and abroad, does not in itself qualify him for the Presidency, it undoubtedly gives him an invaluable opportunity to learn, to test his capabilities, and to prove himself in the eyes of the people.

Question. Again, looking at this thing impersonally and assuming that your own political party had been out of power and a new President were elected, what do you think are the handicaps and disadvantages to the country in the fact that 2½ months must elapse between the time of an election and the inauguration of a new President and his opportunities to become familiar with the intricacies of the Government itself?

Answer. Well, of course, looking back on our own administration, we ran into exactly that situation in 1953. There obviously has to be a period of time in which a new administration must learn the ropes, in effect, with regard to the intricacies of foreign and domestic policies. This, of course, is not an insurmountable problem if there is genuine cooperation between the incoming and outgoing administrations. The American people in many instances have seen fit to take the inevitable temporary inefficiency which is involved in such a changeover rather than to continue in power an administration in which they have lost confidence. But, when an administration has a good record and when there is no real disagreement with its policies, there is probably a natural tendency upon the part of the people to think twice before they throw that administration out of office and replace it with one that will have to pick the new personnel and build the machinery which is needed for operating the biggest business in the world.

REPORTS TO EISENHOWER

Question. Have you seen the President alone—absolutely alone with nobody else present—very often in the last 7 years?

Answer. Prior to my trips abroad I always have extended conversations with the President so that he can give me his views on the countries I am visiting. When I return I always see him alone before reporting to the National Security Council. When the President returns from his trips, he calls me into the office and gives me an evaluation of the foreign leaders that he has met and of the problems which he ran into.

I have not had and do not have regular private meetings with the President. There are some weeks that I will not meet him alone at all, since I see him three times a week at our regular meetings. There are other times when an issue, such as the steel strike, is up during which I may have four

or five conferences with him—either individually or by telephone—during 1 day. I don't have a record of the complete number of the conferences, but this gives an idea of the type of conversations I have.

Question. Do you talk to the President on the telephone from day to day?

Answer. I always follow the practice, unless he has asked me to call, of not talking to him on the telephone unless he calls me. The only exception that I have made in this respect was during the course of the steel strike when I had to keep him posted daily on developments. He calls me on the telephone, but I would say that telephone conversations are the exception rather than the rule. Usually they occur when he is out of Washington. Since my office is only minutes away from the White House, it is usually more convenient, when he wants to see me, for him simply to have his secretary call. Then I go down to the White House to see him.

AN OPPOSITION ISSUE

Question. Do you believe that the Constitution imposes on you a requirement to spend all your time in presiding over the Senate when it is in session?

Answer. I know there are some who believe that is the case. Indeed, some Members of the Senate in the opposition party may want to make an issue of the fact that I have not presided over the Senate for as many hours as did some of my predecessors.

I, of course, welcome this complaint, because I think people generally throughout the country recognize that the responsibilities I have undertaken are infinitely more important and more in the interest of serving the American people than simply sitting in front of the Senate.

Question. Has the Senate recognized this by providing under its rules for a President pro tempore who is a Member of the Senate itself?

Answer. The President pro tempore is supposed to preside in the Vice President's absence. I might add also that, according to senatorial practice, any Senator can preside over the Senate.

The only thing that the Vice President can do—and must do—that the President pro tempore or another presiding officer cannot do is to break a tie. That is why the only limitation I have as President of the Senate is that I must always be on hand in Washington when there is a possibility of a tie vote.

In the 7 years I have been Vice President, I have broken eight ties. While this is an average of a little more than one a year, it still indicates the importance of being present when the division of the Senate is as close as it is.

Question. Have you ever missed any votes when there was a tie that could be broken on anything important?

Answer. No; I haven't. I think there was one occasion when I was not present on a tie vote, but my unavoidable absence caused no problem because the same issue came up the next day. It was brought up when I was present and able to decide upon it.

CRUCIAL VOTES IN CONGRESS

Question. Have there been some occasions when the opposition party would have preferred you to be absent on some of those ties, too?

Answer. That is certainly true because the eight tie votes in which I did participate were on important issues. You may remember that I broke the 47–47 tie on whether or not the Senate would approve a massive Federal-aid-to-education bill which would have made teachers' salaries a Federal responsibility. My breaking of the tie on that vote was considered a significant step, and I did not take it hastily.

Question. Don't you usually know in advance when some important issue is going to come up that might result in a tie?

Answer. Exactly. This is another reason why the possibility of a tie vote should not keep the Vice President from taking other assignments. The work of the Senate is generally so planned that you do not have votes called on the spur of the moment. Generally speaking, votes in the Senate are taken at specified times, particularly on critical issues.

Question. Is most of the work that you do for the executive branch in Washington itself, rather than out of town?

Answer. Yes; except when a trip abroad is involved. However, good-will trips are generally scheduled for congressional recesses or for periods when we do not expect any legislation. Otherwise, I am in Washington. I may be at the White House, for example, and I might point out that, at the White House, I am exactly 7 minutes—I know exactly how long it takes—from the Senate floor. So, if a vote should occur while I am at the White House, I am always able to get there in time to vote.

Question. In this rather intimate official relationship with the President for the last 7 years, it is presumed you have gotten to know each other pretty well. How would you describe your personal relations with the President?

Answer. Why, I would say that, thanks to him, those relations have been friendly, and certainly very memorable as far as I am concerned. I have been able to see how he reacts in handling difficult problems—problems like Lebanon, and Quemoy and Matsu, for example. There is nothing that quite takes the place of witnessing firsthand the making of great decisions.

WHEN A CRISIS ARISES

Question. Would you say that in crises Mr. Eisenhower is any different from what he is in the normal routine of everyday work?

Answer. I think everyone is different in a crisis. In the case of the President, what impresses me the most is his complete objectivity and impersonal approach to a crisis. You can describe it as coolness in a crisis, but simply saying that he is cool in a crisis does not adequately describe his attitude. In fact, those who have seen him, as I have, when he has made important decisions, get the impression that here is a man who is carefully weighing all the pros and cons of a particular course of action, without thinking at all about the effect that such action may have on his personal popularity—thinking only of what he believes is in the best interests of the country. And, most important, by watching him in these moments of crisis I was impressed by the fact that the hotter the discussion became, the cooler he became. This is probably one of the greatest lessons that I have learned while working under the President and with him during the past 7 years.

There is one other thing I might say in this connection which I think is important: Once he makes a decision, it is made. He does not continue to worry about it and to second-guess it. This, I think, also is important in leadership.

Question. What is your feeling as you watch the President? Is the Presidency itself something toward which there is a sense of awe and perhaps of great reverence?

Answer. Strangely enough, as you were stating that question the words "awe" and "reverence" were exactly the ones that came into my mind. Whenever I see the President making a tough decision I recognize how easy, by comparison, my responsibilities are. Another thing that is very impressive about the President is that, no matter how much he may have on his mind, he seldom gives the impression of carrying the world on his shoulders. He has the ability to keep a relaxed mind when he makes the important decisions. Some men, when they have tough decisions, inevitably tense up right in front of your eyes. I have seldom seen the President give that impression, if ever.

THIRTY-THIRD ANNIVERSARY OF LINDBERGH'S SOLO FLIGHT ACROSS THE ATLANTIC OCEAN

Mr. DODD. Mr. President, 33 years ago tomorrow the world was electrified by a singular act of courage which stirred the imagination of mankind and signified the entrance into a new era. I refer to the first flight across the Atlantic Ocean by Charles A. Lindbergh.

Since that hour of triumph, Colonel Lindbergh has passed through many fiery trials. He has been visited alike by success and disappointment, by tragedy and achievement.

Last Sunday's issue of This Week magazine supplement featured a brief but moving article by Lindbergh, a statement reflecting the insight and experience of an unusual life. It is an eloquent plea for a rejection of the materialistic philosophy by the free world and for subordination of politics and science to the aims of a philosophy based on eternal moral truths.

I ask unanimous consent that this article be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHALLENGE

(By Charles A. Lindbergh)

I grew up as a disciple of science. I know its fascination. I have felt the godlike power man derives from his machines—the strength of a thousand horses at one's fingertips; the conquest of distance through mercurial speed; the immortal viewpoint of the higher air. I have sensed the harmony of muscle, mind, and mechanism which gives the illusion of life to substance until levers move with thought as hand or foot, until the rhythm of an engine is geared to the beat of one's own heart, and wing in turning flight seems an extension of one's own body.

Now, I have lived to experience the early results of scientific materialism. I have watched men turn into human cogs in the factories they believed would enrich their lives. I have watched pride of workmanship leave and human character decline as efficiency of production lines increased. I have seen the lifesaving miracles of medicine perverted toward the murderous ends of biological warfare. I have seen the science I worshiped, and the aircraft I loved, destroying the civilization I expected them to serve, and which I thought as permanent as earth itself. In memory, the vision of my mailplane boring northward over moonlit clouds is now mingled with the streaks of tracers from my fighter, flaming comets of warplanes, and bombs falling irretrievably through air.

We still have the possibility, here in America, of building a civilization based on man, where the importance of an enterprise is judged less by its financial profits than by the kind of community it creates; where the measure of a man is his own character, not his power or his wealth. If we have sufficient desire, we can still build a civilization whose leadership rests on the respect and confidence it instills in others, and whose standard of life is the quality of life itself.

But time is short. Looking at the destruction already wrought, at the materialism growing on every side, at the increasing bitterness and unrest throughout the world, at

the tremendous power of our latest weapons, a realist might well conclude that many of us now living will see the start of another war, one which will end in more dark ages.

There is no materialistic solution, no political formula, which alone can save us.

Our salvation, and our only salvation, lies in controlling the arm of Western science by the mind of a Western philosophy guided by the eternal truths of God. It lies in the balanced qualities of spirit, mind, and body of our people.

TALE OF TWO CITIES

Mr. DODD. Mr. President, I would like to bring to the attention of my colleagues a letter entitled, "The Tale of Two Cities," which appeared this morning on the editorial page of the Washington Post.

Written by Carl Levin, chairman of the Citizens Committee To Save Lafayette Square, the letter points out the need for adequate facilities in Washington for the presentation of opera and other forms of the performing arts.

I wholeheartedly support Mr. Levin and his committee and hope that the Subcommittee on Public Buildings and Grounds will report favorably on this project following hearings scheduled for Monday.

I want to commend Senator RANDOLPH, chairman of the subcommittee, and Senator CHAVEZ, chairman of the Public Works Committee, for their efforts in scheduling hearings on this most worthy project.

I ask unanimous consent that Mr. Levin's letter be printed in The RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TALE OF TWO CITIES

Your May 11 editorial, "Tale of Two Cities," brought out pointedly the sad incongruity of the relative facilities for the presentation of the arts in New York City and in our Nation's Capital.

The newly formed Citizens Committee to Save Lafayette Square, however, hopes that our effort will be neither "too little" nor "too late."

Though it is true that we undertook our effort late—for the west side of Lafayette Square apparently already is lost—we are convinced that there is still time to save the quiet dignity and utility offered by the old buildings facing on the east side of the White House park.

As you pointed out so well in your editorial, New York City has rallied to save and is saving Carnegie Hall. Simultaneously, it is proceeding to build the Lincoln Center, all of this in addition to numerous other facilities such as the City Center where the New York City Ballet and other such groups are able to offer their art in appropriate and adequate surroundings.

By contrast, Washington, probably alone among the great capitals of the world, has no existing adequate facility for the presentation of opera and other forms of the performing arts.

The Belasco Theater, originally known as the Lafayette Square Opera House, can be restored to its former beauty, elegance, and utility, and it would certainly seem that a country which has spent tens of millions of dollars restoring foreign opera houses and other public buildings abroad could afford the small expenditure required to put the old Lafayette Square Opera House back into a proper and usable condition.

It may even be that in the immediate future we will have a President who will take pride in, and derive great pleasure from, being able to take a state guest across the park to a lovely opera house for an evening of ballet or opera or for a recital by some great American artist.

Not long ago, a group which wished to exhibit the work of student artists of a foreign country had to take their exhibit to a little public library on upper Connecticut Avenue, because Washington lacked a building in which such exhibits could be held.

The American Art League, one of the numerous groups combining their efforts within the organism of the Citizens Committee to Save Lafayette Square, has pointed out that either the old Dolly Madison House or the Benjamin Tayloe House would serve ideally for exactly such purposes.

With organizations representing millions of citizens—national organizations such as the General Federation of Women's Clubs, the National Federation of Music Clubs, and the American National Theater and Academy, and such local entities as the D.C. Recreation Department, the Children's Theater of Washington, the Washington Ballet Guild and others—pleading for sympathetic understanding of the wisdom of saving the buildings and the atmosphere of Lafayette Square, we of the citizens committee feel that in coordinating and sparking these efforts we at least are not bringing "too little" effort to bear.

We have been heartened by a promise of public hearings before the Senate Public Works Committee and by pledges of assistance from many enlightened Members of Congress. However, this is a problem on which much additional support is needed and your readers are urged to assist where they think they can help.

CARL LEVIN,
Chairman, Citizens Committee To Save Lafayette Square.

ACTIVITIES OF CYRUS EATON

Mr. DODD. Mr. President, among this morning's bulletins from Paris was the story that Cyrus Eaton, a well-known American apologist for world communism, flew to Paris last night and held a conference with Khrushchev at the airport before the departure of the Kremlin dictator.

This is the latest of many incidents in which Mr. Eaton has meddled in the conduct of American foreign policy through personal meetings with officials of foreign governments. Mr. Eaton is only one of a growing number of private citizens who are making a fad out of Mecca-like pilgrimages to the Kremlin, constituting themselves as messengers from the United States to Khrushchev and from Khrushchev to the United States, and, in general, involving themselves in the worldwide propaganda operation of the Communist movement.

For the benefit of Eaton and others, I quote the key provision of the Logan Act which was passed in 1799.

Any citizen of the United States, wherever he may be, who, without authority carries on any correspondence or intercourse with any foreign government or any officer or agent thereof, with intent to influence the measures or conduct of any foreign government or of any officer or agent thereof, in relation to any disputes or controversies with the United States, or to defeat the measures of the United States, shall be fined not more than $5,000 or imprisoned not more than 3 years, or both.

Cyrus Eaton is a materialistic, meddlesome, evil old man, who has been a useful tool of the Communist movement. He has made a habit of exchanging visits and gifts with Communist leaders. He has made a practice of criticizing the United States in Russia and praising Russia in the United States.

He is the object of continuing Communist accolades and awards, the latest being the Lenin Peace Prize.

It is in his statements that the best picture of Eaton himself emerges. I wish to quote for the RECORD what Mr. Eaton has said about the United States of America. On one occasion he said:

The scientist is conscious that the FBI is breathing down the back of his neck all the time, scaring him * * * we have even praised the FBI for violating the rights of free men. But if you were to take the police forces of the cities and of the countries and of the State and the governmental agencies and add them up, Hitler in his prime, through the Gestapo, never had any such extensive spy organization as we have in this country today.

He accused Secretary Dulles, the Pentagon generals, and American politicians in general of "relentlessly driving us to war." He has said that American officials do not represent the American people—this is interesting—whereas in the Soviet Union the Government speaks in the name of all the people. He has said: "There is more spirit of war in the United States than in any other country in the world and it's dangerous."

He has publicly urged Canada to "completely disassociate itself from America's stubborn attitude in foreign affairs." If he has said in his many private conversations with Canadian officials what he said in this public meeting, then he has violated the express provision of the Logan Act and should be prosecuted.

So I direct the attention of the Attorney General of the United States to what Mr. Eaton has done.

Mr. Eaton has publicly praised Khrushchev's integrity, his popularity, his ability, his sense of humor, his honesty and his desire for peace. He described the completely phony disarmament plan Khrushchev announced to the United Nations as the "most statesmanlike utterance in my lifetime."

During questioning before the National Press Club in Washington, D.C., he said that Russia doesn't really mean to communize the world; that Dr. Zhivago was suppressed because the fanatical young people of the Soviet Union cannot bear any criticism of their beloved government; that the Russian massacre of Hungarian patriots was no different from our sending troops to Lebanon."

This is a man in the United States who is comparing what we did in Lebanon to the butchery of the Hungarian patriots by Khrushchev.

I say again that I urge the Attorney General to keep a special eye on Mr. Eaton and whenever he violates the letter of the Logan Act, as he has so frequently violated its spirit, the Government of the United States should move

promptly against him and against all others who unlawfully interfere with the conduct of American foreign policy.

I hope the Attorney General will carry out his duty. It is time we put an end to such activity in this country.

Mr. HICKENLOOPER. Mr. President, I wish to say to the Senator from Connecticut that he has brought to our attention a very pertinent and important factor in present-day American politics in its broadest sense. I think the Senator has done a service today by the very vigorous remarks he has made.

The strange aberrations of this man Eaton are not understandable to most of us. This incident serves only to illustrate how far the tolerance of the American people goes in the field of freedom of speech. We have tolerated the ununderstandable conduct and ununderstandable statements of this man simply because this is America, and we respect the right of free speech. However, as the Senator has pointed out, there is a limit, so far as the public good is concerned and so far as the public weal is concerned. There is a limit to so-called freedom. When freedom becomes license we have always recognized that it must be curbed. It must be curbed sensibly and unemotionally.

I congratulate the Senator on his statement. I think this is a matter to which we should pay more attention in the future than we have in the past. The peculiar mental gyrations of this man Eaton, who apparently has great affection for the Communist system and apparently has great admiration for the autocracy and dictatorshop or Russia, are not understandable. We should pay more attention to his utterances, because he happens to be a man of wealth, which fact enables him to indulge in publicity of this kind. It can do nothing, and has done nothing, but bring about very unfortunate difficulties for the United States.

One might go a little farther. Although I am not particularly charmed with this kind of an attitude, one might say, as has been said a few times in the past, when people do not seem to like the United States, want to tear down what we have done, and seem to love other systems, "Why do you not go there to live? Why do you not join the system for which you seem to have such great admiration, and simply abandon the citizenship which you do not seem to appreciate and the privileges which you do not seem to appreciate?"

I congratulate the Senator.

Mr. DODD. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. DODD. I thank the Senator for his kind remarks. I point out that this latest performance by Eaton is particularly objectionable. His flight, apparently hurriedly, to Paris last night to greet Khrushchev at the airport, after the terrible incident in Paris yesterday, when Khrushchev called the President of the United States a thief and said all these dreadful things about our country and our President, is to me unconscionable. It is unforgivable that an American citizen would fly to Paris and confer with Khrushchev in the most cordial manner, as reported this morning. We do not know what was said. What he did was particularly offensive.

As the Senator has said, I am not at all taking the position that anyone should be denied his right to criticize his Government or any of us. I am simply pointing out to the Attorney General that there is a statute on the law books which forbids private citizens from entering into conversations or correspondence with the heads of other states concerning matters about the U.S. Government and its relations with other governments. That is the law of the land. I believe this man is violating the law. Some others may have been doing so as well. I think the Attorney General ought to prosecute.

Mr. HICKENLOOPER. Mr. President, I do not, by the slightest suggestion, mean to indicate that I deny the right of an individual to criticize his government or to criticize me or anybody else.

Mr. DODD. Neither do I.

Mr. HICKENLOOPER. That is an American privilege. I only wished to point out a moment ago that when free criticism reaches the point of injury to the general body politic of this country it is time we look into it very carefully.

I suggest also that although I, of course, am not a physician and have no medical competence, I have read about what has taken place, and a question is raised as to a matter of psychological quirk which might be investigated to some profit, so far as this man is concerned. There are evidently certain delusions of grandeur which are not well-founded on the record. It might be well to examine them a little more.

I congratulate the Senator again.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. CURTIS. I thank the distinguished Senator from Iowa. I agree with what he says and I emphatically agree with the statement of the distinguished Senator from Connecticut [Mr. DODD]. His statement was something which should have been said on the floor of the Senate. What he has said is right and appropriate, and I commend him for it.

Mr. DODD. I thank the Senator from Nebraska.

SPY PLANE INCIDENT

Mr. HICKENLOOPER. Mr. President, I discussed with the junior Senator from Tennessee [Mr. GORE] the fact that I was going to speak on the subject on which I am about to address the Senate, and he very kindly agreed that he would be present in the Senate today to discuss the matter with me.

Yesterday the junior Senator from Tennessee [Mr. GORE] in a statement took issue with Vice President NIXON, who disclosed in a speech in Buffalo that at the very time Mr. Khrushchev was making a speech before the United Nations, agents of our country arrested two Russian spies in this country, one of whom at least, I believe, was a member of the Russian mission to this country.

The junior Senator from Tennessee [Mr. GORE] took issue with the Vice President on his disclosure of that fact yesterday. In turn, I wish to take issue with the junior Senator from Tennessee.

In most fields of national defense, especially in the field of atomic energy tests and activities of that kind, the junior Senator from Tennessee and I are in very substantial agreement. I admire his zeal and his devotion to the problems involved in international affairs. However, I am sorry that in this instance I must disagree with him very definitely.

Since the U–2 incident was first publicly disclosed I had felt it was high time that we of the United States spread upon the record the days, the dates, and the names of those concerned with Communist espionage in this country over the past years. If we will lay that record before the people, in my judgment, we will find that no country in modern times has engaged in such a vast network of espionage, which has extended on occasions even into the U.S. Government itself. I believe it is high time that those activities should be documented publicly. I was earnestly hopeful that they might have been documented in Paris.

So far as the U–2 incident is concerned, there is no question that the Russians knew all along, and for a substantial period of time, that these overflights were occurring. It so happened that this particular incident occurred a short time prior to the conference which was supposed to be held this week in Paris, of which Mr. Khrushchev and the high command took advantage to torpedo the conference. If it had not been for the public knowledge of the U–2 incident, there is no doubt Mr. Khrushchev and his group would have found some other excuse to scuttle the conference.

To return to the criticism of Mr. NIXON by the Senator from Tennessee, I believe it is time that some statements were made, not alone concerning the 2 spies who were captured, but concerning the whole list of those who have spied in this country on behalf of Russia.

We talk much about overflights across Russia. To me there is little difference between a man walking along the ground and gathering information, a man riding in a train and gathering information, a man riding in a commercial airplane and gathering information, and a man flying at 50,000 feet and gathering information. The Russians have been gathering information in this country brazenly. We know that. We have had documentation of their activities.

But what the United States did in the interest of peace was to refrain from bringing these matters before the world, in the hope that a conference in Geneva could be operated on a basis of as much harmony as possible. Therefore I am quite sure that our purpose in refraining from bringing these activities before the Geneva Conference was to avoid contributing additional tensions. However, since the Russians have brought these occurrences before the world, I think we should likewise bring before the world the information which we have. I dis-

agree with the Senator from Tennessee in his criticism. I quote from this morning's issue of the New York Times. The Senator from Tennessee will correct me if this is a misquotation:

Only a few days ago, the Tennessean added, Mr. NIXON was "basking in credit for having arranged the Khrushchev visit to the White House." The Vice President "is an old hand at being hard on Communists and Democrats, as well as with the spy-cop-robber-treason technique," Mr. GORE said.

Mr. President, in all sincerity and in all friendship for the Senator from Tennessee [Mr. GORE], and in the light of our long and cordial association, I still say I believe he was unduly brutal and unduly harsh on the Vice President of the United States, who probably did as much as any other man in this country to point up the espionage ring which existed a few years ago in our country. I do not believe he merits criticism for revealing that activity.

The Vice President needs no defense for his own defense of the integrity of the American system. I believe he needs no defense for pointing out after the fact—and he pointed out only two instances of the scores which can be documented—that we refrained as a country from stirring up international tensions by making a big issue out of the spy incident in this country, so that we might have some basis of harmony on which to approach the discussions of peace and the discussions of international tensions.

I feel that the Senator from Tennessee [Mr. GORE] is unduly harsh in his criticism, and I feel that he is unjustified in saying that, because the Vice President of the United States in his speech at Buffalo yesterday disclosed only two instances as an illustration, the Vice President should be charged with making cheap politics out of an issue of this kind.

As I said a moment ago, I regret every disagreement which I have with my friend from Tennessee, for in the majority of cases we find ourselves in substantial agreement on questions of international interest. But I do feel that this whole article is unwarranted, and I believe the attack by the Senator from Tennessee was unwarranted and unjustified. I do not believe that American public will accept it as a justifiable attack, under all the circumstances.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point in my remarks the article from this morning's issue of the New York Times, written by Russell Baker, referring to this incident.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GORE CRITICIZES NIXON ON SUMMIT—CALLS TALK ON SOVIET SPIES A CAMPAIGN MOVE—FOUR TOP DEMOCRATS PRESS UNITY

(By Russell Baker)

WASHINGTON, May 18.—Senator ALBERT GORE shattered the domestic political calm over the collapse of the summit meeting with an attack today on Vice President RICHARD M. NIXON'S response to the Paris crisis.

It was the first open political clash to come out of the summit breakdown and it came while Democratic leaders for the third consecutive day were making extraordinary efforts to maintain a unified national front behind President Eisenhower.

Senator GORE, a Tennessee Democrat, did not criticize the President, or raise a question on events leading to the summit collapse, but he delivered a cutting denunciation of Mr. NIXON'S reaction to the news from Paris.

The Gore attack was provoked by the Vice President's speech in Buffalo today, in which Mr. NIXON gave hitherto secret reports of Soviet spies spotted in Springfield, Mass., during Premier Khrushchev's tour of this country last fall. Mr. NIXON in his speech also challenged the Democrats to investigate the President's refusal to apologize to Mr. Khrushchev in Paris.

While Democrats were "withholding criticism and pleading for unity," Senator GORE said, "Mr. NIXON is talking of how to be hard on communism, and how to deal with Communists, and giving forth about the arrest of Russian spies. Maybe the old NIXON is going to be nominated after all instead of the new."

Why, he asked, was new spy information being made public "in a campaign speech, only after the get-along-with-Khrushchev treadmill has come to a crashing halt?"

Only a few days ago, the Tennessean added, Mr. NIXON was "basking in credit for having arranged the Khrushchev visit to the White House." The Vice President "is an old hand at being hard on both Communists and Democrats, as well as with the spy-cop-robber-treason technique," Mr. GORE said.

Other developments here in the wake of the Paris breakdown included these:

Disclosure that four leaders of the Democratic Party had cabled the President yesterday urging him "to convey to Premier Khrushchev the views of the opposition party in your country that he reconsider his suggestion for postponement of the summit conference until after the national elections in this country."

The message was signed by Sam Rayburn of Texas, Speaker of the House; Lyndon B. Johnson of Texas, Democratic Senate leader; Adlai E. Stevenson, Democratic presidential candidate in 1952 and 1956, and J. W. Fulbright of Arkansas, chairman of the Senate Foreign Relations Committee.

A spokesman for the Republican National Committee said that sentiment was building to arrange a big homecoming demonstration in Washington for President Eisenhower when he returns from Europe Friday afternoon.

Congressional leaders quietly dispelled speculation that a special investigation of the administration's presummit maneuvers would be countenanced at the Capitol this year.

PROSPECTS FOR CONGRESS

The prospect was that questions about presummit maneuvers and reassessment of the national position in the wake of a new tough line from Moscow would be dealt with piecemeal in routine committee proceedings.

The renewal of the Democratic leadership's call for unity was based on fears that any deep division within the United States at this time might weaken its international position while new Soviet intentions were still uncertain.

Another factor was the disgust many Democratic leaders feel for the prospect of making grave international policy a partisan spectacle in this election year. Many of these same Democrats still resent Republican political exploitation of Korean war issues and do not want a Democratic reprisal.

One other factor is the expectation that President Eisenhower will receive a wave of public sympathy in reaction to Mr. Khrushchev's behavior in Paris. At the moment, the Democrats are disposed to wait for the dust to settle before arguing background issues.

The Democratic leadership's message to the President was worked out at the Capitol Monday while Mr. Stevenson was there to testify on the use of television in political campaigns.

"We feel that total failure of the [summit] conference and increasing mistrust on both sides will be serious and deeply disturbing to the world," it said.

"All of the American people earnestly desire peace, an end to the arms race and ever better relations between our countries. We ask you as the leader of this nation to see that these views are conveyed to Mr. Khrushchev."

Aside from its value as a demonstration to the Russians of the U.S. internal unity, the message was designed to destroy the idea that Mr. Khrushchev might get a better bargain by waiting for a new President to be elected. The Soviet Premier proposed postponing summit conferences until after the national election in the United States. Both parties are sensitive and angry about this Soviet interference in domestic politics.

Mr. GORE. Mr. President, I am grateful for the generous references of my friend and distinguished colleague, the able senior Senator from Iowa [Mr. HICKENLOOPER]. As he has done, I, too, wish to pay tribute to the warm friendship which he and I enjoy serving together, as we do, on two committees and having found ourselves upon many occasions not only personally agreeable to each other, which relation, I say to my friend, I have enjoyed thoroughly, but also many times we have had an affinity of views upon questions affecting our national security.

The Senator has just said there are many more cases which are being suppressed. Are they, too, to be fed out piecemeal for campaign oratory?

The essential question I raised yesterday was that of secrecy. Why has this information so long been withheld from the American people? If there are scores more, I call upon the Government of the United States to give this information to the American people. Secrecy in Government has gone entirely too far. I do not wish to refer to incidents prior to or involved in the regrettable tragedy of the Paris Conference. As other Members of the Senate have said, there will be a proper time to discuss our individual feelings of humiliation and that of our country. The proper time has already occurred to express resentment, which every American must have felt, at the insults heaped upon the President of the United States. I expressed my resentment on the floor of the Senate.

I do not wish now to make reference to other sentiments and views which I have withheld and will withhold until the proper time.

However, I am not sure that a suppression of the news involving Russian espionage in our country has contributed to peace. If there are scores of additional incidents, I call upon the Government to release the information to the American people.

I read from a dispatch from United Press International, of today:

The Vice President, who made the disclosure during a political swing through upstate New York—

I asked two questions yesterday. Why had this information been kept secret

from the American people since last September? When did these other score or more occur? Has that information been suppressed, too, for 6 or 8 or 10 months, or longer?

The second question I asked was, Why is it now made public in a political speech after the debacle in Paris? I interpret this as an effort to convert the tragedy in Paris to political advantage.

My friend the distinguished Senator from Iowa says that in that judgment I am harsh. I do not wish to reach harsh judgments, or to render brutal verdicts. I submit to the Senate the record and ask each Senator to determine for himself whether the cause of peace has been served by the suppression from the people of the United States, by secrecy, of information involving espionage attempts reaching into scores of incidents, as we are told; whether such secrecy is proper and in the public interest.

Each Senator may determine for himself whether this was a political use of information which heretofore had been denied the American people, but which on yesterday was used, according to the news dispatch, on a political swing through upstate New York.

Mr. HICKENLOOPER. Mr. President, will the Senator yield, or would he prefer to continue?

Mr. GORE. I am very glad to yield to the Senator from Iowa.

Mr. HICKENLOOPER. With regard to the Senator's contention that this is information which has been kept secret, I certainly join him in saying that we should now make these cases public, that they should be documented and should be told to the world.

Mr. GORE. Before the Senator goes further, I am glad that he joins me in that expression. Will he also join me in the suggestion or request that the Government of the United States, through its established agencies having jurisdiction, make this information public rather than making it public piecemeal through political speeches?

Mr. HICKENLOOPER. That is the point I was just approaching. It has been made public. It has been made public repeatedly over the years. I call the Senator's attention to the insertion in the RECORD of yesterday made by the senior Senator from South Dakota [Mr. MUNDT], at page 10548 of the RERORD, where there appears a list of 65 Russian spy cases, naming names, naming incidents which have occurred in the United States since 1946, which have had full publicity and which are known. I shall not repeat the names now; they are all printed in the RECORD beginning at page 10548. To supplement that information, there is listed a very substantial number of foreign cases in which Russian spies have been convicted, and sentenced in most cases—activities in Switzerland, West Germany, Greece, Japan. I shall not take the time to delineate all of them, but they are in the RECORD. These are all cases that have been made public, but the last two the Senator refers to were apparently the most recent ones that had occurred.

The American public and the world should know these things. They should know that the Russians have been the masters of espionage in the world, and have probably exceeded all other countries in the world in espionage. I think it is high time we let that fact be known. I did not think we should stir up this situation prior to the great attempt at the summit to achieve a peaceful solution of the tensions of the world. I thought it wise not to bring up these irritants beforehand.

However, now that Mr. Khrushchev has found this "fish out of water"; now that he has disclosed what the intentions of the Russians are, and that he has no intention of seeking a solution of world tensions on any realistic basis, I think the time has come for us to tell the world exactly and to emphasize exactly what the Russians have been doing in the field of espionage, and thus lay the activities of most of the other countries in the shade.

However, that list was placed in the RECORD yesterday by the Senator from South Dakota [Mr. MUNDT] and is now available for all to see.

Mr. GORE. I again shall decline to refer to the assumptions upon which the U.S. approach to the summit conference was rationalized. At the proper time, I shall address the Senate upon that and related subjects. I do not regard today as the proper time to do that.

I should like to inquire of the distinguished Senator from Iowa if the list to which he refers, which appears in the RECORD, as I understand, and is available only this morning, and therefore was not printed before the disclosures in the upstate New York political swing yesterday, includes the two instances in September, to which the Vice President referred.

Mr. HICKENLOOPER. A cursory reading of the list indicates that they do not appear. I cannot find them in the list at the moment. The list comprises one column on page 10548, three columns on page 10549, and one and three-quarters columns on page 10550. So upon a quick examination, I cannot say whether the two cases are included. However, it is my impression that the list does not include those two cases.

Mr. GORE. One question seems to remain between us. The Senator from Iowa has joined with me in a request and a suggestion that a full disclosure of Soviet espionage efforts be made public. Would the Senator also join with me in asking that such information be released by the departments and agencies of the Government having jurisdiction over such matters, and of whom, I feel certain, the representatives of the free press will soon make inquiry, rather than to have it fed to the public piecemeal in a political campaign for political advantage and use?

Mr. HICKENLOOPER. I must say to the Senator from Tennessee that I would not necessarily support a full disclosure of all espionage cases in this country, for the very reason that the American self-interest and security might not warrant such a disclosure. In certain cases, if knowledge of espionage activities were disclosed at the present time, it might give information to the enemy, to the detriment of the United States. There are some cases which cannot be disclosed at the time they are discovered, and should not be disclosed. They should be kept very secret, simply because of the techniques which are used. The espionage effort in which the Russians are engaged is a very clever game.

Generally speaking, I believe the number of cases which can be disclosed without harm to the national security and without harm to our friends should be documented, so as to counter the Soviet espionage activities. I think such cases should be disclosed. It does not make any difference to me how they are disclosed, but I think the circumstances of them should be available to the public.

I had hoped, for instance, that if the conference took place, and Mr. Khrushchev began to make much of the so-called U–2 incident, the President would have with him a list of Soviet espionage cases to throw right back in Khrushchev's face. But the conference did not take place. I do not know whether what I have suggested would have been done. However, I had hoped we would be prepared to do that.

Mr. GORE. The able Senator, in replying to my question, instead of answering it, has raised two more questions.

Shall the Vice President, in a political campaign, determine what shall be secret and what shall not be secret? The Senator from Iowa says it does not make much difference to him as to how such information is released. I say that is a matter of propriety and importance. It is one of the two principal issues I raised. The other was secrecy. The Senator from Iowa has said that in some cases the interests of this country might well be served by disclosure. If so, I am willing to have the proper authorities make that determination.

However, I wonder if the Senator would agree that any information which can be disclosed in a political speech, to be specific, should, in an orderly way, be made available to the American people and the free press by the agencies of Government having proper jurisdiction?

Mr. HICKENLOOPER. I see no reason why any information along that line, the release of which would not be detrimental to the activities of the United States, should not be disclosed to everybody or should not be made available to everybody.

Mr. GORE. Shall it remain classified until a candidate for political office decides that it may be fortuitous to release such information?

Mr. HICKENLOOPER. No; I do not believe in the system of classification by convenience, and I never have. I do not think what the Senator says is necessarily so. Nevertheless, I think it is high time that the Government disclose to the American people what is taking place. So far as I know, the only persons who can disclose it are the officials who know about it.

Mr. GORE. The Senator from Iowa has used some rather strong language. It is not the most pleasant experience

that one can have in this body to have one of his esteemed colleagues and friends say that he has reached a brutal judgment. I thought I reached an entirely justified judgment. I thought I raised proper questions. I think the record bears me out.

I ask the Senator again, specifically and pointedly, since he has joined with me in a request that such information as will not be injurious to the national interest be disclosed to the public, will he also join with me in the request that the agencies concerned reach such a determination and disclose the information to the public, rather than reserve it until a candidate for political office, in an upstate swing in New York, or in a political swing in some other State, decides it is fortuitous to release it?

Mr. HICKENLOOPER. I have not joined with the Senator from Tennessee in any particular request. I have merely stated that I think the spying activities of the Kremlin which are taking place in this country and elsewhere should be documented and disclosed to this country and to the rest of the world, except in those cases where it would be a disservice to our own national security or the national security of our allies to disclose individual incidents.

Mr. GORE. If the Senator from Iowa does not wish to join with me in that request, I join with him in what he has said.

Mr. HICKENLOOPER. I welcome the Senator's statement. So far as my accusing the Senator from Tennessee of being brutal is concerned, I did not intend to accuse the Senator of being brutal. I think the phrase I used was that I thought he was unduly harsh in his criticism. I take it there is a little difference in the connotations of "brutality" and "harshness."

Mr. GORE. I accept the modification.

Mr. HICKENLOOPER. I think "harsh" is a little less brutal than "brutal."

Mr. GORE. I accept the modification with appreciation.

Mr. HICKENLOOPER. I would never accuse the Senator from Tennessee of being brutal, because he is not a brutal man. It is not his instinct to be brutal.

Mr. GORE. I thank the Senator.

Mr. HICKENLOOPER. However, I think the Senator from Tennessee on occasion, perhaps, can put himself in a position where I think he is undoubtedly harsh, and without doubt I can put myself in a position where the Senator from Tennessee may think I am unduly harsh. I think there is a difference; and I do not wish to have the RECORD indicate that I am accusing the Senator from Tennessee of brutality, because that is furthest from my thought.

Mr. GORE. I may have been accused of worse, I may say.

Mr. HICKENLOOPER. Of course, those of us who have been in politics for some years have been accused of a great many things, and we get used to that.

But so far as concerns disclosing something in a political campaign, let me say that political campaigns are for the purpose of discussing the issues. I take it the Senator from Tennessee is raising the objection because of the fact the Vice President disclosed the incident referred to in connection with a speech on what might be considered to have been a political occasion. I see no reason why he should not have disclosed it. I do not know that it was classified information beforehand. It may have been; I have no knowledge about that.

But I repeat that I think the world should know with some detail of the activities of the Kremlin. And regardless of what may be considered the wise way to issue such information, I think it should be put out. I think it should be laid down for all to see; and then I think it would answer, or should answer, the questions asked by a number of well-meaning people in this country.

I have received letters from several persons who have had the effrontery to say that we should apologize to the Russians—although most of the letters I have received have expressed just the opposite view. But when the few who favor the making of an apology realize what we have done by way of gathering necessary information to protect the security of this country, as against what the Russians are planning to do over there, from a military standpoint, and when they consider what our country has done by way of gathering such information and what the Russians have done in this country for years and years and years, I think such persons will change their opinion as to the desirability and the necessity of our securing information as to what the enemy is plotting against us.

Mr. GORE. Mr. President, I shall not press my friend further.

I shall close by recalling that as soon as I heard the report that the Russian dictator had demanded an ignoble apology by the President of the United States, I rose on the floor of the Senate and expressed resentment, and said the American people could be confident that the President of the United States, the embodiment of America's pride and hopes for peace, would respond as a gentleman of honor.

ADDRESS BY SENATOR ROBERTSON AT JAMESTOWN, VA.

Mr. TALMADGE. Mr. President, on Sunday, May 15, Mrs. Talmadge and I had the privilege of joining the distinguished junior Senator from Virginia [Mr. ROBERTSON], the distinguished junior Senator from Mississippi [Mr. STENNIS], and the distinguished junior Senator from Kansas [Mr. CARLSON] in attending the impressive ceremonies held at Jamestown Island, Va., commemorating the landing of the first permanent English settlers in America and the rededication of the Robert Hunt Memorial Shrine, which honors the founder of the first Protestant church in America. The combined services were sponsored by the Association for the Preservation of Virginia Antiquities, with the cooperation of the Bruton Parish Church, the College of William and Mary, the Colonial National Historical Park, Colonial Williamsburg, and the Jamestown Foundation.

The principal address of the occasion was delivered by the respected junior Senator from Virginia, and was an eloquent and stirring tribute to the unwavering faith in God and stanch adherence to the tenets of freedom of our Founding Fathers. It was an inspiring experience; and I came away with the firm conviction that it would be beneficial, indeed, if every man and woman in public life in America could visit and see for themselves this historic site from which have sprung the institutions of liberty which have given us on this continent the greatest and freest Nation in the history of mankind.

I ask unanimous consent, Mr. President, that the full text of the remarks of the junior Senator from Virginia on that occasion be printed herewith in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

FAITH OF OUR FATHERS

(Remarks of Senator A. WILLIS ROBERTSON at the 353d anniversary of the first permanent English settlement in America at Jamestown, Va., May 15, 1960)

On this 353d anniversary of the landing of English settlers at Jamestown, I welcome the privilege of joining with distinguished church leaders in paying tribute to the memory of Robert Hunt, the first chaplain of the Jamestown settlement who served in that capacity until his death in July of 1608. The fact that those first settlers had a deep and abiding faith in the teachings of the Bible is not as well known as the faith of those who settled at Plymouth 13 years later. The latter had come to a new land in search of religious freedom, whereas the Virginia settlers had come in search of gold. But members of the church of England had made a substantial contribution to the London Co. which financed the Jamestown settlement on the condition that it could send with the first settlers a chaplain and the further condition that the Christian religion would be brought to the savages of the North American Continent. Evidently, therefore, the first chaplain, Robert Hunt, was chosen by the Archbishop of Canterbury and his work was highly praised by Capt. John Smith who said that he was "an honest, religious and courageous divine." Smith also said of the first religious services at Jamestown: "We had daily common prayer morning and evening, every Sunday two sermons, and every 3 months the holy communion, till our minister died: but our prayers daily, with an homily on Sundays, we continued 2 or 3 years after, till more preachers came: and surely God did most mercifully hear us."

At the untimely death of their rector, at about 40 years of age, the colonists not only paid tribute to the religious and social work that he had done among them but to his readiness to defend the settlement, upon any alarm as quickly as any man and of his constant encouragement to the men at Jamestown to persist in their attempt to plant a successful colony. Again, when the first session of the assembly met in 1619 (incidentally, the first elected governing body ever to serve in this country) the first order of business was a prayer by Reverend Buck, then the minister at Jamestown. That action was noted in the records of the assembly in the following terms: "But for as much as men's affairs do little prosper where God's service is neglected; all the Burgesses took their places in the choir, till a prayer was said by Mr. Buck, the minister, that it

would please God to guide us and sanctify all our proceedings to his own glory, and the good of this plantation."

In the Senate of the United States we have an organization known as the Breakfast Group, which meets each Wednesday morning at 8:30 for breakfast and then for a 30-minute discussion of some religious topic for which some member is designated each week as the leader. I am proud of the fact that four members of that Breakfast Group have accompanied me to Williamsburg and Jamestown not only to join in our tribute to the memory of the first chaplain of the Jamestown settlement but also to indicate their appreciation of the significance in the subsequent development of the most powerful nation in the world, of the religious faith that was translated into George Mason's Bill of Rights, into Thomas Jefferson's Declaration of Independence, and into the Philadelphia Constitution of 1787, all of which are based upon the teachings of the Bible.

Needless to say, all members of our Senate group share the sentiments concerning this historic area of the Old Dominion expressed by Daniel Webster at the laying of the cornerstone of the Bunker Hill Monument when he said: "We are justly proud of being descended from men who have set the world an example of founding civil institutions on the great and united principles of human freedom and human knowledge. To us, their children, the story of their labors and sufferings can never be without interest. We shall not stand unmoved on the shore of Plymouth, while the sea continues to wash it, nor will our brethren in another early and ancient colony forget the place of its first establishment till their river shall cease to flow by it. No vigor of youth, no maturity of manhood, will lead the Nation to forget the spots where its infancy was cradled and defended."

Last night we were privileged to see a moving picture made for use during the Jamestown celebration of 1957 which, among other things, depicted the debate in the House of Burgesses concerning the oppression of the sister colony of Massachusetts by the British Crown and the adoption on May 24, 1774, of the following resolution:

"This House, being deeply impressed with apprehension of the great dangers, to be derived to British America, from the hostile invasion of the city of Boston, in our sister colony of Massachusetts Bay, whose commerce and harbor are, on the first day of June next, to be stopped by an armed force, deem it highly necessary that the said first day of June be set apart, by the members of this House, as a day of fasting, humiliation, and prayer, devoutly to implore the divine interposition, for averting the heavy calamity which threatens destruction to our civil rights, and the evils of civil war; to give us one heart and one mind firmly to oppose, by all just and proper means, every injury to American rights; and that the minds of His Majesty and his Parliament may be inspired from above with wisdom, moderation, and justice, to remove from the loyal people of America all cause of danger, from a continued pursuit of measures, pregnant with their ruin.

"*Ordered*, therefore, that the Members of this House do attend in their places, at the hour of 10 in the forenoon, on the said 1st day of June next, in order to proceed with the Speaker, and the mace, to the church in this city, for the purposes aforesaid; and that the Reverend Mr. Price be appointed to read prayers, and the Reverend Mr. Gwatkin, to preach a sermon, suitable to the occasion."

George Washington, who helped to frame that resolution of 1774 knelt in the snows of Valley Forge to ask the help of God to carry on an unequal military struggle for independence and it was Washington who was presiding over the Philadelphia Constitutional Convention in the summer of 1787 when his friend, Benjamin Franklin said: "In this situation of this assembly groping as it were in the dark to find political truth, and scarce able to distinguish it when presented to us, how has it happened, Sir, that we have not hitherto once thought of humbly applying to the Father of Light to illuminate our understanding? In the beginning of the contest with Great Britain, when we were sensible of danger we had daily prayer in this room for the divine protection. Our prayers, Sir, were heard, and they were graciously answered. All of us who were engaged in the struggle must have observed frequent instances of a superintending providence in our favor. To that kind providence we owe this happy opportunity of consulting in peace on the means of establishing our future national felicity. And have we now forgotten that powerful friend? Or do we imagine that we no longer need His assistance? I have lived, Sir, a long time, and the longer I live, the more convincing proofs I see of this truth—that God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid?"

Again, in 1789, Washington said in his inaugural address: "It would be peculiarly improper to omit in this first official act my fervent supplications to that Almighty Being who rules over the universe, who presides in the councils of nations, and whose providential aids can supply every human defect, that His benediction may consecrate to the liberties and happiness of the people of the United States a government instituted by themselves for these essential purposes, and may enable every instrument employed in its administration to execute with success the functions allotted to his charge."

All Members of the Congress, and I assume that laymen generally, are aware of the fact that the Soviet Union possesses intercontinental missiles capable of reaching any part of our Nation in the course of some 25 or 30 minutes after being fired, that the hydrogen warhead of those missiles has a destructive force for a radius of 10 miles or more, that the fallout from such a missile will poison the exposed food and water supplies for a radius of several hundred miles and that we have no adequate nor satisfactory defense against a missile attack of that character. And since we can fire a nuclear weapon from a submerged submarine, it is only reasonable to assume that the Soviet Union has the same capability. It is also a matter of common knowledge that in the event of an all-out nuclear war, our casualties in the first few days of such a conflict would be tabulated in terms of millions.

It is, therefore, with the hope of staying the hand of a possible aggressor that in recent years we have been devoting more than one-half of the total tax revenue of our Government for the operation and development of our Defense Establishment.

In our visit today to this historic area whose contribution to the birth of our Nation should never be forgotten, we should be acutely conscious of the fact that we are as much in need for God's help as were the 3 million relatively poor and untrained colonists in their struggle for freedom against the then strongest military power in the world. The recent destruction in Russia of a CIA observation plane indicates how easily a cold war could suddenly turn into a shooting war. It illustrates the urgent need for a program of international disarmament, while at the same time casting a grave shadow over prospects for a successful summit conference in Paris.

By our presence here where our experiment in representative democracy started, where our concept of personal liberty under God was proclaimed to the world, the Members of our Senate Breakfast Group desire to indicate our deep concern over the fact that at a time when our beloved Nation is threatened from without by a deadly foe she also is threatened by destruction from within by spiritual indifference and moral deterioration.

The conflict of deepest concern is not might against superior might. The major issue which faces us today is this: Will America accept the moral challenge of this hour, as she has accepted the military challenge of past years, or will she allow this glorious opportunity to slip from her grasp forever?

This, my friends, is the world leadership to which we are called: to stand before the nations of the entire world and say with young David: "Thou comest to me with a sword, and with a spear, and with a shield: but I came to thee in the name of the Lord of hosts."

In stemming the tide of the anti-God ideology of communism—the unseen forces of a mighty God are on our side, and we can go confidently forward in the power of His might when we take Him at His word as He says: "If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from Heaven, and will forgive their sin, and will heal their land."

Mr. CARLSON. Mr. President, will the Senator from Georgia yield, so that I may comment on the same matter?

Mr. TALMADGE. I am delighted to yield.

Mr. CARLSON. Mr. President, I had the honor and the privilege of attending the ceremonies commemorating the landing of the first permanent English settlers in America, and the rededication of the Robert Hunt Memorial Shrine on Sunday, May 15, at Jamestown Island.

As has already been mentioned, our distinguished colleague the junior Senator from Virginia [Mr. ROBERTSON] delivered an outstanding address on our heritage as a nation and our obligation to preserve it.

It was 353 years ago on May 13 that three small ships, the *Discovery*, the *Godspeed*, and the *Susan Constant*, dropped anchor at an island in Virginia, which the settlers immediately named Jamestown.

The little settlement at Jamestown passed through many crises; and I am confident that the story is familiar to everyone who has read our early history.

Dr. Louis B. Wright, director of the Folger Library, has said:

> No other spot in either hemisphere carries so much significance as Jamestown.

On this occasion we were again commemorating the fact that the landing with not only the beginning of a new nation, but it was also the beginning of religious worship in our Nation.

It should be remembered that the settlers who landed at Jamestown were in many instances very religious people. The first thing they did when they landed on the sandy soil of Point Comfort was to erect a cross. And when they reached Jamestown Island, they took some of the sails from the ship and made a tent-chapel in which they thanked God for a safe voyage. The pastor of the colony was a remarkable man by the name of Robert Hunt.

In 1907, the dioceses of Virginia, southern Virginia, and West Virginia dedicated a memorial to the Reverend Robert Hunt, in the form of a handsome bronze relief tablet. It was at that spot that our colleague, the distinguished junior Senator from Virginia, delivered his stirring address.

This monument and the restoration of Williamsburg are not only memorials; they are also reminders to every American citizen of the sacrifices our forefathers endured in order to establish a true Republic based on the rights of the individual.

The Nation is indebted to the late John D. Rockefeller, Jr., for his foresight and his dedication in preserving these historical landmarks for all generations. It was his aim to recreate a shrine where great events of colonial history might be visualized in their proper setting, and where a revival of crafts, music, and literature would not only comprise major activities of the city of Williamsburg, but also would bring to the 20th century an appreciation of the important cultural gifts it has received from colonial times.

In this age, we of this generation must again rededicate ourselves to the principles of those who have gone before. We must, as the settlers of old, again give thanks to divine providence for the many blessings that have befallen this Nation, and at the same time pray for divine guidance in order that this heritage may be preserved for future generations.

I thank the Senator from Georgia for yielding to me.

Mr. STENNIS. Mr. President, on last Sunday, May 15, it was my privilege to attend the ceremonies at Jamestown Island, commemorating the landing of the first permanent English settlers in America and the rededication of the Robert Hunt Memorial Shrine. We met there to pay honor to these and other early settlers who founded our great Nation, and to rededicate ourselves to their basic principles in meeting the problems of today.

The speaker for this occasion was well chosen indeed, our colleague, the junior Senator from Virginia [Mr. ROBERTSON]. He did a masterful job, just as always, in paying tribute to those patriotic and spiritual leaders who settled and founded this Nation. His interesting and inspiring message held the audience of more than 1,000 people in rapt attention.

Mr. President, I also wish to mention briefly the fine contribution Colonial Williamsburg is making in enlightening our people of our early history, and in inspiring the members of this generation to adhere more closely to those principles on which our Nation was founded. While we were at Williamsburg, the flags were at half-mast, in memory of that great benefactor who made Colonial Williamsburg possible, the late John D. Rockefeller, Jr., to whom this and all future generations owe a great debt. The administration of Colonial Williamsburg is most ably directed by its president, Mr. Carlisle H. Humelsine.

Again, I congratulate the junior Senator from Virginia on his masterful address, which is worthy of the careful reading and study of each Member of the Congress. I am happy it is being placed in the RECORD, thereby being made available to all citizens of our Nation.

THE NEUTRON BOMB

Mr. DODD. Mr. President, last week I made a lengthy statement to the Senate on the fallacy of the test ban. Among other things, I warned that if the Kremlin were to beat us to a major technological breakthrough, we might shortly find ourselves confronted with a choice between surrender and annihilation. One of the possible breakthroughs which I mentioned was the development of a neutron bomb.

Commenting on my statement, Newsweek Periscope for this week said:

THE DODD BOMB A DUD

Senator THOMAS J. DODD's demands for information on the neutron bomb—a weapon that supposedly kills by radiation alone without blast or heat—will be ignored. Reason: There is no such device. Scientists explained that they know no way to produce a radiation weapon without heat and blast. (A reactor would do it, but bombers don't drop reactors on the enemy.)

I have the greatest respect for Newsweek. In general, I think its reporting reflects a careful regard for the truth. In this case, however, I feel that Newsweek could not have read my statement too carefully and that they were, in addition, the victims of calculated misinformation from pro-test-ban sources.

I ask unanimous consent that my statement in respect to the neutron bomb be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Then there is the matter of the neutron bomb, to which there has already been some reference in the press. Such a bomb can theoretically be produced by tailoring the energy of a fusion explosion so that, instead of heat and blast, its primary product is a burst of neutrons. Such a burst would do negligible physical damage, but it would immediately destroy all life in the target area. It would, in short, operate as a kind of death ray.

I have heard that, in the light of present theoretical knowledge, the neutron bomb is no more questionable than the hydrogen bomb was 6 months before it was demonstrated that one could be built. Although there have been a few fragmentary references to the neutron bomb in the press, I was told, when I tried to obtain more information, that the matter was classified. When I pressed my physicist friend further, he threw up his hands in despair and said: "You must forgive me, I have never heard of a neutron."

I consider all the hush-hush that surrounds the neutron bomb to be a glaring instance of the official abuse of secrecy. To keep the facts of life on the nuclear age from the American people is foolish, and potentially disastrous. If there is a possibility that a neutron bomb can be built, if there appears to be any chance that the Soviets may succeed in building one before we do, then the American people have a right to the facts.

The current issue of Foreign Affairs contains a remarkable article on the question of the test ban by Dr. Freeman J. Dyson. Dr. Dyson quotes a paragraph from a report by the prominent Soviet physicist, L. L. Artsimovitch entitled "Research on Controlled Thermonuclear Reactions in the U.S.S.R.," printed in December 1958. Let me read this paragraph very slowly:

"It may also be possible to realize a pulsed thermonuclear reaction under conditions in which the high temperature is produced by a charge of conventional explosive (such as TNT or something more powerful) which surrounds a capsule containing heavy hydrogen. Without dwelling on the experimental details, we may note that conditions have been found under which the generation of neutrons in hydrogen reactions has been established reliably and reproducibly. In experiments carried out in 1952, there is no doubt that we have observed neutrons which are formed as a result of the heating of matter to extremely high temperatures."

From this, it is apparent that the Russians were experimenting with fission-free hydrogen devices as far back as 1952 and that, as a corollary of this, they have for years had some understanding of the possibilities of the neutron bomb.

Once upon a time there was no hydrogen bomb. But there were a few scientists, a tiny but brave minority, who said it could be made and who urged that we embark on a crash program of development, lest the Kremlin beat us to it. At that time we had a President, Harry Truman, who gave the facts to the people. Had he not done so, had he not enjoyed the public support that only comes from understanding, the production of the H bomb might have been deferred beyond that fateful day in 1953 when the Soviets exploded their own first H bomb.

I believe President Eisenhower owes a similar duty to the American people in the case of the neutron bomb. The President should tell the people what the scientists told him. Not to do so would be a dereliction that can only lead to the most dangerous kind of speculation.

Mr. DODD. Mr. President, the Newsweek article said there is no such device as a neutron bomb. I never said that there was. I simply said that there were many scientists who were convinced it could be made. The Newsweek article implies I said that scientists know of a way to produce a radiation weapon without heat and blast. I said no such thing. I said that there was no theoretical reason why a neutron bomb could not be produced, and I implied that there were quite a few scientists who considered the project practicable. I said that if such a bomb were produced, a burst of neutrons would be the primary, but not the exclusive manner in which it released its energy.

For the record at this point, I want to say that I checked all of the facts in my statement carefully, not with one expert or even two experts, but in most cases with either three or four experts in the field. I am convinced that my facts were accurate.

For the record, too, I would like to point out that there have been references to the possibility of producing a neutron bomb in a number of scholarly publications. For example, the eminent nuclear physicist, Dr. F. J. Dyson, in the article in Foreign Affairs which I have quoted, said:

There seems to be no law of nature forbidding the construction of fission-free bombs. The question remains whether this theoretical possibility is likely soon to be realized.

There are some very able physicists who believe that the neutron bomb—which would be a fission-free bomb—is

in the cards for the next few years. There are other physicists who believe that it may be a very long time away.

There were many scientists who said the A-bomb could not be built. There were many more, including Dr. Hans Bethe, the President's chief adviser on the test ban, who said the H-bomb could not be built. I have seen it stated that our ICBM program was delayed for 2 years because Dr. Vannevar Bush held the project was impractical. In general, it would be fair to say that the pessimists have been proved wrong and the optimists have been proved right.

Personally, I see the greatest resemblance between the situation that obtains today on the question of the neutron bomb and the situation that obtained in the immediate postwar period, on the question of developing the hydrogen bomb. At that time, there were many scientists who were so horrified by Hiroshima that they were emotionally opposed to the development of even more terrible weapons of destruction. Sometimes they would say the H-bomb could not be made. At other times they would say that, even if it could be made, it should not be made.

There was no willful sabotage. On the other hand, the human mind being what it is, I am convinced that those scientists who were emotionally opposed to the creation of an H-bomb, were disposed, by virtue of this opposition, to be pessimistic and defeatist. Since they felt it should not be done, they argued that it could not be done. In fact, they actually believed it could not be done because, as I see it, their terror and their sense of guilt robbed them of their capacity for scientific as well as political judgment.

Where would we be today if it had not been for the handful of brave and persistent scientists who took the stand that, precisely because the H-bomb was so horrible, the free world could not permit the Kremlin to beat it to it?

Once again we are confronted with a situation in which a minority of scientists take the stand that radically new types of nuclear weapons probably will be built, and, if they are built, we must build them first. On the other hand, there are those who have grave misgivings about any qualitative or quantitative expansion in the field of nuclear weaponry, and who, not very surprisingly, question the feasibility of any major breakthrough. In the present critical situation, whose words shall we take? The word of those scientists who say "we should not" and "we cannot," or the word of those who say "we must" and "we can"? I think this question is most effectively answered by recent history.

ARMED FORCES DAY: DEDICATION OF U.S. POWER FOR PEACE

Mr. WILEY. Mr. President, on Saturday, May 21, the Nation—as proclaimed by President Eisenhower—will observe Armed Forces Day. In 1960 the overall theme for the observances is "Power for Peace."

Across the Nation, special activities will be undertaken to promote greater public understanding of the need of power for peace. The programs will include:

Paying tribute to men and women of our armed services for their contribution to our security;

Stressing the civilian-military teamwork that, historically, has preserved our freedom;

Displaying the land, sea, air and space weapons and equipment to illustrate the scope of our power for peace;

Creating greater understanding of the need for such defenses as a deterrent to aggression; and

Rededicating ourselves to the traditional U.S. policy of utilizing such Armed Forces—mighty and powerful—only for defense, halting aggression, or for promoting stability in areas threatened by outside forces.

Mr. President, last night for 2½ hours Mr. Khrushchev had the television stations of this country opened for his abuse, for his tirade. I could not help thinking, Will there be reciprocity in that respect for the President of the United States and the people who want to speak on the subject, to tell the people of the Kremlin the true story.

Khrushchev, we know, sort of "let the cat out of the bag." He said that when he was at Camp David he was going to ask the President about the trips such as the flight of the U–2, but he did not, for the President was so kindly then. Khrushchev has known for years that in order to protect our own country and to protect the West we have been seeking to get the facts of life in relation to the Kremlin and what it is doing. We have seen the threats. We have seen countries taken over; for instance, Poland, Czechoslovakia, Bulgaria, Rumania, the Baltic States, and part of Finland. The world knows that, but it has a tendency to fall asleep.

In a crisis-weary world, all of us yearn for the time—yet somewhere in the unforeseeable future—when we can beat our swords into plowshares and turn a vast volume of resources, manpower and brainpower to programs that will benefit—not threaten to destroy—mankind.

The turn of world events at the Paris meeting, however, provides us more evidence of the need for maintaining a strong defense, coordinated with our allies, as a matter of self-interest and security.

The tantrums of Premier Khrushchev—pounding the table, spewing insults, shouting threats and "flexing his missiles"—regrettably recalls images of tirades and tyrants of the past. The world, I believe, would rather forget such bad memories.

In the face of such emotional outbursts—created by "cooked up" rather than real factors—the thermometer readings of the global temperature—or perhaps, more accurately, "temper"—regrettably are "shooting up." As a world leader, however, we need—as President Eisenhower so nobly demonstrated in Paris—to be calm and cool, making reasoned evaluations (a) of the impact of Mr. Khrushchev's antics and (b) insofar as possible, an assessment of what it really means as a greater threat to world peace.

The Armed Forces Day observances, I believe, offer a real opportunity not to illustrate counter "rocket-rattling" but rather a rededication to peace; at the same time, the defense displays themselves, I believe, will be ample worry to any enemy that—if attacked—we are ready, willing and able to defend ourselves, and world peace.

Mr. President, I ask unanimous consent to have printed in the RECORD, following my remarks, several Armed Forces Day statements on its purposes and objectives.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

ARMED FORCES DAY STATEMENTS

Robert B. Anderson, Secretary of Treasury: "On this Armed Forces Day, all Americans join in paying tribute to the men and women of our armed services who are making such a vital contribution to the strength and security of our country. The preservation of our free way of life depends in large measure upon their faithful and efficient performance of duty. However, the responsibility for keeping America strong rests not only upon our Military Establishment, but also upon the dedicated efforts of all our citizens to maintain a vigorous and progressive economy. Let us all go forward, therefore, in the common effort to build an America capable of playing its full part in the maintenance of world peace."

Wilber M. Brucker, Secretary of the Army: "The U.S. Army proudly joins in the observance of Armed Forces Day. Designated for public celebration throughout the Nation, it is a fitting reminder of the civilian-military teamwork that has played—and will continue to play—such an essential part in the preservation of our way of life."

W. B. Franke, Secretary of the Navy: "The Armed Forces Day slogan, 'Power for Peace,' means not only the military might of the United States but the power of 178 million Americans—aware of their responsibilities—working daily within the framework of our Constitution to maintain freedom and bring about a lasting world peace. We of the Navy—which steadfastly upholds the cause of freedom and peace—invite our fellow Americans to visit with us on Armed Forces Day 1960."

Dudley C. Sharp, Secretary of the Air Force: "Armed Forces Day gives all Americans an opportunity to join in grateful tribute to the men and women of our military services. We acknowledge that their strength is our best hope of peace and our assurance of survival. On this day the Air Force salutes its sister services, the Army, the Navy, and the Marine Corps. Also, the Air Force opens its bases to the public and is glad to welcome its many friends so that they may become better acquainted with the Air Force and the part it plays in the defense of our country and our allies."

Gen. N. F. Twining, Chairman, Joint Chiefs of Staff: "To an important extent the effectiveness of the Armed Forces is dependent upon the intelligent support of the American people. The observance of Armed Forces Day is one of the traditional opportunities for the men and women in uniform to explain and demonstrate to our fellow Americans the adequacy of our equipment, training, and combat strength. An honest appraisal of our defenses should convince the public that we are using, and will continue to use, our available resources to the best advantage in our national interest."

Gen. L. L. Lemnitzer, Chief of Staff, U.S. Army: "Each year, Armed Forces Day offers the American people an opportunity to see at firsthand how their Military Establishment is accomplishing its missions in the defense of our Nation. The United States Army extends a cordial invitation to all Americans to visit its posts and activities on Armed Forces Day—1960."

Adm. Arleigh Burke, Chief of Naval Operations: "The Navy has made great strides forward in technology, but the ultimate weapon of defense is still the alert, dedicated individual, both in and out of the Armed Forces. On this Armed Forces Day we invite our fellow countrymen to visit our bases, inspect our facilities, and meet our Navy men and women in order that they may become better informed of the status of their Navy."

Gen. Thomas D. White, Chief of Staff, U.S. Air Force: "On this 11th Armed Forces Day, we in the U.S. Air Force rededicate ourselves to the preservation of freedom and continued peace.

"Our Air Force is a powerful deterrent to aggression. While our Nation will never commit aggression, we must stand ever ready to defend our freedom.

"We salute our sister services, proud of our position on the integrated defense team which serves to protect our cherished heritage."

Gen. David M. Shoup, Commandant of the Marine Corps: "Armed Forces Day, 1960, is an excellent opportunity for Americans to become better acquainted with their Armed Forces and with the vital role played by each of the services in maintaining our national security. The U.S. Marine Corps, our Nation's amphibious force in readiness, extends a hearty 'welcome aboard' to one and all."

Vice Adm. A. C. Richmond, Commandant, U.S. Coast Guard: "In these difficult times, it is imperative that our Nation maintain a strong and efficient Military Establishment. I urge, therefore, that all Americans take advantage of this Armed Forces Day to find out what is being done to protect our hard-won heritage of freedom."

SENATOR WILEY SAYS WASHINGTON WORKLOAD PREVENTS HIS ADDRESSING REPUBLICAN CONVENTION, BUT RESTATES OFFER TO CAMPAIGN AFTER PRIMARY

Mr. WILEY. Mr. President, the following is the text of a message I sent to Mr. Claude Jasper, chairman of the Republican Party of Wisconsin:

I find that it will be impossible for me to address Republican convention this year. Critical world situation, legislation of vital interest to Wisconsin, and important weekend conference demand my presence in Nation's Capital. I stand ready, however, to assist after the primary. The year 1960 offers the Republican Party of Wisconsin a new opportunity to serve the people both in the State legislature and the U.S. Congress. The programs endorsed by the convention will go a long way toward showing the voters that we are ready, willing and able to meet the economic and political problems facing State and Nation. Ours must be a party responsive to the challenges of today. With warmest regards to all my friends, I remain,

Sincerely,

THE SUMMIT TRAGEDY

Mr. GRUENING. Mr. President, the tragic events which affect the destiny of the free world, with consequences no one can foresee, are naturally absorbing the attention of all public-spirited Americans and even more particularly of those who, like ourselves, are charged with responsibility in Government.

Public opinion is still confused and uncertain as to what may be the consequences of these events. I think it useful therefore that the comments on the contemporary crisis of three well-known and distinguished columnists be brought to the attention of as wide an audience as possible, and I therefore ask unanimous consent to have these printed in the RECORD at the conclusion of my remarks. The first, by Mr. Walter Lippmann, was published in this morning's Washington Post and Times Herald, and is entitled "First of All." The second is by James Reston and published in this morning's New York Times, entitled "The Summit Tragedy." The third is an article written by Drew Pearson, published in this morning's Washington Post and Times Herald, entitled "Ike's Hopes Crashed With U–2."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 19, 1960]

FIRST OF ALL

(By Walter Lippmann)

Amid the wreckage, and as we recover from the shock, the long work of rebuilding will have to begin. Where must it begin?

It must begin at the point where the most critical damage has been done. Where is that point? It is not in what Mr. Khrushchev said or did to us. It is in what we did to ourselves. It is that we "first did help to wound ourselves."

The wound has been made by the series of blunders on the gravest matters in the highest quarters. These blunders have not only angered the Russians and wrecked the summit conference but, much worse than all that, they have cast doubt among our allies and among our own people on our competence to lead the Western alliance on the issues of peace and war. Mr. Khrushchev's harsh and intemperate language has produced a reaction and evoked sympathy for the plight of the President. But we must have no illusions about the depth and the extent of the loss of confidence in American leadership, in the judgment, sagacity, and political competence of the Government in Washington.

This is the damage to which we must address ourselves. We are a free people, and one of the blessings of a free society is that, unlike an unfree society, it provides a way to deal with error and correct mistakes. This is to investigate, to criticize, to debate, and then to demonstrate to the people and to the world that the lessons of the fiasco have been learned and will be applied.

In a situation like ours the damage to our prestige would be irreparable if we all rallied around the President and pretended to think that there was nothing seriously wrong. For that would prove to the world that the blunders will not be corrected but will be continued, and that our whole people are satisfied with bad government. It is the dissenters and the critics and the opposition who can restore the world's respect for American competence. We cannot do this by pretending that the incompetence does not exist.

These are hard words. But in what other words shall we describe the performance on Sunday night when the Secretary of Defense, who is in Paris as one of the President's advisers, ordered a worldwide alert of American combat forces? On Sunday night Mr. Macmillan and General De Gaulle were still struggling to find some way out of the affair of the spy plane. Yet this was the time chosen by the Secretary of Defense to "stage a worldwide readiness exercise" which, though not the last stage before actual war, is one of the preliminary stages to it.

Why Sunday of all days? This blunder was not the work of some forgotten colonel on a Turkish airfield. This was the work of the Secretary of Defense and of the President. The timing of the "exercise" was just a shade worse than sending off the U–2 on its perilous mission 2 weeks before the summit. The timing of the so-called exercise makes no sense whatever. For if the alert was concerned with a possible surprise attack, when in the name of common sense could there be less danger of a surprise attack on the Western World than when Mr. K. in person was in Paris?

Unhappily, too, Secretary Gates' "exercise" was just about as incompetently administered at the top as was the affair of the spy plane. This time, it appears, the top people forgot to say anything about the "exercise" to their press officers who did not know what to say, and were not even in their offices, when the public was being frightened by the "exercise."

A great government faced with a most formidable adversary, itself the leader, champion, and mainstay of the non-Communist world, cannot be conducted in such a reckless and haphazard way. That is the damage that first must be repaired before we can begin to deal with the general international wreckage, and to regain our confidence in ourselves.

[From the New York Times]

THE SUMMIT TRAGEDY—BREAKDOWN OF PARLEY SHAKES WORLD'S FAITH IN WISDOM OF TOP LEADERS

(By James Reston)

PARIS, May 18.—The tragedy of the Paris Conference, which ended tonight, is that it shook the confidence of the world in the wisdom and judgment of the two nations that hold the key to war and peace.

What troubled Paris tonight was not primarily what President Eisenhower and Premier Khrushchev would do now—which nobody knows—but the realization that the two most powerful nations in the world are also the least experienced of the great powers: both subject to the element of accident, to the ingrained habits of the past and to the whims of personal pride and caprice.

This was the conference that everyone lost. It did something no one thought possible; it outfailed the Paris Conference of 1919. After 41 years President Eisenhower, Premier Khrushchev, Prime Minister Macmillan, and President de Gaulle made Wilson, Clemenceau, Lloyd George, and Orlando look good.

It was this sense of uncertainty about the giants of the world that dominated the atmosphere in Paris today. Here was Mr. Khrushchev this afternoon in the great hall of the Palais de Chaillot shouting at the West, paying deference to the glowering Marshal Rodion Y. Malinovsky on his left and threatening to smash American planes like an impudent cat against a wall.

EISENHOWER SILENT AND ANGRY

Here, too, was the President of the United States, angry and silent, visiting cathedrals while his allies praised his dignity and sympathized with the failure of his last great chance for an East-West accommodation, but condemned in private his absent-minded behavior on the reconnaissance flights over the Soviet Union.

Everyone was trying to be very considerate and hopeful about the mess, but all had to admit it was a mess, brought on by the unplanned blunders of Washington and the savage planned reaction of Moscow.

The general reaction to the two men was quite different. One was restrained, the other was violent; one was silent and defensive today, the other loud and offensive.

One was trying to remove misunderstandings, the other was exploiting them. But the main point was that both were shaking the world, one by accident and the other by design.

The nub of the whole thing seemed to be that both President Eisenhower and Premier Khrushchev, for different reasons, had lost control over the direction of the immense power they are supposed to govern.

The fact that the President came here and announced that he grounded all flights over the Soviet Union for the rest of his term in office is clear enough proof that, if he had been aware of the fact of these flights at this sensitive moment, he would not have approved the flight of the U–2 that was downed in Soviet territory on May 1.

CONFIDENCE IN UNITED STATES SHAKEN

The President has conceded this here in his private talks with Mr. Macmillan and General De Gaulle. They do not condemn his objective or his personal motives; in fact, he is so obviously disappointed by the melancholy turn of events since the sky-spy case that the British and French leaders are more sympathetic to him now than ever before.

Nevertheless, the lack of control and discipline over the Central Intelligence Agency by General Eisenhower, and the failure of the State Department to retain civil authority over the administration's intelligence-gathering activities have inevitably shaken the confidence of the Allies in the judgment of the Nation that is their primary line of defense.

Mr. Khrushchev lost control too, apparently for different reasons. General Eisenhower led his party out of isolationism, but Mr. Khrushchev has been engaged in the even more delicate operation of fraternizing with the "capitalist enemy."

By doing so, he was going against the militant Communist philosophy that nothing matters except the class struggle. Many of his own powerful associates in the Communist Party's Central Committee apparently did not approve of the manner in which he was hobnobbing with the capitalists, and the Chinese Communists felt that this whole process of itinerant good fellowship was bound to create what they called ideological confusion within the Communist world.

So long as it appeared that Mr. Khrushchev might sweet talk the Russians into West Berlin, his jaunts were tolerated. But when this dream began to fail, and particularly when it was discovered that President Eisenhower was responsible for sending the U–2's over Soviet territory, the other leaders of the Soviet Union, it is felt here, demanded change—with or without Mr. Khrushchev's approval.

Western leaders who were present at the Monday meeting at the Elysée Palace with Mr. Khrushchev got the impression that the Premier was nervous and perhaps even a little unhappy in his about-face role. But by this afternoon, he was as hard as Vyacheslav M. Molotov and as vivid and vituperative as Andrei Y. Vishinsky.

The last time Mr. Khrushchev saw Paris he was the benign and jovial Mr. K. He made a special point then with President de Gaulle that their conversations should be held without anyone present except the interpreters.

JOVIALITY IS PUT ASIDE

This week all was changed. The jovial Mr. K became the arm-waving naughty Nik, and Marshal Malinovsky was there as a witness of his every word and move, even when Mr. Khrushchev said goodby to President de Gaulle.

None of this was missed by the press of the world or the diplomatic corps of Paris, and the inevitable reaction was not only that the giants were quarreling—which always terrifies the world—but that they were blundering in a most extraordinary way.

This was particularly true of Mr. Khrushchev after he got well into his new role. He overplayed every card he had. He was rude and primitive. He was not only a boor, but what is worse in Paris, he was a bore. And instead of splitting the Allies, he even drove the press of London and Paris to the President's support, which is not easy to do.

There are the things that have spread the feeling of uneasiness about the leadership of the great powers. The two men who started out to reduce tensions ended up by increasing them here in Paris, and the question now is how far the present "dukes-up" attitude will go.

About this, no one really knows, probably not even Mr. Khrushchev. For until he gets back to Moscow and reports to the Central Committee, there is no way of knowing what will happen to Berlin, or for that matter what will happen to Mr. Khrushchev.

[From the Washington Post, May 19, 1960]

IKE'S HOPES CRASHED WITH U–2

(By Drew Pearson)

It is apparent that a lot more than a former Air Force officer and some photos of Soviet airplanes came down with that U–2 plane May 1 flying 1,300 miles inside Russian borders. With it came down Ike's greatest ambition and, more important, mankind's hopes for better understanding and eventual world peace. Also gone aglimmering may be the Republican chances of electing a President in November.

Mr. Eisenhower's greatest ambition after 40 years as a military man was to go down in history as a builder of peace.

This became more and more apparent to those who talked to the President weekly at his legislative conferences in Washington and to Republican Party leaders. One of them confided shortly before the summit conference here that it was difficult to get the President to concentrate on domestic problems any more. When the subjects of water pollution, education, and taxes were raised in conferences Ike would listen impatiently and then change the subject to foreign aid or international problems.

When THRUSTON MORTON, Republican national chairman, tried to persuade Mr. Eisenhower to take Vice President NIXON to the summit, he urged that NIXON go from its start to the finish. Ike flatly refused, finally compromised that NIXON come as a standby, all of which caused the frank GOP chairman to exclaim to friends: "This guy doesn't seem to know that we've got to win an election. All he's interested in is peace!"

HOPES GO GLIMMERING

All this of course has now gone glimmering—both political hopes and personal peace hopes—gone with the flights of Pilot Francis Gary Powers over Russia.

Regardless of the considerable fumbling of the Eisenhower administration there are two great things Ike has had as a salesman for peace. One is his background as a military man which made it possible for him to sell better relations with Russia to the isolationists and the GOP doubters as could few other American leaders.

Second, Ike has had the smile, the personality, the gestures that won millions of people to his support. The Spaniards have a word for this contagious charm: sympatico. Ike had it and used it effectively to win friends for the United States all over the world. Recently he confided to GOP leaders that he planned two more trips abroad following the scheduled, now canceled, trip through Russia before his term ended. He loved this type of international salesmanship and wanted to devote to it the rest of his months as President.

However, big dreams are sometimes upset by small details. And bad administration shows also that no man can serve as President of the United States on a part-time basis.

LOOSE ADMINISTRATION

For 7 years extremely efficient Press Secretary Jim Hagerty plus a sympathetic American press have been glossing over the fact that President Eisenhower doesn't know what is going on in a large part of his administration and that it is impossible for any man to be an effective President yet spend several days every week away relaxing at golf and almost every evening relaxing over a bridge table.

Franklin Roosevelt spent almost every night until 1 a.m. in private study. Mr. Truman knew the intimate details of government as few others in his administration. On the eve of such an important conference as the summit here, with great hopes for permanent peace at stake, they would have required that all flights over the Soviet Union be cleared with the White House. But the looseness of the Eisenhower administration permitted the left hand to do what the right hand knew not.

The tragedy of this great anticlimax to President Eisenhower's fine work for peace is that we have been posing as moral leaders of the world and as custodian of honesty and righteousness. We have caught many Soviet spies, but catching spies doesn't absolve us from getting caught spying. And once we were caught, all the Madison Avenue techniques which had been so effective in selling Mr. Eisenhower in election campaigns seemed to evaporate.

We have let the Russians outpropagandize us at every turn. Even here in Paris the Russians got the first headlines Monday by issuing their ultimatum before Hagerty, supposedly trained in the best newspaper and Madison Avenue techniques, could get his statement to the American press.

THE DEPARTMENT OF MODERN AND CLASSICAL LANGUAGES, UNIVERSITY OF WYOMING

Mr. McGEE. Mr. President, I have in my hand a summation of the record of a very outstanding department of the University of Wyoming, the department of modern and classical languages. The dynamic head of this department of the university is Dr. A. J. Dickman.

This summation records the participation of the special students in the Fulbright exchange program during recent years. Considering the relatively limited numbers of students coming under Dr. Dickman's tutelage at the university, one is at once impressed by the high percentage who have met the severe requirements of the Fulbright program and who have represented both our University of Wyoming and the United States very effectively overseas.

Mr. President, I ask unanimous consent that the summation be printed in the RECORD at this point.

There being no objection, the summation was ordered to be printed in the RECORD, as follows:

WYOMING FOREIGN LANGUAGE BULLETIN

(Editor, Adolphe J. Dickman)

(Published by the Department of Modern and Classical Languages, University of Wyoming, Laramie, Wyo., spring 1960)

GOOD NEWS: FULBRIGHT AWARDS OF LANGUAGE STUDENTS FOR 1960–61

The department of modern and classical languages is happy to announce that three of our students have been granted Fulbright scholarships for the year 1960–61.

Miss Kay Kepler, from Laramie, Wyo., major in zoology and minor in French, will study at the University of Melbourne in Melbourne, Australia.

Miss Katherine Ann Wells, from Kansas City, Mo., major in art and minor in Spanish, will study at the Central University in Caracas, Venezuela.

Miss Patricia O'Melia, from Rawlins, Wyo., major in French and minor in Spanish, will study at the University of Besançon, France.

These students are proof that the University of Wyoming graduates continue to receive excellent preparation in their studies and are able to compete with the best in the country.

We are listing below those University of Wyoming graduates who have received previous Fulbright awards in foreign lands:

Byrl D. Carey, Jr., University of Glasgow, Scotland, 1950–51.

Michel Hoch, University of Paris, France, 1952–53.

Beverly Rogers, University of Nancy, France, 1952–53.

Elizabeth Beresford, University of Rennes, France, 1952–53.

Virginia Evans, University of Bordeaux, France, 1953–54.

Stanley Brooks, University of Rennes, France, 1954–55. Appointed lecturer, 1955–56.

Sally Jackson, University of Bordeaux, France, 1955–56.

Robert J. Hall, University of London, London, England, 1955–56.

Larry S. Slotta, Delft Technical University, Delft, Holland, 1956–57.

Thomas L. Hanks, University of Paris, France, 1956–57.

Robert Mahoney, University of Oslo, Norway, 1957–58.

Donald Ericksen, New South Wales University of Technology, Sidney, Australia, 1957–58.

Mary Lee Herman, University of Durham, England, 1958–59.

John B. Morgan, Delft Technical University, Delft, Holland, 1958–59.

Barbara Smith, University of Clermont-Ferrand, France, 1958–59. Appointed lecturer, University of Grenoble, France, 1959–60.

Don M. Ricks, Bristol University, Bristol, England, 1959–60.

Joan Anderson, University of Oslo, Norway, 1959–60.

Robert Sullins, Ecole des Beaux-Arts, Paris, France, 1959–60.

We should like also to mention that Darlene Huhtala, graduated in 1950, won a French Government award as assistante d'Anglais at the Collège de Jeunes Filles at Amiens, France, for 1951–52. Charles Sargent, Jr., graduated in 1958, received a Rotary scholarship for the year 1959–60 to study economics at the University of Lyons, France; his major was economics, his minor, French. Hjalma Person, graduated in 1958, won a Scandinavian seminar scholarship for 1959–60 to study in the Scandinavian countries; her major was art, her minor, French. James Couch, who graduated in 1947, won a Mexican Government award for 2 years of study at the National University of Mexico after obtaining in 1948 his master of arts degree in Spanish at the University of Wyoming.

HOW TO TUNE IN ON THE WORLD

Mr. JAVITS. Mr. President, the importance of an informed public opinion in all the countries of the free world is emphasized by the recent collapse of summit talks in Paris. In this process of getting the facts to the people of all the countries, including those behind the Iron Curtain, radio is an indispensable instrument. Shortwave radio particularly makes possible intercontinental communication. By this means there is an exchange between our people and those of the rest of the world on points of view, approaches to international problems and also their cultures and characters.

I ask unanimous consent to have printed in the RECORD an article which emphasizes the importance of listening to worldwide shortwave broadcasts, entitled "How To Tune in on the World," by Arthur Settel, which appeared in Pageant magazine for May, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW TO TUNE IN ON THE WORLD

(By Arthur Settel)

If you'd like intelligence reports direct from behind the Iron Curtain—

Or the inside information explaining those incomprehensible headlines from Laos and the Chinese-Indian border—

If you enjoy live entertainment from such exotic spots as Nyasaland, Quito or Cairo, a ringside seat at a real-life drama of rescue at sea, a listening post in the war of nerves as the great powers hammer away at one another—

All you need are:

1. A shortwave radio set.

2. The patience of Job.

3. The stamina to go without sleep indefinitely.

4. An ever-loving wife willing to go visiting alone, sleep alone, virtually live alone.

5. A soundproof den where you can fiddle with static-laden frequencies without bringing the house down on your head.

These are the requirements of the bona fide shortwave radio listener who seriously undertakes to become an eavesdropper. You will not need:

1. Knowledge of any language except your own—English.

2. A skyscraping antenna built at staggering cost on the roof of your home.

3. An intimate knowledge of electronics.

The rewards for the conscientious listener to shortwave are varied. Whether it's tom-tom music from Ng'oma, hot jazz from Moscow, or the chimes of London's Big Ben—it's all for free, available in unlimited volume. There are analyses of political problems from sources of every hue in the spectrum; commentaries on architecture, religion, rock 'n' roll; folksy chatter and bantering tidbits; anniversary celebrations, interviews and book reviews—from every corner of the globe. You can eavesdrop on fatuous chit-chat among radio hams, ship-to-shore telephone calls, exchanges between commercial airline pilots and their control towers.

Shortwave listening has been compared to photography: you get as much out of it as you put into it. You can buy a shortwave receiver for as little as $25 (RCA), or a shortwave transistor portable for as much as $275 (Zenith). Shortwave listening combines the features of travel without motion, rubber-necking without fear of detection.

But perhaps its greatest dividend is the power it gives you to ransack the world's most elaborate and expensive storehouse of ideas—elaborate because virtually every culture known to man is ceaselessly airing its views these days; expensive because sending shortwave—as opposed to receiving—costs a very pretty penny.

The United States, for instance—one of the smaller spenders—has appropriated $22.3 million this year to operate the Voice of America 84 hours a day in all languages. The Soviet Union and its satellites are on the airwaves 387 hours a day in all languages, at an estimated annual cost of $170 million. European, Latin American, African and Asian Governments have lower time and money budgets, but all consider shortwave broadcasts vitally important to their information, propaganda and communications programs.

So within the span of a single-evening's monitoring, your shortwave will bring you the following typical mishmash of programing: German language lessons; a Bible lesson from the Andes; a biography of Nikita Khrushchev from Moscow; a discussion of country houses from London; yodeling from Switzerland; a talk on astrology from Madrid, and a police call from your own neighborhood.

The most important listening usually comes after dark, when the air is suddenly shot through with verbal fireworks. The not-so-cold war warms up perceptibly as words and ideas rather than bullets and bombs fly crazily in the great artillery duel between East and West. With your dials twirling, you hear the most dramatic struggle in history for the minds of men.

Although there are no nerve-rasping commercials on international shortwave, there is hardly a broadcast without a hard or soft sell behind it—sometimes shyly peeping out from under a thin veil of kultur. At other times, the propaganda is so obvious that it will send your blood pressure soaring.

Radio Moscow's gems, for instance, are particularly maddening. Broadcasting on 15 to 24 frequencies simultaneously, Radio Moscow can perform breathtaking acrobatics in its policy postures. Take, for instance, the case of RICHARD NIXON.

Until his visit last year to the Soviet Union, where he officially opened the U.S. exhibition, the Vice President was among the top 10 on Moscow's hate parade, second only to J. Edgar Hoover in the number of times he was denounced for his views on Soviet expansionist aims and communism in general. But when it served the Kremlin's purpose, NIXON'S name was dropped from anti-American broadcasts, and his statements paying tribute to Russian industrial progress and the people's desire for peace were freely quoted. For the time being, NIXON was no longer included among the ruling circles bent on atomic war. The erstwhile "missile rattler" was now "well informed," "a believer in coexistence."

But once he had returned home, NIXON again—on Russian radio—resumed his role as provocateur, supporter of the policy of encirclement, and a member in good standing of the ruling circles driving America toward the brink. Moscow Radio was back in form.

While others heard about it secondhand, the shortwave listener was treated directly to Moscow Radio's best example of the hard sell when Premier Nikita Khrushchev toured the United States last September. American shortwave listeners were told of the Soviet Union's peaceful intentions, but every

broadcast included a clear threat that the Kremlin was ready to fight to have its way, and had the means to do so.

And what did the programs beamed to Russia say? (This is an advantage of shortwave listening—not even the Kremlin can prevent eavesdropping.)

"America is a rich, capitalist country," said a Captain Vasiliyev over Radio Volga early in September in a program intended for Russians. "But it is a paradise only for a small number of imperialist magnates. The billionaires use the money they make from sucking the blood of the workers for golden bathtubs, swimming pools filled with champagne, and carousing."

Such statements were somewhat different from those Premier Khrushchev was delivering in New York, Washington, Los Angeles, San Francisco, and Detroit.

What are the short-wave broadcasts—most of them government-sponsored—trying to sell us that we don't already have? The Russians, the Red Chinese, the Czechs, the Rumanians are all, of course, trying to sell us communism. But what about the naughty songs coming to us over the airwaves from Paris; the opera from Rome; the symphonies from West Germany; the folk songs from Mexico; the travel talks from Montreal? Chiefly, they are designed to acquaint listeners with the broadcasting country; perhaps entice us to go there one day and spend a vacation—and some dollars.

With all this mass persuasion going on, language is no clue to the identity of the country whose broadcast you're hearing. A Russian-language newscast is usually the Voice of America trying to catch some ears in the Soviet Union. Polish-language broadcasts come from London, Greek-language broadcasts from Warsaw, discussions in Turkish from Bucharest in Rumania.

Radio National de España in Madrid broadcasts in Chinese; Radio Luxembourg in Hungarian. Radiotelevision Italiana transmits in 24 European languages, plus Hindi, Urdu, Bengali, and Esperanto. The Vatican City Radio—perhaps most logically of all—programs in Latin. Radio Cairo broadcasts in Hebrew to Israel, although the Egyptian Government, which owns the station, doesn't officially recognize Israel's existence.

But you can't twirl the dial without bumping into a program that is perfectly understandable to you, because nearly every country in the shortwave business broadcasts part of the time in English.

So, if the corny comedy and the contrived drama of domestic television begins to pall, if you become weary of giant, economy-size, commercial commercials—get a shortwave radio set. You'll find uncontrived drama, unconscious comedy, and a wide, wide world ready to entertain you, confound you, or invite you to visit lovely Tanganyika and exotic Singapore.

A GARDEN

Mr. BYRD of West Virginia. Mr. President, why do people put a geranium, or a lily, in the window instead of a book, or a photograph, or an article of clothing? Why do people plant morning glories and lilac bushes and rose bushes in their meager yards? Why do men who have achieved a degree of independence and a competence buy a place in the country? What is there about the country which draws the majority of mankind like a magnet, even if all their days have been spent in the roar and dust and smoke of a great city?

The answer is found in the first book of the Bible:

And the Lord God planted a garden eastward in Eden; and there he put the man whom he had formed.

Man has never been able to throw off the influence of that early environment.

The Lord God planted a garden
In the first white days of the world,
And set there an angel warden
In a garment of light enfurled.

So near to the peace of Heaven,
The hawk might nest with the wren;
For there, in the cool of the even,
God walked with the first of men.

And I dream that these garden closes,
With their shade and their sun-flecked sod,
And their lilies and bowers of roses,
Were laid by the hand of God.

The kiss of the sun for pardon,
The song of the birds for mirth—
One is nearer God's heart in a garden
Than anywhere else on earth.

EXTENSION OF LIBRARY SERVICES ACT

Mr. STENNIS. Mr. President, I wish to commend the Senator from Alabama [Mr. HILL], chairman of the Labor and Public Welfare Committee, for the special attention and leadership he has given to the Library Services bill. He was one of the first in Congress to recognize the need for and introduced legislation giving status to library services. As chairman of our Department of Health, Education, and Welfare Appropriations Subcommittee he has supported funds necessary to operate and broaden this program.

It has been my pleasure to join the Senator from Alabama and others in sponsoring S. 2830, extending the Library Services Act of 1956 for 5 additional years. The original act will expire in 1961, and I am grateful that the Senate Labor and Public Welfare Committee has favorably reported a bill—S. 2830—to extend this important program.

Mr. President, this program has been of great benefit to many rural communities throughout the United States. Because of the pace of modern living, with changes and discoveries of far-reaching importance occurring almost daily, there is a growing need for making current information available to all segments of our population who want to form their opinions based on actual facts. The rural services libraries are meeting these objectives for an important part of our population, and at the local level they are received with ever increasing enthusiasm. While we are making great progress in bringing library services to more people, there are millions who do not now have access to local public libraries. Many of these people come from rural families who would welcome an opportunity to obtain greater knowledge and improve themselves through books and other information obtainable only through the library service program. A 5-year extension of this program would maintain existing programs and would assist in extending this service to new areas.

Mr. President, this program is an outstanding example of cooperation between the Federal Government, State governments, and local communities in filling a basic need by assisting rural communities in improving their educational opportunities. I would like to pay tribute to the librarians in the local areas who have helped to guide this program to assure its success. I would also pay tribute to the men and women who serve without compensation on the boards of public libraries. These outstanding leaders have given unselfishly of their time and efforts in making library services available to thousands of local communities who would otherwise be deprived of this service.

Mr. President, I am especially proud of the fine library program we have in Mississippi. It is growing. This is evidenced by the expansion of this program into many new areas of our State. Since January 1957, 14 Mississippi counties have added new library services, 13 counties have access to bookmobile service for the first time, 6 new multicounty library systems have been created, and 32 towns have public libraries for the first time. Also many of the existing library services have been expanded and modernized. Of significant importance is the statewide book pool which has been established to furnish a clearinghouse for unusual and duplicate book titles.

Our local leaders cooperating with State and Federal library services have done an exceptional job in developing this program.

I predict that with the passage of S. 2830 more people will avail themselves of this service. It will greatly strengthen our educational program and make possible a better way of life for millions of our people.

I hope that this bill will receive the full and unanimous support of the Senate.

The PRESIDING OFFICER. Is there further morning business?

CONFLICT OF INTEREST AND FEDERAL SERVICE

Mr. KEATING. Mr. President, Boswell B. Perkins, although a relatively young man, has compiled a distinguished record of public service as a former Assistant Secretary of Health, Education, and Welfare and as a former counsel to Governor Rockefeller of New York. He has been active in numerous legal activities and is presently a partner in a leading New York law firm.

As chairman of the special committee on the Federal conflict of interest laws of the Association of the Bar of the city of New York, Mr. Perkins supplied important leadership in the compilation of a comprehensive report entitled "Conflict of Interest and Federal Service." The legislative recommendations in this report have been embodied in a bill of which I am a cosponsor (S. 3080). The report is considered a milestone in efforts to deal with the complex issues in this field.

Recently, Mr. Perkins discussed the recommendations of his bar association committee in testimony before the Special Subcommittee on National Policy Machinery. This testimony outlines a program for legislative action in this area which merits the attention of all Members. I ask unanimous consent, therefore, that a copy of Mr. Perkins' testimony be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXTRACT FROM PREPARED STATEMENT OF ROSWELL B. PERKINS, CHAIRMAN, SPECIAL COMMITTEE ON THE FEDERAL CONFLICT OF INTEREST LAWS, OF THE ASSOCIATION OF THE BAR OF THE CITY OF NEW YORK, BEFORE THE SUBCOMMITTEE ON NATIONAL POLICY MACHINERY, MAY 13, 1960

The report of our special committee, which will be published by Harvard University Press in about a month, has two themes. The first is that ethical standards within the Federal Government must be beyond reproach, and that there must, accordingly, be effective regulation of conflicts of interest in Federal employment. The second is that the Federal Government must be in a position to obtain the personnel and information it needs to meet the demands of the 20th century.

These themes are coequal. Neither may be safely subordinated to the other. What is needed is balance in the pursuit of the two objectives. We need a longrun national policy which neither sacrifices governmental integrity for opportunism nor drowns practical staffing needs in moralism. We need a careful regulatory scheme that effectively restrains official conflicts of interest without generating pernicious side effects on recruitment.

The basic conclusion of our special committee is that such a scheme can be worked out. Our report and the Executive Conflict of Interest Act which we propose contain a recommended new program for achieving this result.

I shall state the 13 major recommendations of our special committee. As you will see, some of them point in the direction of broadening and closing loopholes in the present laws. Nevertheless, these recommendations for expansion and tightening will not, in our view, in any way adversely affect recruitment. Others of the recommendations point toward realistic adjustment of the laws in ways which will help facilitate recruitment, and I will return to these recommendations for a more detailed consideration after my listing of all 13.

The capsulized statement of these recommendations may seem underly general and vague to you. However, I ask you to keep in mind that each is backed up by precise statutory language in S. 3080, our proposed Executive Conflict of Interest Act, and a detailed technical commentary in our report on each provision.

Recommendation 1: Conflict-of-interest problems should be recognized and treated as an important, complex, and independent subject of attention and concern in the management of the governmental establishment.

Recommendation 2: The present scattered and uncoordinated statutes relating to conflicts of interest should be consolidated into a single unified act, with a common set of definitions and a consistent approach. Archaic provisions should be repealed.

Recommendation 3: The restraints contained in the present statutes should be greatly expanded in their scope by making them applicable to essentially all matters in which the public deals with the modern Federal Government.

Recommendation 4: Certain important restraints now covered in regulations or not at all should be included in the basic statutes, particularly restraints relating to receipt of gifts and coercive use of office.

Recommendation 5: The statutes should permit the retention by Government employees of certain security-oriented economic interests, such as continued participation in private pension plans.

Recommendation 6: Wherever it is safe, proper and essential from the viewpoint of recruitment, the statutes should differentiate in treatment between regular employees and citizens who serve the Government only intermittently, for short periods, as advisers and consultants.

Recommendation 7: Regular, continuing and effective enforcement of the law and regulations should be assured by emphasizing administrative remedies, rather than the clumsy criminal penalties of present law.

Recommendation 8: The statutes should create the framework for active and effective administration of the system of conflict-of-interest restraints, headed up with clear responsibility in the President. The President should designate, pursuant to the proposed act, an administrator to assist him in this function.

Recommendation 9: In addition to the statutes themselves, there should be a second tier of restraints, consisting of Presidential regulations amplifying the statutes, and a third tier, consisting of agency regulations tailored to the needs of particular agencies. The responsibility for day-to-day enforcement of the statutes and regulations should rest upon agency heads.

Recommendation 10: At all levels of administration potential conflict-of-interest problems should be headed off by preventive action, such as, for example, orientation programs for all new employees to acquaint them with the applicable conflict-of-interest rules, and periodic reminders as to such rules.

Recommendation 11: There should be more effective prohibitions and penalties applicable to persons outside Government who induce or participate in conduct by Government employees in violation of the conflict-of-interest laws.

Recommendation 12: Each committee of the Senate considering a presidential nominee for confirmation should be given the benefit of a full analysis, prepared by the administrator in consultation with the Department of Justice, of any conflict-of-interest problems the nominee's particular situation may present. The confirming committee should give due consideration to this analysis and to the protections afforded by a modern and effectively administered overall scheme of conflict-of-interest restraints, if one is put into effect.

Recommendation 13: The Congress should initiate a thorough study of the conflict-of-interest problems of Members of Congress and employees of the legislative branch of the Federal Government.

Let me now focus on three of the foregoing recommendations which would help to facilitate recruitment.

Recommendation 5 calls for clarification of present laws to permit the retention by Government employees of certain security-oriented economic interests, such as continued participation in private pension plans.

Hallmarks of modern American society are the pension plan, the group insurance plan, and other kinds of security-oriented arrangements. They are the basis of long-range economic planning by millions of individuals and families. Under present conflict-of-interest laws—passed when few, if any, of such plans existed—there is some doubt whether an employee of the Government may legally continue as a member of some plans maintained by his former employer, at least if contributions to the plan by the employer are regularly made which benefit the Government employee. This overhanging doubt presents a great deterrent or creates a severe hardship to the noncareer employee.

Our proposed act permits Government employees to continue their participation in certain private plans under some circumstances and with adequate safeguards. For example, it would permit a Government employee to remain a member of a pension, group insurance or other welfare plan maintained by his former private employer so long as the employer makes no contribution to the plan on behalf of the former employee who is in Government service. Similarly, a Government employee could continue to belong to certain of these plans even if the former employer does make contributions on his behalf, so long as the plans are qualified under the Internal Revenue Code and so long as the payments by the former employer continue for no longer than 5 years of Government service.

We think our recommendation No. 5 is extremely important. It is simple in concept, and, I am confident, acceptable even to the most ardent advocates of more stringent conflict-of-interest laws.

Our recommendation No. 6 calls for some differentiation in treatment between regular employees and citizens who serve the Government only intermittently, for short periods, as advisers and consultants.

To an ever-increasing extent the Government is dependent for information and advice—for learning not only how to do it, but what to do—upon part-time, temporary, and intermittent personnel. These serve individually, or as members of committees, but that service is in addition to their regular private work as scientists, technicians, scholars, lawyers, businessmen, and so on. Technically, they are, however brief their service, employees of the Government, and at present, all of the conflict-of-interest statutes apply to them. This fact has brought about both refusals to serve and conscious or unconscious ignoring of the statutes by those who do serve. It has also resulted in a welter of special statutory exemptions.

Our proposed act distinguishes, in a few key places where it is safe and proper, between rules for regular full-time Government employees and rules for what are defined as "intermittent employees." Under the proposed act, an "intermittent employee" is anyone who, as of any particular date, has not performed services for the Government on more than 52 out of the immediately preceding 365 days. The 52-day limit could be increased to 130 days by Presidential order in a narrow class of cases.

For these intermittent employees, we suggest certain special rules under the proposed act. For example, regular full-time employees would be forbidden to assist private parties for pay in transactions involving the Government; intermittent employees, who have to earn a living in addition to their occasional Government work, would be allowed to assist others for pay in such transactions, except in cases where the particular transaction is, or within 2 years has been, under the intermittent employee's official responsibility or where he participated in the transaction personally and substantially on behalf of the Government.

Similarly, since intermittent employees, by definition, are employed by organizations in addition to the Government, they would not, under our proposed bill, be subject to the rule forbidding their Government pay to be supplemented from private sources in return for personal services. Finally, the rules we propose as to receipt of gifts are somewhat different for the two classes of employees.

Our recommendation No. 13 deals with the problem of Senate confirmation. There is substantial evidence that the Government's efforts to recruit top-level executives have been impeded by the requirements of stock divestment imposed by the Armed Services Committee of the Senate.

This problem cannot be dealt with by statute. The confirmation power is a constitutional prerogative. However, this problem should be a subject of joint concern and increased cooperation between the executive branch and the Senate. There is some evidence that recently the executive departments have taken more pains to prepare their nominees for confirmation. Legal opinions have on occasion been furnished by the Justice Department; plans have been worked out in advance of hearing as to what need be sold and what could be kept, and representatives of the appointing department or agency confer in advance of hearing with appropriate authorities of the committee.

If the proposed act were passed, the Administrator would become the central repository for all information concerning conflict of interest and he would be expected to assist the executive branch in working out regular procedures for preparing nominees for confirmation. He could, in cooperation with the Department of Justice and general counsel to the agency in question, prepare a full analysis of the conflict-of-interest problems of the particular nominee. Over a period of time, these analyses might be given substantial weight by the confirming committees.

Furthermore, if a modern and effective system of statutory restraints is adopted by Congress and implemented by active executive branch administration, the confirming committees might be willing to place greater reliance on the statutory rules and procedures. One clear example is the procedure for disqualification recognized by the proposed act where a Government official holds a particular economic interest in a private entity.

For example, take the case of Robert Sprague, who came before you early in your deliberations. Mr. Sprague was nominated as Assistant Secretary of the Air Force in January 1953. The Senate Armed Services Committee opposed his confirmation because he refused to sell his shares in his family firm, the Sprague Electric Co. His nomination was thereupon withdrawn on February 11, 1953.

I feel confident that if there had been on the books a strengthened version of the present 18 U.S.C. section 434, which is aimed at self-dealing, and if there were presently in operation a well-established and effective system for self-disqualification of officials from any matters in which they might conceivably have a personal economic interest, the Sprague appointment could have been saved. In other words, the confirming committees will relax their efforts to impose a broad wall of disqualification prior to assumption of office only if they can be assured that a strong and workable program exists for disqualification after assumption of office in specific situations. In brief, the confirming committees can be greatly aided in performing their function realistically, in the light of recruitment needs, only if Congress as a whole lends support by modernizing the entire structure of conflict-of-interest restraints.

Mr. JAVITS. Mr. President, will my colleague yield?

Mr. KEATING. I yield.

Mr. JAVITS. I was at the hearing at which Mr. Perkins testified, and I am delighted that my colleague has called attention to his testimony. Mr. Perkins gave a splendid account of himself, which makes both my colleague and me very proud of his performance.

Mr. KEATING. I appreciate the remarks of my colleague.

SUMMIT FAILURE AND A WARNING FOR THE CONGRESS

Mr. DIRKSEN. Mr. President, the summit failure reaffirms the truth which we have long known and often ignored or forgotten, and that is that Soviet leaders of today, like those who have gone before, intend to continue their efforts to communize the world, liquidate freedom, destroy the capitalistic system, violate their obligations, step up their aggressive techniques, threaten their neighbors, continue their espionage and keep the world tense.

From the very day in 1933 when we recognized Red Russia until this good hour there has been little or no change in these Soviet objectives. The Senate document printed a few years ago showing the host of treaty violations by the Soviet Union speaks eloquently on this point. The convicted spies now serving long prison sentences are further evidence of this fact. The recent jamming of the Voice of America speaks plainly enough that truth is unwelcome. The threats to Norway and Pakistan show the bully at his worst.

For 27 years we have seen this pattern unfold. It is not new. It has not changed. Where there has been retreat from these objectives it came only because we were firm. Where Soviet words were softened they were only dictated by guile. When the hand of friendship was extended it was a sham and a mockery.

For the Congress these difficult bygone years have a lesson and a warning.

There are some who would sharply curtail the mutual security program—this collective economic, military, and technical effort in which we are mutually engaged with many other countries to strengthen both the resolve and the capacity of the free world to stand its ground and firmly meet the continuing Red challenge.

I could think of no greater mistake. To curtail this program would be to retreat. To ax it would bring dismay to those who need this help. To weaken would mean the destruction of one of the real assets which comes out of the ashes of the summit failure, and that is the conviction inspired in the peoples of many countries that the United States will not retreat. It will stand firm and honor its obligations and its responsibility to the cause of freedom and the free world.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate for consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT OF MOTOR VEHICLE SAFETY RESPONSIBILITY ACT OF THE DISTRICT OF COLUMBIA

The Senate resumed the consideration of the bill (S. 2131) to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia, approved May 25, 1954, as amended.

Mr. McGEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRUENING in the chair). Without objection, it is so ordered.

JOSEPH C. O'MAHONEY, A SENATOR FROM WYOMING

Mr. MANSFIELD. Mr. President, in accordance with the agreement entered into on yesterday, the Senate is meeting at this time to honor one of our most esteemed, one of our most gracious, one of our most likable, and one of our best, if not our best, Member. I refer, of course, to the senior Senator from Wyoming, the Honorable JOSEPH C. O'MAHONEY, who has graced the Senate for approximately 25 years, and who has made many contributions not only to the welfare of his State and to his country, but also to the free world as a whole.

JOE O'MAHONEY is one of those northeasterners who came West, settled down, and made his mark and established a great reputation.

He is known by many as Mr. Wool, because of the many activities he has pursued in behalf of the wool industry in his State of Wyoming. He is also known as Mr. Wyoming, because of his attitude toward all the factors which go to make up that great State. He is also known as Mr. Democrat. But to all of us he is known as a great Senator, a man whom we wish well in the years ahead and for whom we wish, along with Mrs. O'Mahoney, the best of everything in the future.

JOE O'MAHONEY is going into a well-deserved and well-merited retirement. We only hope that he will come back to see us occasionally, and that he will give us the benefit of his advice, his counsel, and his wisdom, and that he will keep in touch with us, so that we may continue to be better men and women because of our friendship with JOE O'MAHONEY, a Senator's Senator.

Mr. McGEE. Mr. President, we are assembled here today because of the decision of one of our Members to retire from this body. That we are not assembled here alone is testified to by the wide interest across the country in this particular moment in our history. I hold in my hand editorial comments selected at random from many papers in many sections of the country.

One reads: "May Happiness Hold Him Fast." Another: "A Champion of the West." Another: "His Record Will

Stand." Another: "When the People Were Involved." Another: "Hail and Farewell."

I ask unanimous consent that these be inserted in the RECORD in full following my remarks.

The PRESIDING OFFICER (Mr. GRUENING in the chair). Without objection, it is so ordered.

(See exhibit 1.)

Mr. McGEE. They point up the deep feeling of regret, and yet at the same time the pride and exaltation over this occasion which permits many of us to say something that is not only statewide, is not only personal, but involves all levels of American interests.

I make my statement today because I was in the State of Wyoming at the time the announcement by my senior colleague, Senator JOSEPH C. O'MAHONEY, was made a few days ago.

The days which have elapsed since I have returned from there have not helped me greatly to decide what ought to be said. I say that for a reason. When one speaks of a man whom he has known so affectionately, and with whom he has been involved so deeply and has grown to admire without exception on all occasions, it is difficult indeed for a mortal to select the right words to describe fully what is a deep, eternal emotion.

In the talk which has centered about Senator O'MAHONEY in Wyoming, one of the greatest tributes that is paid constantly to him is that he is known as "JOE." At the State convention, from which I have just returned, the name on everyone's lips was "JOE." No finer thing can be said from the heart about any man when he has reached this level of public life than that endearing phrase.

I said at the outset that this was an occasion filled with mixed feelings. While there were those of us who desperately and fervently hoped that somehow it might be possible for Senator O'MAHONEY to continue in this body, this was a matter which he, and he alone, had to decide. Those are considerations which none of us dare question. But they are considerations which all of us must, in full faith, understand and respect.

I wish to speak for just a moment about what I regard as the more exalting aspects of this occasion; the reasons why this is a moment for great pride. That pride stems, in part, from the knowledge that all the people of our State share with me the realization that we have a spokesman for us and for all the people in this body, which is sometimes described as the most exclusive club in the world. It stems from the great privilege accorded to me personally of having served on Senator O'MAHONEY's staff in 1955 and 1956. It stems from my student and teaching days in the field of American history and diplomacy, when the name of JOSEPH C. O'MAHONEY, as it is today, was on the lips of every student in America, when Senator O'MAHONEY wrote pages of our country's history by making that history himself. In short, it stems from knowing JOE O'MAHONEY and knowing what he believes in.

Some of the Members of this body are familiar with the story of Senator JOE's life before he entered the Halls of the Senate. It is a simple story, one that is inspiring to those of us who are working toward the building of a better world in which to live. It is marked with rugged individuality, initiative, and perseverance, and is well worth recounting at this time.

Senator O'MAHONEY was born in Chelsea, Mass., on November 5, 1884. His father, Denis O'Mahoney, was from County Cork, Ireland, and came to this country to make his home. He fought for the Union in the Civil War with the famed Irish Brigade.

Senator O'MAHONEY attended Cambridge Latin School, but left before graduation when his father died in 1903. He moved to New York to live with an elder brother, and, studying nights, while working in the daytime for a publishing house, he soon passed his college examinations. He then enrolled in Columbia University, earning his way by working at odd jobs, including freelancing several articles for the Associated Sunday Magazine.

One of those articles, entitled "One Hundred Years Hence," was dug up by an alert reporter 50 years later, and readers were astounded by Senator O'MAHONEY's predictions, made in 1906, of television, REA, nuclear science, and other modern marvels. One can see that even then my senior colleague had the imagination and foresight which marked him for leadership. He anticipated the future, and was not content merely to contemplate the past.

The ill health of a brother forced Senator O'MAHONEY to move to Boulder, Colo., where he took a job on the Boulder Herald and immediately immersed himself in the problems of the West, with which area he has now been concerned for half a century.

Early in 1916, Senator O'MAHONEY accepted a position as an editorial writer on the Cheyenne, Wyo., State Leader. The owner of the Leader was Gov. John B. Kendrick, a Wyoming stockman, who was campaigning for the U.S. Senate at the time. As the new editor, Senator O'MAHONEY plunged into the fray with great vigor.

So impressed was Kendrick with Senator O'MAHONEY's abilities that when he came to Washington he brought JOE O'MAHONEY along as his secretary, and one of the deepest and most lasting friendships that I think the annals of this body shall ever record was formed.

While serving in the position of secretary to Senator Kendrick, JOE O'MAHONEY attended Georgetown University, where he studied law, and received his law degree in 1920.

As Democratic national committeeman for Wyoming in 1932, he helped to draft the party platform. He regularly served on the platform committees of later conventions.

President Franklin D. Roosevelt named him as First Assistant Postmaster General under James A. Farley in March 1933.

Senator Kendrick passed away that November, and Wyoming's Governor, Leslie Miller, appointed JOE O'MAHONEY to Senator Kendrick's seat. Senator O'MAHONEY held that seat until his commission from the people was temporarily withdrawn in 1952. His tenure in Congress, which dated back to his secretarial days with Senator Kendrick beginning in 1917, was resumed 2 years later.

As a newcomer to the Senate in 1934, Senator JOE inherited his predecessor's committee appointments, including one on the Appropriations Committee. Eventually he rose to be chairman of the Committee on Public Lands, as well as chairman on the Appropriations Subcommittee on Defense Appropriations. In the latter position, he was an active advocate of programs to decentralize production and to expand air power.

He twice put through the Senate, by an unanimous rollcall vote, defense funds designed to make the air power of this country the most effective in the world. For his efforts in this field, he and the present distinguished majority leader were awarded the Gen. H. H. Arnold Trophy by the Air Force Association as aviation's Man of the Year in 1952.

Mr. President, in looking over the accomplishments of the senior Senator from Wyoming while he served this body, I scarcely know where to begin in recounting them. His activities and energies have been so diverse, so intense, and so successful that they defy grouping or generalizing. However, with the thought in mind that no one could possibly list all the significant contributions to humanity made by Senator O'MAHONEY, I would suggest that some definite guidelines appear in retrospect. In looking back at legislative history during the past quarter century four areas have the Joe O'Mahoney label—development of the West, his great dedication and devotion to the Constitution, and his labors for economic freedom.

As a member of the Public Lands Committee, Senator O'MAHONEY effected many impressive accomplishments in advancing the development of Wyoming and the West. When the Committee on Interior and Insular Affairs was created in 1949, he became its chairman. He was later urged to seek the position of Secretary of Interior when Harold Ickes retired, but he declined in preference to serving his State. He went back to the Interior Committee in 1954 when he was reelected.

Senator O'MAHONEY's constant battle for the development of the West's natural resources, however, began even before he was elected Senator. As assistant Postmaster General he appeared with Senator Kendrick before a Cabinet meeting to urge construction of the Casper Alcova project, later renamed the Kendrick project on Senator O'MAHONEY's initiative. As a Senator, he sponsored numerous bills affecting western reclamation and has been vigorous in securing appropriations for various projects. In 1944 he presented to Congress the overall bill for development of the Missouri River Basin, a program

which has transformed many acres of formerly arid land of the West into productive acres.

During the same year, Senator O'MAHONEY and Senator Millikin, of Colorado, introduced an amendment to the Flood Control Act which has protected the priority of western waters for irrigation purposes against diversions by downstream users. He was also instrumental in sponsoring and securing passage of the Upper Colorado River Basin storage project in 1956.

In 1937 Senator JOE worked tirelessly for legislation sponsored by another of my boyhood idols—Senator George Norris of Nebraska—to create the REA.

In the minerals field, the O'Mahoney-Hatch Act of 1946 has been a prime stimulus for the great increase in oil drilling discoveries and production in the Rocky Mountain area since World War II. Due to his identification with oil problems, he served as chairman of the special Senate Committee To Investigate Petroleum Policy in 1947. Those committee hearings have become textbooks for the oil industry. In 1943 he introduced and ushered through Congress the synthetic liquid fuels law which authorized the Bureau of Mines program for production of synthetic fuels from coal, oil shale, and other substances. At this very moment his mineral leasing bill is pending Senate action.

I doubt if there is a man in this Chamber who would not agree that Senator O'MAHONEY has done more to preserve the intent of the U.S. Constitution than any other person during recent history. Long a recognized authority, he has frequently been called upon in the Senate to settle questions bearing on the constitutionality of proposed legislation. He has never let us forget for a moment the principles of the separation of powers.

He has labored tirelessly to maintain the balance between the executive and legislative branches of our Federal Government.

His opposition to President Roosevelt's attempt to pack the Supreme Court, his fight against the drafting of labor during World War II, and his exposition of the constitutional principles at stake in the Strauss case all bespeak the depth of his conviction and the splendid vigor of his courage in defense of the Constitution.

Mr. President, it is difficult to single out any one contribution Senator O'MAHONEY has made to this Nation as the outstanding one, but certainly high on that list would be his ever vigilant fight for economic freedom. A man who has stood first and foremost for fair play and fair competition he has led the attack on stifling monopolies and concentrations of economic power.

The hearings and reports of the Temporary National Economic Committee, created on the initiative of and chaired by him, have become "bibles" and are on the shelves of every university library in the country.

In the book entitled "Congress Makes a Law" by Stephen Kemp Bailey, published by the Columbia University Press in New York in 1950, on page 119 is to be found the following account of the effective speech by Senator O'MAHONEY in support of the Full Employment Bill of 1945:

> Then, after a full day of debate on the first Radcliffe amendment, the high point of the sponsor's strategy was reached in the dramatic speech of Senator O'MAHONEY. It is rarely that a speech on the floor of the Senate actually changes stubborn Senate minds. O'MAHONEY's presentation was an exception. It is generally conceded by friend and foe alike that the Wyoming Senator's dramatic, illustrated lecture on the economics of S. 380 had a marked effect on the final vote. With the use of charts and graphs placed in the well of the Senate floor and against the back wall of the chamber, O'MAHONEY breathed economic respectability into the pending legislation. With the attitude of a patient professor he explained technical economic concepts to his colleagues, emphasizing that he was opposed to deficit spending and that was why he was supporting the bill. He pulled out all the stops in the semantic organ: "I am arguing for the investment of private capital under a free enterprise system, and the elimination of deficit spending"; or again, "The chart (on the back wall) was not prepared by any 'leftists.' It did not come from any organization interested in Federal spending. It came from the Cleveland Trust Company of Cleveland, Ohio"; or finally, "There is nothing in this bill which is in any way antagonistic to big business or to wealth."
>
> He flattered the collective ego of Congress: "Mr. President, this is a bill to vest in Congress the power and the responsibility of meeting the issue, instead of continually delegating the power to the executive branch of the Government. This, Mr. President, is a bill to restore the functions of Congress."
>
> At the close of O'MAHONEY's presentation, Senator Taft addressed the chair with the words, "Mr. President, I think that I can agree with about 90 percent of everything which the Senator from Wyoming has said." Aging Senator Bailey walked out of the Chamber shaking his head and saying, "If I'm ever tried for treason, I hope JOE O'MAHONEY can defend me."

He exerted tremendous leadership in the eventual enactment of the Full Employment Act which provided for the stabilization of business and employment. This led to the establishment of the President's Council of Economic Advisors and the Congressional Joint Economic Committee of which Senator O'MAHONEY served as chairman during the 79th, 81st, and 82d Congresses.

In 1955–56, it was my privilege to serve on the Senator's staff.

I should like to share several personal memories I have of Senator O'MAHONEY, who has meant so much to me, and has unselfishly done so much for me.

It was during this time that I experienced a learning process and a personal inspiration for integrity in public service that no textbook ever written for use in academic halls could ever supply. Many times I have had occasion to state that during the wonderful year I served with him, Senator O'MAHONEY himself was the finest professor under whom it was ever my privilege and opportunity to study.

I recall that during the course of hearings which he so tirelessly conducted, often alone, when he was assaulted again and again and was interrogated by batteries of experts in their respective fields—and, it mattered not, what those fields were, Senator O'MAHONEY proved himself to be the master of all. During the study of the concentration of power in the Electric Bond & Share Corp., after a host of the finest lawyers from Wall Street had done their best with their case, in opposition to this one man, the chief spokesman for the legal counsel of the electric utilities said to me, following one of those long and tortuous sessions:

> McGEE, let me say just one thing: I would rather face all the lawyers in New York at the same time than face that boss of yours alone.

That was a great tribute to the mental clarity, the wisdom, and the conviction commanded by Senator O'MAHONEY when under tremendous pressure.

I remember that during the General Motors Corp. hearings, a monumental inquiry into the accumulation of economic power in this country—which Senator O'MAHONEY pioneered—after days and days of hearings, one of the spokesmen for the giant corporations would say, "But, Senator, the statement you have just now attributed to me is not what I said yesterday."

Then Senator O'MAHONEY would say, "Let the clerk read the record."

And when the clerk read the record, it immediately became apparent that Senator O'MAHONEY's recollection was faultless.

Senator O'MAHONEY has consistently demonstrated an almost unbelievable faculty for accurately recalling the proper interrelationship of facts—with the result that always he was able to ascertain the truth, the point of quest in all the hearings.

Finally, Mr. President, I wish to refer to a bit of personal philosophy of Senator O'MAHONEY's that has served as a guideline to me. As I left my service on his staff, he said to me, "If you decide to go into politics, I hope you will remember one simple rule that I have always found most helpful: It is wise not to try to 'keep books.' Do not 'keep books'; do not remember old scores; do not try to hold old grudges, because they will detract from your central purpose and will woo you away from the main path."

I have had many occasions to reflect upon that perceptive counsel—and always with the conclusion that it is the wisest of all.

I think it might be said of my beloved colleague that: "He ever bore, without abuse, that grand old name of 'gentleman.'"

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. McGEE. I yield.

Mr. CARROLL. Does the Senator from Wyoming desire to complete his statement without interruption?

Mr. McGEE. If it is permissible, I should like to complete my statement as a base for a tribute, if that will be agreeable to the distinguished Senator from Colorado.

Mr. CARROLL. I may say to the Senator from Wyoming that the able former Senator from Colorado and former Governor of Colorado, the Hon-

orable Edwin C. Johnson, has come to the floor of the Senate. When I told him that we today would pay, in our limited fashion, our humble measure of tribute to one of the greatest Senators of the West, the distinguished Senator JOSEPH C. O'MAHONEY, of Wyoming, Ed Johnson said he wanted to be on the floor. I do not know how long he can remain with us.

I shall be happy to wait until the completion of the statement of the Senator from Wyoming. I do not want to interfere with his presentation.

Mr. McGEE. The Senator from Colorado asked me whether I wished to continue. I said, "Yes." The Senator from Colorado did not tell me the reason for his request. I should certainly say it is important that we acknowledge the presence of the distinguished former Senator and former Governor of Colorado at this time, and I am delighted to yield to the Senator from Colorado for that purpose.

Mr. CARROLL. I thank the distinguished Senator from Wyoming. Our cherished friend, the former Senator from Colorado, is well known to every Member of the Senate. He served here with great distinction for three terms and has been the Governor of Colorado for three terms. No living citizen of Colorado holds the respect, admiration, and veneration of Colorado's people to the same degree as this remarkable man who sits beside me.

Ed Johnson of Colorado appeared this morning before the Subcommittee on Antitrust and Monopoly, of which the distinguished senior Senator from Wyoming [Mr. O'MAHONEY] has been one of the great leaders.

The junior Senator from Colorado could not express a deeper regret at losing a friend than he does upon the departure of the able senior Senator from Wyoming.

The junior Senator from Colorado has a vital stake not only in Colorado; he has a vital stake in the senior Senator from Wyoming.

It is my humble judgment that if it had not been for the senior Senator from Wyoming and the distinguished former Senator and former Governor of Colorado taking an active part in the senatorial campaign in Colorado in 1956, the junior Senator from Colorado would not be here today. It is too bad the majority leader is not present to hear this. If the junior Senator from Colorado had not been elected to the Senate in 1956, the Democratic Party would not have had a majority the following year. The Democrats needed one vote to have a majority in the Senate. They seem to have forgotten that. One vote gave us a majority in the Senate in 1957. It was a close race. The Democrats did not think they could win in Colorado. But when the able senior Senator from Wyoming [Mr. O'MAHONEY] came into Colorado and spoke, as he has always spoken in his legislative career, about the concentration of economic power in this country in the hands of giant corporations, the voice of Senator O'MAHONEY was heard, and was heard not only in Colorado, but also throughout the Nation.

He spoke about the cost-price squeeze on the farmers and ranchers of our two States. He spoke about the power of monopoly, and how it can control the economic lives of working people, white-collar people, and small business people. He warned that the tremendous concentration of economic influence in the hands of a few persons demands the constant vigilance of watchdogs who will act in the people's behalf. He was at his fiery, fighting best that night, and I feel certain his words influenced many Colorado citizens to vote for the Democratic candidate.

When the senior Senator from Wyoming [Mr. O'MAHONEY] came into Colorado, we held a great meeting at the West Denver High School, and the meeting was televised throughout the State. The junior Senator from Colorado, then a candidate, introduced Ed Johnson, who, in turn, introduced Senator O'MAHONEY. And between the hammer and the anvil, I was able to be elected to the U.S. Senate. I say this by way of emphasizing my appreciation of some of the many things we owe to the great senior Senator from Wyoming.

The Carroll family has always felt most warmly and strongly toward the O'Mahoney family. Mrs. O'Mahoney, the former Agnes V. O'Leary, of Winchester, Mass., has been a great source of strength and comfort to Senator O'MAHONEY ever since their wedding in 1913.

Senator O'MAHONEY's contributions to the political and the economic history of the Nation have been truly outstanding.

As other Senators have said, during the 1930's Senator O'MAHONEY headed the T.N.E.C. study, which took inventory of our economy, and formed a sound basis for legislation passed thereafter.

I wish to say of the able senior Senator from Wyoming [Mr. O'MAHONEY] that as a speaker and as a constitutional lawyer, he has had few peers in this body; certainly this fact is widely recognized. Coupled with his brilliant mind and forceful delivery, he has a rugged, western independence. All Senators have the highest respect for him. We pay the utmost attention to the amendments he proposes and to the arguments he makes.

The announced retirement of my friend and teacher, Senator JOE O'MAHONEY, has evoked expressions of deep regret from all over the Nation, and most especially from the Rocky Mountain West.

In our part of the West, no two States share a closer community of interest than Colorado and Wyoming. And with all due respect to other Members of this body, I doubt that any Senator will miss JOE O'MAHONEY's presence, leadership, and splendid guidance more than the junior Senator from Colorado.

Of all his accomplishments as a legislator, he may be remembered most in the Rocky Mountain West for his excellent service as chairman of the Committee on Interior and Insular Affairs, followed by his unique achievements on the Committee on the Judiciary—and particularly as chairman of the Subcommittee on Antitrust and Monopoly, on which I have been privileged to serve.

JOE O'MAHONEY deeply loves the West, and has battled in the great tradition of western progressives. He has a capacity for fierce indignation and dedicated effort against those who would extract great riches from our Nation's soils and waters without making a contribution for the benefit of future generations.

His knowledge of corporate structure and financing, and of the nature of monopoly, is broad and deep. There are corporate empires in this Nation far richer and more powerful than many of our State governments; some of them, indeed, have in past years held the people of various States in economic subjugation. The tendency today is toward ever greater concentration of economic power. JOE O'MAHONEY has stood fearlessly against many of these giants in his time. He has not only defied them successfully—he has turned the searching spotlight of public information upon them so that the people might know of what is involved. Serving with him has been one of the great experiences of my own legislative career.

At this point, I wish to insert a tribute to Senator O'MAHONEY which appeared in the Rocky Mountain News of Denver, a Scripps-Howard newspaper, on May 11, 1960:

There being no objection, the tribute was ordered to be printed in the RECORD, as follows:

A BIG CHANGE FOR WYOMING
(By Pasquale Marranzino)

U.S. Senator JOSEPH O'MAHONEY sent word to his Wyoming constituency that he is hanging up his gloves and will not seek reelection.

The news isn't surprising, but it comes as a disappointing change to Wyoming Democrats who have been voting for the craggy-faced, bushy-browed Senator since 1933.

Only once in that interim, 1952–54, did the colorful lawyer fail in his bid to go to Washington as Senator, swamped in the overwhelming GOP victory that brought Frank Barrett into office.

His impressive career was halted last June in the midst of a typical O'Mahoney battle. He led the forces that successfully opposed the nomination of Lewis L. Strauss as Commerce Secretary. Weary from days of testifying and speaking against the nomination, O'MAHONEY collapsed as he left the Senate floor, a victim of a stroke.

Even though the stroke kept him bedridden for months, it couldn't lick JOE. He made an amazing recovery and continued his work from his hospital bed by telephone and in consultation with his staff and colleagues.

JOE's most brilliant—and possibly one of the most vital coups for the commonweal—came in those days of the Roosevelt administration when the Wyoming Senator led the fight to keep intact the size of the U.S. Supreme Court. F.D.R., who had hoped to enlarge the Court and pack it with birds of his feather, broke his party pick on JOE's stubborn opposition.

This break with F.D.R. was made after considerable wrestling with the O'Mahoney conscience. He had been one of the first New Dealers. He helped write the Democratic platform that carried Mr. Roosevelt into power. And he was rewarded with the first Assistant Postmaster General job in that first administration.

The 75-year-old Senator has Colorado roots. He was born in Massachusetts and came West in 1908 to Boulder. There he

worked on a Boulder newspaper as city editor and also was a correspondent for the Rocky Mountain News and the Associated Press. He left Boulder in 1916 to go to work for a Cheyenne paper owned by the late Gov. John B. Kendrick.

His newspapering was interrupted when Kendrick ran for the Senate, JOE serving as campaign manager and secretary. He went to Washington, with the successful Kendrick, as secretary. When Kendrick died in 1934, O'MAHONEY was named to the job.

Although JOE's close New Deal associations made him a national power, he never placed the good of the West in second spot.

He battled for reclamation, for rural electrification, for domestic wool, for the farmer and rancher, and for more water to irrigate more acres and help his arid State.

In recent years he has been a thorn in the side of the Eisenhower administration. Although a New Dealer, he didn't have the New Deal propensity for big spending. He was tight-fisted with the dollar and kept hammering away at inflation, high prices, and Government participation in private industry through foreign deals.

He probed the national oil import program and suggested that the administration quit having the big oil companies formulate foreign policy. He was an ardent supporter of the antitrust laws, asking for crackdowns on meatpackers, insurance companies, and monopolies.

He has served long and well and with devotion to the West. Retirement for JOE will be rough, but we expect he still will remain the No. 1 Democrat in Wyoming.

Mr. DIRKSEN. Mr. President, will the junior Senator from Wyoming yield?

Mr. McGEE. I am glad to yield to the distinguished minority leader.

Mr. DIRKSEN. Mr. President, I see my old friend, JOE O'MAHONEY, sitting here today; and I am delighted to see him.

He has been referred to as a statesman; and he is that.

He has been referred to as a great lawyer; and he is that.

He has been referred to as "Mr. Democrat"; and he may be that.

He has been referred to as "Mr. Wool," and I fancy that he is.

But I think of JOE O'MAHONEY as a man, and I think of him with affection and respect, because we have sat together and have battled together for so long in probably the most controversial committee of the U.S. Senate, the Judiciary Committee. Out of my esteem for Senator O'MAHONEY, I can testify that conversely to our differences, my regard and my affection for him have grown with the years.

We have differed very frequently on many things, and we have fought most stoutly on this floor on many things. But always his word has been his bond, and what he had to say here was always dictated by conviction, plus what he thought was in the interest of the people of the United States of America.

In brief, Mr. President, as we look back upon the record of Senator O'MAHONEY, we see most clearly that one outstanding feature of his career is that he has given so much more than he has received, and that his contributions to the well-being of this country are priceless and immeasurable.

Mr. President, I count myself fortunate that I can call Senator O'MAHONEY my friend. I count myself fortunate that I have been enriched by my association with him.

As a man, Senator O'MAHONEY symbolizes what I have always thought of as the real enfoldment of history. A man is not a means to an end; he is an end in himself. So I think of Senator O'MAHONEY as a man unfolding over a long period of time, as an end in himself. And during that long period of time he has, indeed, had great influence upon many people, and has enriched the country.

So, Mr. President, I rise today to say of Senator O'MAHONEY, blessed is he; and blessed, also, is his consort, who has stood so nobly beside him for so long a period of time.

I salute Senator O'MAHONEY as a friend. I wish we could keep him here. But I know the verities that have dictated his retirement.

To him I say, good luck, and God's blessing.

Mr. BYRD of Virginia. Mr. President, will the junior Senator from Wyoming yield.

Mr. McGEE. I am happy to yield.

Mr. BYRD of Virginia. Mr. President, it has been a great privilege to me to serve in the Senate with Senator O'MAHONEY. We have been together in the Senate for nearly 26 years. I have great admiration and respect for him, and I consider that his record of service is one of the most outstanding in this generation.

One of the recollections I will carry with me as long as I live is of the debate between Senator Joseph Robinson, of Arkansas, the then majority leader of the Senate, and Senator O'MAHONEY, when President Roosevelt recommended passage of the bill which provided for the "packing" of the Supreme Court. On that day, Senator O'MAHONEY delivered extemporaneously one of the greatest orations in opposition to that bill that it has been my privilege to hear. The debate between the two was very forceful, and at times was bitter. It has always been my conviction that the speech delivered on that day by Senator O'MAHONEY was one of the impelling reasons for the withdrawal by President Roosevelt of the Court-packing bill.

Senator O'MAHONEY is a great constitutional lawyer; and throughout the years he has been alert, active, and very effective in his efforts to preserve the Constitution and our fundamental principles of government.

I simply wish to say to Senator O'MAHONEY today that I shall always treasure our very close association; and I wish to express my deep regret at his retirement, which will be a great loss to the Nation; and I desire to extend to him my cordial regards and best wishes for the future.

I pay my respects to Senator O'MAHONEY as a very great Senator and a very great American.

Mr. TALMADGE. Mr. President, will the junior Senator from Wyoming yield to me?

Mr. McGEE. I am glad to yield to the Senator from Georgia.

Mr. TALMADGE. I thank the Senator from Wyoming.

Mr. President, I was still a student at the University of Georgia when the name of the distinguished senior Senator from Wyoming [Mr. O'MAHONEY] first became known to me. That was during the controversy to which the distinguished senior Senator from Virginia [Mr. BYRD] has just now made reference—the fight over the so-called Court-packing bill.

The able senior Senator from Wyoming took a leading role in opposing that proposal; and, from reading the press reports about it, I became very much impressed with the ability, knowledge, courage, and eloquence of the senior Senator from Wyoming. At that time I had no idea that I would ever have the privilege of sitting with him in this body and knowing him intimately.

Mr. President, one of the things which makes service in the U.S. Senate so pleasant and rewarding is the fact that the nature of our work in this body serves to bring all of us together in a close, intimate, and highly personal relationship. During the short period of time I have had the honor to serve in the Senate, I have come to know well the distinguished senior Senator from Wyoming, and knowing him, my respect for his eloquence, his judgment, and his character has increased. I know that he will fight the battles of the people of this great country against all odds and obstacles. I have seen him do it with courage, with credit to his State and Nation, with distinction to himself, and—yes—with a great degree of success.

The Senate of the United States will not be the same without JOE O'MAHONEY. His years of service in this body has enhanced its distinction and prestige. He is without doubt one of the greatest constitutional lawyers who ever sat in the U.S. Senate.

When I think of JOE O'MAHONEY, I think of him as a truly great liberal; a liberal of the stature of Borah and Walsh; a liberal who, while proudly bearing the liberal banner, has not used his liberalism as an excuse for introducing coercive proposals which would restrict the liberties of the people rather than protect them.

I am happy to pay tribute to this great man today. We will miss him, but we hope we will have the benefit of his wise counsel and respected judgment for many years to come.

I thank the Senator from Wyoming for yielding to me.

Mr. McGEE I yield to the Senator from South Dakota [Mr. CASE].

Mr. CASE of South Dakota. Mr. President, in the Black Hills of western South Dakota, where my home is, the name of JOE O'MAHONEY, of Wyoming, is widely respected. We are neighbors and during the years I have been in Congress we have come to regard JOE O'MAHONEY as almost as stanch a defender of the interests of western South Dakota as any Senator from South Dakota could be.

I feel a personal sense of gratitude for the great help Senator O'MAHONEY has given me on legislation, both when I was in the House of Representatives and here in the Senate. A number of

years ago it was my privilege to work with him in securing the enactment and the extension of legislation dealing with the development of synthetic liquid fuels. In Wyoming, South Dakota, and Montana we have many coal deposits that have possibilities in that field; and JOE O'MAHONEY took the lead in securing the enactment of the Synthetic Liquid Fuels Act.

Again, when we were legislating for the development of our uraniferous lignite deposits, it was because of JOE O'MAHONEY's understanding that we were able to get timely legislation from the Interior Committee that was needed to permit development and protection of claims in the coal reserve.

Again, when working on water conservation projects—and I have in mind particularly the Pactola Reservoir in South Dakota—I went to Senator O'MAHONEY, of Wyoming, and Senator Ken Wherry, of Nebraska, who also understood the problems in that field, and was successful in having the initial funds provided which made possible the starting of that project.

But, Mr. President, I rise to speak not alone because of these instances of personal legislative association with Senator O'MAHONEY. I rise to speak because I want to pay tribute to the service he has given as a constructive legislator in broad fields of national interest.

During many years when I was in the House of Representatives I was on the Military Appropriations Committee, or, as we then called it, the Appropriations Subcommittee for the War Department. During much of that time Senator O'MAHONEY was a member, and later chairman, of the Appropriations Subcommittee for Military Appropriations in the Senate. I know something of the battles he has fought to get sound defense, and at the same time to try to prevent cost-plus contracts. Senator O'MAHONEY has been a leader in trying to see that the United States got sound defense, and honest defense, for every dollar spent.

I want to allude also to the matter which has previously been mentioned by the Senator from Georgia and the Senator from West Virginia, the place Senator JOE O'MAHONEY played in the great, historic constitutional debate which took place in the Congress in 1937. I was a freshman Member of Congress then in the 75th Congress. The great epochal fight of that year was the battle over the proposal of the then President to reorganize the Supreme Court, the proposal generally known as the Court-packing plan.

I did not particularly know Senator O'MAHONEY personally at that time, but I was impressed by the fact that among younger Members of the Senate when that great battle took place, which was marked by the participation of men like Senator Pat McCarran, Senator Arthur Vandenberg, Senator Burton Wheeler, and others, JOE O'MAHONEY, a younger member of the Senate Committee on the Judiciary that year, was given the opportunity and responsibility of writing the report of the Senate Committee on the Judiciary. And I have never forgotten—I have cited on many occasions—the ringing words with which he closed that report. I am paraphrasing now, but I remember the sense of it: That the Court-packing plan should be rejected so decisively that such a proposal would never again be presented to the representatives of a free people.

Mr. President, the free people of the United States will always be indebted to JOE O'MAHONEY for the contribution he made in preserving the independent judiciary of this country.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Washington.

Mr. JACKSON. Mr. President, few men have served in this body with such great legislative skill as has the distinguished senior Senator from Wyoming. Few men have served so effectively in this body, in our long history, dealing with so many complex subjects, as has the distinguished senior Senator from Wyoming.

In all of these broad and diverse areas, Mr. President, the Senator from Wyoming discharged his duties and responsibilities with great care and with great skill.

Many Members come to this body and specialize in one subject or two subjects. But, Mr. President, the senior Senator from Wyoming has left many monuments in this body that will stand for years to come.

I remember, when just out of school, studying that great undertaking by him, in the late 1930's, I believe it was, the Temporary National Economic Committee. It is one of the finest studies ever made of the complex American economy. But the Senator from Wyoming was not content with just that problem. At the same time, he devoted great energy and skill in the field of appropriations, first covering military appropriations, then interior appropriations, and later, after the war, the Atomic Energy Commission.

In all of these areas, his work was remarkable indeed. He served as chairman of the Senate Interior and Insular Affairs Committee with great skill. His work as a member of the Judiciary Committee in the field of constitutional law and in the field of antitrust law is well known to our colleagues and to the entire Nation.

In all of these endeavors, the senior Senator from Wyoming brought to this body a keen mind, born of intellectual honesty and great logical and legal skill that made it possible for him to concisely define a matter with such clarity that at the conclusion of any presentation made by him there could be no doubt as to the issues.

In addition, I must say that in his long labors in this body he has always maintained a fine sense of humor. He is a kindly and gentle man, always respectful of the rights of other Members of this body.

I wish to associate myself with the remarks heretofore made. We will indeed miss him, but we will always look forward to his wise counsel and advice in the years to come.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, I should like to be numbered among those who are very sorry to know of JOE O'MAHONEY's decision to retire as a Member of this body at the end of his term.

New England, as everyone knows, Mr. President, is a very generous area, but one of the most generous things we ever did was to give JOE O'MAHONEY to the West and to the Nation. It has been well said today by the junior Senator from Wyoming that after JOE O'MAHONEY arrived in the West, he was almost immediately appreciated by the discerning people of Colorado and later by the people of Wyoming, and he progressed rapidly and constructively up the ladder until he came to the U.S. Senate, where it was my good fortune to become acquainted with him some 20 years ago.

JOE O'MAHONEY is one of the most human, friendly, sympathetic men I have known as a Member of this body.

There is one thing which has been said about him which perhaps needs a little explanation. The junior Senator from Montana referred to the fact that in the West JOE O'MAHONEY is frequently referred to and is known as "Mr. Wool." I will say that if there is any wool in the system of JOE O'MAHONEY it is not Shropshire wool, because in the 20 years I have known him I have never seen any wool growing over his eyes. Time and again I have seen JOE O'MAHONEY exercising his astute legal mind and preventing the Senate from making mistakes which it would have had reason to regret later.

Politically, I think JOE O'MAHONEY is perhaps almost in a class by himself. He is a liberal without being reckless, and he is a conservative without being static. I hope everybody understands what I mean by that, but that is the only way I can describe him politically.

Once more I say we are very sorry he has decided to retire from this body. I join with all the others in expressing the hope that in the years ahead he may have improved health and enjoy life and happiness for many years in the future.

Mr. ROBERTSON. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Virginia.

Mr. ROBERTSON. Mr. President, I welcome this privilege to join with my colleagues in expressing sincere regret that one of the ablest and finest Members of this body has decided to retire. I express to him our deep appreciation for the type of public service he has rendered over a long period of time.

The junior Senator from Virginia was first privileged to know his colleague in 1933, while serving on the House Committee on Post Office and Civil Service, when the distinguished Senator from Wyoming was then the First Assistant Postmaster General. Later in that year, as I recall, he was appointed a U.S. Senator.

Mr. President, as my colleagues know, the junior Senator from Virginia is interested not only in the history of our Government, but also in the preservation of our Constitution as it is written and not as some people think it should have been written. The junior Senator from Virginia believes that there are absolute prohibitions in the Constitution, which should not be overridden either by the legislative branch or by the judiciary, for reasons of expediency, whether they be political, social, or what not. Consequently, it has been a source of the greatest pleasure to me to serve with one of the best constitutional lawyers who has been in this body for many years.

I was privileged to be in the House of Representatives when the Senator from Wyoming made a great speech against the packing of the Supreme Court, in order to get decisions which were desired. The Supreme Court did not have any positive prohibitions in that regard, but it was desired that the Court interpret the Constitution to meet so-called new social needs.

I was privileged to be a Member of this body when Senator O'MAHONEY presented, as few Senators have ever equaled and as perhaps none has surpassed, the appropriation bills for the Department of Defense. He was familiar with every detail of those vast operations and expenditures.

I was privileged to be a Member of this body when the issue was raised, for political expediency, of passing a Federal law to prohibit the imposition of a poll tax as a prerequisite to voting. There never has been a finer, better, clearer speech made on that subject than was made by the Senator from Wyoming. The subject did not involve his home State at all, but it did involve the Constitution, which provides that the States shall be the judges of the qualifications of their electors, provided they do not impose a different qualification for the electors of Federal officials than for the electors for members of the most numerous branch of the State legislature. As I have said, that subject did not involve his State at all, but it did involve the Constitution, which he loved, and which he knew. He did not want to see first one pillar and then another pulled from that great instrument, until in the end it would collapse and carry down with it the glorious structure which, as Daniel Webster said, has united national sovereignty with States rights and individual liberty.

Again only 3 years ago, in 1957, there was not a finer speech made on the floor of the Senate than was made by our distinguished friend in behalf of the Anglo-Saxon, cherished right of trial by jury, when he insisted that if criminal contempt proceedings were to be invoked the defendant should be entitled to a trial by jury.

Mr. President, I cannot add anything to the tribute which has been paid to our friend, but I can say I agree with all of the things which have been said about him today. There is no one who appreciates more than I the type of service he has rendered his State and his Nation, first in the executive branch of the Government and later in the legislative branch.

No one regrets more than I to see that type of clear and radiant mind, possessing courage of conviction, leave us in this period.

We never before have been in such need of legislators who know what the Constitution means, who can present to us the decisions of the court interpreting it, and who have the courage of their convictions to express their views on the floor of the Senate.

Again I say, Mr. President, I regret to see our colleague retire, but he will do so full of honor, to go back to his beloved State with the knowledge that his memory will be kept green in the hearts of those with whom he has served.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. McGEE. I yield.

Mr. MUNDT. Before expressing my fervent hope for many, many happy days in the future for our beloved friend JOE O'MAHONEY, and before expressing my regret upon hearing his decision to retire, may I begin by saying to JOE O'MAHONEY that it is good to have you with us today. You have made a magnificent recovery with the fine Irish fighting spirit which you have always displayed on the floor of the Senate. I know you are going to enjoy many, many happy years in retirement, during which we will continue to benefit from your counsel, your suggestions, and your recommendations.

Many times it has been said that JOE O'MAHONEY is a man of great judgment, great perspicacity, and great comprehension. As the Senator from Vermont [Mr. AIKEN] said, he had the good judgment a long time ago to move into the West. He had the excellent judgment, having moved into the West, to remain in the West. I know that every Senator who has served with him in the Senate recognizes the tremendous contributions which JOE O'MAHONEY has made to his adopted area of the country, which he has come to love so well, and which in turn has come to love him so enduringly.

Anything which JOE O'MAHONEY did for the West—and he did a great many things—inevitably was helpful to the great State which I am happy to represent. South Dakota and Wyoming are neighbors, and we share a great many of the good things of life. Of the oil which bubbles from the bowels of the earth in the State of Wyoming, they share a little better than we do. But we compensate for that deficit by having more productive grainfields.

By and large, however, the attitudes of the people in our areas, the challenges which they confront, the occupations in which they engage, make us not only good and friendly neighbors, but also make us concerned about each other's problems.

In at least three different instances I have had personal opportunity to work closely with JOE O'MAHONEY, and to observe the skill with which he approaches a legislative problem or a public problem.

We used to have around these parts what was known as the conference of Western Senators, when another great fighting Irishman by the name of Pat McCarran was among us. Of late, we have not been meeting as frequently as we should, but in that conference of western Senators, JOE O'MAHONEY's voice was always raised skillfully, intelligently, and persuasively to try to unite us, across party lines, behind projects and programs beneficial to the great West. In that connection I came to know him very well.

Early in my days in the Senate I was privileged to be a frequent guest of the Senate Committee on the Judiciary. I believe that of all the committees in the Senate, the Committee on the Judiciary is the most neighborly and hospitable, which I testify because my experience has been that whenever I have had a bill which has been referred to the Committee on the Judiciary, the members of the committee have invited me to sit with them, to confer with them, to counsel with them, and to answer questions, treating me as though for a day, or a series of days, or a week, I was a member of the committee.

There were hotly contested and very difficult decisions to make in connection with the so-called Mundt-Nixon bill, which was before the Senate in my first year in this body, because it had carried over from the period when I was a Member of the House.

I used to sit in the hallowed confines of the Senate Committee on the Judiciary, and, being a layman and not a lawyer, I always was overwhelmed by the erudition which was evident in the committee. I was greatly impressed by the manner in which the members of the Judiciary Committee dissected a piece of proposed legislation, the manner in which they made it into a tool, as would a carpenter, for legislative consideration. During those times this great draftsman and lawyer, JOE O'MAHONEY, was always present with his wise counsel and sound advice.

Finally, I was privileged to serve with him when he was the active chairman of the Theodore Roosevelt Commission. There he was, a great Democrat—referred to a couple of times today as "Mr. Democrat of the West"—devoting his talents and his skills toward bringing proper recognition to another great westerner, one who happened to be a Republican more closely identified with the State of North Dakota than the State of South Dakota. However, it was left to South Dakota to perpetuate the memory of Teddy Roosevelt in the immortal granite of the Black Hills in Mount Rushmore's famous piece of sculpture by Gutzon Borglum. In that famous monument we have commemorated and perpetuated the memory of the great Theodore Roosevelt. JOE O'MAHONEY, who led that commission, was most generous to all his associates, as he was in every other way.

I regret that he is leaving the Senate, but I rejoice that he is leaving the Senate in good health, in good vigor, and in good mind. I know those factors will enable him to continue to make contributions to the welfare of our country for many, many additional years.

JOE, wherever you go and wherever you roam, we wish you an abundance of luck, and we hope some of those good days will be spent on the South Dakota side of the beautiful Black Hills of South Dakota and Wyoming.

Mr. EASTLAND. Mr. President, will the Senator yield?

Mr. McGEE. I yield.

Mr. EASTLAND. Mr. President, Senator O'MAHONEY is one of the closest friends I have ever had in the Senate. He and I worked very closely together on the Committee of the Judiciary. I know that no Member of this body can take his place in the committee or in the Senate. I have watched his work in the Judiciary Committee for many years. Not one time has he ever made a move without being guided solely by the public interest. The public interest and welfare to him has always been the paramount consideration.

Today JOE O'MAHONEY is the most highly respected and the most influential member of the Committee on the Judiciary. I know that he is one of the most highly respected and ablest Members of this body. His retirement will leave a void which cannot be filled.

JOE is a Senator's Senator. In my judgment he has been one of the great Senators in the history of the United States. He is a man of unimpeachable integrity, who has been guided in all of his affairs, personal and public, by patriotism and by what he believes to be for the welfare of our country. I know that no man in the modern history of the Senate has waged a stronger campaign to protect the American system of government than has JOE O'MAHONEY. In addition, both in the committee and in the Senate, he has been one of the most effective Senators.

JOE, we hope for you a long and fruitful life. We are going to miss you in the Senate. You occupy a place I think cannot be filled.

Mr. SPARKMAN. Mr. President, I was greatly shocked when I learned that the Senator from Wyoming had announced that he was retiring from the Senate. I know, of course, that he made that decision, as he made all of his decisions, based upon the realities. I was shocked not so much in knowing that he had made the announcement as I was to realize that when he went away it would leave a great void here in the Senate.

I first came to know Senator O'MAHONEY a good many years ago. In fact, it was when I first came to the House of Representatives, in January 1937. I used to come over to the Senate quite often to listen to Senators debate. I soon learned to admire Senator O'MAHONEY's keen intellect. Of course, I knew something about the tremendous job he did with the TNEC, heading up one of the great economic studies of this country, one that has stood as a monument to him since it was made, and which will continue to help chart the course of our history.

JOE O'MAHONEY has been not only a great Senator, a great leader, a great advocate, a great originator, but at the same time he has been a man who is realistic and is willing to meet conditions as they actually exist and not necessarily as we might wish them to exist.

I recall particularly that in the early part of 1937, in February, if I remember correctly, President Roosevelt, in whose Little Cabinet Senator O'MAHONEY had served, presented what was called the Supreme Court packing plan. There followed a long, hard, and sometimes, I think, a bitter debate in the Senate over that question.

Members of the House would come to the Senate to listen to that debate. JOE O'MAHONEY is the one who pulled that one out of the fire. He was one of those who helped work out a final solution which was agreed to. I recall at the time seeing the piece of paper in his hand as he stood on the floor of the Senate reading off the terms and conditions of the plan that had been agreed upon. He stuck that piece of paper, which was written out in the handwriting of President Roosevelt, in his pocket. I dare say that he still has it as one of his souvenirs.

I said he was a great originator. He has originated a great many pieces of helpful legislation. I remember that a good many years ago—it must have been 10 or 12 years ago—he introduced a plan in the Senate which would have set up some kind of central organization for the purpose of making credit available to small business.

Senator O'MAHONEY left the Senate for 2 years, unfortunately. While he was gone, I introduced his bill, and I have referred to it many times, as I said, as originating, so far as legislation of the Senate was concerned, with Senator O'MAHONEY.

Senators will remember that year before last we finally passed legislation to set up a credit system for small businesses throughout the country. That was based largely upon the legislation that had been initiated by the Senator from Wyoming. I could go on and on and give many cases, involving mergers and consolidations and antimonopoly legislation, and such matters.

JOE O'MAHONEY has been one of the greatest friends the American free enterprise system has ever had in the Senate. He has always tried to move in such a way that would make certain that the free enterprise system, under which we have grown great in this country, should be continued.

I regret to see JOE O'MAHONEY leave the Senate. I know he is taking the right course. He knows that in his own heart, or he would not have made the decision. I wish for him and for his loved ones many more years of good health, great happiness, and success. If any man has earned that right, that man is JOE O'MAHONEY.

Mr. YOUNG of North Dakota. Mr. President, I, too, wish to join the great number of friends of Senator JOE O'MAHONEY in expressing sentiments of regret that he is leaving the Senate. I have always considered JOE O'MAHONEY to be one of the ablest Members of the Senate. I am sure that the lawyers in the Senate regard him as one of the greatest lawyers in this body.

One of the yardsticks in determining the worth of a Senator is not the amount of publicity he receives through all the news channels, but the impact he has upon the deliberations of the Senate. JOE O'MAHONEY is leaving a record of a wholesome impact upon the deliberations of this body. His name is attached to much important legislation, and especially that affecting the Western State he has been so much a part of.

I am sure that what all of us have liked most about JOE O'MAHONEY is the fact that he has always used such good judgment in all important matters coming before the Senate.

I know that all of us will miss him a great deal. I agree that he is entitled to years of rest, happiness, and enjoyment, and I hope those will come to him.

I hope, too, JOE O'MAHONEY, that you will continue to come back here as long as we who are here have the privilege of serving in the Senate. You will always remain one of our most loved and respected colleagues.

Mr. HOLLAND. Mr. President, I wish to start on a personal note. Some 11 years ago Mrs. Holland and I moved into what was then the Wardman Park Hotel, which since has become known as the Sheraton Park Hotel. At that time we found that our close neighbors on the same floor were the distinguished Senator from Wyoming and his gracious and charming wife. They have been such wonderful neighbors, such considerate friends, and such altogether kind people to have near us, that I cannot help express the hope that the Senator's retirement from the Senate will not mean that they will leave us at the Sheraton Park Hotel, because we would very, very greatly miss the many kindnesses and many acts of consideration which have characterized their every attitude toward us.

Mr. President, I have not had an opportunity to hear all that has been said, and there may be repetition in what I may say about the Senator as a Senator. He is a great Senator. He is a Senator's Senator. In addition, he is a gentleman and a scholar in the truest meaning of both of those words.

I have been impressed with two things about him as a Senator, which I wish to state for the record. One is his scholarly qualities, the second is his strong support of the Constitution. Everything he has handled, every speech he has made, every position he has taken in the 14 years I have had the chance to observe him, has been based not only upon conviction, but also upon great knowledge and a firm grasp of the facts lying behind the principles which he advocated.

I remember that every year he used to handle the defense appropriation bill. We have become so hurried in the Senate, in these later years, that I am afraid we are departing from the practice which he invariably followed in handling that great bill, covering the tremendous amounts of money involved in it, and serving the completely necessary objective of the defense of our Nation, with such thorough finesse from beginning to end that any Senator who wished to know about anything in the bill was

assured the chance to learn just exactly what it meant. I hope the Senate may always have both the leadership, in the chairmanship of its committees and subcommittees, and the necessary time, to handle matters of such great importance with the skill, with the finesse, with the patience, and with the scholarly grasp which the Senator from Wyoming always exhibited in handling that most important of all our appropriation bills.

That same scholarly quality pertains to so many other matters which he handled that I shall not attempt to mention them all. One of the finest speeches I ever heard made was the Senator's speech in support of the admission of Alaska to statehood, at a time when the effort was not successful, but when the predicate was being laid for the success which came a few years later.

I recall that when I came upon the floor on that occasion the distinguished senior Senator from Wyoming made some comment about an incident in connection with the admission of my own State in 1845, and he pointed to a similarity between that incident and something which pertained to Alaska. The RECORD will show a colloquy based upon that comment, indicating the breadth and the depth of his grasp of the problem to which he was addressing himself.

There have been many, many other bills and objectives to which the Senator from Wyoming has addressed himself, and as to which he has demonstrated his great ability, including, among others, measures having to do with the production of wool and the protection of that strategic agricultural industry, as to which we have a deficit rather than a surplus. In that field he has long been an authority.

In every field where he has accepted leadership, he has been an authority by reason of his scholarly grasp of the facts. That is true of antitrust matters and monopoly investigations. It is true of conservation measures and programs for national resource development. It is true of various matters which have not been popular for him to handle.

I heard a Senator mention a while ago the great speech of the senior Senator from Wyoming on the so-called Court packing bill. Surely that was not an easy thing for him to do, coming, as he had a short time before, from an executive position as First Assistant Postmaster General under the same administration that was making the suggestion to which he objected. But he had a perfect constitutional background on which to base his objection.

I remember that in my rather brief service in the Senate, I have heard him speak, I believe this time before a committee, although he had spoken earlier on the floor of the Senate, on the poll tax question. He showed a scholarly grasp of the Constitution, and of the record made by those who drafted it, which few persons possess. He took a strong position, based on the Constitution, a position which others who were as liberal as he wanted to bypass by passing a Federal statute in order to ban the poll tax. He kindly, but with complete firmness, swept that contention aside, because, he said, the Constitution does not permit it, and it would require a constitutional change to take away from the States the right to fix the qualification for electors which is given them by specific words in the Constitution.

I remember when the Senate was debating a bill which he was supporting, the Civil Rights Act of 1957. The question arose as to the place of jury trials in our Anglo-Saxon system of jurisprudence. I remember how sternly and strongly the senior Senator from Wyoming took the position, which probably was not an easy one for him to take in his State, that the right of jury trial to one accused of criminal contempt out of the presence of the court was an inherent right under the Constitution and under the Anglo-Saxon system of law, and must be protected regardless of how worthy was the objective which the proposed legislation under consideration sought to serve.

There have been many matters of that kind which I could mention. I shall not take the time to do so, because I know other Senators wish to speak.

I simply say that I wish we had more Senators, and the assurance of more Senators in the future, willing to acquire a thorough grasp of all the facts, willing to be national in their point of view, rather than provincial, willing to stand back of, behind, under, and in support of the Constitution, in every way within their power, and to insist that it be observed, as the Senator from Wyoming has invariably insisted.

Senator O'MAHONEY found time in his busy life as a Senator, only 3 or 4 years ago, to go to my State and to consider the adequate establishment of a great national park there, a park which was then in the making, and to come back to the Senate and, as chairman of the subcommittee, take a position which I think was right, and which I think subsequent events have justified. I believe his decision will be justified more and more in the minds of millions of people as the years pass in the future.

Senator O'MAHONEY was and is a Senator's Senator, the Nation's Senator, a servant of the Constitution, a very great and outstanding American.

I tell you, "JOSEPHUS"—because that is what I have always called you—I shall miss you terribly. I shall not know where to go when I need constitutional advice, which I very frequently do.

Good health, good luck, good fortune, and a long life to you and your lovely lady.

Mr. CARLSON. Mr. President, much has been said in the Senate this afternoon about the outstanding public service of the distinguished senior Senator from Wyoming. With those statements I not only am in accord, but I appreciate the Senator's great service.

Much has been said about his great influence in the halls of Congress. That, too, I appreciate fully and understand, because I have had the privilege of serving with Senator O'MAHONEY for many years.

But that is not what I desire to discuss. I wish to refer to his qualities as a friend and as a neighbor. As has been mentioned by the distinguished Senator from Florida [Mr. HOLLAND], Mrs. Carlson and I, too, have had the privilege of living at the Sheraton Park Hotel for 10 years as a neighbor of the distinguished senior Senator from Wyoming and Mrs. O'Mahoney. This has given us many opportunities to meet and visit with them. It is always a pleasure to have the privilege of meeting them in the lobby or in the halls. No matter where we meet, they are always friendly. It is like greeting friends from home when we meet them. It is then that we have taken pleasure in speaking of things pertaining to everyday life. Those friendly greetings and casual visits always reminds one of the type of friendly neighbors the O'Mahoneys are.

There is one thing especially which Mrs. Carlson and I have noticed, and for which we commend Senator and Mrs. O'Mahoney. Every Sunday morning they go to church. I think that is not only a mark of distinction, but it shows that the Nation can have confidence in the type of people it sends to the Halls of Congress to legislate in their behalf. They are sound, substantial people, having a firm religious background. Mrs. Carlson and I have appreciated that, and have remarked it on many occasions.

There is another side of life besides one's public life in the Halls of Congress. It is the life of the individual as he conducts his everyday home life and activities. Someone has said, "actions speak louder than words." I know of no finer example than the one we have in the distinguished senior Senator from Wyoming [Mr. O'MAHONEY] and Mrs. O'Mahoney. Mrs. Carlson and I have enjoyed very much our associations with them. We appreciate their friendship. We shall miss them. But we wish them much rest, which is well deserved and well earned after these many years of public service.

To Senator and Mrs. O'Mahoney, Mrs. Carlson and I say, Godspeed and God's blessing.

Mr. THURMOND. Mr. President, it was with much regret that I learned that my good friend, Senator O'MAHONEY, planned to retire and not seek reelection. One of the men who have impressed me most during the time I have been in the Senate has been the distinguished senior Senator from Wyoming. He is a profound lawyer.

Someone has said that a lawyer must possess at least three qualities. First, he must be a man of integrity—the most important quality. Next, he must be a man of industry, one who is willing to work, because the law is a jealous master. Third, he must possess knowledge—knowledge of the law and knowledge in general. The profound senior Senator from Wyoming possesses all these qualities, and he is known far and wide as being one of the ablest lawyers in the United States.

Next, the Senator from Wyoming is an able Senator. He is a man of principle—and possibly that should be the

first quality of a Senator. He possesses a keen mind, and he is a hard fighter. These qualities are essential to a Member of Congress.

Senator O'MAHONEY has great courage. I have seen him take positions which may not have been popular in his own State, because the particular problem involved may not there have been considered of paramount importance. I personally shall never forget the magnificent fight he waged on the floor in 1957 in favor of the preservation of the right of trial by jury. For this he earned the everlasting gratitude of millions of Americans.

In the debate over proposed changes in Senate rule 22, concerning the method of invoking cloture, Senator O'MAHONEY demonstrated great courage. He believes the U.S. Senate to be the greatest deliberative body in the world; and he opposed any rule which would enable a bare majority of the Senate to limit debate here.

Senator O'MAHONEY is a natural leader of men. He is a handsome man. He is a man who commands respect. He is tactful, forceful, and vigorous. He is decisive. He does not quibble. He does not mislead.

The great senior Senator from Wyoming is a fine American. He is a true patriot. He stands for the best ideals for which our country was founded. He believes in individual liberty and personal freedom. He believes in the free enterprise system of this country; and, in fighting against monopolies, he has helped maintain the private enterprise system of these United States.

It is with very deep regret that I learn that Senator O'MAHONEY is about to leave the Senate. I cherish his personal friendship. As a lawyer and as a Senator, he is able and profound. As a man, he is kind, courageous, and true.

Mr. SALTONSTALL. Mr. President, will the junior Senator from Wyoming yield to me?

Mr. McGEE. I yield.

Mr. SALTONSTALL. Mr. President, both Senator O'MAHONEY and I were born in Massachusetts and were raised in Massachusetts. The only thing I hold against him is that he left Massachusetts. But perhaps that was just as well, because he would have been a difficult Democrat to defeat; so perhaps his departure from Massachusetts made it possible for some of us who are Republicans to win at the polls.

My family and I had the honor and the pleasure of knowing Mrs. O'Mahoney long before I knew Senator O'MAHONEY. From knowing her and her family, I knew she had chosen well when she selected JOE O'MAHONEY.

When I came to the Senate, I had the opportunity to meet Senator O'MAHONEY, and to serve with him on the Appropriations Committee, and to debate with him there, and also on the floor of the Senate, from time to time. He always injected humor into the debate. He always had great knowledge of the subject he debated, and he always had the lightness of touch which is so characteristic of those of Irish descent in Massachusetts.

As members of the Appropriations Committee, Senator O'MAHONEY and I have served together on the Defense Subcommittee. There, he was one of the first to realize the importance of building up our defenses, for the greater security of our country. He always proposed the making of substantial appropriations for improvements in missiles and in the air defenses and the aircraft of our country. All of us knew that he realized, as did we, that there was a great future in the air and a great need to build up our defenses in the air, as well as our defenses on the ground.

Mr. President, because of my necessary attendance on committee meetings, I have not been able to be in the Chamber throughout the session today, to hear all the tributes which have been paid to Senator O'MAHONEY. Of course, I do not wish to reiterate; but I desire to assure Senator O'MAHONEY that I have very greatly enjoyed his personality and our friendship, and I have always been benefited by his outstanding speeches.

All Members of the Senate have the greatest respect for Senator O'MAHONEY, because of his intelligence, his conscientiousness, and his integrity.

When Senator O'MAHONEY retires, he will be greatly missed by every Member of the Senate.

All of us wish him the best of fortune.

Mr. LONG of Louisiana. Mr. President, will the junior Senator from Wyoming yield?

Mr. McGEE. I am glad to yield.

Mr. LONG of Louisiana. Mr. President, a few days ago, I had the opportunity to express my regret that the distinguished senior Senator from Wyoming [Mr. O'MAHONEY] had decided to retire from the Senate at the end of this session.

The departure of Senator O'MAHONEY from the Senate will be a tremendous loss to this body. It will also be a very great loss to me, personally.

As a youngster in my teens, I had the opportunity to watch Senator O'MAHONEY perform on the floor of the Senate; and many times since then I have had the opportunity to follow his career.

Perhaps one of the best sermons ever delivered by a Chaplain of the U.S. Senate was delivered here by the late Peter Marshall, who, at the opening of the Senate session, one day, delivered this short but meaningful prayer:

> O Lord, help us to stand for something, lest we fall to stand for anything.

Over the many years of his service in this body, Senator O'MAHONEY has, on this floor, stood every day for something, and often times for a great many important things.

Some of us have felt that if a nation were to be great, it must have great liberals and great conservatives, and sometimes persons who were a mixture of both. If our Nation had not had great liberals, there would not today be a free and independent United States of America. If our Nation had not had great conservatives, the ancient landmarks which have guided us so well would never have remained.

Senator O'MAHONEY is an outstanding liberal who has consistently fought to improve and strengthen the basic freedoms of our country; and as a conservative he has fought, in good times and in bad, to preserve the foundations of our country.

Perhaps Senator O'MAHONEY's greatest achievement has been his courageous and determined stand throughout the years to resist the trend toward monopoly on the part of big business, and to make it possible for the American ideal of free enterprise to survive.

He has fought that battle since the day he came here, and he is still in the very thick of that battle. As a matter of fact, today on the floor I asked how he is coming along with hearings on what I think is one of the most vital issues facing America today—the situation whereby large corporations do $6 billion worth of research at Federal expense, and take out patent rights to deny to others the right to use that knowledge which was developed at Federal expense. Senator O'MAHONEY is conducting hearings on that question now. I asked him how the hearings were coming along and what the chances were of getting a bill out of the Judiciary Committee on that subject. He told me, as is so characteristic of him, "Well, the time is short. We are still pressing for it, and I believe we have a chance."

Mr. President, fighting monopolies is a rather thankless task, because those who would be most affected by antitrust laws, those who are most interested, and those who understand the legislation best are those who would benefit by monopolies. There are, of course, exceptions to that statement.

It is a rather thankless task, but surely a spiritually rewarding undertaking to one who knows what it means to preserve the freedom of the Nation's economy.

Senator O'MAHONEY has fought for conservation of our natural resources for a long while, and also for the development and effective use of those natural resources.

He has been a supporter of civil rights legislation. Yet those of us who have on occasion differed with him on the merits of such legislation have admired him for the conservatism which he has shown in efforts to preserve the ideals of America, as in 1957 when he offered the jury trial amendment to the civil rights bill. That amendment, to preserve jury trials for persons accused of crimes and to retain the right to be tried by one's neighbors and peers, was the most important amendment adopted to that bill.

It would be very difficult to add much to what has been said by others here of the great achievements and accomplishments of Senator O'MAHONEY, and it would be far beyond my abilities to do so; but I do wish the Senator to know that we shall truly miss him. I hope we shall have occasion, particularly during those events when the Senator will be available to us, to visit with him and have his views for the benefit of those of us who will attempt to carry on, in some measure, in his tradition.

Mr. GORE. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Tennessee.

Mr. GORE. Mr. President, one of the most eloquent voices, logical minds, and pleasant personalities with which this Chamber has ever been graced has been embodied in the distinguished, able, revered, and venerable senior Senator from Wyoming.

Senator O'MAHONEY has brought to public life a conception of public duty, and dedication to the public welfare, and devotion to the principles which have made our country and our Government great. The record he has written is one to which, down through the decades, young men will point with pride; and, along with those of lesser talents, perchance now and then one may come along with equal talents who will seek to emulate him.

As he voluntarily departs this forum at the conclusion of the present session, Senator O'MAHONEY carries with him the love and the esteem and the respect of every Member of this body and of uncounted teeming multitudes who have watched his work, who have admired his record, and who hold his personality in affection.

As I close, I wish to bid you, Senator O'MAHONEY, the best of wishes and Godspeed as you journey forth in this romantic career which for you has not yet ended.

Mr. MOSS. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Utah.

Mr. MOSS. Mr. President, it is difficult to add to what has been said about Senator JOSEPH C. O'MAHONEY. He is my neighbor, and represents my neighboring State of Wyoming.

I felt a strong sense of personal loss when I learned of the decision of Senator O'MAHONEY to retire from the Senate at the end of his term in January. For years before I came to Washington I was very much aware of the towering reputation of this great Democratic Senator from my neighboring State of Wyoming, and it has been a privilege to serve for this brief period with him.

During his years in the Senate, JOE O'MAHONEY has implemented in many ways his strong belief that there can be no permanent political liberty without economic freedom. His name has become almost synonymous with antimonopoly legislation. It was under his leadership, as chairman of the Temporary National Economic Committee, that an inventory was made of our economic system which served as the basis of legislation to protect our small and middle-sized businesses from entrenched wealth and great concentrations of economic power.

Another high moment came as floor manager for the Full Employment Act, which established the Council of Economic Advisers for the President, and the Joint Economic Committee, two guiding factors in the management of our fiscal affairs.

JOE O'MAHONEY's love of the Constitution has been an inspiration to everyone around him. His knowledge of it, combined with his keen legal mind, has made him an authority who will be sorely missed.

His dedication to conservation, and to all of the pressing problems of the West, is well known. His years as chairman of the Interior and Insular Affairs Committee were productive and profitable ones for the section of the country which he and I represent.

Mr. President, there are some men with whom we walk who bring challenge and inspiration. JOE O'MAHONEY is one of these. His departure will leave a great void in the Senate.

All of us will miss him sorely. But we know that when we visit with him we may partake anew of the inspiration and the spirit of this great man and may learn from his great intellect.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Alaska.

Mr. BARTLETT. Mr. President, this is a time for rejoicing, and for sorrow. It is a time for sorrow because we are expressing our first farewells to JOE O'MAHONEY. It is a time for rejoicing because we have opportunity to tell Senator O'MAHONEY, and to tell the world, how we feel about him. It is very clear from what has been said this afternoon that we think very well indeed of him. And we should, as should all the people of this Nation. For, whether they realize it or not, their lives have been improved and their lot bettered by the contributions to the national welfare made by this outstanding U.S. Senator.

JOE O'MAHONEY's vision, which is unusual, has been translated in ever so many ways into constructive action. He has been, during his legislative career, a specialist; but, unlike most specialists, his interests and talents have not been confined to one interest or to one area. They have roamed far and wide and helpfully.

I shall not be repetitive by seeking to give a detailed account of his career, a service which has been performed by others, and in better manner than I could.

However, I do wish to say that although he comes, as I do, from a State with a small population, his talent, his integrity, his keen intelligence, and his devotion to country quickly carried his reputation beyond the boundaries of Wyoming, beyond the boundaries of the West, and over the entire country. A great lawyer, an expert in economics, Senator O'MAHONEY has one of those penetrating and incisive minds which are the envy of those of us less well equipped. His warmness, his liking for people, his unfailing courtesy, his wonderful qualities as a Christian gentleman—all these have endeared him, and endear him, to everyone who knows him.

His was the decision, and he has made it; a decision to leave the Senate after this year. Much as we regret that decision, none of us can quarrel with it, because this is a determination which must be entirely personal. But for me, should I be fortunate enough to return to this great body next year, there will be always something missing, with the familiar figure of JOE O'MAHONEY absent from his accustomed place so near the desk I occupy.

Mrs. Bartlett has asked especially that she be permitted to join me in expressing affectionate greetings to JOE O'MAHONEY, and to wish for Mrs. O'Mahoney and him in their honored and deserved retirement the best of whatever they may wish.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from Colorado.

Mr. ALLOTT. Mr. President, it is always a sad time when we rise on the floor to take more or less formal notice of the departure of a friend. At a time like this it is only natural that we review, I suppose, the qualities of the friend which have impressed us most and which we admire most.

In my 6 years in the Senate it has been my good fortune to serve with our good friend, JOE O'MAHONEY, on the Committee on Interior and Insular Affairs. I think it is at this place rather than some other areas where he is perhaps better known that I have come to appreciate him and the work he has done the most. I am not unaware that he is the father—yes, he could be called the grandfather—of oil shale development in this country. I will go so far as to call him the great-grandfather of oil shale development in this country, because he was the first to recognize the tremendous importance of this resource and what this great natural commodity of ours can mean for this country. We have still to reach the real threshold of its development, but one among us saw this many years ago and devoted himself unstintingly to progress in this field, as he has in many other areas.

When I think of JOE O'MAHONEY in the days ahead, I shall think of a great lawyer. Only a few weeks ago, in connection with some proposed legislation before our Committee on Interior and Insular Affairs, I saw the brilliant, incisive, mental play which demonstrated to everyone present the great legal ability he has and the clarity with which he sees legal problems and their relationship to constitutional law.

I shall always think of JOE O'MAHONEY as a fighter, as what we in the West call a "scrapper." This is not to be taken in the wrong sense, but instead in the sense that all of us respect a man who believes in something and is willing to carry forward a real fight to espouse the principle.

There was in Colorado some years ago a man whom the Senator may remember, by the name of Alva Swain, who used to write a column called "Under the Capitol Dome" for one of the Denver newspapers. He once wrote an article entitled "The Last Mile." In this article he pointed out how many people in the world had failed because they had failed to walk the last mile. This illustrates, I think more than anything else, the quality which has made our friend so great and which, above all others, will endear him to my heart, because no matter what the words, what the circumstance, what the situation, what his health, he has always been willing and

ready—yes, anxious—to walk the last mile. This is why, in my opinion, he leaves behind him a great wealth of accomplishments.

I cannot question, and it is not for any of us to question, the motives which induce him to depart from us. Health, yes. A desire to be with his wife, yes.

All I can do, my friend, is to wish to you a continuation of the life which has been productive of so much so far. I am sure, that so long as the Lord wills you to be on this earth, life will continue to be as productive, no matter whether it be in the Halls of the U.S. Senate, in Wyoming, or in some other place.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. When I arrived in Washington, D.C., almost 16 years ago, one of the very first Senators I met was JOSEPH O'MAHONEY. From that day until this I have become more and more aware that he is a person who works for and votes for his own convictions. When a man follows his convictions without being led astray any time, that man is worthy of being a leader.

JOSEPH O'MAHONEY has served on the Committee on the Judiciary for many years. Well do I remember many occasions, when the heat of debate was pretty hot, when JOE would step in to pour some oil upon the waters, so to speak, and to bring the two parties, or the parties broken up into factions within the committee, together. He would bring out of chaos some legislation which was worth while.

I appreciate his friendship, his leadership, and his activities in the Congress of the United States.

The story of the political life of JOSEPH C. O'MAHONEY, the distinguished senior Senator from Wyoming, is one of a man who prepared himself to be a good politician. I use the word "politician" in the sense of one working for the good of his country. It was 44 years ago that JOSEPH C. O'MAHONEY, a young lawyer with newspaper experience, came to Washington as secretary to former Senator Kendrick of Wyoming. From the first day Senator O'MAHONEY came to Washington, his career as a politician and servant of the people was set out before him, and he served to the best of his ability.

He has served with distinction the people of his State and Nation through the trying years of "boom and bust," through the troublesome thirties, and the war years. It is in the more recent years of his long and colorful career that I have had the pleasure and honor of working with him in various ways in the Senate. It is especially in the Judiciary Committee of the Senate where Senator O'MAHONEY has distinguished himself in our history and endeared himself to respecters of sound judgment and law.

Many is the time that I have known this colleague to stand on the unpopular side of the fence because he knew it was the just and right side of the fence. The leadership in the Senate from both sides of the aisle will miss his good judgment and his forceful way of leading legislation through the Senate.

I feel it is a personal honor that I can rise to commend the Senator from Wyoming for the distinguished service he has rendered the Senate and the Nation. I regret to see him retire but I wish for him many happy and healthy years in the future.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from New York.

Mr. JAVITS. I thank the distinguished Senator from Wyoming for yielding.

It is an honor for a Senator to pay tribute to so renowned and distinguished a Senator as is Senator O'MAHONEY of Wyoming. I would like to pay my tribute to our dear friend and colleague by recalling two physical instances to his mind so that he may have visually before him how I feel about him and the impact he made upon me.

In 1957 during the debate in the Senate on the civil rights bill the senior Senator from Wyoming sponsored a jury trial amendment with which I did not agree. Yet I remember so distinctly that the senior Senator was coming from Wyoming in a plane one day and was not due to arrive until late in the afternoon. The Senate marked time until he arrived. He then stood in the aisle next to the desk of the acting majority leader and made his speech on the amendment with such eloquence and force and with such erudite citation of legal authority as literally to sweep all before him. Although I was not persuaded, I greatly admired the character, the loftiness of mind, the erudition, and the eloquence which was displayed by him on that occasion.

There is one other physical circumstance which is very appealing to me, and I hope will be to him. Early in the days of airplane travel from New York to California, I frequently took one of the small Boeing planes which were then available in order to carry on my profession as a hard working lawyer. Invariably the plane would stop at Cheyenne, which I came to know pretty well. The city had a quality which always made me feel as we landed that I was at last in the West. It had a clean quality. It had almost a nobility as it appeared, sharp and distinct against the clear western sky. It is a quality one cannot identify. Yet one would know what it meant, what it stood for, and that it was the portal to a great, new, adventurous land.

Senator O'MAHONEY has always appealed to me as that kind of personality. He is like the city, clean and sharp in the atmosphere. We know what he represents, what he means, and what his objectives are. They are expressed very clearly.

These are two pictures in my mind which I shall always hold very dear. The Senate is a difficult place in which to serve. There are many pitfalls. There are not only the pitfalls of election but, more importantly indeed, the pitfalls of policies and the pitfalls of personal relationships in this Chamber. I know of no man who has made a more enviable reputation here than has Senator O'MAHONEY. I know of no man who has more friends as shown by what has occurred today, no man whose personal presence has been more beloved, and whose personal presence will be more missed. I hope in the days ahead, when all of us wish for our colleague health, happiness, sunlight, fresh air and all the joys of retirement, he will not forget us. I know he will not. He will have the responsive feeling of warmth for us which we will have for him.

May I again express to the junior Senator from Wyoming [Mr. McGEE] the sense of privilege which comes to me in being allowed to participate in these ceremonies and in saying au revoir to a dear friend and colleague.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. McGEE. I yield.

Mr. GRUENING. Mr. President, the people of the United States, and the Senate particularly, have suffered three body blows in recent weeks. We suffered first the untimely death of Richard Neuberger, of Oregon, and then the announced retirement of the senior Senator from Montana [Mr. MURRAY], and the Senior Senator from Rhode Island [Mr. GREEN]. We must now sadly add to those the announcement by our beloved colleague, JOE O'MAHONEY, that he, too, will retire at the end of the 86th Congress and will not be a candidate for reelection.

Mr. President, the Senate and the Nation can ill afford this loss. The Senate will not be quite the same without the benefit of his incisive thinking and eloquent expression developed from his vast experience, his broad outlook, his creative and independent approach to every problem, large or small, and his unfailing and militant dedication to the public interest, which have been made available to the Senate and thereby to the people of the United States.

Mr. President, others of our colleagues have commented upon and will pay tribute to the great variety of services which Senator O'MAHONEY has rendered as one of the great defenders of economic freedom and as a leader in our time in pointing to the perils of monopoly and to the dangers inherent in the great concentrations of economic power.

No one in the Senate or in public life has been a keener appraiser and opponent of all forms of arbitrary power in the body economic and the body politic. Hence his unfailing insistence on the provisions of the Constitution and his opposition to the increasing usurpation of and delegation of powers vested in one of the three branches of our Government by and to another branch.

No one has more stoutly resisted the encroachments of the executive upon the legislative branch of our Government. Senator O'MAHONEY's public career is so replete with battles for the enduring principles which have made our country great that it would take hours to list them in detail. I wish, however, to refer to one great service that he has rendered, which is very close to some of us,

and to me particularly, and that was the fight he initiated in Congress to bring in Alaska and Hawaii as States of the Union.

Senator O'MAHONEY was chairman of the Committee on Interior and Insular Affairs in 1950 when that committee held the first full-length hearings held for the Senate on the admission of Alaska as a State.

As might be expected, he conducted that hearing so thoroughly and searchingly that the groundwork was effectively laid for the debate which followed. In that debate his eloquence was memorable. I should like to read, from the many speeches he made in behalf of statehood for both Alaska and Hawaii, a few excerpts, which illustrate his power of expression, his fervor, and the great skill with which he presented the cause. My only regret is that I shall not be able to simulate here the clarion voice with which he delivered these sentiments:

A glance at this map, Mr. President, makes it clear that Hawaii and Alaska are the arms of Uncle Sam stretching toward the Pacific. Are they going to stretch forward carrying the torch of liberty and freedom, or is the Congress of the United States going to say, by rejection of the statehood bills, that we do not actually believe in the principle of self-government and freedom about which we talk? We promised statehood when we incorporated these Territories. We have promised repeatedly statehood in our political platforms. The arguments against statehood are as thin as air; the arguments for statehood are unassailable.

But up to this hour, Mr. President, the two remaining incorporated Territories of the United States, extending into the Pacific Ocean, which, as Secretary Seward predicted in 1867, has become the center of the great world political struggle, have been denied statehood. The contest is on to win the minds of the teeming millions of the Old World.

How true that was 8 years ago, and how true it still is.

How easy it would be for us in the Senate to say that, so far as we are concerned, we want the word to go out from that melting pot of the Pacific—Hawaii—that we do believe in freedom for all men and self-government for all men, and that we are not imperialistic colonizers, as Jacob Malik has called us.

It is only necessary to look at this map and to turn our minds back over the pages of history to know that the march of freedom has been westward around the globe. Whenever the peoples of Europe felt themselves oppressed, or unable to govern themselves, they turned to the west. The movement of mankind toward liberty and freedom has steadily marched forward in a westerly direction across the face of the earth.

The march of freedom has been toward the west. The founders of our Government settled along the Atlantic Ocean, and when they were dissatisfied with economic conditions they also moved west. They crossed the Alleghenies, they crossed the Northwest Territory, they crossed the Mississippi and Missouri Rivers, they crossed the Rocky Mountains, they crossed to the Pacific Ocean. Territory after territory was incorporated and State after State was created, and here we built up the greatest industrial power in all history, the greatest power that a free people ever created, because we have been devoted to the principle of granting opportunity to individuals.

Mr. President, that western trek has continued up into Alaska, and now again we come face-to-face with what may be a mortal combat with arbitrary political power and arbitrary economic power. We have carried freedom, political, and economic freedom, steadily west across the North American continent. We carried it into Alaska in the beginning, but Alaska now is held back from development because it does not have the statehood which this bill would grant. People who enjoy political and economic freedom in the United States are loath to move into a territory where their activities are controlled from beyond their borders, controlled, let it be said, by Government bureaus in Washington, insofar as some things are concerned; controlled by private organizations on the Pacific coast of the United States so far as other things are concerned.

At this point, Senator Knowland asked Senator O'MAHONEY to yield, which he did. And after Senator Knowland had spoken, Senator O'MAHONEY continued:

Other Senators have come onto the floor since the discussion began, and I should like again to bring out the point that the march of liberty and freedom has been westward across the face of the globe, and now it has reached Alaska and Hawaii. It has reached an Iron Curtain, a curtain which has been lowered not alone by the totalitarian dictators of the Kremlin, but by some of us here at home who do not comprehend what has been transpiring in the world. The progress of freedom may be stopped unless we carry it forward.

How timely that summons today, and what a legacy of guidance is that last sentence before Senator O'MAHONEY was again interrupted:

The progress of freedom may be stopped unless we carry it forward.

That was the real beginning of the legislative fight which brought the two States into the Union. The bill that year was defeated by a single vote. It was recommitted by a vote of 45 to 44. However, the impulse and the impact which was given to statehood for Alaska by JOE O'MAHONEY, with the fervor of his conviction, his masterful marshaling of all the arguments, and by his eloquence, carried the cause of statehood to victory a few years later.

When the history of this decade is written—the fifties—a decade of much frustration and stress and turbulence, no achievement will stand out more in the history of our Nation than the admission of Alaska and Hawaii into the Union, and the carrying thereby of the frontiers of democracy to America's farthest north and farthest south. There in his Senate seat sits the father of that great achievement, JOSEPH C. O'MAHONEY. Alaska and Hawaii will always be grateful to him.

Mr. President, as JOE O'MAHONEY leaves us at the end of the 86th Congress, he will be retiring not merely as the senior Senator from Wyoming. He is not even merely a great western Senator, although of course he is that. He is a national figure. If we go back into the history of this great body during this century, I am sure that very few will stand with equal eminence. I think of William E. Borah, of Idaho; Hiram Johnson, of California; George W. Norris, of Nebraska; Robert La Follette, of Wisconsin; Thomas Walsh, of Montana. I believe I have exhausted the list. JOSEPH C. O'MAHONEY, of Wyoming, is the peer of those giants.

JOE, we are going to miss you. But you will leave a record of achievement that is immortal.

Mr. RUSSELL. Mr. President, I had no knowledge, until I entered the Chamber a few moments ago, that the Senate was engaged in paying a deserved tribute to one of its greatest Members. This morning I was engaged in work in the Committee on Appropriations. It was a happy circumstance that brought me here at this time, because I would indeed have been deprived of attempting to express sentiments of my heart if I had not had an opportunity to say just a few words on this occasion.

It is sad for me to try to imagine or contemplate the Senate without JOE O'MAHONEY. JOE O'MAHONEY is a Senator in the great tradition of the Senate. JOE O'MAHONEY is a great independent. No group, no cult, no class, no organization, however powerful it might be in these United States, could move JOE O'MAHONEY the smallest fraction of an inch beyond the limits that were dictated by his conscience and by his great intellect.

It is unfortunate that from these great independents, men not only of ability but men of character and courage, we should lose one of those who remain.

Mr. President, there have been few phases of legislation which affect the lives of the people of the United States that have not felt the impress of his genius and his capacity. He has operated in farflung fields—from antitrust laws to military appropriations, from matters affecting the Department of the Interior to atomic energy operations. In every one of those assignments he has contributed greatly. He has drawn on the reserves and on the store of his physical strength and of his intellect and of his courage.

The Constitution of the United States will lose one of its greatest friends in this body when JOE O'MAHONEY departs from these halls. He knows the Constitution of the United States. When he swore at the desk of the Vice President to undertake to defend the Constitution, he was not uttering empty words. He took that oath to his heart. Would that every man who comes into the Senate would respect it and have the courage to defend it and to express the convictions of his mind and heart with the same freedom and the same determination that have characterized JOE O'MAHONEY.

All of us cannot be so eloquent as the distinguished senior Senator from Wyoming. God has vouchsafed to him the great gift of expression which few men enjoy. But more of us could emulate the courage and the intellectual honesty with which he approached every one of his assignments.

I repeat: The Senator from Wyoming is a Senator in the great tradition. He is a Senator in the great tradition in his ability to express himself upon the floor of the Senate. He can speak eloquently, intelligently, and convincingly on more different subjects than can any other Member of this body. He can do it with-

out a prepared statement. He can do it without typewritten pages. He can do it on the spur of the moment, on the impulse of his heart and his mind, and in his devotion to his senatorial duties.

I have laid great store on a few rather elemental characteristics of men in measuring them and cataloging them in my mind, and in reserving to them a place in my heart. One trait of character which has always appealed to me is loyalty. Senator O'MAHONEY is loyal to every cause in which he has ever believed. He is loyal to every friend he has ever had. I say that as one who has been vouchsafed the great benediction of enjoying his friendship over a period of almost 28 years. His outstanding characteristic, however, is what, in this day, is called intellectual honesty; what we used simply to call courage; and in the common vernacular what we call guts. Senator O'MAHONEY has this trait. This characteristic has stood out in the Senate time and time again, as this man followed the dictates of his own heart and his own conscience.

We are in a time when we almost catalog Members of the Senate. We have our professional liberals and, indeed, we have our professional conservatives in the Senate. But I can look at JOSEPH O'MAHONEY and say, "There stands a man." When his convictions told him to do so, he took positions which caused the conservatives to call him a radical; and when his convictions told him in other circumstances not to follow blindly a path which was laid out by others, he took positions which caused the radicals to call him a reactionary.

All in all, to me, those traits sum up JOSEPH O'MAHONEY as one of the great Senators who have adorned the Chamber of the Senate of the United States.

I salute you, my friend; and may a benign providence attend you for many years to come in the manner to which your services entitle you.

Mr. KEATING. Mr. President, will the Senator from Wyoming yield?

Mr. McGEE. I yield.

Mr. KEATING. Mr. President, I join in the words of tribute today to one who has been my good friend over the years, both in the other body and here, our able colleague, the distinguished senior Senator from Wyoming [Mr. O'MAHONEY].

We have often agreed and often disagreed on various issues. But whether in agreement or disagreement, Senator O'MAHONEY has always been most courteous, most cooperative, and most kind to me personally. More often than not, I suspect, particularly in our work on the Committee on the Judiciary, we have stood shoulder to shoulder on important matters.

I am especially familiar with Senator O'MAHONEY's great contributions in legal and judicial affairs. His work in this field has been prodigious, and his many activities to improve the judicial process, to reform the antitrust laws, and to strengthen our laws against subversion are important milestones in the progress our Nation has made.

I remember very vividly the manner in which Senator O'MAHONEY so successfully championed the so-called Jencks decision bill to protect the FBI files against Communist agents. It so happens that I was then serving in the House of Representatives, on the Committee on the Judiciary, and was working there on legislation in this field. Senator O'MAHONEY was most helpful, cooperative, and effective in this joint venture, as he has always been in those issues, objectives, and principles to which he attached himself.

Senator O'MAHONEY's place in the history of this body and in the history books of the Nation is secure. His name is written indelibly on the statute books in numerous cases. We who have served with him in the Senate, the people of Wyoming, and indeed all Americans, can be very grateful for his long and fruitful career of public service.

I know that every Member of this body wishes him continued happiness and success in the days ahead. I express the hope that Senator O'MAHONEY will continue to contribute his very outstanding talents to those causes which he has so ably, effectively, and sincerely championed over the years.

We wish him Godspeed.

Mr. WILLIAMS of New Jersey. Mr. President, people of New Jersey most certainly share the pride of all Americans in Senator JOSEPH C. O'MAHONEY of Wyoming, and are grateful for his great achievements for our Nation that have been the product of a thoughtful, kind, and courageous, great American. We are also proud, however, that our opportunity for friendship with Senator O'MAHONEY has been more intimate than just as a U.S. Senator from Wyoming.

Senator O'MAHONEY's brother sometime ago came out to Summit, N.J., to enjoy the relaxing and wholesome residential opportunities of that fine suburban town. There, he raised his family; there, his brother and our beloved colleague came on many occasions to visit, and from these visits New Jersey people came to know personally the man we honor today. Not long ago, a businessman friend of mine told me how as a young veteran he had met Senator O'MAHONEY in Summit, and the Senator encouraged him to go into business and to avail himself of the opportunity to start business with a GI loan. With this encouragement, Terry Dempsey started his business, and he is grateful daily for the consideration and kind advice of Senator O'MAHONEY. I know that this example of thoughtfulness can be multiplied thousands of times across the Nation.

The Senator's nephews are still living in Summit, and of this we are proud. The O'Mahoney name we know will be forever with us, through the achievements of Senator O'MAHONEY and the connections of his fine family.

Mr. CLARK. Mr. President, I desire to join with my colleagues in the deserved tributes which they have paid to the distinguished senior Senator from Wyoming, the Honorable JOSEPH C. O'MAHONEY. I regret very much that he has concluded not to seek reelection. I am confident that had he done so, he would have been triumphantly returned by the citizens of Wyoming to another 6-year term.

I know of no man who is held in higher esteem, either on the floor of this body or in his home State, than is JOE O'MAHONEY.

It was my privilege to know him before I came to the Senate. During the 3½ years I have served in this body, my affection for and gratitude to him has increased many times over. He took me, a new and untried Senator, by the hand and showed me the ways of this august and sometimes inscrutable body, and has been kindness itself in making my way in this body easier.

We had a happy little joke together, Senator O'MAHONEY and I, because it has been my privilege since 1924 to have owned a small ranch property in the Jackson Hole area in Teton County, Wyo. I spent eight happy summers there, running a dude ranch for young boys of the teenage group, while I was going through law school and in the first years when I was trying to establish myself in the practice of the law. JOE O'MAHONEY knew that; and when I came to the Senate, he was kind enough to refer to me as the "summer Senator from Wyoming."

I had the privilege, on one occasion, of appearing with Senator O'MAHONEY on his regular television program, which is shown all over Wyoming. We found ourselves able to agree on a number of matters involving conservation, irrigation, and the development of water resources in his home State. He presented me with great courtesy to his audience, and some of my friends in Jackson Hole later wrote me notes telling me they had enjoyed the program and saying how happy they were that Senator O'MAHONEY had done me the honor to refer to me as the third Senator from Wyoming, although one who was in residence only during brief periods in the summer.

I wish my good and dear friend long life and happiness, and reassure him on a point on which I am sure he needs no reassurance; namely, that he has the undying and lifelong admiration and respect of every one of his colleagues who serve with him in this body.

Mr. KUCHEL. Mr. President, will the Senator from Wyoming yield?

Mr. McGEE. I yield.

Mr. KUCHEL. Mr. President, one of the great leaders of the Senate of the United States has announced his plan to retire. His colleagues will miss JOE O'MAHONEY, the senior senator from Wyoming.

On many occasions in the last half dozen years we have sat here and listened to him, as with vigor and courage he stood in the Senate to fight, as he believed he should, for that great panorama of causes which he undertook to espouse.

I have known him also as a fellow member of the Committee on Interior and Insular Affairs, a committee primarily charged with responsibilities to the western States of America, including my own; charged, too, with the determination of legislation for the territorial areas owned by our country.

Not once, but again and again, I have seen the senior Senator from Wyoming give of his valued time to causes in which other States in the West were vitally interested. My own State has been no exception. I very much doubt that congressional approval would have been given to important reclamation projects for California had not the distinguished senior Senator from Wyoming, having determined them to be in the public interest, helped to make them become a legislative reality.

Surely the admission of the two new States to the Union is in part the result of his belief in their honorable availability to become States of our beloved Union.

Mr. President, beyond all those things, I am most honored to call JOE O'MAHONEY my friend.

Over the years since our country was born, there have been in the Senate Chamber great leaders of thought, some sitting on the Democratic side of the aisle, and some on this side of the aisle. One of the reasons for their renown is that on many occasions they stood impervious to any and all cries for blind partisanship. They spoke out for what they believed to be in the interests of the people.

On many occasions I have listened to the senior Senator from Wyoming describe colorfully and most entertainingly his friendship with one of the great Senators who graced this Chamber for so many years, and who came from the State which I now have the honor in part to represent. Hiram Johnson was an outstanding Senator. I think perhaps I can indicate the warmth of my respect and my feeling for Senator O'MAHONEY when I say of him that the plane upon which the great Hiram Johnson operated is also the plane upon which Senator O'MAHONEY has operated.

All of us who are Members of the Senate hope to see much of Senator O'MAHONEY in the future.

We pray that his health will continue to be restored, and that he will find great comfort from the friendships he will take with him from this Chamber when this session concludes. Those friendships will continue with him all the rest of his days.

To Senator O'MAHONEY, Mr. President, I say good luck and God's blessing.

Mr. BIBLE. Mr. President——

Mr. McGEE. Mr. President, I am delighted to yield to the senior Senator from Nevada.

Mr. BIBLE. Mr. President, the announcement by our distinguished colleague, the senior Senator from Wyoming [Mr. O'MAHONEY], that he will retire at the end of his present term of office has been a cause for extreme and genuine regret.

When Senator O'MAHONEY leaves the Senate, at the end of this session, he will be able to look back over the span of a quarter of a century during which the Senate has seen him devote his skill, his energy, and his voice to the everlasting betterment of this body, this country, and its people.

Except for a temporary political setback in 1952—or what he, himself, terms "a leave of absence"—he has served continuously in every Congress beginning with the 73d.

Although Senator O'MAHONEY was struck by illness almost a year ago, he rallied with his characteristic courage and vigor; and he has continued to maintain his well-deserved reputation of being a Senator's Senator.

Senator O'MAHONEY was sworn into office for his present term—following his temporary "leave of absence"—on November 29, 1954. I well remember that date, because 3 days later I, myself, subscribed to the same oath of office.

During the last 5½ years, I have come to know Senator O'MAHONEY extremely well and intimately, through our service on the Committee on Interior and Insular Affairs. His contributions to the work of that committee have been limitless, and he has justly earned the title of being one of America's outstanding conservationists.

Mr. President, regardless of whether the subject under consideration has been one in the field of conservation, reclamation, constitutional law, baseball, monopolies, or patents, Senator O'MAHONEY has continued to be an acknowledged expert in each.

He is a gentleman of the finest instincts, and he is a Senator in the finest traditions of statesmanship.

Certainly Senator O'MAHONEY will leave on the Senate the indelible imprint of his truly great characteristics and qualities.

All of us hope that he will return to this Chamber very often.

Mr. President, I echo the sentiments which have been expressed many times today by so many Members of the Senate when I say to Senator O'MAHONEY, good luck.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. McGEE. I yield to the Senator from California.

Mr. ENGLE. It would be difficult for me to add to the words of praise that have been expressed today for the senior Senator from Wyoming. Speaking at this point in the RECORD would be, in a sense, gilding the lily; but I join in the wonderful tributes paid to the senior Senator from Wyoming, and especially in those remarks addressed to him by his junior colleague, who knows him best and whose protege he is.

We all deeply respect him for the long years the senior Senator from Wyoming spent in government before he came to the Senate of the United States. Subsequent to that time he demonstrated a tremendous competence, not only as a lawyer, but as a legislator. He has been one of the most respected constitutional lawyers to serve in the U.S. Senate. When Senator O'MAHONEY rose to speak on a constitutional point he had the respect and the attention and the careful consideration of every man in the Senate, and this body does include some of the finest constitutional lawyers in the country today.

Senator O'MAHONEY's record in this Congress will be indelibly imprinted, not only upon the State of Wyoming, but upon all of the Far West, because of his dedication to conservation and the development of our great natural resources.

The State of Wyoming is indebted to her great senior Senator for his efforts in the field of water development, where he has been a leader. The entire West is indebted to and appreciative of Senator O'MAHONEY for his efforts not only in that field, but also in the field of mining, which is a field in which the West has needed help and support in recent years.

But aside from his interest in what one might call local considerations, those that directly affected not only his own State, but also the Far West, Senator O'MAHONEY has taken an active hand in legislation of great national consequence. He has devoted himself to the problems of the economy of this Nation, which is one of the least understood, and perhaps one of the least spectacular fields in which a legislator can engage, although it is one of the most important. In that area he has demonstrated the high competence that has been referred to by the junior Senator from Wyoming.

Senator O'MAHONEY has given leadership in the liberal principles of the Democratic Party in trying to maintain a national economy of great stability and of full employment.

Senator O'MAHONEY's stepping out of the Senate, for the unhappy reason which he has stated makes it necessary at this time, is not only a great loss to his State and to the area of the Far West, for which he was an outstanding spokesman, but also to the Nation as a whole.

I join with my colleagues in expressing my appreciation to him, and my admiration for his great services, and to say to him that he will leave the Senate of the United States poorer because he is not here.

Mr. DWORSHAK. Mr. President, I join with my colleagues in the Senate in paying tribute to the senior Senator from Wyoming [Mr. O'MAHONEY], following his announcement that he will retire late this year, after serving in this body for a quarter of a century. It has been my privilege to serve with the Wyoming Senator on the Committee on Interior and Insular Affairs. During that close association I had an unusual opportunity to observe his keen insight into many of the problems which confront the public lands States of the West, including Wyoming and Idaho.

Likewise, I have been aware of his long and persistent efforts to protect the water rights of the Western States against encroachment by the Federal Government.

I have also had an opportunity to serve with Senator O'MAHONEY on the Appropriations Committee for many years. It is true that during the past few years he has not been a member of that committee, but I recall a decade or so ago when he rendered outstanding service in helping to draft the appropriation measures providing funds for the operation of the Federal Government.

Although I did not always agree with the Senator from Wyoming on appropriation items, I always recognized him as a champion of the interests of the West in all of the varied programs.

Mr. President, I also recall, back in 1936 or 1937, that the Wyoming Senator was intimately associated with the late Senator Borah of Idaho in their joint efforts to prevent the so-called court packing. At that time, of course, it was quite difficult for the Senator from Wyoming, being a Democrat, to oppose his Democratic President and leader. However, he received wide acclaim at that time because of the dauntless courage and indomitable determination he displayed in preventing what he considered to be a serious threat to the Supreme Court and to constitutional government.

I am sure that the Senator from Wyoming has made a wise personal decision in announcing his retirement. He is deserving of many years of leisure. I extend to him my own best wishes and the best wishes of the people of Idaho for health and happiness in his years of retirement. This felicitation also includes Mrs. O'Mahoney, who has so ably assisted him throughout his many years of public service.

Mr. MUSKIE. Mr. President, I would like to add a word of tribute to the distinguished senior Senator from Wyoming. I am sure that all of us are moved by mixed emotions on this occasion. We are proud to have been associated with a man who has been a Member of every Congress, beginning with the 73d, and who has for more than a quarter of a century devoted his exceptional talents to the work of the Senate. At the same time, we are deeply saddened to realize that his retirement from active public service draws near. The West, of course, has a special claim upon the distinguished Senator from Wyoming but, as a New Englander, let me say that we too would want to emphasize his birth in Chelsea, Mass., and his early education in that State before he went West as a young man. I had admired Senator O'MAHONEY at a distance for many years and appreciated his great qualities of leadership and statesmanship. As a new Member of the Senate in the 86th Congress, I have had the opportunity to know his warm personal qualities and his generous and sympathetic nature. In looking back upon a lifetime, rich in achievement and in contributions to the common welfare of our great Nation, Senator O'MAHONEY can be justly proud, as we are proud to be associated with him.

Mr. YARBOROUGH. Mr. President, when the retirement was announced of the distinguished senior Senator from Wyoming, I spoke at length in recognition of his invaluable contribution to the American way of life, and expressed my sincere regret that time and circumstances have caused him to decide that he should not continue his service in the Senate beyond his current term. My remarks appear at page 10306 of the RECORD of May 13, 1960, under the heading "JOSEPH C. O'MAHONEY: Wyoming's Great Senator."

Mr. President, all of us in the Senate recognize that the able and distinguished senior Senator from Wyoming is the outstanding constitutional lawyer of the Senate, and well qualified, in my opinion, to grace the highest Court of this land, and he has been so qualified for many years. He would have been an ornament to the highest Court in our land, just as he has been an ornament to the Senate in the great constitutional debates which have taken place in the Senate.

In my remarks of May 13 I pointed out the great bond of the cultural background that binds the people of Wyoming to the people of Texas. One year after the Civil War the Texas cattle herds were pointed north, and by 1868 they were in Wyoming, at a time when Wyoming had a population of less than 10,000. The longhorn cattle there helped to furnish labor for the many people who moved in. There resulted a blended population which came from the North and Southwest and South, and the older sections of the country. As a result there came into being a new, vigorous State, typified by the dynamic leaders which the people of Wyoming have sent to Congress year after year.

I have already referred to one of the Texans, John Benjamin Kendrick, who as a young man of 22 was one of the cowboys who followed a herd of cattle to Wyoming. He grew up 20 miles from where I was reared in east Texas. He was one of Wyoming's great triumvirate of Senators—Frances E. Warren, John B. Kendrick, and Joseph C. O'Mahoney.

In Senator O'MAHONEY's leaving the Senate, the Senate is losing one of its real treasures and one of the gems of its history. All the people of my State regret your leaving, Senator O'MAHONEY. All of us here have been proud, as all in my State have been proud, of what you brought to us in legal learning and constitutional knowledge. You have established a record of service in the Senate that will live as long as the history of the Senate lives.

Mr. STENNIS. Mr. President, Senator O'MAHONEY's decision to retire from the Senate is a cause of sadness to all of us. For more than 25 years, his service here has been that of a loyal friend, faithful steward, and eminent constitutionalist.

His grasp of national problems and his relentless efforts to solve these problems in the best possible way has made America stronger, and a better place to live.

The opportunities for independent business, the fertile valleys of the West which replaced desert wastes, improved management of our natural resources, and preservation of the sacred right of trial by jury all bear testimony to his long career of devoted and constructive service. The fruits of his efforts here will be enjoyed and appreciated by Americans in the ages to come.

We here in the Senate share the affection the people of Wyoming have demonstrated for this great statesman. We will miss him; his friendly counsel, his friendly association, and his sincere dedication to great causes.

Certainly we wish for him the fullest happiness in years to come: a restoration to full health, an opportunity to reflect on his magnificent career, and the secure knowledge that the best wishes and prayers of his colleagues follow him always.

Mr. CANNON. Mr. President, when the distinguished Senator from Wyoming, Mr. O'MAHONEY, announced that he will retire at the end of his present term and thus end one of the most outstanding 25 years of service in national affairs, I was filled with a sense of personal loss.

As one who has been a Member of this body for nearly 2 years, I felt the warmth of his friendship and the willingness with which he distributed his wisdom to those of us who have been comparatively recent arrivals to the Senate.

No greater tribute can come to any man than the tribute of the record he himself compiled in national affairs for a quarter century.

Some of the great milestones in legislation are embodied in his long and successful battle against monopolies, which have had the effect of stifling much of our business activity. I wish to assure Senator O'MAHONEY that I and others in the Senate will continue the battle that he nobly initiated against the monopolies and for independent business.

There is another field in which the distinguished Senator from Wyoming compiled an enviable record of direct interest to the people of my State. I refer to his far-reaching program for the development of our rivers, for the conservation of our precious supplies of water, and for the reclamation of our desert wastelands.

Throughout his long career, his policies were always within the framework of the document that he loved, respected, and lived by—the Constitution of the United States.

Senator O'MAHONEY's monumental work in this Senate will never be forgotten. I join in the genuine expression that has already been stated by my colleagues who spoke of this great man. The expression that his spirit will continue in this Chamber, and his example will inspire those who are to follow him.

My wish is for Senator O'MAHONEY to enjoy in happiness and contentment the feeling of achievement in the comparative quiet of the years that are ahead of him. But I am sure that his sagacious counsel and vast experience and information will be made available to us even through the good Senator's retirement.

He is a credit to his State and to his Nation, and Senator O'MAHONEY's patriotism and dedication will long remain and be respected.

Mr. LONG of Hawaii. Mr. President, it is a great privilege to be associated with the distinguished Senators who have been paying tribute to the senior Senator from Wyoming, JOSEPH O'MAHONEY, who has announced that he will not seek reelection to this body.

Outside of the State of Wyoming, I am confident that the people of no other State will receive this news with greater regret than the citizens of Hawaii. They have reason for their expressions of regret and also appreciation for Senator O'MAHONEY, both as a man and as

a public official. No other Member of the Senate developed a greater understanding of the people of Hawaii nor a greater appreciation of their qualities and worth in relation to their devotion to American institutions and the American way of life.

Senator O'MAHONEY first visited Hawaii in 1937. That was 23 years ago. On that visit, he showed clearly his belief that the only basis on which a territory could be considered for statehood was the kind of people that make up its citizenry. Doubtless, he was just as much intrigued by the scenic beauty of Hawaii as other visitors. I am certain that with his great interest in economy, he recognized the possibilities of Hawaii in relation to commerce and trade.

He was among the first, however, to say that Hawaii's real greatness would never be measured in terms of natural resources and wealth, but rather in terms of a people who have demonstrated to the world that men and women of different cultural and racial backgrounds, of varying hopes and aspirations, could live together with complete understanding and work cooperatively on desirable community goals. This was the thought he most often expressed on that first visit and through a long period of years he never ceased talking about it.

It was because of this conviction that during the next 23 years he worked, in season and out of season, for statehood. As chairman of the Committee on Interior and Insular Affairs, he spent long hours planning the several hearings that were held on statehood. He gathered all available information and, with a skill and logic unsurpassed, he wove an argument for statehood that ultimately could not be rejected.

He persisted in this course until that day of March 12, 1959, when the Senate, by a vote of 76 to 15, granted statehood to Hawaii as the 50th State of the Union. For this the people of Hawaii will forever be grateful.

When an ordinary worker leaves his job, there is always someone to pick up where he left off. His place can be taken. This is not so with the poet, the painter, the sculptor, the musician, or any leader who is really creative.

Senator O'MAHONEY is leaving this body. There will be another Senator elected to represent his beloved State in the Senate of the United States, but there is no one who can take his place. Every one of his colleagues will be aware of a loss sustained. We are reconciled at this time, however, by the thought that we will have happy memories of our association with him. His influence will continue to be a constructive force in the life of the Nation.

Mr. McGEE. Mr. President, in concluding these reflections this afternoon, I think it is significant that our colleagues here have recounted with a personal touch, with the warmth of personal memory, the contributions that Senator JOSEPH C. O'MAHONEY has made to all. But I say, my colleagues, that these are contributions that are not alone for now. These landmarks of the pages of our country's history for the past quarter of a century are the guideposts that will steer us unerringly in the days ahead. And that to me is the great debt that we owe to my beloved senior colleague and my dearest friend, Senator JOSEPH C. O'MAHONEY.

Senator JOE, I wonder if you would like to have the floor at this moment.

Mr. O'MAHONEY. Mr. President——

The PRESIDING OFFICER (Mr. LUSK in the chair). The Chair is privileged to recognize the senior Senator from Wyoming.

Mr. O'MAHONEY. It may be appropriate for me to state for the record the remarkable coincidence that today is the 11th month after my suffering the stroke which took me to the naval hospital. Eleven months ago today I was taken into that hospital, utterly unable to stand or to use any part of my left side. I have made great progress, but it is that fact which has compelled me to make the decision which my colleagues have mentioned here today.

My heart is full of gratitude for what has been said by my junior colleague, Senator McGEE, of Wyoming, and by all the other Senators who have joined him on this occasion. I know very well, of course, that it is all beyond my deserts. I know how generous my colleagues have been, and I do appreciate it.

However, I want the record to show that I recognize the services I have had from a great staff. From the very beginning of my services in the Senate, when the late Julian Snow was my secretary, I have been surrounded by men and women who have loyally, intelligently, and devotedly served the ends of that office.

Today my administrative assistant, Mr. Mike Manatos, is the president of all the administrative assistants in the Senate. My legislative assistant, Mr. Jerry O'Callaghan, has been of immeasurable help to me in various committee work. I also wish to pay tribute to my personal secretary, Miss Marie Mathew; my press secretary, Mrs. Louise Love; and the other members of my staff, including Miss Mary Ann Ellis, of Sheridan, Wyo., Mrs. Mabelle Knight, Mrs. Betty Turk, and Miss Mary Normington.

I want my colleagues to know that I thank them most sincerely for this memorable occasion, which, of course, I can never forget.

Mr. McGEE. Mr. President, I yield the floor.

EXHIBIT 1

[From the Wyoming State Tribune, May 11, 1960]

MAY HAPPINESS HOLD HIM FAST

Few Wyoming men achieve national importance, countrywide impact, and influence.

JOSEPH C. O'MAHONEY did, in a Senate career which now encompasses more than a quarter of a century. The doing has redounded to the imposing benefit of Wyoming and the West.

Dignity and decision, O'MAHONEY character hallmarks, highlight his just-disclosed decision not to stand for reelection in 1960.

He said, in about so many words, that his ability to serve has been mitigated by reasons of health. (The Senator suffered a stroke nearly a year ago, from which he is effecting remarkable recovery.)

Senator O'MAHONEY left us to understand (and this is what we would have expected from him) that he will not compromise the public entitlement to complete effort, particularly in an arena of public service as eminent as the U.S. Senate.

Readers do not have to be told that this column has often and over many years contested with Senator O'MAHONEY on political ways and means. Honest conviction has prevailed and we are confident that mutual respect has not been eroded. The record of what we are talking about attests (above all else from where we sit) the Senator's formidability.

We praise Senator O'MAHONEY because, as it is said, he's got it coming.

Although born to Massachusetts, he is of and for Wyoming.

His talents, tailormade for Senate service, are immense. What has been going on between O'MAHONEY and the Senate is a love affair. One gauging it that way (a proper view) realizes just how difficult it will be for the Senator to move to the gallery of ex-Senators.

But move he will. The moment will be sad, historic, and regrettable. It will close a Wyoming political era. (Wyoming has given longer Senate tenure to but one other, the late Francis E. Warren, also of Cheyenne, whose more than 37 years service is a Senate record.)

The praise and tribute going out to Senator O'MAHONEY, from all parts of Wyoming, is warm, sincere, and bipartisan.

The hope of all is that good health will return to and abide with him, that happiness will hold him fast.

[From the Laramie (Wyo.) Boomerang, May 11, 1960]

WHEN THE PEOPLE WERE INVOLVED

The term "statesman" is one of the most overworked in our modern vocabularies, but certainly it applies to Senator JOSEPH C. O'MAHONEY who announced this week that he would not seek reelection.

There are many terms that apply to Wyoming's senior Senator: "scholar," "friend of the people," "spokesman for Wyoming," "attorney," "legislator," etc.

This man of many talents and a vast array of accomplishments has represented Wyoming and its people well. He is highly respected by his colleagues and in the area of monopoly law and in matters concerning water rights.

It will be a long time before Wyoming is represented by a man of his stature, courage, and intelligence. He operated within a firm code of morals and ethics. He was highly articulate in explaining that code in relation to issues.

He was even more articulate, if that is possible, in carrying Wyoming's story to all the Nation.

How do you tell such a man that his service is appreciated, that his courage is admired, that his works are the pattern for future generations?

Senator O'MAHONEY would be the first to turn from flowery praise. But some of the more blunt expressions which we use might not find favor either.

The best way we can think of putting it is like this: When the people were involved, as they are in just about everything, Senator O'MAHONEY was their spokesman—able, mature, and convincing.

We owe a lot to Senator O'MAHONEY. His type of lawmaker is all too rare. We hope the pattern hasn't been lost, because we need men like him in these times.

[From the Salt Lake Tribune, May 11, 1960]

CHAMPION OF THE WEST

If reports on his health are accurate, the decision of U.S. Senator JOSEPH C. O'MAHONEY, Democrat, of Wyoming, not to seek reelection is a wise one. It is characteristic of the sober judgment of the 75-year-old lawyer-lawmaker who suffered a stroke about

a year ago. Although he has partially recovered, his health and that of his wife, who has had two strokes, is not good. Because of his tendency to push himself to the limit, his decision to retire well could prolong his life.

Senator O'MAHONEY's record in Congress is one of which the Nation and particularly the Intermountain West can be proud. Brilliant, articulate and forceful, he has worked hard for reclamation, wool, public land, and other programs he believed were for the benefit of the intermountain region. He was a stanch Democrat, but on many occasions demonstrated dramatically that he wore no man's collar. One was his vigorous fight against President Roosevelt's "court packing" attempts in 1937 and another was his long-term effort to cut waste in Government spending and to strengthen the economic welfare of the country.

O'MAHONEY, formerly a Cheyenne newspaper editor, went to Washington first in 1917 as secretary to Wyoming's late great Senator Kendrick. He was named First Assistant Postmaster General in 1933, but Senator Kendrick suddenly died that year and O'MAHONEY was named to succeed him. O'MAHONEY was in the Senate continuously for 19 years but was beaten in 1952 by the combination of the Eisenhower sweep and Republican Frank Barrett, vigorous spokesman for livestock and allied interests. He surprised the experts and staged a comeback in 1954. That term expires this year.

The voluminous report of the Joint Economic Committee, which he headed for years, is just one of the many monuments to Senator O'MAHONEY. The Tribune joins in paying tribute to a gentleman of integrity and stature, a forceful spokesman for the West.

[From the Rocky Mountain News, Denver Colo., May 11, 1960]

A BIG CHANGE FOR WYOMING

(By Pasquale Marranzino)

U.S. Senator JOSEPH O'MAHONEY sent word to his Wyoming constituency that he is hanging up his gloves and will not seek reelection.

The news isn't surprising, but it comes as a disappointing change to Wyoming Democrats who have been voting for the craggy-faced, bushy-browed Senator since 1933.

Only once in that interim, 1952–54, did the colorful lawyer fail in his bid to go to Washington as Senator, swamped in the overwhelming GOP victory that brought Frank Barrett into office.

His impressive career was halted last June in the midst of a typical O'MAHONEY battle. He led the forces that successfully opposed the nomination of Lewis L. Strauss as commerce Secretary. Weary from days of testifying and speaking against the nomination, O'MAHONEY collapsed as he left the Senate floor, a victim of a stroke.

Even though the stroke kept him bedridden for months, it couldn't lick JOE. He made an amazing recovery and continued his work from his hospital bed by telephone and in consultation with his staff and colleagues.

JOE's most brilliant and possibly one of the most vital coups for the commonweal—came in those days of the Roosevelt administration when the Wyoming Senator led the fight to keep intact the size of the U.S. Supreme Court. FDR, who had hoped to enlarge the court and pack it with birds of his feather, broke his party pick on JOE's stubborn opposition.

This break with FDR was made after considerable wrestling with the O'MAHONEY conscience. He had been one of the first New Dealers. He helped write the Democratic platform that carried Mr. Roosevelt into power. And he was rewarded with the first Assistant Postmaster General job in that first administration.

The 75-year-old Senator has Colorado roots. He was born in Massachusetts and came West in 1908 to Boulder. There he worked on a Boulder newspaper as city editor and also was a correspondent for the Rocky Mountain News and the Associated Press. He left Boulder in 1916 to go to work for a Cheyenne paper owned by the late Gov. John B. Kendrick.

His newspapering was interrupted when Kendrick ran for the Senate, JOE serving as campaign manager and secretary. He went to Washington with the successful Kendrick as secretary. When Kendrick died in 1934, O'MAHONEY was named to the job.

Although JOE's close New Deal associations made him a national power, he never placed the good of the West in second spot.

He battled for reclamation, for rural electrification, for domestic wool, for the farmer and rancher and for more water to irrigate more acres and help his arid State.

In recent years he has been a thorn in the side of the Eisenhower administration. Although a New Dealer, he didn't have the New Deal propensity for big spending. He was tightfisted with the dollar and kept hammering away at inflation, high prices and Government participation in private industry through foreign deals.

He probed the national oil import program and suggested that the administration quit having the big oil companies formulate foreign policy. He was an ardent supporter of the antitrust laws, asking for crackdowns on meatpackers, insurance companies, and monopolies.

He has served long and well and with devotion to the West. Retirement for JOE will be rough, but we expect he still will remain the No. 1 Democrat in Wyoming.

[From the Cheyenne (Wyo.) Eagle, May 11, 1960]

HIS RECORD WILL STAND

When Senator JOSEPH C. O'MAHONEY lost his bid for reelection in 1952, an editorial writer for a Denver newspaper said:

"The empire's biggest loss and perhaps the country's was that of Senator O'MAHONEY, of Wyoming, a statesman of national stature who never forgot the home folks."

Two years later, the citizens of Wyoming paid O'MAHONEY one of the highest tributes ever paid to a former public official. They insisted, through a tremendous, statewide draft movement, that he give up his law practice and run for the U.S. Senate again. He finally bowed to their wishes and agreed to run, and the voters returned him to the Senate where he belonged.

Although technically he went to Washington in January, 1955, as the junior Senator from Wyoming, he was not treated as such. Because of his 19 years in the Senate before his 1952 defeat and because of the stature he had attained during those years, he was given important committee assignments and his counsel was sought on many subjects.

Senator O'MAHONEY, of Wyoming, took up right where he had left off—as a statesman of national stature and a champion of the Rocky Mountain West.

Now, 8 years and hundreds of accomplishments after that 1952 election defeat, it appears that Wyoming, the West, and the Nation are going to have to do without the services of Senator O'MAHONEY.

In a letter to Democratic Party officials, convened in State convention at Thermopolis Monday, the Senator said he would not file for reelection.

And that was bad news for everyone. For many, many persons agreed that even at the age of 75 and in spite of his stroke a year ago he was a more effective U.S. Senator than most. In fact, it was said that even while he was in the hospital, operating by telephone and through his staff, he got things done more effectively than most Senators operating within the Senate Chamber.

Many believe he could have won reelection again this year, even with a minimum of campaigning.

But the decision was his, and he based it upon his own health and the health of Mrs. O'Mahoney, who also suffered a stroke 2 years ago.

In his letter to Thermopolis, the Senator reminded he told the people of Wyoming in 1954, when he agreed to run again, that he would not be a candidate for reelection.

"I have kept the faith with the people of Wyoming," he wrote. And indeed he has—for 25 long years.

For a quarter of a century, Senator O'MAHONEY has given his time and energy to the welfare of the people of Wyoming, the West, and the Nation, with Mrs. O'Mahoney always at his side.

He and Mrs. O'Mahoney richly deserve the many years of leisure and happiness their thousands and thousands of friends wish them.

Senator O'MAHONEY's presence on the floor of the U.S. Senate will be sorely missed. But his record will stand in history—a challenge to all future Senators from Wyoming.

Because he is a leader, the Senator undoubtedly will remain in the limelight of State and National Government and politics. And he and Mrs. O'Mahoney most certainly will remain very much in the hearts of Wyoming citizens.

[From the Washington (D.C.) Star, May 18, 1960]

HAIL AND FAREWELL

An impressive record of service to the Nation and to their party has been written by three veteran Democratic Senators who have announced their intention of not seeking re-election this year. It is a record that goes back to the middle 1930's, to the years when the New Deal of President Franklin D. Roosevelt was changing the course of the country's social and political history. Each of the trio now retiring—Senators GREEN of Rhode Island, MURRAY of Montana, and O'MAHONEY of Wyoming—first took his place in the Senate Chamber during that momentous period. In the years since, each has spoken with a strong and influential voice in the Nation's affairs and in Democratic Party councils.

Among them, Senator GREEN at 92 is the oldest and is, in fact, the oldest man ever to serve in either branch of Congress. Many years of Democratic Party activity, including two terms as Governor of his State, preceded Mr. GREEN's election to the Senate in 1936. In his four terms here, this Rhode Islander of Colonial Yankee ancestry has become identified as a "loyal liberal" on domestic legislative issues and an internationalist on foreign policy. When the 86th Congress organized last year, Mr. GREEN stepped aside as chairman of the Foreign Relations Committee but retained a place in that group as well as in the Rules Committee. He is still chairman of the Joint Committee on the Library and a member of the Senate Democratic Policy Committee.

At 83, Mr. MURRAY is junior in age among Senators only to Mr. GREEN. First elected to the Senate in 1934, the Montanan has directed his attention mostly to matters in the jurisdiction of the Interior and Labor Committees. He is a member of both and chairman of the former, as well as being a member also of the Policy Committee. His claim to liberalism in social legislation is a valid one.

Mr. O'MAHONEY, now 75, came to Washington first on the staff of the late Senator Kendrick of Wyoming and returned as Assistant Postmaster General under President Roosevelt. In 1933, he was appointed to

complete the unexpired term of Senator Kendrick and was elected in his own right in 1934. He was defeated in 1952, but was elected again in 1954. His present committee assignments—Interior, Judiciary, and Joint Economic—reflect his principal legislative interests. An effective orator and popular with his colleagues, Mr. O'MAHONEY was one of the "workhorses" of the Senate in earlier years.

Those who follow the Senate most closely will miss this threesome on the Democratic side of the aisle.

[From the Cheyenne (Wyo.) Eagle, May 10, 1960]

O'MAHONEY HAS LONG OUTSTANDING RECORD AS U.S. SENATOR

(By Bernard Horton)

When Wyoming's Senator JOSEPH C. O'MAHONEY leaves his office next January, he will be ringing down the curtain on one of the most outstanding public service careers in the history of Wyoming.

His loss will be felt throughout the Nation—and particularly in Wyoming and the West. For this State and the entire Rocky Mountain West have never had a greater champion in any capacity in Washington.

At the end of this year, when his current 6-year term expires, the Senator will have served 25 years as Senator from Wyoming. During that time, he has gained a stature equalled by very few Senators, indeed.

O'MAHONEY was city editor of the Cheyenne State Leader from 1916 to 1920, when he entered law practice.

In March 1933 he was appointed first assistant postmaster general, and in December that same year, he was appointed by then Gov. Leslie A. Miller to fill the vacancy in the U.S. Senate caused by the death of John B. Kendrick.

On November 6, 1934, he was elected to both the unexpired term, ending January 3, 1935, and the full term ending January 3, 1941.

He was reelected November 5, 1940, and again on November 5, 1946.

He lost his bid for reelection in 1952, but 2 years later he submitted to a statewide draft movement and ran for U.S. Senator again. And this time, too, he ran for both a short term, to fill the unexpired term of the late Senator Lester C. Hunt, and the full, 6-year term. He won both, and by virtue of the short term he served in the only Congress he might have missed since 1933.

When he was defeated in 1952, he was one of the most powerful Members in the entire U.S. Congress by virtue of his 19 years of seniority in the Senate.

He had won recognition far and wide as a statesman and champion of western development.

In 1952, for instance, the National Wool Growers Association gave him the title of "Mr. Wool" because of his tireless efforts in behalf of the domestic wool industry.

And it was he who, in 1950, secured legislation establishing a national forestry advisory board of appeals, to which livestockmen might appeal controversies which might arise in connection with the grazing of livestock in national forests.

When former Secretary of the Interior Oscar L. Chapman announced his approval of the $15 million trona project in Sweetwater County as a defense project, he gave O'MAHONEY full credit for gaining that approval.

It was O'MAHONEY who brought about the establishment of the alumina plant at Laramie during World War II.

Many times, he has been credited with saving Warren Air Force Base for Cheyenne, for he recognized its economic value to Cheyenne and Wyoming and the function it could serve for the entire Nation.

He has championed Wyoming's sugar beet industry. In 1952, an article in the Mountain States Beet Growers magazine paid him this tribute:

"The sugar industry, and sugar beet growers in particular, have always known the Senator to be one of the most sincere and helpful protagonists of the western sugar beet industry. He has never failed in championing the cause that has brought the sugar beet to a position of national prominence in our economy."

He has always been popular with labor circles because of his philosophy that "the prosperity of this Nation and all its people depends on full employment at good wages."

He has long been recognized as a leader in national and international affairs, and he has been particularly recognized for his leadership in the field of national defense.

In 1952, he was named Aviation's Man of the Year for his leadership in contributing to a strong and more efficient airpower program for America.

Always he has been strong for clean and honest government. In 1951 he procured passage of an amendment to the Defense Appropriations Act which provides for the cancellation of any procurement contract for the armed services if the contractor gives or offers to give any gratuity to any procurement officer or employee of the Armed Forces.

But those are just a few of the accomplishments for which he is recognized.

When Senator O'MAHONEY returned to the Senate in January 1955, after a 2-year absence, he was not looked upon as a freshman Senator, which technically, he was. He was given important committee assignments and his counsel was sought.

Right now he is a member of the Interior and Insular Affairs Committee, the Senate Judiciary Committee, and the Joint Economic Committee—all powerful groups.

When he bowed to the statewide draft movement in 1954, and became a candidate for the Senate, he said:

"The people, however, are entitled to a frank expression of the principles which guide me.

"1. I shall not be a candidate for reelection.

"2. No voter has ever heard my voice in personal attack upon any opponent, nor will any hear it so raised in this campaign.

"3. I have no personal nor partisan objective to serve and I pledge all the people that I shall labor for only those causes which in my judgment are for the public good."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 9862) to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLS, Mr. FORAND, Mr. KING of California, Mr. MASON, and Mr. BYRNES of Wisconsin were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H.R. 4029) to amend the Internal Revenue Code of 1954 to eliminate the proration of the occupational tax on persons dealing in machineguns and certain other firearms, to reduce occupational and transfer taxes on certain weapons, to make the transferor and transferee jointly liable for the transfer tax on firearms, and to make certain changes in the definition of a firearm.

The message further announced that the House had severally agreed to the amendments of the Senate to the following bills of the House:

H.R. 6482. An act relating to the credits against the unemployment tax in the case of merged corporations;

H.R. 6779. An act to amend section 170 of the Internal Revenue Code of 1954 (relating to the unlimited deduction for charitable contributions for certain individuals); and

H.R. 9308. An act to extend for 3 years the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory.

The message also announced that the House had passed a bill (H.R. 5) to amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 5) to amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance, was read twice by its title and referred to the Committee on Finance.

RECONNAISSANCE SATELLITES

Mr. JACKSON. Mr. President, the summit conference is over. Its collapse has wrecked any hope of an early thawing of the cold war.

One thing is already clear. Mr. Khrushchev overplayed his hand. He left Moscow planning to split the free world asunder; he is returning to Moscow with the free world more united than before. His was the failure of a mission.

A second thing is clear: The unfortunate U–2 incident did not itself cause the collapse of the Paris meeting. It was merely the excuse Mr. Khrushchev seized upon to torpedo the conference.

I grant that the Kremlin leaders, with their Iron Curtain mentality, may be ultrasensitive about incursions into the air space over the Soviet Union. Yet Mr. Khrushchev's treatment of the U–2 flights was cynical in the extreme. He has tried to create the impression that an end to the U–2 flights would suffice to end the problem of aerial intelligence gathering. He knows better. He knows that both his scientists and our scientists are working around the clock to develop a reconnaissance satellite. The time is drawing close when the first model of such a satellite can be launched.

Mr. President, Senators are no doubt familiar with the revolutionary importance of the reconnaissance satellite. It will be equipped with cameras of incredible precision and other information-gathering and transmitting instruments. As an information-gathering device, it

will ultimately compare in efficiency to the U–2 as a modern jetplane compares to Kitty Hawk.

It will eventually be possible to manufacture these reconnaissance satellites in great numbers. Their orbits will crisscross over every portion of the earth's surface.

The reconnaissance satellite means that the age of the Iron Curtain is drawing to a close. It will soon go the way of the Great Wall of China.

What are we going to do about it? Think back 15 years ago when we first grappled with the political problems created by the atomic bomb. We took the right and proper course. We offered, subject to safeguards of elementary prudence, to place our atomic stockpile under United Nations stewardship. Only Soviet intransigence kept that program from being adopted.

There is only one military reason why we are developing the satellite—to safeguard our country and our free world partners from surprise attack. We ask nothing of other nations that we are not willing to do ourselves.

The reconnaissance satellite now gives our Nation another chance to act as a responsible member of the world community.

Mr. President, I have written to President Eisenhower, formally recommending that, subject to necessary safeguards, we offer to place our reconnaissance satellites at the service of the United Nations as a part of an international inspection program designed to prevent nuclear Pearl Harbors for any nation. If accepted, this offer would help to lay the groundwork for the beginnings of an enforceable disarmament program.

I have also respectfully suggested to the President that we now reappraise our technical program for achieving the first reconnaissance satellite, toward the end of getting in the sky at the earliest possible date.

Mr. Khrushchev can have no rational objection to such a move. After all, the Soviet Union, with its first sputnik, was the first to fly over the air space of other nations.

A still more important point. There is now growing reason to suspect that a man may be sitting in the Soviet spaceship circling the globe at this very minute and that the Soviets may very shortly attempt to return this man—alive—to earth.

Mr. President, it is our duty to build the armaments needed for our survival. But it is also our duty to do everything within our power to put the instruments of science and technology under effective international control. One great move in this direction would be to establish an international program for guarding against surprise attacks. The reconnaissance satellite will give us a chance to start such a program. Let us seize that chance.

CONSTRUCTION OF SAN LUIS UNIT, CENTRAL VALLEY PROJECT, CALIFORNIA

Mr. ANDERSON. Mr. President, I ask that the Presiding Officer lay before the Senate the amendment of the House of Representatives to S. 44.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 44) to authorize the Secretary of the Interior to construct the San Luis unit of the Central Valley project, California, to enter into an agreement with the State of California with respect to the construction and operation of such unit, and for other purposes, which was, to strike out all after the enacting clause and insert:

SECTION 1. (a) That for the principal purpose of furnishing water for the irrigation of approximately five hundred thousand acres of land in Merced, Fresno, and Kings Counties, California, hereinafter referred to as Federal San Luis unit service area, and as incidents thereto of furnishing water for municipal and domestic use and providing recreation and fish and wildlife benefits, the Secretary of the Interior (hereinafter referred to as the Secretary) is authorized to construct, operate, and maintain the San Luis unit as an integral part of the Central Valley project. The principal engineering features of said unit shall be a dam and reservoir at or near the San Luis site, a forebay and afterbay, the San Luis Canal, the Pleasant Valley Canal, and necessary pumping plants, distribution systems, drains, channels, levees, flood works, and related facilities, but no facilities shall be constructed for electric transmission or distribution service which the Secretary determines, on the basis of an offer of a firm fifty-year contract from a local public or private agency, can through such contract be obtained at less cost to the Federal Government than by construction and operation of Government facilities. The works (hereinafter referred to as joint-use facilities) for joint use with the State of California (hereinafter referred to as the State) shall be the dam and reservoir at or near the San Luis site, forebay and afterbay, pumping plants, and the San Luis Canal. The joint-use facilities consisting of the dam and reservoir shall be constructed, and other joint-use facilities may be constructed, so as to permit future expansion; or the joint-use facilities shall be constructed initially to the capacities necessary to serve both the Federal San Luis unit service area and the State's service area, as hereinafter provided. In constructing, operating, and maintaining the San Luis unit, the Secretary shall be governed by the Federal reclamation laws (Act of June 17, 1902 (32 Stat. 388), and Acts amendatory thereof or supplementary thereto). Construction of the San Luis unit shall not be commenced until the Secretary has (1) secured, or has satisfactory assurance of his ability to secure, all rights to the use of water which are necessary to carry out the purposes of the unit and the terms and conditions of this Act, and (2) received satisfactory assurance from the State of California that it will make provision for a master drainage outlet and disposal channel for the San Joaquin Valley, as generally outlined in the California water plan Bulletin Numbered 3, of the California Department of Water Resources, which will adequately serve, by connection therewith, the drainage system for the San Luis unit or has made provision for constructing the San Luis interceptor drain to the delta designed to meet the drainage requirements of the San Luis unit as generally outlined in the report of the Department of the Interior, entitled "San Luis Unit, Central Valley Project," dated December 17, 1956.

(b) No water provided by the Federal San Luis unit shall be delivered in the Federal San Luis service area to any water user for the production on newly irrigated lands of any basic agricultural commodity, as defined in the Agricultural Act of 1949, or any amendment thereof, if the total supply of such commodity as estimated by the Secretary of Agriculture for the marketing year in which the bulk of the crop would normally be marketed and which will be in excess of the normal supply as defined in section 301(b)(10) of the Agricultural Adjustment Act of 1938, as amended, unless the Secretary calls for an increase in production of such commodity in the interest of national security.

SEC. 2. The Secretary is authorized, on behalf of the United States, to negotiate and enter into an agreement with the State of California providing for coordinated operation of the San Luis unit, including the joint-use facilities, in order that the State may, without cost to the United States, deliver water in service areas outside the Federal San Luis unit service area as described in the report of the Department of the Interior, entitled "San Luis Unit, Central Valley Project", dated December 17, 1956. Said agreement shall recite that the liability of the United States thereunder is contingent upon the availability of appropriations to carry out its obligations under the same. No funds shall be appropriated to commence construction of the San Luis unit under any such agreement, except for the preparation of designs and specifications and other preliminary work, prior to ninety calendar days (which ninety days, however, shall not include days on which either the House of Representatives or the Senate is not in session because of an adjournment of more than three calendar days to a day certain) after it has been submitted to the Congress, and then only if either the House nor the Senate Interior and Insular Affairs Committee has disapproved it by committee resolution within said ninety days. If such an agreement has not been executed by January 1, 1962, and if, after consultation with the Governor of the State, the Secretary determines that the prospects of reaching accord on the terms thereof are not reasonably firm, he may proceed to construct and operate the San Luis unit in accordance with section 1 of this Act: *Provided*, That, if the Secretary so determines, he shall report thereon to the Congress and shall not commence construction for ninety calendar days from the date of his report (which ninety days, however, shall not include days on which either the House of Representatives or the Senate is not in session because of an adjournment of more than three days). In considering the prospects of reaching accord on the terms of the agreement the Secretary shall give substantial weight to any relevant affirmative action theretofore taken by the State, including the enactment of State legislation authorizing the State to acquire and convey to the United States title to lands to be used for the San Luis unit or assistance given by it in financing Federal design and construction of the unit. The authority conferred upon the Secretary by the first sentence of this section shall not, except as is otherwise provided in this section, be construed as a limitation upon the exercise by him of the authority conferred in section 1 of this Act, but if the State shall agree that, if it later enlarges the joint-use facilities, or any of them, it will pay an equitable share of the cost to the United States of those facilities as initially constructed before utilizing them for the storage or delivery of water and will bear the entire cost of enlarging the same and if, as a part of said equitable share, it makes available to the Secretary sufficient funds to pay the additional cost of designing and constructing the joint-use facilities so as to permit enlargement, it shall have an irrevocable right to enlarge or modify such facilities at any time in the future, and a perpetual right to the use of such additional capacity: *Provided*, That the performance of

such work by the State, after approval of its plans by the Secretary, shall be so carried on as not to interfere unduly with the operation of the project for the purposes set forth in section 1 of this Act and the use of the additional capacity for water service shall be limited to service outside of the Federal San Luis unit service area: *And provided further*, That this right may be relinquished by the State at any time at its option.

SEC. 3. The agreement between the United States and the State referred to in section 2 of this Act shall provide, among other things, that—

(a) the joint-use facilities to be constructed by the Secretary shall be so designed and constructed to such capacities and in such manner as to permit either (i) immediate integration and coordinated operation with the State's water projects by providing, among other things, a capacity in San Luis Reservoir of approximately two million one hundred thousand acre-feet and corresponding capacities in the other joint-use facilities or (ii) such subsequent enlargement or other modification as may be required for integration and coordinated operation therewith;

(b) the State shall make available to the Secretary during the construction period sufficient funds to pay an equitable share of the construction costs of any facilities designed and constructed as provided in paragraph (a) above. The State contribution shall be made in annual installments, each of which bears approximately the same ratio to total expenditures during that year as the total of the State's share bears to the total cost of the facilities; the State may make advances to the United States in order to maintain a timely construction schedule of the joint-use facilities and the works of the San Luis unit to be used by the State and the United States;

(c) the State may at any time after approval of its plans by the Secretary and at its own expense enlarge or modify San Luis Dam and Reservoir and other facilities to be used jointly by the State and the United States, but the performance of such work shall be so carried on as not to interfere unduly with the operation of the San Luis unit for the purposes set forth in section 1 of this Act;

(d) the United States and the State shall each pay annually an equitable share of the operation, maintenance, and replacement costs of the joint-use facilities;

(e) promptly after execution of this agreement between the Secretary and the State, and for the purpose of said agreement, the State shall convey to the United States title to any lands, easements, and rights-of-way which it then owns and which are required for the joint-use facilities. The State shall be given credit for the costs of these lands, easements, and rights-of-way toward its share of the construction cost of the joint-use facilities. The State shall likewise be given credit for any funds advanced by it to the Secretary for preparation of designs and specifications or for any other work in connection with the joint-use facilities;

(f) the rights to the use of capacities of the joint-use facilities of the San Luis unit shall be allocated to the United States and the State, respectively, in such manner as may be mutually agreed upon. The United States shall not be restricted in the exercise of its right so allocated, which shall be sufficient to carry out the purposes of section 1 of this Act and which shall extend throughout the repayment period and so long thereafter as title to the works remains in the United States. The State shall not be restricted in the exercise of its allocated right to the use of the capacities of the joint-use facilities for water service outside the Federal San Luis unit service area;

(g) the Secretary may turn over to the State the care, operation, and maintenance of any works of the San Luis unit which are used jointly by the United States and the State at such time and under such conditions as shall be agreed upon by the Secretary and the State;

(h) notwithstanding transfer of the care, operation, and maintenance of any works to the State, as hereinbefore provided, any organization which has theretofore entered into a contract with the United States under the Reclamation Project Act of 1939, and amendments thereto, for a water supply through the works of the San Luis unit, including joint-use facilities, shall continue to be subject to the same limitations and obligations and to have and to enjoy the same rights which it would have had under its contract with the United States and the provisions of paragraph (4) of section 1 of the Act of July 2, 1956 (70 Stat. 483, 43 U.S.C. 485h–1) in the absence of such transfer, and its enjoyment of such rights shall be without added cost or other detriment arising from such transfer;

(i) if a nonreimbursable allocation to the preservation and propagation of fish and wildlife has been made as provided in section 2 of the Act of August 14, 1946 (60 Stat. 1080, 16 U.S.C. 662), as amended, the features of the unit to which such allocation is attributable shall, notwithstanding transfer of the care, operation, and maintenance to the State, be operated and maintained in such wise as to retain the bases upon which such allocation is premised and, upon failure so to operate and maintain those features, the amount allocated thereto shall become a reimbursable cost to be paid by the State;

(j) the State shall not serve any lands within the Federal San Luis unit service area except as such service is required as a consequence of its acceptance of the care, operation, and maintenance of works under paragraph (g) of this section.

SEC. 4. If the Secretary proceeds to construct, operate, and maintain the San Luis works under the terms of section 1 of this Act solely as a Federal project, the operation shall be subject to the following restriction: Whenever the chlorides in the water at the head of the Delta-Mendota Canal exceed one hundred and fifty parts per million during the months of July, August, or September, the mean daily diversion from the Sacramento-San Joaquin Delta to San Luis unit via Tracy pumping plant and Delta-Mendota Canal as measured at the San Luis pumping plant shall not exceed the mean daily import to the Sacramento Valley from the Trinity project.

SEC. 5. In constructing, operating, and maintaining a drainage system for the San Luis unit, the Secretary is authorized to permit the use thereof by other parties under contracts the terms of which are as nearly similar as is practicable to those required by the Federal reclamation laws in the case of irrigation repayment or service contracts and is further authorized to enter into agreements and participate in construction and operation of drainage facilities designed to serve the general area of which the lands to be served by the San Luis unit are a part, to the extent the works authorized in section 1 of this Act contribute to drainage requirements of said area. The Secretary is also authorized to permit the use of the irrigation facilities of the San Luis unit, including its facilities for supplying pumping energy, under contracts entered into pursuant to section 1 of the Act of February 21, 1911 (36 Stat. 925; 43 U.S.C. 523).

SEC. 6. The Secretary is directed to plan the works authorized in this Act in such a manner as to contemplate and make possible the future provision of Central Valley project service, by way of the Pacheco Tunnel route, to lands and municipalities in Santa Clara, San Benito, Santa Cruz, and Monterey Counties heretofore anticipated as a possibility by the Acts of October 14, 1949 (63 Stat. 852) and August 27, 1958 (72 Stat. 937). Construction of additional works to provide such service shall not be undertaken until a report demonstrating their physical and economic feasibility has been completed, reviewed by the State, and approved by the Secretary, and the works have been authorized by Act of Congress.

SEC. 7. The Secretary is authorized, in connection with the San Luis unit, to construct minimum basic public recreational facilities and to arrange for the operation and maintenance of the same by the State or an appropriate local agency or organization. The cost of such facilities shall be nonreturnable and nonreimbursable under the Federal reclamation laws.

SEC. 8. There is hereby authorized to be appropriated for construction of the works of the San Luis unit, including joint-use facilities, authorized by this Act, other than distribution systems and drains, the sum of $290,430,000, plus such additional amount, if any, as may be required by reason of changes in costs of construction of the types involved in the San Luis unit as shown by engineering indexes. Said base sum of $290,430,000 shall, however, be diminished to the extent that the State makes funds or lands or interests in land available to the Secretary pursuant to sections 2 or 3 of this Act which decrease the costs which would be incurred if the works authorized in section 1 of this Act (including provision for their subsequent expansion) were constructed solely as a Federal project. There are also authorized to be appropriated, in addition thereto, such amounts as are required (a) for construction of such distribution systems and drains as are not constructed by local interests, but not to exceed in total cost the sum of $192,650,000, and (b) for operation and maintenance of the unit: *Provided*, That no funds shall be appropriated for construction of distribution systems and drains prior to ninety calendar days (which ninety days, however, shall not include days on which either the House of Representatives or the Senate is not in session because of an adjournment of more than three calendar days to a day certain) after a contract has been submitted to the Congress calling for complete repayment of the distribution systems and drains within a period of forty years from the date such works are placed in service. All moneys received by the Secretary from the State under this Act shall be covered into the same accounts as moneys appropriated hereunder and shall be available, without further appropriation, to carry out the purposes of this Act.

Mr. ANDERSON. Mr. President, I have only two or three very short comments to make. The Senators from California, I am sure, will desire to say a few words on this subject.

This is a project which I have personally inspected several times. It is a project on which the Committee on Interior and Insular Affairs worked at great length. The Subcommittee on Irrigation and Reclamation successfully recommended to the Senate favorable action upon the bill. The bill was passed by the Senate and was sent to the House of Representatives.

I am pleased the House has taken the action it has taken upon the bill. I have examined, I think carefully, all the House amendments. If I correctly interpret them, as I think they should be interpreted, I believe the House has improved the bill.

Therefore, I now move that the Senate concur in the House amendment to S. 44. I know the Senators from California will desire to express themselves upon this motion.

Mr. ENGLE and Mr. KUCHEL addressed the Chair.

Mr. ANDERSON. I yield first to the junior Senator from California [Mr. ENGLE].

Mr. ENGLE. Mr. President, I concur wholeheartedly in the statement made by the Senator from New Mexico. I agree that the House work upon this particular piece of proposed legislation has improved it. It is substantially the same bill which passed the Senate. The language is a little different. I would say it is only different in the sense that it is somewhat more precise than was the language we passed in the Senate. As a consequence, I agree it would be proper to concur in the amendment of the House.

Mr. President, I have gone over the amendments, as has the Senator from New Mexico, and as has, I believe, my senior colleague from California. I am sure my colleague agrees that the present provisions of the bill represent an improvement rather than the contrary, and that as a consequence no good purpose would be served by going to conference.

I express my appreciation to the Senator from New Mexico [Mr. ANDERSON] for his assistance in handling this proposed legislation. The Senator from New Mexico has been the chairman of the Subcommittee on Irrigation and Reclamation of the Senate Committee on Interior and Insular Affairs for a number of years. He was the chairman of that subcommittee during the time I was the chairman of the equivalent subcommittee in the House of Representatives. He was the chairman of that subcommittee during the time I was the chairman of the House Committee on Interior and Insular Affairs, at which time I had the privilege of working with the Senator on numerous western reclamation projects, including the upper Colorado Basin project.

Those of us from California, intensely interested as we are in water development, are deeply grateful not only to the Senator from New Mexico but also to his associates on the committee.

We are deeply grateful to the senior Senator from California, who has been a splendid leader in the water programs for the Far West, and also to the senior Senator from Montana [Mr. MURRAY].

Mr. President, I would not conclude my remarks without saying that we are very grateful indeed to the chairman of the House Committee on Interior and Insular Affairs, Representative WAYNE ASPINALL, of Colorado, who has been a constant friend of western reclamation during many years. Representative ASPINALL gave his tremendous and powerful support to this proposed legislation when it was before the House.

Our California colleague, Representative B. F. SISK, who is on the floor of the Senate with me today, is the author of this proposed legislation. To him we give great credit for his effort.

Mr. KUCHEL. Mr. President, a year ago the Senate passed Senate bill 44, introduced by my colleague from California [Mr. ENGLE] and myself. It has been described, accurately, I think, as one of the finest reclamation projects ever to come before a Congress. I am most grateful that the House saw fit to pass the bill earlier this week, with some amendments which I believe have improved the bill.

The legislation before us envisages a great storage reservoir to be constructed and used jointly by the Government of the United States and the Government of California. It will serve a Federal reclamation project on the one hand, subject to Federal reclamation law, and it will also serve a State project, the Feather River project, on the other hand, under State law. An expanded area of the Central Valley Project, a Federal reclamation project, will receive supplemental water in accordance with Federal statutes, and the lower San Joaquin valley and the parched areas of southern California will receive an additional water supply under State statutes.

I have before me a brief statement of the rather technical amendments which the House made in the bill, and I ask unanimous consent that the statement be printed in the RECORD at this point as a part of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DIFFERENCES BETWEEN HOUSE-PASSED SAN LUIS BILL AND S. 44 AS PASSED BY SENATE

(Page and line references are to printing of S. 44, as it was passed to the House of Representatives on May 14, 1959.)

1. On page 2, line 9, after "facilities," the House bill adds a prohibition against construction of electric transmission or distribution lines if the Secretary determines on the basis of a firm 50-year contract from a local public or private agency, that necessary power to operate San Luis can be obtained at less cost than by construction and operation of Federal facilities.

2. On page 3, lines 14, 15, and 16, there is a clarifying change in the House bill which merely accurately identifies the report referred to.

3. On page 4, starting on line 12, the House bill adds provisions stating that the agreement with the State shall specify that the liability of the United States is contingent upon appropriations, and further providing that no funds shall be appropriated to commence construction until the agreement between the State and the Secretary has been submitted to Congress and has lain there during 90 session days without disapproval of either the Senate or House Interior Committees.

4. On page 5, starting on line 15, the House bill inserts provisions requiring the State, if it enlarges the joint-use facilities after initial construction, to pay an equitable share of the cost to the United States of the facilities as initially constructed, and to bear the entire cost of enlarging them.

5. On page 6, on line 2, before "and provided further," the House bill inserts a requirement that the State's use of the joint-use facilities shall be limited to service outside of the Federal San Luis unit service area.

6. On page 8, line 23, the House bill deletes the word "title" so that only the care, operation, and maintenance of the works shall be turned over to the State.

7. On page 9, in the middle of line 4, the House bill inserts a provision that any organization which has contracted with the Federal Government for water, in the event operation is turned over to the State, "shall continue to be subject to the same limitations and obligations" as it would have under continued Federal service. This insures the continuance of the 160-acre limitation.

8. On page 9, after line 23, the House bill inserts a new subsection prohibiting the State from serving any lands within the Federal San Luis unit service area, except as such service is required if it accepts operation under paragraph (g).

9. On page 9, after line 23, and the preceding new subsection, there is inserted by the House bill a new section 4 restricting the withdrawal of Federal San Luis water from the delta whenever Delta-Mendota water exceeds 150 parts per million of chlorides during the summer months, unless the Trinity project is adding an equal amount of water to the Sacramento Valley. Remaining sections are renumbered.

10. On page 10, starting on line 22, the Senate bill directly authorizes construction of an extension of CVP via Pacheco tunnel to serve Santa Clara, San Benito, Santa Cruz, and Monterey Counties with certain provisos. The House bill has the effect of including these areas in the Central Valley service area and authorizes a report on feasibility, which would require a later authorization by act of Congress.

11. On page 11, after the sentence ending on line 18, the House bill inserts a provision that the authorization for appropriations of $290,430,000 shall be diminished to the extent that the State makes funds or lands available which decrease the cost of the works to the Federal Government.

12. On page 11, line 22, after the word "interest," the House bill inserts a limitation on the total cost of distribution and drainage systems of $192,650,000, and adds the further provision that no funds may be appropriated for distribution and drainage systems until a contract for complete repayment has lain before Congress for 90 session days.

Mr. KUCHEL. Mr. President, this is the last happy chapter in the enactment of this beneficent bill which will serve the best interests of the United States, and of the State of California. It has the approval of the State and Federal Governments and their respective agencies. The President has urged it. The Vice President has urged it. I ask adoption of the motion of the Senator from New Mexico.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico [Mr. ANDERSON].

Mr. PROXMIRE. Mr. President, I should like to ask the senior Senator from New Mexico if he will yield for a question.

Mr. ANDERSON. I am glad to yield.

Mr. PROXMIRE. As I recall, this is the bill which the Senate passed last year.

Mr. ANDERSON. That is correct.

Mr. PROXMIRE. Can the Senator inform me whether this bill, as it comes from the House, makes any substantial changes in the bill as it passed the Senate last year?

Mr. ANDERSON. No. I will say to the Senator from Wisconsin that there are no substantial changes. There are a few changes in wording, which I think probably improve the bill. Many of them

were suggested by Representative SAYLOR, of Pennsylvania, who is a stanch friend of those who wish to keep reclamation within reasonable bounds. I think the bill is a satisfactory bill. I believe no substantial change has been made in it.

Mr. PROXMIRE. As I recall, there was a lengthy debate on the floor last year on the acreage limitation feature, the 160-acre limitation.

Mr. ANDERSON. Yes.

Mr. PROXMIRE. That has not been affected?

Mr. ANDERSON. The bill has been strengthened, if anything. There was a possibility that the State of California could have diverted water from its share and put it on Federal lands. We did not think that was possible. It might have been possible, but the House added a provision which would make it impossible. It provides that in all Federal sections the areas must be supplied from Federal units. Hence, the 160-acre limitation would apply.

I think the House strengthened the bill. I do not believe it needed strengthening. Nevertheless, the House added a provision to safeguard the item which we had long debated. I can assure the Senator that I was interested in that point, because if the bill had been varied in any way, those of us who were trying to protect the situation would have been subject to criticism. I am sure the bill has been strengthened rather than weakened.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico [Mr. ANDERSON] that the Senate concur in the House amendment to Senate bill 44.

The motion was agreed to.

Mr. KUCHEL. Mr. President, I move to reconsider the vote by which the House amendment was concurred in.

Mr. ANDERSON. Mr. President, I move to lay that motion on the table.

The motion to reconsider was laid on the table.

OLD FOLKS, WITHOUT MEDICINE, DIE LIKE ANIMALS

Mr. PROXMIRE. Mr. President, all too often we discuss major issues in terms of statistics and averages and we lose sight of the all-important human element. This is particularly true in the case of providing medical care for our senior citizens.

The statistics in this case, however, come to life in the actual hard experience related in letters from our older constituents. Here, for example, is a case study that tells the story better than any set of facts and figures. I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR SIR: It is some time since I wrote to you about not so very important matters to anyone but me. I waited so patiently for the age of 62 when I could have my pension and could have a little easier life. Well, I got my pension—$23.90 a month. Can an old person live on that? I am not a widow. My husband gets $68. He hasn't worked for many years. He has a heart condition. We can't even buy medicines. We could only dream of a hospital. We old folks must just die like animals. I know you have more important matters to think about, but please try to help us.

Respectfully,

———— ————.

ORDER FOR ADJOURNMENT TO MONDAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate adjourns today, it adjourn to meet at 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider the nominations on the calendar in the Coast and Geodetic Survey.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. If there be no reports of committees, the clerk will state the nominations on the Executive Calendar.

COAST AND GEODETIC SURVEY

The legislative clerk proceeded to read sundry nominations in the Coast and Geodetic Survey.

Mr. MANSFIELD. Mr. President, I ask that the nominations in the Coast and Geodetic Survey be confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask that the President be immediately notified.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, for the information of the Senate, when the Senate adjourns this afternoon, it will adjourn until 12 o'clock noon on Monday next.

On Monday, after the morning hour, it is planned to have the Senate consider items on the calendar beginning on page 10, with Calendar No. 1374, Senate Resolution 279, a resolution authorizing additional expenditures by the Committee on Government Operations, and continuing to the bottom of page 13, ending with Calendar No. 1407, Senate Concurrent Resolution 97, submitted by the Senator from New Mexico [Mr. ANDERSON], a resolution authorizing the reprinting of a certain joint committee print.

I desire to give further notice that there are several bills on the calendar which have been cleared by the policy committee, and which may be taken up on motion in the early part of next week. Among such bills are: Calendar No. 921, Senate bill 2168, a bill to amend the Navy ration statute so as to provide for the serving of oleomargarine or margarine; and Calendar No. 924, House bill 8315, a bill to authorize the Secretary of the Army to lease a portion of Fort Crowder, Mo., to Stella Reorganized School District, Missouri.

On Tuesday it is planned to have the Senate consider the President's veto message on Senate bill 722, the area redevelopment bill.

Mr. CLARK. Mr. President, will the Senator yield for a question?

Mr. MANSFIELD. I yield.

Mr. CLARK. What date did the Senator say the veto message would be taken up?

Mr. MANSFIELD. On Tuesday next.

Mr. CLARK. I am happy to note that. I hope, for the RECORD, that it will not be postponed until Wednesday. I wish to be present, but I cannot be present on Wednesday because of an important engagement in Harrisburg.

Mr. MANSFIELD. The distinguished majority leader, the Senator from Texas [Mr. JOHNSON] stated at the opening of the session today that it would be taken up on Tuesday, and that if it were not possible to complete consideration of the debate on the question of overriding the veto, it would be carried over until Wednesday.

Mr. CLARK. I have no doubt that the Senate can conclude the debate on Tuesday. If the Senate is ready to vote on Tuesday, I hope the vote will not be postponed until Wednesday, merely in order to accommodate Senators who cannot be present on Tuesday.

Mr. MANSFIELD. That was not the idea. The idea was that if the Senate could not conclude debate on Tuesday, it would go over until Wednesday; but the majority leader expressed the hope that debate will be concluded on Tuesday. We shall do the best we can.

It is expected also that the agricultural appropriation bill will be reported next week, and it is hoped that it can be considered at an early date.

As other legislation is reported and cleared by the policy committee, it will be announced and considered expeditiously. We are coming into the home stretch of the session. It is very important that committees meet and report proposed legislation as soon as possible.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. CARLSON. May I inquire of the Senator what may be taken up on Monday? I was absent from the Chamber.

Mr. MANSFIELD. It is planned to consider measures on the calendar, beginning with Calendar No. 1374, on page 10, and including all of pages 11, 12, and 13, plus the possibility, if time and circumstances allow, of consideration of the oleomargarine bill and the Stella School bill.

It is planned to consider on Tuesday the question of overriding the President's veto of the area redevelopment bill.

Mr. CARLSON. I thank the distinguished acting majority leader.

WORLD TRADE WEEK

Mr. CLARK. Mr. President, Pennsylvania's two largest cities will be saluting World Trade Week this month. On Wednesday the Greater Pittsburgh Chamber of Commerce and the Committee of American Steamship Lines gathered at the great river port of Pittsburgh for a 2-day foreign trade celebration.

On Sunday, May 22, World Trade Week will begin in Philadelphia, with a program including a cruise, an open house at the Philadelphia Naval Base, a distinguished service award luncheon, and many other events.

The third great Pennsylvania port, Erie, located on the lake of that name, and which is developing its foreign trade rapidly as a result of the opening of the St. Lawrence Seaway, is also very much interested in World Trade Week.

I ask unanimous consent that two articles describing World Trade Week and the importance of world trade to the economy of the Commonwealth of Pennsylvania be printed in the RECORD at this point in my remarks.

There being no objection, the two articles were ordered to be printed in the RECORD, as follows:

PENNSYLVANIA AND AMERICA'S MERCHANT MARINE BUILD SILENT PARTNERSHIP IN WORLD TRADE

America's merchant marine will salute Pennsylvania and make Greater Pittsburgh—one of the Nation's great river ports—an ocean port on May 18 and 19, during World Trade Week.

Some 40 steamship executives from 15 lines, representing all U.S. seacoasts, will journey hundreds of miles inland to Pittsburgh to spotlight the area's reliance on ocean commerce and merchant ships flying the American flag.

They will deliver a foreign trade message that means jobs to tens of thousands of manufacturing workers, farmers and miners in the Keystone State. They will reveal, for example, that over 80 percent of Pennsylvania's total work force of nearly 4 million workers earning $13 billion annually are affected directly or indirectly by world trade. And they will also reveal how America's passenger and cargo ship fleets connect the iron and steel capital with every major coastal city and county in the world.

The 2-day foreign trade celebration is sponsored by the Chamber of Commerce of Greater Pittsburgh in cooperation with the Committee of American Steamship Lines. The committee's 15-member lines sail more than 300 passenger and cargo ships on the Nation's essential foreign trade routes under operating differential subsidy contracts with the Government.

Heading the east, west and gulf coast steamship operators, representing some of the oldest shipping interests to serve this country in peace and war, will be Mr. J. R. Dant, president, States Steamship Co., San Francisco, and vice chairman of the steamship committee, and Tom Killefer, the committee's executive director, Washington, D.C.

The shipping men's message will, in some way, touch the lives of every one of the 11 million Pennsylvania inhabitants in their efforts to better acquaint the citizens of Greater Pittsburgh and the Keystone State, a growing U.S. world trade center, with the meaning of foreign trade and to stimulate the movement of more exports overseas on American ships. This ties in with Secretary of Commerce Mueller's current promotion drive to increase export sales abroad from 10 to 15 percent in 1960.

The people in Pennsylvania directly affected by foreign trade work in manufacturing plants, in mines and on farms which either make products directly for export or need imports for their operation. The steel industry, for instance, imports nearly 30 percent of its required iron ore, more than 80 percent of its nickel, 90 percent of its chrome and other necessary ingredients. Farmers grow produce for canners to put up for foreign trade. Electrical companies ship complete generating plants as well as components to purchasers abroad.

And 670,000 metal-using workers, earning $3.7 billion in Pennsylvania, could well worry about their jobs if it weren't for ore imports. If all the imported ores used in the United States in 1958 were loaded aboard ships at one time, a fleet of 1,400 extra-large, 20,000-ton capacity ships would have been required.

Those indirectly affected by foreign trade in Pennsylvania include merchants who handle such items as coffee or sugar, those who finance foreign trade, those who make such things as the barges or railroads which must move goods for overseas shipment * * * and the housewife and the man in the street who must look daily to exports and imports to enjoy the thousand and one comforts and pleasures of modern living.

What is the dollar value of foreign trade to Pennsylvania?

According to a recently completed study by the steamship committee of the financial impact of foreign trade on the Keystone State; its share of total U.S. exports in 1958 was $1 billion, of which $225 million could be attributed to the Greater Pittsburgh area.

The effect of foreign trade on workers in the iron and steel industries is of major importance: the committee's study shows that in 1958 in Greater Pittsburgh 120,000 persons were employed by the steel industry, or about 17 percent of all steelworkers in the United States.

It further shows that Greater Pittsburgh's share of steel-mill products exported in 1958 was about $85 million.

Significantly, about 90 percent of Greater Pittsburgh's total work force of 775,000 are directly or indirectly affected by foreign trade. And without exports and imports, many of Greater Pittsburgh's 2,400 plants would be seriously crippled and payrolls cut.

Importance of exports to Greater Pittsburgh's key industrial firms is revealing too. Westinghouse Electric Corp., with 24,000 Greater Pittsburgh employees, manufactures 8,000 products exported to 148 countries—ranging from light bulbs to nuclear reactors. H. J. Heinz Co., with 2,800 workers in Greater Pittsburgh, has doubled its export volume since 1955, and sends shipborne canned goods and other products to some 200 foreign countries. All told, there are 270 Pittsburgh area exporting companies which export a multiplicity of goods to hundreds of overseas outlets.

Although Greater Pittsburgh is not a major farming area, Pennsylvania is the dairyland of the Atlantic Coast States and plays a part in the exporting of agricultural products. It is estimated that 5 million acres are harvested in Pennsylvania each year and about 1 in 8 acres were probably devoted to export.

And it has been estimated that the Pennsylvania farmers' share of exports of processed foods in 1958 was about $18 million.

The story, then, to be told by deepwater shipping men in Greater Pittsburgh, May 18–19, is one of economic health and prosperity for Pennsylvania through overseas commerce, 99 percent of which moves in and out of this country by ocean ships.

NEWS RELEASE FROM THE DIVISION OF PUBLIC INFORMATION, CITY OF PHILADELPHIA, PA.

Some 200 importers and exporters of outlying areas of Pennsylvania, New Jersey, and New York will join local shippers in celebrating Maritime Day, Tuesday, May 24, on a riverboat tour of the historic port of Philadelphia, America's leading import center.

One of the principal features of World Trade Week, the 5-hour cruise is sponsored by the Port of Philadelphia Maritime Society and its affiliated organizations. It will be conducted aboard the Riverview Line's excursion steamer, *State of Pennsylvania,* which will sail from pier 4 south, foot of Chestnut Street, at 10:15 a.m.

The visiting exporters and importers will be guests of the Delaware River Port Authority. Approximately 900 persons are expected to take the cruise. The vessel will move down river to the Walt Whitman Bridge, where it will turn north and proceed to the giant Fairless Works of the United States Steel Corp. at Morrisville.

Off Pennsbury Manor, historic Bucks County home of William Penn, the Reverend James F. McElroy, chaplain and director of the Seamen's Church Institute, will hold shipboard memorial services for those who have given their lives in the service of the U.S. Merchant Marine.

Col. T. H. Setliffe, chief, district Corps of Engineers, U.S. Army, will point up the progress which is being made in dredging the upper Delaware River channel to its authorized depth of 40 feet.

A buffet luncheon will be served, with music provided by the Girard College Band.

George Burnham, chairman of Mayor Richardson Dilworth's World Trade Week Citizens Committee, said the overall program of the week will be marked by special day to day activities.

The Philadelphia Naval Base ushers in the celebration next Sunday afternoon (May 22) with an open house day salute to international trade. Here the public will be invited to see the Navy's new guided missile cruiser, the U.S.S. *Galveston;* to inspect exhibits of the Navy's outer space project; and to tour other base operations.

City Representative and Commerce Director Fredric R. Mann will be one of the main speakers the following Monday, May 23 at the week's distinguished service award luncheon in the Barclay Hotel ballroom. The award will be presented to the PNB for its outstanding service in port promotional work.

Dr. Edward H. Litchfield, chancellor of the University of Pittsburgh and head of the U.S. Board of Governmental Affairs Institute, will address the Council of International Visitors' luncheon on Wednesday, May 25, in the Bellevue-Stratford Hotel.

The tugboat owners and operators of the port of Philadelphia will pay tribute to Capt. Horace O. Derrickson on Thursday afternoon, May 26, in the Seamen's Church Institute. Derrickson will receive the Maritime Service Award for safely guiding nearly 30,000 ships in and out of the port during 33 years of service as a tugboat skipper.

The Foreign Traders Association holds its annual World Trade Week banquet Thursday night in the Benjamin Franklin Hotel. Dr. Jose A. Mora, Secretary General, Organization of American States, Pan American Union, is the principal speaker.

The Philadelphia chapter, Pennsylvania Motor Truck Association, celebrates Highway Transportation Day on Friday, May 27, and the colorful presentation of Aviation Day, Sunday afternoon, May 29, at International Airport, climaxes the week's activities.

AN ANALYSIS OF THE ADMINISTRATION'S PROPOSAL FOR MEDICARE FOR THE AGED

Mr. CLARK. Mr. President, like the King's horses and the King's men, the administration—through its Secretary of Health, Education, and Welfare—has marched up to Capitol Hill and marched down again, no less than eight times in the past year, promising each time to return with a sound proposal for solving the problem of financing the health care of America's growing number of aged. Poor Dr. Flemming, who would like to come to grips with the problem, but is not allowed to do so, must be getting pretty discouraged.

Each time Congress, along with the Nation's elderly and their families, has waited patiently for such a proposal. Each time we were cajoled into waiting until next time. Finally the administration put out a press release outlining their solution. There is still no administration bill before the Congress. And we will adjourn the first week in July.

We have waited patiently for an administration bill; but we can wait no longer. We must express publicly our views on the administration's proposal as reported in the press.

To begin with, it is clear that the administration is not really out to fight the foe of illness and its costs for the aged.

No pious expressions of sympathy can conceal the fact that the administration's plan just does not fit the needs of our aging citizens. Nor is the claim that the plan avoids compulsion an honest one. The $1.2 billion to finance the proposal would have to be raised through compulsory Federal and State taxes. The issue, therefore, is really, which type of compulsory financing do we want? The Democrats' social security approach of paid-up insurance upon retirement or the administration's plan which would require membership fees and deductible outlays after retirement?

More concretely, the administration's plan has these additional obvious defects:

First. It places a very heavy burden upon the States to raise, through taxes, at least $600 million in matching funds at a time when every State is in a precarious financial condition. After 15 States are still unable to match Federal funds for the medical care of the most needy aged under old-age assistance. These States could thus automatically exclude at least 2½ million people over 65 at the outset. And how long would it take for the rest of the States to join?

Second. It would be an administrative monstrosity requiring the Federal Government to develop complex administrative arrangements with 50 different State plans and perhaps hundreds of insurance companies.

Third. Regardless of the label used by the administration, the income limitations for eligibility—$2,500 for an individual, $3,800 for a couple—amount to a means test, requiring aged individuals to subject themselves to an income investigation to prove poverty—and on an annual basis. These limitations further exclude from eligibility at least 3½ to 4 million elderly citizens who have just as great a need for adequate health care at a minimum cost.

Fourth. It does not help the average older person very much. Even after a means test he would have to pay $24 a year to enroll. He still would receive no benefits until he paid $250 out of his own pocket—$400 for a couple. After all of this outlay, he would still have to pay 20 percent of the rest of the cost.

Fifth. The deductible feature of the proposal creates a major burden for all the aged electing the plan by forcing them to become bookkeepers, in order to prove that they have spent at least $250 in medical expenses. They would have to keep an accurate, authenticated record of every single medical expense they would incur.

Sixth. The deductible feature, by definition, sets up a barrier to an initial seeking of early medical diagnosis and attention on the part of the aged before they become seriously ill. It rejects the principle of preventive medicine which results in more effective and less costly medical practice. Under the administration's plan, an aged person must become catastrophically sick in order to benefit from it.

Seventh. The use of private insurance carriers, combined with redundant Federal-State administrative machinery, would sharply reduce that portion of the medical dollar returned to the individual in the form of direct medical services. Considering the recognized need for the most efficient use of the medical dollar, the administration's program for aging citizens is extravagant.

Eighth. The administration's plan rejects outright the sound principle of small premium payments during work life leading to a paid-up medical policy on retirement. Aged persons, after retirement—when income is low and illness high—should not be required to continue paying for basic medical coverage.

Ninth. Finally, and most important, an analysis of the actual medical expenses incurred in typical illnesses will reveal the illusory feature of the administration's plan and its unfavorable rating, when compared with the McNamara bill, S. 3503.

The following table shows the comparative amounts provided under each of the two alternatives, for a variety of illnesses. The one type of illness in which the administration's formula—80 percent of the excess over the first $250, or $400 for couples, plus a $24 membership fee—is more advantageous than the McNamara bill, for the patient and his family, would be in those cases requiring exceptionally long custodial care in institutions such as nursing homes. I cite example 6.

Mr. President, I ask unanimous consent that the table to which I have referred may be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Medical expenses of patient and amounts paid under McNamara bill versus administration plan

Type of illness	Total medical costs	Amount paid by—		Amount paid by patient or family	
		McNamara	Administration	McNamara	Administration
1. Widow, 70, carcinoma of breast, surgery, 10 days in hospital; doctors' visits; 120 days in nursing home for terminal care	$1,850	$1,500	$1,280	$350	$594
2. Married man, 68, heart failure; 3 10-day stays in hospital; home care; doctors' visits; drugs	2,160	1,600	1,408	560	776
3. Single man, 66, acute appendicitis; surgery; 10 days in hospital	450	300	160	150	314
4. Married woman, 67, pneumonia; diagnostic X-rays; home care; doctors' visits; drugs	200	130	0	70	224
5. Married man, 72, fractured hip; surgery; 10 days in hospital; home in bed 5 months; doctors' visits; nursing home 1 month	1,195	850	636	345	583
6. Widow, 80, mild senility; year-round nursing home stay; monthly doctors' visits	3,770	1,800	2,816	1,970	978
7. Married man, 70, carcinoma of stomach; diagnoses; 100 days in hospital; surgery; doctors' follow-up visits, etc	3,775	2,825	2,700	950	1,099

Basis of cost estimates:

Hospitalization	$30 per day.
Nursing home	$10.
Home health care	$5.
Surgeon's fees	Blue Shield schedule.
Medical fees	$25 first hospital visit, $5 thereafter; 10 home visits.
Drugs	Estimates based on type and severity of illness.

Mr. CLARK. Mr. President, an examination of this table reveals, first, that despite the claim by the administration that its plan is aimed at meeting catastrophic illnesses, the McNamara retired persons medical insurance program covers such cases more favorably for the aged patient and his family. Second, in the less catastrophic illness, which is more frequent, the administration's plan is of little value.

Furthermore, the McNamara program still leaves ample room for individual and family responsibility. No one would be "pampered" in this program of financing the basic costs of medical care for

the aged. For the same reason, private insurance companies are provided an unprecedented opportunity to offer supplementary policies, especially to cover medical and surgical costs, such as under Blue Shield.

S. 3503, the retired persons medical insurance bill, introduced by Senator McNAMARA and myself, along with 18 other Senators, would cover all retired aged men and women, the group whose health problems and ability to finance medical care are the most critical.

The McNamara bill would prohibit a means test for eligibility, and thus would avoid any degrading experience for the aged.

Its benefits have been shaped by modern principles of preventive medical care, oriented toward outpatient diagnostic services and restorative medicine through home health services, and related programs.

The individual need not wait until he becomes critically ill, in order to benefit from the provisions of the bill.

Specifically, the McNamara bill would provide to retired elderly Americans the following benefits:

First. Ninety days of hospital care per year, or 180 days of skilled nursing home care, or 240 days of home health services.

Second. Diagnostic services, including lab tests and X-rays.

Third. Payment of a major portion of expensive drugs.

Fourth. Research and demonstration programs to improve the quality and efficiency of health care for the aged.

While it is difficult, if not impossible, to compare the administration's vague and complicated jungle gym proposal with the McNamara bill so far as costs are concerned, it can be said in general terms that the administration cost figures—if all the States participate and if the estimated number of aged elect to become eligible—would be about $1.2 billion. Half of this would come from the Federal Treasury, and the other half from the States.

Under the McNamara bill, there would be little in the way of additional new costs to the Federal Treasury. While the total price tag would be about $1.5 billion by the time all benefits became available, about $1.1 billion would be paid for by an additional ½ of 1 percent social security deduction from payrolls—of the first $4,800. The remainder would be appropriated from the general fund, from which approximately $240 million is already being expended under existing earmarked medical care for old-age groups covered by our proposal. In other words, the additional new costs would be about $130 million from the Treasury, or general funds.

In actual practice, the retired persons medical insurance bill would protect many more millions of aged persons than would the proposal now being floated by the Republican administration. For this reason and the other arguments I have presented here, there is only one sensible answer to the issue before us.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an analysis of the McNamara retired persons medical insurance bill.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

MEMORANDUM BY SENATOR PAT MCNAMARA, CHAIRMAN, SENATE SUBCOMMITTEE ON PROBLEMS OF THE AGED AND AGING—ANALYSIS: RETIRED PERSONS MEDICAL INSURANCE ACT

This suggested bill for introduction by Senator MCNAMARA proposes to do the following:

MAJOR PROVISIONS

1. Cover under a system of prepaid health insurance all retired aged (men over 65 and women over 62 who are not employed).

2. Provide for 90 days of hospital care per year, or

3. One hundred and thirty-five days care in a skilled nursing home, or

4. One hundred and eighty days of care at home in a supervised home health program.

5. Provide diagnostic outpatient services for such items as laboratory tests and X-rays.

6. Pay for a portion of the cost of very expensive drugs.

7. Provide for research and demonstration programs to improve quality and efficiency of health care.

RELEVANT DATA BEARING ON THE ABOVE PROVISIONS

1. We estimate that this bill will cover 14.8 million men and women as follows: 11.3 million OASI beneficiaries; 1.7 million who are receiving old-age assistance and no OASI; and 1.8 million other retired aged—men over 65 and women over 62.

The act would exclude from its coverage all men and women and their spouses who are working full time. In the ordinary case, these men and women will be covered by a group health insurance policy. The bill is thus limited to the retired aged. It further provides authorization for future participation by the railroad retirement.

2. Estimates of cost for the above provisions: Total cost, computed as conservatively as possible, is estimated at $1.5 billion or $101 per capita (i.e., per retired person); 11.3 million OASI beneficiaries would cost $1.14 billion: financed by a one-quarter of 1 percent increase in the social security tax on the employee and employer; 1.7 million old-age assistance recipients would cost $172 million estimated cost: to come from general revenue fund; and 1.8 million other persons would cost $182 million: to come from general revenue fund.

3. Hospitalization: This bill provides for 90 days hospitalization for the aged but aims at reducing excessive use of hospitals through the following features:

Provision is made for diagnostic services as a preventive program.

An incentive is provided to use nursing homes and home health services instead of hospitals when not needed.

Cost of hospitalization $1,023 million.

4. Skilled nursing home care: For each day of unused hospital care, the bill provides 1½ days of care in a skilled nursing home following a physician's certification—total days authorized, 135; total estimated cost, $215 million.

5. Home health services: For each day of unused hospital care, the bill provides 2 days of home health services by a community-sponsored agency—total days authorized, 180; total estimated cost, $10 million.

6. Outpatient diagnostic services: The bill provides for preventive services through early diagnosis of incipient illness by means of X-ray and other laboratory tests—estimated cost, $111 million.

7. Very expensive drugs: A portion of the cost of very expensive drugs prescribed by a physician using generic names is included in the insurance program. The amount and kind of coverage is to be determined by the Secretary after a year's study—total estimated cost, $147 million.

8. Effective date: The bill would provide for phasing the effective dates of the various benefits so as to provide an opportunity to build up the financing fund, conduct adequate planning and develop the necessary facilities:

Hospitalization effective July 1, 1961, and not later than January 1, 1962.

Nursing homes, January 1, 1963, and not later than July 1, 1963.

Home health services, January 1, 1961, and not later than July 1, 1962.

Diagnostic outpatient services, July 1, 1961, and not later than January 1, 1962.

Very expensive medicines, July 1, 1962, and not later than July 1, 1963.

The Secretary of the Department of Health, Education, and Welfare would be authorized to designate the dates within these periods when the act would be effective.

9. Summary:

Cost of benefits ($101 per retired person):	
Hospitalization	$1,023,000,000
Skilled nursing homes	215,000,000
Home health services	10,000,000
Diagnostic services	110,000,000
Expensive drug benefits	147,000,000
Total	1,505,000,000
Revenue source:	
From OASDI tax (¼ percent on employer and employee, ⅜ percent on self-employed)	1,150,000,000
General revenue	355,000,000
Total	1,505,000,000
Offset to general revenue:	
Federal share of OAA recipients' medical costs (estimated)	133,000,000
Federal expenditures for medical care of others who would be covered (estimated)	100,000,000

10. Research and demonstration:

The bill would direct the Secretary of HEW to conduct research on the health care of older persons and on improvements in the quality and efficiency of health services.

The Secretary is also authorized to conduct appropriate demonstration programs on how to meet the health needs of older persons as effectively and efficiently as possible in their communities.

11. Other important provisions:

Persons receiving social security benefits or old-age assistance payments are automatically eligible for benefits. Other individuals who have not earned in the preceding month more than the amount set in the retirement test under OASI will be covered.

The Secretary is to publish annually a listing of hospitals, nursing homes, and home health agencies which are included for payments under the act. It is expected that for hospitals, the Secretary may use the A.H.A. accrediting service; and that for nursing homes, only those will be included which meet adequate standards for care and rehabilitation.

State health agencies can be given authority to inspect whether standards are being met and whether professional services are adequate.

The bill authorizes the Secretary of the Department of Health, Education, and Welfare to administer the act with a national health service advisory council.

The Secretary may use the services of private nonprofit organizations in administering the program.

Railroad retirement and Federal employee pensioners could come under the program at any time such legislation is enacted.

THE INTERNATIONAL CRISIS

Mr. CLARK. Mr. President, I desire to comment briefly on the present world situation and its implications on the work of this body. I have welcomed the expressions of national unity which have come from the leadership on both sides of the aisle of this body during recent days. Surely it is important that America should be united at a time of serious international crisis, at a time when our President has been gratuitously insulted by the dictator of the Soviet Union. I, for one, hope that partisan politics will not interfere with efforts to find solutions to pressing international problems now or during the coming political campaign.

Yet I must say in all candor, Mr. President, that I applaud the comments of the junior Senator from Tennessee [Mr. GORE], as they appeared in the press this morning. I felt that the Senator from Tennessee [Mr. GORE] did the country a service by pointing out that it is a little premature to start making political capital out of a situation in which we should be trying to find a unified solution; and that it is a little early in the day for the declared candidate of one of our two great political parties to start shifting from a "let's sit down at the summit and have a peaceful discussion with Mr. Khrushchev" line to the old line of "let's shake our fists at the Communists, and let's be a little concerned about whether the opposing political party might be 'soft' on communism."

Mr. President, I can assure that young gentleman that the Democratic Party is not "soft" on communism—never has been, and is not now; and I can also assure the Vice President of the United States that the American people are quite sincere in their search for peace, and that they mean to continue that search with intelligence and persistence.

I suggest that the attitude our country should take in this regard was very well expressed in an article entitled "First of All," which was written by Walter Lippmann, and was published today in the Washington Post. I ask unanimous consent that the article be printed at this point in the RECORD, in connection with my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 19, 1960]

FIRST OF ALL

(By Walter Lippmann)

Amid the wreckage, and as we recover from the shock, the long work of rebuilding will have to begin. Where must it begin? It must begin at the point where the most critical damage has been done. Where is that point? It is not in what Mr. Khrushchev said or did to us. It is in what we did to ourselves. It is that we "first did help to wound ourselves."

The wound has been made by the series of blunders on the gravest matters in the highest quarters. These blunders have not only angered the Russians and wrecked the summit conference but, much worse than all that, they have cast doubt among our allies and among our own people on our competence to lead the Western alliance on the issues of peace and war. Mr. Khrushchev's harsh and intemperate language has produced a reaction and evoked sympathy for the plight of the President. But we must have no illusions about the depth and the extent of the loss of confidence in American leadership, in the judgment, sagacity, and political competence of the Government in Washington.

This is the damage to which we must address ourselves. We are a free people, and one of the blessings of a free society is that, unlike an unfree society, it provides a way to deal with error and correct mistakes. This is to investigate, to criticize, to debate, and then to demonstrate to the people and to the world that the lessons of the fiasco have been learned and will be applied.

In a situation like ours the damage to our prestige would be irreparable if we all rallied around the President and pretended to think that there was nothing seriously wrong. For that would prove to the world that the blunders will not be corrected but will be continued, and that our whole people are satisfied with bad government. It is the dissenters and the critics and the opposition who can restore the world's respect for American competence. We cannot do this by pretending that the incompetence does not exist.

These are hard words. But in what other words shall we describe the performance on Sunday night when the Secretary of Defense, who is in Paris as one of the President's advisers, ordered a worldwide alert of American combat forces? On Sunday night Mr. Macmillan and General de Gaulle were still struggling to find some way out of the affair of the spy plane. Yet this was the time chosen by the Secretary of Defense to "stage a worldwide readiness exercise" which, though not the last stage before actual war, is one of the preliminary stages to it.

Why Sunday of all days? This blunder was not the work of some forgotten colonel on a Turkish airfield. This was the work of the Secretary of Defense and of the President. The timing of the "exercise" was just a shade worse than sending off the U–2 on its perilous mission 2 weeks before the summit. The timing of the so-called exercise makes no sense whatever. For if the alert was concerned with a possible surprise attack, when in the name of common sense could there be less danger of a surprise attack on the Western World than when Mr. K. in person was in Paris?

Unhappily, too, Secretary Gates' "exercise" was just about as incompetently administered at the top as was the affair of the spy plane. This time, it appears, the top people forgot to say anything about the "exercise" to their press officers who did not know what to say, and were not even in their offices, when the public was being frightened by the "exercise."

A great government faced with a most formidable adversary, itself the leader, champion and mainstay of the non-Communist world, cannot be conducted in such a reckless and haphazard way. That is the damage that first must be repaired before we can begin to deal with the general international wreckage, and to regain our confidence in ourselves.

Mr. CLARK. Mr. President, it must be very clear, indeed, that in the field of international affairs the American people must have better leadership in the future than they have had in the past. This is perhaps just as important as it is to rally behind the President of the United States when international affronts are offered to him.

I hope that in this body there will be a climate of unity against foreign threats, to be sure, but one which will put peace as our most important objective, and which will see—in view of the tragic blunders which have been made during recent weeks—the necessity of refurbishing our alliances, and the desirability of gaining additional friendships by such actions as repeal of the iniquitous Connally amendment to the World Court bill—a climate which will make clear to the administration that if it requests ratification by the Senate of an intelligent nuclear arms test ban, the Senate will consider such a treaty fairly and intelligently, and will not be determined in advance to reject it—a climate in the Senate which will encourage a disarmament conference, in the hope that some small start along that line may be made.

In short, Mr. President, I hope we shall not be panicked into an insensate belligerance which could result in our turning our backs on peace. Instead, we must look forward clearsightedly and intelligently, with the interests of America at heart, to a continuing program of seeking world peace through law, which is the only practical and feasible alternative to an ever-accelerating arms race which in the foreseeable future could well bring destruction to all of us.

Mr. President, I yield the floor.

FUSE POINTS OF A PLANETARY EXPLOSION

Mr. WILLIAMS of New Jersey. Mr. President, Gov. Robert B. Meyner, of New Jersey, recently concluded a speaking tour of several cities in the western part of the United States. His topics included everything from conservation to world peace and civil defense bomb shelters.

In his speech at a Democratic luncheon in Los Angeles, on March 18, the Governor asked some particularly probing questions about world peace and our policies in pursuing world peace.

Mr. President, I ask unanimous consent that the speech of Governor Meyner be printed at this point in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF GOV. ROBERT B. MEYNER, OF NEW JERSEY, AT DEMOCRATIC LUNCHEON, GALERIA ROOM, BILTMORE HOTEL, LOS ANGELES, CALIF., MARCH 18, 1960

My talk tonight is concerned with some aspects of American security not very widely discussed.

I begin by asking a question of critical importance to every American citizen. Suppose, tomorrow, you should read in your newspapers that Communist China had successfully tested its first atomic bomb? How would you feel if you knew that the country with the largest population in the world—a country whom we declared to be our enemy when we said we would underwrite the security of Nationalist China—how would you feel if you learned that Communist China was now in possession of the ultimate weapon?

I can't think of a single event in the world today that would cut as deeply into American security as the possession by Communist China of atomic weapons. For China is one of the two or three countries in the world with the kind of dispersed population and industrial centers against whom a nuclear war might not necessarily be fatal.

By contrast, the United States has some two dozen highly concentrated population centers. Our heavy industry, most of it, is near those centers.

The moment Communist China develops its own bomb, the present policy of the nuclear deterrent becomes as obsolete as the idea of a underground shelter against a megaton atomic bomb.

The policy of the deterrent is based on the theory that you're going to be able to hurt an enemy more than he can hurt you if he decides to attack—and that therefore he won't dare to attack. This theory has holes in it even without respect to Communist China. But it loses all meaning when applied to Red China.

Let's consider a specific hypothetical instance.

Suppose Communist China should decide once again that it would not tolerate Nationalist Chinese military garrisons on Quemoy and Matsu. Suppose the Communists should decide to seize these islands so close to their own shores.

Now suppose, too, that the United States should issue an ultimatum to Communist China, saying we will use our battleships to prevent such a seizure. Then suppose the Communists issue a counterultimatum, ordering us to keep out of their internal affairs and saying that they will not tolerate any interference.

Suppose, further, that both sides mean exactly what they say. Communist China thereupon attacks Quemoy and Matsu, we jump in, and Communist China responds by using its new atomic weapons against our fleet.

Two years ago we could issue ultimatums and the Communists could only fulminate against us. But what happens when they have the atomic weapons? Will they hesitate to use them? Will they hesitate to fight a major war against the United States if they know they possess weapons that can be far more damaging against the United States than the same weapons used by us against them?

These are terrifying questions. These are life-and-death questions. These are questions with a deadline on them. These are time-bomb questions.

The moment Communist China develops an atomic weapon, our foreign policy will have suffered its greatest defeat since Pearl Harbor.

I make this statement advisedly.

Was there any way the United States could have stopped the development of an atomic bomb by Communist China? Is there any way it can stop the development today?

In order to consider these questions we have to go back a bit. We have to consider many other problems bearing on those questions. We have to consider our relations with the Soviet Union, we have to consider the relations of the Soviet Union with Communist China, we have to consider the various efforts made to set up an effective system of world control over nuclear weapons.

While Joseph Stalin lived, the record seems clear that the Soviet Union would not have been willing to get into the kind of hard-and-fast, enforceable, iron-clad arms control agreements that could have marked the beginning of a world system of effective nuclear control.

With the passing of Joseph Stalin, however, there came many changes in Soviet policy—internal and external. Things began to loosen up, inside and outside. The individual Soviet citizen began to be more important as a consumer. He was able to acquire things to make his life less drab. The Iron Curtain began to go up—not altogether but at least enough to allow for some important exchanges. People were allowed to see foreigners and mix with them. Soviet leaders and citizens began to see something of the outside world.

In its foreign policy, the Soviet began to indicate a willingness to give and take.

The one big blot in the recent history of Soviet foreign policy, of course, has to do with Hungary.

The suppression of the Hungarian freedom movement was as brutal and as uncompromising as anything the world knew under Joseph Stalin.

By contrast, the lenient policy of the Kremlin only a few months earlier toward the Polish freedom riots was startling. Why did the Kremlin give ground and make important concessions in Poland, yet crack down ruthlessly in Hungary only a short time later?

A possible answer is that the situation over Suez had erupted in the meantime. France and England jumped into the campaign against Egypt. The Soviet Union was convinced that France and England would not have acted without the full knowledge of the United States. It appeared that the attack on Egypt was just the opening state of what might be a world war. The Soviet promptly viewed Hungary in the total context of its world security position.

I claim no originality for this guess. Various European leaders have expressed themselves in this direction in attempting to account for the contradiction between the response in Poland and the response in Hungary to the freedom fighters.

In any event, with the notable exception of the Hungarian suppression, Soviet foreign policy has departed substantially from the go-it-alone methods of Joseph Stalin.

In one particular, Soviet policy has indicated a considerable willingness to negotiate seriously.

This is in the area of arms control, particularly with respect to nuclear weapons.

For the past 3½ years, the Soviet Union has sounded as though it meant business when it talked about bringing nuclear weapons under control.

On one point the Soviet has seemed especially anxious. This has been on the matter of banning nuclear tests.

Why?

Is it possible that the Soviet Union is no more eager to see nuclear weapons in the hands of Communist China than we are? How is it that in the 11 years since the Soviet Union was able to work with fissionable materials, it has not given any stockpiles of nuclear weapons to Communist China? How is it that there have been no missions of Russian atomic scientists and engineers in Peking, helping to set up the elaborate installations to release and harness atomic energy?

I have no way of knowing whether the present leaders in the Kremlin are apprehensive about the fact that by 1975 China will be the first nation in history with a population of more than 1 billion people. There is not enough space in China for 1 billion people. Where will they go? Southeast Asia? Too crowded already. Tibet is part of the answer, but perhaps only a small fraction. The main outlet has to be Outer Mongolia and southern Siberia.

Is it possible that this future danger may be considered more weighty than various ideological considerations? The Russian leaders, I believe, are Russians even before they are exponents of any philosophy.

Whatever the reason for the change in Soviet foreign policy these past few years, it is a fact that the Russians have been apparently eager to get into serious negotiations on nuclear arms control.

Were they hopeful that any effective agreements with the United States might lead to an effective plan for total world control?

Whatever the answer, it is nonetheless interesting that at the London arms control talks in 1957, the Soviet Union said they would accept a workable ban on nuclear tests. We knew then that we could have had such an agreement if we wanted it, but Governor Stassen was called back to Washington at precisely the moment it seemed that an agreement was about to be concluded.

I believe that Governor Stassen took his job seriously. It was an important job. That job was to make an effective beginning in stopping the runaway nuclear arms race. I believe the original instructions from the President convinced Governor Stassen that he was engaged in an enterprise in which he would have the full backing of the administration.

At London, Governor Stassen made considerable progress. He was able to get the Russians to agree to our first proposal, which called for an effective ban against further nuclear testing. But as soon as he was on the point of concluding what could have been an historic agreement, he was pulled out of London and given a new set of instructions. These instructions were to attach other conditions which it was certain the Russians would not accept.

The size of that blunder is incalculable.

If in 1957 we could have gotten started on world nuclear controls, it is conceivable that the United Nations might have been in a position to declare the testing or manufacture of nuclear weapons by any nation to be an illegal act against the world community.

Naturally, it would not have been as easy for the United Nations to exercise jurisdiction and control over countries that were outside its membership as it would have been over member nations.

We might have realized that we were only harming ourselves by restricting the jurisdiction of the U.N. We might have come to accept the fact that the purpose of the United Nations was not to dispense privileges but to exact obligations.

The U.N. is not an exclusive gentleman's club but a world organization set up to save the peace. It is supposed to govern the world, not just part of the world. The more dangerous a nation may be, the more important it is that the United Nations be in a position to deal with it. Indeed, if all the nations in the world knew how to behave themselves, we probably wouldn't have needed a United Nations in the first place.

In any event, the main point I am making is that we passed up a chance of historic dimensions when we didn't seize the opening we had in 1957 to get an effective agreement on a ban against nuclear tests. We lost time. We lost the chance to set up what might have become effective machinery that could have been extended.

And even today, we are backing and filling at Geneva. Our initial proposals at Geneva were sound. We had good men to represent us at Geneva. James P. Wadsworth was genuinely determined to arrive at an effective plan for nuclear arms control. The proposals he made calling for comprehensive inspection were absolutely correct.

But now that the Russians are coming around, now that they have withdrawn their objections to many of our proposals for inspection, we are shifting our ground. It is beginning to sound like the London talks all over again. And I naturally wonder whether Mr. Wadsworth is being Stassenized.

The trouble is that we have two foreign policies.

We have the foreign policy of the President. His ideas, I believe, are basically correct. What he says about the peace seems to me to be positive and important. He believes that world peace can only be based on world law. He has a clear idea of what the next war would be like.

But then there is a second foreign policy. This is what happens when the Atomic Energy Commission and the Pentagon get into the act. The President may be able to initiate measures that point in the right direction, but these measures somehow manage to run afoul of obstacles bearing the labels of the AEC and the military.

In short, what the President advocates in foreign affairs often makes good sense. What

the opposition does inside his administration, however, keeps these ideas from getting past the stage of advocacy. The President appoints a Coolidge Commission to undertake a study and make recommendations on arms control. The Coolidge Commission makes its report, but the report is stifled. It is now several months since that report was turned in. The American people have a right to know what it says.

I began by saying we do not have much time. It is much more difficult today than it was 3 years ago to make a start in the direction of effective world control over nuclear weapons. It is much more difficult to head off Communist China's entry into the society of atomic powers than it would have been a few years back.

But one thing is certain. It is going to be even more difficult with each passing day unless we start moving now. Once Communist China gets the atomic bomb, then all our problems are multiplied hundreds of times.

What do we do now?

It seems to me we have to make a beginning. It seems to me we have to labor mightily, imaginatively, and powerfully in clearly defined directions. We have to make a serious effort to keep the Geneva nuclear talks from ending in stalemate.

If we can get an agreement to end nuclear tests with inspection and verification, let's grab it.

And if the Russians have objections to provisions that we honestly believe are essential to the effective operation of a ban, I believe we should carry our case direct to world public opinion. Peoples everywhere have a stake in what is going on at Geneva. The negotiations concern them. If we feel that good proposals are being blocked, it is our duty to let the world's peoples know about it.

The same holds true of the Russians with respect to us.

It is high time that both the United States and the Soviet Union recognized that 2.5 billion people are going to benefit or suffer by what they do or fail to do at Geneva.

Next, I believe we should turn our attention to the United Nations. I believe we should do everything we can now to bolster the United Nations and make of it a world organization strong enough to carry out world peace—strong enough, incidentally, to have universal membership.

For if the United Nations can be transformed into an agency with effective powers, then the real question will be, not should Communist China be admitted to membership, but rather what can the world do to make sure that Communist China doesn't stay out.

American security is too important to rest on the flimsy reed of military deterrents. It must rest on powerful ideas, ideas that have something to do with the creation of a world organization strong enough to underwrite essential national sovereignty and independence, strong enough to protect peoples against aggression, strong enough to carry out effective arms control, strong enough to deal with basic world tensions, strong enough to keep incipient world crises from becoming the fuse points of a planetary nuclear explosion.

If we are going to move in this direction, we had better begin moving fast.

And we had better give some thought to getting started on a foreign policy with followthrough built into it, a foreign policy concerned with getting specific things accomplished, and not just with preliminary ideas.

We have a tough job ahead of us. We can do that job if we give it the thought, the work, and the attention it requires. Thank you.

ADDRESS BY SENATOR WILLIAMS OF NEW JERSEY AT BRIEFING CONFERENCE ON SECURITIES LAWS AND REGULATIONS

Mr. WILLIAMS of New Jersey. Mr. President, on April 29, it was my pleasure to address a briefing conference on securities laws and regulations, at Atlantic City, N.J. The meeting, sponsored by the Federal Bar Association and the Foundation of the Federal Bar Association, in cooperation with the Bureau of National Affairs, Inc., gave me an opportunity to discuss legislation and issues now under study by the Senate Subcommittee on Securities, of which I am chairman.

Mr. President, the address announces executive sessions on pending bills, and refers to possible future action by the subcommittee. I ask unanimous consent that the address be printed at this point in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR HARRISON WILLIAMS, CHAIRMAN, SENATE SUBCOMMITTEE ON SECURITIES, AT BRIEFING CONFERENCE ON SECURITIES LAWS AND REGULATIONS, SPONSORED BY THE FEDERAL BAR ASSOCIATION AND THE FOUNDATION OF THE FEDERAL BAR ASSOCIATION IN COOPERATION WITH THE BUREAU OF NATIONAL AFFAIRS, INC., ATLANTIC CITY, N.J., APRIL 29, 1960

Gentlemen, the optimistic title of this speech is "Securities Legislation—1960." Though I cannot promise action by Congress, perhaps I can give you my own thoughts of legislation on the stock market.

Philosophically, I am a good student of free enterprise. I believe that an overcontrolled economy can never promise to our distant descendants what our grandfathers did for us. Too much liberty, however, may of itself engender a need for discipline. Historically, at least, Federal discipline first appeared when the Securities Subcommittee of the Senate Banking and Currency Committee became involved in the stock market in 1933. I say "involved" advisedly, for the parade of abuses following the unrestrained freedom of the capital markets forced themselves upon Congress' attention.

I, who was only 10 years old in 1929, nevertheless would like to recall to you some facts resulting from those abuses. From 1920 to 1933 some $50 billion of securities were sold in the United States, at the end of which half were worthless. The aggregate value of all stocks listed on the New York Stock Exchange on September 1, 1929, was $89 billion. By 1933 the aggregate figure was down to $15 billion—a loss of $74 billion in 2½ years. The bond losses increased the total drop in values to $93 billion.

From 1932 until at least 1940 few people felt that corporate securities, whether debt or security, were proper mediums of investment. This exhaustion of corporate capital has been considered symbolic of a lack of confidence which the American public investors demonstrated in the functions of the capital markets.

In contrast the confidence of today's investors appears full blown. The 1959 Dow Jones industrial average closed at 679, a new peak, and a rise of 16 percent over the final 1958 final figure. The upsurge of the combined value of common stocks listed had broken all expectations. Of course, it would be foolish not to recognize that many closed below their similar 1958 quotations and that there is evidence since last year justifying a bearish attitude.

Moreover, last year's reported stock volume of the New York Stock Exchange was some 820,296,279 shares, the third largest yearly total in exchange history. And at present over 12½ million individuals in the United States own corporate securities, nearly double those in 1952.

Merely as a statistical comparison, I am convinced that the ballooning of stockholder ownership demonstrates renewed confidence by investors in our capital markets. I award a large measure of credit for this metamorphosis to the interest of Government in the stock market. Whether or not the diet of an average buyer can digest a prospectus, his appetite for facts has been whetted by the Federal securities laws. And he will never see many indisputably wretched stocks which cannot brave the publicity which awaits them under present law.

I need not tediously declaim before you the verses of these laws, for it is you who have charted the pathway between Scylla and Charybdis to find their practical operation. Suffice it to say that the Securities Acts of 1933 and 1934 are predicated on a policy of disclosing pertinent facts to the investor—though you may believe it subverted. Later statutes, the Public Utility and Investment Company Acts, are paternalistic in nature. They followed painstaking studies by the newborn Commission illuminating flagrant betrayal of shareholder interests. In contrast to the latter two, the Investment Advisers Act of 1940 has been called little more than a continuing census of the Nation's advisers.

THE PRESENT REASON FOR LEGISLATION

But note my conviction that each of these statutes was written by Congress only when overwhelming necessity and abuses arose. Each act was fitted to clothe the form which demanded covering. Moreover, as information requisite for intelligent legislation was unearthed or stresses in them revealed, the statutes were reshaped or whole members added to them.

A good example of this history is found in the over-the-counter market. Two years after the passage of the Securities Exchange Act of 1934, Commission rules for registration of brokers were codified. In 1938 the Maloney Act incorporated into the statute a philosophy of cooperative regulation by securities associations. It also expanded SEC's authority in the over-the-counter market by granting it additional specific power to prevent fraud and safeguard financial responsibility.

By 1954 time had unraveled the fabric of the original Securities Act. It was, therefore amended to permit written offers before date of sale. According to Louis Loss, this type of revision is made every 20 years by the British to their Companies Act.

Of course, it is logical to ask whether new legislation is needed now. Do we have in 1960 the spectacular abuses we once faced? In all honesty, I cannot compare present market activity to that preceding the crash of 1929.

But abuses by a group quite outside the industry have become legion. Since the war new warrens of boiler room rabbits have been educated in the Federal securities laws, groups whose prolific activities often defy suppression from overseas. I will return to SEC enforcement problems later.

Moreover, on another count, I believe securities legislation justified. By this year, 20 years after the last major body of law, Congress can face its past. It now has sufficient awareness of segments of the stock market to fulfill promises made. Two pertinent illustrations are the over-the-counter market and investment advisers.

In the anxiety of Federal legislation in 1933 and 1934, Congress admitted frankly that it did not have access to facts on the activity in the over-the-counter market.

At that time there was no agency of the Government supervising nor a daily quotation service reporting on it. Once created, the Securities and Exchange Commission studied and reported to Congress information which became the broker registration, 15(d) reports, and Maloney Act amendments just mentioned.

Since 1938 the mystery of the over-the-counter market has been greatly dispelled; moreover, in number of issues traded it is much bigger than all the exchanges combined. As yet, however, I do not find that Congress has replied to its early promise nor availed itself of the information now heaped in libraries. That is, many companies in the unlisted markets are not reached by provisions of the 1934 Exchange Act affecting proxy practices, reports, and insider trading. For stockholder "democracy," corporate honesty, and elimination of conflicts of interest, these are the cutting teeth of the statute.

THE DOUBLE STANDARD

You have no doubt espied the dormant shape of S. 1168, the brainchild of first, Senator FREAR, and then Senator FULBRIGHT. But I have no intention of introducing this orphaned bill in the 86th Congress. Nevertheless, the injustice of a double standard of investor protection is now put to you. As things stand today, some of the most salutary provisions of the 1934 statute are only applied when a company volunteers its stock upon an exchange. I believe enactment of similar legislation would close a capricious gap in Federal securities laws and culminate a half-century campaign waged on behalf of Federal standards for interstate corporations.

A note on the history of the Frear bill: The suggestion of extending such basic protection to shareholders of certain large, publicly owned companies was made on a number of occasions in the 1930's. One version of several bills embodying this idea, S. 1168, was reported to the Senate by the Banking Committee in 1957. Unfortunately for the bill, some of the provisions recommended by the committee did not receive SEC approval. The lukewarm support of SEC Chairman Sinclair Armstrong, who testified that the extra appropriation necessary to administer it would be better spent elsewhere, seriously weakened interest in the bill as reported, and it was allowed to die.

Before developing additional if less important current proposals in the over-the-counter market, I should like to praise the Commission for conscientious review of its acts with an eye to correction. Since its wide reaching legislative program of 1941, enforcement has revealed heavier strain on the original statutes. To cure these defects, the SEC submitted extensive proposals late in 1956 and again in the 85th and 86th Congresses.

Uninvolved with these suggestions until that time, I do not feel obliged to defend the Banking Committee or Congress against charges of inaction on the program. For in my first session in the Senate I held 7 days of hearings on the bills. Notwithstanding, the alleged necessity for immediate action seems hardly oracle inspired, since the bills were changed with almost each session of Congress.

DEBATE DURING HEARINGS

Moreover, I can speak personally of the value of "loyal opposition" by the industry. For example, an amendment to the Investment Company Act was objected to on the grounds of dual regulation. A suggestion from Senator JAVITS during the hearings resulted in unassayed compromise language with the ICC, overcoming opposition from one source.

Other suggestions from subcommittee members occasioned SEC modifications in regard to holding of customers' securities by brokers, their aggregate indebtedness, and the imposition of a $100-a-day fine for late reports. Moreover, the proposal for the fine was originally inspired by the investigation into SEC operations not of the Banking Committee, but of a House subcommittee, an investigation characterized by a former SEC Chairman as a "travesty."

Do not mistake me, however. The best tempering of legislative steel is in the fire of agency-industry debate—and the efforts of the Commission to make an alloy of suggestions without sacrificing its strength deserve praise.

Let me mention specific amendments in the Commission's present legislative program, S. 1178 through S. 1182. Of the 87 amendments to five securities acts and one to the Bankruptcy Act, I will concentrate on those perhaps less familiar to you.

AMENDMENTS IN THE OVER-THE-COUNTER MARKET

Under the Exchange Act of 1934 increased jurisdiction is sought over brokers and dealers, in the form of rulemaking with regard to their financial responsibility and lending, borrowing and holding of customers' securities.

One proposal so reasonable that it earned NASD support, would allow suspension of a broker-dealer license rather than the more drastic penalty of revocation. One which did not earn NASD support would give the Commission authority equivalent to that over the exchanges to make rules over "when issued" or "when distributed" trading in the over-the-counter market.

Let me not slight perhaps the most significant expansion of power in S. 1179, that allowing suspension of trading in the over-the-counter market. There have been several recent summary suspensions by the SEC under its present 10-day power over listed stocks, and a similar power, for successive 10-day periods, is requested for the over-the-counter issues. No matter what objection is advanced to this broad power, it might in the hands of an alert Commission prevent the sudden rise and fall, for instance, of an Oreclone stock—which you remember fell from quotes of 29 last January 14 to nothing the following day.

In other ways as well, the SEC proposals, more indirectly than former ones, seek to subject the over-the-counter market to increased agency direction and rulemaking power. This movement is the logical result of new importance of the market, and in harmony with my belief that Congress has the necessary information to follow the path set forth upon in 1934, 1936, and 1938.

Mention might be made of an amendment, passed twice by the Senate, to the Securities Act of 1933. It would increase the exemptive limit under 3(b) from $300,000 to $500,000. However, the accompanying new criminal and civil liability raised the specter of future suits and thus inspired opposition from the Small Business Administration.

INVESTMENT ADVISERS LEGISLATION

Though generally unrecognized, square in the bull's eye of the Commission's program are the investment advisers. If the over-the-counter market was mysterious in 1934, in 1940 the advisers could only be described as mythological. At the present time, however, 1,800 are registered under the act of 1940, ranging from the lowly touter to the lofty investment counsel firm of Madison Avenue.

The amendments to the act were worked out with the Investment Counsel Association, representing 50 firms. They received no advisers industry dissent.

A curious oversight in the Advisers Act is the basis for revocation of their licenses. Once registered, the license of the adviser may not be revoked for willful violation of the act itself. Moreover, an insolvent registrant under the Exchange Act and Advisers Act may have his license revoked as a broker under the first, but not the second. For the latter does not even permit the denial of an adviser's license for violation of the 1933 or 1934 acts.

It is more alarming that under the present act the SEC cannot require books and records to be maintained. To prevent fraudulent financial practices which have recently occurred, the amendment would require bookkeeping subject to reasonable inspection as distinguished from actual investigation.

As written, the act penalizes fraud only when committed by registered advisers—those who are not registered or who do not choose to do so are immune. The proposal here would parallel earlier statutes in extending the penalty for fraud to any person under jurisdiction of the act, including those exempt from registration.

It should be clear that of five statutes proposed for amendment, the Investment Advisers Act of 1940 is sadly inadequate. And, insofar as advisers resemble brokers, the bill is sheltered in the wing of my sympathy for over-the-counter legislation.

HEARINGS SCHEDULED

Since I have not been chary in giving you my thought on future legislation, I can announce executive hearings of the Senate Subcommittee on Securities on S. 1178 through S. 1182 during May or early June. I shall devote myself to their passage as the subcommittee sees fit. My justification for the first major revision of Federal securities laws in 20 years is, as I have indicated, demonstrated need in enforcement areas, outmoded machinery for registering small issues and controlling advisers, and improved reconnaissance of the over-the-counter market.

SEC APPROPRIATIONS

I now turn to a subject even more cherished by the Commission than its protean legislative program. That subject, of course, is money. The testimony of the Commissioners has convinced me that their task is becoming larger and more important in the second postwar decade, whereas their appropriations and employment in proportion to increased workload have become smaller.

For the current fiscal year (1960), the SEC appropriation is $8,100,000, only $395,000, or 5 percent, above that for fiscal 1959. For fiscal 1961 the Bureau of the Budget allowed $8,900,000, representing 1,092 positions. The House reduced this figure by $375,000, or by 46 positions.

Under its acts the Commission is entitled to collect the following fees: Under the 1933 act, 10 cents per thousand dollars' worth of aggregate offering price of securities registered. For fiscal 1960 there is estimated $1,500,000 from this source; and in 1961, $1,866,300. Under the 1934 act, from stock exchange sales for fiscal 1960, there is estimated receipt of $1,080,000; for 1961, $1,100,000. From other sources there is estimated a sum of $28,700 for both years. Subtracting estimated fees from 1960's appropriation gives a net cost of $5,491,300; for 1961, $5,905,000.

It is immediately apparent that the fees charged by the Commission in nowise support the cost of its work. You know that they go directly to the Treasury. What is the overwhelming need of the Commission for more money?

A large chunk of its workload is processing registration statements under the 1933 act. In fiscal 1959 there were 1,226 statements filed, 1,119 examined; in 1960 it is estimated 1,600 will be filed, of which 1,452 will be examined; in 1962 it is estimated 400 will be carried over, 1,600 filed, a total of 2,000. Without more money, 475 statements may not be completed.

The securities industry has already felt the impact of receiving letters of comment within an average of 26 days and clearance within 41, rather than the 1958 averages of 14 and 24 days. To stem this tide, the SEC's

1961 budget requests 33 additional employees for the full disclosure program, which also includes proxy statements and annual reports.

CRIMINAL VIOLATIONS

I stress another Commission activity of concern to me. Preliminary and full investigations are necessary to discover civil or criminal violations of stock market laws. It is apparent that accompanying the 12½-million member family of shareholders are new parasitic swindlers who believe they have a right to live off this body. Not only have frauds become more insistent from overseas, but the sophistication of our domestic con men would surprise the most ardent fan of Ellery Queen. Warnings of the SEC and the New York Stock Exchange remind us that boiler rooms are volatile as never before.

Particularly disquieting to me is the charge that certain elements of the securities industry are being infiltrated by the organized underworld. In any case, the indictment for trial returned April 19 in Cleveland against Arthur Tortorello, Stanley Younger, Louis DeFilippo, "Vicky" Leinen alias Linda Lord, Lincoln Securities Corp., and others on charges of criminal violation of Federal securities laws will receive the close scrutiny of the Senate.

Under its enforcement program the SEC asks for 38 new employees to undertake the 990 investigations pending at the end of fiscal 1960 and hopes to close 580 during 1961.

The workload imposed by new investment companies staggers the imagination. Since 1940, 890 have been registered (378 being deregistered), and their increased worth has entranced their creators, as was Pygmalion, rising from $2.5 billion to $20 billion. At the present rate of inspection, the SEC will only be able to inspect 28 companies in 1960, placing the program on a 20-year cycle. Despite information submitted by these companies for other reasons, such rare inspections are absurdly small protection for the type of person who invests in mutual funds.

The total number of new positions requested in the Commission's budget for fiscal 1961 is 92.

INCREASED FEES

Though I am not on the Appropriations Committee my concern for SEC budget problems is directly related to the topic of this speech, "Securities Legislation—1960." That is, I believe in principle that a group which receives a special benefit or causes a special workload to a Government agency should pay as nearly as practical the cost of the service.

I am here referring to the workload imposed by registration statements. The total volume of 2,000 statements expected in 1961 may maintain or prolong the clearance period to 41 days. Last year, in addition to proxy statements, this work utilized about 80 percent of the time of the Division of Corporation Finance. Six years ago, after congressional request, the Commission attempted to estimate the cost of processing such statements under the Securities Act of 1933. If such an approximation can currently be made, it is my proposal to raise the fee under section 6(b) of the act to a point where it may more equitable pay for the cost of issuers' statements.

Likewise, it must be recognized that applications for registration and inspections of exchanges and broker-dealers cause a substantial workload to the Commission. Some years ago the SEC suggested that section 31 of the Exchange Act of 1934 have increased fees charged exchanges, from 2 to 5 cents. In practice these are passed on to the customer who benefits from the exchange's service and from SEC supervision. In addition, the resulting bill would impose for the first time the same fee for sales upon a group which has never directly paid a fee under the securities acts, the over-the-counter brokers and dealers.

The Commission has estimated that should the bill have been enacted in fiscal 1960, it would increase the receipt from exchanges by $1,600,000 and bring in $1 million from broker-dealers. This would have increased the percent of fees collected to total obligations from some 30 percent to 65 percent in fiscal 1960 and in fiscal 1961, 62 percent.

These estimates do not consider what would be collected if the fees for issuers under the 1933 act were raised. I hope that such an increase would more nearly approximate the operating cost of the Commission.

To impose higher fees upon the industry for the enlarged workload would be unfair without results on its behalf. Though the fees go into the general Treasury, I pledge myself to obtaining as much of these sums as possible returned to the Commission in appropriations.

The bill raising fees for exchanges and imposing them on broker-dealers was passed by the Senate in 1957. Similar bills have been introduced in the 86th Congress, H.R. 6294 and S. 737. Although the House has never voted on such a bill, the House Interstate and Foreign Commerce Committee announced hearings on H.R. 6294 for May 3, since postponed. To my knowledge, there has never been a bill introduced raising the fees under the 1933 act. Although the Senate Subcommittee on Securities did not have hearings last June on S. 737, the exchange and broker fee bill, it will be pending before us when the subcommittee holds its executive sessions.

It is my expectation, then, that from these varied proposals I will be able to confirm some legislation, "1960."

ADJOURNMENT TO MONDAY

Mr. CARLSON. Mr. President, if no other Senator desires to address the Senate at this time, I move that the Senate stand adjourned, under the previous order.

The motion was agreed to; and (at 4 o'clock and 5 minutes p.m.) the Senate adjourned, under the previous order, to Monday, May 23, 1960, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 19, 1960:

COAST AND GEODETIC SURVEY

The following for permanent appointments to the grades indicated in the Coast and Geodetic Survey, subject to qualifications provided by law.

To be lieutenants (junior grade)

Ray M. Sundean	Morton K. Meiers
Lawrence S. Brown	Robert M. Davidson
Karl R. Anderson	Ray E. Moses
George M. Poor	Pat T. Redden
James A. Ten Eyck	Douglas J. Wilcox
Gordon N. Orr	Frederick A. Ismond
Charles K. Townsend	Peter A. Martus
Ronald L. Newsom	Donald R. Tibbit
Donald W. Moncevicz	Charles G. Elliott
Doyle D. Harper	Gerald C. Saladin
Will Connell	Donald C. McIntosh
Richard L. Hess	Michael L. Olivier

To be ensigns

James Collins	William D. O'Neill
William A. Drohan	Archibald J. Patrick
Douglas O. Farrand	William G. Proffitt, Jr.
Richard Hull	E. Douglas Schwantes, Jr.
Bernard F. Karwisch	Robert H. Seay
Thomas E. Krakowski	Charles D. Strawman
Henry A. Mathis, Jr.	R. Lawrence Swanson
George A. Maul	
Park A. Nelson	

HOUSE OF REPRESENTATIVES

THURSDAY, MAY 19, 1960

The House met at 12 o'clock noon.

Rev. Carl E. Burrows, Trinity Methodist Church, Fort Ashby, W. Va., offered the following prayer:

The Lord is faithful in all His words, and gracious in all His deeds. (Psalm 145: 13.)

Almighty God, who art wondrous in power and glory, who stretched forth Thy hand and shaped the heavens and the earth: We are not worthy of the least of Thy blessings. Forgive us for sinning against Thee and grieving Thy spirit. Save us, O Lord, from selfishness and pride, that we will be enabled to serve our fellow man and give glory to Thee.

We give thanks to Thee for the beauty of another day, for the blessings of life, and for Thy kind providence to the children of men. Help us to be more aware of Thy revelations to us and lead us to glorify Thee in Christian living.

We pray this in the name of Jesus Christ, our Lord. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

COMMITTEE ON AGRICULTURE

Mr. POAGE. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tomorrow night to file a report on the bill H.R. 12261.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PUBLIC WORKS APPROPRIATION BILL, 1961

Mr. CANNON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations have until midnight Friday to file a privileged report on the public works appropriation bill for 1961.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. JENSEN. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

MINORITY VIEWS ON H.R. 12261

Mr. HOEVEN. Mr. Speaker, I ask unanimous consent that the minority members of the Committee on Agriculture may have until midnight tomorrow to file minority views on H.R. 12261.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

RURAL LIFE SUNDAY

Mr. HOEVEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. HOEVEN. Mr. Speaker, I want to call to the attention of the House a very significant observance next Sunday, May 22, which has been designated as Rural Life Sunday. This fifth Sunday after Easter has traditionally been set aside to emphasize spiritual values in rural living. Not only churches but other rural institutions, organizations, and agencies concerned with the improvement of rural life participate in this observance.

It is fitting that the people of the Nation should set aside this day to ask God's blessing on rural life, its resources, its land, and its people. Rapid changes are taking place in the rural community, and Rural Life Sunday should be a day of reflection and inventory of our basic values leading to better understanding of the present day community and closer relationships and coordination among organizations serving our rural community. It is always easy in a period of rapid change to lose sight of these basic values, and the observance of Rural Life Sunday on May 22 should be a reminder of our past heritage and future understanding of both the benefits and problems of rural living.

NECESSITY FOR MUTUAL SECURITY PROGRAM

Mr. CHAMBERLAIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CHAMBERLAIN. Mr. Speaker, if there is still one who doubts the necessity for a mutual security program, let him reflect on the events of the last few days at Paris.

After months of preparation, in the expectation that the two Presidents and the two Premiers would at least come to grips with the causes of the world's tensions, the meeting broke up without a glance at the agenda.

To all intents and purposes, the meeting was over 3 hours after it started.

The only subject of discussion was a demand that the President of the United States apologize to the Russian people for authorizing an act of unarmed reconnaissance against a regime which believes that war is necessary to revolution, and that revolution is necessary to the ultimate Communist victory.

I am glad that our President did not apologize for an act necessary to free world safety, and that he displayed—not wrath—but forbearance.

I am proud also to note that our country has closed ranks behind the President to support him in his actions and utterances.

It is to be hoped that this whole disappointing affair—if it served no other purpose—proved the ability of the free world to stand resolute and unafraid against yet another attempt to bully it into submission.

This solidarity is essential to our U.S. defense posture, to our whole strategy. The key to our containment of communism is mutuality of effort; we act in concert with our allies, and we complement each other.

The mutual security program, in its many facets, permits us to project our force nearer to the borders of the Communist bloc.

The military assistance program provides our allies with modern weapons and the skills to operate and maintain them. It enables them to behave with an assurance not otherwise possible, for the cost of modern arms is simply beyond the means of some countries.

Those countries which can support modern-day forces do so; those which cannot, and which also value human freedom and dignity, require assistance from us.

It is money well spent. Proportionally, we get more defense per dollar because of lower costs and pay scales, among other things. The alternative is to maintain more U.S. forces abroad at higher cost and with a greater drain on our dollar reserves.

But the more important consideration is how our allies will view any curtailment at this time. The most compelling reason is the requirement to show our allies, some under the very shadow of the Russian bear, that we value their friendship, and it is our intention to make every reasonable and honorable effort to maintain it.

LEWIS DESCHLER, PARLIAMENTARIAN OF THE HOUSE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, there is no person who plays a more important part in the consideration and deliberations of this body than our distinguished Parliamentarian who is highly respected by all Members and whose service to the House of Representatives has been a dedicated service throughout the years and has been outstanding in its nature. We were all grieved a few weeks ago when we heard of his sudden illness, and I know I speak the sentiments of all of my colleagues when I say we are so thankful and so happy that he is back with us again, our friend, Lew Deschler.

APPROPRIATIONS FOR LEGISLATIVE BRANCH, FISCAL YEAR 1961

The SPEAKER. The unfinished business is the passage of the bill (H.R. 12232) making appropriations for the legislative branch for the fiscal year ending June 30, 1961, and for other purposes.

CALL OF THE HOUSE

Mr. ANFUSO. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently, no quorum is present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer their names:

[Roll No. 98]

Albert	Durham	Miller, George P.
Alexander	Edmondson	Mitchell
Bailey	Elliott, Ala.	Morris, Okla.
Baring	Fogarty	Powell
Barry	Forand	Preston
Blitch	Fountain	Rains
Bonner	Gavin	Rooney
Brewster	Green, Oreg.	Santangelo
Brown, Mo.	Gubser	Scott
Buckley	Hébert	Short
Burdick	Johnson, Colo.	Taylor
Byrnes, Wis.	Kasem	Udall
Carnahan	Kilburn	Walter
Celler	Kitchin	Williams
Chelf	Laird	Wolf
Cooley	Landrum	Wright
Davis, Tenn.	McMillan	
Dawson	Martin	

The SPEAKER. On this rollcall, 376 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

LEGISLATIVE BRANCH APPROPRIATION BILL, 1961

The SPEAKER. The question is on passage of the bill, H.R. 12232.

Mr. HOFFMAN of Michigan. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were refused.

The SPEAKER. The question is on passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, FISCAL YEAR 1961

Mr. BROOKS of Louisiana submitted a conference report and statement on the bill (H.R. 10809) to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes.

CHESAPEAKE & OHIO CANAL NATIONAL HISTORICAL PARK, MD.

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 488 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2331) to establish the Chesapeake & Ohio Canal National Historical Park and to provide for the administration and maintenance of a parkway, in the State of Maryland, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs,

the bill shall be read for amendments under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

MATS VERSUS COMMERCIAL AIRLINES

Mr. BOLLING. Mr. Speaker, I yield 1 minute to the gentleman from Maryland [Mr. FRIEDEL].

Mr. FRIEDEL. Mr. Speaker, I ask unanimous consent to speak out of order and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. FRIEDEL. Mr. Speaker, various committees of the Congress have been concerning themselves in recent weeks with the problems being faced by the Military Air Transport Service. Judging from some of the things I have been hearing lately I think these committees might well concern themselves with our privately owned, certificated, and scheduled international airlines who find that MATS has become their biggest competitor, notwithstanding the rapid strides being made by Government-owned and wholly subsidized foreign-flag carriers.

Mr. Speaker, I would like to call attention to a recent book written by Mr. Temple Fielding, entitled "Fielding's Travel Guide to Europe." Mr. Fielding is to travel what the late Duncan Hines was to food and this book which is selling for $5.95 is certain to be high on the priority list of Americans who will be traveling abroad this year.

Of particular note, Mr. Speaker, is this paragraph contained in the Fielding book:

> Tip: If everything is sold out and your mission is very urgent, ask the American consulate or Embassy about getting in touch with MATS (Military Air Transport Service). This successor to the Air Transport Command, like so many Government bureaucracies, has expanded unchecked to the point where it is now the world's largest airline—bigger than Pan American and TWA put together. Since you've long been paying your share of this monstrous taxpayers' burden which steals such a colossal amount of traffic from the legitimate commercial carriers, you might as well try to cash in on its extremely low fares if the excuse comes up. Nonofficial civilians accepted on emergency basis only; U.S. military planes and pilots, with daily schedules to almost every corner of Europe.

Mr. Speaker, if there was any doubt that the Military Air Transport Service has become the Frankensteinian monster of the Department of Defense, Mr. Fielding's article removes it.

Mr. BOLLING. Mr. Speaker, House Resolution 488 provides for the consideration of H.R. 2331, to establish the Chesapeake & Ohio Canal National Historical Park and to provide for the administration and maintenance of a parkway, and for other purposes. The resolution provides for an open rule with 2 hours of general debate.

H.R. 2331 would establish the C. & O. Canal National Historical Park in the State of Maryland. The park will comprise about 15,000 acres, of which about 4,800 acres are now in Federal ownership; hence, the bill would authorize the purchasing of some 10,000 additional acres extending some 165 miles along the Potomac River from just above Great Falls to Cumberland. It will also include a 25-mile scenic parkway from Maryland's Route 51 near Paw Paw, W. Va., to the existing Long Ridge Road near Woodmont, Md.

The park is to be so administered, under the laws generally applicable to the national park system, as to preserve its historic, scenic, and recreational values and features. However, under an amendment recommended by the committee, lands within the park are to be available for public nonpark uses when such uses are found, in consideration of the public interest, to be of greater public necessity than park or parkway uses and are authorized under an act of Congress.

The park and parkway, if developed and administered as contemplated by the committee, promises to realize more enduring human values and serve far more people than would ever have been possible when the canal was used as a commercial waterway or than is possible under existing law.

About 18.5 million people live within 150 miles of the canal area. These include the people of Virginia, Maryland, Delaware, and the District of Columbia, seven-eighths of the population of Pennsylvania, two-fifths of that in West Virginia, and smaller percentages of the populations of New Jersey and Ohio.

The old Chesapeake & Ohio Canal affords a glimpse into history. It is also an important recreational site for tens of thousands of persons yearly from all the States of the Union. Its place in national history, its location close to the Nation's Capital, and its unique character clearly give it a national significance.

Situated along the banks of the Potomac, for a distance of some 185 miles from Washington to Cumberland, Md., the canal and towpath form one of the most scenic and picturesque riverside trails in the country. The canal itself is generally in a better state of preservation than the other large canals of the era during which they were built and used commercially.

The National Park Service is now in the process of formulating a master plan for the area that would be included within the park and parkway contemplated by H.R. 2331. Generally the plan will provide for facilities to interpret the historic features and natural history of the area, a museum, and trailside exhibits. Provision will be made for access and parking, camping, picnicking, hiking, boating, and fishing.

Land acquisitions will be required in accordance with the master plan and within the limitations of the act, to provide access routes and sites for facilities. Where the canal right-of-way is narrow, there is a need for scenic buffer areas. Such acquisitions are not possible under existing authorizations for the protection, maintenance, and improvement of the canal.

Estimates submitted by the Department of the Interior indicate that the costs of establishing, administering, maintaining, and protecting the park and parkway during the first 5 years of its existence would total $8,550,000. The aggregate costs of the additional land acquisition and development are estimated at $12 million.

Mr. Speaker, I know there is controversy over this proposed legislation, but I urge the adoption of the rule; and I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. BROWN of Ohio. Mr. Speaker, as the gentleman from Missouri has explained, this rule makes in order, under 2 hours of general debate, consideration of the bill, H.R. 2331, which, to say the least, is a very, very, very controversial measure. I opposed, as did some others, the granting of a rule by the Committee on Rules on this bill because, in my opinion, it is one of the most wasteful and unneeded proposals that has been brought before the Committee on Rules in the many years I have been a member of it. And I say that without any animosity toward the author of the legislation for whom I have a great personal affection and whom, of course, I cannot blame for wanting this bill which would provide a park anywhere—I do not know—from 50 to 100 feet wide and from 165 to 185 miles long through the very heart or center of his district.

This bill, as I recall it, and I am speaking a great deal from memory—for we have had some other problems in the Committee on Rules in the last few days, which have occupied my time—this bill provides not only for the use of some 4,800 acres of land the Government already owns between Washington and Point of Rocks in Maryland, which should be sufficiently large to give a proper recreational area for use of the people of Washington, and especially the younger folks who may want to drive out into that park for different and various reasons. But in addition to the use of that 4,800 acres of land, and I have no objection to the use of that particular land for park purposes, this bill would provide that the Government shall purchase over 10,000 additional acres to add to this proposed new park. The first cost would be anywhere—as they estimate the figures—from $8 million to $12 million. But if you will read the bill carefully, or study the report, you will note it also provides for the construction of a scenic highway of some 25 or 30 miles in length, out in the mountains where I am told by people who reside in that area, you could not possibly build that sort of parkway or special highway, double lane or triple lane or quadruple lane, I suppose, with a median strip in the center, for anything less than $1 million a mile. Of course, I am also informed, and I have the letters from people in the area who are protesting against it and people who know that country and live in it, where they have all sorts of mountain wilderness, if you please, to seek recreation, and a river in which to go fishing, that the real purpose behind this bill, once it is passed, to

not only add all this 10,000 acres additional land, and, build these access highways from Federal Route 40, and other public roads, but to also build a complete new highway, a new boulevard, or a new parkway, perhaps by extension of the George Washington Parkway we now have running as far as Great Falls or approximately so clear through to Cumberland, Md. Now I drive Federal Route No. 40 to Ohio along the old canal which is empty in many spots, and filled with water in some places, and lies between the Western Maryland Railroad tracks and Route 40—the old National Road. The canal is very narrow and of not much use for parkway construction.

I know some of our friends on the Supreme Court love to walk up and down that old towpath along the canal. But in my opinion, when you take into consideration the serious situation throughout the world, and the fiscal situation here at home; and when we have all sorts of appeals to expend public moneys on every kind of program the mind of man can conceive, to go ahead and do this thing now along this canal which has been there, and available for hikes, for the people who wish to go along it, for more than 125 years and will be there for a long, long time to come, it is simply wrong to even consider legislation of this type at this time. After all, unless conditions change a great deal, we will have to go out and borrow the money to meet the cost of acquiring this land and building these access roads and the other roads which will be needed if we establish this new national park. In my opinion, this is not a piece of legislation we should deal with. I have no objection, if we want to designate as a national park the 4,800 acres of land the Government now owns. That is in itself a large amount of land. That is nearly 8 square miles of land that can be used for recreational purposes. But to go out and buy 10,000 more acres of land, and then take over the canal area for some 165 miles beyond the end of the present Washington Parkway, so we will have, as I said a moment ago, a public park 50 or 100 feet wide in many instances, 165 miles long, and to say it is needed for recreation, when the people—and I have the letters here to show it—who live out there say they do not want it and do not need it, and that they have all the recreational areas they want, I think this is simply a waste of public money.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield.

Mr. HOFFMAN of Michigan. If the rule goes through and we appropriate the money, are we likely to be prepared to vote for raises for postal employees and for Federal education and for foreign aid?

Mr. BROWN of Ohio. Let me answer the gentleman by saying that I have consistently voted for economy and efficiency in the conduct of our public business, but in my opinion there are a great many places where we can spend this amount of money more wisely than we can through the passage of a bill such as this for a narrow parkway 165 or 185 miles long, one just as narrow as it can be, and then buy extra land to add to it. Then, of course, later on, if this legislation is approved and becomes law, they will be back here soon asking for multiple millions of dollars to build a gigantic parkway, and multiple roads, through that area, and through those mountains.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield further?

Mr. BROWN of Ohio. Yes; I yield further.

Mr. HOFFMAN of Michigan. I have a very distinct recollection that when we had WPA along all the streams they built pathways, stone-lined, some with cobblestones along the outside so as to make it easy for the fishermen. Is there anything in this bill to protect the rights and interests of fishermen along the Potomac?

Mr. BROWN of Ohio. You already have those along the river and the canal, to be enjoyed by you, by the people of the country, and some Justices of the Supreme Court.

Mr. HOFFMAN of Michigan. Not together, not together.

Mr. BROWN of Ohio. If this bill is enacted into law you can still go for strolls along the canal. The spenders are only asking for $8,500,000 now, but nobody knows how many millions they will ultimately ask.

Mr. HOFFMAN of Michigan. Down along the Rappahannock we cannot even get to the water because the people have acquired the land there in such a way as to make it almost impossible from Fredericksburg down.

Mr. BROWN of Ohio. There is nothing to keep you from now walking along the C. & O. Canal right-of-way or towpaths, if you want to, except the many gaps you may find in it.

Mr. Speaker, as far as I am concerned, I hope this rule is not adopted, and certainly I hope this bill is never approved by the House or enacted into law.

Mr. Speaker, I reserve the balance of my time.

Mr. METCALF. Mr. Speaker, I yield 10 minutes to the gentleman from Ohio [Mr. KIRWAN].

Mr. KIRWAN. Mr. Speaker, I have been here 24 years but I seldom take the floor of the House unless it is something I have to appropriate for. If this bill ever passes, the Appropriations Committee will be called upon to appropriate money for it. That is why I take the floor at this time.

The title of the bill reads "To establish the Chesapeake and Ohio National Historical Park," and the bill states it is for the "purpose of preserving and interpreting certain property in the State of Maryland for the benefit and inspiration of the people" of the other 49 States. What generosity on the part of the State of Maryland. She wants to share this with the other 49 States. Usually when a State has something of interest within its borders it sets up its own park to exploit it for its own purposes.

They talk of this being an historic canal. Let me tell you what an historic canal really is. In the district I represent we had a canal 125 or 130 years ago before the day of the railroads. It served Youngstown, Canton, Akron, and Cleveland along the Mahoning River that curved around into the Cuyahoga River. Two youngsters drove a mule along that canal. Those two youngsters went into the Civil War and afterward became famous. One became a general and the other a major. They both rose high enough to serve in the National Congress and were elected to the district I represent. Time passed, and they went even higher, being elected to the Presidency: Cleveland and Garfield. If you want a canal park for purely historical reasons go down there and build something in Ohio where there is a canal with a real historical significance. But I would not presume to ask this Congress to build such a memorial to these two great men in Ohio.

Just in Washington, D.C., and nearby Virginia and Maryland, the Federal Government already owns 42,000 acres of parks. It takes over 1,000 employees and over $2 million a year just to manage the national parks in this area.

The Park Service already has expenditures planned totaling over $160 million on over 50 projects in the District of Columbia, Virginia, and Maryland. Suppose the folks back home knew that. They would certainly call us to account.

Now we are being asked to authorize an expenditure of another $12 million for Maryland. Why this request is being brought up now I do not know. We say that this is the greatest lawmaking body in the world. Yet 3 years ago we authorized a study of the Potomac River at a cost of $1.5 million, and we have appropriated $790,000 to date for that study, and another $400,000 is budgeted for next fiscal year. The Corps of Engineers has filed its review report with the Appropriations Committee indicating that 12 reservoirs will be needed in this area, involving 57,400 acres, to meet the estimated minimum water supply and pollution-abatement requirements. If we build these 12 dams and reservoirs in this area, it will be the most scenic place in all of the United States. We should not be authorizing the purchase of another 10,000 acres of parkland in this area at the same time we are appropriating funds to survey the need for these reservoirs. The Corps of Engineers is spending $1.5 million to make this study, and yet this bill would give the go-ahead to buy and develop 10,000 additional acres of parks that will stand in the way of necessary development of the reservoirs for water storage. There has never been a major dam or reservoir built within a national park since the Park Service was created, in 1916.

Mr. Speaker, there are billions of dollars' worth of projects which we have authorized throughout the Nation, including parks, reclamation, flood control, and so forth, that we will never be able to afford to appropriate for in the foreseeable future, and maybe never. Certainly we should, at the most, add only the most urgent projects to this staggering group of authorizations.

I inserted in yesterday's RECORD a report from the Wall Street Journal. In the steel industry in my district there

are some 66,000 employees. It is the fourth largest steel center in the world. But the Youngstown mills are only at 45 percent capacity this week. So you can imagine there are thousands idle throughout the district. Steel mills for the Nation as a whole are only operating at 71.7 percent of capacity, so the whole Nation is down to the slowest pace in a non-strike-affected period since December 1958. I am not blaming anybody. What the trouble is I do not know.

We were told that in 1929 we were headed for the poor house. But there is one thing about that today: We are headed in the same direction, but we are going there in Cadillacs. We are already spending over $100 million a year for recreation, including appropriations to the National Park Service, the Forest Service, the Bureau of Reclamation, the Corps of Engineers, et cetera. We are spending millions of dollars just for recreational planning and I have supported these programs, but there is a limit as to what we can afford. We had better stop, look and listen, because as steel goes, so goes the Nation's economy. When you see the fourth largest steel center in the world working only 45 percent of capacity, you had better stop, look and listen before we authorize nonessential projects like this which will cost the taxpayers $12 million.

The Youngstown Sheet and Tube is on a short week. It has laid off several hundred workers in recent weeks. That is one of the biggest fabricating plants in the country. And yet we are in here today talking about buying 10,000 more acres of park land for the State of Maryland.

I am for the canal. We already have a Chesapeake and Ohio Canal Park covering 4,800 acres along the canal from here to Cumberland. We are now appropriating money annually to manage, maintain, and improve this area. I am for it. But to go up in the hills and buy 10,000 more acres at this time when we are studying the area for water storage and when our Federal budget is one of the highest in peacetime history, is just not justified in my opinion.

Maryland is a State that has much pride. Our Lord created some points of scenic beauty, and I cannot see why it should not have enough pride to issue bonds and buy this land and develop the area. But instead here in Maryland, and I repeat—it is a nice gesture—trying to share with the other 49 States and let them all participate in the payment. I do not know whether you will defeat the rule or defeat the bill, but I would like to see something done, because I do not want to be turning it down next year in the Committee on Appropriations.

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland [Mr. FOLEY].

Mr. FOLEY. Mr. Speaker, I am very proud to rise in support of my bill. I do not propose to take too much time, but I urge upon the Members of the House that the statements made by the previous speakers, in my humble judgment, indicate there is genuine merit in the bill and thus full consideration of the proposals contained in H.R. 2331 is amply justified.

As a starting point, I respectfully call your attention to certain statements made in the report filed by the Committee on Interior, on page 2 thereof.

> The Chesapeake and Ohio Park and Parkway, if developed and administered as contemplated by the committee, promises to realize more enduring human values and serve far more people than would ever have been possible when the canal was used as a commercial waterway or than is possible under existing law. No other proposal—

And I emphasize this—

> No other proposal that has been before the committee in recent years for the establishment of a new unit of the national park system has offered more people of the country such promise of an opportunity to appreciate a historical scene and at the same time to enjoy a natural setting of singular beauty.

I am urging that this rule be granted. You have heard the gentleman from Ohio [Mr. BROWN] say that he is not against the park. I do not believe I am amiss if I interpret that as meaning that he is not against making this a national historical park, which does not cost 1 cent of money. I urge upon you that statement as an argument for the rule. The gentleman from Ohio [Mr. KIRWAN] stated that he is not against the canal. In that connection, I want to emphasize, that we are talking now about, and this bill pertains solely to, Federal property, property that has been owned by our Federal Government since 1938. We are not considering property owned by the State of Maryland.

I wish to present to the Members the fact that this is the last and only continuous canal surviving from the 1820's and 1830's. We are not talking about a strip of land. We are talking about a very famous historical relic going back some 130 years. We are seeking to preserve by my bill, basically without any cost of money, this canal as a national historical relic, as a source, may I say to you, of inspiration to future generations.

These are some of the things we propose to present to you upon consideration of the merits after approval of the rule.

Twelve years ago this Congress authorized a study of the use of the C. & O. Canal, and the results of this study are contained in House Document 687, 81st Congress, 2d session, filed on August 16, 1950; and in 1956, 1957, and again in 1958 the Congress, both the House and the Senate, considered proposals for the development of the C. & O. Canal as a national historical park. I wish to call attention of the Members of the House to the fact that in July of 1957, just about 3 years ago, this particular measure now before the House for consideration passed the Senate. I emphasize that this bill passed the other body in July of 1957 without a dissenting vote.

H.R. 2331 provides for the establishment of a national historical park. There are now eight historical parks. They are Colonial National Historical Park, Yorktown, Va.; Appomattox Courthouse National Historical Park, Appomattox, Va.; Cumberland Gap National Historical Park, border of Virginia and Kentucky; Independence National Historical Park, Philadelphia, Pa.; Morristown National Historical Park, Morristown, Pa.; Chalmette National Historical Park, New Orleans, La.; Saratoga National Historical Park, Saratoga, N.Y.; Abraham Lincoln National Historical Park, Harrodsburg, Ky.

The C. & O. Canal is steeped in the history of the westward development of our country. To appreciate its historical status, one should recall that only the Erie Canal in New York State, connecting Lake Erie with the Hudson River, was on the same grand construction scale. The historic purpose of the C. & O. Canal can only properly be determined by reviewing the expressed thoughts of the dreamers, designers, and developers of the canal.

In 1770 Benjamin Franklin was one of the promoters of a new settlement in the area beyond the Ohio River. He advertised in London for colonizers and pointed out the access way through the mountains by way of the Potomac River.

In 1784 Gen. George Washington was the founder of a canal corporation to build a canal along the Virginia Potomac River banks. The canal was built to the vicinity of Great Falls by 1802. In over 36 years the Potomac Co. expended $725,000 on canal construction.

President Washington wrote to Thomas Jefferson the following:

> All the world is becoming commercial * * *. Nature has declared in favor of the Potomac and through the channel offers into our lap the whole commerce of the Western World * * * the ways are preparing and the roads will be made easy through the channels of the Potomac.

By 1820 George Washington's original corporation had become exhausted and ended operations. But his westward dream remained fresh and vital. On Washington's birthday, February 22, 1823, the Potomac Canal Co. was chartered by the Virginia General Assembly, as a successor of the original corporation to continue building the canal westward.

The need and importance of the canal project was emphasized by President James Monroe in his message to Congress on December 3, 1823.

> Many patriotic and enlightened citizens, who have made the subject an object of particular investigation, have suggested an improvement of still greater importance. They are of the opinion that the waters of the Chesapeake and Ohio may be connected together by one continuous canal, and at an expense far short of the value and importance of the object to be attained. If this could be accomplished, it is impossible to calculate the beneficial consequences which would result from it. A great portion of the produce of the very fertile country through which it would pass, would find a market through that channel. Troops might be moved with great facility in war, with cannon, and every munition, and in either direction. Connecting the Atlantic with the western country, in a line passing through the seat of the National Government it would contribute essentially to strengthen the bond of union itself.

A few weeks following President Monroe's declaration of support for the canal, the Virginia General Assembly on January 27, 1824, adopted an act incorporating the Chesapeake & Ohio

Canal Co., as a successor to the Potomac Canal Co. The enabling act was in the nature of an interstate compact with Maryland. The Maryland General Assembly on January 31, 1825, approved the compact to build the C. & O. Canal. Within weeks the Congress gave its consent to the compact by an act approved by President Monroe on March 3, 1825. The Federal act of consent appears in the CONGRESSIONAL RECORD of Wednesday, May 11, 1960.

The Potomac Canal Co., original successor of George Washington's canal corporation, assented to the interstate compact on May 16, 1825. It thereby surrendered all its rights to build the canal and transferred its property to the Chesapeake & Ohio Canal Co.

The basic plan of the new canal company was to connect by one continued canal the tidewater of the Potomac River with the steamboat navigation of the Ohio River and the southern shore of Lake Erie. The canal was to be in two divisions, the eastern section from the District of Columbia to Cumberland, Md., and western section from that terminal point to Pittsburgh.

When the Pennsylvania Legislature affirmed the interstate compact in 1826, it did so only on the condition that the canal "shall be extended to and terminate at Pittsburgh." This plan was approved by President John Quincy Adams in his message to Congress on December 7, 1826.

As soon as the Congress consented to the compact in early 1825, the Select Committee on Roads and Canals of the House of Representatives began an exhaustive study of the feasibility of the canal, the need and practical use for same, as well as the estimated cost of the facility. On January 30, 1827, the 2d session of the 19th Congress, the committee filed its report, No. 90, a 122-page document with exhibits and appendix.

The report is a major source of historical data on the C. & O. Canal. Throughout the report, the committee repeatedly refers to the project as, "this great work," "this great undertaking," "this great national work of unrivaled local as well as national utility," and constructing the canal would be to the "permanent advantage, security and honor of the entire Union."

The committee was seeking House approval of its recommendation that the Federal Government subscribe to 25,000 shares of canal company stock. Such subscription was to be made in five annual installments of $500,000 each for a total investment of $2,500,000. The Federal funds were to be limited for use only on the eastern section of the canal. Furthermore, the Congress required that the canal be constructed to "dimensions adapted to future and permanent national use, to make it subserve purposes of great and lasting public utility rather than of immediate profit."

The important national purpose of the C. & O. Canal is described by the committee at page 7 of Report 90 as follows:

> The subscription here invited and which the committee recommended, is to a work yet to be begun, but which, if successful, and of that no rational doubt any longer exists, if adequate funds for its execution be supplied, will supersede a navigation not only obstructed, but at all times dangerous, and a portage of many miles, over numerous rugged and lofty mountains, separating a population of two million souls from the residue of the same people, who are destined to multiply with a rapidity unexampled but among themselves, on both sides of the great barrier to their friendly intercourse which this canal is designed to surmount.
>
> The committee did not unanimously concur in recommending this subscription, without duly considering every other mode of accomplishing a work, as essential, in peace, to the permanent Union and commercial prosperity of the Eastern and Western States, as in war, to their common defense and safety.

At the time of the committee's report, there were 24 States in the Union. The 1820 population of the continental United States was 9,638,453. This increased to 12,866,020 in 1830, of which the rural population was 11,738,773. In that same year of 1830 there were 23 miles of railroad track in the United States. Sailing merchant vessels, including canal boats and barges, in 1830, amounted to total documented gross tons of 1,127,304. In 1828 when the C. & O. Canal construction started, sailing vessels were of 1,701,474 gross tons.

By 1924, when the C. & O. Canal closed operation, railroad trackage in the United States had reached 415,028 miles. Sailing vessels in the U.S. merchant marine in 1924 were of 1,184,867 gross tons. However, canal boats and barges in 1924 separately had a gross tonnage of 1,240,347. By 1945 sailing vessels were only of 114,725 tons but canal boats and barges had grown to 2,451,566 tons.

These facts are of historic and timely interest since the use of canalboats has steadily increased in commercial transportation since 1876. The Chesapeake and Ohio Canal National Historical Park is a fitting monument as the last survivor of the grand scale canal building era of our history.

The members of the Select Committee on Roads and Canals in 1827 proved themselves men of vision. In pages 11 and 12 of Report No. 90, they stated:

> In founding a durable work, its remote as well as proximate benefits are to be regarded, and what scale of measurement can determine the future extent of the population, wealth, and consequent consumption of the District of Columbia, if it shall become, as its great founders confidently anticipated, the emporium of the West.
>
> A work calculated to perpetuate to the American people, and their latest posterity, the blessings of peace, freedom, and independence; objects which in themselves, can have no limit to their values; because, without them all other advantages, public or private, national or individual, are precarious and fleeting: The expediency of providing for objects of such magnitude can be bounded only by the extent of the public resources.
>
> And no provision, among the many internal improvements which solicit the favorable counterance and pecuniary aid of the Federal Government can surpass, in this tendency, the Chesapeake & Ohio Canal.

It is clear that in the minds of committee members the construction of the Chesapeake & Ohio Canal was of historic, in fact heroic stature in dimension and importance. It was infused throughout with promoting the national interest. The committee report, however, is specific in defining the advantages of the canal to State and local interests. At page 13, the following highly descriptive language is used in this regard:

> No State of this Union; not one of its many markets; no branch of its industry, whether it speed the plough or spread the sail, or ply, at home, the shuttle or the hammer; whether its activity be exerted on land or the sea, to the North or South, the East or West, is without an interest in the accomplishment of this national work.

The Congress has been vitally interested in the Chesapeake & Ohio Canal since that first comprehensive report of January 30, 1827, 133 years ago. Between the 18th and 25th Congresses, a period of 16 years, a total of 52 committee reports and Executive communications specifically pertaining to the Chesapeake & Ohio Canal were filed.

On December 16, 1913, a report by the district engineer to the Secretary of War—House Document No. 893, 63d Congress, 2d session—estimated the total indebtedness of the canal at $27,166,604.69. The bonded indebtedness was $1,959,500 and State liens made up the balance. The cost of initial construction, major repairs, improvements, and interest on the company's indebtedness, thus totaled about $27 million. Of this amount, the United States and the District of Columbia provided $2 million.

The historic economic difficulties of the Chesapeake and Ohio Canal Co. have filled the records of law courts and newspaper files. For on July 4, 1828, when the first spade was turned on the canal by President John Quincy Adams, the first spike on the B. & O. Railroad track was driven at Baltimore by Charles Carroll, of Carrollton, the last surviving signer of the Declaration of Independence. A marathon economic conflict between the canal and the railroad had started. By February 19, 1830, the House Committee on Internal Improvements reported that it was a quandary as to which means of transportation, the canal or the railroad should cross the mountain at Cumberland, Md. Its historic hesitation and wonder are expressed as follows:

> The committee have had their attention drawn to the conflict which exists between the Chesapeake and Ohio Canal Co. and the Baltimore and Ohio Railroad Co.; the course, however, which they have adopted, supersedes the necessity of explaining this disagreement. It is the opinion of the committee, that the contemplated highway over the Allegany mountains will need the assistance of the National Government; but they cannot perceive any public inducements to aid both a canal and a railroad. The committee have reflected much on the interesting question, now in agitation in England and this country, namely, whether railroads are to be preferred to canals in ordinary cases, and on routes where there are no intermediate water communications, and they rejoice that the experiment is now about to be fairly made.

The race between the C. & O. and the B. & O. began on the same day, July 4, 1828. The railroad reached Cumberland in 1842. The canal was completed and opened to Cumberland on October 10, 1850, 110 years ago. In the early

1900's, the railroad bought the canal. On August 6, 1938, the B. & O. Railroad sold the canal to the U.S. Government for $2 million in settlement of a Reconstruction Finance Corp. loan. Since 1938 the Department of the Interior, National Park Service, has had the canal within its jurisdiction.

From 1938 through the 1959 fiscal year, expenditures by the Federal Government for restoration and improvement of the Chesapeake & Ohio Canal properties have been in the amount of $1,512,961.

As previous speakers have described in full, H.R. 2331 creates a National Historical Park of that 165-mile portion of the canal from Great Falls to Cumberland. The acreage requested to enlarge the park area, mathematically is equivalent to a 500-foot additional additional strip of land area for the full 165 miles. The profile of the adjacent land is such that for 40 of the total miles, the adjacent 500 feet is of the same level as the canal. The remaining 125 miles has, within 500 feet of the canal, elevations from about 25 feet to 200 feet in the mountainous areas.

The bill also authorizes in section 2, for the establishment of a scenic parkway of approximately 25 miles in the mountainous western part of the canal area. The parkway would run for its whole course through the Maryland Green Ridge State Forest, adjacent to the Potomac River gorge. Construction of the parkway would not begin until Maryland had donated the 100 acres per mile required by Federal law.

Careful consideration must at all times be given to the judicious use and development of federally owned lands. This principle applies equally to consideration of Federal funds on the federally owned C. & O. Canal. A wise and prudent investment of such funds pursuant to the authorization contained in H.R. 2331 would freely promote the public interest in my judgment.

If doubts as to this exist among the Members, it would seem proper to hearken back to Report No. 90 of the House Select Committee on Roads and Canals. On January 30, 1827, at page 17, our predecessors there stated in recommending Federal subscription to C. & O. Canal Co. stock:

> Subscriptions to the structure of canals may be founded on loans, therefore, without affording to posterity cause to complain; since their benefit descends unimpaired with the debt they control, the cheap price of the countless blessings which they diffuse.

Mr. Speaker, I want to conclude by saying there are three aspects contained in the bill H.R. 2331. One aspect costs nothing and would take the 165 miles of a national historic relic and make such property a national historical park. That costs nothing. If I understand both of the gentlemen from Ohio, they are not against that principle. We are seeking in another section of the bill to increase the present canal land area by 10,000 acres. We are anxious to debate the need and justification of this proposed enlargement and accordingly are requesting a rule. Finally, there is a third proposal to create a scenic parkway for 23 miles. We would like to present to the Members of the House the justification for that proposal. In light of the fact that thousands of dollars have been spent in studies of the use of this particular canal during the past 12 years, and since $1,500,000 has been authorized and spent since 1938 for the development and maintenance of the Chesapeake & Ohio Canal, we are seeking to have this wonderful relic preserved for all time by passage of H.R. 2331.

I urge upon you the granting of the rule.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Iowa [Mr. KYL].

Mr. KYL. Mr. Speaker, the distinguished gentleman from Ohio [Mr. KIRWAN] has spoken of the low production rate in steel. In 1957 we imported 1.1 million tons of steel mill products. Last year, 1959, we imported 4.4 million tons. In 1957 we exported 5.2 million tons of steel mill products. Last year our exports dropped to 1.5 million tons, a decline of 3.7 million tons in 2 years.

Combined, these factors indicate that 7 million tons of finished steel products were not produced in American mills, or by American labor. This is the equivalent of 10 million tons of steel ingots, or about 11 percent of our 1959 production.

Had this steel been produced in this Nation, it would have provided employment for 56,000 more people in the steel industry.

Mr. BOLLING. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

Mr. BROWN of Ohio. Mr. Speaker, to expedite the situation and to save time, I ask for a division.

The question was taken; and on a division (demanded by Mr. BROWN of Ohio) there were—ayes 34, noes 62.

Mr. FOLEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER. Evidently, no quorum is present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 134, nays 227, not voting 71, as follows:

[Roll No. 99]

So the resolution was rejected.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Barry.
Mr. Fountain with Mr. Taylor.
Mr. Preston with Mr. Martin.
Mr. Morrison with Mr. Judd.
Mr. McGovern with Mr. Baker.
Mr. Dawson with Mr. Smith of Kansas.
Mr. Brewster with Mr. Short.
Mr. Kitchin with Mr. Meader.
Mr. Lennon with Mr. Kilburn.
Mr. Cooley with Mr. Laird.
Mr. Scott with Mr. Byrnes of Wisconsin.

Mr. FALLON, Mr. LESINSKI, and Mr. BURKE of Massachusetts changed their vote from "nay" to "yea."

Mr. GAVIN changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The doors were opened.

PROGRAM FOR THE BALANCE OF THIS WEEK AND FOR THE WEEK OF MAY 23

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I have taken this time for the purpose of inquiring of the majority leader concerning the program for the rest of the day, the balance of this week, and the program for next week.

Mr. McCORMACK. There are two bills I should like to dispose of today; H.R. 6851, authorizing the establishment of a national historic site at Bent's Old Fort in Colorado which I understand the gentleman from Colorado will call up as the next order of business or after the gentleman from Arkansas [Mr. MILLS] has disposed of some matters. The other bill is H.R. 8226, to add certain lands to Castillo de San Marcos National Monument in the State of Florida.

If those two bills are disposed of as intended, we shall go over until Monday. It looks as though we ought to be able to dispose of those two bills today, as contemplated.

Mr. HALLECK. May I say that so far as I know they can be disposed of today.

Mr. McCORMACK. Notice I say, as contemplated.

Mr. HALLECK. I appreciate it.

Mr. McCORMACK. Monday is District Day, but I understand there is no business from the District of Columbia Committee.

Then there is the public works appropriation bill for 1961.

On Tuesday, Kentucky and Florida have primaries. There will be two bills taken up on that day, H.R. 10572 pertaining to Agriculture, Forests, National Administration; and H.R. 11761, Farmer's Home Administration.

Wednesday is Calendar Wednesday. Unless a rule is reported out, I understand Calendar Wednesday will be exercised in connection with the School Construction Assistance Act of 1960, H.R. 10128.

Mr. HALLECK. Might I inquire of the majority leader on that point, whether or not he intends to ask at this time to dispense with Calendar Wednesday of next week?

Mr. McCORMACK. No. As I have said heretofore, if any Member, no matter on what side, tells me that he would object to the request, I would not put that Member in the position to have to object. If any Member tells me they would like to exercise Calendar Wednesday and would not want me to make a unanimous consent to dispense with that, I feel I owe it to that Member in view of the relationship of the majority leader with each and every Member of the House, always endeavoring to cooperate as much as possible, I would not make such a unanimous consent request.

Mr. HALLECK. As I understand it, as it is listed here, if a rule is not granted and if Calendar Wednesday is not dispensed with, it is the purpose to call up the School Construction Assistance Act on Wednesday?

Mr. McCORMACK. It is in the discretion of the proponents of the legislation to do so. If a rule is reported out, I will program it for Wednesday. Again, in that connection, I would want to discuss that further, but I will program it for Wednesday if a rule is reported out, so far as the legislative program for next week is concerned.

The program for Thursday, Friday, and Saturday is as follows:

S. 2130, the bill relating to the payment to the Government of Japan. I understand that relates to the Bonin Islands.

H.R. 1157, relating to the development of the Ryukyu Islands.

There are primaries in North Carolina on Saturday next, and I might say there is a State convention in North Carolina today.

The reason I use the words "intended" or "contemplated" is I had that in mind.

Mr. HALLECK. I appreciate that. Mr. Speaker, in view of the fact that Memorial Day comes along on the following Monday, can the majority leader give us any information as to what the situation might be here at that time?

Mr. McCORMACK. I can assure the Members that with their cooperation, there will be no rollcalls on that day. I do not want to commit myself as to adjourning over now, but my mind is open in that respect.

Mr. HALLECK. I think the distinguished gentleman from Massachusetts is very fair as he always is.

Mr. McCORMACK. It is always my purpose to give Members their day in court and if some of the minor bills could be brought up and gotten out of the way, it will be very helpful to the Members because, as we all know, at the tail end of the session some of the bills are going to be lost. Yet, these bills are important to individual Members and I like to give all Members their day in court. Perhaps I may be overemphasizing this, but to me it is a question of a very solemn trust and that is why Members can make their appointments and we will protect them on May 30. As I said, my mind is open about adjourning over, yet if there are some bills that we might dispose of by taking advantage of that legislative day, that might be done, but as I say, I do not commit myself to that at this time.

Mr. HALLECK. I thank the gentleman.

Mr. McCORMACK. Subsequent to the above announcements, I have received the request to reassign the public works appropriation bill for 1961 from Monday to Tuesday, which I have done. After consultation with the minority leader, the gentleman from Indiana [Mr. HALLECK], and other interested Members, the program for the week of May 23, 1960, is as follows:

Monday: District Day—No business; S. 2130, payment to Japan; H.R. 1157, development of Ryukyu Islands; H.R. 6851, Colorado, Bent's Old Fort Historic Site; H.R. 8226, Florida, Castillo De San Marcos National Park.

Tuesday: Kentucky and Florida have primaries; public works appropriation bill for 1961.

Any rollcall votes on Monday or Tuesday will go over until Wednesday.

Wednesday, Thursday, Friday, and Saturday: H.R. 10128, School Construction Assistance Act of 1960; H.R. 10572, Agriculture, Forests, National Administration; H.R. 11761, Farmer's Home Administration.

North Carolina primary on Saturday.

Any further program will be announced later. Conference reports may be brought up at any time.

AMENDING SECTION 170 OF THE INTERNAL REVENUE CODE OF 1954

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 6779) to amend section 170 of the Internal Revenue Code of 1954—relating to the unlimited deduction for charitable contributions for certain individuals—with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 7, strike out all after "following:" over to and including "years." in line 9 on page 2 and insert: " 'For purposes of this

subparagraph, in the case of taxable years ending before January 1, 1961, within such 10 preceding taxable years, if the sum of the charitable contributions and the income taxes paid during the taxable years in any period of two consecutive taxable years exceeds 90 percent of the sum of the taxpayer's taxable incomes (as so computed) for such two consecutive taxable years, and if the sum of the charitable contributions and the income tax so paid during each such consecutive taxable year exceeds 75 percent of the taxpayer's taxable income (as so computed) for such year, the 90 percent test shall be considered satisfied with respect to both such consecutive taxable years; but no taxable year shall be included in more than one period of two consecutive taxable years and not more than two periods of two consecutive taxable years within such 10 preceding taxable years shall be taken into account.'"

Page 2, line 18, strike out "1959" and insert "1960".

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

Mr. GROSS. Mr. Speaker, reserving the right to object, was this bill unanimously reported from the committee?

Mr. MILLS. This bill was unanimously reported by the committee. It was passed last year. What we are considering now are some amendments of the other body, which I must frankly admit tighten up the bill, as it passed the House, and tighten the application of it. They are entirely acceptable to those who are in favor of the bill and to the Treasury and to our staff insofar as the technicalities are concerned.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

Mr. MILLS. Mr. Speaker, under present law, an individual is entitled to an unlimited deduction for charitable contributions if, in the current year and in 8 out of the 10 preceding years, he has given 90 percent of his income to charity or to the Federal Government in the form of income taxes. However, in certain cases, taxpayers did not qualify for this unlimited charitable contributions deduction even though in 8 out of the last 10 years more than 75 percent of their income went to charities or for taxes and even though the 90-percent test would have been met if it had been computed on the basis of the average charitable contributions and taxes paid in 2-year periods during the last 10 years.

The House bill provided that the 90-percent test was to be considered as having been met for any 2 consecutive years in the 10-year period preceding the current year if the total of the charitable contributions and taxes for such 2-year period met the 90-percent test. However, in order to qualify under the House bill, the individual's charitable contributions and taxes in each of the 2 years had to represent 75 percent of his taxable income and no one year could be included in more than one 2-year period.

As amended by the Senate, no more than two periods of 2 consecutive years may be taken into account in determining whether the 90-percent test has been satisfied in 8 out of the 10 preceding years. The Senate also amended the House bill to provide that the period to which the bill applies and within which the averaging device may be employed is limited to the 10-year period ending before January 1, 1961. Accordingly, under the bill as amended by the Senate, this averaging device will not become a permanent feature of the tax law. However, it is permissible for taxpayers to qualify for the unlimited charitable contribution deduction in the current and future years by averaging income and contributions and taxes in years prior to January 1, 1961. Furthermore, although the bill applies to taxable years beginning after December 31, 1956, a taxpayer will be permitted to average two periods of 2 consecutive years whether such 2-year period occurred prior to or after December 31, 1956, so long as those years come within the 10-year period ending before January 1, 1961. Finally, because of the passage of time since the bill was acted upon by the House, the Senate amended the effective date provision to provide that although the bill will continue to apply to taxable years beginning after December 31, 1956, no credit or refunds are to be paid as a result of this bill for any years beginning before January 1, 1960.

Mr. MASON. Mr. Speaker, existing law permits a charitable contribution deduction to an individual up to 20 percent of the taxpayer's adjusted gross income. The limitation is 30 percent in the case of contributions to churches, schools, colleges, and hospitals. Existing law contains a provision for the deduction of unlimited charitable contributions under certain circumstances. In general, to be eligible for the unlimited deduction, a taxpayer must be able to establish that in the current taxable year and in 8 out of 10 preceding years he has given 90 percent of his taxable income to charity or to the Federal Government in the form of income taxes.

The bill before us today, H.R. 6779, pertains to this requirement involving a pattern of giving in 8 out of 10 years.

The House bill provided that the 90-percent test was to be considered as met for any 2 consecutive years in the 10-year period preceding the taxable year if the total of the charitable contributions and taxes for the 2-year period met the 90-percent test. The House bill contained a further safeguard by requiring that in each of the 2 consecutive years the charitable contributions and taxes had to represent 75 percent of the taxable income and no one year could be included in more than one 2-year period.

The Senate in acting on this legislation amended the bill as follows: First, only two periods of 2 consecutive years may be taken into account in qualifying; second, the applicable period in which the averaging device is available is limited to the 10-year period ending before January 1, 1961; third, a clerical amendment clarifying the definition "taxable income"; and fourth, amendment to the effective date provision so that no refunds or credits are to be paid as a result of enactment of the bill for any years beginning before January 1, 1960.

Mr. Speaker, in my judgment these amendments approved by the Senate should be accepted by the House.

AMENDING INTERNAL REVENUE CODE OF 1954 RELATING TO CERTAIN WEAPONS

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4029) to amend the Internal Revenue Code of 1954 to eliminate the proration of the occupational tax on persons dealing in machineguns and certain other firearms, to reduce occupation and transfer taxes on certain weapons, to make the transferor and transferee jointly liable for the transfer tax on firearms, and to make certain changes in the definition of a firearm, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 5, line 2, strike out "1959" and insert "1960".

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

Mr. MILLS. Mr. Speaker, as the Members of the House will recall, this bill amends the special excise tax provisions in the Internal Revenue Code relating to short-barreled firearms, machineguns and the so-called any other weapon category.

The Senate amendment merely changes the effective date with respect to the changes in the occupational tax rates from June 30, 1959, to June 30, 1960, so as to make the application prospective. The bill passed the House unanimously last year, and the Senate amendment was necessitated simply by the passage of time.

Mr. MASON. Mr. Speaker, the House passed version of H.R. 4029 amended the sections of the Internal Revenue Code which were developed from the National Firearms Act so as to facilitate control of weapons used for illegal purposes. In essence, the legislation seeks to make it more difficult for criminal elements in our society to obtain weapons. The Senate in acting on this bill included an amendment having to do with the effective date of changes in the occupational tax rates applicable to certain types of weapons covered in the bill. This is a technical amendment made necessary by the passage of time since the bill was approved in the House.

Mr. Speaker, it is appropriate that the House has acted to approve the Senate amendment.

CREDITS AGAINST THE UNEMPLOYMENT TAX

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6482) relating to the credits against the unemployment tax in the case of merged corporations, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, strike out all after line 6 over to and including line 14 on page 2 and insert:

"(d) SUCCESSOR EMPLOYER.—Subject to the limits provided by subsection (c), if—

"(1) an employer acquires during any calendar year substantially all the property used in a trade or business of another person, or used in a separate unit of a trade or business of such other person, and immediately after the acquisition employs in his trade or business one or more individuals who immediately prior to the acquisition were employed in the trade or business of such other person, and

"(2) such other person is not an employer for the calendar year in which the acquisition takes place,

then, for the calendar year in which the acquisition takes place, in addition to the credits allowed under subsection (a) and (b), such employer may credit against the tax imposed by section 3301 for such year an amount equal to the credits which (without regard to subsection (c)) would have been allowable to such other person under subsections (a) and (b) and this subsection for such year, if such other person had been an employer, with respect to remuneration subject to contributions under the unemployment compensation law of a State paid by such other person to the individual or individuals described in paragraph (1)".

Amend the title so as to read: "An Act relating to the credits against the unemployment tax in the case of certain successor employers."

Mr. MILLS. Mr. Speaker, as Members of the House will recall, under present law contributions made by employers to State unemployment funds may be claimed as a credit against the 3-percent Federal unemployment tax. Ordinarily, since wages paid by a predecessor employer are deemed to be paid by a successor with respect to the calendar year in which the successor succeeded to the business, the successor employer is entitled to a credit against its Federal unemployment tax for State unemployment taxes paid by its predecessor. However, in some situations, although a predecessor has been considered an employer for State unemployment tax purposes, it has not been considered an employer for Federal unemployment tax purposes. In these situations, the successor has been denied a credit against its Federal unemployment tax for the State unemployment taxes paid by its predecessor and has been unjustly taxed by the Federal Government.

As passed by the House, H.R. 6482 corrected this situation where there has been a statutory merger or consolidation of corporations. However, the House bill did not take care of similar situations involving unincorporated businesses.

As amended by the Senate, the relief provided under the House bill would be extended to situations in which any employer acquires substantially all the property used in the trade or business, or in a separate unit of a trade or business, of another person and continues to employ some or all of the employees of the other person. In such a situation, the successor will be entitled to a credit for State unemployment taxes paid by the predecessor employer notwithstanding the fact that the predecessor is not considered to be an employer for purposes of the Federal unemployment tax.

The amendments contained in H.R. 6482 will apply to calendar years beginning after 1950. Since the effective date provision does not refer to a period of limitations for claiming credit or refund, no refunds or credits will be allowed where the calendar year involved is closed by the running of the statute of limitations.

Mr. MASON. Mr. Speaker, H.R. 6482 pertains to the unemployment tax imposed under the Internal Revenue Code. The legislation would remove an inequity involved in the availability of the credit against the Federal unemployment tax for contributions to State unemployment funds.

The legislation as it passed the House was specifically applicable to incorporated taxpayers. The Senate has amended the bill to make the provisions applicable to unincorporated businesses as well as corporations. I have joined with the distinguished chairman of the Ways and Means Committee in supporting the House approval of this Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

TEMPORARY TARIFF TREATMENT OF CHICORY

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 9308) to extend for 3 years the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert: "That sections 1 and 3 of the Act entitled 'An Act to suspend for two years the duty on crude chicory and to amend the Tariff Act of 1930 as it relates to chicory', approved April 16, 1958, as amended (72 Stat. 87; 19 U.S.C. 1001, par. 776 and note; Public Law 86-441), are each amended by striking out 'July 16, 1960' and inserting in lieu thereof 'June 30, 1963.' "

Amend the title so as to read: "An Act to extend until June 30, 1963, the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory."

Mr. MILLS. Mr. Speaker, as the Members of the House will recall, as it passed the House of Representatives H.R. 9308 provided for the continuation for a period of 3 years of the existing suspension of duty on crude chicory—except endive—and for the continuation for the same period of the statutory rate of duty of 2 cents per pound for chicory, ground or otherwise prepared. Under the House bill the termination date of April 16, 1963, was provided.

The Members will further recall that, since the original passage of this bill, a Senate amendment to another bill—H.R. 9307—was accepted by the House, providing a 90-day continuation, from April 18, 1960, to July 16, 1960, of the existing duty treatment on chicory, in order to give the Senate adequate time for further study of the situation before acting on the 3-year extension.

The Senate amendment to the pending bill, which provides for a termination date of June 30, 1963, instead of April 16, 1963, takes into account the previously enacted 90-day extension and makes the termination date coincide with the end of the fiscal year.

Mr. MASON. Mr. Speaker, H.R. 9308 pertains to the tariff status applicable to crude and ground chicory. The House-passed version of this legislation would have continued until the close of April 16, 1963, the suspension of duty on crude chicory—not including endive—and would have continued for the same period the statutory rate of duty of 2 cents per pound on ground chicory or chicory that is otherwise prepared. The Senate has amended the House-passed bill so that the suspension and reduction with respect to the duty would continue until the close of June 30, 1963.

The membership of the House will recall that the Congress has recently approved a continuation of the existing tariff treatment through June 16, 1960. It is appropriate that the House should concur in this Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

SUSPENSION OF IMPORT DUTIES ON CERTAIN SHOE LATHES AND CASEIN

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 9862) to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing, with Senate amendment thereto, disagree to the amendment of the Senate, and request a conference with the Senate on the disagreed votes of the two Houses.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas? [After a pause.] The Chair hears none and appoints the following conferees: Mr. MILLS, Mr. FORAND, Mr. KING of California, Mr. MASON, and Mr. BYRNES of Wisconsin.

INCOME TAX TREATMENT OF CERTAIN DISCHARGES OF INDEBTEDNESS OF RAILROAD CORPORATIONS

Mr. MILLS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 11405) to provide for the treatment of income from discharge of indebtedness of a railroad corporation in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act (11 U.S.C. 205), commenced before January 1, 1960, which was unanimously reported favorably by the Committee on Ways and Means.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 108(b) of the Internal Revenue Code of 1954 (relating to income of a railroad corporation from discharge of indebtedness) is hereby amended to read as follows:

"(b) RAILROAD CORPORATIONS.—No amount shall be included in gross income by reason of the discharge, cancellation, or modification, in whole or in part, within the taxable year, of any indebtedness of a railroad corporation, as defined in section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)), if such discharge, cancellation, or modification is effected pursuant to an order of a court—

"(A) in a receivership proceeding, or

"(B) in a proceeding under section 77 of the Bankruptcy Act,

commenced before January 1, 1960. In such cases, the amount of any income of the taxpayer attributable to any unamortized premium (computed as of the first day of the taxable year in which such discharge occurred with respect to such indebtedness shall not be included in gross income, and the amount of the deduction attributable to any unamortized discount (computed as of the first day of the taxable year in which such discharge occurred) with respect to such indebtedness shall not be allowed as a deduction. Subsection (a) of this section shall not apply with respect to any discharge of indebtedness to which this subsection applies."

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply to taxable years ending after December 31, 1959, but only with respect to discharges occurring after such date.

With the following committee amendments:

Page 1, line 3, after "That" insert: "(a)".

Page 2, line 11, strike out "occurred" and insert: "occurred)".

Page 2, strike out lines 20 through 23, and insert:

"(b) The amendment made by subsection (a) shall apply to taxable years ending after December 31, 1959, but only with respect to discharges occurring after such date.

"SEC. 2. Section 97 of the Technical Amendments Act of 1958 (26 U.S.C., sec. 162 note; 72 Stat. 1672), relating to deductibility of accrued vacation pay, is amended by striking out 'January 1, 1961,' and inserting in lieu thereof 'January 1, 1963,'."

Amend the title so as to read: "A bill to provide for the treatment of income from discharge of indebtedness of a railroad corporation in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act commenced before January 1, 1960, and for other purposes."

Mr. MILLS. Mr. Speaker, as amended by the Committee on Ways and Means, H.R. 11405 makes two changes in existing law. Both of these changes relate to the continuation of provisions which previously have been in effect.

First, present law provides that the discharge of indebtedness of a railroad corporation in a taxable year beginning before January 1, 1958, is not to result in taxable income for the railroad if the discharge occurred as the result of a court order in a receivership proceeding, or in a proceeding under section 77 of the Bankruptcy Act. The bill continues the application of this provision to discharges after December 31, 1959, but only if the court proceeding involved commenced before January 1, 1960.

Second, Congress in the Technical Amendments Act of 1958 provided that a deduction for accrued vacation pay is not to be denied for any taxable year ending before January 1, 1961, solely because the liability for it to a specific person has not been fixed or because the liability for it to each individual cannot be computed with reasonable accuracy. However, for the corporation to obtain the deduction the employee must have performed the qualifying service necessary under a plan or policy which provides for vacations with pay to qualified employees. The bill extends this same treatment to deductions for taxable years ending before January 1, 1963.

The Treasury Department has indicated that it does not object to the provisions of this bill, which was introduced by our colleague on the Committee on Ways and Means, the gentleman from Florida, Representative A. S. HERLONG, JR.

The Committee on Ways and Means was unanimous in recommending the enactment of this legislation.

Mr. MASON. Mr. Speaker, the bill, H.R. 11405, makes two changes in existing law, both of which relate to the continuation of provisions which previously have been in effect.

The first of these changes pertains to the discharge of indebtedness of a railroad corporation and would provide that such a discharge will not result in taxable income for the railroad if the discharge occurs after December 31, 1959, but only if the court proceeding involved commenced before January 1, 1960.

The second change pertains to the allowed deduction for accrued vacation pay and extends the present treatment to deductions for taxable years ending before January 1, 1963.

The Committee on Ways and Means was unanimous in reporting this legislation to the House and it is appropriate that the House should have given the bill its approval.

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SUSPENSION OF DUTIES ON METAL SCRAP

Mr. MILLS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 11748) to continue until the close of June 30, 1961, the suspension of duties on metal scrap, and for other purposes, which was unanimously reported favorably by the Committee on Ways and Means.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 2 of the Act of September 30, 1950 (Public Law 869, Eighty-first Congress), is hereby amended by striking out "June 30, 1960" and inserting in lieu thereof "June 30, 1961": *Provided,* That this Act shall not apply to lead scrap, lead alloy scrap, antimonial lead scrap, scrap battery lead or plates, zinc scrap, or zinc alloy scrap, or to any form of tungsten scrap, tungsten carbide scrap, or tungsten alloy scrap; or to articles of lead, lead alloy, antimonial lead, zinc, or zinc alloy, or to articles of tungsten, tungsten carbide, or tungsten alloy, imported for remanufacture by melting.

SEC. 2. This Act shall not apply to any article provided for in section 4541 of the Internal Revenue Code of 1954.

Mr. MILLS. Mr. Speaker, the purpose of H.R. 11748, which was introduced by our colleague on the Committee on Ways and Means, the Honorable THADDEUS MACHROWICZ, is to continue for 1 year, from the close of June 30, 1960, to the close of June 30, 1961, the suspension of duties on metal scrap. Under the bill, the proviso of existing law that the suspension shall not apply to lead scrap, lead alloy scrap, antimonial lead scrap, scrap battery lead or plates, zinc scrap, or zinc alloy scrap, or to any form of tungsten scrap, tungsten carbide scrap, or tungsten alloy scrap, or to articles of lead, lead alloy, antimonial lead, zinc, or zinc alloy, or to articles of tungsten, tungsten carbide, or tungsten alloy, imported for remanufacture by melting, would be retained. The bill also continues the existing provision that the suspension shall not apply to any article provided for in section 4541 of the Internal Revenue Code of 1954, relating to copper-bearing ores and concentrates and articles of which copper is a component material.

Favorable reports were received on this legislation from the Departments of the Treasury, State, Interior, Defense, Commerce, and Labor, and from the Director of the Office of Civil and Defense Mobilization, as well as an informative report from the U.S. Tariff Commission. The Committee on Ways and Means was unanimous in recommending the enactment of the bill.

Mr. MASON. Mr. Speaker, H.R. 11748, which was unanimously approved by the Committee on Ways and Means, provides for the continuation to July 1, 1961, of the suspension of duties on certain metal scrap. During its consideration of this legislation the committee received no indication of any opposition to the bill. Favorable departmental re-

ports were received from Treasury, State, Interior, Defense, Commerce, and Labor. A favorable report was also received from the Office of Civil and Defense Mobilization and an informative report was received from the U.S. Tariff Commission.

Mr. Speaker, I have joined with the committee chairman in urging the House approval of this legislation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. MASON] and the authors of the various bills, if they so desire, and I, have permission to extend our remarks in connection with the Senate amendments and also the bills that were passed.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

BENT'S OLD FORT NEAR LA JUNTA, COLO.

Mr. ASPINALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6851) authorizing the establishment of a national historic site at Bent's Old Fort near La Junta, Colo.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6851, with Mr. EVINS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule the gentleman from Colorado [Mr. ASPINALL] will be recognized for 30 minutes and the gentleman from Pennsylvania [Mr. SAYLOR] for 30 minutes.

The Chair recognizes the gentleman from Colorado.

Mr. ASPINALL. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, this is a comparatively small bill. It is true that it does have for its purpose the authorizing of a small historical site in the southeastern part of Colorado. I shall ask my colleague, the gentleman from the southeastern district of Colorado [Mr. CHENOWETH], to explain the bill in detail.

Mr. Chairman, Bent's Old Fort, which is the subject matter of this legislation, was one of the great centers of fur trading during the height of its activity in the Rocky Mountains. It played a unique part in pioneer settlement of the Southwest. The Board, established by act of Congress, to advise on national parks, historic sites, buildings, and monuments, has stated that Bent's Old Fort has exceptional value to commemorate and illustrate the history of the country.

The State of Colorado at present owns 5 acres of land containing the actual site of the fort. This land is administered by the State Historical Society. This small area, however, is inadequate to conserve the historic setting and allow proper interpretation of the fort to the visiting public.

H.R. 6851 directs the Department of the Interior to establish Bent's Old Fort as a national historic site. This is not an expensive project. Land acquisition cost is estimated at $46,240. The 5-acre tract owned by the State, it is understood, will be donated.

An excellent report of the National Park Service demonstrating the suitability of this site for addition to the national park system is in the committee file and I welcome any of my colleagues to examine it.

A brief history of Bent's Old Fort starts with the year 1821, the year in which Mexico became independent from Spain. American merchants opened trade relations at Santa Fe in what is now New Mexico. In 1829, Charles and William Bent, fur traders, entered business at Santa Fe. In 1833–34, the St. Vrain Co. completed Bent's Old Fort on the Arkansas River as a center of operations for both the business of the Santa Fe Trail and the Indian trade. In 1836, the fort served as the base of operations for John Fremont's third expedition and the fort became headquarters for the Upper Platte and Arkansas Indian Agency. After serving as a depot for U.S. Army supplies during the Mexican War, the old fort was abandoned in 1849. Reopened in 1861, it served as a stage station for the Barlow-Sanderson Overland Stage, Mail, & Express Co.

In 1926, a 5-acre site was acquired by the Daughters of the American Revolution of La Junta, Colo. Then in 1924, the State historical society acquired the site and subsequently partially excavated the remains of the old buildings.

Located on State Highway 194, just off U.S. Highway 50, I am sure that the old fort, as it is proposed to be restored, will be a very popular and instructive attraction. I urge adoption of the bill with the committee amendments.

Mr. SAYLOR. Mr. Chairman, I yield such time as he might require to the gentleman from Colorado [Mr. CHENOWETH].

Mr. CHENOWETH. Mr. Chairman, I want to thank the gentleman from Colorado [Mr. ASPINALL] chairman of the Committee on Interior and Insular Affairs, for his very fine presentation and excellent statement on this bill, which authorizes the establishment of Bent's Old Fort as a national historic site. I am happy to be the author of this bill and I hope it will receive the favorable consideration of the House.

This site at Bent's Old Fort is located, as the gentleman from Colorado [Mr. ASPINALL] mentioned, in the southeastern part of Colorado, in Otero County, on the Arkansas River between La Junta and Las Animas.

I feel that Bent's Fort has national significance and should be designated as a national historic site. This fort was located on the old Santa Fe Trail which extended from St. Joseph, Mo., to Santa Fe, N. Mex., and played such an important part in the development of our great Southwest.

Mr. Chairman, there is a favorable report on this bill from the Department of the Interior. The Advisory Board on National Parks, Historic Sites, Buildings and Monuments has approved Bent's Old Fort for designation as a national historic site and has indicated that it has "exceptional value in commemorating and illustrating the history of the United States."

I would like to state to the committee that there has been a great deal of interest in the preservation of Bent's Old Fort which played such a prominent part in the development of Colorado and the entire Southwest. Several books have been written about the fort, as well as numerous articles, reports, and accounts.

In 1953 the Daughters of the American Revolution presented a deed to this property to the State Historical Society of Colorado. This site comprises 5.07 acres. The State historical society has been most diligent in its efforts to obtain recognition of Bent's Old Fort as a national historic site.

The schoolchildren of Bent and Otero Counties helped raise funds to restore the fort, as did chambers of commerce and other organizations. Some restoration work has been done under the direction of Dr. Herbert W. Dick, archeologist of the Trinidad State Junior College, at Trinidad, Colo. A plan was worked out by Dr. Dick under which certain excavations of the fort's foundations were made, and some of the walls restored to a small extent.

Bent's Fort was truly a most important landmark of the old West. It served the hardy pioneers who blazed the trail and settled southern Colorado and New Mexico.

The fort was first constructed by Charles and William Bent, and Ceran St. Vrain about 1833. The dimensions were 100 by 150 feet. The walls were 17 feet high, 2 feet or more thick, and constructed of adobe bricks. The fort contained a corral for cattle, sheep, and horses, and there was room for the large freight wagons which transported supplies over the Santa Fe Trail.

The fort became the center of the fur trade in the Southwest. It served as protection from the different Indian tribes, some of whom were hostile and unfriendly, and who presented a constant threat to the safety of the traveler.

This trading post served as the principal outpost of civilization of the Southwest. It was the rendezvous of famous scouts, trappers, and traders, such as Kit Carson, Thomas Boggs, James Beckwourth, John Smith, Bill Williams, Lucien Maxwell, and "Uncle Dick" Wootton. It was the principal point of contact in the region for the Cheyenne, Arapaho, Comanche, Kiowa, Prairie Apache, Ute, and other Indian tribes, who came to the fort to trade. Both the Army and the Indian Service used this fort in dealing with the different tribes.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. CHENOWETH. I yield to my colleague from Colorado.

Mr. ROGERS of Colorado. Mr. Chairman, I am in favor of this legislation. It so happens that I started the practice of law near Bent's Old Fort, and have

been at the site on many, many occasions. Southeastern Colorado at one time was all Bent County, named after the people who came as traders with the Indians on the Santa Fe Trail. The fort was near the Arkansas River and at the point the trail turned off across the mountains to Santa Fe, N. Mex. These traders and the Indians were together for many years. This fort was the meeting place for all southeast Colorado. The fort itself was destroyed by the progress of civilization, but the people there recognized that this historical site should be preserved.

I commend the gentleman for introducing the legislation, and I am hopeful we can adopt it here this afternoon.

Mr. CHENOWETH. I thank the gentleman from Colorado. The first time I ever met the gentleman was in Las Animas where he was a prominent lawyer. Las Animas is the county seat of Bent County, which was named for William Bent, who along with his brother, Charles, and Ceran St. Vrain, constructed and operated Bent's Fort.

Mr. Chairman, mention was made by Mr. ASPINALL that some additional land must be acquired in order to properly protect this site. The Park Service has indicated that additional land will be necessary in order to develop and preserve this site. I hasten to state that I know of no one who is interested in this project for the purpose of making any profit out of the same. The land which is under question is owned by a Mr. Baldridge, who operates a farm and lives close to the site. He has been acting as caretaker for the fort property for the State Historical Society. This 5 acres of land includes a road from the highway to the site which passes through his land. It is important to obtain this additional land in order that the site may be properly protected and preserved. Part of the land surrounding this site is irrigated land. Some of it is pasture land and some is submarginal. I have not talked to Mr. Baldridge, the owner of the land. I do not know that the land has even been appraised. However, I am informed by the Colorado State Historical Society that Mr. Baldridge has no desire or intention of trying to profit from the sale of this land. He is interested in Bent's Old Fort, and I am sure that a satisfactory price can be worked out.

Mr. Chairman, the sum of $46,200 has been mentioned as the maximum amount that might be spent for additional land as recommended by the Park Service. I would like to say, Mr. Chairman, that I have reason to believe that it may be possible that this land may be made available to the Federal Government without any cost to the Park Service. After this bill is passed—and I sincerely hope it will be approved, I can assure the committee that I shall personally make every effort to get this land donated. I have been reliably informed there are those who are interested in the development of our national park system who may be willing to make this land available without cost to the Federal Government. I want to make it absolutely clear that this is not a situation where the owner of the land is trying to dispose of his land at a big profit. I can assure the committee that I shall do everything within my power to cooperate in getting this land without any cost to the Government. I have good reason to believe that this may be possible.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. CHENOWETH. I yield to the gentleman from Iowa.

Mr. GROSS. Will the gentleman support an amendment to strike section 3, which authorizes Federal funds, from the bill?

Mr. CHENOWETH. I will state to my friend from Iowa, that I cannot support an amendment. Some money will have to be spent in developing and operating this site. I am trying to make it clear that I shall do what I can to have the additional land made available to the Federal Government without cost. But, we must pass this bill and get the fort designated as a national historic site before anything can be done.

Mr. GROSS. Mr. Chairman, if the gentleman will yield further, section 3 applies only to the authorization of funds. It does not have anything to do with the rest of the bill.

Mr. CHENOWETH. We will need some funds, as I have mentioned. We may not be able to get all of this land without cost, although I hope we can, The Park Service would have to do what is ordinarily done in connection with historic sites. There will be some buildings, some markers, and other necessary expenses, I will say to the gentleman. I am talking about the acquisition of this additional land which the Park Service will need. I do not know how much they will require. Perhaps they will not need as much as they have indicated, but in any event, as the author of this bill, and one very much interested in preserving Bent's Old Fort as an historic site, I am just as much interested in saving money for the Federal Government as is the gentleman from Iowa or any other Member of the House. I am certainly going to use every influence I have to make certain that this land will be made available without expense to the Government. I am encouraged to believe this can be done. There will be some expense of operation and maintenance which is true of any historic site.

Mr. Chairman, I am not going to take more time of the committee. I hope I have made it crystal clear that this is a project which is of great importance to us in southeast Colorado. For the 15 years of its active existence Bent's Old Fort stood alone in the vast southwestern plains as the center of a fur and Indian trading empire, as a vital factor in the relations between the red man and the white man, as the only reliable way station on the long Santa Fe Trail. It was a symbol of the great influence of William and Charles Bent and Ceran St. Vrain in promoting good relations and trade with New Mexico, and a rendezvous point for explorers and military expeditions in the Southwest.

I might state that the wagon trains from Bent's Fort made trips to the Texas Panhandle, and up into Colorado, Wyoming, Nebraska, and the Black Hills of South Dakota. This gives some idea of the vast area served by Bent's Fort and the influence exerted by the Bents and St. Vrain, as well as the importance of Bent's Old Fort.

Mr. Chairman, I hope this bill will be passed. There is no controversy in Colorado over this proposed legislation, but on the contrary a great deal of interest in this project.

I will greatly appreciate your support of this bill and I urge the Members of the House to vote for this measure.

Mr. ASPINALL. Mr. Chairman, I yield 4 minutes to the gentlewoman from Idaho [Mrs. PFOST].

Mrs. PFOST. Mr. Chairman, this legislation was carefully considered in hearings before the Subcommittee on Public Lands of which I am chairman.

The distinguished gentleman from Colorado [Mr. CHENOWETH], the author of the bill, who just preceded me, has explained the bill in his usual able manner. He has conscientiously worked for passage of this measure since May of last year when he introduced the bill. The gentleman presented a very strong case in favor of the adoption of his bill when he appeared before the subcommittee to explain the merits of the legislation. I wish to commend the gentleman for his persistence and for the excellent presentation he made to the subcommittee, as well as the thorough explanation he gave for the benefit of Members on the floor today.

Establishment of this historic site has been requested by the Colorado Historical Society and other groups in the State of Colorado. There is no known opposition.

The Department of the Interior recommends enactment of this bill, based upon a thorough study by its experts, and the favorable recommendation from the advisory Board on National Parks, Historic Sites, Buildings, and Monuments.

This site is of special importance in portraying the story of the Santa Fe Trail, the administration of Indian matters, and the events as the civilian population traveled back and forth from middle western settlements to Rocky Mountain areas. Bent's Old Fort stands out above all other spots in southwestern history during this period.

The site of Bent's Old Fort is on the banks of the Arkansas River each of La Junta, Colo. At present, almost all of the historic remains of the old fort are underground. The lands in the vicinity of the site, except for the 5 acres owned by the State of Colorado, are included in what is now farm property. The property owner has expressed no opposition to the purchase of some 165 acres of land as proposed by the bill.

The committee has a copy of the account of the excavation at Bent's Fort in 1954. This project, under the volunteer labor of students at Trinidad State Junior College, of Trinidad, Colo., was fully successful in outlining the foundations of the old fort building. The excavation has confirmed the many available eyewitness accounts of the build-

ing and its use as the principal outpost in the Southwestern Plains and the only one on the famous Santa Fe Trail.

The land proposed for acquisition is believed to be the minimum necessary to provide a setting for the site and take care of access, parking, and administrative facilities.

I hope the House will act favorably on the bill.

Mr. ULLMAN. Mr. Chairman, will the gentle lady yield?

Mrs. PFOST. I yield to the gentleman.

Mr. ULLMAN. I want to commend the gentle lady, who is the very able chairman of the Subcommittee on Public Lands, for her diligence in bringing this matter before the House and for her consideration of many other similar matters that are so vital to the preservation of the great history of this Nation of ours.

Mrs. PFOST. I thank the gentleman.

Mr. SAYLOR. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Chairman, I want to ask some questions about what is going to happen if we pass this bill. I address these questions to the chairman of the subcommittee, some member of the subcommittee, or, perhaps, the author of the bill. What is this going to cost if the Federal Government makes this a national site? What will be the cost in the future?

Mr. CHENOWETH. I will say to the gentleman from Iowa that there will have to be a building erected, as the Park Service always does on these historic sites. I cannot tell the gentleman the exact amount. I think it will be a very nominal sum.

Mr. GROSS. Does the gentleman have any idea how many thousand dollars a year it will take to manage this place?

Mr. CHENOWETH. It will be a very small amount, but I would just be speculating if I mentioned any specific amount. I should say perhaps $10,000 a year, but that is just pure speculation.

Mr. GROSS. I do not know what is meant by a small amount.

Mr. CHENOWETH. I have mentioned $10,000 a year. I do not think the cost of operation would vary too much from this figure.

Mr. GROSS. Is there any other member of the committee who can shed any light on that? Let us assume we make a national site out of this. The Federal Government takes it over and then in perpetuity the taxpayers' money is going to be spent on this enterprise, to manage it. I would like to have some idea what this sort of thing costs.

Mr. CHENOWETH. This is no different than any other historic sites which we have authorized in the Congress, and which are now being enjoyed by the American people. I can assure the gentleman this historic site will be an attraction to the many tourists and to all who visit this area. I am sure they will be happy that this historic landmark has been preserved.

Mr. GROSS. But it is still going to be a burden upon the taxpayers of the entire country; is that not correct? I am not trying to single out this particular project, but I am thinking in terms of the other projects that we have and those that are yet to come. I think the House of Representatives ought to stop, look, and listen when it comes to taking over these so-called historic sites and putting the management of these sites in the hands of the Federal Government. I would like to have some idea of what a thing like this is going to cost in perpetuity, or even some idea what it is going to cost for a year or 5 years. Another question: Will this necessitate the building of a road or is there a road there already? What is this going to require?

Mr. ASPINALL. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am happy to yield to the gentleman.

Mr. ASPINALL. There is no highway contemplated. There might be a little lane from the highway into the old fort.

Mr. GROSS. There is a lane there now?

Mr. ASPINALL. A little lane in but no road as such.

Mr. GROSS. Then a road will have to be built.

Mr. ASPINALL. As far as the expenditures are concerned, if my friend will permit me to say, the way this bill is worded and the way the legislation is worded, the Committee on Appropriations of the House will have absolute control over any road improvements. It so happens that we are spending throughout the United States Federal moneys to go ahead and develop like areas. We are charging admission fees to get into most of those areas. Moneys collected as admission fees come back to the Treasury of the United States. The Congress has already gone along with what is known as Mission 66 of the Park Service, and many of the areas of importance to the traveling and visiting public have been improved. I would say that never in the history of any country, and especially so in our history, has the public ever demanded, as they are demanding today, the improvement and development of historic sites and recreation areas, areas with natural phenomena and so forth.

Mr. GROSS. Yes, and the House only a few moments ago spoke very decisively, did it not, by refusing to even consider legislation dealing with the expansion of a national park.

Mr. ASPINALL. Yes, and I think if the gentleman will permit me to continue further, I understand what happened to the bill this afternoon. There is much more to the history of that bill than came out on the floor today.

Mr. GROSS. Well, go ahead, but just do not take all of my time to make a speech in favor of this bill because I want some time to oppose it.

Mr. ASPINALL. My colleague did not ask me about this bill. My colleague asked me if I knew what took place this afternoon, and I was trying to answer him. The legislation on which we worked this afternoon has a long history.

Mr. GROSS. And so does Bent's Old Fort have a long history.

Mr. ASPINALL. And if I were to say what took place this afternoon, I would say that a part of our trouble arose because of the manner in which a part of our local treated the matter.

Mr. GROSS. I recall that the gentleman from Ohio, Mr. KIRWAN, the chairman of the appropriations subcommittee that provides money for these projects, came into the well of the House and vigorously and effectively opposed that project earlier this afternoon saying he would be confronted, as with this project, appropriating money from now to doomsday. But let me ask this question: Why does not the State of Colorado operate this?

Mr. CHENOWETH. The State is not in a position to operate such a project.

Mr. GROSS. Why does not the State of Colorado go ahead and operate Bent's Old Fort?

Mr. CHENOWETH. It is felt that this site is of such historic value that it should be designated a national historic site. I personally feel it deserves this recognition.

Mr. GROSS. I am asking why the State of Colorado does not go ahead and operate Bent's Old Fort, charge admission fees and administer this project?

Mr. CHENOWETH. I do not know if there will be any admission fees charged in the future, but this may be possible. But the State of Colorado does not operate historic sites like this. This site belongs in the National Park Service.

Mr. GROSS. The State historical society is presently managing this old fort, is it not?

Mr. CHENOWETH. They own it, yes; and employ a caretaker.

Mr. GROSS. Why does not the State of Colorado go ahead and operate this site?

Mr. SAYLOR. Will the gentleman yield?

Mr. GROSS. I yield.

Mr. SAYLOR. I will be happy to answer the question. The gentleman was a Member of the House when we passed an act which called for acquiring national historical sites and buildings. As a result of the findings of that group, authorized by this Congress, they reported that Bent's Old Fort was one that should be a national historical site. As a result of that, this legislation was introduced. So it is here because the national agency which Congress created has recommended that it be made a national historical monument.

Mr. GROSS. Does the gentleman favor all recommendations that are made in every survey that is authorized by Congress?

Mr. SAYLOR. I do not. The people who represent the State of Colorado first introduced this bill to carry out the recommendation. After full and complete hearings before our committee, this bill is before the House.

Mr. CHENOWETH. I do not want the gentleman to get the impression that the Colorado State Historical Society is going to give up all interest in Bent's Fort, because it is not. The society will continue to cooperate in every way possible.

Mr. GROSS. I understand, but the real cooperation will come from the taxpayers all over the country if this bill is passed.

May I ask the gentleman this question: You want 170 acres of additional land and you are asking $46,240 for land acquisition?

Mr. CHENOWETH. I mentioned three types of land. Some irrigated land, some pastureland, and some submarginal land.

Mr. GROSS. How much is irrigated?

Mr. CHENOWETH. I think about 54 acres; 48 acres are pastureland and about 48 acres are submarginal land. It is pretty well divided.

Mr. GROSS. Does the gentleman think $290 an acre is a pretty good price for that type of land?

Mr. CHENOWETH. Three hundred dollars an acre for irrigated land in this area is not an excessive amount.

Mr. GROSS. This is not all irrigated land.

Mr. CHENOWETH. No. I can assure the gentleman that regular prices will be paid for this land. This site is located just off of State Highway No. 194. The access road is there, but will of course have to be improved. The building of a new road is not involved.

Mr. GROSS. Who owns the 5.8 acres?

Mr. CHENOWETH. The Colorado State Historical Society.

Mr. GROSS. Is that society an official part of the State of Colorado?

Mr. CHENOWETH. The State historical society is by statute an educational institution of the State of Colorado.

Mr. GROSS. Is that the State?

Mr. CHENOWETH. It could be considered a part of the State of Colorado. It solicits members who pay annual dues, and reports are made to the Governor.

Mr. GROSS. Why could not the State of Colorado acquire this land?

Mr. CHENOWETH. That might be possible. The State might be able to help in the purchase of this land, if that should become necessary. However, I have information, as I said a moment ago, that leads me to believe that we can get this land donated and without any expense to the Government.

Mr. GROSS. The gentleman does not want support from the Government? I will agree to support his bill if he will take out section 3.

Mr. CHENOWETH. The gentleman knows Federal funds will be necessary in the operation and maintenance of this site.

Mr. GROSS. That is why you want this bill. You want the Federal Government to take this deal over.

Mr. CHENOWETH. We want to preserve this national historic site.

Mr. GROSS. You want the Federal Government to take over the financial responsibility and I am opposed to that.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GROSS] has expired.

Mr. ASPINALL. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Chairman, this is not a new fight. I have some bruises as the result of an earlier fight, which was the same fight as this. If the Congress has come to the conclusion that the national park system is against the national interest, and the saving of money is more important than having a system of parks and monuments that commemorate the history of our country, then I have a proposition for the House. Perhaps the greatest wonder of this country is the Grand Canyon. If it is the taxpayers that we are so completely concerned about, I am sure that if we put this park on the open market we could get half a billion, or a billion dollars for it. This seems to be the direction we are sliding in.

I think we ought to look it squarely in the face. This is a little bill; it is not going to involve any great expenditure. I support it. I think it is soundly conceived. I think the park system itself is one of the glories of our country. I think if we ever reach the day when we cannot lend support to our national park system, when we are not willing to expand it, or to spend a little money on it, it will be a shame. I am a spender when it comes to parks; I am a spender when it comes to schools, and I am very shameless about it, I may say to the gentleman from Iowa. I will go along with the bill because I think this is the kind of thing that makes America glorious.

Mr. ASPINALL. Mr. Chairman, I have no further requests for time.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior shall acquire, on behalf of the United States, by gift, purchase, condemnation, or otherwise, all right, title, and interest in and to such lands, together with any improvements thereon, as the Secretary may deem necessary for the purpose of establishing a national historic site at the site of Bent's Old Fort on the Old Santa Fe Trail, located in Otero County, Colorado, approximately seven miles east of La Junta, north of the Arkansas River.

With the following committee amendment:

Page 1, lines 5 and 6, strike out "all right, title, and interest in and to such lands, together with any", and insert in lieu thereof "such lands, interests therein and".

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 2. (a) The property acquired under the provisions of the first section of this Act shall be designated as the Bent's Old Fort National Historic Site and shall be set aside as a public national memorial to commemorate the historic role played by such fort in the opening of the West. The National Park Service, under the direction of the Secretary of the Interior, shall administer, protect, and develop such monument, subject to the provisions of the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916, as amended and supplemented, and the Act entitled "An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes", approved August 21, 1935, as amended.

(b) In order to provide for the proper development and maintenance of such national historic site, the Secretary of the Interior is authorized to construct and maintain therein such markers, buildings, and other improvements, and such facilities for the care and accommodation of visitors, as he may deem necessary.

SEC. 3. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that all debate on the bill H.R. 6851 and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. ASPINALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. EVINS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6851) authorizing the establishment of a national historic site at Bent's Old Fort near La Junta, Colo., had come to no resolution thereon.

ADDING CERTAIN LANDS TO CASTILLO DE SAN MARCOS NATIONAL MONUMENT, FLA.

Mr. ASPINALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8226) to add certain lands to Castillo de San Marcos National Monument in the State of Florida.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 8226, with Mr. EVINS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule general debate is limited to 1 hour. The Chair will recognize the gentleman from Colorado [Mr. ASPINALL] for 30 minutes, and the gentleman from Pennsylvania [Mr. SAYLOR] for 30 minutes.

The gentleman from Colorado is recognized.

Mr. ASPINALL. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, the Castillo de San Marcos National Monument, which is the subject of this legislation, was established in 1924. Two small tracts of land, proposed to be acquired, will enhance the setting of the monument and will provide parking for visitors. It will also make possible the relocation of an inadequate existing street and permit restoration of part of the grounds.

In 1958 the Department of the Interior entered into an arrangement with Florida State officials and officials of the county and the city of St. Augustine to overcome traffic problems at the site. The arrangement makes it possible for the State and local agencies to proceed with an improvement program for the streets and for part of the bayfront property. Enactment of H.R. 8226 will permit acquisition of property standing in the way of this commendable development.

This small acreage of land—less than 3 acres—unfortunately is quite expensive. This land is in the heart of the city of St. Augustine, part of which is occupied by an old hotel and other buildings. The cost of acquiring the parcels of land is estimated at $606,000. The alternatives have been explored and no other feasible alternative has been offered.

Enactment of H.R. 8226 will allow the Government to carry out its obligation, as owner of the monument grounds, in achieving a solution to the present highway bottleneck. At the same time, the usefulness of the monument will be increased and the attractiveness to tourists will be improved.

We are dealing here with one of the most important historic sites in southeastern United States. It attracts hundreds of thousands of visitors from all parts of the country. The visitations in 1959 exceeded 450,000 persons. The admittance fees to the monument, together with income to the Treasury from concessions, in 1959 exceeded $66,000.

Enactment of this measure has been recommended by the Department of the Interior and amendments have been suggested. These amendments have been adopted by the committee. I recommend favorable consideration of the measure.

Mr. SAYLOR. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, many of you who have visited St. Augustine recently will realize that traffic congestion, in the area of our historic monument in that city, is probably as bad as anywhere in the State of Florida. To relieve the traffic congestion, it has been suggested by our Park Service that a tract of land in the immediate vicinity of the monument be acquired, in order to make it possible for the tremendous number of visitors who are coming to that area to find places to park and to visit our national monument.

Now, as is always customary when the Federal Government or any State or local agency acquires a tract of land in a concentrated metropolitan area, the price is high. The owners do not like to part with their property, but in the service to many the rights of a few must be subjugated, and that is the situation that the committee finds itself in today.

There are several owners of the tract of land which is involved, and it is necessary for the Federal Government, if they expect to continue to have adequate use of our facilities at St. Augustine, to acquire the additional tract of land.

Mr. Chairman, I would like to say, following the statement of our chairman, that the House Committee on Interior and Insular Affairs differs a great deal from some of the other standing committees of the House in that they meet and have sessions 5 days a week, every week that the House is in session. It is necessary, because over the years the history of this Congress and other Congresses will show that this commiteee turns out between 20 and 25 percent of all of the legislation that is passed by any Congress—with the exception of private bills coming from the Committee on the Judiciary—handling such myriad of phases as Indian affairs, territories, and insular possessions, mines and mining, public domain—which includes all of our national parks which were created out of the public domain—and irrigation and reclamation. The work of this committee is tremendous. And, I want to say that in the years that I have been a member of this committee, all of the chairmen from both parties are to be commended for the fact that if a member from any area of the country introduced a bill which affected his district, there has always been a conscientious effort by the chairman and the subchairmen, as well as the members of the committee, to see that the bills are given a hearing, that reports are received from the departments downtown, and that the matter is brought to the floor of the House. And, it is the purpose of this committee to see to it that legislation is presented and that the House work its will.

Mr. ASPINALL. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from Colorado.

Mr. ASPINALL. Is it not a fact that every bill that our committee has reported to the House for consideration has met all of the criteria under which we operate?

Mr. SAYLOR. That is correct.

Mr. ASPINALL. And when legislation is brought up here, if the Members of the House are not in accord, that is the time for them to express their position.

Mr. SAYLOR. That is the time. If it does not meet with their approval, that is the time for the House to work its will, and that is an example of the legislative process that our committee, the House Committee on Interior and Insular Affairs, gives to the House in order to prove that it is a real democratic organization and that it has a chance to work its will.

Mr. ASPINALL. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. HERLONG].

Mr. HERLONG. Mr. Chairman, this bill simply implements an agreement made by the city commissioners of the city of St. Augustine, the county commissioners of St. Johns County, and the Florida State Road Department, with the Department of the Interior. It covers the acquisition of slightly less than 3 acres of land adjacent to the fort which is the historical feature of the Castillo de San Marcos National Monument.

The purpose of this agreement, and of the land acquisition, is to permit the restoration of certain historic areas of the fort grounds and to facilitate traffic and parking conditions for the people from all over the country who visit the fort each year.

In addition to furthering the Mission 66 program, these improvements will make an important contribution to a forthcoming event which is of the greatest historical significance to every American. In 1965 will be celebrated the 400th anniversary of the founding of beautiful St. Augustine, the oldest city in the United States. It is highly desirable that H.R. 8226 be enacted so that the restoration and improvements can be completed by that year, when it is estimated that many times the number of visitors to the Castillo de San Marcos, now running nearly half a million a year, will make the pilgrimage to the lovely and historic city of St. Augustine.

Mr. Chairman, I urge that this bill be approved.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. HERLONG. I am glad to yield to my colleague from Florida.

Mr. HALEY. Mr. Chairman, I would like to say to the Members of the House that this is one of the very few bills where the State of Florida is asking that a historical monument and park be set aside. Usually the State has acquired these lands itself. For instance, with reference to the Everglades National Park, we acquired the land necessary to establish that park and turned it over free and clear to the Federal Government. This is one instance where the economic situation of the city itself does not permit that.

Mr. Chairman, I urge the adoption of this bill.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HERLONG. I am glad to yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I should like to address a question to the gentleman in charge of the bill. Approximately how much longer will consideration be given to this bill?

Mr. ASPINALL. I should expect about 15 minutes.

Mr. HOFFMAN of Michigan. I thank the gentleman.

Mr. HERLONG. Mr. Chairman, I should like to repeat one thing that has been pointed out and that is that the income from this monument by way of admissions and concessions runs about $66,000 a year to the Federal Government. That is more money than it takes to operate the facility. So this is one national monument that pays a profit to the Federal Government.

Mr. ASPINALL. Mr. Chairman, I yield 2 minutes to the gentlewoman from Idaho [Mrs. PFOST].

Mrs. PFOST. Mr. Chairman, this legislation—H.R. 8226—provides for the acquisition of two small parcels of land to the Castillo de San Marcos National Monument at a cost of $606,000. The author of this bill, the gentleman from Florida, has been industrious in his efforts to get favorable consideration of this measure. He made a very able presentation before our subcommittee in explaining his bill.

Testimony before the Subcommittee on Public Lands made it clear that there is at present no parking space of any kind at the fort, and heavy traffic is causing a serious problem.

One of the properties to be acquired is now occupied by an old hotel. This building, of frame construction, some 75 years old, is presently for sale and can be acquired at this time with the consent of the owner. It is the site value of the real estate, rather than the value added by the building itself, that gives this property a rather high value.

The highway that runs past the monument is U.S. Highway No. 1. There is a highway bypass to avoid traffic

congestion in the city of St. Augustine, but there is still a great deal of heavy traffic going past the monument.

The Board of County Commissioners of St. Johns County and the City Commission of St. Augustine have adopted resolutions favoring the actions proposed to be taken through this legislation.

As a part of its obligation, as a landowner in the city of St. Augustine, the Federal Government, as recommended by the Department of the Interior, has an obligation to correct the situation, and I therefore recommend that the measure be adopted.

The CHAIRMAN. If there are no further requests for time, the Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to procure in such manner as he may deem to be in the public interest, including procurement with funds which may be appropriated therefor, the following described lands, or interests therein, situated in the city of Saint Augustine, Saint Johns County, Florida, for addition to Castillo de San Marcos National Monument:

AREA A

Starting at a point in the seawall of Castillo de San Marcos National Monument, which is the southeast corner of the present Federal reservation; thence westerly 81.86 feet, more or less, along the existing boundary of Castillo de San Marcos National Monument to the intersection of said line with the west right-of-way line of Bay Street, the point of beginning;

Thence southerly along the west right-of-way line of Bay Street 143.5 feet, more or less, to the intersection of said right-of-way line with the north right-of-way line of Cuna Street which is the southeast corner of block 1; thence westerly 194.0 feet, more or less, along the north right-of-way line of Cuna Street to the intersection of said right-of-way line with the easterly right-of-way line of Charlotte Street, which is the southwest corner of block 1;

Thence northerly along the east right-of-way line of Herrea Way 25.0 feet, more or less, to a point where said right-of-way line is intersected by a prolongation of the northerly right-of-way line of Cuna Street;

Thence westerly across Charlotte Street to the northwest corner of Charlotte and Cuna Streets, which is the southeast corner of block 7;

Thence northerly along the west right-of-way line of Charlotte Street 57.0 feet; more or less, to a point;

Thence northwesterly 28.3 feet, more or less, to a point located 20 feet west from the west right-of-way line of Charlotte Street on the southerly property line of land now or formerly owned by Mrs. J. C. Windsor, being lots 13 and 14, block 7;

Thence westerly along the said southerly property line of land now or formerly owned by Mrs. J. C. Windsor 149.0 feet, more or less, to a point on the easterly property line of land now or formerly owned by Blanche L. Serveau, being lot 10, block 7;

Thence northerly 88.5 feet, more or less, along said easterly property line of land now or formerly owned by Blanche L. Serveau to a point on the southerly property line of land now or formerly owned by Mary Peck, being lot 18, block 7;

Thence westerly along said southerly property line of land now or formerly owned by Mary Peck 125.5 feet, more or less, to the easterly property line of land now or formerly owned by Colonial St. Augustine, Inc., being lot 5, block 7;

Thence northerly along said property line of land now or formerly owned by Colonial St. Augustine, Inc., 42.0 feet, more or less, to the southerly property line of land now or formerly owned by Frank Upchurch, being lot 4, block 7;

Thence easterly along said southerly property line of land now or formerly owned by Frank Upchurch, 50.0 feet, more or less, to the westerly property line of land now or formerly owned by Mary Peck;

Thence northerly along said property line of land now or formerly owned by Mary Peck and along said property line prolonged 149.0 feet, more or less, to a point on the southerly property line of land now or formerly owned by F. Victor Rahner, fragment of lot 1, block 7;

Thence westerly along said southerly property line of land now or formerly owned by F. Victor Rahner 40.0 feet, more or less, to a point on the easterly property line of land now or formerly owned by the R. L. Parks estate, portion of lot 1, block 7;

Thence northerly along said easterly property line of land now or formerly owned by the R. L. Parks estate 95.0 feet, more or less, to the intersection of said property line with the southerly right-of-way line of Fort Alley which point is the northeast corner of lot 1, block 7, and the northwest corner of lot 21, block 7;

Thence northerly on a prolongation of said right-of-way line 14.0 feet, more or less, to a point on the north right-of-way line of Fort Alley;

Thence westerly 5.0 feet, more or less, to the point on said right-of-way line which is the southwest corner of lot 5, block 6, and the southeast corner of lot 4, block 6;

Thence northerly 148.0 feet, more or less, along the lot line which is common to lot 5, block 6, and lots 2 and 4, block 6, and said line prolonged to a point on the southerly property line of land now or formerly owned by the Gulf Oil Company;

Thence westerly along the southerly line of said land now or formerly owned by the Gulf Oil Company and its prolongation to a point 60 feet eastward of the easterly right-of-way line of Saint George Street;

Thence northerly along a line parallel to and 60 feet eastward of the said easterly right-of-way line of Saint George Street a distance of 95.0 feet, more or less, to a point in the present boundary of the Castillo de San Marcos National Monument;

Thence easterly along the said present boundary of the monument a distance of 107.98 feet to a marble cornerstone, being the northeast corner of said block 6; thence continuing along the said present boundary of the Castillo de San Marcos National Monument in a general easterly and southeasterly direction to the point of beginning, containing in all about 2.45 acres of land.

AREA B

Beginning at a corner in the existing boundary of the present Castillo de San Marcos National Monument which is the northeasterly corner of Orange Street located about 20.0 feet west of the city gates;

Thence westerly along the northerly right-of-way line of Orange Street, which also is the present boundary of the Castillo de San Marcos National Monument, a distance of about 180.0 feet to a point 2.0 feet east of the east wall of the school dental clinic building;

Thence in a northerly direction on a line parallel to and 2.0 feet east of said building wall a distance of 75.0 feet, more or less, to a point in the north boundary of the historic "Lines";

Thence easterly 180.0 feet, more or less, to a westerly corner of the present boundary of the Castillo de San Marcos National Monument lying northwest of the city gates;

Thence southerly along the present boundary of the national monument 75.0 feet, more or less, to the point of beginning; containing in all an area of about 0.31 acre of land.

With the following committee amendments:

Page 2, line 25, strike out the words "feet, more or less, to" and insert in lieu thereof the words "feet to".

Page 3, line 9, strike out the word "Serveau," and insert in lieu thereof "Cerveau,".

Page 3, line 13, strike out the word "Serveau" and insert in lieu thereof "Cerveau".

Page 4, line 21, strike out the word "right-of-way" and insert in lieu thereof "property".

The committee amendments were agreed to.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to my friend, the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I just wish, if it is possible, to impart a little information to the gentleman that I just acquired which is to the effect, coming from those in charge of the bill, that the passage of this bill would bring into the Government and not take out certain moneys; did you hear that?

Mr. GROSS. Yes; I heard it. But I wonder, if the return is going to be six hundred and some odd thousand dollars? Does the gentleman know that? That is what intrigues me at the moment.

Mr. HOFFMAN of Michigan. Well, as always, I was relying on the gentleman's statement and I will have to continue to do so as much as I dislike to question.

Mr. GROSS. Does the gentleman know whether we are going to recover the $606,000 in Federal funds that the bill provides and as stated in the report is being requested? How long will it take to recapture that—does the gentleman have any idea?

Mr. HOFFMAN of Michigan. No; I have not. As I said, I was relying on the statement from the other side, and if the gentleman contradicts it, I will have to reserve my opinion, of course.

Mr. GROSS. Let us wait until we get the answer from the gentleman on the other side who, I am sure, knows.

Mr. HERLONG. I will say to the gentleman, I cannot say exactly how long it will take to get the $600,000 back, but this will take in more money than the cost of operation involved. More money will come in by reason of the fact that more people can get there and see this facility, if this other area is taken care of. I will say to the gentleman, if he does not think that the preservation of this monument, the oldest of its kind and the best example of a medevial fort in the United States in the oldest city in the United States, is not worth something, then I recommend that the gentleman vote against the bill and do so enthusiastically. On the other hand, I believe that it is worth something and that is why I am in favor of it.

Mr. GROSS. There is no danger of losing this historic site at St. Augustine. If this bill is not enacted, it will still be there; is that not correct?

Mr. HERLONG. St. Augustine will still be there, but in not nearly as good shape as it would be if this is taken care of.

Mr. GROSS. Yes; this adds to, but it does not take from; is that not correct? The failure to enact this bill would not destroy the historic site that is presently there. It would still be there. In other words, this would add to it and, perhaps, a little more; is that not correct?

Mr. HERLONG. Mr. Chairman, will the gentleman yield further?

Mr. GROSS. I yield.

Mr. HERLONG. What we are trying to do is to fix it so that more people can see it and take advantage of it. That is exactly the purpose, and I think this bill would accomplish that purpose. I do not think there is any question about it. I do not believe the gentleman would deny that.

Mr. GROSS. No, I have been pondering this afternoon how I could promote some project out in my district and get some Federal money. Can the gentleman from Michigan suggest some way that I can get a historic site in my district?

Mr. HOFFMAN of Michigan. I am very happy indeed to know that the gentleman is consistent and that he is trying now to make an effort to save the country a little money. Yes; you can help me get a monument at St. Ignace. Father Marquette is buried there. If you want to go along with that, we can save there. Or you can get the lock at Sault Ste. Marie changed from Blatnik to Vic Knox. I do not know why they ever named the locks after Blatnik of Minnesota. He did not have anything to do with it. Or you could name the bridge across the straits Knox.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GROSS] has expired.

(By unanimous consent, Mr. GROSS was recognized for 1 additional minute.)

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. HAYS. To help the gentleman out, I understand Mr. Benson made a speech in Iowa one time.

Mr. GROSS. Please do not bring that up.

Mr. HAYS. That was a good thing for the Democratic Party. I would be glad to help build a monument to it.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GROSS] has again expired.

The Clerk read as follows:

SEC. 2. (a) When title to the lands, or interests therein, described in the first section of this Act is acquired by the Secretary of the Interior, such lands or interests so acquired shall become a part of the Castillo de San Marcos National Monument.

(b) All laws, rules, and regulations applicable to the Castillo de San Marcos National Monument shall be applicable with respect to such lands or interests acquired by the Secretary pursuant to this Act.

Mr. ASPINALL. Mr. Chairman, I ask unanimous consent that all debate on the bill H.R. 8226 and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. ASPINALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. EVINS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 8226) to add certain lands to Castillo de San Marcos National Monument in the State of Florida, had come to no resolution thereon.

FALSE CONFIDENCE IN FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Mr. KING of California. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. KING of California. Mr. Speaker, the time has come when we must face the fact that the experiment of insuring the public's savings, through the Federal Savings and Loan Insurance Corporation, has proven a failure under the present management. The Federal Savings and Loan Insurance Corporation is riding on the coattail of Government to give the public confidence, a false confidence, under its present management.

Over its 25 years of operation, the Federal Savings and Loan Insurance Corporation has only about $305 million reserves to insure over $50 billion of savings. Of this $305 million, the Insurance Corporation has committed over 25 percent to cover a false emergency created by its own unwarranted acts, leaving three-quarters of its assets to protect the remaining nearly 4,000 savings and loan associations. Its own reserves at the most are less than three-quarters of 1 percent of the amounts insured.

A select committee of Congress in a prior investigation of the Federal Insurance Corporation stated:

> The action here complained of was not only a disservice to the Government, but a greater disservice to the people for the protection of whose rights and affairs our Government exists. Should the time come when our Government is incapable of discharging that fundamental function, it must cease to exist in the form and for the purpose for which the Government is identified. The necessity for unquestioned rectitude of purpose, and sound, just, and impartial administration of governmental endeavor is paramount.

Over its years of operation, there has been a continuous pressure and grasping for more and more power from this agency. Its ultimate aim appears to be to seize and confiscate the peoples' wealth, under police powers, without the right of the aggrieved to redress. This bureaucratic insurance agency, the Federal Savings and Loan Insurance Corporation, claims it is above and beyond the courts, it is a law unto itself.

My esteemed colleague, the gentleman from California [Mr. UTT], Republican, in the April 28, 1960, issue of the CONGRESSIONAL RECORD, reported there is "the invisible and faceless bureaucracy operating through boards, bureaus, and commissions, so that our citizens are governed by people they have never seen, never voted for, cannot recall through any process of law, and who administer more administrative law than statute law." Mr. UTT's statement seems to fit the operations of the Federal Savings and Loan Insurance Corporation.

Two major congressional investigations have attempted to ferret out its fallacies. The Special Select Committee of the House of Representatives, headed by the gentleman from Virginia, the Honorable HOWARD SMITH, found the acts of the Home Loan Bank Board, the alter ego of the Federal Savings and Loan Insurance Corporation, to be vindictive, capricious, and a disservice to the public because of its acts of seizing the Long Beach Federal Savings and Loan Association in 1946, as a retaliatory plenary penalty.

The Long Beach Association shareholders sued for the recovery of their property. The Insurance Corporation evaded its liabilities by asserting it was beyond the law. It asserted that there was no designated agent upon whom valid service could be made, that it could pick and choose at its own whims which claims it would accept or reject.

By 1949 the shareholders were vigorously pressing to procure an accounting for multimillion dollars of property seized by this Government bureau and never returned. The Home Loan Bank Board and its alter ego, Savings and Loan Insurance Corporation, responded by attempting to again reseize the Long Beach Association for liquidation. A special committee of the Government Operations Committee of the House of Representatives under the chairmanship of the Honorable CHET HOLIFIELD, commenced investigation of the Savings and Loan Insurance Corporation and its various alter egos.

A Deputy Attorney General was placed on the witness stand before this second congressional committee in 1951, and admitted that the so-called charges against the association management upon which the attempted liquidation was to be based were for "horse-trading purposes." An admission that spurious charges were made against the association management to trade the association and its shareholders out of their claim against the Federal Savings and Loan Insurance Corporation. Spurious charges to blackmail our citizens out of multimillions of dollars of their wrongfully seized and confiscated property.

Congress, following such investigations, enacted laws to prevent ever again such disaster happening to our citizens. The Housing Act of 1954 was to be a bill of rights for savings and loan associations. Such 1954 act set up an orderly judicial procedure to settle bona fide disputes between supervisory authority

and the savings associations, and established strict procedure to force the Federal Savings and Loan Insurance Corporation to designate an agent upon whom court process could be served. The Federal Savings and Loan Insurance Corporation responded by first attempting to divorce itself from any supervisory control, but Congress refused.

The Federal Savings and Loan Insurance Corporation then responded by attempting to gain summary police powers over all insured associations, both State and Federal, including the rights to control who shall manage each association. Congress again refused.

The Federal Savings and Loan Insurance Corporation and its alter ego, the Federal Home Loan Bank Board, then responded by adopting rules and regulations giving itself exclusive police and seizure powers over all Federal savings and loan associations. These self-adopted, self-serving Federal regulations propose to deny the courts the right to intervene while the agents of the Federal Savings and Loan Insurance Corporation, its alter ego, the Federal Home Loan Bank Board, seize, refuse receipts for negotiable assets, confiscate private property, misrepresent and deceive the public, and intimidate our citizens out of their savings.

Mr. Speaker, my investigation shows the latest seizure of the Long Beach Federal Savings and Loan Association on April 22, 1960, has proven the Federal Savings and Loan Insurance Corporation and its alter ego, the Federal Home Loan Bank Board, to be guilty of these vicious acts of dishonesty and misconduct.

The Federal Home Loan Bank Board adopted a resolution declaring a so-called emergency. A self-declared emergency was necessary even under their own rules to justify summary seizure. An analysis of the resolution with the fact demonstrates it is fraudulent and adopted in language intended to conceal the facts and deceive the people.

For example, the resolution charged the Long Beach association did not pay the premium for insurance of accounts since 1948.

The Home Loan Bank Board had knowledge of and suppressed the evidence that such premiums were paid into the U.S. courts pursuant to law, and that such court payment was necessary, for to have done otherwise might have forfeited the just claims of the association and its shareholders against the Insurance Corporation.

The second charge asserted the association had not purchased stock in the Federal Home Loan Bank of San Francisco as required by law.

Again the Federal Home Loan Bank Board had knowledge of and suppressed the fact that the $800,000 payment for such stock had been deposited in the U.S. court as a legal tender pursuant to law. Such bank board further suppressed the fact that the Federal Home Loan Bank of San Francisco was the recipient of U.S. Government bonds confiscated from the Long Beach association during the first 1946 seizure, and that such bank held a rigged and collusive conversion of such bonds to its own use in violation of law. Litigation is pending for the recovery of nearly $10 million from such bank by the Long Beach association. The other charges specified by the Federal home loan bank to establish an emergency are equally without merit and just as deceiving and misleading to the innocent public.

Armed with a certified copy of a Federal Home Loan Bank Board order, 44 auditors, accountants, examiners, and assorted personnel moved in on the Long Beach Federal Savings and Loan Association, Friday evening, April 22, 1960, with a seizure order. Despite the listing of false charges in the order, the avowed purpose for the seizure was to prevent the shareholders and management of the association from converting it into a State savings and loan association that would be free from the arbitrary and capricious abuse of authority and administration of the Federal Home Loan Bank Board, and its alter ego the Federal Savings and Loan Insurance Corporation.

In an apparent attempt to justify the seizure of the Long Beach Association, the Home Loan Bank Board sent their spokesman, J. Alston Adams, regional supervisor, to brainwash and mislead the public with statements to the newspapers. Such statements were issued and printed in the press that "we couldn't get an examination in his place—Long Beach Federal—for 6 years up to 1958."

This statement is a deliberate falsehood. Adams, in his official capacity, knew of the numerous and extensive examinations during the years 1953, 1956, and 1957. I have been informed that each of these examinations extended over many weeks or months, one of which lasted 5 months.

Again through the press, Adams in describing the seizure stated:

> It took from 5 minutes to 8 Friday night to 5 a.m. Saturday to issue receipts for everything.

The truth is that at the hearing in Federal court on May 15, 1960, to increase the bond of C. E. Ault, the Board's appointed supervisor, sworn testimony revealed that the association's officers were able to procure receipts numbering less than 10, which covered less than one-half of 1 percent of the assets seized.

I am of the opinion that the refusal of receipts was intentional and brutal, evidenced by the fact that there were eventually an admitted 74 bureaucratic agents swarming over the place, intimidating and hindering association employees from making an inventory by threats of criminal prosecution if they did not leave the premises.

The taking of property without giving a receipt is a violation of law, a violation for which each and every one of these agents should be prosecuted, together with their superiors.

Adams further stated through the press that the line of customers withdrawing their funds "was orderly—nobody got excited." Another falsehood by Adams. The fact is there were over 1,000 people milling about. Long Beach police rushed 15 extra policemen to help set up barricades and rope off a section to contain the crowd. Armed guards were at the doors, letting only two or three in at a time, behind closed doors with drawn blinds. Elderly people were forced to stand in line for 4 and 5 hours. Some fainted, some had heart attacks, ambulances were called.

Approximately $40 million has been withdrawn. Over $700,000 in earnings lost to these elderly people. This is not a pleasant situation to contemplate when you consider Mr. Adams in his "other hat" is also president of the Federal Home Loan Bank of San Francisco. The bank that converted to its own use over $5 million in U.S. Government bearer bonds, which in fact belonged to the Long Beach association.

Litigation for the 1946 seizure had progressed to the point that the San Francisco bank might have to pay some $10 million or more for its frauds. The Federal Home Loan Bank of San Francisco is an arm of the Home Loan Bank Board, the alter ego for the Federal Savings and Loan Insurance Corporation. It seems when one agency cannot get by with illegally confiscating the people's savings, the others rush in to perpetrate the fraud.

Mr. Speaker, I remember the flouting of a congressional subpena by the Federal Savings and Loan Insurance Corporation. It was claimed a middle western association was insolvent, and it was seized. The Insurance Corporation admitted making a profit out of the liquidation but would not produce its records to show who did not get paid or the necessity for the liquidation. Congress to this day does not know.

Complaints of the abuse of this agency are mounting from all parts of the Nation.

Mr. Speaker, this all brings us to the point that Congress has authorized the Federal Savings and Loan Insurance Corporation to call upon the U.S. Treasurer for $750 million in the event of an emergency. An emergency to be determined by this same group who have exhibited their dishonesty and incompetence and who have flouted Congress and the courts.

Mr. Speaker, Congress would be derelict in its duty if it sits idly by and exposes this huge sum of taxpayers' money to the same type of mishandling through a trumped-up emergency.

Congress appropriated the funds to protect the people. It is our obligation to do so. It is not our intention to be a part of a fraud upon the people.

Is it not possible that private insurers, who do not flout our courts, can do an able and honest job for the public?

Would not this emergency fund be better administered where court review is assured? The record is compelling that Congress withdraw its support from the Federal Savings and Loan Insurance Corporation which has so flagrantly abused its fiduciary trust, and support private enterprise in the best interests of the public welfare.

ALFRED H. KIRCHHOFER

Mr. DULSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DULSKI. Mr. Speaker, it is my pleasure today to call the attention of the House to an award which has been made to one of Buffalo's distinguished citizens, Mr. Alfred H. Kirchhofer, editor of the Buffalo Evening News.

The board of regents of Canisius College in Buffalo, N.Y., conferred its third annual distinguished citizen's achievement award upon Mr. Kirchhofer. The recipients of this award are leaders who, in addition to earning the respect and admiration of their colleagues in their profession or industry, have been outstanding for their personal contributions of time and effort toward the progress and enhancement of their community. They symbolize the vision, drive, comprehension, and resoluteness which have contributed greatly to the progress of America.

Mr. Kirchhofer became managing editor of the Buffalo Evening News in 1927 and editor in 1956. He is executive vice president and a director of the Buffalo Evening News, Inc., and president and a director of WBEN, Inc. In addition, he is a member of the advisory board of the American Press Institute, and also a member of the American Society of Newspaper Editors which he headed in 1937. He was president of the American Council on Education for Journalism from 1950 to 1952.

In 1956, Mr. Kirchhofer received the University of Missouri School of Journalism medal for distinguished service in journalism and, 2 years later, a similar award from the Syracuse University School of Journalism. Last year he was elected to the National Journalism Hall of Honor at the University of Missouri.

Mr. Kirchhofer is a member of the State Society of Newspaper Editors and the Syracuse University School of Journalism council of editors and publishers.

Over the years Mr. Kirchhofer has been extremely active in the affairs of our community. He is a director of Crippled Children's Camps, Inc.; secretary of the board of visitors of Roswell Park Memorial Institute; and a director of Millard Fillmore Hospital. He is also a trustee of the Buffalo YMCA; a member of the State Defense Council; a director of the Buffalo and Erie County Tuberculosis Association; the Buffalo chapter, American Red Cross; the Buffalo Philharmonic Orchestra Society; and a member of the council of the University of Buffalo.

Under leave to extend my remarks, I wish to include the following commendation delivered by the Very Reverend James J. McGinley, S.J., president of Canisius College:

COMMENDATION

"The Canisius College board of regents with other eminent citizens honors Alfred H. Kirchhofer at dinner and awards to him the Distinguished Citizen's Achievement Plaque, May 9, 1960, the Buffalo Club."

There is a Jesuit university in the heart of a large metropolis whose exterior wall has an inscription:

> "St. Bernard loved the valleys,
> Benedict the hills;
> Francis loved the little towns—
> Ignatius sought great cities
> To house his caps and gowns."

Canisius College is in phase with this 400-year tradition followed by Ignatian institutions of higher learning. It therefore finds itself at the busy intersection of Main and Jefferson, Buffalo, N.Y. It is part of the very fabric of this community, in other words. It breathes the same air, rides the same buses, enjoys talking about the same weather, frets at the same problems, faces the same worries, enjoys the same triumphs, obeys the same traffic lights, and in general has the same hopes and fears as Buffalo. In fact, Canisius College has been doing all of this right here for 90 years—an independent institution for collegiate education.

It is, of course, a college. Education is its business, albeit nonprofit in fact and theory. This means its relation to its community is not that of a remote ivory tower, wherein learning is sought in cloistered and comfortable abstraction from the sounds and the sights of every day living. No; we are not a retreat from things Buffalo. In fact, we are not withdrawn at all—if I may borrow from the psychologists.

On the other hand, an educational institution cannot be a pollster's booth armed only with questionnaires and immersed only in current events, opinions, facts. Socially, intellectually, and ideologically, it cannot go in for that degree of "togetherness" which would efface its own distinct personality as a purveyor of real education. It has to hold for tradition, for the universals, for the timeless and even spaceless judgments and values. It has to preserve, add to and pass on to succeeding generations an intellectual heritage. That heritage, perforce, is an abiding and stable thing, which transcends the current scene in part.

Now somewhere between the ivory tower and the pollster's booth, somewhere between that withdrawal contemplation unreferred to life's framework and that overexhilarated "togetherness" wherein an educational institution loses its raison d'etre, somewhere between the two extremes, is the formula of Canisius College.

Our board of regents knows this philosophy well. They know how keen the college is for civic consciousness, awareness, being part of the community we all love. But they also know that we are awfully serious about right education for the right reasons and the consequent demands in time, energy, and principle.

Similarly, the selection committee of the board of regents of Canisius College is well groomed in this basic philosophy. This committee, in conjunction with the entire board, was commissioned to face up to the task of selecting a distinguished citizen to receive the annual achievement plaque. By mandate of the board of regents, March 24, 1958:

"The gentleman so designated shall have earned the respect and admiration of his colleagues in his chosen profession or industry. He shall be accounted as preeminent in his personal contribution of time and effort toward the progress and enhancement of the community with which he is associated."

Now, Mr. Kirchhofer, this committee selected you, unanimoulsy and in the name of the entire board. I cannot pay higher tribute to you. Yet, I do wish to add that I approved their selection, immediately upon receipt of their decision.

The words inscribed on this plaque tell you why, partly but permanently.

Let me add only this. There is an affinity between a good newspaper and a good educational institution. Each must serve but also lead a community, voluntarily. Neither can be true to its commitment and also indulge in the quest for sheer popularity. Both must be open to frank evaluation and criticism daily. Neither can become complacent and stay alive. Each demands concentration by all coworkers and often requires a type of discipline and self-denial which borders on the ascetic. Each must blend the new and the old, the local and the distant. Each must make responsible decisions on what to feature and in what proportions. Above all, each in its area of responsibility must be consistent, truthful, and convinced.

Your achievement in your profession and in this community is very real. The regents of Canisius College tonight single out and award you for your record of achievement, very definitely. And I am pleased wholeheartedly to approve, to applaud, and also to accept an honor which thereby comes to Canisius College herself on this historic night. Since we try to produce excellence, we are surely glad to recognize it.

Thank you and God bless you.

THE PRESIDENT'S VETO OF THE DEPRESSED AREAS BILL

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for I minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, the President's veto on Friday, May 13, 1960, of the area redevelopment bill passed by both Houses of Congress repudiates the people's will for the second time and threatens the healthy adjustment of our community to the changing character of our economy. It represents a conservative position turned reactionary. The President denies American distressed communities in this country the benefits he has urged us to lavish bountifully on other countries. In the name of economy he exhibits callous disregard of the pleas of Americans for help to become self-supporting. The President says his heart bleeds for a point 4 program for the depressed areas of the world but he vetoes a point 4 program for America.

The veto message is a denial of an every claim to statesmanship. The rate of unemployment in this country continues to stand at 5 percent. In my district and many others it stands at 20 percent. This is an intolerably high rate, which the President wants us to accept as normal. We cannot and must not submit to this gloomy prospect and become inured to allow such human suffering.

Those of us who have promoted the area redevelopment legislation have sought to address ourselves to the basic difficulties causing the high volume of long-term unemployment and the great waste of human and capital resources of this country, by converting the specific distressed and underdeveloped areas from stagnant and declining regions into active centers of healthy economic

activity. We hoped to minimize the need for general measures of an emergency nature designed to change our national economic institutions. The constructive course of action is being denied by the President. He fears Federal aid, he insists that communities which are flat on their back should lift themselves by their own bootstraps at a time when they have exhausted their financial resources in the pursuit of local economic development.

This denial of the right to attack specific causes of difficulties will make it necessary for all of us to urge stronger and broader and national measures for the entire economy. We must lower the national level of unemployment and make the recovery movement strong enough to reach even the depressed areas.

The President's criticism of the qualifications for benefits and the funds in the bill are disingenuous. Those of us who have made efforts to negotiate an understanding with the administration know that opposition stems not from disapproval of specific provisions, but from rejection of the entire idea of area redevelopment legislation. Secretary of Commerce Mueller has made it clear to Republican Members of the House of Representatives that he is opposed to the legislation no matter what concessions we would make. Under Secretary of Commerce Ray and Under Secretary of Labor O'Connell, in meeting with Republican Congressmen, have made it clear that the administration would not compromise their own bill and have intimated that they were not even sold on their own proposal. Despite the informal encouragement from officials of the Department of Labor and the Secretary, they have repeatedly indicated their inability to convert the Secretary of Commerce and that Department.

Raymond J. Saulnier, Chairman of the Council of Economic Advisers, has never endorsed action in this field nor taken the interest that his predecessor Arthur Burns had. The Secretary of Agriculture and his Under Secretary have been handing out news releases to reporters on the accomplishments of the rural redevelopment program repeating the same isolated illustrations of improvements, but have never told of the disillusionment of local committees. Their recommendations for action following their own extensive studies of local rural needs could not be implemented for lack of funds. They have been given advice and studies but not the means with which to implement their programs.

Instead of seeking a genuine program for economic rehabilitation of distressed areas, the administration has sought to enlarge on the letter-writing activities of the existing agencies, which have not met the needs of these areas. Economic distress has persisted both in urban and rural areas. "Jawboning" and "penpushing" do not rebuild communities or help economic distress.

While the President is boasting of the improvement in the conditions of employment between March and April 1960, reports from the Bureau of Employment Security show that in 28 of the major labor-market areas the total insured unemployed increased between these months. Four other labor markets showed no change in the number of insured unemployed, and the remaining 104 areas reported some decline. In a considerable number of instances the drop was due to the exhaustion of unemployment benefits.

Congress has just passed legislation for foreign aid to underdeveloped and distressed foreign nations at the request of the President. We have recognized that urban areas in Europe which are adversely affected by economic change and by loss of industries through the integration of the European market should be helped. We are giving money to agencies which finance unemployment insurance and resettlement and retraining allowances to Europeans displaced by the closing of mines, textile mills, and other industries. We have approved of area-redevelopment legislation in England, France, Holland, Belgium, Sweden, Norway, and Italy, but the administration refuses such action on behalf of American workers and communities. Our foreign aid bill will grant wheat to hungry India. It will furnish money to Pakistan to help their underdeveloped areas. We are financing the uplifting of Iran and their depressed people. We are providing schooling for Latin Americans who lack vocational training. We are helping other nations build public facilities, as they are prerequisites to industrial development. We boast of the factories we have financed in Latin America through the Import-Export Bank and the factories of Africa and Asia which are to be built by the International Development Corporation. Are not American underdeveloped areas, industrial and rural, equally entitled to aid from fellow Americans?

The President in his veto message on S. 722 seeks to absolve himself of the responsibility for our national failure to have area redevelopment legislation—the cause for this gap in our structure of law is the President himself. He has vetoed two bills passed by Congress. He has insisted on the letter of his own proposals. None of his spokesmen has shown any inclination to adjust the differences with the majority of the Congress.

In his new veto message, he remained adamant on excluding rural counties. The alternative he offers is the rural development program and the Small Business Administration. The first has depended solely on voluntary efforts in pilot counties—the second is designed to help small businesses with some local funds. But the problem of these communities is to build a new economic base for economic redevelopment so that they may become advantageous sites for industrial development. They require grants and loans for public facilities, for without them the most depressed will be unable to lift themselves from their desperate levels of poverty. They are in need of commercial and industrial buildings for economic expansion—these the President denies them.

The other stated objections in the message are conjuries of a man unfriendly to the entire idea, rather than one determined to perfect a piece of legislation. The President and every legislator knows that the Administrator appointed by the President will be able to exercise the judgment as to the communities which should enjoy priorities in receiving the aids provided by the act and the type of assistance which best fits the area. We presume the President will appoint a fairminded, responsible citizen dedicated to the realization of the purposes of the act. Moreover, he will be guided by an advisory citizen's committee fully conscious of its purposes. The objection that the truly desperate communities will not secure the assistance is one without foundation.

The President's fundamental lack of understanding of the needs of the depressed urban communities is revealed in the other objections. The communities "desperately" in need of a "full measure of assistance" do not have the financial resources to build local facilities essential in many instances to economic recovery. The citizenry and banks in these areas have drained their private funds through repeated efforts at local development. These communities have used funds from the State loan organization, even though they have received awards for outstanding effort and economic development. The results have not been sufficient to graduate them out of the depressed state. They now call for Federal aid and the President is telling them to go back and use their own resources which have been exhausted.

The President objects to some communities being on the eligible list though they may not need Federal assistance. The fact is, that only communities with 18 or more months of unemployment of 6 or more percent in the last 2 years, and currently suffering from 6 or more percent unemployment will be so eligible. In a number of instances this high level of unemployment has persisted for several years. As soon as the rate of unemployment falls below 6 percent they become ineligible for benefits. Should unemployment drop below this level while the applications are being considered the communities will become ineligible. None of these communities have suffered only temporary economic difficulties. The high level of unemployment has persisted for long periods and their economies are in permanent difficulties for which they must seek a solution. Federal assistance will not be "squandered" in the terms of the President's callous words, but become the base on which a constructive planning and redevelopment effort can be built.

The U.S. Department of Commerce has resisted and fought area redevelopment legislation for the last 6 years. Its Secretaries have been opponents and are out of sympathy with the provision of the bill. It is our conviction that the Department did frustrate the administration of the act and prevent its realization should the law be entrusted to it. Moreover, the Department, unfortunately, has no experience in this area and has no personnel qualified to administer such a law.

The administration is repudiating every promise the President made beginning with a speech he delivered in 1952 in which he promised aid to depressed areas. He is turning the back of the Federal Government on the people of the distressed communities of the United States.

In the election of 1958 the American people elected a host of new Democratic Congressmen from distressed communities, replacing former Republican Members who had fought this legislation. The American people will again define their attitude at the forthcoming election.

This administration has abandoned its slogan, "Progressive and Conservative," and turned reactionary.

I promise, Mr. Speaker, as I did 2 years ago when the President vetoed a similar bill, that I will introduce the depressed areas bill in the House on the 1st minute of the 1st day of the next session of Congress in January and I am sure Senator DOUGLAS will do the same in the Senate. There will be a different President in the White House and I am positive we will have our bill before next Easter.

A PROPHETIC LETTER FROM BEHIND THE IRON CURTAIN

Mr. COHELAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. COHELAN. Mr. Speaker, it is dramatic timing indeed that a friend of mine should today receive a rather remarkable letter from a young engineer in East Germany. The letter, written just before the summit meeting, is not only prophetic; but there is a real lesson here for all of us. Indeed, this is not just a letter—it is a document of nourishing wisdom written by an articulate, idealistic young man living behind the Iron Curtain. I want to quote a few excerpts:

I am writing this to you the day before the summit meeting, but when you will have received this letter, the failure of the meeting will be an accomplished fact. The reason is, of course, that the conditions brought forth by Big Brother are quite unacceptable to the West, and Big Brother probably does not even want them accepted.

Everything that the Communists have done during the last few years with regard to Germany has tended to deepen the clash between East and West. The consciousness of the hopelessness of it all is continually with me, and all the time I think that life could be so wonderful if—well, I suppose it is rather selfish of me to keep talking of our own little worries, but then, you see, to us it is the most important thing in the world. As things look now, the final separation of this city will not be delayed very much longer. God knows what will happen then.

I am glad to see that people in the United States are slowly becoming aware of the fact that the East is making enormous and successful efforts to outrace you in all fields. The sputniks are not just a chance success in one field. They are symptomatic of what is going on in all fields of science and technology.

As long as the West and the United States keep playing and fooling around the way they have been doing and are still doing, they have not the slightest chance of survival. You must not be deceived by the apparent misery of everyday life in the countries behind the Iron Curtain. This does not count.

You will not win an inch of ground with fancy food, elaborate household gadgets, and streamlined private cars. I admire your country for these real achievements. I should like to share them. I should like everyone in the world to enjoy them, and I wish and trust you will go on having and developing the individual's maximum enjoyment of life. But do not think that because in this respect the other side is miles behind that they have a worse chance in the world contest. Their chance is better, because by economizing on their people's backs, they can afford to concentrate on national strength. The United States is developed enough to do both, if it would only will it.

HEALTH CARE FOR THE AGED

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the most important domestic issue facing this session of the Congress is the question of providing health care for the aged. The volume of mail coming into congressional offices on this subject is proof of the widespread concern among all our people over the lack of health protection for the aged.

The people want a broad and comprehensive program of social security as insurance against various economic hazards. This is particularly true of Federal employees and retired Federal workers because they have lagged behind other groups in acquiring such benefits. For instance, it was many years before Federal employees became entitled to unemployment compensation, even though workers in private industry had become eligible for such benefits long ago.

It is difficult for me to understand why the Government should be so neglectful of its own employees concerning wages and fringe benefits. Its shortsighted policy toward its employees and its annuitants contradicts the glowing picture it draws of the advantages enjoyed by those who work for the Federal Government. The predicament of those who have retired after a lifetime of service as civilian employees is particularly distressing to me.

It is inevitable that some form of health insurance will be provided for the aged in our population, as distinct from those who are pensioned off under the U.S. civil service retirement system.

It is to remedy this oversight that I ask favorable consideration before Congress adjourns of my bill to provide a health benefits program for certain retired employees of the Government.

Medical benefits for those who have been employed in private industry is a logical extension of the social security system. Medical benefits for those who have worked for the Government should be, in the same manner, a development of the civil service retirement system.

Furthermore, the Government has a special obligation to contribute toward the health insurance of those who have served it so long and faithfully. Federal annuitants have two or three times as much chronic illness as those who are still working for the Government. These illnesses are frequently those of a long-term nature, requiring extended periods of care or hospitalization. It is an irrefutable fact that the cost of medical care has climbed far beyond their reach. With their fixed annuities that are so seldom upgraded to meet the cost of existence the predicament of these people becomes progressively worse. The erosion of the annuitants' pensions and of their morale is a fact that does not go unnoticed by younger people. As a result, the Government finds it increasingly difficult to recruit them for careers as civil servants.

Pending legislation covering active employees will become effective on July 1, 1960. It would be a cruel discrimination if we stopped there and failed to provide similar protection for the retired employees of the Federal Government.

Under H.R. 8835, the U.S. Civil Service Commission "is authorized and directed to establish a health benefits program for annuitants and members of their families who are not eligible for coverage under the Federal Employees Health Benefits Act of 1959. If an annuitant enrolls in a health benefits plan under this act for himself only, there shall be withheld from his annuity, as his contribution, an amount not to exceed $3.80 monthly, and the Government shall contribute a like amount. Except as provided in paragraph (c), if an annuitant enrolls in a health benefits plan under this act for himself and members of his family—"family" meaning an annuitant's spouse, unmarried child under 19 years of age, or unmarried child regardless of age who is incapable of self-support because of a mental or physical incapacity that existed prior to his reaching the age of 19 years—there shall be withheld from his annuity, as his contribution, an amount not to exceed $9.20, and the Government shall contribute a like amount."

The Government's cost would, according to estimates of the Civil Service Commission, fall within the range of $15.5 million to $22 million in the first year. Even if it turned out to be somewhat higher, it would be a small price for the Government to pay in return for the solicitude and the help it would extend to those who have served it so well.

If it is not feasible for the Government's contribution to be financed from the proceeds of the sale of securities issued under the Second Liberty Bond Act, then it can be financed through direct appropriation by the Congress. A decent respect for the faithful service performed by Government workers who are retired, will be expressed and appreciated through prompt enactment of the Federal Annuitants Health Benefits Act of 1960.

NATIONAL PENSION POLICY

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend a resolution at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

(The matter referred to follows:)

RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION GRANTING TO VETERANS OF WORLD WAR I PENSIONS COMPARABLE TO GRANTS TO VETERANS OF AMERICAN WARS PRIOR TO WORLD WAR I—CITY OF LYNN, MASS., IN THE YEAR 1960

Whereas the national policy of the United States, concerning veterans of the United States, has been to grant assistance to them in declining years by a pension, all in consideration of their military service in defense of our country; and

Whereas there has been no general pension granted to veterans of World War I by the United States; and

Whereas the United States has been and is aiding many foreign countries in restoring their economy; and

Where if our Government can afford to give away tens of billions of dollars for years to come, in addition to more than $70 billion in aid already given to foreign nations, then surely we can afford to give needed help to disabled and aging Veterans of World War I who have proved their loyalty to America by defending our Nation on the field of battle: Therefore be it

Resolved, That the honorable mayor and city council of the city of Lynn, Mass., hereby urges the Congress of the United States to enact legislation granting a pension to Veterans of World War I comparable to grants to veterans of wars prior to World War I; and be it further

Resolved, That copies of these resolutions be sent forthwith by the city clerk of the city of Lynn, Mass., to the President of the United States, to the presiding officer of each branch of Congress, to the Members thereof from this Commonwealth, and to members of the Veterans' Affairs Committee in the House of Representatives of the United States.

In city council, April 12, 1960.

Adopted:

———— ————, *City Clerk.*

LEAVE OF ABSENCE

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent that I may be permitted a leave of absence for 10 days on account of official business.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

THE HONORABLE LOUIS CONVERS CRAMTON

Mr. ROBISON. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. BENTLEY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BENTLEY. Mr. Speaker, announcement was made a few weeks ago of the retirement of one of the most outstanding, distinguished, and well-beloved legislators in the State of Michigan's history. His name is Louis Convers Cramton, and he is presently State representative from Lapeer County, Mich. Representative Cramton, 84 years old, for half a century has served his beloved State as a U.S. Congressman, judge, and longtime member of the State legislature. As both a legislative and judicial official, he has displayed fearlessness in battling for what he believed to be right, the courage to oppose his own Republican Party when he believed it was wrong and strict adherence to conscience. Representative Cramton, long a champion of fair employment legislation and civil rights bills, while in Congress from 1913 to 1931 won the respect of Negro groups for his support of Howard University, a Negro college. He foresaw and understood the silent, bloodless social revolution and often stood alone on reforms which he regarded not only proper but inevitable.

Representative Cramton was born in Lapeer County and graduated from the University of Michigan law department in 1899. He served in the State house of representatives from 1909 to 1910; was elected to the 63d and to the eight succeeding Congresses—March 4, 1913–March 3, 1931; was special assistant to the Secretary of the Interior in 1931 and 1932; was circuit judge of the 40th judicial circuit from November 21, 1934, to December 31, 1941; resumed the practice of law; elected to the State house of representatives in November 1948, and has served continuously since that time.

Representative Cramton leaves the State legislature with an alert mind, a zest for the lawmaking process, and a sound heart that beats in a tempo responsive to the times and in tune with the people.

Let this Congress recognize our former colleague, Representative Louis Convers Cramton, for the outstanding public service he has rendered to the State of Michigan and to our Nation. Our best wishes go out to him for many pleasant years of well-deserved retirement.

CORRECTION OF INADEQUACIES IN PAYMENTS FOR HAZARDOUS DUTY

Mr. ROBISON. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. WALLHAUSER] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WALLHAUSER. Mr. Speaker, I have introduced today a bill to authorize the establishment of pay differentials for employees in the classified civil service for irregular or intermittent duty involving unusual physical hardship or hazards. The purpose of this bill is to correct the inequity which has long existed with respect to the treatment of white collar employees as compared to blue collar employees who may be exposed to identical hardship hazards.

In perhaps a majority of the cases where a white collar employee is required to perform duties involving physical hardship or hazard, there is adequate recognition of the hardship or hazard in terms of the grade and rate of pay assigned to the position. For example, the position of an employee performing dangerous law-enforcement work or of an employee working regularly with radioactive material, is classified at a grade which takes into account the degree of risk involved in the work. My bill does not propose to provide a differential for employees in such positions.

On the other hand, there are many cases where a white collar employee whose job does not involve regular exposure to hazard or hardship and whose grade does not include recognition of inherent risk is required to perform duties on an occasional basis under circumstances involving physical hardship or hazard. For example, a civilian engineer engaged in the development of machinery or equipment may from time to time be required to perform duty aboard a submarine for the purpose of inspecting or testing the equipment on which he is working. Under present law such an employee is not entitled to receive any extra pay for these hazardous duties, although the Navy crew members and blue collar workers aboard the submarine do receive additional pay. It is this kind of inequity which my bill would propose to correct.

The matter of additional pay for hazardous duty has been recognized as a problem for many years. The Classification Act of 1949, as approved on October 28, 1949, contained a section which required the Civil Service Commission to make a study of the problem and to submit recommendations to the Congress "for a future policy and plan with respect to additional compensation for hazardous employments." The Commission's report, which was submitted in October 1950, included a recommendation that in regard to positions under the Classification Act, the effect of occupational hazards on duties, responsibilities, and qualification requirements should be given due consideration in the allocations of positions to classes. However, no recommendation was made with respect to the treatment which should be given those cases where the assignment to hazardous duty is on an occasional basis and, for this reason, cannot be appropriately recognized in the classification grade of the position.

This problem has also been recognized in compensation studies which have been initiated in the executive branch. For example, the so-called Cordiner Committee, which was set up to study and advise the Secretary of Defense on needed adjustments in the provisions for compensating civilian personnel, submitted a report in May 1957. This report contained the finding that—

> There is no system of complete coverage either in terms of additional compensation or benefits for Classification Act employees performing hazardous work in the Federal Government. In contrast, there is complete coverage for defense blue-collar workers when the hazard is of sufficient dimension to warrant additional compensation.

No steps were taken to correct the inequity reflected by this finding.

My bill would propose to provide the clear and effective solution to this long-standing problem by providing authority for the establishment of pay differentials which would be paid to white-collar employees in those cases when they are assigned to hazardous or hardship duties.

The cost which would be involved in this bill would depend on the extent to which classified workers are assigned to hazardous or hardship duty, the length of such assignments, and the basic pay rates of the employee so assigned. In any event, the total cost would be negligible in terms of the total Federal payroll for classified employees and in terms of the increased effectiveness and morale which should result from the equitable treatment of the employees concerned.

LET'S GREET IKE

Mr. ROBISON. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. CANFIELD] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CANFIELD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following articles from the Washington Daily News, the New York Times, and the Paterson Evening News:

[From the Washington Daily News, May 19, 1960]

LET'S GREET IKE

We suggest that as many of us as possible be on hand to give the President a cheer when he returns tomorrow. His plane is due to arrive at Andrews Field at 3 p.m. The President's route will be over the South Capitol Street bridge, Pennsylvania Avenue, 14th Street and New York Avenue to the White House. We think we all owe him a warm greeting for his performance in Paris.

Neither by temperament, training, nor experience—as soldier or statesman—is President Eisenhower a man to submit readily to contempt or denigration, let alone to turn the other cheek to insult.

His restraint in Paris in the face of Khrushchev's deliberate billingsgate, therefore, is evidence not only of his self-discipline and innate dignity but also of his selfless devotion to the cause of peace; the peace for which all humanity hopes, and which almost any sacrifice is worth making to attain.

Giving the soft though self-respecting answer to the synthetic and cynical wrath of the Russian Premier was, therefore, a gesture which—probably as much as anything Khrushchev himself did—swung free world opinion, which had been critical of the United States for the U–2 plane episode, around a full 180 degrees, so that it is today unanimous in denouncing Russia's behavior.

No amount of patching could put the summit conference back together now. It would be useless and foolish to try. However, whatever mistakes may have been made, groveling before a grotesquely insolent Khrushchev was not one of them. In the circumstances, such a futile gesture could only play into the hands of the Soviet boss.

But there is one thing can be done. And it is more important than any other choice we have.

That is to close ranks. And we can symbolize that by your welcome of the President tomorrow.

In the days ahead, let's show the whole world, including the Soviets, that the American people, the American political parties and the U.S. Government are solidly together on these things:

That there is no doubt of this country's eternal devotion to the principles of individual liberty and the sovereignty of free peoples.

That whatever other differences may divide our public opinion or our political parties there is no division on our determination to stay strong, to do whatever is necessary to maintain that strength, but to use it with wisdom and restraint.

Top leaders of the Democratic Party already have given the cue, as revealed in the Senate yesterday. Before the summit collapsed, four of them—Adlai Stevenson, Senators Johnson and Fulbright, and Speaker Rayburn—quietly had sent President Eisenhower a cablegram to demonstrate American unity.

This demonstration of agreement on purpose, as Senator JOHNSON later explained to the Senate, does not require any forfeit of the democratic right and duty realistically to assess the management of American policy by the Eisenhower administration. But such assessments can be made in a manner which will reinforce the national strength, rather than detract from it.

So, when Mr. Eisenhower returns to Washington tomorrow, we have an opportunity to represent our whole country and to show where it stands. We hope Washingtonians will turn out en masse to welcome the President home. And that all around the land, wherever possible, there will be similar demonstrations of loyalty and national unity.

In a showdown, we are one people. Let us make that clear to everybody, especially Khrushchev.

[From the New York Times, May 19, 1960]

MR. KHRUSHCHEV'S ADIEU

At his final press conference in Paris yesterday Premier Khrushchev renewed his accusations against the United States. Essentially his argument fell into two parts: a complaint that President Eisenhower has promised the ending of the espionage flights only until the end of his own tenure in office next January, and a complaint that this country's promises cannot be respected since they can be changed from administration to administration.

On the first point it may be noted that neither Mr. Khrushchev nor any of his subordinates have even promised to halt for 1 day—let alone the remainder of Mr. Khrushchev's stay in office—the gigantic espionage effort his country maintains constantly against the free world. And Mr. Khrushchev surely knows that if he really wants the end of aerial espionage for all time he need only accept President Eisenhower's "open skies" proposal and formalize that plan in an international treaty which would be binding upon all American administrations once it had been duly ratified.

On the second issue it may be suggested that Premier Khrushchev is the last man in the world who is entitled to raise questions about the value of the promises of others. Has he forgotten how many Soviet promises have been betrayed under his own and earlier Soviet administrations?

In Hungary in November 1956, for example, were not all kinds of promises and pledges made to the Hungarian people and their legal government and were not all betrayed? Premier Nagy and General Maleter have long since already paid with their lives for having believed Soviet promises. Has Premier Khrushchev forgotten Poland, where Stalin once promised that a representative democratic government would be installed? Has he forgotten Molotov's long-since violated pledge that the institutions of Rumania would be respected, a pledge made as Soviet troops entered that country during World War II? Has he forgotten Soviet promises about Western access to West Berlin, promises that Stalin broke in the era of the Berlin blockade and which Mr. Khrushchev himself now threatents almost daily to break again? We of the free world know that on the issue of broken promises Mr. Khrushchev lives in a very glassy house indeed.

[From the Paterson (N.J.) Evening News, May 18, 1960]

WE ARE ONE—ALL AMERICA BACKS THE PRESIDENT IN THESE DARKEST HOURS

This is a time for all of us to keep our feet on the ground, our heads steady and clear, our hearts filled with prayer.

The world is on the brink of what could be Armageddon, because madmen are again loose and who can tell when they might unleash the terrible instruments of destruction which all mankind has devised in these recent years?

Nikita Khrushchev came to America last year ostensibly to learn all about us, to absorb some of the niceties of a land of liberty. He returned the compliment and invited our President, the man of peace coming down the end of the road with one ambition—to end wars and permit nations to dwell in amity.

Suddenly all this is destroyed by this same Khrushchev, stalking his bullheaded, chesty Communist front around Paris, where leaders had gathered for peace and now confer only on how to guard against a new and more terrible Pearl Harbor.

It is well indeed that all parties in America now join hands in a common unity.

President Eisenhower, with just a few brief months remaining of his final term of office, had gone to Paris to join his Western allies to work out a program of disarmament and permanent peace with the Soviet leader.

Instead, he ran into a raging bull, bellowing insults, cancelling Ike's visit to Russia, demanding abject apology from America.

Well, Mr. K., we don't like fights, and we abhor war.

But we don't bend before madmen, before dictators.

Our country was founded in the spirit of rebellion against oppression.

Was the spy flight over Russia a tactical blunder?

Well, maybe it was. But it was only an incident. And "Khrushie" blew it up into the propaganda blast he needed to prove to his real bosses behind the scenes that he can be a tough guy.

Mr. Khrushchev, literally spitting in the face of our President, is doing it to every man, woman, and child in America, whether we be Republicans or Democrats.

So we'll take it together in whatever spirit President Eisenhower accepts it.

Whatever the Lord decrees and our President tells us to do in this crisis, let's all remember:

We are one made up of 175 million strong.

NASA PEACEFUL EXPLORATION AGENCY?

Mr. EVINS. Mr. Speaker, I ask unanimous consent that the gentleman from Iowa [Mr. WOLF] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. WOLF. Mr. Speaker, in the next few days we will have before this body a bill from my committee to revise the National Aeronautics and Space Act of 1958.

In the light of the U–2 experience, it becomes eminently clear to me that a very thorough understanding must be reached on exactly what the area of responsibility of NASA is to be. With this thought in mind, on May 13 I wrote to my distinguished chairman the following letter which I think speaks for itself on this point:

MAY 13, 1960.

Hon. OVERTON BROOKS,
Chairman, Science and Astronautics Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to you because of my concern over the recent revelations that NASA is being used as a cover-up for spying activities by the Central Intelligence Agency.

As you are well aware, we have been under the impression that the activities of NASA were to be of a purely peaceful and nonmilitary nature. This has been what the heads of NASA have told us and this is the way the law is written. This law is being flouted. I do not believe the Nation can afford to let Congress follow the bumbling and irrational leadership given the country by this administration. It is our manifest duty to insist that the moneys appropriated for a specific purpose are used in strict compliance with the law as stated by Congress. Unless Congress intends to abdicate its responsibility in these areas, I strongly urge that a full-scale investigation be initiated in order to ascertain (1) whether there are other activities similar to these, which are hiding under the cloak of NASA; and (2) in what other instances NASA has given out information which is at variance with the facts.

The New York Post editorial of May 11 made the most profound observation on the execution of our foreign policy when it stated:

"We said the other day that there is no ground for partisan delight in the national humiliation. Neither, however, do we accept the view that this is an occasion for polite acquiescence in an inexcusable blunder that has shaken the world. * * *

"It is not an excess of debate that imperils the country. It is lack of debate, failure to explore great questions, refusal to challenge the tired premises of our foreign policy, bipartisan agreement to postpone all serious matters, that are undermining our world position. * * *

"Certainly Mr. Khrushchev should not be deluded into believing that any substantial number of Americans will accept his prescription for world order. But neither should there be any doubt about the extent to which millions of Americans are troubled and dismayed by the fabulous follies of recent days, and demanding better answers than we have received.

"In these last few fateful hours before the summit there should be full, free examination of all the positions we have taken, of all the imponderables in our world view, of all the sacred cows on our animal farm. The most tragic aspect of the plane episode is the evidence of abdication by the President of the United States."

Mr. Chairman, we have all been shaken badly by the facts which have recently come to light. We should not be so shocked and feckless as not to go forward and ascertain all the facts regarding the operations of NASA and the apparent interlocking operations of big airplane corporations in spying activities in conjunction with the CIA.

Again, Mr. Chairman, I urge that a full-scale investigation be initiated by our committee on the whole subject of the operation of NASA. Either that agency should be what we have been telling the world it is—an operation set up for the peaceful exploration of outer space—or it should be disbanded and its area of responsibility returned to the military.

Respectfully yours,

LEONARD G. WOLF,
Representative in Congress.

SUBSIDY ELIGIBILITY OF DOMESTIC TRUNK AIRLINES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Nebraska [Mr. BROCK] is recognized for 30 minutes.

Mr. BROCK. Mr. Speaker, on May 16, 1960, I introduced H.R. 12234 which seeks the repeal of that portion of section 406 of the Federal Aviation Act that provides subsidy eligibility for the domestic trunk airlines. This bill is identical to that introduced by my distinguished colleague and fellow committee member, the gentleman from Illinois [Mr. MACK].

I was impelled to introduce this measure for many of the same reasons Mr. MACK mentioned in his able remarks in the RECORD of April 5, 1960.

For example, I am convinced that both the trunkline industry and the Civil Aeronautics Board would be more economically realistic if subsidy eligibility for the domestic trunks ceased to exist.

I cannot believe that Capital Airlines would have pursued its reckless course of expansion and taken the gambles which have brought it to the brink of bankruptcy had it not been possible to apply for Federal subsidy to make up the losses when the gambles failed.

I cannot believe that the Civil Aeronautics Board would have authorized the multiple competition, often putting four or five more carriers in the same market, but they had not had the assurance that subsidy was available for any airline unable to survive in these competition-saturated markets. If subsidy eligibility is terminated, I share Mr. MACK'S confidence that the Civil Aeronautics Board will employ more careful analysis of the economic factors and give more weight to sound business principles in subsequent route cases.

Similarly, I share my colleague's concern about bailing out a carrier whose bad management and improvident gambling with expansion have gotten it into serious financial trouble. I agree that payment of Federal subsidy to a carrier competing with self-sufficient trunklines can lead to only one thing—industrywide subsidy.

But, Mr. Speaker, while all of these factors are very important and constitute valid reasons for passage of this legislation, it seems to me there is an even more important reason why Congress must act to eliminate this subsidy eligibility for the domestic trunkline carriers. Stated in its simplest form, we must disqualify the domestic trunks in order to prevent encroachment upon the funds which Congress has appropriated to support the local service industry and the other parts of the industry that are still in the developmental stage of their operations.

On May 16, 1960 the Civil Aeronautics Board held a prehearing conference in the Capital subsidy case which started in motion the administrative machinery to process Capital's claim. Had the Board not inaugurated the proceeding it is clear under section 10 of the Administrative Procedure Act and title 28, United States Code, section 1337, that Capital, or another subsidy claimant, can obtain a mandatory injunction in a U.S. district court compelling the Board to process the claim.

Once the claim is in process it is clear that the Civil Aeronautics Board can—by granting the request—create a valid legal obligation enforceable in the Federal courts which would be satisfied out of the appropriation Congress intended for carrier payments to the local service carriers and other developmental industries. Thus, Mr. Speaker, despite the fact that the money was appropriated for other and worthy purposes, under present law a valid legal claim can be created which encroaches upon and diverts these funds for other purposes. Thus it is completely possible that important activities such as the local service industry could be placed in jeopardy, or irreparably harmed, by trunkline subsidy claimants.

Nor is it any answer or comfort that the Civil Aeronautics Board might summarily turn down the claim of Capital Airlines. The Board is compelled to use the same standards and precedents it uses in other subsidy cases such as the local service cases. Should the Board arbitrarily or capriciouly depart from its standards or the statutory requirements, Capital could sue under section 1006 of the Federal Aviation Act and get judicial review in the U.S. Court of Appeals for the District of Columbia.

Fortunately the Civil Aeronautics Board had the foresight to include in its investigation of the Capital subsidy claim the issues of merger or dismemberment which may well prove to be the answer in this case. However, the fact remains that until the law is changed and subsidy eligibility for the domestic trunklines discontinued, there is a continuing risk that encroachments will occur on the funds appropriated to develop the local service carriers which provide vital service in Nebraska and elsewhere in the Nation.

Thus, Mr. Speaker, it is essential to pass this legislation to protect both segments of the airline industry; first, to protect the self-sufficient trunklines from subsidized competition which can only result in industrywide economic deterioration; and, second, to protect the developmental portion of the industry—especially the local service carriers—from encroachment upon funds appropriated to foster their growth and progress.

Mr. Speaker, this matter of domestic trunkline subsidy is a unique opportunity. It not only provides us a chance to circumscribe and reduce the area of potential Government liability for subsidy expenditures but it actually pre-

sents us a challenge to do so or risk an enormous increase in transportation subsidies. I personally shudder to think of the possible consequences of our failure to act. If the relatively minute operations of the local service carriers can require a subsidy that has increased from $21 million in 1955 to $68 million in fiscal 1961, an economic chain reaction set off by federally subsidized domestic trunkline competition would inevitably result in hundreds of millions of dollars of subsidy requirements.

Mr. Speaker, we have already spent approximately $200 million to put this industry on its feet. It has been operating for nearly a decade on a self-sufficient basis which proves that the industry can be self-sustaining. Airline traffic continues to grow and new revenue sources such as increased airfreight and first class mail are supplementing airline revenues. I think we have come to the point when we must remove this subsidy eligibility before it corrupts a mature and self-reliant industry. I think we must remove this subsidy eligibility before it undoes the good work it accomplished during the developmental period.

This action cannot be postponed. This legislation should be given high priority and enacted this session of Congress.

WARTIME EXCISE TAXES

The SPEAKER. Under previous order of the House, the gentleman from Michigan [Mr. CHAMBERLAIN] is recognized for 10 minutes.

Mr. CHAMBERLAIN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CHAMBERLAIN. Mr. Speaker, just as the cherry blossoms come to Washington every spring, so does the annual season for extending the wartime excise taxes imposed upon automobiles.

Because of my vocal opposition to this tax I have been dubbed by some as the automobile horn of Congress. This does not offend me. On the contrary, I am proud of this recognition because it refers to my persistent and insistent efforts to repeal the unfair 10-percent wartime excise tax on automobiles.

I again insist that in keeping such a tax, while enacting legislation for depressed areas, such as Detroit, and when American workers need to be fully employed, the Federal Government is cutting off its taxes to spite its revenue. This tax was levied for the specific purpose of decreasing automobile production in order to divert it to war production. The purpose for which this tax was imposed no longer exists, but we still permit this tax to retard sales, production, and employment.

During the past few days our press has joined in sounding the "automobile horn" to arouse the public about this tax. For this I am grateful.

The "ignition" for two recent articles in Detroit papers was provided by an editorial by Robert B. Powers, editor and publisher of Ward's Automotive Yearbook for 1960, and which I had inserted in the CONGRESSIONAL RECORD this past Tuesday.

On May 12, 1960, the automotive editor of the Detroit Free Press, Fred Olmsted, had this to say of Mr. Powers' editorial:

Immediate removal or reduction of the Federal excise tax on automobiles was urged by Ward's Automotive Yearbook for 1960, released Wednesday. "The dawn of the era of American compacts and the consequent arrival of direct competition with their European counterparts make this imperative," the 22d annual edition of the industry handbook said.

Ward's called the tax (10 percent on the manufacturer's price) "politically immoral, punitive and a wartime emergency measure."

The statistical reporting agency said action was vital "to forestall possible future injury to the industry."

The leading editorial of the Detroit News, of May 11, 1960, was devoted to the adverse effects of this discriminatory tax upon our economy. I agree so completely with the content of this editorial that I would like to take this occasion to read it to the Members of the House:

UNITED STATES IN COMPACT CAR RACE—THE EXCISE HANDICAP

For many years this newspaper has campaigned against the injustice of the automobile excise tax, a levy which costs motorists billions of dollars on the pretext that the utilitarian automobile, like a billiard table or mink stole, is a luxury item.

We now find a new and persuasive argument for abolishment of the tax. Robert B. Powers, editor and publisher of Ward's Automotive Reports, in his yearbook released today, sees the levy as a potential peril both to the industry and the Nation in the forthcoming struggle for the U.S. compact car market—a struggle between U.S. manufacturers and European exporters to this country.

In the yearbook editorial, these are some of the points made by Powers:

In 1959, Federal excise tax collections on motor vehicles totaled more than $3.6 billion, bringing to more than $14 billion the amount paid since the levy was decreed in 1917 as a wartime emergency measure.

Counting the tax on raw materials and components, the excise taxes now approximate 17.3 percent of the wholesale value of a motor vehicle—or $346 on a car valued at $2,000.

This politically immoral, punitive tax, if continued, will be a severe handicap to the automotive industry in competing with foreign-made compacts, only 253 of which were imported in 1940, but 668,070 of which were sold in the American market in 1959.

If Congress and the administration delay tax repeal or reduction until a faltering U.S. auto industry precipitates a crisis, Government action to discourage imports then will have to be drastic—and "it may cost us those friends throughout the world we have worked so diligently and expensively to win and influence."

One of the additional facts brought out by Powers is that the three European manufacturers with a lion's share of the American market are government owned or government controlled. This enables them to pretty much set their own sales prices, be in a position to influence internal taxes on their products, and if need be operate wholly without profit for the sake of employment and their nations' general economic health.

In the instance of Iron Curtain motor cars, sometimes priced at less in the United States than in the country of origin, cost figures and taxes can be juggled to get around the U.S. ban on dumping.

If there is statesmanship left in Washington, the time to act is now. The tax never was justified except as a wartime measure to discourage the demand for automobiles. It is less than ever defensible now when the very survival of a large segment of the industry is in danger of becoming an issue.

It will not be long before we will be asked to extend this tax. Between now and then, it is my hope that my colleagues on the Ways and Means Committee will find time to ask themselves if it is not politically immoral to penalize an industry—which is the basis for one of every seven jobs—and one of every six businesses—by exacting a tax not levied on other manufacturing.

KENT STATE UNIVERSITY, OHIO

The SPEAKER. Under previous order of the House, the gentleman from Ohio [Mr. COOK] is recognized for 15 minutes.

Mr. COOK. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include a telegram from President Eisenhower.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. COOK. Mr. Speaker, 50 years ago today, May 19, 1910, Gov. Judson Harmon, of Ohio, signed the bill which established Kent State Normal School, the beginning of the great present day Kent State University, of Kent, Ohio.

The past 50 years have seen Kent State grow from an enrollment of 42 students in 1910 to a student body of 10,500 members today. During this same period of time, 100,000 students have registered at the university, 56,000 of them in the last 10 years. It is clearly one of the fastest growing universities in the United States. Although the university primarily serves the northeastern portion of Ohio, its student body also consists of many students from the other 49 States as well as students from foreign lands.

Not only has it grown population wise, but constant additions and improvements to the physical plant of the university, since its establishment, have made it into the 360 acres of beautiful grounds and 33 campus buildings of today. The present value is estimated to exceed $31 million.

Regardless of the financial amounts involved, the campus of Kent State University, sitting high upon a hill overlooking Kent, Ohio, is generally regarded to be one of the most beautiful university campuses in the United States.

The university educationally offers its students curriculums in five different colleges: Business, arts and sciences, fine arts, education, and graduate school. Each of these courses of study offers the best in education to those it serves.

In recognizing those who have contributed so much to the founding and growth of this great university, one cannot help but give much of the credit to Dr. George Bowman, present president

of Kent State. For the past 16 years he has lead the school during the years of its greatest growth. His leadership has been an inspiration to the students, faculty, and alumni of Kent State University. In this respect, he has been given the unqualified support of the board of trustees, presently consisting of John R. Williams, president of the board for 16 years and a former Ohio State legislator; Robert C. Dix, publisher of the Kent-Ravenna Record Courier; Dr. Otto Korb, former superintendent of schools of South Euclid-Lyndhurst and East Cleveland; Frederick M. Broda, president and treasurer of Webb-Broda & Co.; Robert H. Stopher, associate editor of the Akron Beacon Journal; Ray P. Dinsmore, vice president of Goodyear Tire & Rubber Co., of Akron, Ohio; and the Honorable John McSweeney, a former distinguished Member of this House. All of them should be congratulated for their interest and effort in the future of Kent State University.

Certainly this opportunity should not pass without paying tribute to the efforts of those who preceded Dr. Bowman in the president's chair: Dr. John McGilvrey, Dr. James Engleman, and Dr. K. C. Leebrick. They have made this day possible by their work on this great campus.

As an alumnus of this great university, I am extremely proud to join today with the students, faculty, and my fellow alumni of Kent State University in celebrating the school's 50th birthday. I am doubly proud because today is also my own birthday. Although I am not as old as my alma mater, it is of great personal pride to me to look forward to celebrating our birthdays together in the years to come.

Mr. Speaker, I include at this point in the RECORD a copy of a telegram sent by President Dwight D. Eisenhower to Kent State University on the occasion of its 50th anniversary:

THE WHITE HOUSE,
Washington, D.C., May 13, 1960.

GEORGE A. BOWMAN,
President, Kent State University, Kent, Ohio:

It is a pleasure to join in the observance of the 50th anniversary of Kent State University.

Over the past 50 years this university has achieved a fine record of growth and service in the field of higher education. In this tradition I know it will continue to advance the welfare of its students and the national community.

Congratulations and best wishes.

DWIGHT D. EISENHOWER.

Mr. LATTA. Mr. Speaker, today, June 19, 1960, marks the golden anniversary of Bowling Green State University at Bowling Green, Ohio. I would like, at this time, to enumerate some of the accomplishments of this outstanding institution of higher learning.

On May 19, 1910, Bowling Green Normal School was established. This school initially was designed to serve the northwestern part of Ohio. However, at this time its student body consists also of many people from the other 49 States as well as many foreign lands. When Bowling Green was founded it evidenced an amazing amount of vigor. This vigor lead to the establishment of the schools of business administration, liberal arts and the graduate school.

From a school consisting essentially of one building Bowling Green State University has become a huge, sprawling campus with some of the most modern and functional classrooms and dormitories in the United States. The building program during the past 10 years has been phenomenal. Many additional classrooms and dormitories plus one of the finest and largest student union buildings in the country have been built.

A special debt of gratitude must be extended to President Ralph W. McDonald who came to Bowling Green State University in 1951 and has since dedicated his life to its ever-changing needs. Dr. McDonald's forward look at the American educational system has immeasurably aided him in his constant efforts to improve the academic standards and the physical facilities of the university.

Another vote of thanks must go to Dr. McDonald's exceptional faculty, for without their help his task would have been virtually impossible. They are nationally recognized for their exceeding devotion to the advancement of higher learning. This is evidenced by the great number of fine scholars who have emerged from Bowling Green State University.

The president, Dr. McDonald, and the faculty have been blessed with a board of trustees who have done everything within their power for the advancement of the university. We are most grateful to them.

I am very proud to join with the students, faculty and alumni of Bowling Green State University in celebrating the school's 50th anniversary. I am informed that congratulations have been received on this occasion from President Dwight D. Eisenhower. It reads as follows:

Through Congressman DELBERT L. LATTA I have learned of the plans to celebrate the 50th anniversary of Bowling Green State University at a convocation this Thursday.

Before leaving for the summit conference in Paris I want to send my congratulations to your students, faculty, and friends. The American standards of character and intellect which are the strength of your university are also the strength of our country's dealings with neighbors around the world.

I am delighted to add my best wishes for the continuing growth of Bowling Green in honor and in service to the national community.

DWIGHT D. EISENHOWER.

Mr. COOK. I thank the gentleman. I am well aware of the fact that Bowling Green State University is a rival of Kent University and was also born 50 years ago.

Mr. HECHLER. Mr. Speaker, will the gentleman yield?

Mr. COOK. I yield to the gentleman from West Virginia.

Mr. HECHLER. I would like to congratulate the gentleman from Ohio on his birthday.

In the months that he has served in this body, he has richly earned the reputation of being one of the most effective first-term Members of Congress, and I have confidence that he will be returned by his constituents.

I am also glad that the gentleman from Ohio has called attention to Kent State University, a small, great university, on the 50th anniversary of its establishment.

Mr. Speaker, many students from my section of West Virginia are familiar with Kent State University. Kent State is a member of the Mid-America Conference, and Marshall College in my hometown of Huntington, W. Va. participates with Kent State in numerous athletic and other events. We in West Virginia have great respect for this institution, and I commend the gentleman from Ohio for bringing to the attention of the House the 50th birthday of this institution which we are today celebrating.

Mr. LEVERING. Mr. Speaker, will the gentleman yield?

Mr. COOK. I yield to the gentleman from Ohio.

Mr. LEVERING. Mr. Speaker, I rise to compliment the gentleman, my colleague from Ohio, for the statement he is making today on the occasion of the 50th anniversary of one of our fine small American colleges, Kent State University. I offer heartiest felicitations on this occasion not only to Kent State University but to the gentleman who is also celebrating his anniversary on this occasion. Kent State University compares very favorably with the fine colleges in the 17th Congressional District of Ohio, which I have the honor to represent in the Congress: Denison University, at Granville, my alma mater; Ohio Wesleyan University at Delaware; Ohio State University campuses at Mansfield and Newark; Kenyon, at Gambier, and Ashland College, at Ashland. Many fine people from my district have graduated from Kent State and many are currently enrolled there. I extend my congratulations to this great institution of learning and my distinguished colleague from Ohio one of its outstanding graduates.

Mr. COOK. I merely wish to say as an Ohioan that I am very proud of the fine schools located in my district, and I assure the gentleman, as an alumnus of Kent State University, I take particular pride in my alma mater on this occasion.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ARMED FORCES DAY

Mr. HECHLER. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. McCORMACK] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. McCORMACK. Mr. Speaker, Armed Forces Day is the annual occasion when we take stock of the latest known developments in America's weapons of offense and defense, of the discipline and skill of the men of our Armed Forces, and of the spirit of patriotism that inspires the Nation whose sword and shield they are. For it is in the spirit of men, more than in wealth or the steel and explosives that wealth can purchase, that the security of America lies. Most important, of all the qualities that can make for the preservation or the destruction, of a country, is that intangible but immediately identifiable quality known as morale. Though it is in the Armed Forces that morale is immediately evident, and overwhelmingly important, the morale of the Armed Forces must derive ultimately from the morale permeating the citizenship of the country. We could not expect to draw individuals from a discouraged, disaffected, lazy, and luxury-loving population, and so spur and train and indoctrinate them that they would become courageous, disciplined, and energetic fighters for home and fireside, still less for such intangibles as freedom and justice. Out of the observance of this day, out of the display of weapons and material, out of the speeches and the marching and singing, we must draw one all important lesson—that we are all involved in the enterprise of American security, of the promotion of peace and justice in the world. Each of us is essentially involved in the Armed Forces, whose service to America we celebrate on this day.

PARIS CONFERENCE COLLAPSE: REALISTIC NATIONAL POLICY REQUIRED

The SPEAKER. Under previous order of the House, the gentleman from Pennsylvania [Mr. FLOOD] is recognized for 30 minutes.

Mr. FLOOD. Mr. Speaker, the complete collapse of the Paris meeting of heads of governments is now a matter of history. Following as it did the sensational disclosures of the U–2 intelligence plane incident in the heart of the Soviet Union, the Paris failure has stirred the peoples of all countries to a degree not equaled since the world-shaking crises prior to World War II.

Featured by Premier Khrushchev's stern warnings against further intelligence flights by U.S. aircraft into Soviet territory and the President's suspension of them and promise not to resume such flights, without extracting a compensating concession from the Soviet leader, the situation is without parallel in American history. Yet, when examined closely, it is correlated to important political occurrences in other parts of the world, including the continental United States.

Among these have been agitations at Panama, fanned by Communist mentors, for what is described as reaffirmation of Panamanian sovereignty over the Canal Zone land grant. An unfortunate statement at Panama by one of our high ranking diplomatic officials to the effect that the United States had recognized the "titular sovereignty" of Panama over the Canal Zone, whatever that is, and that Panama should have "visual evidence" of such sovereignty in the formal display of its flag on the Canal Zone, played into the hands of the international conspiracy for wresting the exclusive sovereignty control of the zone from the United States.

In view of the obvious Soviet policy of aggressive subversion in strategic areas, such as Panama, Cuba, and Indonesia, it was not difficult to foresee and to state to the House on January 13, 1960, that the pattern at Panama would supply the precedent for similar agitations with respect to Alaska, purchased in 1867 by treaty from Russia. It is indeed a sterile satisfaction to say that my predictions with respect to a vitally important question have again been fulfilled.

Now, Mr. Speaker, what is the situation in Alaska? It is common talk among people there about frequent radio broadcasts from Siberian stations across the Bering Sea urging in clear English the resumption of Soviet sovereignty over that part of the United States. But even more ominous, are persistent intelligence flights of Soviet planes over Alaska, which U.S. forces are not permitted to stop.

In Alaska today, we have a situation that combines the pattern of Panama with that of the flight over Soviet territory of the U–2 intelligence plane, which was shot down. Moreover, there have been other U.S. planes shot down in other areas.

Yet, Mr. Speaker, despite the significance of the Alaska situation the press of our country, with some minor exceptions, has been strangely silent. What is the influence that leads to such suppression of vitally significant news?

The net result of this silence could well make the United States a province of the one world of universal communism. Our safety demands that the Congress find out and remove the controls that now approach the ultimate in tyranny by denying such crucial information to the Nation.

I think I reflect the views of all peoples and all races, including those of holy Russia, when saying that they do not wish war. But war will not be prevented by abject surrenders on the part of the United States, as some Communist leaders and their collaborators in our country appear to desire and to expect. It can be avoided only by standing up for our just rights and by effective precautions to prevent the tragedy of another Pearl Harbor.

To these ends, Mr. Speaker, our Government should call for the arrest and deportation of Soviet spies, who form a far larger fifth column here than exists in the Soviet Union. For such procedure we have as a precedent the recent firm aciton of little Switzerland.

Meanwhile, the people of the United States will expect the President to issue orders to our Alaska commands to protect our positions there in the same way Premier Khrushchev protects those of the Soviet Union. These orders would include instructions to challenge Soviet planes and to shoot down those that do not comply with orders to land.

CANAL ZONE SECURITY: SIGNIFICANCE OF PANAMA FLAG

Mr. FLOOD. Mr. Speaker, during the present session of the Congress the questions of the sovereign control of the Canal Zone and Panama Canal have been extensively debated. There is little new of basic nature that could be added to what has already been presented. Yet, because of the failure of our Government, in both the legislative and executive branches, to take a firm, forthright position with respect to our just rights at Panama, the Isthmian canal policies of the United States are still uncertain. It is imperative that these policies be made definite by reaffirmation of the long-established policies under which the Panama Canal was constructed and has since been maintained and operated.

Many will recall the attempted mob invasions of the Canal Zone on November 3 and 28, 1959, requiring the use of force by Canal Zone police and the U.S. Army to repel the invaders. Under radical leadership, some of it communistic, the prime purpose of these mobs was to plant the flag of Panama in the Canal Zone as the symbol of Panamanian sovereignty over that vital strip of land. These two attempts of the invaders failed but their real objectives are still uppermost in their minds, and these are sovereignty over the Canal Zone and eventually nationalization of the Panama Canal.

It is significant, Mr. Speaker, that subsequent to these two abortive efforts of Panamanian mobs, the Foreign Minister of Panama, Miguel J. Moreno, Jr., made extensive foreign travels, including a visit in Egypt to present Panamanian viewpoints and to be briefed on Egyptian experience in regard to the Suez Canal.

While there, Foreign Minister Moreno had ample opportunity to discuss the problems of the Panama Canal with Egyptian officials who had succeeded in bringing about nationalization of the Suez Canal. It is significant too that Panama and the United Arab Republic recently established diplomatic relations with each other.

Meanwhile, what had happened at Panama? Following the attempted November 3, 1959, invasion, the Government of the United States, instead of a stern warning against such future attempts, sent a diplomatic emissary to Panama to appease those stirring up the trouble. This emissary, Hon. Livingston T. Merchant, with the approval of his superiors in the State Department, issued a public statement recognizing Panama as "titular sovereign" over the Canal Zone and, according to Panamanian sources, agreed that the flag of Panama

might be displayed in the Canal Zone to show such sovereignty.

In addition, the President of the United States himself, on December 2, 1959, following the return of Secretary Merchant, publicly expressed the belief that Panama should be allowed to fly her flag in the Canal Zone to show Panamanian "titular sovereignty."

These actions, Mr. Speaker, taken without the consent of either the Congress or the treatymaking power of our Goverment, reflects a credulity and naivete that are simply unbelievable on the part of high U.S. officials.

Moreover, these irresponsible declarations startled the people of our Nation, who have deluged the Congress with letters expressing strong opposition to what they consider a pending surrender of our treaty rights at Panama.

In this connection, Mr. Speaker, I have yet to find one U.S. citizen well informed on Isthmian problems who favors such surrender. I have never seen an experienced Panama Canal official, present or former, or any member of the Armed Forces who has served on the Isthmus who does not vigorously oppose such an ignominious retreat from our solemn treaty responsibilities.

In fact, many are demanding to know what are the influences in our Government that have permitted U.S.-Panama relations to degenerate to the degree they have. To them, I would add the question: What more could be accomplished by open, bold, and shameless treason than has been done at Panama through the processes of vacillation and appeasement?

The responsible officials of our Government who have talked in such loose terms about permitting the display of the Panama flag over the Canal Zone have never had any assurance from the Panamanian Government that such display would mean no more than a recognition of its "titular sovereignty," or more accurately, its mere reversionary interest in the sole event of the United States ceasing to operate the Panama Canal. Moreover, Mr. Speaker, it is certain that any Panamanian Government would never make such an agreement but would hold such display as our recognition of the complete sovereignty of Panama over the Canal Zone.

In view of the wide knowledge of the Isthmian question in the Congress, it is not strange, Mr. Speaker, that the House of Representatives, after a notable debate on February 2, 1960, passed, by overwhelming vote of 381 to 12, House Concurrent Resolution 459. This resolution expressed the sense of the Congress that any variation in the traditional interpretation in the 1903, 1936, and 1955 treaties between the United States and Panama involving the provisions of such treaties concerning territorial sovereignty shall be made only pursuant to treaty.

This action by the House of Representatives, Mr. Speaker, was not merely a routine vote of our membership, but a reflection of strong views of the American people on a matter in which they are vitally interested. As such, it served as a rebuke to those, in and out of Government service, who, by naive intentions or devious methods, would undermine our position of exclusive sovereign control over the Canal Zone and Panama Canal.

Unfortunately, at the solicitation of the Secretary of State, House Concurrent Resolution 459, has not yet been passed by the Senate, his opposition being on the basis that such action might offend Panama. This, in effect, is the same as saying that its approval by the Senate would anger Panamanian mobs and the radical politicians who take their cues from them.

Returning now to the question of displaying the Panama flag over the Canal Zone to indicate what is loosely called "titular sovereignty," this is not a meaningless gesture of good will as some of our naive leaders would have us believe. The flag has but one meaning, and that is sovereignty.

For this reason, its display would be but the first step in the Panamanian program for eventual nationalization. The second step would be to secure its international recognition as evidence of full sovereignty. Then the way would be clear, in a legal sense, for the rest of their program through the most expedient means with the example of Suez before them.

The attitude of our Department of State touching these questions has undoubtedly given to our Latin American neighbors and the world at large the impression of weakness, timidity, and an excessive zeal for appeasement.

When considering this gravely important isthmian question, Mr. Speaker, we should never lose sight of the fact that the Panama Canal is a part of the coastline of the United States. The flag of our country there is the symbol of our status as a sovereign people over the constitutionally acquired domain of the Canal Zone. As long as our flag flies supreme there, it will fly over our territory here and elsewhere. The day another flag is raised over the Canal Zone will indeed be tragic and bode ill for the future of the United States.

It will not be long now before the Congress will adjourn. We should not leave this crucially vital issue in the hands of executive bureaucrats who have so long and so repeatedly demonstrated their inability to deal with it.

The time for action has long since passed. Because of the nonaction attitude of the Senate, the House of Representatives should now adopt its own independent resolutions on these questions. To this end I have introduced three House resolutions identical with the three concurrent resolutions previously introduced by me. Prompt consideration by the House is respectfully urged as an imperative necessity for the security of the United States.

The texts of the three indicated House resolutions follow:

HOUSE RESOLUTION 516

Whereas there is now being strongly urged in certain quarters of the world the surrender, by the United States, without reimbursement, of the Panama Canal, to the United Nations or to some other international organization for the ownership and operation of the canal; and

Whereas the United States, at the expense of its taxpayers and under, and fully relying on, treaty agreements, constructed the canal, and since its completion, at large expenditure, has maintained and operated it and provided for its protection and defense; and

Whereas the United States, following the construction of the canal, has since maintained, operated and protected it in strict conformity with treaty requirements and agreements, and has thus made it free, without restriction or qualification, for the shipping of the entire world; and, in consequence of which, with respect to the canal and the Canal Zone, every just and equitable consideration favors the continuance of the United States in the exercise of all the rights and authority by treaty provided, and in the discharge of the duties by treaty imposed: Now, therefore, be it

Resolved by the House of Representatives, That (1) it is the sense and judgment of the House of Representatives that the United States should not, in any wise, surrender to any other government or authority its jurisdiction over, and control of, the Canal Zone, and its ownership, control, management, maintenance, operation, and protection of the Panama Canal, in accordance with existing treaty provisions; and that (2) it is to the best interests—not only of the United States, but, as well, of all nations and peoples—that all the powers, duties, authority, and obligations of the United States in the premises be continued in accordance with existing treaty provisions.

HOUSE RESOLUTION 515

Whereas the subversive forces known as international communism, operating secretly and openly, directly and indirectly, threaten the sovereignty and political independence of all the Western Hemisphere nations; and

Whereas the American continents, by the free, and independent position which they have assumed and maintained, are not subject to colonization or domination by any power; and

Whereas the intervention of international communism, directly, or indirectly, or however disguised, in any American State, conflicts with the established policy of the American Republics for the protection of the sovereignty of the peoples of such States and the political independence of their governments; and

Whereas, such a situation extended to any portions of the Western Hemisphere is dangerous to the peace and safety of the whole of it, including the United States; Now, therefore, be it

Resolved by the House of Representatives, (1) That in any such subversive domination or threat, if it violates the principles of the Monroe Doctrine, and of collective security as set forth in the acts and resolutions heretofore adopted by the American Republics; and

(2) That in any such situation any one or more of the high contracting parties to the Inter-American Treaty of Reciprocal Assistance may, in the exercise of individual or collective self-defense, and in accordance with the declarations and principles of above States, take steps to forestall or combat intervention, domination, control, and colonization in whatever form, by the subversive forces known as international communism and its agencies in the Western Hemisphere.

HOUSE RESOLUTION 517

Whereas the United States, under the Hay-Buanau-Varilla Treaty of 1903 with Panama, acquired complete and exclusive sovereignty over the Canal Zone in perpetuity for construction of the Panama Canal and its perpetual maintenance, operation, sanitation, and protection; and

Whereas all jurisdiction of the Republic of Panama over the Canal Zone ceased on exchange of ratifications of the 1903 treaty on February 25, 1904; and

Whereas since the time the United States has continuously exercised exclusive sovereignty and control over the Canal Zone and Panama Canal; and

Whereas where responsibility is imposed there must be given for its effectuation adequate authority; and with respect to the Panama Canal the treaty of 1903 so provided; and

Whereas the United States has fully and effectively discharged all its treaty obligations with respect to the Panama Canal and the only legitimate interest that Panama can have in the sovereignty of the Canal Zone is one of reversionary character that can never become operative unless the United States should abandon the canal enterprise; and

Whereas the policy of the United States since President Hayes' message to the Congress on March 8, 1880, has been for an interoceanic canal "under American control," that is to say, under the control of the United States; and

Whereas the grant by Panama to the United States of exclusive sovereignty over the Canal Zone for the aforesaid purposes was an absolute, indispensable condition precedent to the great task undertaken by the United States in the construction and perpetual maintenance, operation, sanitation, and protection of the Panama Canal, for the benefit of the entire world: Now, therefore, be it

Resolved by the House of Representatives, (1) That the United States, under treaty provisions, constitutionally acquired, and holds, in perpetuity, exclusive sovereignty and control over the Canal Zone for the construction of the Panama Canal and its perpetual maintenance, operation, sanitation, and protection; and

(2) That there can be no just claim by the Republic of Panama for the exercise of any sovereignty of whatever character over the Canal Zone so long as the United States discharges its duties and obligations with respect to the canal; and

(3) That the formal display of any official flag over the Canal Zone other than that of the United States is violative of law, treaty, international usage, and the historic canal policy of the United States as fully upheld by its highest courts and administrative officials; and would lead to confusion and chaos in the administration of the Panama Canal enterprise.

PANAMA CANAL: LONG-RANGE IMPROVEMENTS

The SPEAKER. Under previous order of the House, the gentleman from Texas [Mr. THOMPSON] is recognized for 30 minutes.

Mr. THOMPSON of Texas. Mr. Speaker, since 1949 I have been actively interested in the problems of the Panama Canal and interoceanic canals generally. My first official assignment was as chairman of a special inquiry into the operations of the Panama Canal, which culminated in the reorganization of the enterprise under Public Law 841, 81st Congress. That law brought about the first major administrative change in the canal organization since April 1, 1914, and placed the enterprise on a self-sustaining basis.

Though reassigned to another committee in the Congress in 1951, my interest in the canal has never diminished. Instead, it has increased and I have been able to keep a close contact with developments, as well as to make contributions by means of inserting meritorious statements in the CONGRESSIONAL RECORD and participation in hearings.

Among the most gratifying features of this association has been the growing evidence of expanding public knowledge of important canal questions as evidenced by the publication of thoughtful and discriminating articles in the lay and professional press. So much has this interest grown that students of our colleges and universities, graduate and undergraduate, have undertaken to write these and papers on various phases of the canal question.

The latest contribution is a research paper on the long-range Panama Canal program by Midshipman Mark Melvyn Golden of the U.S. Naval Academy, class of 1960, prepared as part of his fourth year training.

Based upon an examination of evidence from many sources, independent as well as "official," Midshipman Golden's paper is a remarkably clear, logical, and concise statement of the major problems involved in the canal question. It shows up the pitfalls of extreme interpretation of any single factor as paramount in justifying predetermined objectives and presents conclusions that take into consideration all the main features involved in the economic operation of the Panama Canal as a great interocean link for the commerce of the world on terms of equality.

As such, Midshipman Golden's paper reflects high credit not only on himself but also on the great service Academy which encouraged him to undertake the arduous task of research which necessarily preceded its writing.

Particularly notable, Mr. Speaker, was Midshipman Golden's recognition of the fallacious premise of hypothetical security on which the 1947 drive for a vast sea-level undertaking at Panama was predicated. This, I wish to emphasize by repeating one of his quotable statements:

It is a matter of conjecture to say whether a sea-level or a lock canal could be more seriously damaged by an atomic bomb. It is a matter of fact to realize that either type would be so seriously damaged that defense should not be a factor in laying out long-range plans.

In order that the indicated paper may be recorded in the permanent annals of the Congress and thus be made available as an inspiration for students in other educational institutions, as well as for the legislative and executive agencies of our Government concerned with canal questions, I quote the text, footnotes, and bibliography:

LONG-RANGE IMPROVEMENTS ON THE PANAMA CANAL

(A research paper submitted to the head of the Department of English, History, and Government, by Mark M. Golden, midshipman, first class, U.S. Naval Academy, Annapolis, Md., February 1960)

I. OBJECTIVE

The purpose of this paper is to study the most feasible of the proposed long-range improvements on the transisthmian waterway across Central America. The plans presented will be analyzed from the mission point of view; to provide a shortcut for shipping with reasonable tolls, minimum navigational hazards, and few delays in transit. The alternate plans are for (1) conversion of the present Panama Canal to an enlarged, modernized, lock-terminal lake canal; (2) conversion of the present Panama Canal to sea level; and (3) construction of a completely new canal through Nicaragua.

Some of the major factors to be considered are future traffic trends, cost, marine operational feasibility, diplomatic implications, and military defense.

II. THE PRESENT PANAMA CANAL

The Panama Canal is a lock and lake-type canal which provides a waterway for oceangoing vessels to use as a shortcut between the Atlantic and Pacific Oceans. Fresh water is used for lockages, and is taken principally from Gatun Lake. Madden Lake serves as a reservoir for use during the dry season.

The minimum dimensions of the channel are 300 feet wide in Gaillard Cut and 37 feet deep at low tide in Balboa Harbor. From the Cristobal breakwater at the Atlantic terminus to San Jose Rock at the Pacific terminus the channel has a length of 51.2 miles, measured along its 23 courses.[1]

Transiting from Balboa Harbor at the Pacific entrance to the Atlantic Ocean terminus, ships encounter several major features of the Panama Canal. First they are raised to the 54 feet of elevation of Miraflores Lake by two pairs of Miraflores locks.[2] About 1 mile further, the single pair of Pedro Miguel Locks raises ships to the level of Gatun Lake, which is regulated between 82 and 87 feet. Gaillard Cut is the channel extension of Gatun Lake through the Continental Divide. At the northern edge of Gatun Lake, three continuous pairs of Gatun Locks lower ships to the level of the Atlantic Ocean.[3]

The locks themselves are built in two parallel lanes in order to handle two-way traffic. The size of the lock chambers, 1,000 feet long by 110 feet wide, is the factor that limits the size of transiting ships.[4]

The Panama Canal is operated and maintained by the Panama Canal Company, a corporate agency and instrumentality of the U.S. Government. The Panama Canal Company is financially self-sufficient, and not only pays for its own operation and depreciation, but also produces a net income.[5]

III. THE NEED FOR A CANAL

The Panama Canal is vital to the defense of the United States and the commerce of the world. The extreme weakness of extending lines of communications around the Horn was first felt by the United States during the Spanish-American War. The cruiser *Oregon*, which was berthed in San Francisco Harbor, consumed 90 days before being able to take part in the Battle of Santiago de Cuba. Fueling and replenishing had to be done by putting into South American ports en route.[6] In the present era of long-range warships with high cruising speeds, the voyage around the Horn has been greatly

simplified. However, with the prospect of undeclared lightning warfare, time is so vital that the difference of even a few days could lose a war.

From the merchant marine point of view, the payment of tolls to go through the Panama Canal is cheaper than the delay that would result from an ideal, uneventful rounding of the Horn.[7] And the weather conditions in the Horn area are usually far from ideal. Also to be taken into consideration are the additional expenses of fuel and supplies for the longer trip. In fact, during the recent Suez crisis, some shipping found it more economical to use the Panama Canal than to steam around the Cape of Good Hope.[8]

During both World War II and the Korean conflict, the Panama Canal played a major part in transoceanic shipping. In World War II about 5,300 combat vessels and over 8,500 support vessels (transports, supply ships, et cetera made the transit through the Panama Canal. Throughout 1953, the last full year of the Korean conflict, 1,064 U.S. Government ships locked through the canal. Most of these vessels were carrying supplies and war materials to the Far East.[9]

As mentioned previously, a size limitation is imposed on ships by the dimensions of the lock chambers. The only merchant vessels that are too large to use the Canal are *Queen Mary* and *Queen Elizabeth*.[10] *Midway* and *Forrestal* class aircraft carriers are the only American warships that cannot fit in the Canal.[11] A war would probably force the conversion of *Queen Mary* and *Queen Elizabeth* from North Atlantic passenger ships to troop transports for use anywhere in the world. The flexibility of these ships and the supercarriers would be increased if they had the ability to transit the canal. Also, present trends in ship contruction, especially of tankers, are toward longer and wider vessels.

IV. OPERATIONAL PROBLEMS OF THE CANAL

The Panama Canal today has two major flaws, other than dimensions of the locks, that were inherent in the original construction. First, the Pacific locks are in two separate groups; the Pedro Miguel locks and the Miraflores locks. They should have been built together in one continuous structure, as were the Atlantic locks. The second fault is the lack of a summit level anchorage between Gaillard Cut and the Pacific locks.[12]

As a ship makes the approach to the Miraflores locks from the Pacific Ocean, a small boat rows out from the central wall with leader lines. The ship is maneuvered until it is dead in the water, and lines are secured to electric locomotives that move the ship through the locks area. The entire procedure must be repeated to go through the nearby Pedro Miguel locks. At least an hour is lost and additional hazards are undergone as a result of the extra approach.[13]

The most dangerous area of the Panama Canal is just north of the Pedro Miguel locks. A tremendous volume of water is drawn from Gaillard Cut each time the Pedro Miguel locks are filled, causing a surge reaching speeds of 25 knots and having an amplitude up to 3 feet. At times the surge overpowers vessels, resulting in their grounding on the rocky banks of Gaillard Cut.[14] The accident statistics illustrate that the safety of ships depends too much on the exceptional skill of the pilot, rather than the operational characteristics built into the canal.

If passage through Gaillard Cut is dangerous in clear weather, it is more hazardous in fog. This section of the channel is frequently covered with a heavy fog at night after 2200 hours.[15] In fair weather or foul, the Pedro Miguel locks are a dangerous constriction to traffic in their present location. The resulting traffic delay would be eased by having a summit level anchorage between Gaillard Cut and the Pacific locks.

V. THE TERMINAL LAKE—THIRD LOCKS PLAN

An obvious solution for the principal marine operational problems of the Panama Canal is that developed in the canal organization during World War II and presented by its author before the Panama Section of the American Society of Civil Engineers on May 20, 1943. Known as the Terminal Lake, third locks plan, it calls for the relocation of the Pacific locks in one continuous structure at Agua Dulce, an area near the present Miraflores locks. The level of Miraflores Lake would then be elevated from its present 54 feet to the height of Gatun Lake. The entire summit water level would be raised to 92 feet.[16]

Before work on the unsuccessful third locks project of World War II was halted, some $75 million was expended, for the most part on excavating.[17] The proposed modification includes construction of new and larger locks, using the excavations already started for the discontinued third locks project, but without sharp approach channel curves.[18]

In 1943 the cost of the Terminal Lake, third locks plan was estimated to be $283 million for all work except the widening of Gaillard Cut.[19] A more recent estimate, for the project with lock chambers 1,500 feet long and 200 feet wide, is $1,020,920,000. This proposed size would needlessly double the flooding volume of the lock chambers, which would double the consumption of fresh water.[20] Because of dry seasons in Panama, the additional water requirement would necessitate the construction of reservoirs in territory outside the 10 mile treaty width of the Canal Zone. This in turn would mean negotiating a new treaty with the Republic of Panama at a most inopportune time.[21] Locks with dimensions of 140 x 1,200 feet would be capable of handling modern aircraft carriers, and would be half the cost of the larger ones.[22]

This plan is unique in that it not only takes into consideration the engineering feasibility, but also is based on marine operating experience and painstaking studies of marine accidents throughout Panama Canal history. The completed project would eliminate the dangerous surge in Gaillard Cut, remove the bottleneck Pedro Miguel Locks, effectively widen constricted channel areas, provide the badly needed summit level anchorage, improve navigation, reduce the effect of fog on operations, save time now wasted on an additional approach to the Pacific locks, and increase the capacity of the canal.[23]

VI. THE SEA LEVEL PLAN

In December of 1945, the Governor of the Panama Canal was authorized by Congress to conduct a comprehensive investigation of the transisthmian canal problem, with the proviso that the results of the studies be submitted by the end of 1947. The Canal Zone Government radically interpreted the phrase "capacity and security" from their authorization to mean making defense the main consideration for their recommendations.

Advocates of the sea level canal point out that a single atomic bomb or a well-directed attack with conventional explosives could put a lock canal out of commission for an extended period of time by either of the following means: (1) Seriously damaging the lock structures or (2) draining the water supply in the terminal lake by breaching one or more of its dams.[24] Actually, a sea level canal would be no better off than a lock type. A nuclear explosion would so severely damage even a sea level canal that prompt repairs would be impossible.[25] If an atomic or hydrogen bomb were detonated in the vicinity of Gaillard Cut, the blast would probably cause major landslides which could conceivably fill that portion of the channel. Using defense as a criterion for the long-range improvements on the Panama Canal is therefore unrealistic. There is no way any object can be made impervious by its construction features, as time will yield a means of destroying it.

The Governor's 1947 report recommended that "in order to meet the future needs of interoceanic commerce and national defense, the Panama Canal be converted to a canal at sea level."[26] The proposed plan calls for the draining of Gatun Lake to lower its surface to sea level. Some 1,069 million cubic yards of earth and rock would be excavated to construct a channel 60 feet deep at low tide and 600 feet wide at a depth of 40 feet below low tide.[27] Yet, wartime studies conclusively showed that the majority of marine accidents occurred in the restricted channel through Gaillard cut. Replacing the terminal lake with a restricted channel extending the entire length of the canal would increase navigational hazards.

There is also the possibility of slides occurring during excavation for a sea level canal. Geological studies made throughout the history of the Panama Canal have shown that the ground in Panama is not homogeneous. The earth on the Atlantic side is composed of tertiary sediments, while the Pacific side consists of tertiary volcanic rock. An instability results from the two types of ground not being capable of adhering to each other, which causes underground slides. Disintegration of rocks moistened by rain and humidity causes surface slides as the particles give way to gravity.[28] Both types of slides have plagued engineers from the time construction was begun on the Panama Canal.

The 1947 report points out that there is an inherent navigational difficulty in a sea level canal due to the different tides of the Atlantic and Pacific Oceans. Tides at the Atlantic side generally do not vary more than 2 feet, and so are not a problem. The

Pacific tides vary as much as 22 feet over a period of 12 hours from low to high tide. The tidal variations on the Pacific side of the present Panama Canal cause a 2- to 4-knot current in the vicinity of Rodman Naval Base, south of the Miraflores Locks.[29] The sea level channel would probably result in alternating currents up to 4.5 knots throughout the sea level canal. The solution in the 1947 report is to install a tidal regulating device near the Pacific terminus of the proposed canal, to be used twice daily, during the times of maximum currents. A barrier to an unrestricted bypass channel would be opened at all times the currents are below 2 knots. Since the tidal lock would function only to lift ships in or out of the canal, there would be no summit lake.[30]

The initial estimated cost in 1947 for conversion to sea level was $2,483 million, but this estimate did not include the costs involved in negotiating a new canal treaty with Panama. Since then construction costs have doubled. The present day costs of converting the Panama Canal to sea level would not be an appreciable savings over construction costs of a new canal through Nicaragua.[31]

VII. A CANAL THROUGH NICARAGUA

The Bryan-Chamorro Treaty of 1914 between the United States and Nicaragua gives the United States the exclusive option to construct, maintain, operate, and protect a transisthmian canal through Nicaragua.[32] This route has been the major rival of the Panama route throughout canal history.

Although the Nicaraguan route is considerably longer, it is simplified by the many natural waterways present. Lake Nicaragua has an average elevation of 104 feet and has maximum dimensions of 45 by 100 miles. Lake Managua, with an average elevation of 127 feet, is 40 by 20 miles, and drains into Lake Nicaragua through the Tipitapa River. The proposed route features the use of the Deseado and San Juan Rivers to Lake Nicaragua. It would go across the southern end of Lake Nicaragua, then along a channel to be excavated through the Continental Divide. This takes advantage of the pass through the Continental Divide being at its most favorable ground profile at a relatively low elevation of 153 feet.[33]

The lakes provide the principal means of transportation and communications in Nicaragua. The construction of a sea level canal would entail the draining of at least one of the major lakes. Furthermore, excavation for such a canal would be prohibitively costly. Any canal through Nicaragua would have to be of the lock type.

A summit lake-lock canal similar to the Panama Canal, but enlarged and modernized, could be completed for $4,095 million. The use of the lakes would leave only a narrow part of the route to be excavated, and conditions along the route appear to be ideal for nuclear blasting.[34]

Some of the more important defects of the Nicaraguan route are as follows:[35]

1. Panama has good harbors on both terminal points of the Panama Canal. Nicaraguan harbors would have to be built with considerable difficulty.

2. One region along the Nicaraguan route has an annual rainfall of 256 inches, which would pose a real problem for excavation and construction.

3. The large amount of rainfall would mean poor marine operating weather.

4. There are active volcanoes and occasional earthquakes in the route area.

5. There is a complete lack of construction, not only for a canal, but of essential housing and facilities for workers.

Therefore, from the engineering point of view, it is obvious that Panama is the better route.

VIII. DIPLOMATIC IMPLICATIONS

It has become the vogue among some officials in the Government of Panama, as well as influential merchants and wealthy aristocrats, to divert the Panamanian working class from noticing their own pocket lining by making an international issue of Canal Zone sovereignty. The friction has been increased lately by having outside elements hop on the bandwagon. Nasser of Egypt was quick to offer lessons in canal management, although the original treaties with Panama were nothing like the Suez agreements. The Suez Canal was to have been built and controlled for 99 years after its opening by a private company formed under deLesseps—and would have been returned to the Government of Egypt within the next decade if Nasser had not abrogated the pledges.[36]

Nasser was not the only power to back Panama. In February, 1959, the 21st congress of the Communist Party, at their meeting in Moscow, stressed assigning agents for infiltration into Latin America to forment hatred toward the "arrogant Yankees" that might eventually lead toward internationalization of the Panama Canal.[37] This did not mark the first signs of Communist activities in Panama. To gain a foothold in a focal area of the Western Hemisphere is as old a concept for the Communists as the party itself. Their plans to take over the Panama Canal are a major steppingstone toward their goal of world domination.

Three times, Panamanian mobs marched on the Canal Zone to plant Panamanian flags there. The first time was on May 2, 1958, and the second was on November 3, 1959. The second invasion, led by Dr. Quilino Boyd, a candidate for the Presidency of Panama, resulted in 4 hours of violence. Known Communists and fellow travelers were spotted in the crowd. During the rioting, the U.S. Embassy in Panama overheard broadcasts instructing the Panamanian National Guard [38] not to intervene in any demonstrations against the United States. As a result, the mobs were able to surround the U.S. Embassy in Panama and leisurely desecrate the American flag.[39]

The Hay-Bunau-Varilla Treaty of 1903 between Panama and the United States is in effect today. The key articles of the treaty grant exclusive sovereign control over the Canal Zone to the United States in perpetuity for the perpetual maintenance, operation, and protection of the Panama Canal, and specifically, to the entire exclusion of the exercise by Panama of any such sovereign rights, power, or authority. Thus the only interest that Panama can have in the Canal Zone is one of reversionary nature in the sole event the United States should discontinue its operation of the Panama Canal.[40]

The treaty of 1903 was a recognition of a fact admitted even by many leading Panamanians today—that the Republic of Panama is too politically and economically unstable to be able to handle a major project such as the Panama Canal. Rather than consider this a reflection on the good people of Panama, it should be an indication of their foresight. However, they seem to be losing their perspective lately.

Fortunately, the U.S. Congress has several well-informed spokesmen on the issue of sovereignty of the Canal Zone. Although the State Department of the United States wants to use a policy of concessions, the Congress is looking out for the United States, and will not tolerate the actions of Panama in trying to grab what they have no right to, either morally or by the supreme law of their land.

The United States made the Panama Canal. Not just with steamshovels and cement—but with blood and sweat; with victims of yellow fever and malaria; with people like the great Rear Adm. John G. Walker, Theodore Roosevelt, John F. Stevens, William C. Gorgas, George W. Goethals, William L. Sibert, and many others. The American people must guard their investment carefully.

IX. SUMMARY

The Panama Canal has safely and adequately served its purpose since its opening to traffic on August 15, 1914. The trend toward increasing traffic and the few flaws originally built into the Panama Canal require long-range improvements in the near future.

Recent political developments in the Republic of Panama indicate a desire to abrogate the grant in perpetuity of sovereign powers over the Canal Zone to the United States. Although the State Department of the United States has long been inclined to make concessions to Panama, the Congress is fighting the the rights of the United States according to treaty and law. If the Canal Zone should slip out of the hands of the United States, or if there is a probability that it will, the construction of a new transisthmian waterway through Nicaragua should be seriously considered.

Any extravagant and unnecessary expenditures on the Panama Canal would have to be reflected in considerably higher tolls, which would defeat the mission of the Panama Canal to commercial shipping. With this in mind, any routes other than Panama or Nicaragua must be ruled out. The stupidity of spending more for no special advantages, but rather several major disadvantages, also applies to the conversion of the present Panama Canal to sea level.

It is a matter of conjecture to say whether a sea level or a lock canal could be more seriously damaged by an atomic bomb. It is a matter of fact to realize that either type would be so seriously damaged that defense should not be a factor in laying out long-range plans.

From the marine operating point of view, the only plan that adequately provides for safe transit of ships and the anticipated increase in traffic at economic cost is the terminal lake-third locks plan. By replacing the heterogeneous Pacific locks with a continuous structure at Agua Dulce, the Pedro Miguel bottleneck is removed, dangerous lockage surges in Gaillard Cut are eliminated, and a terminal lake anchorage is provided—without interrupting the use of the Panama Canal for an extended period of time.

The 1947 report recommended that a sea level canal replace the present Panama Canal. The plan is unrealistic, as it would dangerously increase the probability of collisions and groundings by replacing the relatively wide lakes with a restricted channel. Possibly the recommendation was influenced by powerful companies interested

in the tremendous bulk of excavating the plan requires. Also, to convert to sea level might involve closing the Panama Canal for an extended period of time.

X. CONCLUSIONS

A firm political stand should be taken against the efforts of the Republic of Panama to acquire, bit by bit, sovereignty over the Canal Zone. Then the terminal lake-third locks project should be started to increase the capacity and safety of the Panama Canal. Should the United States lose control of the Canal Zone, the Nicaraguan lock canal plan could be made operational, although at a greatly increased cost.

Col. William Charles Golden, U.S. Army (retired); at his home in St. Petersburg, December 23, 1959. Background: Staff officer at Headquarters, U.S. Army Caribbean, Fort Amador, Canal Zone, 1949–51; Deputy Commander and Chief of Staff, U.S. Army Forces Antilles, 1952–53.

Lt. R. R. Robertson, U.S. Navy; at Bancroft Hall, Annapolis, January 22, 1960. Background: Commanding officer, U.S.S. *Jasper*, PC486, immediately prior to reporting to the U.S. Naval Academy in June 1959.

SOVIET ESPIONAGE ACTIVITIES

The SPEAKER. Under previous order of the House, the gentleman from New Jersey [Mr. GALLAGHER] is recognized for 20 minutes.

Mr. GALLAGHER. Mr. Speaker, during his barbaric performance in Paris Mr. Khrushchev made an interesting observation. He swore that before God his hands were clean and his heart was pure. I wonder just how clean they are. I wonder if they are any cleaner than they were the day he signed the order for the horror of Hungary. I wonder just how pure a heart can be that seeks to replace freedom with slavery, that substitutes falsehoods for truth, that corrupts words until they are meaningless. I wonder how pure a heart can be that calls upon God while the very system which he leads denies the existence of God. I remember when I was in Russia, a student at the university told me that he believed that there was a God but could never discuss it with anyone because if it were found out he would be considered unfit to attend Moscow University. He said the Communist teachings deny God and that the state was supreme, and that to believe in God was considered a weakness.

The Soviet Government seeks to keep recent events alive by today moving to have the U–2 incident taken up by the Security Council at the United Nations.

I thought perhaps it would be of interest to all who are interested to take a look at the bloody hands of Khrushchev and to peer into his black heart on the matter of espionage.

I thought perhaps this House would be interested in a bill of particulars on the espionage activities of the Soviet

Union and its Communist apparatus. These activities were carried on relentlessly, regardless of the temperature of the cold war. Of course this list cannot be complete. Many cases are classified, others for various security reasons have never been reported. These cases are documented and supported by evidence of which there is no reasonable doubt. Further, it does not take into consideration cases which could not be proven by the rules of American jurisprudence.

This present posture of American-Soviet relations emphasizes once again the great difficulties of dealing with the Communists. They who deny God call upon God to assist their case. They who invented and perfected international subversion and espionage find themselves able to condemn the U.S. activities which were undertaken not only for our own defense but on the defense of the entire free world.

It places us in a position where we must constantly justify our need to survive in the minds of our friends who themselves are the beneficiaries of our own survival.

I do hope that this information will, in some small way, contribute to a better understanding of the magnitude of the problem we face.

If it does nothing else I do hope that it will serve as one more indictment of communism and of Khrushchev. If Mr. Khrushchev insists in bringing the U–2 incident before the Security Council, let us bring his record of espionage before the Security Council and have a full disclosure of all the facts laid before the court of world opinion.

Let us also bring before the Security Council the entire record of Communist sabotage to peace, to progress, to understanding, to freedom, to governments, to nations, to the mind of man, and to the principles of God.

Mr. Speaker, the following is a bill of particulars on reported cases of Soviet espionage in the United States and other Western Allied nations that I hereby make part of this record:

(NOTE.—Those instances involving diplomatic personnel are indicated by the word "diplomatic.")

Vice President NIXON, in a speech in Syracuse, N.Y., said that two Soviet spies were arrested in Massachusetts while Premier Khrushchev was in the United States last fall.

May 18, 1960 (diplomatic): The State Department has just confirmed that one of them was a Soviet employee with the United Nations. His name was Vadin Alexandrovich Kirilyvk. He was here on a diplomatic passport. A request was made that his services to the United Nations be terminated. He was expelled from this country and returned to Russia. The name of the other is still classified.

May 11, 1960 (diplomatic): The Swiss Government arrested and expelled two Soviet Embassy officials for attempting to collect secret information on Swiss army installations and U.S. rocket bases in West Germany.

April 1, 1960: Anthony M. Wraight, a former Royal Air Force officer, was found guilty in London of having given military information to Russia and was sentenced to 3 years in prison.

January 30, 1960: Horst Ludwig and Fritz Briesemeister were sentenced by a West German court to 4 and 5 years at hard labor, respectively, for treason. Two other defendants, Werner Jaeger and his wife, Hanni, were sentenced to 3 years and 18 months.

February 21, 1959: Einar Bleckinberg, a former Danish diplomat, was sentenced in Copenhagen to 8 years in prison for spying on behalf of Communist Poland.

November 20, 1958: Lt. Hans Berli was sentenced by a Swiss military court to 4 years hard labor for giving classified military secrets to Czech agents.

November 20, 1958: Mark Zborowski was convicted of perjury in denying to a Federal grand jury investigating espionage that he had known Jack Soble. He was sentenced to 5 years in prison.

July 18, 1958: Brian Linney, an engineer, was sentenced to 14 years imprisonment by a British court for selling secret information to Col. Oldrich Pribyl, a former Czech military attaché in England.

June 7, 1958 (diplomatic): Nikolai I. Kurochkin, third secretary of the Soviet Embassy in Washington, was declared persona non grata for the improper procurement of U.S. Army manuals and other materials.

May 19, 1958 (diplomatic): Aleksandr Solovyev, assistant military attaché of the Soviet Embassy in Rome, after being detained on charges of espionage was asked to leave Italy.

February 21, 1958: M. Sgt. Roy A. Rhodes was convicted by a U.S. Army court-martial of conspiring to deliver U.S. secrets to the Soviet Union and was sentenced to 5 years' imprisonment at hard labor and was dishonorably discharged.

November 15, 1957: Col. Rudolf I. Abel, a Soviet intelligence officer, was sentenced to 30 years in prison and fined $3,000 for passing U.S. defense and atomic secrets to Russia.

November 1957: German officials reveal that a former first lieutenant in the West German Air Force has been convicted of espionage.

October 8, 1957: Jack Soble was sentenced to 7 years in prison after pleading guilty to heading a spy ring for the Soviet Union.

September 25, 1957: An Austrian Customs Service official was arrested for espionage and confessed that he turned information over to Czech Communist agents.

September 20, 1957: U.S. Air Force Capt. George French was convicted and sentenced to life imprisonment for attempting to sell military secrets to the Soviet Union.

September 5, 1957: A former Japanese Foreign Office official was fined and sentenced to prison for selling secrets to a Soviet agent.

August 9, 1957: Jacob Albam was sentenced to 5½ years in prison after pleading guilty to espionage in behalf of the Soviet Union as a member of the Soble spy ring.

August 9, 1957: Myra Soble, wife of Jack Soble, was sentenced to 5½ years in prison after pleading guilty to charges of espionage.

July 23, 1957: West German security officials broke a Communist spy ring headquartered in a Bonn hotel.

May 7, 1957: Three men were sentenced to death in Greece after being convicted of treason and espionage for the Soviet Union. Another man was given a life sentence and five other persons were given lesser terms.

April 24, 1957: Robert Folke Damstedt, assistant secretary of the Swedish Atomic Energy Commission, was convicted of stealing secret papers, and was sentenced to 5 years in prison.

March 16, 1957 (diplomatic): Jiri Stejskal, third secretary of the Czechoslovak Legation in Vienna, was expelled from Austria for attempting to bribe a police official to carry out espionage work.

March 12, 1957: A Swedish court sentenced Bedros Zartaryan, a Turkish engineer employed by a firm which was building Swedish naval and airbases, to 10 years at hard labor for grand espionage for the Soviet Union.

February 27, 1957 (diplomatic): The Danish Government expelled Soviet Lt. Comdr. Mikhail Ruditchev, assistance naval attaché of the Soviet Embassy, on the grounds that he was attempting to obtain secret military information.

January 28, 1957 (diplomatic): Vassili M. Molev, a clerk attached to the Soviet Embassy in Washington, was declared persona non grata by the State Department. He was later named as a coconspirator in the indictment of the Sobles' spy ring.

January 14, 1957 (diplomatic): Maj. Yuri P. Krylov, assistant military attaché of the Soviet Embassy in Washington, was declared persona non grata for purchasing classified electronic equipment and attempting to purchase secret military information.

December 18, 1956 (diplomatic): Mate Vegh, former Hungarian second secretary, was expelled from Switzerland for spying.

October 5, 1956: Jean Joseph Philip, a code clerk at the Budapest Legation in Paris, and Roger Dubois, legation press attaché, were convicted in France of spying for the Hungarian secret service and were sentenced to imprisonment.

October 5, 1956: Anatole Ericson, a radar instrument maker, was convicted of giving military secrets to Russia by a Swedish court and sentenced to 12 years at hard labor.

September 5, 1956 (diplomatic): Sweden expelled Peter Mirosnikov for receiving secret data from Anatole Ericson and sent a formal protest to Moscow about its spy activities in that country.

August 29, 1956 (diplomatic): Rostislav Shapovalov, second secretary of the Soviet mission to the U.N., was requested to leave the United States after it was discovered that he exerted pressure on a Russian refugee in the United States to become a Soviet agent.

August 24, 1956 (diplomatic): Victor I. Petrov, a translator in the languages section on the U.N. Secretariat, was discharged from the United Nations after the U.S. delegation issued a statement saying that Petrov had sought to get information vital to the security and defense of the United States.

July 13, 1956 (diplomatic): Gennadi Popov, the Soviet second secretary, was expelled from Canada for spying.

June 14, 1956 (diplomatic): Col. Ivan A. Bubchikov, assistant military attaché of the Soviet Embassy in Washington, was declared persona non grata for activities incompatible to his continued presence in this country.

March 1, 1956 (diplomatic): Maj. Anatoli Kuznetsov, assistant military attaché of the Soviet Embassy in Teheran, was expelled from Iran after being arrested with Iranian Air Force Warrant Officer Hussein Rejaei Tehrani who confessed to espionage.

September 14, 1955: An Australian Royal Commission on Soviet Espionage released its report. The Commission, created after Vladimir Petrov, third secretary of the Soviet Embassy, sought asylum from the Russians on April 13, 1954, declared that two Soviet spy apparatuses had been functioning in Australia since 1943. At least 120 Australians, all of whom were Communists, assisted the Soviet spy rings but because of the Australian law on espionage and the admissibility of evidence no prosecutions were undertaken.

December 22, 1954 (diplomatic): Maj. Ludvik Sochor, Czech military attaché in Geneva, and two of his assistants were expelled from Switzerland for espionage.

August 28, 1954: Nobunori Higurashi, a Japanese Foreign Office official, committed suicide after he had confessed to giving secret information to a Soviet spy ring. The central figure in the ring was Yuri A. Rastvorov, former member of the Soviet mission

to Tokyo, who has been granted political asylum in the United States. Two other Foreign Office officials have also been implicated.

May 29, 1954 (diplomatic): Leonid E. Pivnev, assistant air attaché in the Soviet Embassy in Washington, was declared persona non grata and expelled for engaging in espionage.

February 3, 1954 (diplomatic): Alexander P. Kovalev, second secretary to the Soviet delegation to the United Nations was declared persona non grata and expelled for espionage activities.

February 3, 1954 (diplomatic): Igor A. Amosov, assistant naval attaché at the Soviet Embassy in Washington, was declared persona non grata and expelled for engaging in espionage.

October 31, 1953: Private Robert W. Dorey was sentenced to 15 years in prison after pleading guilty to fleeing to East Germany, then twice returning to the U.S. zone with Soviet agents whom he guided around U.S. military installations.

June 8, 1953 (diplomatic): Yuri Novikov, second secretary of the Soviet Embassy, was named as a coconspirator in the Verber-Ponger indictment. He was then declared persona non grata by the U.S. Government and returned to the Soviet Union.

June 8, 1953: Kurt Ponger and Otto Verber were convicted of conspiracy to procure and transmit Army, Air Force, and aircraft plant data to the Soviet Union. They were sentenced to 5 to 15 years and 3½ to 10 years in prison, respectively.

June 8, 1953: Air Force Staff Sergeant Giusseppe Cascio was convicted by court-martial in Taegu, Korea, of conspiracy to give jet plane secrets to the Communists. He was given a 20-year jail sentence and a dishonorable discharge.

June 5, 1953: William Perl was sentenced to 5 years in prison for perjury for having told a grand jury in 1950 that he did not know atom spies Julius Rosenberg and Morton Sobell.

May 30, 1953 (diplomatic): Christache Zambeti, first secretary of the Rumanian Legation in Washington, was declared persona non grata for attempting to blackmail a U.S. citizen into espionage acts.

February 25, 1953: Lev. C. Pissarev, Tass correspondent, was deported from the Netherlands for spying after being arrested on December 23 in the act of receiving secret documents from a Dutch official who was cooperating with the police.

February 4, 1953: William Remington was found guilty of perjuring himself at his first trial in 1951 when he said he never gave any secret material of the War Production Board to Elizabeth Bentley, a self-styled Communist spy. He was sentenced to 3 years in prison.

October 1952: Nikolai Skvartsov, a political officer in the United Nations Department of Security Council Affairs, was discharged after the State Department notified the U.N. that he had "violated a U.S. law."

November 14, 1951: Ernest Hilding Andersson, a petty officer in the Swedish Navy, was sentenced to life imprisonment after being found guilty of "gross espionage" for the Soviet Union. Andersson admitted supplying Russians with secret data on the Swedish Navy, coastal defense installations, and suitable invasion areas along the coast of northern Sweden. He named N. P. Orlov, Konstantin Vinogradov, a Soviet Embassy secretary, and Tass correspondent Victor Anissimov as his accomplices.

September 26, 1951 (diplomatic): Nicholai P. Orlov, the assistant naval secretary of the Soviet Embassy in Stockholm, was ordered to leave Sweden immediately in connection with the Andersson espionage case.

April 6, 1951: David Greenglass admitted to giving atomic data to the Fuchs-Gold ring while working as an Army technician at Los Alamos, N. Mex., and was sentenced to 15 years imprisonment.

April 5, 1951: Morton Sobell was sentenced to 30 years in prison for giving nonatomic secrets to the Fuchs-Gold spy ring.

April 5, 1951: Julius and Ethel Rosenberg were sentenced to death for procuring and transmitting United States atom bomb secrets to Russia during and after the Second World War. They were both executed on June 19, 1953.

December 9, 1950: Harry Gold pleaded guilty to transmitting atomic secrets to the Russians and received a 30-year prison sentence.

November 22, 1950: Miriam Moskowitz was convicted (together with A. Brothman) of conspiring to mislead a grand jury and was sentenced to 2 years in prison and fined $10,000.

November 22, 1950: Abraham Brothman was convicted of conspiring to mislead a grand jury (which was investigating espionage) and of influencing Harry Gold to give false statements to the jury. He was sentenced to 7 years imprisonment and fined $15,000. In July 1951, the U.S. Circuit Court of Appeals upheld the 2-year sentence and $10,000 fine for misleading a grand jury, but reversed the 5-year sentence and $5,000 fine for influencing Gold.

September 22, 1950: Alfred D. Slack pleaded guilty to giving samples of a secret explosive to Harry Gold and was sentenced to 15 years in prison.

April 15, 1950: Air Force Corporal Gustav Mueller was convicted of attempting to give U.S. military secrets to Russia. He was sentenced to 5 years at hard labor.

March 9, 1950 (diplomatic): Valetin A. Gubitchev, a United Nations employee, was found guilty as Judith Coplon's codefendant. He was sentenced to 15 years imprisonment but the sentence was suspended on condition he leave the United States. Gubitchev sailed for Poland on March 20.

March 9, 1950: Judith Coplon, in her second trial, was found guilty of conspiracy to commit espionage and was sentenced to 15 years in prison. On December 5, 1950, the U.S. Court of Appeals reversed the conviction on the grounds of illegal arrest and use of illegal wiretap evidence. The Supreme Court refused to review the case on January 28, 1952.

March 1, 1950: Klaus Fuchs was sentenced by a British court to 14 years imprisonment after pleading guilty to giving atomic secrets to Russia.

January 25, 1950: Alger Hiss was found guilty of lying to a grand jury in 1948 when he declared that he had never given any secret State Department documents to Whittaker Chambers, who then passed them on to the Soviet Union. He was sentenced to 5 years in prison.

October 31, 1949 (diplomatic): Dr. Erwin Munk and a clerk named Horvat of the Czech Embassy in Washington were declared persona non grata.

June 30, 1949: Judith Coplon was convicted of taking Justice Department secrets and using them to aid Russia. She was sentenced to from 40 months to 10 years in prison. On January 28, 1952, the U.S. Supreme Court ruled that she was entitled to a new trial because the Government used illegal wiretap evidence. She was never retried on this charge.

May 1, 1946: Allan Nunn May, a British scientist who worked on atomic energy in Canada, was sentenced to 10 years in prison by a British court. May was part of the Soviet espionage ring in Canada which was exposed by Igor Gouzenko, a code clerk in the Soviet Embassy in Ottawa, who broke with the Russians and sought political asylum. Seventeen Soviet Embassy officials charged with espionage have been expelled from Canada. Eight Canadian citizens, including a member of Parliament, were convicted of espionage and given various jail sentences.

May 23, 1960: U.S. News & World Report described Communist espionage in West Germany as follows:

"Last year, in West Germany alone, 2,787 Communist spies were caught. * * * East Germany sent most of them * * * but 264 were from Russia, 114 from Poland, 63 from Czechoslovakia, 11 from Rumania, 8 from Hungary, and 2 from Bulgaria.

"During the first 4 months of this year, 820 more Communist agents were arrested, including 691 from East Germany, 72 from Russia. Yet only a fraction of all spies sent from the Soviet bloc to West Germany are caught.

"The current estimate is that 17,000 Communist spies are operating in West Germany. * * * Red agents also make West Berlin the kidnaping center of the world. Since the war they have tried 340 kidnapings, succeeded in 255.

"West German estimates of 17,000 active agents do not include either the 'silent group' (Polish, Czech, and Rumanian spies posing as refugees) or the 35,000 members of the outlawed West German Communist Party.

"Over the years, more than 15,000 Red agents have been arrested in West Germany. Of these, fewer than 2,000 have been convicted. Many were let off because they confessed, voluntarily, not long after they entered West Germany. Others showed they were coerced into spying by Red threats to their families."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted follow:

Mr. BENTLEY (at the request of Mr. HALLECK), for week of May 23, on account of appointment as Congressional Adviser to the Eighth Pan American Highway Conference of Bogota, Colombia.

Mr. SHEPPARD (at the request of Mr. MCCORMACK), for today, May 19, and through June 5, on account of official business in his district.

Mr. BREWSTER (at the request of Mr. GARMATZ), for Thursday, May 19, 1960, on account of illness in family.

Mr. LENNON (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. BONNER (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. KITCHIN (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. FOUNTAIN (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. SCOTT (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. ALEXANDER (at the request Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. WHITENER (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

Mr. COOLEY (at the request of Mr. HEMPHILL), for today, May 19, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legisla-

tive program and any special orders heretofore entered, was granted to:

Mr. THOMPSON of Texas, for 30 minutes, today, to revise and extend his remarks and include extraneous matter.

Mr. FLOOD, for 30 minutes, today on two subjects and to revise and extend his remarks.

Mr. GALLAGHER (at the request of Mr. MILLS), for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. THOMPSON of Texas and to include extraneous matter.

Mr. STRATTON and to include extraneous matter.

Mr. FEIGHAN.

Mr. BROOKS of Louisiana.

(At the request of Mr. ROBISON and include extraneous matter the following:)

Mr. RHODES of Arizona.

Mr. VAN ZANDT.

Mr. DOOLEY.

Mr. CURTIS of Missouri.

Mr. NORBLAD in two instances.

(At the request of Mr. EVINS and to include extraneous matter the following:)

Mr. GILBERT.

Mr. PORTER.

Mr. DIGGS in two instances.

ADJOURNMENT

Mr. HECHLER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 2 minutes p.m.), under its previous order, the House adjourned until Monday, May 23, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2167. A letter from the Assistant Secretary of Agriculture, transmitting a report for the month of April relating to the cooperative program of the United States with Mexico for the control and eradication of foot-and-mouth disease, pursuant to Public Law 8, 80th Congress; to the Committee on Agriculture.

2168. A letter from the Comptroller General of the United States, transmitting a report on review of the development and procurement of nine different series of new combat and tactical vehicles by the Department of the Army; to the Committee on Government Operations.

2169. A letter from the Chairman, Federal Communications Commission, transmitting a copy of the report on backlog of pending applications and hearing cases in the Federal Communications Commission as of March 31, 1960, pursuant to Public Law 554, 82d Congress; to the Committee on Interstate and Foreign Commerce.

2170. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to provide for the erection of Freedom Monument symbolizing the ideals of democracy, and for other purposes"; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS of Louisiana: Committee of Conference. H.R. 10809. A bill to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes (Rept. No. 1629). Ordered to be printed.

Mr. MORGAN: Committee on Foreign Affairs. Committee on Foreign Affairs. House Concurrent Resolution 225. Concurrent resolution expressing the sense of the Congress with respect to official recognition by the United States of the centennial anniversary of the unity of Italy; with amendment (Rept. No. 1630). Referred to the House Calendar.

Mr. MORGAN: Committee on Foreign Affairs. House Joint Resolution 627. Joint resolution to authorize appropriations incident to U.S. participation in the International Bureau for the Protection of Industrial Property; with an amendment (Rept. No. 1631). Referred to the Committee of the Whole House on the State of the Union.

Mr. MORGAN: Committee on Foreign Affairs. House Joint Resolution 672. Joint resolution authorizing and requesting the President to issue a proclamation with respect to the 1960 Pacific Festival, and for other purposes; without amendment (Rept. No. 1632). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS of Louisiana: Committee on Science and Astronautics. H.R. 12049. A bill to amend the National Aeronautics and Space Act of 1958, and for other purposes; without amendment (Rept. No. 1633). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AUCHINCLOSS:

H.R. 12309. A bill to strengthen the enforcement provisions of the Federal Water Pollution Control Act and extend the duration of the authorization of grants for State water pollution control programs, and for other purposes; to the Committee on Public Works.

By Mr. BROOMFIELD:

H.R. 12310. A bill to allow individuals to deduct for Federal income tax purposes not to exceed $100 each year of political contributions made to candidates for elective Federal offices; to the Committee on Ways and Means.

By Mr. COOLEY:

H.R. 12311. A bill to extend for 1 year the Sugar Act of 1948, as amended; to the Committee on Agriculture.

By Mr. DANIELS:

H.R. 12312. A bill to amend the Internal Revenue Code of 1954 to provide an additional income tax exemption for a taxpayer or spouse who is deaf; to the Committee on Ways and Means.

By Mr. KILDAY:

H.R. 12313. A bill to increase the pay of certain permanent professors at the U.S. Military Academy and the U.S. Air Force Academy; to the Committee on Armed Services.

By Mr. LAFORE:

H.R. 12314. A bill to amend the Internal Revenue Code of 1954, as amended; to the Committee on Ways and Means.

By Mr. MACK of Illinois:

H.R. 12315. A bill to amend title II of the Social Security Act to increase to $5,000 a year the amount of outside income permitted without deductions from benefits, and to provide that all types of income shall be taken into account in determining whether an individual's benefits are subject to such deductions; to the Committee on Ways and Means.

By Mr. METCALF:

H.R. 12316. A bill to authorize Federal financial assistance for school construction and teachers' salaries; to the Committee on Education and Labor.

By Mr. O'KONSKI:

H.R. 12317. A bill to permit the Secretary of the Interior to revoke in whole or in part the school and agency farm reserve on the Lac du Flambeau Reservation; to the Committee on Interior and Insular Affairs.

By Mr. PIRNIE:

H.R. 12318. A bill to permit the flying of the flag of the United States for 24 hours of each day at the grave of Francis Bellamy, the author of the pledge of allegiance to the flag; to the Committee on the Judiciary.

By Mr. PROKOP:

H.R. 12319. A bill to provide readjustment assistance to veterans who serve in the Armed Forces between January 31, 1955, and July 1, 1963; to the Committee on Veterans' Affairs.

H.R. 12320. A bill to equalize certain rates of wartime disability compensation by amending section 314 (a), (b), (c), (d), (l), and (j) of title 38, United States Code; to the Committee on Veterans' Affairs.

By Mr. RODINO:

H.R. 12321. A bill to provide for the admission of certain specified refugees; to the Committee on the Judiciary.

By Mr. WALLHAUSER:

H.R. 12322. A bill to amend the Classification Act of 1949 to authorize the establishment of hazardous duty pay in certain cases; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BALDWIN:

H.R. 12323. A bill for the relief of Yoshinori Yamai; to the Committee on the Judiciary.

By Mr. MILLER of New York:

H.R. 12324. A bill for the relief of Marguerite Lefebvre Broughton; to the Committee on the Judiciary.

By Mr. SHELLEY:

H.R. 12325. A bill for the relief of Rosalinda Tacdol; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

468. By Mr. BARR: Petition of members of Teamsters Local Union No. 135 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen & Helpers of America for a hearing on the right to elect its officers; to the Committee on Education and Labor.

469. By the SPEAKER: Petition of the city clerk, Lynn, Mass., relative to enacting legislation granting to veterans of World War I pensions comparable to grants to veterans of American wars prior to World War I; to the Committee on Veterans' Affairs.

EXTENSIONS OF REMARKS

Descendants of Israel Surmount Overwhelming Odds

EXTENSION OF REMARKS
OF
HON. CHARLES C. DIGGS, JR.
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. DIGGS. Mr. Speaker, the 12th anniversary of the rebirth of Israel, May 2, recalls a saga of a suffering people as potent, fraught with drama as a movie spectacular, and as intensely histrionic as the journey of Moses and his followers to the Promised Land.

Fiction writers would not dare the literary license of depicting the trials and tribulations of the wandering tribes of Israel. It is unbelievable to conceive the perpetuity of the dream of independence for Israel as it has coursed through generations of exiles without loss of one spark of its original fire.

Descendants of Israel, surmounting overwhelming odds in pursuit of their dream of a homeland, have worked to build Jewish pride and world respect, and clung tenaciously to the idea of rebuilding a Jewish commonwealth in the face of international manifestations of anti-Semitism and Nazi cruelty. For 2,000 years the vision of a new Zion has spurred a decimated people, tottering under the yoke of bloodthirsty attacks, yet faithful to the vow that "their hands would lose their cunning and their tongues cleave to the roofs of their mouths" if they forgot Jerusalem.

In the pilgrimage to Israel exiles came from 4 continents and 70 countries—singly, in single family groups, and in patriarchal clans; from behind the Iron Curtain; from behind store counters in the United States and Canada; from the remote Atlas Mountains and the bazaars of Casablanca; from the foggy grotesquerie of England and the parched deserts of the east. They came to pool their skills, their knowledge, and their finances, to be the forerunners in the creation of a great country, culled out of barren, acrid land; the earth to be tilled and cajoled into verdancy with loving hands and willing, if not strong, backs.

Exiles seeking the promise of this new frontier taxed the sparse resources to the bursting point.

Prime Minister Ben-Gurion, on the 10th anniversary of the rebirth of Israel, commended the jews of the world for embodying the sole ally of infant Israel, "when the United Nations and all the nations of the world failed to come to Israel's aid." They sent money, and arms, and fighters, from 60 different countries to suckle and nurture the nestling state.

Israel has met in 12 years every threat to national security and integrity—communism, economic struggle, domestic strife, and the necessity for living within its narrow borders and absorbing all who wanted to come to Israel.

The people of Israel and the Jews of the world have the right to flex their muscles with pride of accomplishment and tenacity of purpose.

It is our hope that Israel in its struggle will serve as a criterion for African nations, now straining at the leash of colonialism and near to breaking the yoke of servitude.

In a century when man has mastered his physical hospice, and his struggle is pointed toward the human barriers of prejudice, hatred and poverty, ignorance and intolerance, Israel represents a touchstone to the United States from which it may renew its standard of justice, liberty, and the pursuit of happiness for all its citizens.

Annual Poll

EXTENSION OF REMARKS
OF
HON. WALTER NORBLAD
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. NORBLAD. Mr. Speaker, under leave to extend my remarks I include herewith the results of my annual poll of my constituents.

The answers to questions 5—farm supports—and 11—Federal aid to teachers salaries—were broken down and tabulated as to those giving their occupation as farmers in the first instance and teachers in the second instance.

[In percent]

	Yes	No	Undecided
1. Should labor unions be brought under antitrust laws?	87	9	4
2. In an effort to combat juvenile delinquency, should the Federal Government at taxpayers' expense establish a Youth Conservation Corps for boys 16 to 21 to work on reforestation and other conservation projects on publicly owned lands?	60	35	5
3. Do you favor diplomatic recognition of Communist China?	20	69	11
4. At present, persons drawing social security benefits are penalized if they earn more than $1,200 a year. Do you believe they should be permitted to earn a greater amount without penalty?	76	18	6
5. Do you favor continuing agriculture price supports?	20	74	6
Those giving their occupations as farmers on this voted as follows	31	65	4
6. Do you believe the Federal Government should have more authority to regulate radio and TV programs?	38	56	6
7. In some areas in the South, certain people because of their race are reportedly not permitted to register to vote. Where this happens should the Federal Government provide Federal registrars on a temporary basis?	70	21	9
8. Do you favor legislation to provide Federal aid for school construction?	41	50	9
9. Should we make an all-out effort to surpass Russia in the exploration of outer space, regardless of cost?	26	69	5
10. Sould Congress increase postal rates to help meet postal deficits?	50	47	3
11. Would you favor Federal aid to raise teachers salaries?	21	74	5
Those giving their occupation as teachers on this voted as follows	23	74	3
12. Do you favor the proposed summit conference between the free world and the Soviets?	84	10	6
13. Would you favor giving the Federal Government greater power to abritrate and enforce agreements between labor and management when disputes such as in the recent steel strike affect a major sector of the national economy and/or national defense?	83	14	3
14. Do you believe merging our Army, Navy, and Air Force into a single military service would increase efficiency, reduce waste and duplication of effort and materiel, and remove interservice rivalry?	77	18	5

Preliminary Tabulation of Replies From Questionnaire in the 32d Congressional District of New York

EXTENSION OF REMARKS
OF
HON. SAMUEL S. STRATTON
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. STRATTON. Mr. Speaker, last month I sent out to some 55,000 residents of my congressional district, embracing five upstate counties in New York State, a questionnaire dealing with some of the major items of legislation pending before this 2d session of the 86th Congress. These questionnaires were sent out on a purely random basis to telephone subscribers within these five counties. By way of background in interpreting the results I might add that these five counties are traditionally recognized as a conservative area. Republican Party enrollment outnumbers Democratic enrollment by 3 to 1. President Eisenhower carried the district over Governor Stevenson in 1956 by 119,000 to 44,000; Governor Rockefeller carried the district in 1958 by 37,000. As Members are aware, I am the first member of my party to have the honor to serve this district in the House of Representatives in 42 years.

I mention these facts only by way of background for a tabulation of the answers I have received. Out of 55,000 questionnaires mailed out we have received 9,337 replies, or a return of 17 percent, which, I am told, is an amazingly high percentage. In addition I have also had the privilege of receiving a great number of letters and communications expanding on the yes-or-no replies provided by the tabulated questionnaire itself.

While a Congressman must, of course, make up his mind on legislation on the basis of many factors, certainly the desires and wishes of his constituents, expressed in many ways, particularly through the means of a questionnaire like this, should be a most important factor in his final decision.

I want to express to all of the people of my district who took the trouble to answer our questionnaire and particularly to those who went to the added trouble of sending me their amplified comments, my sincere appreciation for all the great help which they have given to me in my effort to be an effective and responsive representative of their wishes and interests in this body. I am hopeful that those who have written to me will forgive me, incidentally, for the delay that has been encountered in replying to their letters. So many individual letters have been received with these questionnaires that it has been physically impossible for my office staff to answer all of them as yet and still keep up with our other work. However, we do anticipate answering all of them soon, and in the meantime all are being read and pondered carefully.

In general, the replies we have received seem to indicate that our district overwhelmingly supports restrictions on foreign imports, Federal assistance for unemployment areas, elimination of the telephone tax, civil rights, the Forand approach to health insurance for retired citizens, a youth conservation corps, and a balanced budget. Aid to education and an increase in the minimum wage are also supported, though by less substantial majorities. Legislation to promote milk consumption loses by a small edge. The soil bank and a ban on nuclear weapons testing which does not include effective inspection and control procedures are opposed by substantial majorities.

The detailed results are summarized below:

[In percent]

Question	Yes	No	No opinion
1. Do you favor legislation to protect American job opportunities by increased restrictions on foreign imports?	74.6	19.3	6.1
2. Would you oppose President Eisenhower's proposal for a major increase in the soil bank program?	52.3	25.1	22.6
3. Would you favor Federal legislation to promote the consumption of fluid milk?	40.3	40.6	19.1
4. Do you favor some measure of Federal assistance to help local communities hard hit by unemployment in attracting new industry?	76.2	18.1	5.7
5. Do you favor continuing the Federal telephone tax beyond June 30, 1960, the date on which it is now scheduled by law to expire?	16.3	76.0	7.7
6. Do you favor some Federal tax concessions for industries which move into areas of serious unemployment or expand in such areas?	66.1	25.0	8.9
7. Do you favor strengthening civil rights legislation to insure the right to vote regardless of race, creed, or color?	88.6	5.7	5.7
8. Would you oppose legislation to improve our educational program by extending Federal grants to States to help build new schools or classrooms?	36.4	55.3	8.3
9. Do you favor an increase in the present $1 Federal minimum wage?	57.3	36.5	6.2
10. Do you favor expanding the Federal social security program to include some form of health insurance for retired persons?	72.4	19.8	7.8
11. Would you approve a ban on nuclear weapons tests before agreement is reached on effective inspection and control procedures?	22.2	67.8	10.0
12. Do you favor promoting conservation and combating juvenile delinquency by establishing a voluntary Youth Conservation Corps?	74.7	14.6	10.7
13. Do you support a balanced budget?	80.9	6.6	12.5

14. Which of the following do you now favor for President in 1960:

	Percent
Nixon	39.9
Kennedy	35.4
Stevenson	9.7
Rockefeller	5.0
Humphrey	4.0
Symington	3.3
Johnson	1.7
Stratton	[1] 1.2

[1] Write-in.

Rumanian Independence Day

EXTENSION OF REMARKS
OF

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 19, 1960

Mr. FEIGHAN. Mr. Speaker, under leave previously obtained, I insert in the RECORD an address I delivered at the Rumanian Independence Day rally in Cleveland, Sunday, May 15, under the auspices of the Carpatina Society and the American Legion, on "Rumanian Independence Day":

May 10 is a day of great importance to Rumanian people everywhere in the world because it is Rumanian Independence Day.

In these days it has special significance because the people of Rumania have been robbed of their national independence by the Russian imperialists.

It was 15 years last March 6 that the Russians destroyed the free government of that old and honored nation and imposed upon the Rumanian people a form of government which is completely alien to their rich culture, traditions, and love for human freedom.

In the darkness of those 15 years, the people of Rumania have never lost faith in the destiny of their nation.

They remain convinced that justice will triumph throughout the world—that the cause of free men will prevail in the affairs of nations and that Rumania will rise once again in all the splendor and beauty of her ancient civilization.

It is this dedication, this unwavering conviction, which holds the people of Rumania in an unbreakable alliance with the people of the United States and all other free countries.

The people of Rumania will be prohibited from celebrating this memorable day by the alien government which has been imposed upon them by the masters of the new imperialism in Moscow.

No public observance of this day will be allowed because the Russians are dedicated to destroying all hope for a return of national independence and because such public manifestations carry the possibility of getting out of hand so far as the occupiers are concerned.

However, the Rumanian people will find ways to observe this historic day, despite the efforts to prevent them from doing so.

What rests firmly in the hearts of men cannot be wiped out by the order of a dictator.

Rumanians in the free world will properly celebrate this day.

I am happy and proud that in my district one of the most significant of these celebrations is taking place today.

Free Rumanians will carry high the hopes of the captive people of Rumania.

They will, as in the past, remind all those who love freedom that these past 15 years of darkness have strengthened the determination of the Rumanian people to regain their national independence.

In this they will be performing a service for their adopted country, the United States, because the cause of peace with justice requires the dedication of all our citizens.

Tomorrow the second summit conference will open in Paris.

There a contest will take place between men who represent the cause of human freedom and those who lead the cause of slavery for all mankind.

This will be a test of justice as the foundation for a lasting peace, that is, justice for all nations and all people.

The one paramount issue, the issue which rises above all others at the Paris conference, is that of political status quo.

The spotlight of public attention has been focused upon such issues as disarmament, a ban on nuclear weapons, the future status of Berlin and a free and united Germany.

Important as these issues are, they avoid the critical question of human rights, the rights of nations and the unnatural division of humanity by the Russian Communists.

It is clear beyond any reasonable doubt that the Russians are going to Paris with but one objective in mind.

That objective is to force the free world leaders to accept a political status quo, that is, to put a stamp of finality upon their empire of captive nations.

Nor can there be any doubt that the Russian leaders desperately need this recognition.

A serious internal crisis grips the vast empire of the Russian Communists.

It is not an economic crisis, even though there is a critical shortage of food and consumer goods throughout the empire.

It is not a crisis at the top, resulting from the constant struggle for total power which is the common characteristic of the regime.

It is a political crisis brought on by the failure of the Communist regime to win the confidence and support of the people and the corresponding demand by the non-Russian peoples of the empire for a complete change in the order of things.

The old order of Russian imperial communism is bankrupt.

It is centuries behind the needs and aspirations of the common man.

Its failures are well known to those who are its captives.

The need for drastic change to avoid total collapse is evident to all who are confined behind the Iron Curtain, including Khrushchev and his crowd.

It is beyond the ability of Russian imperial communism to grant the changes necessary to avoid the great human explosion which is in the making.

If the Communist leaders grant the changes demanded by the realities of life they will open the floodgates to their own destruction.

They cannot possibly accommodate their system to the changes needed to preserve the empire.

The leaders in Moscow recognize these hard facts of life and are accordingly going to use the Paris conference as a temporary remedy for their internal crisis.

They seek to cause the nations of the free world to associate with them in efforts to preserve the empire.

The Russians insist that the captive peoples must be made to realize that there is a finality to their unhappy state of life, that there is no hope for their future, that they must make their peace with communism and adjust to the imposed peace of Moscow.

The Russian leaders also need a legal license to employ whatever methods become necessary to hold the empire together.

They feel they must neutralize the conscience of the West so that there can be no public protest or legal proceedings in the United Nations against such future actions as they may find necessary, including genocide and the other crimes against humanity.

This is the insurance policy they want the leaders of the free world to underwrite at Paris.

So, to secure these objectives, the Russians propose a status quo and Khrushchev has announced that this will be his goal at the Paris meeting.

Now the question is: How will the leaders of the free world meet this challenge?

Up to this moment there is no evidence available to the public which would indicate what we might do or not do to prevent a Russian victory on this critical issue.

However, it is clear to all that if President Eisenhower fails to raise in principle the right of all nations to self-determination, to self-government, in the context of the Captive Nations Week resolution as defined in Public Law 86-90, the Russians will win their point by default.

Khrushchev has made it clear in public statements that he considers the basic question of the Paris meeting to be status quo.

By so doing he has established the issue as pertinent to all the discussions which will take place.

If our leaders fail to raise the issue and state our position on it, silence will be taken as assent to the demands made by Khrushchev.

This is a fundamental law of international diplomacy.

It is entirely possible that the Russians can leave the Paris meeting with sound precedent to believe that the United States has accepted a status quo.

Nor is it necessary for the three Western Powers to have unanimity on this issue in order for our President to speak out. Rumors are rampant in Europe that the British are actively pushing for a status quo, even to the point of a permanently divided Germany.

It is unlikely that France could make herself party to such a deal.

In any case, it is imperative that the United States make its position clear on this issue regardless what Great Britain and France elect do do about it.

The future of Rumania and all the other captive non-Russian nations hangs in the balance at the Paris summit.

While Rumania as a nation will not be an agenda item, the future of Rumania is involved in the issue of status quo which has been created by Khrushchev.

Nor is status quo likely to become an agenda item, but it will hang over all the proceedings and discussions at Paris. It is the unavoidable issue.

It is, in fact, the reason why Khrushchev forced the leaders of the free world into a second summit meeting.

These are fitting thoughts for this Rumanian Independence Day commemoration.

Those of us who have fought for the rights of the Rumanian nation, for justice for all the nations of the world, do not give lipservice to this cause. More than words are needed.

Political action must be given to this cause.

I, therefore, have urged President Eisenhower to seize the initiative at Paris, to flush out into the open the issue of status quo, to disclaim any degree of acceptance of status quo for the American people, and to rekindle the hopes of suffering millions behind the Iron Curtain by a firm advocacy of the rights of all nations to self-government, to freedom, and to national independence.

Let us pray that President Eisenhower will lead all free nations of the world in a successful fight for the right of self-determination for all nations and people. Such positive, affirmative, political action will enable the great nation of Rumania to determine its own destiny and to take its proper place among the free nations of the world.

A Compromise Area Redevelopment Bill

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 19, 1960

Mr. VAN ZANDT. Mr. Speaker, on Wednesday, May 18, there was introduced in both Houses of Congress a compromise area redevelopment bill in an effort to meet the objections contained in President Eisenhower's veto message regarding S. 722.

In the Senate S. 3568 was introduced by Senator HUGH SCOTT, of Pennsylvania while in the House companion measures were introduced by my colleagues, the gentleman from Pennsylvania, Representative IVOR D. FENTON, who introduced H.R. 12291, the gentleman from Pennsylvania, Representative JOHN SAYLOR, who introduced H.R. 12298, and the number of my own bill is H.R. 12290. All of these bills have been referred to the committees having jurisdiction over this type of legislation and it is hoped that immediate action will be accorded them.

Following is a comparison of House area redevelopment bills including S. 722 vetoed by the President together with H.R. 4878 which I offered as a compromise measure at the first session of this Congress and H.R. 12290, 12291, and 12298 introduced yesterday as the revised version of H.R. 4878 and designed to meet the objections on which the President's veto of S. 722 was based.

Comparison of area redevelopment bills

Subject	S. 722 as passed and vetoed	H.R. 4878, original form	H.R. 12290, H.R. 12291, and H.R. 12298
1. Organization	Separate Area Redevelopment Administration.	Department of Commerce	Department of Commerce.
2. Division of redevelopment areas	Administrator to designate industrial and rural areas.	Only industrial and public facility loans in areas of persistent and substantial unemployment.	Same; removed reference to rural. Note technical assistance can cover.
3. Revolving fund loans	75		
Industrial	$100,000,000	$100,000,000	$75,000,000.
Rural	$75,000,000	None	None.
Public facilities	$50,000,000	$25,000,000	$25,000,000; reference to machinery removed.
4. Federal participation in loans	65 percent	33⅓ percent class I areas, 50 percent class II areas, and 75 percent class III areas.	35 percent; area classifications removed.
5. Maximum loan period	40 years; 10 percent State contribution.	25 years; not less than 15 percent State contribution.	Same.
6. Grants for public facilities	$35,000,000	$25,000,000; Federal participation 33⅓ percent class II areas, 75 percent class III areas.	None.
7. Retraining subsistence payments	$10,000,000	$5,000,000	$5,000,000.
8. Vocational training grants	$1,500,000	Secretary of Labor to determine needs; Secretary of Health, Education, and Welfare to provide through existing facilities.	Same.
9. Technical assistance	$4,500,000	$3,000,000	$3,000,000.
10. Criteria of unemployment	At least 6 percent at time of application and 12 percent for 12 months preceding, or 9 percent for 15 of 18 months preceding, or 6 percent for 18 of 24 months preceding.	An average of 6 percent, excluding seasonal, throughout qualifying period, and 50 percent above national average for 4 out of 5 years preceding in class I areas, or 75 percent above national average for 3 out of 4 years preceding in class II areas, or 100 percent above national average for 2 out of 3 years preceding in class III areas.	Same; area classifications removed.
11. Interest on loans	Maximum permitted, 2 to 7 percent	To be determined by Secretary based on going rates.	Same.
12. Cost	$251,000,000	$158,000,000	$108,000,000.

Polish Constitution Day Marks Thousand Years of Travail

EXTENSION OF REMARKS
OF
HON. CHARLES C. DIGGS, JR.
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. DIGGS. Mr. Speaker, the commemoration of Poland's Constitution Day, May 3, 1960, proffers an opportunity for introspective thinking as well as a chance to join other Members of Congress in giving accolades to the valiant, patiently courageous people of what might now well be called re-Stalinized Poland.

Some of us, who in dark moments of frustration decry the absence of light shining upon our own personal freedoms, civil rights and liberties, can then look to the bloody history of Poland for hope; and to its heroes for faith.

We can take heart in the dying words of the great Polish patriot, Ignace Jan Paderewski, whose 100th anniversary of birth coincides with Poland's millennium, in 1966. His words, as life slipped away were: "Polska powstanie." Acclaimed by the American public as the "King of pianists," Paderewski's greatest happiness came in contributing his time, his talents, and his resources, to the needy of his own and other lands. He will take his place in history with all the heroic sons of Poland. Significant then were his dying words, translated: "Poland will rise again."

These words give solace to the people of Poland, though now compelled to endure Soviet oppression and to live in the vacuum of Eastern tyranny and the insecurity and uncertainty of moral and economic aid from the West. The situation in Poland today remains fluid only because of the vigorous anti-Communist resistance by intrepid Poles.

In keeping with a tradition of the past 20 years, the U.S. Congress has solemnized Poland's May 3 Constitution of 1791 with a twofold purpose: First, to remind the Polish people that Americans have not forgotten their pledge to help Poland restore her freedom and independence and to facilitate her return to the Western family of nations; second, to review and place in proper perspective Poland's contribution in the development of Western civilization and culture.

The 1960 convocation of Poland's Constitution is of special importance to the Polish people in my home State, Michigan, as well as to the 7 million Americans of Polish ancestry and those still fighting communism in the homeland.

Bearing as it does an analogy to our own celebration of July 4, the date of May 3, means more than a calendar date to the people of Poland and others of the free world—it draws foci to the indomitable spirit of the people of Poland; underscores the travail of a near-thousand years of glorious, though sometimes bloody history; namely, the valorous but sanguine insurrections of 1830 and 1848, as well as the millennium of the founding of Christianity by the Polish State.

The Polish May Constitution convocation might well serve as a rededicatory process for these compatriots who through no fault of their own have been forced to endure Communist enslavement. It might also remind those of us in America, of the consequence of rededicating our own lives to the kind of freedoms engendered by the signing of that famous companion document—the American Constitution.

The Polish Constitution was patterned after our own American Constitution and its creators were motivated by the same principles that fired the fighters for the independence of the United States. Now in 1960, the people of Poland have placed their entire hope and sympathy with the United States again.

The Poles were magnificent in defending Christendom against the onslaught of the barbarian East; in creating the first Commonwealth of Nations in Europe; in contributing to American freedom through the services of Pulaski and Kosciuszko, and other Polish immigrants.

To these dauntless people whose history has been stalked by tragedy due largely to geographic position, predatory and aggressive neighbors, we add our hope and our prayerful wish for full freedom in our time.

Medical Care for the Aged

EXTENSION OF REMARKS
OF
HON. THOMAS B. CURTIS
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. CURTIS of Missouri. Mr. Speaker, I ran across an article appearing in the newspaper Labor, dated May 14, 1960, headlined "Says United States Lags in Medical Care." This article purports to quote our colleague Congressman Moss as follows:

> The United States is the only large industrialized country in the world where the Government does not, in some form or other, provide medical care for most of its citizens.
>
> All European countries, with the exception of Finland, operate some type of government health and maternity program, and most of the 59 countries of the globe which have such programs provide medical care benefits under some sort of a social insurance program.

I think this article lets the cat out of the bag, just as similar statements made by other proponents of the Forand bill call attention to what these people really have in their bag of wonders.

Our society has the finest health program, and this includes health care for the aged, of any society in history. These other systems have the Government in some form or other provide medical care for most of its citizens. This results in a system of inferior health care for the citizens, as a study of the health programs of these other industrialized societies reveals.

Should that not suggest to these other societies that socialism is the wrong way to achieve success in this area, even if it does not convince some of our own political theorists?

I must add a further statement to try to forestall what the Forand bill proponents usually fall back on to answer their critics. Their critics, they say, are standpatters and want no progress. This is false. Any program, no matter how good it may be, can be improved. There is plenty of room for improvement in the health program our society has, even though it is the best program ever set up. However, to improve it and not damage it, we must first understand what it is. The Forand bill supporters imply that there is no program even though the Federal Government today is spending over $12 billion a year on care for the aged. Let us first lay the facts of our present program for health care out on the table, then debate the issue of how we can improve it. Is this such an illogical suggestion?

The article follows:

SAYS UNITED STATES LAGS IN MEDICAL CARE

"The United States is the only large industrialized country in the world where the Government does not, in some form or other, provide medical care for most of its citizens," Congressman JOHN E. MOSS, Democrat, of California, noted last week.

"All European countries, with the exception of Finland, operate some type of government health and maternity program," he said. "And most of the 59 countries of the globe which have such programs provide medical care benefits under some sort of a social insurance program."

Moss predicted that Congress this year will also enact medical insurance legislation for those over 65 years of age.

Export Markets

EXTENSION OF REMARKS
OF
HON. CLARK W. THOMPSON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. THOMPSON of Texas. Mr. Speaker, one of the principal objectives of the Agricultural Trade and Development Act, Public Law 480, was the creation and building of export markets for American agricultural commodities. From time to time I have been informed that an effective job was being done. Recently the administration announced an export promotion campaign and called on industry and agriculture for their complete cooperation. This, too, seemed like a good idea.

However, one of our Texas rice mills has anticipated the administration's program by at least 4 years. They produce and market a high-quality parboiled rice, which is not generally available in foreign markets. In one country, Greece—truly one of our real friends among nations—they had developed a business of

approximately 2,000 tons annually, or less than 5 percent of the Greek domestic production. In so doing they expended approximately $100,000 in advertising and promotion. Their sales do not interfere with sales of Greek rice, having been largely to hotels, tourist resorts, and the carriage trade. Greece does not produce a parboiled rice and their rice is hardly of comparable quality. Price-wise, U.S. rice in Greece sells far better than 50 percent more than Greek rice.

Last November all imports of rice were embargoed by the Greek Government. After a protest by our State Department, a clarifying regulation was promised. Late in February one was issued permitting imports on license where the importer could show he had exported twice the quantity of Greek rice for currency acceptable to the Greek Government. This tied things up tighter than ever.

Among such good friends as the Greeks and ourselves, such a situation will undoubtedly be straightened out without undue delay. The tonnage and exchange is small, but the impact can be great. I trust that the State Department, through the exercise of a high order of sound, practical diplomacy, will resolve the differences of opinion in ample time so that it will not sound a sour note just as the administration's export promotion program is about to get under way.

The Nightly Radio Program: "Today in Congress"

EXTENSION OF REMARKS
OF
HON. WALTER NORBLAD
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. NORBLAD. Mr. Speaker, I would like to compliment the nightly radio program "Today in Congress" for devoting the entire time segment last Friday night to the complete and unedited remarks made by President Eisenhower upon his arrival from Portugal.

This has always been a valuable and unique program; the only one aired which is devoted exclusively to the happenings here on Capitol Hill.

Its sponsors, the Independent Airlines Association, and its editor, Joseph McCaffrey, combine to give the listening public a "Congressional Record of the Air." This program not only has a great listening audience among Members of the House and Senate, but also among staff members on the Hill and administrators and key personnel in the executive branch.

Last Friday night, the entire format of the program was revamped so that Mr. Eisenhower's own personal report on the summit could be given wider coverage.

This, I think, is a tribute to the feeling of public responsibility of the association and of Mr. McCaffrey.

Assistance for Our Youth

EXTENSION OF REMARKS
OF
HON. JACOB H. GILBERT
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. GILBERT. Mr. Speaker, it is gratifying that the Committee on Education and Labor has reported favorably a bill to provide for Federal grants and contracts to carry out projects with respect to techniques and practices for the prevention, diminution, and control of juvenile delinquency, and for the training of personnel. The bill reported is similar to one I introduced.

Juvenile delinquency has reached terrifying proportions throughout our Nation. All communities are beset by the problem—urban and rural, in the higher social and economic levels as well as the lower. Our youth are the future of our Nation; they are our hope in the years ahead; on them will fall the burden of the preservation of our democracy. It is incumbent upon the Federal Government to recognize its duty and obligation to our young people; investments of necessary funds and time and effort must be made now in assistance to our youth; there is a crying need for more research on causes and prevention of delinquency.

It was recently charged that we, as a Nation, have more information about pigs than we do about children. This is a startling accusation, but true, in my opinion. We recently heard the heartbreaking prophecy that between 4 and 5 million children will be referred to juvenile courts within the next decade. It is not enough to ask "Why?" and "Who is to blame for failing in its duty—the home, school, or community?" The problem must be attacked with vigor and vision; our children must have help.

The Federal Government should take positive steps to increase the ability to prevent delinquency and rehabilitate offenders. This requires support for research, field and pilot studies, and demonstration projects. The present acute shortage of adequately trained personnel to cope with delinquency must be relieved. The basic aim in combating juvenile delinquency must be to foster in the young a respect for the law—for its reasonableness and fairness and for the values of the community. This means that the community itself must set a good example and uphold those values which it expects its youth to respect, in an effort to prevent lawlessness among our youth. It is as important to try to understand our young people—their aims, beliefs, dreams, fears—and to help them in their struggle for security and happiness, as it is to try to rehabilitate them after crimes have been committed and their names have been besmirched and their futures blackened by the pall of misdeeds.

Because the assistance to our youth, as provided in the bill which has been reported, is so vitally necessary, and because time is of the essence in dealing with the increasing problems of juvenile delinquency, I urge that the bill be brought before the House for action, without delay. It is incumbent upon the 86th Congress to pass this proposed legislation before the close of the session.

National Science Foundation: 10th Anniversary

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. BROOKS of Louisiana. Mr. Speaker, 10 years ago, the Congress took cognizance of the increasing importance of science and technology to the national interest and established the National Science Foundation as the successor to the emergency World War II Office of Scientific Research and Development. Seldom has there been a more important action taken by the Congress. In the intervening years, advances in science and technology have run the whole gamut of our national lives and throughout all this time, the National Science Foundation has played a fundamental role in our scientific effort. As the importance of the work increases year by year, the Foundation, in my opinion, merits the full cooperation of the Congress to the extent that when necessary, encouragement should be given by increases in needed funds.

The Foundation is meeting the challenge of the scientific and technologic revolution through which we are passing by supporting programs designed to stimulate improved scientific training and by encouraging young men and women to choose careers in science. It supports basic scientific research without which our country would soon reach an impasse in new scientific discoveries. The scholarship and fellowship grants each year to high school and college students promote interest in an area vital to our national security. Equally important are the institutes the Foundation sponsors for the training of teachers in science and mathematics. Under its jurisdiction, also, are made research grants in all the fields of science with which the Foundation deals—biology, medicine, physics, mathematics, and engineering, as well as the social sciences. Abroad, National Science Foundation activities are directed toward general purpose basic research and the support of those programs which strengthen the scientific effort of the United States.

Much of the credit for the magnificent work the Foundation is doing must go to Dr. Alan T. Waterman who has been its director since its establishment. Those who have followed the hearings of the Committee on Science and Astronautics have heard witnesses testify many times in praise of the competence, the vision and the high level of leadership displayed by Dr. Waterman and his staff.

In this age of space, we have become acutely aware of how important to our very existence are the developments in the field of science. To the National Science Foundation—one of the most important Federal agencies to contribute to our progress in this field—on its 10th birthday, I want to add my congratulations for a job well done and to voice my confidence that the accomplishments of the next 10 years will be equally praiseworthy.

A Waste of White House Time and Money

EXTENSION OF REMARKS
OF
HON. CHARLES O. PORTER
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. PORTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following exchange of correspondence between Mr. Bryce N. Harlow, Deputy Assistant to the President, and me. It speaks for itself:

MAY 17, 1960.

The Honorable CHARLES O. PORTER,
House of Representatives,
Washington, D.C.

DEAR MR. PORTER: On Saturday last, as he completed preparations for the summit conference in Paris, President Eisenhower requested me to send to you, in his behalf, this note of gratification and appreciation for your support of the mutual security authorization bill. He stressed once again his profound conviction that this program is indispensable to our own and free world defense against Communist imperialism, and indispensable also in encouraging struggling millions in less fortunate nations in their effort to live their lives in freedom. It is a program requiring, he said, unreserved support by all of our informed citizens and officials, and he feels it would be the height of folly to allow isolated administrative shortcomings and disappointments, or local considerations, political or otherwise, to tempt anyone to jettison or cripple the entire undertaking.

Especially the President voiced this hope, and asked that it be communicated to you in his behalf, that your responsible act of support for the mutual security authorization be matched by a determined resistance to any effort to effect massive reductions in the mutual security appropriations soon to be considered by the House. Massive reductions, he pointed out, can be accomplished only by undermining our own security, free world security, and the cause of human freedom everywhere in the world.

The President asked me to explain that he would have advised you himself of these views had his time permitted before leaving for Paris.

With best wishes.

Sincerely,

BRYCE N. HARLOW,
Deputy Assistant to the President.

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 19, 1960.

Mr. BRYCE N. HARLOW,
Deputy Assistant to the President,
The White House.

DEAR MR. HARLOW: I have just received your letter telling me that the President told you to tell me that he approved of my approval of the mutual security authorization bill. I note you say that the President himself would have advised me but that he was busy preparing for the summit conference.

In all frankness, however, I do believe that the White House automatic typewriters, clerical staff, and your own services could be more usefully employed than in getting out these letters to me and my colleagues. Such transparent and artificial devices as your form letter are a waste of time and money.

Of course I am pleased to know that the President is seeking to lend his support to the mutual security program, but I do believe there are better ways.

Sincerely,

CHARLES O. PORTER,
Member of Congress.

Arthur E. Wullschleger Honored

EXTENSION OF REMARKS
OF
HON. EDWIN B. DOOLEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. DOOLEY. Mr. Speaker, Arthur E. Wullschleger, of the town of Mamaroneck, N.Y., one of the bright residential areas of my fine constituency, came to Washington on May 17 to be honored with a special ceremony at the Smithsonian Institution at which he presented to that world famous depository of historical treasures a priceless Jacquard loom.

The loom, invented in the year 1801 by the man whose name it bears, is one of the most ingenious devices ever fashioned by the mind of man in the field of weaving. Thousands of cards, very similar to the IBM cards used today in machines all over the world, constitute an integral part of the loom and through the use of the punch-hole technique guide the design on the frame.

In presenting this century-and-a-half-old treasure to the museum—Mr. Wullschleger had it restored to working condition at great expense—Mr. Wullschleger was merely doing what he has done often before, namely, giving to his fellow citizens some of the benefits of his wealth and knowledge.

As a citizen of Mamaroneck, Mr. Wullschleger is regarded as one of the most amiable of men and one of the most helpful and considerate people in the community. He has traversed the world many times, his trips to Europe alone totaling more than 100 voyages, but his interests lie with the men and women of his community. He has served as chairman of the zoning board of the town of Mamaroneck and in that capacity has rendered outstanding service.

At the ceremony at the Smithsonian Institution Mr. Wullschleger was presented to the audience by his son-in-law, Arthur "Red" Motley, the distinguished president of the U.S. Chamber of Commerce, well-known publisher and famous after-dinner speaker.

Mr. Motley and Mr. Leonard Carmichael, the master of ceremonies, who is the Secretary of the Smithsonian Institution, pointed out to those present that Mr. Wullschleger had come to this country as a young man to seek his fortune. He not only attained his monetary objective but in the process became one of the world's outstanding authorities on colors and fabrics. His impact on his field of operation has been extraordinary.

As his Representative I took pleasure in welcoming him to Washington and showing him every courtesy.

Results of Survey Concerning Some Important Issues Facing Congress

EXTENSION OF REMARKS
OF
HON. JOHN J. RHODES
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 19, 1960

Mr. RHODES of Arizona. Mr. Speaker, recently I sent a questionnaire on some important issues facing Congress and the Nation to 22,000 of my constituents. Of the number sent, 17 percent were returned. Under permission previously granted I am placing in the RECORD the results of that questionnaire, together with some additional information about the age groups and occupations of those who answered:

Age groups: Under 25, 1.3 percent; 25 to 30, 4.6 percent; 31 to 40, 18.2 percent; 41 to 50, 20.8 percent; 51 to 60, 19.8 percent; over 60, 25.8 percent; no answer, 9.5 percent.

Occupations: Retired, 15.8 percent; farmers, 3.3 percent; laborers, 6.5 percent; housewives, 8.8 percent; professional, 21.8 percent; businessmen, 22.5 percent; government employees, 11.5 percent; students, 1.0 percent; armed services, 0.6 percent; no answer, 6.4 percent.

DEFENSE

1. Should we, in 1960 and 1961, gear our defense effort to a dollar amount we can afford within a balanced budget? Yes, 78 percent; no, 15 percent.

2. Should we concentrate our defense effort on:

(a) Deterrent capabilities (mainly missiles)?—14 percent.

(b) Conventional weapons, aimed at fighting limited wars?—3 percent.

(c) A combination of both?—78 percent.

3. Do you feel:

(a) Terribly worried over allegations that we are behind the Russians in certain types of missiles?—13 percent.

(b) Confident that our overall deterrent capability will, for the foreseeable future, prevent a Russian attack?—81 percent.

FOREIGN AFFAIRS

1. In our attitude toward Communist nations, are we:

(a) Too soft?—76 percent.

(b) Too hard?—1 percent.

(c) About right?—20 percent.

2. Do you feel that:

(a) We should increase our pressure on international communism, even at the risk of all-out war?—60 percent.

(b) We should keep deterrent capabilities militarily, and coexist with communism, hoping Communists will eventually see that our system is better than theirs?—28 percent.

(c) We should do something else?—21 percent.

3. Foreign aid will cost the American taxpayer about $3.2 billion this year. Below are listed the principal expenditures.

Do you favor continuing:

(a) Military aid ($1.3 billion this year) to the armed forces of our allies?—40 percent.

(b) Defense support ($695 million this year) to bolster the economies of many of our allies?—27 percent.

(c) Special assistance ($245 million this year) to bolster the economies of so-called neutralist or undetermined countries?—15 percent.

(d) Technical cooperation ($181.2 million this year) supplying instruction and know-how to underdeveloped nations?—54 percent.

(e) Development loans in dollars ($550 million this year) to underdeveloped countries repayable mainly in the currencies of those countries?—40 percent.

(f) None of these; end the program?—24 percent.

SPACE

1. Do you feel it is important for us to be able to travel in space as soon as possible? Yes, 42 percent; no, 52 percent.

2. Do you feel that ability to travel in space will have military significance in the foreseeable future? Yes, 51 percent; no, 40 percent.

FARM PROGRAM

1. Do you favor an immediate end of all farm price supports?—36 percent.

2. Do you favor high rigid price supports to guarantee farmers return of their growing costs and return on their investment?—4 percent.

3. Do you favor reducing farm price supports over a period of several years until a free farm economy is restored?—60 percent.

FISCAL

1. Do you believe that the budget of the U.S. Government:

(a) Should always be balanced?—53 percent.

(b) May be unbalanced in years of decreased business activity to stimulate business?—43 percent.

2. Do you favor:

(a) Lowering Federal taxes immediately, without regard to a balanced budget?—9 percent.

(b) Increasing Federal taxes if necessary for additional public services?—6 percent.

(c) Lowering Federal taxes after reducing expenditures and reducing the national debt?—83 percent.

3. Do you favor:

(a) Systematically reducing the national debt each year?—88 percent.

(b) Increasing the national debt in order to provide additional Federal services without raising taxes?—3 percent.

(c) Keeping the national debt at its present level of about $290 billion?—5 percent.

FEDERAL AID TO EDUCATION

1. Do you believe the Federal Government should assume a definite part of the responsibility for public school education in America, including payment of administration costs and teachers' salaries?—8 percent.

2. Do you favor Federal assistance for public school construction on a general basis?—10 percent.

3. Do you favor limiting Federal aid to the programs we now have, including assistance to federally impacted areas?—32 percent.

4. Should we have no Federal aid whatsoever?—44 percent.

MEDICAL BENEFITS TO THE ELDERLY

1. Do you favor free medical care for all people over 65 paid for by the Federal Government?—7 percent.

2. Should we include surgical and hospital care for persons over 65 as a part of social security?—26 percent.

3. Do you favor Federal incentives to private insurance companies to provide health insurance to the elderly?—18 percent.

4. Do you feel there should be no Federal program of any kind to provide medical assistance for elderly persons, leaving this to States and private resources?—50 percent.

VETERANS PENSIONS

1. Paying pensions to veterans without service-connected disabilities on a basis of need?—16 percent.

2. Giving all World War I veterans an honor pension of $100 per month without regard to need or disability?—8 percent.

3. Pensions to disabled veterans should go up automatically with the cost of living?—60 percent.

4. Other?—35 percent.

SENATE

MONDAY, MAY 23, 1960

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

Rev. C. Edward Gammon, D.D., minister, Fairlington Presbyterian Church, Alexandria, Va., offered the following prayer:

O God, who hast been the refuge and strength of good and wise men in many generations, we cry unto Thee for our world, tense with suspicion, haunted by the pain of yesterday's wars, our own countryside garrisoned with slender stalagmites of terrible, radioactive death. Thus we implore Thy mercy for all who this day must represent free peoples before the forums of world conscience.

We beseech Thee to grant physical stamina, intellectual vigor, and sensitivity of soul to all honored men of government—for men living with harsh, insistent pressures, struggling conscience, complex decisions, the vulgar demands of entrenched greed; the never-ending pleas of injured minorities and conflicting parochial interests; the outraged cries of the sluggard, men of borderline morals who went too far; the tragic victims of war, hunger, disaster, and disease; men living each day with the tensions of domestic politics.

O dear God, we Americans are hard on our public servants. Be merciful and gracious, a strong God of infinite love and grace to them.

Dear God, in these boisterous days when we Americans go about the business of selecting our leadership for the coming years, grant that, when all is said and done, and the campaigns of 1960 shall have become history, these walls, hallowed by the memories of radiant ideas, flaming words, and courageous men, shall once again be filled with men of honor whose abiding dedication shall be to sustain a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty for ourselves and our posterity.

These things we ask in the name of God, the Father of Jesus Christ. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, May 19, 1960, was dispensed with.

REPORT OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Pursuant to the order of the Senate of January 18, 1960,

Mr. RUSSELL, from the Committee on Appropriations, reported favorably, with amendments, on May 20, 1960, the bill (H.R. 12117), making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes, and submitted a report (No. 1404) thereon.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the bill (S. 2130) to authorize a payment to the Government of Japan.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H.R. 9465) to authorize the extension of a loan of a naval vessel to the Government of the Republic of China.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10809) to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 11405. An act to provide for the treatment of income from discharge of indebtedness of a railroad corporation in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act commenced before January 1, 1960, and for other purposes;

H.R. 11748. An act to continue until the close of June 30, 1961, the suspension of duties on metal scrap, and for other purposes; and

H.R. 12232. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1961, and for other purposes.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H.R. 4029. An act to amend the Internal Revenue Code of 1954 to eliminate the proration of the occupational tax on persons dealing in machineguns and certain other firearms, to reduce occupational and transfer taxes on certain weapons, to make the transferor and transferee jointly liable for the transfer tax on firearms, and to make certain changes in the definition of a firearm;

H.R. 6482. An act relating to the credits against the unemployment tax in the case of certain successor employers; and

H.R. 9308. An act to extend until June 30, 1963, the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H.R. 11405. An act to provide for the treatment of income from discharge of indebtedness of a railroad corporation in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act commenced before January 1, 1960, and for other purposes; and

H.R. 11748. An act to continue until the close of June 30, 1961, the suspension of duties on metal scrap, and for other purposes; to the Committee on Finance.

H.R. 12232. An act making appropriations for the legislative branch for the fiscal year ending June 30, 1961, and for other purposes; to the Committee on Appropriations.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

ORDER DISPENSING WITH CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the calendar, under the rule, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Subcommittee on Buildings and Grounds of the Committee on Public Works was authorized to meet during the session of the Senate today.

LEGISLATIVE PROGRAM—CONSIDERATION OF VETO MESSAGE ON DEPRESSED AREAS BILL

Mr. DIRKSEN. Mr. President, I should like to ask the acting majority leader about action on the President's veto of the depressed areas bill. It was my understanding that it would be called up tomorrow, and that the debate might run into Wednesday. But I had hoped we could set a definite day and hour when we could have the Senate vote on the vetoed bill, and probably divide the time equally, if there was to be debate.

Mr. MANSFIELD. I would say that, definitely, the President's veto of the depressed areas bill will be brought up tomorrow, Tuesday; and I hope the attachés of the Senate will notify all Senators accordingly.

As to the matter of the time, if the minority leader has a suggestion, I shall see, later this afternoon, whether something can be worked out, to the end that a time limitation can be set. It might be possible for us to vote tomorrow on the vetoed measure.

Mr. DIRKSEN. I shall be glad to confer further this afternoon, with the acting majority leader, in order to ascertain how much time may be taken by Senators on our side; and I presume he will ascertain the number of speeches to be made by Senators on his side. Perhaps we can contrive an agreement as to an hour certain, so all Senators may be on notice as to the time when the vote on the vetoed bill will come.

Mr. MANSFIELD. I shall be delighted to work on that; and later in the afternoon we shall see what we can arrange.

COMMISSION TO FORMULATE A MEMORIAL TO JAMES MADISON

The VICE PRESIDENT. The Chair, pursuant to the provisions of Public Law 417, 86th Congress, approved April 8, 1960, has appointed the following Senators as members, on the part of the Senate, of the Commission to Formulate a Memorial to James Madison: Mr. HOLLAND, of Florida; Mr. ROBERTSON, of Virginia; Mr. CARLSON, of Kansas; and Mr. BENNETT, of Utah.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON COOPERATION WITH MEXICO IN CONTROL AND ERADICATION OF FOOT-AND-MOUTH DISEASE

A letter from the Assistant Secretary of Agriculture, reporting, pursuant to law, that there have been no significant developments to report for the month of April 1960 relating to the cooperative program of the United States with Mexico for the control and eradication of foot-and-mouth disease; to the Committee on Agriculture and Forestry.

REPORT OF OVEROBLIGATIONS OF APPROPRIATIONS

A letter from the Acting Secretary of Defense, transmitting, pursuant to law, 36 reports covering 49 violations of appropriations within that Department (with accompanying papers); to the Committee on Appropriations.

REPORT ON DEPARTMENT OF THE ARMY RESEARCH AND DEVELOPMENT CONTRACTS

A letter from the Director of Research and Development, Department of the Army, transmitting, pursuant to law, a report on Department of the Army Research and Development contracts, for $50,000 or more, awarded during the period July 1, 1959, through December 31, 1959 (with an accompanying report); to the Committee on Armed Services.

CHANGE OF METHOD OF PROMOTION OF CERTAIN RESERVE OFFICERS OF THE AIR FORCE

A letter from the Acting Secretary of Defense, transmitting a draft of proposed legislation to change the method of promotion of Reserve officers of the Air Force to Reserve general officer grades (with an accompanying paper); to the Committee on Armed Services.

REPORT ON EXPORT CONTROL

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on export control, covering the first quarter of 1960 (with an accompanying report); to the Committee on Banking and Currency.

REPORT ON REVIEW OF AUTOMATIC DATA-PROCESSING INSTALLATION, NEW ORLEANS COMMODITY OFFICE, COMMODITY STABILIZATION SERVICE

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of automatic data-processing installation, New Orleans Commodity Office, Commodity Stabilization Service, Department of Agriculture, October 1959 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF DEVELOPMENT AND PROCUREMENT OF NEW COMBAT AND TACTICAL VEHICLES BY DEPARTMENT OF THE ARMY

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a confidential report on the review of development and procurement of new combat and tactical vehicles by the Department of the Army (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF ADMINISTRATIVE MANAGEMENT OF BALLISTIC MISSILE PROGRAM

A letter from the Comptroller General of the United States, transmitting, pursuant to law, the initial report on review of administrative management of the ballistic missile program of the Department of the Air Force, dated May 1960 (with an accompanying report); to the Committee on Government Operations.

ERECTION OF FREEDOM MONUMENT

A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to provide for the erection of Freedom Monument, symbolizing the ideals of democracy, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

REPORT ON BACKLOG OF PENDING APPLICATIONS AND HEARING CASES IN FEDERAL COMMUNICATIONS COMMISSION

A letter from the Chairman, Federal Communications Commission, Washington, D.C., transmitting, pursuant to law, a report on backlog of pending applications and hearing cases in that Commission, as of March 31, 1960 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1960

A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to strengthen the enforcement provisions of the Federal Water Pollution Control Act and extend the duration of the authorization of grants for State water pollution control programs, and for other purposes (with accompanying papers); to the Committee on Public Works.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a report of the Archivist of the United States on a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the committee on the part of the Senate.

RESOLUTION OF INDONESIAN PARLIAMENT

The VICE PRESIDENT laid before the Senate a letter from the Assistant Secretary of State, transmitting, pursuant to the request of the Indonesian Government, a resolution of the Indonesian Parliament, concerning the Sahara atomic tests conducted by the French Government, which, with the accompanying paper, was referred to the Committee on Foreign Relations.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Nevada; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION 12

"Joint resolution memorializing the Congress of the United States to oppose passage of H.R. 1884, which if enacted will prohibit the States from imposing a length-of-residence requirement as a condition to receiving welfare benefits under the Social Security Act

"Whereas H.R. 1884 has been introduced in the House of Representatives, and if enacted will prohibit the States from establishing a minimum length-of-residence requirement as a condition to receiving welfare benefits under the Social Security Act; and

"Whereas the right to require a minimum period of residence in the State is a right properly exercised by the States; and

"Whereas passage of the proposed bill will greatly increase the amount required to be expended by the State of Nevada to provide social security benefits; and

"Whereas depriving the States of the right to impose a length-of-residence requirement as a condition to receiving such benefits is an unjustified invasion of their sovereign powers: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of Nevada (jointly), That the Congress of the United States is hereby memorialized to oppose passage of H.R. 1884, thereby preserving the sovereign right of the States to require a minimum length of residency as a condition to receiving welfare benefits under the Social Security Act; and be it further

"Resolved, That certified copies of this resolution be prepared and transmitted forthwith by the legislative counsel to the President of the United States, Vice President of the United States, Speaker of the House of Representatives, and each member of Nevada's congressional delegation.

"Passed by the senate March 11, 1960.

"REX BELL,
"President of the Senate.
"LEOLA H. WOHLFEIL,
"Secretary of the Senate.

"Passed by the assmbly March 10, 1960.

"BERNARD POELE,
"Speaker of the Assembly.
"NATHAN T. HURST,
"Chief Clerk of the Assembly.
"GRANT SAWYER,
"Governor of the State of Nevada."

A joint resolution of the Legislature of the State of Nevada; to the Committee on Government Operations:

"ASSEMBLY JOINT RESOLUTION 7

"Joint resolution memorializing the Congress of the United States to establish a system of payments by the Federal Government to the State of Nevada or its local governments, which payments will be made in lieu of property taxes on federally owned property in this State, which property is immune from State or local taxation

"Whereas the Federal Government owns approximately 60,500,000 acres of the total area of 70,745,600 acres of land in the State of Nevada, being approximately 86.2 percent of all land in the State of Nevada; and

"Whereas the Federal Government has indicated a desire of withdrawing additional lands from the public domain; and

"Whereas the constitution of the State of Nevada prohibits the taxation of such lands unless otherwise provided by the Congress of the United States; and

"Whereas the ad valorem property tax in effect in the State of Nevada is a primary source of revenue for the State of Nevada; and

"Whereas the several county assessors in the State of Nevada have estimated the value of all such lands held by the Federal Government in the State of Nevada to be $767,884,511; and

"Whereas the Commission on Intergovernmental Relation, in its 1955 report to the President of the United States, has evidenced its complete awareness that the immunity of federally owned property from State and local ad valorem taxation has greatly reduced the tax base of many communities which rely on property taxes as their chief source of revenue; and

"Whereas the impact of this immunity is unequal and particularly severe in areas where the value of Federal property is a large part of the total property values; and

"Whereas the Federal Government has realized this problem in the past and has developed a variety of financial arrangements between such Government and State and local governments; and

"Whereas the Commission on Intergovernmental Relations has recommended that the Federal Government inaugurate a broad system of payments by the Federal Government to State and local governments in lieu of property taxes on federally owned property; and

"Whereas such commission is of the opinion that such payments, or other financial arrangements whereby State and local governments can be reimbursed for tax losses arising by virtue of Federal real estate holdings, are necessary to help preserve financially healthy governments; and

"Whereas such immunity has weakened many local governments in the State of Nevada; and

"Whereas the Federal Government and State governments share the responsibility for avoiding the impairment of the financial ability of local governments; and

"Whereas equity as between the Federal Government and local taxpayers requires the Federal Government to make appropriate payments to the State of Nevada or its local governments, or both; and

"Whereas the Federal Government has given no indication of its intention to grant any part of its land to the State of Nevada; and

"Whereas in nearly 100 years of statehood, the State of Nevada has received less than 3 million acres as the result of Federal land grants; and

"Whereas the Federal Government has both the ability and power to compensate the State of Nevada and local governments for tax losses arising by virtue of the immunity of federally owned property from State and local taxation: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of Nevada (jointly), That the Legislature of the State of Nevada most respectfully memorializes the Congress of the United States to establish an effective system of payments by the Federal Government to the State of Nevada or its local governments, or both, as a means of reimbursing this State and its local governments for the tremendous tax losses which arise by virtue of the immunity from State and local taxation which federally owned property in the State of Nevada enjoys; and be it further

"Resolved, That certified copies of this resolution be prepared and transmitted by the legislative counsel to the President and Vice President of the United States, the Speaker of the House of Representatives, the President pro tempore of the Senate, the Secretary of the Interior and to each member of the Nevada congressional delegation.

"Adopted by the senate March 8, 1960.

"REX BELL,
"President of the Senate.
"LEOLA H. WOHLFEIL,
"Secretary of the Senate.

"Adopted by the assembly March 1, 1960.

"BERNARD POELE,
"Speaker of the Assembly.
"NATHAN T. HURST,
"Chief Clerk of the Assembly."

A joint resolution of the legislature of the State of Nevada; to the Committee on Interior and Insular Affairs:

"ASSEMBLY JOINT RESOLUTION 4

"Joint resolution memorializing the Congress of the United States to prepare adequate State water rights legislation

"Whereas despite repeated congressional recognition in many statutes, such as the Federal Power Act, the Desert Land Act, and, more recently, the Water Supply Act of 1958, that the States have and should have the primary interest and responsibility for the control and coordination of water use, a series of judicial decisions in the last decade and a half has cast some doubt on the authority of the States to perform their appropriate tasks in this field, and has suggested the possibility of unlimited Federal prerogatives concerning water which casts doubt on the basis of vested water rights and weakens the ability of the States successfully to coordinate water redevelopment; and

"Whereas factors involved in water development are peculiarly dependent on local geography, climate and economic needs and are consequently best handled within our Federal system by the State level of Government; and

"Whereas the traditional role of the States in the administration, conservation, and utilization of their water resources has led in the direction of optimum harmonious development of these water resources; and

"Whereas Federal agencies which have compiled with State water laws in obedience to the expressed intent of Congress have not thereby jeopardized any of the legitimate interests of the Federal Government; and

"Whereas doubts raised by these judicial decisions as to theb asis of vester water rights, present and future, and doubts as to the relationships between the Federal and State Governments will, without corrective congressional action, tend to delay much-needed water development for an indefinite time and discourage the States in their efforts to make such needed improvements in their facilities for water resource planning and development: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of Nevada (jointly), That the Congress of the United States is hereby memori-

alized to enact legislation in unmistakable and effective terms to provide that the States shall have primary responsibility and authority for the administration and development of water resources within their boundaries; that such law be so clear and unambiguous as to be incapable of evasion by either executive order or judicial interpretations; and that such law require every agency, permittee, licensee and employee of the Federal Government, as a condition precedent to the taking or use of any water, to acquire a right to the use thereof in conformity with State laws and procedures relating to the control, appropriation, use or distribution of such water; and be it further

"Resolved, That the Congress of the United States is hereby memorialized to enact legislation defining the waters originating on federally owned or controlled lands which contribute to flowing or moving surface or ground waters, and thereby eliminate the doubts created by recent judicial revisions, and clarify the relations of the Federal and State governments in the water field, so as to minimize litigation and delays and allow water development by the Federal and State governments to proceed on a harmonious basis; and be it further

"Resolved, That certified copies of this resolution be prepared and transmitted forthwith by the Legislative Counsel to the President of the United States, Vice President of the United States, Secretary of the Interior, Secretary of Agriculture, Speaker of the House of Representatives and each member of Nevada's congressional delegation.

"Passed by the senate February 22, 1960.

"REX BELL,
"President of the Senate.
"LEOLA H. WOHLFEIL,
"Secretary of the Senate.

"Passed by the assembly February 15, 1960.

"BERNARD POELE,
"Speaker of the Assembly.
"NATHAN T. HURST,
"Chief Clerk of the Assembly.
"GRANT SAWYER,
"Governor of the State of Nevada."

A joint resolution of the Legislature of the State of Nevada; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION 7

"Joint resolution memorializing Congress to propose constitutional amendment abolishing income, estate and gift taxes and prohibiting the Federal Government from engaging in any business, professional, commercial, financial or industrial enterprise except as provided in the Federal Constitution

"Resolved by the Senate and Assembly of the State of Nevada, jointly, That the 50th session of the Legislature of the State of Nevada respectfully requests the Congress of the United States to propose to the people an amendment to the U.S. Constitution or to call a convention for such purpose to add to the Constitution an article providing as follows:

" 'ARTICLE ——

" 'SECTION 1. The Government of the United States shall not engage in any business, professional, commercial, financial or industrial enterprise except as specified in the Constitution.

" 'SEC. 2. The Constitution or laws of any State, or the laws of the United States shall not be subject to the terms of any foreign or domestic agreement which would abrogate this amendment.

" 'SEC. 3. The activities of the U.S. Government which violate the intent and purposes of this amendment shall, within a period of 3 years from the date of ratification of this amendment, be liquidated and the properties and facilities affected shall be sold.

" 'SEC. 4. Three years after the ratification of this amendment the 16th article of amendments to the Constitution of the United States shall stand repealed and thereafter Congress shall not levy taxes on personal incomes, estates, and/or gifts'; and be it further

"Resolved, That the legislative counsel forthwith prepare and transmit certified copies of this resolution to the Vice President of the United States, the President pro tempore of the Senate, the Speaker of the House of Representatives and each Member of the Nevada congressional delegation.

"Passed by the senate March 1, 1960.

"REX BELL,
"President of the Senate.
"LEOLA H. WOHLFEIL,
"Secretary of the Senate.

"Passed by the assembly March 11, 1960.

"BERNARD POELE,
"Speaker of the Assembly.
"NATHAN T. HURST,
"Chief Clerk of the Assembly.
"GRANT SAWYER,
"Governor of the State of Nevada."

Resolutions of the City Council of the City of Lynn, Mass., favoring the enactment of legislation to grant pensions to veterans of World War I; to the Committee on Finance.

A resolution adopted by the Milwaukee, Wis., Traffic Club, favoring the enactment of legislation to repeal the excise tax on transportation of persons; to the Committee on Finance.

ACQUISITION OF ADDITIONAL LAND AT FORT RILEY, KANS.—RESOLUTION

Mr. CARLSON. Mr. President, Fort Riley, Kans., is one of the Nation's oldest and most important military establishments. At the present time it is the home of the 1st Infantry Division of the U.S. Army and other important defense units.

The military affairs committee of the Junction City Chamber of Commerce at a meeting on May 10 adopted a resolution stressing the need for the acquisition of additional land at Fort Riley.

Modern weapons and modern warfare require large training areas in order that our military personnel may familiarize themselves with the new equipment.

I ask unanimous consent that the resolution adopted by the military affairs committee of the Junction City Chamber of Commerce be printed in the RECORD, and referred to the Committee on Armed Services.

There being no objection, the resolution was referred to the Committee on Armed Services, and ordered to be printed in the RECORD, as follows:

RESOLUTION OF CHAMBER OF COMMERCE OF JUNCTION CITY, KANS.

Whereas Fort Riley, Kans., is one of the Nation's oldest and most important military establishments; and

Whereas Fort Riley, Kans., is the home of the 1st Infantry Division of the U.S. Army and other important defense units; and

Whereas the military affairs committee of the Junction City Chamber of Commerce has for several years adhered to a policy of supporting its adjacent military establishment, Fort Riley, to the end that its needs have been met, so that this historic post will continue to be utilized to maximum effectiveness; and

Whereas the military affairs committee has seen fit to recommend to the board of directors a program for the acquisition of land at Fort Riley, Kans.; and

Whereas, the board of directors of the Junction City Chamber of Commerce in legally authorized action did unanimously adopt as policy on March 20, 1959, a program for the acquisition of additional land at Fort Riley: Now, therefore, be it

Resolved, That the military affairs committee of the Junction City Chamber of Commerce requests that members of the Kansas congressional delegation take all necessary action to acquire the additional required land at Fort Riley, Kans., to the end that this post continues to be utilized to maximum effectiveness.

This resolution adopted May 10, 1960.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ENGLE, from the Committee on Interstate and Foreign Commerce, with an amendment:

S. 2998. A bill to amend the Merchant Marine Act, 1936, in order to extend the life of certain vessels under the provisions of such act from 20 to 25 years (Rept. No. 1406).

By Mr. HARTKE, from the Committee on Interstate and Foreign Commerce, with amendments:

S. 1787. A bill to protect consumers and others against misbranding, false advertising, and false invoicing of decorative hardwood or imitation hardwood products (Rept. No. 1405).

By Mr. HILL, from the Committee on Labor and Public Welfare, without amendment:

S. 3179. A bill to increase the authorization for appropriations for construction of facilities for the Gorgas Memorial Laboratory (Rept. No. 1409); and

H.R. 8238. An act to authorize and direct the Surgeon General of the Public Health Service to make a study and report to Congress, from the standpoint of the public health, of the discharge of substances into the atmosphere from the exhausts of motor vehicles (Rept. No. 1410).

By Mr. HILL, from the Committee on Labor and Public Welfare, with an amendment:

S. 3025. A bill to amend title II of the Vocational Education Act of 1946, relating to practical nurse training, and for other purposes (Rept. No. 1411).

By Mr. HILL, from the Committee on Labor and Public Welfare, with amendments:

S. 2830. A bill to amend the Library Services Act in order to extend for 5 years the authorization for appropriations, and for other purposes (Rept. No. 1412); and

S.J. Res. 127. Joint resolution to help make available to those children in our country who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to help make available to individuals suffering speech and hearing impairments those specially trained speech pathologists and audiologists needed to help them overcome their handicaps (Rept. No. 1414).

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, without amendment:

S. 3420. A bill to provide further for permissible writing and printing on third- and fourth-class matter, and for other purposes (Rept. No. 1413).

ADMINISTRATION OF NATIONAL FORESTS FOR MULTIPLE USE AND SUSTAINED YIELD

Mr. HART. Mr. President, from the Committee on Agriculture and Forestry, on behalf of the Senator from Mississippi [Mr. EASTLAND], I report favorably with amendments, the bill (S. 3044) to authorize and direct that the national forests be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes, and I submit a report (No. 1407) thereon. I ask unanimous consent that the report be printed, together with supplemental views.

The PRESIDING OFFICER (Mr. CARLSON in the chair). The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Michigan.

REPORT ENTITLED "A BUILDING FOR A MUSEUM OF HISTORY AND TECHNOLOGY" (S. REPT. NO. 1408)

Mr. ANDERSON. Mr. President, pursuant to section 4 of Public Law 106, 84th Congress, 69 Stat. 189, from the Joint Congressional Committee on Construction of a Building for a Museum of History and Technology for the Smithsonian Institution, I submit a report entitled "A Building for a Museum of History and Technology." I ask unanimous consent that the report be printed.

The PRESIDING OFFICER. The report will be received and printed, as requested by the Senator from New Mexico.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. YARBOROUGH (by request):

S. 3578. A bill to amend parts I and III of the Interstate Commerce Act in order to make unlawful certain discriminatory rates, charges, and practices; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appear under a separate heading.)

By Mr. MCCLELLAN (by request):

S. 3579. A bill to authorize agencies of the Government of the United States to pay in advance for required publications, and for other purposes; to the Committee on Government Operations.

(See remarks of Mr. MCCLELLAN when he introduced the above bill, which appear under a separate heading.)

By Mr. MURRAY (by request):

S. 3580. A bill to establish a revolving-type fund in the Treasury for the Bureau of Reclamation, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. MURRAY when he introduced the above bill, which appear under a separate heading.)

By Mr. ERVIN (for himself and Mr. JORDAN):

S. 3581. A bill to amend the Home Owners' Loan Act of 1933, to permit Federal savings and loan associations to invest in or lend to business development credit corporations; to the Committee on Banking and Currency.

(See the remarks of Mr. ERVIN when he introduced the above bill, which appear under a separate heading.)

By Mr. CARROLL:

S. 3582. A bill for the relief of A1c. Percy J. Trudeau; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina (by request):

S. 3583. A bill to amend section 507 of the Classification Act of 1949, as amended, with respect to the preservation of basic compensation in downgrading actions; to the Committee on Post Office and Civil Service.

By Mr. YARBOROUGH (by request):

S. 3584. A bill to amend the Civil Service Retirement Act so as to provide eligibility for annuities for certain employees who were serving on the date of the enactment of the act of May 22, 1920; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appears under a separate heading.)

By Mr. MAGNUSON:

S.J. Res. 196. Joint resolution to provide for the designation of June 20, 1960, as "National Academy of Television Arts and Sciences Day; to the Committee on the Judiciary.

RESOLUTION

CONTINUANCE OF STUDY OF RELATIVE WATER RESOURCE AND RELATED DEVELOPMENT PROGRAMS OF THE UNITED STATES AND RUSSIA

Mr. MOSS (for himself, Mr. GRUENING, and Mr. MUSKIE) submitted the following resolution (S. Res. 325); which was referred to the Committee on Interior and Insular Affairs:

Whereas the Senate, by committee action, public hearings, and floor vote on Senate Resolution 248 (85th Congress, 2d session), has been engaged in a continuing study of the relative water resources and related development programs of the United States and Soviet Russia since 1957; and

Whereas that endeavor, through the joint efforts of the Committee on Interior and Insular Affairs and the Committee on Public Works, has now resulted in a factual, eyewitness report revealing the remarkable effort and accomplishment of the Union of Soviet Socialist Republics to overtake and then surpass the United States of America in this vital field: Now, therefore, be it

Resolved, That this report be received, accepted, ordered printed, and referred to the Committee on Appropriations, Committee on Interior and Insular Affairs, and the Committee on Public Works for appropriate consideration in relation to their other duties; and be it further

Resolved, That it is the sense of the Senate that the Committee on Interior and Insular Affairs and the Committee on Public Works continue the joint studies as previously requested, including, as appropriate, securing similar information concerning developments elsewhere in the world, and continue also, as previously requested, to submit their recommendation of ways and means to accelerate the development and utilization of the natural resources of the United States.

AMENDMENT OF INTERSTATE COMMERCE ACT, RELATING TO STANDARDS FOR CERTAIN RAILROAD RATES

Mr. YARBOROUGH. Mr. President, by request, I introduce, for appropriate reference, a bill to amend the Interstate Commerce Act to apply to proposed railroad rates standards similar to those in the Robinson-Patman Act. The bill would require a common carrier petitioning the ICC for a lower rate in one geographic area to make available equal rate reductions over its whole system, when the requested rate is lower than necessary to meet competition from other forms of transportation.

The Committee on Interstate and Foreign Commerce has, since its formation wrestled with the complex problems of our transportation system. The problems of competitive ratemaking, long a controversial matter, are among the most complex of these issues—particularly when viewed in the perspective of the mandates of the national transportation policy enacted in 1940. This proposed legislation, which offers a possible solution to these problems by applying antitrust principles to competitive ratemaking, is a new approach worthy of consideration by the committee.

I introduce the bill today in order to provide the basis for meaningful discussion and thought on this aspect of competitive ratemaking.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 3578) to amend parts I and III of the Interstate Commerce Act in order to make unlawful certain discriminatory rates, charges, and practices, introduced by Mr. YARBOROUGH, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

PAYMENT IN ADVANCE FOR REQUIRED PUBLICATIONS

Mr. MCCLELLAN. Mr. President, by request, I introduce, for appropriate reference, a bill to authorize agencies of the Government of the United States to pay in advance for required publications, and for other purposes.

This proposed legislation was submitted to the Senate by the Secretary of the Interior and referred to the Committee on Government Operations on April 6, 1960.

Mr. President, in order that Members of the Senate may have full information relative to the objectives of the bill, I request that the letter transmitted to the President of the Senate by the Secretary of the Interior be inserted in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 3579) to authorize agencies of the Government of the United States to pay in advance for required publications, and for other purposes, introduced by Mr. MCCLELLAN, by request,

was received, read twice by its title, and referred to the Committee on Government Operations.

The letter presented by Mr. McCLELLAN is as follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., April 1, 1960.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of a proposed bill, "To provide agencies of the Government of the United States with authority to pay in advance for required publications."

We suggest that this bill be referred to the appropriate committee for consideration, and we recommend that it be enacted.

Section 3648 of the Revised Statutes (31 U.S.C. 529) prohibits advance payment for articles purchased by the Federal Government. The act of June 12, 1930 (46 Stat. 580), permits the advance payment of "subscription charges" for newspapers, magazines, and other periodicals. This language however, does not cover charges for publications that do not fall into the category of periodicals.

The proposed legislation would permit advance payment of subscription or other charges for newspapers, magazines, periodicals, and other publications.

Our acquisitions program has suffered as a result of our inability to make advance payment for publications. In some cases we have been unable to procure publications at all; in others we have had to pay a premium either to the publisher or to an agent.

For example, we were unable to obtain the proceedings of the Fourth World Petroleum Congress held in Rome in 1955, since we were prohibited from complying with the fiscal requirements of the Congress for advance payment of $70. Likewise, we were unable to procure the fifth decennial index of Chemical Abstracts published by the American Chemical Society at a prepublication price of $900. The postpublication price is likely to be $1,200 and in all probability more. The Comptroller General has ruled in 37 C.G. 720 that the index is not a periodical and consequently advance payment canot be made.

The Bonneville Power Administration has difficulty in purchasing the American Standards Association standards which are published as separates at 25 to 50 cents each. It is the association's practice to add 50 cents to each order not accompanied by a remittance. In order to facilitate advance payments of small amounts they sell coupon books, but the General Accounting Office has ruled that we cannot legally purchase them.

In recent years many State governments which formerly gave us their publications such as session laws have changed their policy and now require advance payment. These must now be ordered through a dealer who charges a premium for advancing the money.

These are but a few examples of the difficulties encountered in attempting to procure with facility, and at savings, much needed and required publications for the offices of this Department.

There is ample precedent for liberalizing the statute to permit this Department, as well as other agencies, to pay in advance for required publications. Set forth below are the statutory exceptions which have previously been made for the Department of Agriculture, the Quartermaster Corps, and the Veterans' Bureau (now Veterans' Administration) to pay in advance for subscriptions to publications without regard to section 3648 of the Revised Statutes.

1. The appropriation act for the Department of Agriculture for fiscal year 1910, approved March 4, 1909 (35 Stat. 1054), provided that "hereafter section 3648 of the Revised Statutes shall not apply to the subscriptions for publications for the Department of Agriculture, and the Secretary of Agriculture is authorized to pay in advance for any publications for the use of this Department."

2. The act of April 27, 1914 (38 Stat. 362) provided that the Quartermaster Corps may pay in advance for "other publications" from funds authorized for the corps.

3. The appropriation act for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, provided that "Hereafter section 3648 of the Revised Statutes shall not apply to subscriptions for publications for the U.S. Veterans' Bureau and the Director is authorized to pay in advance for any publications for the use of the Bureau."

The same authority should be given to this and other departments in the furtherance of our library services.

The Bureau of the Budget has advised us that there is no objection to the submission of this proposed legislation to the Congress, but that the Comptroller General has recommended the inclusion of a section 2 that repeals the present special laws granting similar authority to specific agencies. We have no objection to the inclusion of a provision of this kind if the Congress believes it is advisable, and if the inclusion will not delay the consideration of our proposed legislation. The language suggested by the Comptroller General is as follows:

"SEC. 2. The following parts of acts and all amendments thereto are repealed:

"1. The proviso to the paragraph headed 'General Expenses, Library' under the caption 'Library, Department of Agriculture' in the Act of March 4, 1909 (35 Stat. 1054);

"2. The first proviso to the paragraph headed 'Regular Supplies, Quartermaster Corps' in the Act of April 27, 1914 (38 Stat. 362);

"3. The first parenthetical phrase under the caption 'Pay, Miscellaneous' in the Act of March 3, 1915 (38 Stat. 929);

"4. Section 5 of the Act of March 4, 1915 (38 Stat. 1049);

"5. The tenth paragraph under the caption 'United States Veterans' Bureau' in the Act of June 7, 1924 (43 Stat. 533)."

Sincerely yours,

D. OTIS BEASLEY,
Administrative Assistant, Secretary of the Interior.

REVOLVING-TYPE FUND IN TREASURY FOR BUREAU OF RECLAMATION

Mr. MURRAY. Mr. President, by request of the Secretary of the Interior to the President of the Senate, under date of May 16, 1960, I introduce for appropriate reference a bill "to establish a revolving fund in the Treasury for the Bureau of Reclamation and other purposes."

This proposed measure has far-reaching consequences with respect to reclamation appropriations. If referred to the Committee on Interior and Insular Affairs, we will certainly consult the Appropriations Committee.

The text of the letter of February 16, 1960, from the Secretary of the Interior and the draft of the bill are attached. I ask unanimous consent that the copy of the letter with the draft of the proposed bill be inserted in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and letter will be printed in the RECORD.

The bill (S. 3580) to establish a revolving-type fund in the Treasury for the Bureau of Reclamation, and for other purposes, introduced by Mr. MURRAY, by request, was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is established in the Treasury of the United States an account to be known as the Bureau of Reclamation operating fund. To this fund there shall be credited:

(a) All receipts from the operation of projects and facilities under the jurisdiction of said Bureau;

(b) All funds advanced or contributed in accordance with law to said Bureau by water users, Federal agencies and others;

(c) All other receipts arising in connection with the operations of said Bureau;

(d) All appropriations made by the Congress for credit to the Bureau of Reclamation operating fund and unexpended balances of appropriations for the Bureau of Reclamation outstanding as of the effective date of this Act; and

(e) The unexpended balances as of the effective date of this Act in the emergency fund authorized by the Act of June 26, 1948 (62 Stat. 1052; 43 U.S.C., sec. 502); the Fort Peck continuing fund established by the provisions of section 10 of the Act of May 18, 1938 (52 Stat. 403, 406; 16 U.S.C., sec. 833i); the Upper Colorado River Basin fund created by section 5 of the Act of April 11, 1956 (70 Stat. 105, 107; 43 U.S.C., sec. 620d); the Colorado River dam fund established by the provisions of section 2 of the Act of December 21, 1928 (45 Stat. 1057; 43 U.S.C., sec. 617b); the Colorado River development fund established by the provisions of section 2 of the Act of July 19, 1940 (61 Stat. 56, 43 U.S.C., sec. 618a); the special deposit account for the Umatilla Project, Oregon, established by the provisions of section 4 of the Act of October 27, 1949 (63 Stat. 941); the special deposit account established for the North Platte project by the provisions of section 4 of the Act of July 17, 1952 (66 Stat. 754); the Boulder City municipal fund established by section 6 of the Boulder City Act of 1958 (72 Stat. 1729, 1731); the Disposal of Coulee Dam community fund maintained under the Coulee Dam Community Act of 1957 (71 Stat. 524); the special funds for "Payments to Farmers' Irrigation District (North Platte Project, Nebraska-Wyoming)" and for "Refunds and Returns"; and the Trust Fund account established for contributions, deposits and advances. Each of the foregoing funds and accounts is hereby abolished.

SEC. 2. The Bureau of Reclamation operating fund shall be available when so provided in appropriation acts and within such limitations as may be included in such acts, without fiscal year limitation, for the following purposes as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to the Bureau of Reclamation: *Provided,* That moneys heretofore or hereafter appropriated shall be used only for the purposes for which they have been or are appropriated:

(a) Expenditures for engineering and economic investigations of proposed Federal reclamation projects; investigation of projects for the conservation, development and utilization of the water resources of Alaska,

but only to the extent that general funds for such expenditures are appropriated by the Congress for credit to the Bureau of Reclamation operating fund; studies of water conservation and development plans; formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to initial allocation of appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects;

(b) Expenditures for construction and rehabilitation of authorized projects or parts thereof (including power transmission facilities) and for other related activities, as authorized by law, but only to the extent of funds appropriated by the Congress for credit to the Bureau of Reclamation operating fund for such purposes;

(c) Expenditures for operation, maintenance and replacement of reclamation projects or parts thereof and of other facilities, as authorized by law; for a soil and moisture conservation program on lands under the jurisdiction of the Bureau of Reclamation; and for expenses required to be incurred because of unusual or emergency conditions, as defined by law (43 U.S.C., sec. 503), in order to assure continuous operation and maintenance of irrigation or power systems: *Provided,* That nonreimbursable expenditures for these purposes shall be made only to the extent that general funds are appropriated therefor by the Congress for credit to the Bureau of Reclamation operating fund.

(d) Expenditures for general administration and related functions in the office of the Commissioner of Reclamation and in the regional offices of the Bureau of Reclamation;

(e) Loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (69 Stat. 245, 70 Stat. 155; 43 U.S.C., sec. 421a–421d), and August 6, 1956, as amended (70 Stat. 1044, 71 Stat. 48; 43 U.S.C., sec. 422a–422k), including expenses necessary for carrying out the program, but only to the extent of funds appropriated by the Congress for credit to the Bureau of Reclamation Operating Fund for such purposes;

(f) Within the receipts of the Boulder Canyon Project available therefor under the Boulder Canyon Project Adjustment Act, as amended, the payments provided for in subsection (c) and the expenditures provided for in subsection (d) of section 2 of said Act which but for the provisions of this Act would have been made from the Colorado River dam fund and the Colorado River development fund, respectively;

(g) Expenditures and transfers for the purposes specified in section 6 of the Boulder City Act of 1958 within the proceeds from the disposal under said Act of Federal property lying within the Boulder City municipal area, except that expenditures for the purposes specified in subsection (b)(2) of said section 6 may at the discretion of the Secretary of the Interior be made only to the extent that general funds for such expenditures are appropriated by the Congress for credit to the Bureau of Reclamation operating fund for such purposes: *Provided,* That the reference in subsection (c) of said section 6 to the Colorado River dam fund shall be taken to refer to the Bureau of Reclamation operating fund and the references in said section to the Boulder City municipal fund shall be taken to refer to the proceeds from the disposal under the Boulder City Act of 1958 of Federal property lying within the Boulder City municipal area: *Provided further,* That the reference in subsection (e) of said section 6 to appropriations available for municipal operations of the city shall be taken to refer to allotment of moneys in the Bureau of Reclamation operating fund for municipal operations of the city;

(h) Payments and expenditures for the purposes set forth in sections 7 and 9 of the Coulee Dam Community Act of 1957 within the proceeds from the sales made under sections 2 and 3 of said Act, and the transfer to the reclamation fund of any balance remaining from such sales as provided in subsection (a) of section 9 of said Act;

(i) Within the total amount authorized for such purpose by the Act of August 13, 1957 (71 Stat. 342), the payments to the Farmers' Irrigation District on behalf of the Northport Irrigation District provided for in said Act;

(j) Within the miscellaneous revenues accruing pursuant to subsections I and J of section 4 of the Act of December 5, 1924 (43 Stat. 685, 703; 43 U.S.C., secs. 501, 526), on behalf of those who have contracted with the United States pursuant to the Act of July 17, 1952 (66 Stat. 754), the expenditures provided for by section 4 of said Act;

(k) Within the payments therein referred to, the expenditures and transfers provided for in section 4 of the Act of October 27, 1949 (63 Stat. 941);

(l) Expenditure of funds advanced or contributed in accordance with law for the purposes for which advanced or contributed;

(m) Expenditures for the purpose of refunding overcollections and to return deposits in excess of amounts applied to the purposes for which the deposits were collected;

(n) Payment at least annually to the credit of the reclamation fund or miscellaneous receipts of the Treasury as the case may be, in accordance with law, from moneys in the Bureau of Reclamation operating fund in excess of the amounts required for the foregoing purposes: *Provided,* That for the purposes of the second paragraph under the heading "Increase in the Reclamation Fund" in the Act of May 9, 1938 (52 Stat. 291, 318; 43 U.S.C., sec. 392a), the net revenues derived from the sale of power in connection with a project shall be deemed to have repaid those construction costs of such project allocated to be repaid by power revenues when the total net power revenues heretofore realized in connection with such project together with those hereafter realized and credited to the Bureau of Reclamation operating fund in accordance with this Act shall have equaled such construction costs.

SEC. 3. (a) In the application of this Act to the Colorado River storage project and participating projects, the references in section 5 of the Act of April 11, 1956 (70 Stat. 105; 43 U.S.C., sec. 620d), to the revenues credited to and in the Upper Colorado River Basin fund shall be taken to refer to the revenues collected in connection with the operation of the Colorado River storage project and participating projects and credited to the Bureau of Reclamation operating fund.

(b) Hereafter, the computation of charges under the Boulder Canyon Project Adjustment Act, as amended, for electric energy generated at Hoover Dam and in determining the obligation to repay advances and readvances for the construction of the project as defined in said Act (including the determination of nonprofit investments or expenditures), the references in said Adjustment Act to advances and readvances to the Colorado River dam fund shall be taken to refer to funds appropriated for credit to the Bureau of Reclamation operating fund for construction of the project and the references to receipts or revenues from the project shall be taken to refer to receipts or revenues from the project credited to the Bureau of Reclamation operating fund. For the purpose of computing interest on advances and readvances of funds for construction of the project, such funds shall be considered as advanced when they have been transferred to the credit of the account on the books of Treasury from which they are to be disbursed.

SEC. 4. The provisions of this Act shall take effect on July 1, following the date of its enactment.

The letter presented by Mr. MURRAY is as follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., May 16, 1960.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for your consideration is a draft of bill "To establish a revolving-type fund in the Treasury for the Bureau of Reclamation, and for other purposes."

I request that this draft bill be referred to the appropriate committee of the Senate and I recommend that it be enacted.

The proposal, if it is enacted, will authorize the establishment of a fund, to be known as the Bureau of Reclamation operating fund, into which all revenues and receipts of every nature arising from the operation of projects and facilities under the jurisdiction of the Bureau of Reclamation would be deposited. Similarly, all appropriations made by the Congress for the Bureau and related unexpended balances thereof, as of the effective date of the act, and the unexpended balances in the special funds enumerated in section 1, paragraph (e) of the draft bill, would be deposited in the fund. The operating fund would, within such limitations as may be included in appropriation acts, be available without further appropriation and fiscal year limitation for meeting the costs and expenses of the program administered by the Bureau as stated in detail in items (a) through (m) of section 2 of the proposal. However, the draft bill does provide that moneys appropriated shall be used only for the purposes for which they are appropriated. The Bureau will continue to request annual appropriations for construction and rehabilitation, loans to irrigation districts and other public agencies, investigations of water resources projects in Alaska, the soil and moisture conservation program, and certain nonreimbursable operation and maintenance costs. The draft bill would not authorize, expressly or by implication, any new projects for construction or any new activities by the Bureau.

A basic objective of the legislation is to place on a revolving-fund type of operation four activities of the Bureau; namely, operation and maintenance—except insofar as this activity will depend upon appropriated funds to cover expenditures which are allocated to nonreimbursable purposes—general administration, general investigations, and emergency repairs. Current gross revenues from the projects operated by the Bureau exceed the funds required to defray the costs of these programs. Favorable action on the legislation would remove the activities from the normal annual appropriation procedures and thus reflect the results of these business-type operations in the budget on a net basis. Appropriations for these purposes in fiscal year 1960 aggregated $37.3 million with total appropriations for the Bureau in that year amounting to $255.5 million.

Enactment of the proposed legislation will result in our judgment, in bringing about a simplification and improvement in the overall financial operations of the Bureau of Reclamation. For one thing, it will reduce the number of cash accounts with Treasury and the resultant time-consuming reconciliations. In addition, the number of

funds in use would be reduced from 13 to 2, i.e., the reclamation fund and the Bureau of reclamation operating fund.

The Bureau, in accordance with prescribed law, is currently maintaining a series of special fund receipt accounts and revolving funds in addition to the reclamation fund. These include the Colorado River Dam fund; Colorado River development fund; proceeds from sales of property, Coulee Dam Community, and Boulder City municipal fund; and Fort Peck and Colorado River Basin funds. The draft legislation will authorize the discontinuance of the use of these special and revolving funds and the revenues and receipts pertaining thereto will henceforth be deposited directly to the operating fund. However, it is not the intent of this draft legislation to change in any way the use or disposition of funds as presently prescribed by law. The proper use and disposition of these funds will be assured through administrative accounting and fund control by the Bureau of Reclamation rather than by the use of the separate funds for each type of activity.

The reclamation fund established by the Reclamation Act of June 17, 1902 (32 Stat. 388), will be maintained to receive as heretofore proceeds from sales of public lands, royalties from oil and mineral leases and other accretions. With the establishment of the operating fund the balances in the reclamation fund will be available for construction purposes. Upon congressional appropriation the amount thereof would be transferred from the reclamation fund to the operating fund and construction expenditures would be made from this latter account.

The draft bill is not designed to effect nor would it result in a change in the principles on which the accounting system of the Bureau is based. This system is fully integrated to encompass budgeting, programing, and accounting, is patterned after the uniform system of accounts prescribed by the Federal Power Commission and has the approval of the Comptroller General.

A feature of the draft bill which should be noted is contained in subparagraph (n) of section. This provides for an annual transfer of funds to the reclamation fund or miscellaneous receipts of the Treasury, as the case may be, in accordance with law, of the balance in the operating fund in excess of the amounts required to finance the programs (see subparagraphs (a) through (m) of section 2) of the Bureau. With respect to the construction costs of a project allocated to be repaid by power revenues the draft bill provides that, when the aggregate of such net power revenues credited to the operating fund equals the construction costs, such costs shall be deemed to have been repaid for purposes of the reclamation fund (see the special provision in the Interior Department Appropriation Act, 1939, relating to increase in the reclamation fund).

In summary, if the attached draft bill is enacted, the Bureau of Reclamation would have two basic funds, (1) the reclamation fund and (2) the operating fund. The reclamation fund as indicated would receive all accretions and ultimately will be the main source of funds appropriated for the construction program of the Bureau. The operating fund would serve as a depositary for all funds available for expenditure and all disbursements by the Bureau of Reclamation. Control by the Congress over the activities of the Bureau would not be decreased since the various programs of the Bureau of Reclamation would continue to be included in the President's budget, either on a gross or net basis, and subject to whatever action the Congress may take, including the imposition of limitations on expenditures which may appear in appropriation acts.

The Bureau of the Budget has advised that the enactment of this proposed legislation is in accord with the program of the President.

Sincerely yours,

FRED G. AANDAHL,
Assistant Secretary of the Interior.

AMENDMENT OF HOME OWNERS' LOAN ACT OF 1933, RELATING TO CERTAIN INVESTMENTS BY FEDERAL SAVINGS AND LOAN ASSOCIATIONS

Mr. ERVIN. Mr. President, on behalf of my colleague, the junior Senator from North Carolina [Mr. JORDAN], and myself, I introduce for appropriate reference a bill which would amend the Home Owners' Loan Act of 1933 so as to permit certain Federal savings and loan associations to invest in or to lend to business development credit corporations very small portions of their assets.

Business development credit corporations have been established in many States. Generally these make it possible for banks, insurance companies, and other financial institutions to contribute their backing to the development of their States through private financing of sound ventures, without any Federal or State money. The Banking and Currency Committee has issued a committee print on the subject of development corporations and authorities which contains much useful information.

I am proud to say that North Carolina, along with the New England States and New York, was one of the leaders in this movement. The Business Development Corp. of North Carolina has been operating effectively for 4 years. Its fourth annual report, for 1959, shows that the corporation had made disbursements on 49 loans totaling $3.8 million, and that it expected to disburse soon 16 additional loans totaling $2.7 million. According to the report the loans helped to maintain the employment of more than 5,000 people and created employment for an additional 8,000 people. The report shows that the North Carolina Business Development Corp. is financed by $1 million received from its 1,860 stockholders and by over $2 million advanced by its 145 members, including 92 commercial banks, 13 life insurance companies, and 40 State savings and loan associations. It has been paying interest on money borrowed from its members at the rate of 4¼ percent and 5¼ percent.

In North Carolina and a number of other States, including, I understand, Kentucky, New York, Oregon, Tennessee, and Pennsylvania, State savings and loan associations or State building and loan associations have been specifically authorized to participate in financing these State development credit corporations through buying stock, making loans or some similar device. These States have imposed restrictions on the amounts which these State savings and loan associations may make available to business development credit corporations, both in order to protect the savings and loans against the risks inherent in these commercial enterprises, and in order to prevent diversion of more than a nominal amount of the assets of the savings and loan associations away from their primary purpose of making loans on real estate.

The bill which I am introducing would impose stringent restrictions on the advances of Federal savings and loan associations to business development credit corporations. In the first place, it would only authorize a Federal savings and loan to participate in a business development corporation in a State if the State law specifically authorized a State savings and loan association to do so. In other words, if the State law establishing or permitting the establishment of a business development credit corporation does not contain sufficient safeguards so that the State will specifically authorize State savings and loan associations to invest in the development credit corporation, then a Federal savings and loan association in that State could not do so either.

In the second place, a Federal savings and loan association could only invest in a business development credit corporation if the association's general reserve, surplus, and undivided profits amounted to 5 percent of its withdrawable accounts. This formula, designed to limit this activity to well-financed savings and loan associations, is based upon the amendment to the Home Owners' Loan Act with reference to loans to develop real estate which Congress enacted last year.

In the third place, the amount which a Federal savings and loan association could invest in or lend to a business development credit corporation would be limited to the amount which a comparable State savings and loan association might invest or lend, or 2 percent of the Federal savings and loan association's general reserve, surplus, and undivided profits, or $50,000.

Subject to all of these limitations, it would seem that the bill would create no substantial risk to Federal savings and loan associations or those who have invested their savings in them, and no substantial diversion of the assets of Federal savings and loan associations from their basic purpose. And at the same time, the bill would permit Federal savings and loan associations to participate with State savings and loan associations in supporting these valuable business development credit corporations.

I am introducing this bill at this time, even though it is late in the session, so that there will be ample opportunity to consider the bill before the next Congress meets, and so that the views of all interested can be obtained.

I ask unanimous consent that the bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3581) to amend the Home Owners' Loan Act of 1933, to permit Federal savings and loan associations to invest in or lend to business development credit corporations, introduced by Mr. ERVIN (for himself and Mr. JORDAN),

was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464) is amended by adding at the end thereof the following new paragraph:

"Without regard to any other provision of this subsection, any such association whose general reserves, surplus, and undivided profits aggregate a sum in excess of 5 per centum of its withdrawable accounts is authorized to invest in, to lend to, or to commit itself to lend to any business development credit corporation incorporated in the State in which the head office of such association is situated, in the same manner and to the same extent as the statutes of such State specifically authorize a savings and loan association organized under the laws of said State to invest in or to lend to such business development credit corporation, but the aggregate amount of the investments, loans, and commitments of any such association outstanding at any time shall not exceed 2 per centum of its general reserves, surplus, and undivided profits, or $50,000, whichever is lesser."

AMENDMENT OF CIVIL SERVICE RETIREMENT ACT TO PROVIDE ELIGIBILITY FOR ANNUITIES FOR CERTAIN EMPLOYEES

Mr. YARBOROUGH. Mr. President, by request, I introduce, for appropriate reference, a bill to amend the Civil Service Retirement Act so as to provide eligibility for annuities for certain employees who were serving on the date of the enactment of the act of May 22, 1920. I ask unanimous consent that the bill, together with an explanatory statement, prepared by me, be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and without objection, the bill and statement will be printed in the RECORD.

The bill (S. 3584) to amend the Civil Service Retirement Act so as to provide eligibility for annuities for certain employees who were serving on the date of the enactment of the act of May 22, 1920, introduced by Mr. YARBOROUGH, by request, was received, read twice by its title, referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8 of the Civil Service Retirement Act is amended by adding at the end thereof a new subsection to read as follows:

"(c) Any person who was serving as an employee on May 22, 1920, who was separated from the service after having performed not less than fifteen years of civilian service, and who is not otherwise eligible for annuity under this Act, shall be entitled to an annuity beginning at age 70, computed as provided in section 9."

SEC. 2. Notwithstanding any other provision of law, benefits provided by the amendment made by this Act shall be paid from the civil service retirement and disability fund.

SEC. 3. This Act shall become effective the day following its enactment and no annuity provided herein shall be paid for any period prior thereto, except to those persons who had previously filed applications therefor and had been denied by the Civil Service Commission.

The statement presented by Mr. YARBOROUGH is as follows:

This bill will amend the Civil Service Retirement Act by clarifying the eligibility for retirement of certain former Government employees, to wit, those who had a minimum of 15 years classified civil service at the time of the passage of the original Civil Service Retirement Act of May 22, 1920.

The effective date of this act was August 20, 1920. It provided:

"That beginning at the expiration of ninety days next following the passage of this Act, all employees in the classified civil service of the United States who have on that date, or shall have on any date thereafter, reached the age of seventy years and rendered at least 15 years of service computed as prescribed in section 3 of this Act, shall be eligible for retirement on an annuity as provided in section 2 hereof."

This would give the impression that it was the intent of Congress to provide an annuity for all service employees then in the service who were 70 years of age, or who should later attain that age.

During the months and years that followed the effective date of that act, various employees who had been in the Government service at the time of its passage, left in order to accept positions in private employment, believing that when they had attained the age of 70, they would be entitled to receive an annuity for the years—15 or more—of their Government employment.

The Civil Service Commission ruled that they could not do so, unless they were still in the Government service on attaining the age of 70. This was probably a literally correct interpretation of the act, though probably not the intent of Congress, for in later acts, Public Law 411, 77th and others, Congress specifically provided that persons leaving the Government service before retirement age might still draw whatever annuity their years of service in the Government might entitle them to, when they had attained retirement age.

The Civil Service Commission, however, ruled that this privilege did not apply to those oldtime Government employees who worked 6 days a week (without benefit of coffee breaks) for piteously low salaries in the days before 1920.

This bill simply provides that these oldtime Government employees—there, are only a few, and these are 75 years and upwards of age—may have the privilege of drawing the annuities to which their years of former Government service will entitle them.

Since there are only a few, and since their annuities would be based on the piteously low salaries prevailing during their period of service, the cost to the Government would be negligible.

As indicated above the few beneficiaries of this bill are all of advanced age and early action upon it will be necessary if they are to receive in their few remaining years this long-delayed privilege.

AMENDMENT OF NAVY RATION STATUTE, RELATING TO SERVING OF OLEOMARGARINE—AMENDMENT

Mr. PROXMIRE (for himself and Mr. PROUTY) submitted an amendment, intended to be proposed by them, jointly, to the bill (S. 2168) to amend the Navy ration statute so as to provide for the serving of oleomargarine or margarine, which was ordered to lie on the table and be printed.

EXTENSION OF LIBRARY SERVICES ACT—ADDITIONAL COSPONSORS OF BILL

Mr. HILL. Mr. President, at the next printing of the bill (S. 2830) to amend the Library Services Act in order to extend for 5 years the authorization for appropriations, and for other purposes, introduced by me, for myself and other Senators on January 14, 1960, I ask unanimous consent that the names of Senators ALLOTT and CASE of New Jersey may be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPANSION AND EXTENSION OF SALINE WATER CONVERSION PROGRAM—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of May 16, 1960, the names of Senators KUCHEL, MOSS, ALLOTT, SYMINGTON, JACKSON, KERR, SMATHERS, CASE of South Dakota, HUMPHREY, JAVITS, YARBOROUGH, MURRAY, GRUENING, CARROLL, CHURCH, CLARK, MANSFIELD, MCGEE, WILLIAMS of New Jersey, and MONRONEY, were added as additional cosponsors of the bill (S. 3557) to expand and extend the saline water conversion program under the direction of the Secretary of the Interior to provide for accelerated research, development, demonstration, and application of practical means for the economical production, from sea or other saline waters, of water suitable for agricultural, industrial, municipal, and other beneficial consumptive uses, and for other purposes, introduced by Mr. JOHNSON of Texas (for himself and Mr. ANDERSON) on May 16, 1960.

HUMANE TREATMENT FOR CERTAIN ANIMALS—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of May 18, 1960, the names of Senators WILLIAMS of New Jersey, and CHURCH were added as additional cosponsors of the bill (S. 3570) to provide for the humane treatment of animals used in experiment and tests by recipients of grants from the United States and by agencies and instrumentalities of the U.S. Government, and for other purposes, introduced by Mr. COOPER (for himself and other Senators) on May 18, 1960.

ASSISTANCE TO CERTAIN DEAF INDIVIDUALS — ADDITIONAL COSPONSORS OF JOINT RESOLUTION

Mr. HILL. Mr. President, at the next printing of the joint resolution (S.J. Res. 127) to help make available to those children in our country who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to help make available to individuals suffering speech and hearing impairments those specially trained speech pathologists and audiologists needed to help them overcome their handicaps, introduced by me, for myself and other Senators, on August 6, 1959, I

ask unanimous consent that the names of Senators YARBOROUGH, GRUENING, and HUMPHREY may be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF HEARING ON NOMINATION OF LOREN K. OLSON TO BE A MEMBER OF THE ATOMIC ENERGY COMMISSION

Mr. ANDERSON. Mr. President, in accordance with section 22 of the Atomic Energy Act of 1954, as amended, the President, on May 16, 1960, submitted to the Senate the nomination of Mr. Loren K. Olson to be a member of the Atomic Energy Commission for the remainder of the term expiring June 30, 1962, of Commissioner John F. Floberg, who has submitted his resignation to the President.

The Senate section of the Joint Committee on Atomic Energy will hold a public hearing on Friday, May 27, 1960, beginning at 10 a.m. in room P–63, the Old Supreme Court room of the Capitol, for the purpose of considering this nomination.

For the information of the Members of the Congress and the public, I request unanimous consent to insert in the body of the RECORD biographical data on the nominee, Mr. Loren K. Olson, which has been furnished to the Joint Committee by the Atomic Energy Commission.

There being no objection, the biographical data was ordered to be printed in the RECORD, as follows:

QUALIFICATION DATA OF LOREN KEITH OLSON

Personal: Born February 28, 1914, Wheeler, Wis., married—two children.

Education: B.S. Eau Claire Teachers College, Wisconsin, 1939; LL.B., University of Wisconsin, 1940.

Experience:

March 19, 1958, to present, USAEC, General Counsel.

January 1951 to March 18, 1958, partner, Shook & Olson, Washington, D.C.

November 1946 to December 1950, attorney adviser, Office of the Comptroller, Navy Department.

February 1946 to November 1946, personal services consultant contract, Office of General Counsel, Navy Department.

July 1943 to February 1946, officer, U.S. Navy.

November 1942 to June 1943, examiner, National Labor Relations Board, Minneapolis, Minn.

July 1936 to November 1942, examiner, Wisconsin Industrial Commission, Eau Claire, Wis.

Other affiliations: Member, District of Columbia Bar Association; admitted to Wisconsin bar.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. WILEY:

Statement by him, entitled "WILEY Urges Greater Efforts To Go Over the Heads of Communist Leaders to People Behind the Iron and Bamboo Curtains With Truth of World Affairs"; and excerpts from an address prepared by him, for broadcast over Radio Liberty, to the people of the Soviet Union.

By Mr. BEALL:

Statement, prepared by him, entitled "Washington, D.C., International Race, the Olympics of Racing."

By Mr. SCHOEPPEL:

Address entitled "The U.S. Merchant Marine and World Trade," delivered by Secretary of Commerce Mueller, before Port of Washington Propeller Club, in celebration of National Maritime Day, May 20, 1960.

BIRTHDAY GREETINGS TO SENATOR BUSH AND SENATOR DODD

Mr. DIRKSEN. Mr. President, last week I commented on the fact that the two distinguished Senators from New York [Mr. JAVITS and Mr. KEATING] had birthday anniversaries on the same day. I thought that was of particular significance, and quite unusual.

I now discover that the two distinguished Senators from Connecticut [Mr. BUSH and Mr. DODD] have birthday anniversaries which fall on the same day—May 15.

I suppose that if I were an astrologer, I might spell out some rather interesting implications—for instance, that a person should pick out the right day on which to be born, if he had future ambitions to be a Member of the Senate of the United States.

I congratulate the distinguished Senator from Connecticut [Mr. BUSH] and also the distinguished Senator from Connecticut [Mr. DODD].

PLATFORM ADOPTED BY MIDWEST FEDERATION OF COLLEGE YOUNG REPUBLICAN CLUBS

Mr. DIRKSEN. Mr. President, the Midwest Federation of College Young Republican Clubs at its meeting in Des Moines, Iowa, adopted a platform on April 9. I believe the platform is very timely, and I ask unanimous consent that it be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the platform was ordered to be printed in the RECORD, as follows:

PLATFORM ADOPTED IN DES MOINES, IOWA, BY THE MIDWEST FEDERATION OF COLLEGE YOUNG REPUBLICAN CLUBS, APRIL 9, 1960

Preamble: We of the Midwest Federation of College Young Republicans are acutely aware that the effort of the U.S. Government resolutely to oppose the international Communist threat must be bolstered by sound and responsible public policies. In order to pursue this objective, we must strengthen the foundations of constitutional liberty by returning to the principles of true fundamental Republicanism. It is with this idea in mind that we submit the following platform:

I. AGRICULTURE

Whereas the Republican Party has sought to solve agricultural problems along lines consistent with our free enterprise economy; and

Whereas the Midwest Federation of College Young Republican Clubs is in agreement with this philosophy which endeavors to place farmers in a stable, independent, and self-supporting position; and

Whereas this policy must be carried out in such a way that individual farmers affected by the agriculture revolution are adequately protected against undue market fluctuations: Therefore be it

Resolved, That the following steps be taken to provide a responsible public policy toward agriculture:

1. Increase in the soil bank program by an addition of 60 million acres of land beyond the present level.

2. Further development of plans for oversea distribution of our farm surpluses, in lieu of foreign aid, with the requirement that these surpluses be paid for in hard currency.

3. Offering of surplus commodities, in lieu of cash payments, to farmers who participate in the soil bank and other conservation programs.

4. Further utilization of sliding scale parity payments based on a moving average of the last 10 years combined with a progressive elimination of all planting, acreage, and marketing controls as supply and demand are brought into equilibrium.

5. Increased rights for farmers to grow as much as they want as long as they do not grow the commodity for sale on the market.

6. Establishment of the right of all farmers, regardless of the number of acres of a crop which they may grow, to vote in polls to choose between different degrees of acreage control and different levels of parity prices.

II. ECONOMIC POLICY

Whereas our Nation must remain economically strong if our people are to remain free: Therefore be it

Resolved, That—

1. We favor lowering rates on present corporate and excise taxes.

2. We favor the increased taxation of cooperatives.

3. We favor the further examination of the taxation of insurance companies.

4. We favor lowering marginal tax rates in upper income brackets.

5. We oppose any efforts to increase the present debt limit of $295 billion.

6. We favor raising the interest ceiling on long-term Treasury bonds.

7. We favor economic and technical aid through private channels to foreign countries as a "good investment" for our own economy.

8. We favor careful scrutiny by Congress of all governmental foreign aid programs with an eye toward reducing the amount appropriated.

9. We favor participation by the United States in the General Agreement on Trade and Tariffs, with the reservation that Congress be given a stronger voice in the determination of our foreign trade policies.

10. We favor taking positive steps to improve the dollar's value abroad by fighting inflation at home.

III. EDUCATION

Whereas the Young Republican National Federation has in two consecutive conventions gone on record in opposition to Federal aid to education; and

Whereas we share their judgment in holding Federal aid to be both unnecessary and a potential avenue to Government influence on the curriculum; and

Whereas we believe that America's schools must be kept free of Government interference: Therefore be it

Resolved, That this convention expresses its unalterable opposition to Federal aid to American schools.

IV. FOREIGN POLICY

Whereas the Castro regime has abused the integrity of the United States by irresponsible attacks on our integrity; and

Whereas the Castro regime has made indiscreet and unfounded, accusations of sabotage against the United States; and

Whereas the rights of U.S. citizens have been repeatedly violated in Cuba: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs urges the administration to take appropriate diplomatic measures and such economic sanctions as are necessary to remedy the situation,

Whereas the ruling class of South Africa has repeatedly violated the basic human rights of the Africans: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs go on record as supporting peaceful efforts for the establishment of basic human rights in Africa; including gradual abolishment of apartheid; but be it further

Resolved, That we are not in favor of direct or indirect intervention by the United Nations in this matter because we feel such action is a violation of the U.N. Charter: be it

Resolved, That the Midwest Federation of College Young Republican Clubs urges the administration and the Congress of the United States to comprehensively review our foreign aid policy in view of the changing status in the world markets, our international deficit of payments, and the ability of recipient nations to handle their problems themselves; and be it further

Resolved, That foreign aid, when given, be on a loan basis wherever feasible.

Whereas the coming summit conference at Geneva may potentially influence peace in the world; and

Whereas diplomatic agreements made in the past with the U.S.S.R., such as at Yalta, were violated and in some instances completely disregarded when such action furthered the cause of world communism: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs ask that the diplomatic leaders of the Western Nations keep the actions of the Communist leaders of the past in mind and take all precautions not to lead the free world into agreements or commitments that could be again violated by the U.S.S.R. in a manner that would better the causes of world communism.

Whereas it is in the best interests of the United States that West Germany remain a loyal partner in the NATO alliance; and

Whereas there has been expressed a doubt in European countries that the United States will maintain a strong stand on the Berlin issue: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs urge that the United States reaffirm our belief in the strategic position of West Berlin in the NATO Alliance and our desire to protect the freedom of Berlin at all costs: Be it

Resolved, That, the Midwest Federation of College Young Republican Clubs approve the technical aid and assistance approach to the foreign aid problem as exemplified specifically by the U.S.S. *Hope*.

V. GOLDWATER, BARRY M.

Whereas he has rendered outstanding service in defining and clarifying the sharp difference between the Republican and Democrat parties, and

Whereas he has waged an unremitting battle to restore freedom and dignity to the American individual: Therefore be it

Resolved, That this convention urges that Senator BARRY GOLDWATER, of Arizona, be nominated for Vice President of the United States by the Republican National Convention in 1960.

VI. HEALTH AND WELFARE

Whereas the need for Federal medical assistance to our elder generation is temporary because the amount of private health insurance protecting this group has risen at a substantial rate; and

Whereas the voluntary effort at the community level is rapidly developing and expanding special facilities for the health, care of the aged; and

Whereas the cost of medical insurance provided by the Federal Government would be prohibitive; and

Whereas any health care offered to our aged by Government legislation would result in overcrowding of local hospitals and other facilities and a general deterioration of medical care: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs go on record as opposing any attempt by the Federal Government, such as the Forand bill, to socialize medical care.

VII. LABOR POLICY

Whereas the Republican Party has fought for laws which would help labor unions become more responsible and representative institutions; and

Whereas we feel that the Landrum-Griffin Act was a step in the direction of establishing labor-management relations on a sounder basis; but

Whereas we are of the opinion that further action is needed to protect American workers in their rights: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs go on record as favoring:

1. The right of any individual to choose his own bargaining agent without being compelled by public law or private agreement to belong to any association in order to earn a living.

2. The outlawing of all secondary boycotts and coercive blackmail picketing not covered by the Landrum-Griffin Act.

3. Adequate development of legislative safeguards to prevent any type of organization from operating in restraint of trade.

VIII. LOYALTY OATH AND DISCLAIMER AFFIDAVIT

Whereas the National Defense Education Act was created to provide for the national defense: Therefore be it

Resolved, That the Midwest Federation of College Young Republican Clubs go on record as supporting Senator STYLES BRIDGES, chairman of the Republican senatorial policy committee, in his fight to preserve both the loyalty oath and disclaimer affidavit provisions of that act.

IX. NATIONAL DEFENSE AND SECURITY

Whereas we believe that this country's deterrent force is second to none, and we decry the politically unjustified attempts to generate hysteria over the alleged armed might inferiority of the United States defenses; and

Whereas it is noteworthy that the same Democrat politicians who in 1956 were frightening Americans with cries of an alleged "bomber gap"—a gap which never existed—are now claiming that the United States is behind the Soviet Union in missile and nuclear capabilities; and

Whereas the public record clearly shows that the men who sold America short then are trying to sell her short today: Therefore be it

Resolved, That we favor the continued elimination of wasteful interservice competition, with greater emphasis on a more centralized and unified mission command.

We encourage the continuing strengthening of our NATO, SEATO, and other collective security alliances, with more effective military protection of the Americas through OAS.

We urge additional public educational activities by the Office of Defense and Civilian Mobilization, particularly in the areas of nationwide alerts and the need for better civilian bomb shelters and emergency needs. And being aware that the real strength of Communist subversion rests upon public apathy and ignorance, we feel that a more active job must be done by the House Un-American Activities Committee and the Senate Internal Security Subcommittee; and be it further

Resolved, That it is the feeling of the Midwest Federation of College Young Republicans that sound judgment rather than dollars should be the main criterion when considering our national defense and security program.

X. NIXON, RICHARD M.

Whereas Vice President RICHARD M. NIXON has demonstrated his ability as a statesman and diplomat; and

Whereas he has been closely associated with the present administration and having this most favored position is the best qualified person to manage and deal with the present world situation; and

Whereas he has the integrity and experience necessary for national leadership: Therefore be it

Resolved, That the Midwest Federation of College Young Republicans Clubs endorse the candidacy of RICHARD M. NIXON for President of the United States.

XI. PROGRAM AND PROGRESS COMMITTEE REPORT

Whereas our President Dwight D. Eisenhower has appointed a commission of outstanding Republicans to map a statement of long-range policy and objectives for the Republican Party; and

Whereas the report issued by that commission represents a published statement of farsighted constructive long-range goals; and

Whereas the report has been acclaimed and endorsed by President Eisenhower, Vice President NIXON, and by the national chairman of the Republican Party: Therefore be it

Resolved, That we, the Midwest Federation of College Young Republicans, commend the Percy committee for its work in establishing the policy guides and ideas contained in this report.

ADLAI STEVENSON'S CRITICISM OF THE EISENHOWER ADMINISTRATION

Mr. DIRKSEN. Mr. President, I ask unanimous consent that I may proceed, in the morning hour, for 15 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, I wish to speak a little about crowbars and sledge hammers.

Last week, in his speech at Chicago, Governor Stevenson stated that Khrushchev wrecked the summit conference; and then Mr. Stevenson added:

> We handed Khrushchev the crowbar and sledge hammer to wreck the meeting.

The crowbar and the sledge hammer, according to Governor Stevenson, were the alleged blunders and mistakes.

Then followed his salute to unity, a reminder that his party also had a responsibility, an anticipation of what Republicans would say in the campaign, a recital of the Democrat duty to inform the people, and then the usual political "punch" that—

> This administration has helped make successful negotiations with the Russians—negotiations that are vital to our survival—impossible so long as they are in power.

In so doing, he projected crowbars and sledge hammers right into the middle of the campaign, notwithstanding the very

refreshing recitals of unity that came from the distinguished acting majority leader the Senator from Montana [Mr. MANSFIELD], who is a member of the Senate Foreign Relations Committee, and from the very distinguished majority leader, the Senator from Texas [Mr. JOHNSON], and from a great many others.

Mr. President, whose crowbar did the wrecking? That is the question. According to Radio Liberty, Khrushchev knew of the reconnaissance flights in 1956. If true, why was he silent these many years? Why did he fail to raise the question at Camp David? Why did he fail to raise the question at the Press Club? Why did he fail to raise the question in the course of his tour? Why did he fail to raise the question at the closed meeting of the Senate Foreign Relations Committee?

I was in attendance at that meeting; and I asked Mr. Khrushchev quite a number of questions, and got a rather curt brushoff when we got around to the censoring of American dispatches, when Mr. Khrushchev said:

How do we know they are not all spies?

The U–2 incident was immaterial, and nothing more than a smokescreen. But I must get back to the crowbar.

On the day Khrushchev arrived in Paris, Governor Stevenson was quoted in an interview by the Paris press. It was first reported to us by William Stoneman, a competent, reliable reporter on the staff of the Chicago Daily News foreign service. Mr. Stoneman reported that in this interview Governor Stevenson made three suggestions. They were as follows, and they were headlined in the Paris papers on the day that Khrushchev arrived:

First, that he favored concessions on Berlin in return for an agreement with Russia on cessation of atomic tests.

Second, that he favored a reduction of American forces in West Berlin from 11,000 to 7,000.

I would gather from that suggestion that the distinguished former Governor of Illinois wants to close the last remaining hole in the Iron Curtain.

Third, that a disarmament accord might be sought on the basis of the Rapachi plan, under which forces would be reduced by both the East and the West in the area of central Europe.

Since then David Lawrence, in today's issue of the New York Herald Tribune, discusses the matter further under the caption, "Stevenson Is Seen Involved in Strange Circumstances." Mr. Lawrence comments at length on the matter, and then says:

The strangest episode of all, however, is the interview with Mr. Stevenson, which Soviet Premier Khrushchev read in Paris-Presse-l'Intransigeant just after his recent arrival in Paris. That interview was written by Robert Bulay, after a visit to Mr. Stevenson's home at Libertyville, Ill., where he said he spent an afternoon together with other guests.

The article with a streamer headline across the page said that Adlai Stevenson had proposed virtually a retreat from Berlin and American troop withdrawal from Europe. The published interview was a shock to Americans abroad coming as it did just a few days before the summit conference was to open.

That makes quite a picture. On the eve of the conference, the man who was twice the candidate of his party for the presidency, and in an election year, suggests publicly through the Paris press just how we should make the soft approach to Mr. Khrushchev.

When a reluctant prospect for the Democrat nomination—and I suppose he is a reluctant prospect, and who shall say what might happen—shows his hand in such fashion, Mr. Khrushchev would have been a fool not to consider postponement of the conference for 6 or 8 months—that is, until after election day—on the theory that he might be dealing later with a more gentle, a more tractable, a more flexible, and a less firm President. Or could it be with a more tractable Secretary of State?

In Mr. Khrushchev's comment to Mayor George Christopher at the San Francisco dinner, he rated Mr. Stevenson "the best among U.S. politicians."

Along with all this was the suggestion by the Senator from Massachusetts [Mr. KENNEDY] in Oregon that, no matter who was nominated, Governor Stevenson would be a good candidate for Secretary of State.

Did Mr. KENNEDY read Governor Stevenson's interview in the Paris press? If he did not, how did he come on the statement that Khrushchev had made in East Berlin, that for the last 7 years Chancellor Adenauer has been the Secretary of State for the United States? Adlai, and only Adlai, used that phrase, and it appears in the Paris interview.

So we get back to the question, Whose crowbar brought about the wreckage of the summit? Perhaps it would be more appropriate to say it was a stick of dynamite with a delayed action fuse. Or, since Adlai is a Navy man, we might remain in character and say it was a well-placed, well-timed torpedo that found its mark.

To make sure that all this is documented, I submit and ask unanimous consent to have included in the RECORD as a part of my remarks the following:

No. 1: The address in full made by Governor Stevenson to the Cook County Democrat $100 Dinner, on Thursday, May 19.

No. 2: The dispatch by William W. Stoneman, under the caption, "Was Nikita Influenced By Adlai?"

No. 3: The press release of the American Committee for Liberation, which refers to the U–2 flights.

No. 4: The article by David Lawrence from the New York Herald Tribune, dated Monday, May 23, 1960.

No. 5: The article from the Portland Oregonian in which Senator JOHN KENNEDY stated, in response to a question at St. Helen's High School, that:

Khrushchev laid down two conditions to President Eisenhower for going on with the summit meeting. One was to apologize. I think that might have been possible to do.

That is Mr. KENNEDY suggesting that the President of the United States apologize to Mr. Khrushchev. I let this amazing statement speak for itself.

No. 6: The translation of the article by Special Correspondent Robert Boulay, based on his interview with Governor Stevenson at Libertyville, Ill., and bearing a Chicago dateline, in which appear all the questions and answers, including Governor Stevenson's statement that—

For 10 years there has not really been a Secretary of State for foreign policy. During this period, the real American Secretary of State has been German Chancellor Adenauer.

No. 7: A dispatch by Douglas Dales, under the caption "Farley Condemns Stevenson's Stand," in which Mr. Farley called upon the forthcoming Democratic National Convention to "condemn and repudiate Adlai E. Stevenson's criticism of the Eisenhower administration over the U–2 spy-plane incident."

No. 8: An article by Gould Lincoln, appearing in the Washington Star of May 21, 1960, under the caption "Would Adlai Have Banned the U–2?"

No. 9: The expression of viewpoint, much healthier and more refreshing, by the Honorable Averell Harriman, former Ambassador to the Soviet Union and former Governor of New York, which was written especially for United Press International. The article speaks for itself. I am glad to note that Mr. Harriman points out what President Eisenhower symbolizes to the Soviet people, and how enthusiastically he was received in 1945 when invited to Moscow by Premier Stalin. There was no crowbar in this.

No. 10: A declaration of confidence and support by the Western Governors Conference, adopted at Seattle, Wash., May 18, 1960, and subscribed by 12 western Governors.

Mr. President, I fancy we shall be hearing a lot more about crowbars and sledge hammers in the coming campaign if this is the line to be pursued by the opposition party.

Mr. President, I ask unanimous consent that all of these exhibits be printed as a part of my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois?

There being no objection, the exhibits were ordered to be printed in the RECORD, as follows:

TEXT OF ADDRESS BY ADLAI STEVENSON TO A COOK COUNTY DEMOCRATIC COMMITTEE DINNER

It appears that this year's campaign will be waged under the darkest shadows that ever hovered over the world—the mushroom clouds of a nuclear war that no one wants. This terrible danger—and how to avert it—will and should overshadow every other issue.

For the chances of a more stable world, which seemed to be brightening, have been rudely reversed by the breakdown of the summit conference in this historic week.

Premier Khrushchev wrecked this conference. Let there be no mistake about that. When he demanded that President Eisenhower apologize and punish those responsible for the spy-plane flight, he was in effect asking the President to punish himself. This was an impossible request, and he knew it.

SERIES OF BLUNDERS

But we handed Khrushchev the crowbar and the sledge hammer to wreck the meeting. Without our series of blunders, Mr.

Khrushchev would not have had a pretext for making his impossible demand and wild charges. Let there be no mistake about that either.

We sent an espionage plane deep into the Soviet Union just before the summit meeting. Then we denied it. Then we admitted it. And when Mr. Khrushchev gave the President an out by suggesting that he was not responsible for ordering the flight, the President proudly asserted that he was responsible. On top of that we intimated that such espionage flights over Russia would continue. At this point if Khrushchev did not protest he would be condoning our right to spy—and how long could he keep his job that way? Next we evidentially reconsidered and called off the espionage flights. But to compound the incredible, we postponed the announcement that the flights were terminated—just long enough to make it seem we were yielding to pressure, but too long to prevent Mr. Khrushchev from reaching the boiling point.

ALERT CARD NOTED

And, as if that wasn't enough, on Sunday night when there was still a chance that De Gaulle and Macmillan could save the situation, we ordered a worldwide alert of our combat forces. Is it unreasonable for suspicious Russians to think such a series of mistakes could only be a deliberate effort to break up a conference we never wanted anyway?

We Democrats know how clumsy this administration can be. We are not likely to forget the fumbles that preceded the Suez crisis on the eve of the 1956 election.

But nothing, of course, can justify Mr. Khrushchev's contemptuous conduct, especially after President Eisenhower had announced that our espionage flights had been called off. But his anger was predictable, if not his violence. How would we feel if Soviet spy planes based in Cuba were flying over Cape Canaveral and Oak Ridge? And also we could predict with certainty his efforts to use the situation to split the Western Alliance and intimidate the countries where our bases are situated.

Republican leaders are now saying that in this grave crisis we must all rally around the President in the name of national unity. Our respect for the Presidency will find us joined in salute to President Eisenhower upon his return. We resent deeply and bitterly the gross affront to the President and his Office.

NO QUESTION ABOUT UNITY

There is no question about national unity in a time of crisis. But errors must be corrected, and must not forget that the opposition party also has an obligation to our country and to our allies whose security is also involved. It is the duty of responsible opposition in a democracy to expose and criticize carelessness and mistakes, especially in a case of such national and world importance as this. We must see to it that we profit from such grave mistakes and misfortunes.

It is particularly regrettable that this happened in an election year. And we can already predict what the Republicans will tell the people in the months ahead.

They will stay that President Eisenhower's patience and dignity in Paris scored a diplomatic triumph by exposing Khrushchev's insincerity.

They will say that the Russians are hoping that a "softed" Democratic President will be elected in November. They will tell the people that a vote for the candidate the Russians distrust is a vote against appeasement.

It will be our duty, it will be the duty of all thoughtful, concerned citizens to help the situation and to face the hard, inescapable facts; that this administration played into Khrushchev's hands; that if Khrushchev wanted to wreck the conference our Government made it possible; that the administration has acutely embarrassed our allies and endangered our bases; that they have helped make successful negotiations with the Russians—negotiations that are vital to our survival—impossible so long as they are in power.

MUST SEEK UNDERSTANDING

We cannot sweep this whole sorry mess under the rug in the name of national unity. We cannot and must not. Too much is at stake. Rather, we must try to help the American people understand the nature of the crisis, to see how we got into this predicament, how we can get out of it, and how we get on with the business of improving relations and mutual confidence and building a safer, saner world in the nuclear age.

For in this age, unprecedented in human history, all of us, Americans and Russians alike, have one common enemy. The enemy is the danger of war. We must defeat the enemy together. Despite his hysterics last night, Mr. Khrushchev says he still believes in peaceful progress by negotiation. Let us hope he proves it, and let the United States come into the United Nations not content with the ordinary speeches, not content with the usual anti-Russian majority votes, but with constructive, positive, affirmative proposals to restore the hope of peace.

To those who will see nothing but Russian vice and American virtue, to those who will cry appeasement to any acknowledgment of our mistakes, I say that this is the toughest kind of common sense. For there is no future for any of us in a spiraling arms race propelled by mounting suspicion and distrust on both sides. The fact that Khrushchev seems to have lost his temper in Paris makes it all the more important that we not lose ours—or our heads.

[From the Daily News Foreign Service]

WAS NIKITA INFLUENCED BY ADLAI?

(By William H. Stoneman)

PARIS.—A startling statement by Soviet Premier Khrushchev expressing hope that he could do more business with one of Ike's successors than with Ike himself is being connected by imaginative Europeans with an interview recently given to a French newspaperman by Adlai Stevenson.

In an interview published by the Paris-Presse-l'Intransigeant on Saturday—the day of Khrushchev's arrival here—Stevenson was quoted as willing to make concessions to the Russians on a number of points.

One of Stevenson's alleged statements which startled and disturbed members of the American delegation to the summit indicated that he favored concessions on Berlin in return for an agreement with Russia on cessation of atomic tests.

One concession he was quoted as favoring was reduction of American forces in West Berlin from 11,000 to 7,000.

Of more importance was his suggestion that a disarmament accord might be sought on the basis of the Rapacki plan under which forces would be reduced by both the East and West in the area of central Europe.

This has been opposed by the Western Powers because it might involve retirement of American forces from Europe.

Stevenson was quoted as being willing to face this eventuality.

"I think Europeans—Germans, French and British—should be in a position to defend themselves in Europe," he was quoted as saying.

KHRUSHCHEV KEPT 4-YEAR SILENCE ON U.S. FLIGHTS; SOVIET PREMIER REJECTED PROTEST TO UNITED STATES IN 1956

(News release from American Committee for Liberation)

NEW YORK.—When did Nikita Khrushchev first learn of the U.S. U–2 flights over the Soviet Union? The question assumes importance in view of the Soviet Premier's temper tantrum in Paris on Monday.

According to Radio Liberty, Khrushchev himself has stated he first knew of the U.S. reconnaissance flights in 1956. Moreover, by his own admission, the Soviet Premier refused at the time to lodge a protest with the U.S. Government. Instead, he said he ordered improvements in Soviet rocket power.

It was a Soviet rocket which, according to Khrushchev, brought down the highflying Lockheed U–2 piloted by Francis Gary Powers near Sverdlovsk last May 1.

"The record thus indicates that Mr. Khrushchev first learned about the U.S. overflights almost 4 years before he raised the issue in an obvious effort to torpedo the Paris summit conference," said Radio Liberty. "The question naturally arises as to why the Soviet Premier waited 4 years to protest."

Radio Liberty also noted that it was during those 4 years—following the alleged 1956 plane episode—that Nikita Khrushchev roamed the world as a salesman of "peaceful coexistence." Later, after he succeeded in being invited to the United States, he began expounding the so-called spirit of Camp David.

"There is nothing on the record to suggest that Mr. Khrushchev ever brought the subject of these flights to President Eisenhower's attention during his U.S. visit last fall," said Radio Liberty. "Why—if they pained him so deeply—he waited 4 years to finally broach the subject in Paris on Monday should be of considerable interest to the peoples of the Soviet Union, to whom peace is as important as it is to the peoples of the free world. Is it possible Mr. Khrushchev had other considerations in mind when he decided to torpedo the summit conference?"

Radio Liberty, which is the voice of former Soviet citizens, is providing thorough coverage of the Paris summit developments in its around-the-clock broadcasts to all parts of the Soviet Union in Russian and 17 other languages from powerful transmitters in Western Europe and the Far East.

According to Gene King, U.S. programing chief of the network, Radio Liberty is placing special emphasis on news developments which official Soviet communications media appear to be ignoring. For example, President Eisenhower's announcement that the United States was not going to resume survey flights over the U.S.S.R. was not immediately reported by Soviet press and radio.

"We are also transmitting balanced accounts of world reactions to the latest developments in Paris," Mr. King declared. "We are fully aware of the Soviet citizens' desire to be fully informed on matters which concern them as much as they do us."

According to Radio Liberty, a study of Khrushchev's recent speeches indicates that he referred to three specific U.S. flights over Soviet territory. The first one apparently occurred on July 2, 1956; the second on April 9, 1960; and the third, Francis Powers' ill-fated flight on May 1, 1960.

The July 2, 1956, flight was disclosed by Khrushchev at a reception in the Czechoslovak Embassy in Moscow last May 9. According to the text provided by TASS, the official press agency, this is what the Soviet Premier said:

"I shall say further, when Twining, the then Chief of Staff of the U.S. Air Force, arrived here we welcomed him as a guest and

entertained him. He left our country by air and the next day he sent a plane flying at great altitude into our country. This plane flew as far as Kiev.

"The question arose: Should we protest? I proposed that no protest should be lodged. Only an animal might act like Twining, which, eating at one place, might do its unpleasant business there. From such behavior, we drew the conclusion: To improve rockets, to improve fighters. Our fighters can fly as high as 28,000 meters. But the difficulties of a fighter are that though it can rise high, it is not so easy and simple to find the target in the air: a plane in the air is like a needle in the ocean.

"But the rocket finds its targets itself. This is the advantage of the rocket and we made use of it."

The record shows that Gen. Nathan F. Twining arrived in Moscow on June 23, 1956, for what the then Air Force Chief of Staff later termed an 8-day "controlled" inspection of some Soviet air and military installations. The day after his arrival, he later reported, he attended a Moscow party tendered by the Defense Ministry on Soviet Air Force Day. At the party, Khrushchev drunkenly insulted the United States, British, French, and West German air officials present while Nikolai Bulganin, then the Soviet Premier, vainly shouted, "Shut up."

General Twining left the Soviet Union on July 1, 1956. According to Khrushchev, the following day an American plane "flying at great altitude * * * flew as far as Kiev," the capital of the Ukrainian Soviet Socialist Republic, about 500 miles southwest of Moscow and about 600 miles north of Turkey. Khurshchev gave no further details.

Last May 5, in his speech before the Supreme Soviet, Khrushchev dramatically announced that a U.S. plane, which had violated Soviet airspace on May 1—May Day—had been shot down by a Soviet rocket. But he also disclosed this:

"Previously, an aggressive act was committed by the United States of America on the 9th of April 1960. A U.S. aircraft invaded the airspace of our country from the direction of Afghanistan. Naturally, no person of common sense could think or suspect that this violation was carried out by Afghanistan, a country which is friendly toward us. We are convinced that this aircraft belonged to the United States and was evidently based somewhere on the territory of Turkey, Iran, or Pakistan.

"When this invasion occurred, some of our comrades raised the question as to whether the United States should be warned. We exchanged views within the Government and decided not to take any special measures, not to write notes or memorandums because from previous experience we knew that this leads to virtually nothing. We then gave a stern warning to our military, especially those who are directly responsible for the aerial defense of the country, that they must act resolutely and not permit the invasion of our airspace by foreign planes to go unpunished.

"The American military evidently liked the impunity which they experienced on April 9, and they decided to repeat their aggressive act. For this purpose they selected May Day, the most solemn occasion for our people and for the working people of all countries."

In his May 9 remarks at the Czechoslovak Embassy, Khrushchev returned to the April 9 episode. "Even now," he said, "this flight is denied in the United States. In this case the thing is: If the thief is not caught, he is no thief. But this time we caught the thief and now the whole world knows about it.

"The reconnaissance plane should have been brought down on April 9, too. But our military, to put it mildly, let a chance slip by. And we, as one says, took them to task for it. On May 1 the reconnaissance plane was shot down. The military splendidly coped with the task when the opponent grew bold."

STEVENSON IS SEEN INVOLVED IN "STRANGE CIRCUMSTANCES"

(By David Lawrence)

WASHINGTON, May 22.—Does Nikita Khrushchev want to see Adlai Stevenson elected President of the United States in November so that he can negotiate a deal at the next summit conference?

Does Mr. Khrushchev hope that Mr. Stevenson, if not nominated, will be considered for the post of Secretary of State in a Democratic administration, as Senator KENNEDY hinted the other day?

Why was Mr. Stevenson, in an interview published in Paris a week ago Sunday quoted as favoring an Allied retreat on the Berlin problem?

Why did Mr. Stevenson last Thursday night tell a political dinner meeting in Chicago that the administration has "helped make successful negotiations with the Russians—negotiations that are vital to our survival—impossible so long as they are in power?"

A STRANGE SEQUENCE

These questions are prompted by a strange sequence of circumstances. Thus on March 9 last the New York Times printed a United Press International dispatch from Moscow which read:

"Soviet Premier Khrushchev has his own opinions about the U.S. Democratic Party's presidential possibilities, he revealed tonight. He put Adlai Stevenson at the top of his list in comments to Mayor George Christopher of San Francisco at a dinner. Mr. Khrushchev's rating of the Democrats:

"Mr. Stevenson: the best among U.S. politicians.

"Senator JOHN F. KENNEDY, of Massachusetts: able, but some reservations about his youthfulness.

"Senator STUART SYMINGTON, of Missouri: he's a good man."

No other Presidential aspirants were mentioned, not even Senator HUMPHREY, who had once participated in a marthon conference of several hours with the Soviet Premier. Mr. Stevenson also conferred at length with Mr. Khrushchev in Moscow and wrote articles about him, but they did not contain any of the sting that the Minnesota Senator included in his published remarks.

DIPLOMACY RULE IGNORED

Mr. Stevenson, therefore, apparently is the favorite of Mr. Khrushchev, who has brushed aside the old rule of diplomacy that a foreign government must not interfere in the political campaigns of another country. The Soviet Premier evidently thinks Mr. Stevenson, as the titular head of the Democratic Party, speaks for it.

But James A. Farley, former Postmaster General in the cabinet of the late President Franklin D. Roosevelt and a former chairman of the Democratic National Committee, has just issued a statement urging the Democratic Party to repudiate Mr. Stevenson's speech of last Thursday night. Mr. Farley said in part:

"The unwarranted attack of Mr. Adlai E. Stevenson on the President's conduct of the summit negotiations, in my opinion, in no way represents the thinking of the Democratic Party. * * * In his few remaining weeks as titular spokesman of the Democratic Party has indicated every reason why the Democratic Party in convention should select a spokesman who speaks for it in fact. I can think of no more effective way of doing so than by a unanimous resolution of condemnation and repudiation of his absurd speech in Chicago as representing the views of the Democratic Party."

HIS TALK OF RETREAT

The strangest episode of all, however, is the interview with Mr. Stevenson which Soviet Premier Khrushchev read in "Paris-Press L'Intransigeant" just after his recent arrival in Paris. That interview was written by Robert Boulay after a visit to Mr. Stevenson's home at Libertyville, Ill., where he said he spent an afternoon, together with other guests. The article, with a streamer headline across the page, said that Adlai Stevenson had proposed virtually a retreat from Berlin and American troop withdrawal from Europe. The published interview was a shock to Americans abroad, coming as it did just a few days before the summit conference was to open. Evidently Mr. Khrushchev read it carefully, because in his own speech at East Berlin last Friday he paraphrased one of the points in the interview to charge that Chancellor Adenauer had succeeded "in worming his way to the post of Secretary of State of the United States."

Mr. Boulay, in his interview, quotes Mr. Stevenson as having said:

"For 10 years there has not really been a Secretary of State for American foreign policy. During that period the real American Secretary of State has been German Chancellor Adenauer."

ON REDUCING TROOPS

In other parts of the same interview, Mr. Stevenson is quoted as favoring American concessions, such as a substantial decrease in allied troops in West Berlin. He is reported to have declared also that he could foresee in the future the pulling of American forces out of Europe. When asked whether there would be a change in American foreign policy after the November elections, Mr. Stevenson is quoted as having said: "There will be important changes in American foreign policy."

Mr. Stevenson last Tuesday denied ever having given any interview at all to any Paris newspaper. But he issued a statement to the Chicago Daily News the next day admitting that he had talked with Robert Boulay but calling the published interview incorrect. He said it did not represent his views and that "the most charitable explanation of such irresponsibility, presumption, and discourtesy is that his English was poor and my French no better."

In Paris, however, Americans who know Mr. Boulay say he writes and talks English very well and is a reliable reporter. Just what did Mr. Stevenson really say to Mr. Boulay? Maybe all this is something for Democrats in Congress to include in their investigation of recent events. For there is no doubt that an appeasement faction exists today inside the Democratic party, and certainly Mr. Stevenson's speech—just 4 days before the all important debate at the United Nations Security Council—helped to wreck bipartisan unity in this country.

[From the Portland Oregonian]

KENNEDY SAYS SOFTER U–2 STANCE MIGHT HAVE SAVED SUMMIT TALKS

(By Mervin Shoemaker)

If Senator JOHN F. KENNEDY, of Massachusetts, were President he might apologize to Soviet Premier Khrushchev for the U–2 spy incident, but the Pope would keep his hands out of U.S. governmental affairs.

The Democratic presidential primary candidate made these points Wednesday, a day of appearances spanning St. Helens and Oregon City which ended with a campaign-climaxing rally at Benson Tech High School in Portland.

In Friday's election he is matched against Oregon Senator WAYNE L. MORSE, who is campaigning actively, and Senators STUART SYMINGTON, of Missouri, and LYNDON B. JOHNSON, who are not appearing in the State. Senator HUBERT H. HUMPHREY, of Minnesota, will have his name on the ballot, but he has withdrawn from the contest.

It was at St. Helens High School, following a breakfast meeting for which he arrived too late, that KENNEDY spoke for a degree of mollification of Khrushchev in answering a question on how he would have reacted to the Soviet Premier's attack in Paris.

POSSIBILITY SEEN

"Khrushchev laid down two conditions to President Eisenhower for going on with the summit meeting," said KENNEDY. "One was to apologize. I think that might have been possible to do. The other was to put on trial and punish those responsible for the U–2 flight. That couldn't be done. The men involved were acting under orders."

Later KENNEDY modified the word "apologize," and said the President might "express regret."

KENNEDY told several audiences during the day that he particularly criticizes the timing of the U–2 flight such a short while before the scheduled summit meeting, "letting the risk of war hang on the possibility of an engine failure."

Throughout Wednesday—at high school, supermarket, and industrial plant—KENNEDY used a defense against attacks on his Catholic faith that apparently was developed after his mid-April visit to Oregon.

He is telling audiences that he "swore an oath to God" to uphold the Constitution when he entered Congress, and that the President takes the same oath. The Constitution, he points out, provides for separation of church and state.

When KENNEDY says he would not let the Pope interfere with his duties as President, there is more behind the statement than an Irish Catholic's independence. The Pope, it follows naturally, would be asking him to violate an "oath to God."

KENNEDY says he doesn't think the Pope would interfere with him as president. any more than he does with Charles de Gaulle in France and Konrad Adenauer in West Germany.

MILL VISITED

The candidate toured the Crown Zellerbach paper mill at West Linn, and a sampling of Democratic workmen opinion here brought nothing of comfort to MORSE, SYMINGTON, and JOHNSON.

Of 15 men in a lunchroom which KENNEDY had visited, 10 were Democrats, and 7 of them held up a hand to signify he favors KENNEDY for the nomination. None responded to a call for a show of hands by MORSE supporters.

Random Democrats at the papermill, separated by a sprinkling of Republicans—Leroy Saulsbury, 41, Milwaukee, a millworker, and Art Goldade, 33, West Linn, a pipefitter—were mostly for KENNEDY.

One man asked: "What's wrong with MORSE?" He got no answer.

There is a small chill for Republicans in one reaction to these questions, which came from Richard Buse, 33, a millwright.

His wife likes KENNEDY. She is a Democrat and a Catholic. But Buse likes KENNEDY, too. He's going to vote for him if he gets the nomination. Buse is a Lutheran and a Republican.

There was another party line-crossing incident at Gateway Shopping Center, where a long queue of persons followed KENNEDY from shop to shop in the rain.

A girl in a barber shop was a Democrat. She's for KENNEDY.

"Most of us in here are Republicans," said one of several men present, "but we're going to vote for KENNEDY in the fall."

KENNEDY got unusual support from a fellow Democrat in another Wednesday incident, one which dramatized the widening Democratic Party breach occasioned by the election campaign.

At a meeting of the East Multnomah County Democratic Women's Forum, MORSE, the speaker, vigorously criticized KENNEDY, and KENNEDY was defended by State Senator Monroe Sweetland, Milwaukee, a member of KENNEDY's committee. The unusual part is that Sweetland is a candidate for Democratic nomination for secretary of state, and a candidate for major office does not often expose himself to the enemies of any other candidate.

NO TAX CUT SEEN

In the question period at Sandy Union High School KENNEDY was asked if he would favor increasing the income tax personal exemption from $600 to $800.

"In a dangerous time, and we stand on the razor's edge," he answered, "I don't think we can have any tax reduction."

In his Benson Tech speech KENNEDY criticized the Republican administration for its "record of failure" in natural resource development.

Nearly 1,800 persons filled the Benson auditorium nearly to capacity to hear KENNEDY, who bore down hard on significance of the Oregon primary, again contending that Democrats should not "waste their vote" on a candidate not seriously in the running for President—meaning MORSE.

KENNEDY was introduced by Representative EDITH GREEN, Portland.

TRANSLATION OF ARTICLE BY SPECIAL CORRESPONDENT ROBERT BOULAY

I passed an afternoon with Adlai Stevenson at his farm at Libertyville, 80 kilometers from Chicago. This is the man who could be the next President of the United States. Despite the fact that he has already failed twice against Eisenhower, he still has a chance. Until now, Stevenson has repeated that he was not a candidate. But when interrogated on what he would do if drafted, he replied that he was not a deserter. And having spent 4 hours with Stevenson and several of his friends I have the definite impression that the lawyer-farmer of Libertyville has not abandoned hope of succeeding Eisenhower. In any case he is certainly aiming at becoming Secretary of State if a Democratic candidate other than himself were elected next year.

It was the Saturday of Easter. Stevenson had just returned from a study trip of South America. Tanned, a little overweight, smiling, he nevertheless appeared to me rather nervous. He had just finished lunch in the company of his two sons and daughter-in-law, his grandchildren and the British economist, Barbara Ward. Stevenson moved from one to the other, offering candies, moving the same book around three times, and straightening out the coffee table.

Everyone then left for a tour of the property. Stevenson lent boots to his visitors and himself ensuring that everything was properly taken care of. For an hour and a half he showed us his fields, his sheep, his horses, and the river which was slowly draining off his flooded fields. In his corduroy suit, bareheaded, a scarf around his neck, he was the typical American gentleman farmer.

We returned to the house at 5 o'clock. Adlai Stevenson helped his grandchildren look for Easter eggs and gifts which he had hidden himself. He was more relaxed. Tea was served. Stevenson then invited me to follow him into his office and I never would have believed that he was about to speak to me as he did.

Question. What, according to you, Mr. Stevenson, is the most important question in the political world today?

Answer. The suspension of atomic tests—this is a prime question.

Question. Can it be achieved?

Answer. It must be possible to reach agreement through mutual concessions.

Question. I take it that you refer to agreement with precise control—inspection?

Up till now the Russians have not accepted the minimum inspection formula proposed to them by the Western Powers.

Answer. Naturally, an agreement with inspection * * * but I repeat to you that an agreement must be possible. This problem of atomic tests must be considered as absolute priority. With mutual concessions * * *.

Question. Does this problem appear to you of such importance as to justify concessions on other matters?

Answer. Yes certainly.

Question. Does this mean that the Western Powers should make concessions on the German problem?

Answer. Yes certainly.

Question. On Berlin?

Answer. Yes.

I was surprised and persisted—

Question. Do you establish a connection between atomic agreement and Germany and more particularly Berlin?

Answer. There is no connection. But an atomic agreement is basic and justifies concessions on other matters. Since you mention Berlin incidentally, the present situation cannot be maintained.

WHY 11,000

Question. But the Western Powers are not the petitioners in Berlin. It is the Russians who seem to wish to force the Western Powers to leave Berlin?

Answer. Mr. Boulay, the present situation in Berlin cannot be maintained. Strategically, the presence of 11,000 American soldiers is meaningless * * *.

Question. Must I understand that you are prepared to accept a reduction of American forces in Berlin?

Answer. Yes. * * * One could have for instance 7,000.

Question. Why 7,000 rather than 11,500? Would you accept 5,000, or 3,000, or none at all?

Answer. Yes, but not now, later.

(I once again expressed surprise, and asked Mr. Stevenson to explain himself more fully.)

Question. Do you believe it is possible to take the political and moral risk of such a decision?

Answer. Mr. Boulay, do not be surprised. All I am telling you, I have already said and written several times.

(This explanation surprised me for to the best of my knowledge Mr. Stevenson has never gone so far or been so precise in the direction of seeking an East-West agreement.)

I WAS AT BERLIN

Question. Do you appreciate what would be the reaction of the Berliners and of the Europeans, of the Germans, of the French, and perhaps even the English and others, and even the Americans? Do you think that——

(My host interrupted.)

Answer. Mr. Boulay, I have been in Berlin several times; I know the situation.

(I permitted myself the following answer):

"Mr. Stevenson, I have also been in Berlin. Less often than you perhaps, but perhaps for a longer period. I remained for 5 weeks. I saw Berlin, even both Berlins; I have seen and listened to the Berliners. I have seen and listened to the refugees * * * the refugees whose number I believe has not diminished, on the contrary during recent weeks. Do you really think one can leave 2 million West Berliners 'alone' "?

Answer. I believe that one must first arrive at an agreement which will guarantee free access between West Berlin and the Federal Republic.

RUSSIAN GUARANTEES

Question. But how?

Answer. An agreement must be reached with Russian guarantees.

Question. The experience of the last 10 years does not encourage any optimism on what you refer to as "Russian guarantees."

Answer. That is true, but a change is possible in the future. The agreement must be sought and a solution may be found.

(Mr. Stevenson then spoke to me of the necessity and of the possibility of reducing Soviet pressure on Eastern Europe, particularly by a withdrawal, more or less substantial, of Moscow's military forces. He cited particularly as a happy precedent the Austrian Peace Treaty. I pointed out that if it is true that the Russians withdrew militarily from Austria, as did the Western Powers, they did so from a country where the political power was not held by the Communists. The problem for the Soviets is not only to withdraw such-and-such military force from such-and-such country, but to envisage the strategic consequences, and above all the political consequences of even a localized withdrawal. The Russians must fear the consequences for the political power of the Communists in any Iron Curtain country as well as the example which would be furnished to other Iron Curtain countries.

(Mr. Stevenson admitted the great difficulties, but maintained a relative optimism. He insisted in telling me that he believed a sort of political decompression might be possible in the countries behind the Iron Curtain.)

GI, GO HOME

Question. Do you believe, therefore, that an agreement can be reached on European disarmament?

Answer. I believe that the Rapacki[1] plan could serve as a basis for discussion.

Question. Your answer surprises me. Up to the present the Western Powers, and especially the Americans, have always opposed the Rapacki plan which is considered by the Atlantic Powers as the beginning of the neutralization of Europe. This policy could be summarized by the formula "G.I. Go Home." Do you really envisage the withdrawal of American forces from Europe?

Answer. Yes, in the future.

Question. You have just made, Mr. Stevenson, a very important answer. Does this mean that Europe would have to provide for its own defenses alone?

Answer. I believe that the Europeans—Germans, French, English, etc.—must be in a position to defend themselves in Europe.

Question. Do you believe, then, that the Americans should put atomic weapons at the disposal of European forces?

Answer. This could be discussed.

(During the rest of the conversation Mr. Stevenson gave me no further definition on this point. He nevertheless reminded me that in the past, he had said and repeated, especially to General de Gaulle, that in his opinion, European forces should concern themselves only with conventional weapons, the Americans being alone to have at their disposal atomic weapons.)

ADENAUER—U.S. SECRETARY OF STATE

Question. Will there be a change in American foreign policy after the election?

Answer. There will be important changes in American foreign policy.

(I persisted.)

Question. Mr. Stevenson, you told me there will be important changes after the elections. Would you repeat this? Do you think there will be changes regardless of the results of the elections?

(Mr. Stevenson slams the table with the palm of his hand to confirm.)

Answer. Definitely yes; there will be major changes whatever the results of the election.

(Mr. Stevenson goes on, while severely criticizing the decisions of Foster Dulles and those decisions which followed, and this is his categorical conclusion.)

For 10 years there has not really been a Secretary of State for American foreign policy. During this period the real American Secretary of State has been German Chancellor Adenauer.

DANGEROUS WORDS

(I prepared to leave.)

Goodby, Mr. Stevenson. Thank you for your hospitality. I may see you at the summit conference. Not the next but perhaps the following.

Mr. Stevenson, while appearing very satisfied with my polite reference, answered me "Oh no." But I sensed in his voice that he had not lost hope of some participating in the discussions between the Big Four as President of the United States, or at least as successor to Mr. Herter, or, more exactly, Chancellor Adenauer.

But on the basis of what he said to me, how could he find enough votes to be elected to the Democratic Convention if he holds to these statements? If a Democrat other than he were elected, could he really choose Stevenson as Secretary of State if Stevenson holds himself strictly to his statements of this Saturday of Easter?

FARLEY CONDEMNS STEVENSON STAND—ASSAILS SPEECH ON SUMMIT—SAYS HIS NOMINATION WOULD BE DISASTROUS

(By Douglas Dales)

James A. Farley assailed Adlai E. Stevenson yesterday for his criticism of the Eisenhower administration over the collapse of the summit conference.

He warned the Democratic Party that the nomination of Mr. Stevenson for the Presidency would be disastrous.

The former Democratic National Chairman, in a caustic statement, charged that the party's standard bearer in 1952 and 1956 was using the failure of the summit meeting as a vehicle to promote a third nomination for himself.

The basis of his attack was Mr. Stevenson's speech Thursday at a party gathering in Chicago in which he declared that it was the obligation of the Democrats, as the opposition party, to expose and criticize any carelessness and mistakes of the Eisenhower administration.

As Mr. Farley directed his fire at the party's titular head, the Stevenson-for-President Committee of New York increased its activities with an advertising campaign to obtain support for Mr. Stevenson. Scores of volunteers were out in the city and suburbs, gathering signatures to petitions urging Mr. Stevenson's nomination.

Mr. Farley said he was impelled, as a matter of honesty and in furtherance of national unity, to reject Mr. Stevenson's thesis that the administration had furnished Premier Khrushchev with the "sledge hammer and crowbar" to wreck the summit conference.

"On the contrary," he said, "it occurs to me that Mr. Stevenson is attempting to use the incident to 'sledge hammer and crowbar' another disastrous nomination for himself as the Apostle of Appeasement out of the Democratic Party."

Meanwhile, the Republican National Committee criticized the Chicago speech as "reckless" and declared that Mr. Stevenson was falling "like a ton of bricks for the Khrushchev line."

The statement by Mr. Farley, who often voices the views of the conservative wing of the Democratic Party in the State, foreshadowed the possibility of a major division in the party on the question of foreign policy as a campaign issue.

Mrs. Franklin D. Roosevelt endorsed Mr. Stevenson's speech at a news conference here Friday. And a substantial group of Democrats in the House of Representatives have framed a series of questions for the Republicans on the U–2 plane incident and other developments on the eve of the Paris summit meeting.

UNWARRANTED ATTACK

Mr. Farley, terming Mr. Stevenson's speech an "unwarranted attack" on the President's conduct of the summit negotiations, said Mr. Stevenson did not represent the thinking of the Democratic Party.

Mr. Farley said that for Mr. Stevenson to say that the President had provided the tools to wreck the conference "indicates to me that Mr. Stevenson continues to be as misinformed on the facts as he is infatuated with his own writing style."

"It is my experience," the former party leader said, "that adroit phrasemaking does not necessarily indicate sound policymaking, a view which I find fortified by the rejection of Mr. Stevenson on two occasions by the American electorate."

Mr. Stevenson was particularly out of his field, Mr. Farley said, in criticizing the President's calling of a military alert on the eve of the Paris meeting. Recalling that the attack on Pearl Harbor had occurred immediately after negotiations with the Japanese mission had broken off in Washington, he said:

"I feel that the most felicitous use of the language, even Mr. Stevenson's, would be totally inadequate to explain away the enormity of a magnified Pearl Harbor, in the event of a surprise Soviet attack. If Mr. Stevenson is suggesting that the Commander in Chief should refer all measures of defense to Mr. Stevenson before issuing orders to adequately protect the country, the idea is both impractical and unconstitutional."

CHINA SUGGESTION NOTED

Mr. Farley's reference to Mr. Stevenson as an "apostle of appeasement" was based in part on the suggestion last September by Mr. Stevenson that the United States should cease leading the "anti-admission" lobby against Communist China at the United Nations.

"It is part of Mr. Stevenson's appealing, if adolescent, naivete in international affairs," the statement continued, "that it appears not to occur to him that the admission of Red China by the United Nations would establish another Red spy nest in New York City under full diplomatic protection."

Mr. Farley said that during his recent travels in the Far East, heads of government had insisted to him that the slightest wavering in the country's policy of nonrecognition of Communist China "would result in a worldwide diplomatic disaster for the cause of freedom, not second to an ignominious surrender of Berlin."

Mr. Stevenson has given the National Convention every reason to select a spokesman "who speaks for it in fact," Mr. Farley said, continuing:

"I can think of no more effective way of doing so than by a unanimous resolution of condemnation and repudiation of his absurd speech in Chicago as representing the views of the Democratic Party. As a former National Chairman and as one who has been proud to be a Democrat for over 50 years. I shall call upon all Democrats to keep the symbol of our party the Democratic mule and not Mr. Stevenson's umbrella."

Mr. Stevenson, who left Chicago for New York late yesterday afternoon could not be reached for comment.

---

[1] The Polish plan referred to as "Rapacki" from the name of its author provides principally for a partial European disarmament dealing with the production and stockpiling of nuclear weapons.

[From the Washington Star, May 21, 1960]

WOULD ADLAI HAVE BANNED THE U–2?

(By Gould Lincoln)

Adlai Stevenson's blast at President Eisenhower and the administration's handling of the U–2 intelligence flights over Russia raises some interesting questions—while at the same time thrusting an issue into the political campaign, with Mr. Stevenson as its first and perhaps principal spokesman.

Among the questions raised by the titular leader of the Democratic Party, who has been called a willing candidate for a third presidential nomination—if he can be drafted—is the following: Would Mr. Stevenson, had he been President during the last 4 years, have banned U–2 intelligence flights over Russian territory? These flights have been called by men intimately connected with the security of the United States and the free world not only essential but of great value.

Second: Is Mr. Stevenson in any way denying that we should seek information regarding the intentions and the strength of a potential enemy—particularly during a period of constant sabre rattling and threats of destruction of the United States by Soviet Premier Khrushchev and other leading Russian Communists?

This is a subject which Mr. Stevenson has not thoroughly discussed in his comments so far. But it is one that, should he be nominated by the Democratic Party, he will be asked many times, and will have to answer. It is obvious he cannot have it both ways. Mr. Khrushchev in his recent widely publicized press conference in Paris, when he torpedoed the summit conference, said in answer to a question that he had known for some time of the U–2 flights over Russia; that he knew all about them at the time he visited the United States and President Eisenhower at Camp David. If he did, his restraint—he did not mention these flights to President Eisenhower in their intimate conversations—was in remarkable contrast to his outbursts in Moscow on May Day and in Paris.

RESPONSIBILITY OF PRESIDENT

Had Mr. Stevenson been President he would have been told by the country's defenders in all probability that it was of vital importance to rise above the Iron Curtain and obtain as much information as possible regarding Russia's military strength and her intentions, so that this country could be alerted before a surprise attack. Presumably Mr. Stevenson would have agreed to this form of espionage. He would have known, as did President Eisenhower, the need for our security in the face of the constant threat of Soviet attack. He would have known, too, of the wideflung espionage carried on—and with much success—by the Soviet, both in this country and in the rest of the world.

Nevertheless, Mr. Stevenson has undertaken to thrust this whole subject of intelligence work for national security into the political campaign. Another question rises: Have Mr. Stevenson's charges against the President and his handling of the use of these intelligence flights tended to create a picture in Russian minds and in the minds of our allies of a divided America? The titular leader of the Democratic Party was careful in his Chicago speech to denounce the demands of Mr. Khrushchev for an apology from President Eisenhower because of the U–2 flights and for the punishment of those responsible for launching them. He was careful to say that this is no time for America to be divided. But what he said, taken as a whole, may well be interpreted as showing a serious division among the people of America. It may be interpreted as a backhanded apology.

Certainly, Mr. Stevenson seems to have indicated that the country must get rid of the Republicans and Mr. Eisenhower and all his works if the United States is to be able in the future to negotiate with Soviet Russia and the Communist world. This, in a measure, is exactly what Mr. Khrushchev declared in Paris. If Mr. Stevenson intended to exhibit himself as a better negotiator for a peaceful world, he has not given an impression that he would be a stronger one.

SPEECH POLITICAL

Mr. Stevenson in Chicago was addressing a Democratic political rally, a Cook County fund raising dinner. His speech was a political speech and so intended. The issue of the U–2 flights, their handling, and all other implications, so far as Mr. Stevenson is concerned, are firmly in the campaign. It may be that other Democratic leaders will follow a similar course. The question naturally arises: Will this issue gain votes for the Democratic nominee for President— whether Mr. Stevenson, Senator KENNEDY or another? Will Mr. Stevenson picture the President as a wrecker of the Paris Summit Conference—or won't he? It would be a difficult task to put that across in the minds of Americans, in view of Mr. Khrushchev's exhibition at Paris. In his Chicago speech, Mr. Stevenson called Mr. Khrushchev the wrecker of the conference. But he said Mr. Eisenhower had placed the crowbar in Mr. Khrushchev's hands by ineptness, by contradictory statements emanating from this Government. This raises the question: Would Mr. Stevenson, as President, have denied the whole business of the U–2 flights, have disclaimed any responsibility for them?

The American people have learned over the years that President Eisenhower is devoted to peace and the preservation of a peaceful world. He, however, has never been an advocate of peace at any price. He has insisted that the country be prepared and strong and informed in order to forestall or prevent Communist attack. Now he is charged by Mr. Khrushchev with seeking war, with a desire to prevent a successful summit conference. Mr. Stevenson would not have the American people believe any such thing. His contention is that the President has been stupid—more stupid than a Democratic President would have been. That, however, is still to be proved.

RUSSIANS WANT TO HEAR PEACE MESSAGE FROM IKE

(EDITOR'S NOTE.—Probably no living American has known Russia and the Russians over as many years as Averell Harriman, former New York Governor and Ambassador to the Soviet Union from 1943 to 1946. He returned several months ago from a 6-week tour of the country during which he had a long series of conversations with Nikita Khrushchev and leading government officials.)

(By Averell Harriman)

The success or failure of the summit conference hangs largely on the decisions of one man—Nikita Khrushchev. But even Khrushchev, powerful as he is, cannot prevent President Eisenhower's visit to the Soviet Union from being a tremendous success, and of lasting benefit to our country.

To the Russian people, Dwight D. Eisenhower is not just a President of the United States. He is the supreme commander of the allied forces who with the Soviet armies fought to victory over the ruthless Nazi invaders. During the war his reputation was built up by the Soviet Government, through the press and other ways, as a great ally and friend of the Soviet Union. In July 1945, Stalin invited him to visit Moscow, and he was given a hero's welcome.

He stayed with me at the Embassy, and I vividly recall his reception by the people, particularly at the Dynamo football game. The 80,000 spectators who jammed the stands raised the sky with their applause when he and Marshal Zhukov stood up to take a bow, with their arms around each other's shoulders.

Then we were invited to review the youth parade in Red Square. The participants, 100,000 strong, from all over the Soviet Union, saw him standing with Stalin and Zhukov on top of Lenin's tomb.

Last year, when I visited the Soviet Union, wherever I went—Moscow, or central Asia, or the wilds of Siberia—people talked to me about peace, expressed their fear of war, and asked why we planned to attack them.

It is hard for us Americans to believe that the Russian people think the threat of war comes from us. But the propaganda has been constantly dinned into them that our Government is controlled by a small industrial clique, and this clique wants war for profit.

When President Eisenhower gives his message of peace and friendship, it will reach the hearts of tens of millions of Russians.

Peace with the United States is the message the Russian people want to hear, and President Eisenhower is the one living man who can give it convincingly.

DECLARATION OF CONFIDENCE AND SUPPORT BY WESTERN GOVERNORS' CONFERENCE, SEATTLE, WASH., MAY 18, 1960

Resolved, That the Governors of the Western Conference declare their strong and wholehearted support of the President of the United States in his dignified and unyielding response to the ignoble and outrageous demands of Chairman Khrushchev. We express our hope that the obstacles placed by Mr. Khrushchev in the path of discussion of grave international issues at the summit can be overcome by the leaders of the free world in furtherance of our deep desire to build a world where all peoples can live in freedom and justice, peace and dignity; unmolested and unafraid.

Gov. Grant Sawyer, of Nevada; Gov. William F. Quinn, of Hawaii; Gov. Albert D. Rosellini, of Washington; Gov. Mark O. Hatfield, of Oregon; Gov. Edmund G. Brown, of California; Gov. George Dewey Clyde, of Utah; Gov. John Burroughs, of New Mexico; Gov. J. J. Hickey, of Wyoming; Gov. William A. Egan, of Alaska; Gov. J. Hugo Aronson, of Montana; Gov. Robert E. Smylie, of Idaho; Gov. Stephen L. R. McNichols, of Colorado.

Mr. MANSFIELD. Mr. President, I listened with interest to what the distinguished minority leader had to say about a speech by the two-time candidate of the Democratic Party, Mr. Adlai Stevenson, which speech was given in Cook County, I believe, last Thursday. Evidently the minority leader thinks that a man high in party councils should remain quiet when, in all good conscience, he perhaps feels a deepening disquiet.

It appears to me that so far as the Democratic leadership is concerned there will be an inquiry, which I understand, from reading the press reports today, has the tacit support of the minority leader.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. DIRKSEN. One of our distinguished correspondents grabbed me this morning as I was coming into the Capitol and began to ask about a possible investigation. I think I qualified my remark by saying, "If there is going

to be an investigation," that probably the Foreign Relations Committee might undertake it.

I begin to have some doubts about the merit of an investigation, when we are dealing with such a sensitive matter as the whole intelligence system of this country. Once that door is opened, I doubt whether it will be closed again. Then who shall say what will be the repercussions?

So my statement was a qualified statement.

Mr. MANSFIELD. I accept the Senator's statement, and of course I believe it. I was simply referring to a ticker tape report which indicated that if an inquiry were to be held the Foreign Relations Committee was the place to hold it.

It happens that after every international conference of any significance the Secretary of State and other interested individuals almost always appear before the Committee on Foreign Relations and gives the committee a report. Although my knowledge comes from press reports, I understand from that source that there may be a suggestion tomorrow, when the Committee on Foreign Relations meets, that it conduct not an investigation but instead an inquiry, to furnish an opportunity for many interested Senators to raise questions which have been bothering them.

Speaking about questions, I dare say there is not a Member of this body on either side of the aisle who does not have at least one question which he would like to have answered.

If the inquiry is forthcoming, I wish to express the hope, as I have previously expressed it, that it will be an inquiry based upon the facts, that it will not become a political football and will not become such a campaign issue that the welfare and the unity of the country may well be lost in the shuffle.

I think Mr. Stevenson had the right to make the kind of speech he made. I do not think that speech is going to disrupt national unity. I would invite the attention of my colleagues to the fact that we still live in a free country and that we still have the right to express our opinions as we see fit. As a responsible official of the Democratic Party I can find no fault with Mr. Stevenson for making his honest views known in a speech in Cook County.

The minority leader has mentioned the fact that a story, so called, came out during the course of the summit conference, or prior thereto, in which Mr. Stevenson said something about the fact that he hoped the nuclear test ban negotiations would continue. Well, I hope they will continue, also, because I think what happens at Geneva in regard to the ban on nuclear testing is going to have a great effect not only upon this country, but also upon mankind as a whole.

The minority leader said that Mr. Stevenson advocated a reduction in U.S. forces in Berlin from 11,000 to 7,000. I do not desire to be picayunish, I assure the Senator, but it is my understanding that the forces of the three Western Allied Powers in Berlin are comprised roughly of 11,000 men, and the American forces comprise something on the order of 4,000 to 5,000 of the total.

The third thing with which the story seems to find fault, on the part of Mr. Stevenson, is the fact that he advocated consideration of the Rapacki plan, by means of which there might be created a neutralized zone in middle Europe. Others of us have advocated that, also. I have advocated consideration of the Rapacki plan, the Eden plan, and the Gaitskill plan, with the proviso that there be a quid pro quo in return before anything definite is done along these line. I see nothing wrong with that.

I can understand the opposition of the Republican Party to what Mr. Stevenson has said, because, frankly speaking, I think the Republicans look upon him as a possible presidential candidate. He may be. He may not be. This is one way of anticipating something in advance.

However, I find it extremely difficult to understand why Democrats should go out of their way to find fault with Mr. Stevenson for expressing his honest opinions. Some of them, in effect, want to "read him out" of the party. He will not be "read out" of the party, because he has made many contributions to our country in the past, and I anticipate he will make many more in the future.

Some people say, "Well, Mr. Stevenson is going to be our next Secretary of State." He may well be. I have heard the names of Mr. CHESTER BOWLES and of the Senator from Arkansas [Mr. FULBRIGHT] mentioned in that respect, also. That is a matter which will be determined by the next President, if he is a Democrat. If he is not a Democrat, we may rest assured that none of these three will be appointed. If the next President is a Republican, of course he will have to make his own decisions.

The reference to the 6 to 8 months, laid down by Mr. Khrushchev in the hope that a new administration will come into power, carried the implication by the distinguished minority leader that if the new President happened to be a Democrat, and most specifically if he happened to be Mr. Stevenson, things were going to be easier, that we were going to be "softer." Well, I do not think we are the ones who have been "soft" on communism, to revive an old Republican phrase. We did not invite Mr. Khrushchev to America. Mr. Khrushchev never invited a Democratic Presidential candidate to visit him in the Kremlin.

I do not know what Senators mean when they say that, because of the statement made by Mr. Khrushchev that 6 or 8 months would be time enough to hold another conference, if a Democrat is to go to such a conference it would indicate a sign of softness. It is hard for me to follow that reasoning.

I would advise my Republican colleagues, if I may, not to look too far ahead and not to arrive at too many assumptions too early.

I think we ought to find out something about the crowbar and something about the sledge hammer, and the place to find out about these articles and the place to raise these questions is in the Committee on Foreign Relations.

We have the Foreign Relations Committee to look into matters affecting the foreign policy of the United States; and what has been affected is the foreign policy of the United States. Mr. President, I have never heard of a statement attributed to another outstanding presidential candidate, the Senator from Massachusetts [Mr. KENNEDY] to the effect that he advocated apologizing to Mr. Khrushchev. I do not know of any Democrat who has ever at any time advocated apologizing, publicly or otherwise, to Mr. Khrushchev. The Senator from Massachusetts will return to the Senate shortly, and I am sure he will take care of himself in that respect.

In respect to the interview, it is my understanding that Mr. Stevenson stated, as soon as the news of this interview broke, that he had had nothing to do with it, and that he did not give an interview of that nature, but I cannot vouch for that, because I am calling on memory, and going back to the public print.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I wish that the Republicans would let us take care of our business and that they would take care of their own business, but let us together take care of the Nation's business.

Mr. DIRKSEN. Mr. President——

Mr. SCOTT. Mr. President——

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. MANSFIELD. I yield to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I try always to be careful about documentation. Everything I have said this morning has a documentary article to support the statement. The interview in Paris was pretty lengthy. It was a translation of an article by special correspondent Robert Boulay. The heading is "I Passed the Afternoon With the Possible Successor to Mr. Eisenhower—Adlai Stevenson Told Me, 'The Americans Must Quit Berlin and Europe if They Wish To Achieve Atomic Peace.'" That is the headline. It has a Chicago dateline, and after the introductory portion the interview was on a question and answer basis. It is all here. It was done at Adlai Stevenson's home at Libertyville, Ill. It must have appeared in the Paris newspapers because there is no more reputable foreign correspondent than Bill Stoneman on the Chicago Daily News foreign staff. He commented on it. David Lawrence also commented on it. I shall leave the entire question and answer statement to speak for itself as to precisely what Governor Stevenson said.

Then, of course, there is the factor of timing. The article hit the papers on the day Khrushchev got to Paris, and he had to read it, because he gave himself away in East Berlin when he mentioned that Adenauer had been our Secretary of State for 7 years, and that is precisely what Adlai Stevenson said to Robert Boulay at Libertyville, Ill. It would be amazing indeed to have words flowing out of two different mouths

3,500 miles apart, each individual being insensible of what the other said.

I have only one further comment to make, because I do not want to preempt the floor. My distinguished friend from Montana [Mr. MANSFIELD] said we had invited Mr. Khrushchev here. That is correct. We had invited Mr. Koslov. We had invited Mr. Mikoyan. We got them on the "home diamond." But I can remember another period in the history of this country when the President of the United States went to Yalta and when he went to Teheran, to their orbit, rather than have them here, and so it was much better to have them on the "home diamond." But all the articles are there and all the quotes are there; they must speak for themselves, including the estimate of the whole matter uttered by a very distinguished Democrat, James A. Farley, of New York.

Mr. BUSH. Mr. President——

Mr. MANSFIELD. Mr. President, as I understand, what the distinguished minority leader has just said is that Mr. William Stoneman, a very reputable journalist, did write a story on this matter, but is my understanding correct that he got the story from a story carried in a Paris newspaper?

Mr. DIRKSEN. Exactly so. He saw it in the Paris newspaper, and sent a dispatch to the Chicago Daily News. That was the only reference I saw to it until these other developments arose.

Mr. MANSFIELD. May I ask one question: Did Adlai Stevenson deny the interview?

Mr. DIRKSEN. I have not heard him deny it.

Mr. MANSFIELD. Did the Senator read it? I read a report that he denied it.

Mr. DIRKSEN. It would be amazing indeed if a correspondent for a French newspaper could journey all the way to Libertyville, Ill., in the northern section of the State, and say he was there with other correspondents, and then to reduce to question-and-answer form, with interpolated comments, this kind of statement.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. SCOTT. Mr. President——

Mr. SYMINGTON. Mr. President——

Mr. MANSFIELD. I yield to the Senator from Missouri.

Mr. SYMINGTON. Mr. President, while I was in the Middle West, I read a report in the press that Mr. Stevenson denied having given the interview in the way it was presented by the French journalist. He said that the French journalist's English was wrong, that he again wanted to deny the assertions made in the story by the French writer. I do not have that denial here at this time, but I ask for unanimous consent that Mr. Stevenson's statement in the press as I read it be inserted at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STATEMENT BY ADLAI E. STEVENSON ISSUED TO PRESS MAY 18

My recollection is that the young man was brought to my home by friends. I never give exclusive interviews without request. And he would not have received one had he asked in such circumstances.

As I recall, he wanted to discuss all of the problems of Europe; and evidently confused discussion with opinion.

What he reports me as saying have, of course, never been my views and are not my views today.

The most charitable explanation of such irresponsibility, presumption, and discourtesy is that his English was poor and my French no better.

Mr. MANSFIELD. Mr. President, I yield to the Senator from Connecticut. Before I do so, I wish to say I am very happy to see so many Republicans in the Chamber at this very early hour, and also so many Democrats. But I was caught cold, and I believe we were all caught cold, by what the distinguished minority leader said this morning, so if I can find some documentation, I shall try to get it later and put it in the RECORD, because I know the Senator from Illinois would be delighted to have it there.

Mr. DIRKSEN. Indeed I would.

Mr. BUSH. Mr. President, I was glad to hear the Senator speak on the subject of an inquiry by the Senate Foreign Relations Committee. What concerns me very much about such an inquiry is the question whether it would be held in executive session by the Senate Foreign Relations Committee.

Mr. MANSFIELD. May I say to the Senator from Connecticut that I did not make a request for an inquiry, though I have stated on this floor that at the proper time the questions should be asked, and in the course of that earlier statement I stated as my belief that any queries of this kind ought to be held in private, that they should not become the subject of political controversy. I am very happy to read in this morning's paper that a Member of the Senate on the other side of the aisle, the distinguished Senator from the State of New York [Mr. JAVITS], indicated that he thought it would be worth while to have an inquiry at this time, one conducted by the Foreign Relations Committee.

Mr. BUSH. Mr. President, let me observe, in conclusion, that I am very glad to hear the acting majority leader speak of this matter in this way. I assume that such an inquiry would have his support, and that any inquiry into the entire business of the U–2 incident and subsequent developments would be in executive session and of a private nature. I express the very urgent hope that that will be the case, because, as the acting majority leader himself said a few moments ago, we are dealing with a very sensitive subject, a very sensitive situation, in which not only our own security, but the security of the whole free world and that of our allies, is involved. Whatever the temptation may be, I do not believe that this subject should become a political football. I believe that if Senators or other political leaders have something to say on their own responsibility, they have, as the acting majority leader pointed out, the right to say it if they wish to take the consequences. But because of the overall seriousness of the whole situation and the sensitiveness of it, I believe that Members of the Senate, who are all responsible men, should not engage in a public inquiry into this subject which might imperil our position, because we are not in a position to afford that kind of a wild goose chase, so to speak. I compliment the acting majority leader for the position he has taken upon that issue.

Mr. MANSFIELD. Mr. President, I do not wish to have any misunderstanding about my position. I express the hope that we will act responsibly. I have expressed the hope, and I again express it, that this matter may be kept as far out of politics as possible, because if we do not know by now the precarious and delicate situation we are in, we will never know it. I hope no one has the idea that the "summit that never was" turned out to be a victory for us. If so, let him disabuse his mind completely. It was anything but a victory. We had better recognize that fact and remember that in this day and age in which we live, if things go too far, there is going to be no differentiation between a Democrat and a Republican. So I hope that we will act together in the interest of our country, not in the interest of a particular political party. I now yield to the Senator from Maryland.

Mr. BUTLER. Mr. President, I thank the Senator for yielding to me. I have a brief statement to make in connection with the proposed investigation.

Mr. SCOTT. Mr. President, will the Senator yield to me first?

Mr. BUTLER. The Senator from Montana has yielded to me. I have the floor.

The PRESIDING OFFICER. The Chair understands that the Senator from Montana has the floor.

Mr. BUTLER. I thought the Senator had yielded to me to make a brief statement.

Mr. MANSFIELD. I have yielded to the Senator for that purpose.

Mr. BUTLER. Mr. President, it has been most revealing to observe the increasing number of politicians who have been eager to cry "Me too" about the U–2. In their eagerness to gain a few headlines and perhaps votes, they have muddled and muddied the events of the last few weeks so that the U–2, the summit, the events prior, during, and after have all been thrown together into an incredibly tangled mass. Now the cry has gone up for investigation by a committee of the Senate.

Mr. President, no matter how sincere and impartial the gentlemen of any such committee might be, their actions and their words will be turned into political ammunition for the coming election. It might even be that some of these gentlemen are well aware of this at the present time and that their interest in an investigation is not so impartial. Indeed, the Democratic advisory council has cleared summitry as an issue in a statement made public today.

That statement is filled with the most intemperate and ill-considered remarks. For example, "The foreign policy of the Eisenhower-Nixon administration is a shambles." Or "It has become obviqus

that the operations of the Government of the United States in its most important areas are chaotic." Or "During the first 2 weeks of May 1960 the foreign policy of the Eisenhower-Nixon administration collapsed." Perhaps it is not necessary to point out the obvious, but it is a fact that the party of the majority of the proposed investigating committee and of the advisory council I have just been quoting are one and the same. Can one operate without being influenced by the other? I think not.

As the cry for investigation of the U–2, of the summit, of the CIA, of every person and agency connected with our foreign policy goes up, I would like to raise this question: Does the legislative branch have the authority to investigate the Executive? I think not. Foreign policy is the responsibility of the executive branch. The State Department, the CIA, and all the other agencies of our foreign policy division are responsible to the President and to the President alone.

If the Democratic advisory council and the majority of this Senate are dissatisfied with what has happened in the last few weeks and want to do something about them other than engage in a debate, I believe they have two paths open to them.

One, they may impeach the President for giving a sledge hammer and a crowbar to Mr. Khrushchev with which that most sincere and peace-loving individual wrecked the summit conference. If they believe that the President has been derelict in his duties as the Chief Executive and as the Commander in Chief of our Armed Forces, let them start impeachment proceedings against him, or let them stop their ridiculous talk about investigating the President.

There is a second path open to the experts in hindsightmanship, those who are now howling and wringing their hands about what happened in Paris. They may work to convince the American people to vote against the present administration. Those are the two alternatives and the only alternatives.

Mr. President, I am not suggesting that we should not have debate on this issue. I believe that there should be long, serious, and dignified discussion of the U–2 and the summit. But a full and open committee investigation of these issues with television, radio, and newspapers blowing it up to the best of their considerable ability and skill would provide nothing but the most grotesque and meaningless Roman circus.

Criticism does not weaken a country, Mr. President, but selfish vindictive exploitation always does.

Mr. President, I would be the very last Member of this body to argue that we did not make some errors in the handling of the U–2 incident. But it would be well in the present atmosphere to remember that there are positive sides to this issue.

One, the U–2 proved that the United States is able to engage in the most difficult and demanding espionage for as long a period of time as 4 years without being publicly discovered. Two, the U–2 penetration to a distance of 1,300 miles into the heartland of Russia proves the ineptness and inability of Soviet air defenses. No wonder Mr. Khrushchev lost his temper and his control in Paris—he was revealed as the leader of a nation unable to defend itself against unarmed reconnaissance nonjet airplanes.

Mr. President, let me make myself absolutely clear. I am not against discussion and debate of the U–2. But, I am against investigation because I believe it to be unconstitutional and because its proceedings and consequences would end in a severe schism of the American people when we must all stand united.

If there are those who believe the events of the past few weeks to have been wrong, let them use the constitutional and electoral means at hand to set right such wrongs. But let them not raise a political banner and ask Americans sincerely concerned about the future of this country and the free world to follow them.

These are not easy times, Mr. President. Times of crisis never are. It is my sincere hope that the critics of the administration will not attempt to follow the easy way and blacken every issue and every action of the last several weeks with mud. Cries of blunder will not lead us to victory in the fight against communism, Mr. President, but into confusion and mistrust of each other. Let us fight together—not against each other.

Mr. MANSFIELD. Mr. President, before I yield to the Senator from Pennsylvania, I should like to say that I am delighted that the Senator from Maryland recognizes that criticism has a valid part under our system of government. Speaking only for myself, I would say that, so far as I am concerned, I do not wish to see a propaganda field day made of such a delicate situation. I now yield to the Senator from Pennsylvania.

Mr. SCOTT. Mr. President, in order to throw a little light on whether or not Mr. Stevenson did or did not give the interview, it should be noted that an article appeared in the Paris Press-L'Intransigeant of Sunday-Monday May 15–16, 1960. Mr. David Lawrence, in his article published in the New York Herald Tribune of May 23, states:

> Mr. Stevenson last Tuesday denied ever having given any interview at all to any Paris newspaper. But he issued a statement to the Chicago Daily News the next day admitting that he had talked with Robert Boulay but calling the published interview incorrect.
>
> He said it did not represent his views and that the most charitable explanation of such irresponsibility, presumption, and discourtesy is that his English was poor and my French was no better.

Others, however, have noted, as appears in Mr. Stoneman's article, that:

> In Paris, however, Americans who know Mr. Boulay say he writes and talks English very well and is a reliable reporter.

This interview has, in my mind, the Stevensonian touch, to which has been added, I should say, and as Mr. James Farley has referred to it, the Stevensonian umbrella instead of the Democratic mule.

Mr. Stevenson joined Senator KENNEDY in the role of hindsight heroes; and if there is any question as to whether Mr. Stevenson gave this interview to Mr. Robert Boulay, I suggest that the appropriate committee of the Senate, either in executive session or in open session, request Mr. Boulay to appear in this country and request Governor Stevenson to appear, and let us have noted whether or not Governor Stevenson advocated the withdrawal of American forces from Europe, as he puts it, at some time in the future; an immediate reduction of forces in Germany; and concessions to Khrushchev all along the line; together with the statement that there would be important changes in American foreign policy next year; and the statement that "the real American Secretary of State has been German Chancellor Adenauer."

I might also add, in connection with the statement of the distinguished Senator from Massachusetts [Mr. KENNEDY], as reported in the Portland Oregonian, that the Senator himself said:

> Khrushchev laid down two conditions to President Eisenhower for going on with the summit meeting. One was to apologize. I think that might have been possible to do.

Then the quotation goes on to other matters. The report in the Oregonian is that:

> Later KENNEDY modified the word "apologize," and said the President might "express regret."

It is my hope that neither the distinguished Senator from Massachusetts nor that other candidate for the Presidency, Governor Stevenson, will—either one of them—brand himself as a "turnquote." It is my hope that they will relieve themselves of the curse of suspicion of appeasement, and it is my hope that the unity, which started out so well in support of the President and in support of the administration, may somehow be found again.

But as Mr. Farley has so well said, he has no part in the appeasement process as exemplified by the unfortunate statement of Governor Stevenson.

Mr. MANSFIELD. Mr. President, I may say, in reply to the Senator from Pennsylvania, that I think he is doing a disservice to the country when he puts words in the mouths of Stevenson and KENNEDY which were never uttered. The idea of calling those men appeasers. What does he mean, "appeasers"? Both of them served their country in times of emergency. Stevenson was an apprentice seaman in the First World War; JACK KENNEDY was a PT-boat commander in the Second World War. Does the Senator from Pennsylvania call those men appeasers? What kind of tactic is this? I thought we were trying to keep this matter out of the field of politics. Why does the Senator from Pennsylvania pick on those men? Why put those titles and those names upon them? They are not appeasers, and the Senator from Pennsylvania knows it. They are good, decent, honest, upright Americans, and should be so considered by everyone.

Mr. SCOTT. If the Senator from Montana will yield, I did not ascribe to them the word "appeasers." I said they had an opportunity to divest themselves

of reference to appeasement, as exemplified by the statement of Mr. Farley.

Mr. MANSFIELD. The implication is clear, and the term "curse of suspicion" was used.

Mr. SCOTT. If they are appeasers, let the record speak for itself. If they are not appeasers, let that record speak for itself. But above everything else, let us find out whether Governor Stevenson made the statement he is reported to have made; and let us find out whether Senator KENNEDY made the statement reported and attributed to him.

Mr. SYMINGTON. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield to the Senator from Missouri.

Mr. SYMINGTON. Mr. President, I think the remarks which have been made by the Senator from Pennsylvania [Mr. SCOTT] with respect to the character and the patriotism of Governor Stevenson and Senator KENNEDY are most unfortunate. I am consoled by the source from which they came.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. SCOTT. Mr. President, I rise to a point of personal privilege.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. MANSFIELD. I yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, it seems to me that if we shoot off any more fireworks around here, we will not have any left for the Fourth of July. Our job now is to make certain that we will have the Fourth of July from now on, and that we have the right to celebrate it. It may be all right to shoot off fireworks, but I think we are shooting them off too close to the gas works to be helpful.

Like others, I have no doubt that Mr. Stevenson might have spoken rather indiscreetly in his speeches. He appears to be one of the ever-hopeful variety, so perhaps we should accept his remarks in that sort of hopeful atmosphere.

I, myself, do not regard Mr. Stevenson as being representative of more than one section of the Democratic Party. I think Mr. Farley represents another viewpoint within that party. Perhaps the Senator from Texas [Mr. JOHNSON] may represent an element greater than the others put together. At least, that is what has been said. Whatever position they have to take, they probably have the right to take it.

However, in view of all the verbal fireworks which have taken place, both on the Senate floor and around the Nation, during the last few days, it appears to me that we have gone too far not to have a discreet, judicious, and careful inquiry into the events of the last 2 or 3 weeks, in the hope that we may fill in two or three gaps in our information. I do not see how this type of inquiry can hurt anyone. I should think it might prove helpful in the long run. I intend to be present, if that inquiry is made by the Senate Committee on Foreign Relations, which is the place where it should be made, to see that there is no unfairness during the proceedings.

If we undertake to suppress an inquiry now, it will look to the world as if we really had something to cover up. I do not think anyone wants to do that. I do not think we have anything to cover up.

I think Mr. Khrushchev got himself on one wonderfully hot spot, and he had to have time—6 or 8 months, or, heaven knows, probably more than that—before he could get off the hot spot, and get out from under the various pressures which have been bearing down on him, and which made him scuttle the conference. I do not say he did not want to scuttle it anyway, but certainly he came to the conference intending to scuttle it, one way or another.

It has been said by the Senator from Montana [Mr. MANSFIELD], though I do not think it was said exactly in that way, that an ICBM certainly cannot tell the difference between a Democrat and a Republican. Even the IBM has not gotten to the point where it can do that yet, simply by having a person walk past a machine. Certainly an ICBM—an intercontinental ballistic missile—could not tell any difference between us, should the point be reached where any enemy might see fit to use it against us.

We have a common job now. It is to assure the security of the United States, and to make every endeavor we can to lessen international tensions, and to lessen the risk of international conflict, which would be so terrible to contemplate that we should not be thinking of getting even with each other. We ought to be getting together, to make certain that the United States will not face any cataclysm in the future. I do not think we will have to face one, but I think it is important that we work together; that we find some other issues for November; and not concentrate on something which may prove injurious to all of us on the international scene.

I simply want to make certain that we have the right to shoot off fireworks on Fourth of July, and that we will celebrate the Fourth of July for a long, long time to come.

Mr. MANSFIELD. Mr. President, in response to what the senior Senator from Vermont [Mr. AIKEN] has just now stated, I wish to say that, as always, in a few words he reaches the heart of the matter. I think his statement is one to which all of us—Democrats and Republicans alike—can subscribe.

I wish to assure the Senator from Vermont and the Senate that, so far as I am concerned, there are no political implications and there is nothing picayunish in my attitude. But there is a desire to find the answers to some questions. In seeking those answers, I hope we try to avoid personalities and not raise charges or strawmen against persons such as the Senator from Massachusetts [Mr. KENNEDY], who is not now in the Chamber, to defend himself, or against Adlai Stevenson, who—like every other American—has a right to state his views. After we find the answers, if there then are criticisms, they can be answered.

I only hope that the next time something of this sort occurs, we shall have a little prior notice.

Mr. DIRKSEN. Mr. President——

Mr. MANSFIELD. I yield to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I had no prior notice of the Stevenson speech.

Mr. MANSFIELD. It was made last Thursday.

Mr. DIRKSEN. And generally I have no prior notice of the statements which from day to day are made on the floor of the Senate. Therefore, I usually find myself in the same dilemma in which the acting majority leader now finds himself.

The other point is that today, with the acceleration of events, it becomes difficult to document one's speech. I try to document the statements I make; I endeavor to state for the CONGRESSIONAL RECORD, as a part of my remarks, the sources and every document and every report. That was the reason for what I said.

I make this final comment: I am unhappy when this matter gets into the political field or in the newspaper headlines. The headlines in the newspapers, particularly those in the Midwest, were printed in very large letters, "Adlai Charges Use of Crowbar"—or something to that effect. Obviously, we cannot "blink" it, because public opinion begins to be manufactured in exactly that way, and that is not conducive to unity.

Last week, when the majority leader made such an excellent statement, here on the floor, he mentioned the fact that the distinguished junior Senator from Arkansas [Mr. FULBRIGHT], the chairman of the Senate Foreign Relations Committee; Governor Stevenson, the titular head of the Democrat Party, and twice its candidate for the Presidency; the Speaker of the House of Representatives; and the majority leader had signed a cablegram which was sent to the President, in Paris; and I said it was a refreshing note, and I was delighted to see it.

But one has to take judicial notice when a former candidate for the Presidency—who, first of all, is watched with interest and, second, travels about South America, Europe, Asia, and elsewhere, and confers with the foreign leaders—makes such a statement. How can one "blink" it? One has to take account of it. I was only taking judicial notice of what I have seen; and what I was able to put in the RECORD today was by way of documentation. Obviously, I am always contented to let that speak for itself.

Mr. MANSFIELD. Mr. President, I was not being serious when I said I hoped we would receive a little prior notice the next time an incident of this sort occurs, because I recall that I have asked very serious and delicate questions of the minority leader, without giving him prior notice. I appreciate what the Senator from Illinois has said.

Mr. FULBRIGHT. Mr. President——

Mr. SCOTT. Mr. President, I rise to a question of personal privilege.

Mr. FULBRIGHT. Mr. President, I shall not long detain the Senate.

I regret that I was not in the Chamber at the beginning of this debate. I had no idea that attacks of this kind would be made at this hour on Monday.

Last week, in response to an inquiry in regard to the Foreign Relations Com-

mittee, I stated that it is customary for the committee to hold briefings and hearings on matters of importance. I think that, without exception, following every international conference which has been held since I have been here, always upon their return the Secretary of State and others have come before our committee, to inform it and, through it, the Senate and the Nation. I see nothing irregular about that. I think it entirely in order.

I am a little surprised that Members of this body on the other side of the aisle would be so aggressive about this particular matter. It seems to me something must be hurting their conscience, and they seem to be counterattacking before any attack is made. No one has attacked anyone, so far as I know—that is to say, no one in this body. People outside, who have their impressions, can say what they like, for ours is a free country.

I do not know enough about all the background and the reasons and the explanations of the various statements made preliminary to the final breakup of the conference, to be able to reach any final conclusion. That is why I think a study and an inquiry by the Foreign Relations Committee is in order.

I propose, tomorrow morning, at the regular meeting of our committee, to submit this question; and I hope that after thorough discussion, the procedure the committee will follow will be agreed upon. I expect the procedure of the inquiry to be agreed upon by the members of the committee of both parties, because it is entirely in order, and follows the usual precedent, which I believe always has been followed in the past, when anything of importance in the international field has occurred.

I do not think it promotes the effort to keep this matter on a nonpartisan plane, to indulge in such acrimonious attacks here on the floor of the Senate on leading Members of either party—and, in this case, on Members of my party. I think it is most unfortunate; and certainly it is premature, because I do not believe any one of us is now able to arrive at firm and final conclusions in regard to the very tragic event which occurred last week, in Paris.

The only advice I gave to some of my friends of the Republican Party was that I hoped they would not try to pretend that what happened at Paris was a great triumph. I said that if that were done, necessarily it would call for rebuttal. I said I hoped we would soberly approach this matter, in a serious endeavor to determine, first, what happened; and, second, the practices and procedures which have grown up in our Government. I do not mean only the practices and procedures in the executive branch; I think the Congress itself has much to learn in this field, and I believe there are ways and means by which our procedures can be improved. Last year, the Foreign Relations Committee suggested ways which I think would have been a great improvement; and from time to time other Senators make similar suggestions. Certainly I do not believe that either the Congress or the Executive has perfected its methods of dealing with these very complex matters.

So I believe that the purpose of the proposed inquiry is, in the first place, to understand just what has happened; and, in the second place, if the circumstances call for it, to make some changes, in order to tighten up the administration.

But I believe the worst thing, from the national point of view and from the point of view of the welfare of the Nation, would be to pretend that we have experienced a great triumph, and that nothing need be said about what happened. Everyone knows what happened is a great tragedy for the entire world. Who is to blame, and so forth, is a subject of legitimate inquiry.

But at the moment I do not wish to indulge in a debate attacking Members of my party or Members of the other party. At this point, I believe that would be quite premature.

However, if, following inquiry, there are found to be reasons for criticizing the conduct of our policies, then, of course, it will be our duty to do so; and I do not believe that any plea for unity should foreclose any justified criticism based upon an inquiry which is held in a sober and responsible manner.

I am confident that the members of the administration, including the Secretary of State, have no objection at all to coming before the Foreign Relations Committee and giving their explanation of what happened. That is appropriate. That is what Secretary Dulles did. That is what Secretary Acheson always did after international meetings. He came before our committee and explained what happened, his reasons why, and his point of view. Then it was up to us to draw our own conclusions therefrom. That is the way I expect to proceed now. I think it will be beneficial at the proper time to make a report or observations or, if conditions warrant it, a criticism of the way things have been handled.

In the meantime, I think we ought to be careful in what we say, and ought not to inflame anyone's thoughts, and make sure we do not lose a sense of objectivity in forming our judgment on what the facts are after we develop them in a proper inquiry.

I do not propose at this time to pursue this debate on the substance of the speeches or what happened in Paris.

Mr. SCOTT and Mr. YOUNG of Ohio addressed the Chair.

Mr. MANSFIELD. Mr. President, I yield first to the Senator from Ohio. Then I shall yield to the Senator from Pennsylvania.

Mr. YOUNG of Ohio. Mr. President, may I say at the outset, I completely agree with the statement made today by the distinguished Senator from Montana [Mr. MANSFIELD], the acting majority leader, and I admire very much the statement made by the distinguished Senator from Arkansas [Mr. FULBRIGHT], chairman of the Foreign Relations Committee. I agree with him. Certainly, the distinguished Senator from Vermont made a very moderate and very wise statement with which all of us can agree.

Mr. President, unfortunately for President Eisenhower, and also unfortunately for the American people, the law of averages caught up with our President. His good luck over the years seemed to have deserted him, and at a time when he needed it most.

Without a doubt, President Eisenhower hoped to end his administration in an aura of peace and good will. He had been the supreme commander of the greatest army ever gathered under the bending sky of God. He had hoped that the high point and final public service in his life would be that, as Chief Executive of the United States, he would be regarded by future historians as a peacemaker. He even envisioned himself as the father of permanent peace. Instead of that, he returned from Paris to Washington at a time when the increased tension in the cold war between this Nation and the Soviet Union has become more violent. In fact, he returns at a time when that relationship between our two nations could not become much worse, except by the temporary ending of diplomatic relations on the part of one or both nations.

He himself did not cause this situation. Inept officials in his administration created an appearance of saber rattling and jingoism that President Eisenhower had wished to avoid.

President Eisenhower, from the time of his 1952 campaign for election—that "clean as a hound's tooth" campaign—has placed an accent on teamwork on the part of all his associates. Morality has been glorified, as is entirely proper, yet, in an emergency that occurred due to the downing of an American reconnaissance plane far within the territory of the Soviet Union, American people—and in fact, peoples the world over—were given conflicting and utterly false statements by administration officials in authority in the United States.

Leaders of friendly nations were startled over the muddleheaded, mentally inert, and inept handling of the controversy by administration officials over the downing of this plane.

American prestige throughout the world dropped, and no one is to blame more than officials of the Eisenhower administration.

Doubtless, President Eisenhower himself must share in the responsibility. It appears he failed to know personally details of the work of our Central Intelligence Agency. It may be that had he been an alert, active, strong President, he would have been in constant touch with the actions and activities of all administrative agencies and in position to hold in check any which directly or indirectly acted in violation of the law and customs of nations.

Apparently the President had no knowledge that our U–2 plane penetrated behind the Iron Curtain in an aerial reconnaissance and was approximately 1,300 miles within the borders of the Soviet Union a few days before the last Big Four summit conference meeting to be held during his administration.

What should have been feared, occurred. This resulted in a propaganda

victory for Premier Khrushchev, who instantly, violently, and unmercifully pushed his advantage to the uttermost. Leaders of friendly nations were shocked and our Chief Executive was humiliated by the tongue lashing from Premier Khrushchev brought on by the failure of his trusted subordinates.

It is true President Eisenhower endured with dignity and restraint a vituperative face-to-face tongue lashing from the Communist Dictator Khrushchev. Personally, I would prefer a President who would have lashed back instantly and forcefully with some blunt, uncensored Texas, Missouri, or Massachusetts language and plain spoken epithets.

Mr. President, I assert that what seems to be the Eisenhower concept of the Presidency of the United States, frequently by remote control from Augusta and Gettysburg, and frequently altogether at the discretion of subordinates, is not sufficient for 1960 and this grim period of international anarchy.

Operating the Presidency on a part-time basis and not in the personalized manner of Abraham Lincoln, Theodore Roosevelt, Woodrow Wilson, Franklin D. Roosevelt, and Harry Truman, removed President Eisenhower from key decisions and left our allies and our own citizens, even President Eisenhower himself, in a state of uncertainty about what was going on.

In addition, Secretary of Defense Gates calling the alert of the Armed Forces for Sunday, May 15, was an extraordinarily reckless act. Bear in mind, Sunday, May 15, was a bitter day for us. A mischance had occurred. Blunder was compounded upon blunder. The tension of the cold war between the Soviet Union and this Nation was increased.

The slogan of peace and prosperity was not being uttered in even the softest whisper. This was the hour and day picked by Secretary of Defense Gates for an exercise to parade the armed might of this Nation before the world. This, added to false statements and deceit and the confusion of a right-about-face statement, plus a bristling declaration that invading the air over the Soviet Union was necessary, plus an inference that this practice would be continued—all of this was just a little too much.

Then, a little too late, came the statement backing down on the previous statement that aerial spying would be continued. This despite the fact that the Vice President had publicly reaffirmed the policy of continuing aerial reconnaissance.

Mr. President, we can truly say that these have not been our proudest hours.

I thank the Senator from Montana for yielding to me.

Mr. MANSFIELD. I yield to the Senator from Pennsylvania.

Mr. SCOTT. Mr. President, would the Senator from Montana at this time consider yielding the floor?

Mr. MANSFIELD. Does the Senator have in mind raising a question of personal privilege?

Mr. SCOTT. No, I do not.

Mr. MANSFIELD. Because, if the Senator did, I wanted to read rule XIX.

Mr. SCOTT. If the Senator does that, he may force me into raising a point of personal privilege. I hope not to be pressed into doing so.

Mr. MANSFIELD. I had understood the Senator was going to rise to a point of personal privilege, but I understand now he is not, and therefore I am delighted to yield to him.

Mr. SCOTT. I thank the Senator from Montana.

Mr. President, am I recognized in my own right?

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SCOTT. I thank the Chair. I had originally planned to raise the point of personal privilege, because I wished to make it crystal clear that I did not at any time, nor have I ever at any time, impugned the patriotism of any other Member or of any candidate for the Presidency, and I do not now impugn the patriotism of any Senator, or of Governor Stevenson, whose recent unfortunate remarks have infuriated a good part of our Nation.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. SCOTT. If I may do so briefly, I am glad to yield.

Mr. SYMINGTON. My remarks will be very brief. I thank the Senator from Pennsylvania.

The statement issued by Gov. Adlai Stevenson was issued to the press May 18, and I shall quote it.

> My recollection is that the young man was brought to my home by friends. I never give exclusive interviews without request. And he would not have received one had he asked in such circumstances.
>
> As I recall, he wanted to discuss all of the problems of Europe; and evidently confused discussion with opinion.
>
> What he reports me as saying have, of course, never been my views and are not my views today.
>
> The most charitable explanation of such irresponsibility, presumption and discourtesy is that his English was poor and my French no better.

I thank the Senator.

Mr. SCOTT. Mr. President, if the Senator from Missouri had been on the floor—or, if he was on the floor and had been paying attention—he would have heard me read several times part of that statement myself. I added that Mr. Boulay, among those who know him, is known to speak English very well, and therefore is presumed to be able to understand English when it is addressed to him.

I further suggested that the way to clarify this matter is to have the testimony of Mr. Boulay and to have the testimony of Governor Stevenson to see what was really said.

However, I rose for the purpose of saying that I do not impugn the patriotism of anyone. I regret that the Senator from Missouri, who is my very good friend, used the phrase with reference to myself of "considering the source." I am not a candidate for the Presidency. I hope that "considering the source" has no reference to presidential candidacy.

I will leave the remark where it has been made, since I rose in good faith and I am proceeding in good faith to make a certain point, which is that when I spoke on the floor about a week ago I praised the distinguished majority leader [Mr. JOHNSON of Texas] and the distinguished majority whip, the Senator from Montana [Mr. MANSFIELD] for their patriotism and for their true show of a bipartisan approach to these critical circumstances.

However, after that speech a certain speech was made by the former Governor of Illinois, and a certain speech was made by the distinguished, patriotic, and able Senator from Massachusetts [Mr. KENNEDY]. Those speeches did appear in the press. An issue was raised by those speeches which had not been raised on the floor, and which all of us had expressed the hope would not be raised. That issue was whether President Eisenhower should apologize to Khrushchev or whether President Eisenhower should seek to reopen the negotiations with Khrushchev by retreating from a previous position.

A further issue raised again, I will say, by my friend the Senator from Ohio [Mr. YOUNG] a moment ago, was the issue of the action of the Secretary of Defense in calling an air alert.

Therefore, these matters become legitimate subjects of discussion on the floor of the Senate.

My answer as to whether the President should have apologized is that, in my opinion, he should not have. My answer as to whether the President should have appeased Mr. Khrushchev, or reopened the negotiations at the expense of an expression of apology or regret on our part, is that he should not have.

My answer as to the calling of an air alert ought to be familiar to all of the American people.

The tragedy at Pearl Harbor occurred immediately after the break up of a conference with the Japanese leaders. Lest another tragedy occur in America, the Secretary of Defense, undoubtedly with the approval of the President, certainly as a matter of policy, upon the breakup of this conference, or observing that it was about to terminate, in any event, put this country on an air alert.

Some have suggested that President Eisenhower should have met Khrushchev with his own kind of attack, that he should have lashed back, that he should have assaulted Khrushchev with similar tactics.

Mr. President, Theodore Roosevelt a long time ago advised us to speak softly and to carry a big stick. I do not believe that President Eisenhower should have demeaned himself by adopting the method, the manner, the tactics or the language of Khrushchev. I believe he was correct in speaking with dignity at that time, and I believe he was right in showing that America had a big stick, by reason of the calling of the air alert.

I hope, if there is to be an investigation—if the Committee on Foreign Relations believes such an investigation should be had—that an investigation

will be made of American foreign policy as a whole, if the committee wishes to do so, and that such an investigation will also look into the charges which I regard as being unfounded, as being politically inspired, as being motivated by desires to be either President or Secretary of State.

All of these charges—some of which would appear to be reckless, unfounded, and certainly unduly deferential to the leader of the Soviet Government at this time—ought also to be included in such an investigation.

Finally, Mr. President, the Russians have asked for a hearing at the United Nations, charging the United States as an aggressor. Surely, the Russian Government should not be given ammunition by any responsible American and should not have the benefit of being able to argue that responsible Americans agree with Khrushchev that he ought to have an apology. The Russians should not have the benefit of this attitude of some people that the Russians were right and we were wrong.

It would be well, if this is to become an issue in a political campaign, that we have a moratorium on it until after the issue raised by the Russians has been fully heard in the United Nations, so that we do not furnish them with ammunition.

Mr. President, I am very glad that President Eisenhower, no matter what any other person may think, did not crawl on his belly to a bully.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SCOTT. I am glad to yield.

Mr. FULBRIGHT. The Senator recommends that there should be a moratorium on this discussion. What puzzles me, and what I still do not understand, is why the Senator and his colleagues chose this particular time to precipitate this violent attack upon certain leaders of the Democrats. We did not open up this matter. What is the logic of the Republicans choosing Monday morning, immediately before the United Nations meeting is to consider these charges, to open up this violent partisan attack?

Mr. SCOTT. I am glad to point out to the Senator from Arkansas that these remarks should not be considered violent attacks. They should be considered as rebuttal and reply to the very unfortunate statements attributed to at least two responsible leaders of the Democratic Party, including the titular head of the Democratic Party.

I seek to express, as I think surely we should express, our regret that these particular statements have been made, if in fact they were made during the past week.

I appreciate the blandness of the comment of the Senator from Arkansas, but it does not conceal who made the statements.

Mr. FULBRIGHT. The statement attributed to Mr. Stevenson he has very clearly denied he made. I think a great deal was made of that.

Mr. SCOTT. If the Senator will permit, Mr. Stevenson has not withdrawn the statements which he made on other occasions last week within the United States in public bodies, which were publicly reported. He has merely refused to accept the quotations attributed to him in the article appearing in a French newspaper.

Mr. FULBRIGHT. I do not wish to argue the merit of that point. It seems to me rather ill advised to begin an open and very strong attack upon the Democrats before any Member of this body, at least of whom I am aware, has tried to be critical at all.

I have not been critical. I consciously refrained from making critical comments on this subject, both when I arrived at the airport and later this morning in order that there might be a proper inquiry. I did not wish to inspire the very kind of political attack which has taken place today. I was taken aback by it. I do not think it makes it easier for us to conduct a reasonable, objective, and quiet inquiry into what has taken place.

Mr. SCOTT. I say to the Senator from Arkansas, for whom I have the highest respect, that the Senator is evidently not aware of the statement issued by the Democratic Advisory Council and approved by the membership, including a number of Senators, or the action taken by at least 12 Members of the other body, all of which contributed to initiating an unfortunate controversy.

Does the Senator from Missouri wish me to yield?

Mr. SYMINGTON. Mr. President, I understood the Senator was yielding the floor.

Mr. ANDERSON rose.

Mr. SCOTT. I shall be glad to yield to the Senator from New Mexico [Mr. ANDERSON] and then I shall yield the floor.

Mr. ANDERSON. May I express to the Senator from Pennsylvania [Mr. SCOTT] the hope that he will take a good look at his language, because I know he did not mean it when he said:

> It is my hope that neither the distinguished Senator from Massachusetts, Mr. KENNEDY, nor that other candidate for the Presidency, Governor Stevenson will—either of them—brand themselves as turncoats.

Mr. SCOTT. "Turnquotes," is the phrase. I shall be glad to examine the language.

Mr. ANDERSON. I wish the Senator would, because it comes close to violating the rule. The transcript reads:

> So it is my hope that they will relieve themselves of the curse of suspicion of appeasement.

I wondered if the Senator intended that language.

Mr. SCOTT. I appreciate the suggestion of the Senator from New Mexico, and if my language appears at any point to be intemperate, I shall be glad to revise it in accordance with my own better judgment, if it seems necessary.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. SCOTT. I yield.

Mr. SYMINGTON. If the Senator will withdraw his remarks with respect to Adlai Stevenson and the Senator from Massachusetts [Mr. KENNEDY], I will be glad to withdraw mine.

Mr. SCOTT. I must decline the offer of my friend from Missouri. The remarks of Adlai Stevenson and the Senator from Massachusetts [Mr. KENNEDY] appeared in the public press and unfortunately cannot now be withdrawn.

Mr. SYMINGTON. Mr. President, I then ask unanimous consent that the reporter read into the RECORD the statement made by the Senator from Pennsylvania.

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield the floor?

Mr. SCOTT. I wish to address the same question to the Senator from Missouri [Mr. SYMINGTON] which was addressed to me by the Senator from Montana [Mr. MANSFIELD], and that is: Is the Senator rising on a question of personal privilege?

Mr. SYMINGTON. Mr. President, I am not rising on a question of personal privilege.

Mr. SCOTT. Then I will yield the floor.

Mr. SYMINGTON. Mr. President, I ask unanimous consent that the stenographic record be read at this point to the Senate.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the reporter will bring in the transcript.

Mr. MANSFIELD. Mr. President, I wish to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. What particular part of the transcript is to be read?

Mr. SYMINGTON. The part which the Senator from New Mexico [Mr. ANDERSON] and I requested to be brought to the floor of the Senate with respect to the remarks about the Senator from Massachusetts [Mr. KENNEDY] and former Gov. Adlai Stevenson.

The PRESIDING OFFICER. Is there objection to the clerk reading the transcript as described? The Chair hears none, and the clerk will read it.

The legislative clerk read as follows:

> I might also add, in connection with the statement of the distinguished Senator from Massachusetts, Mr. KENNEDY, as reported in the Portland Oregonian, that the Senator himself said:
>
> "Khrushchev laid down two conditions to President Eisenhower for going on with the summit meeting. One was to apologize. I think that might have been possible to do."
>
> Then the quotation goes on to other matters.
>
> The report in the Oregonian is that:
>
> "Later KENNEDY modified the word 'apologize,' and said the President might 'express regret.'"
>
> It is my hope that neither the distinguished Senator from Massachusetts nor that other candidate for the Presidency, Governor Stevenson, will—either one of them—brand himself as a turncoat. So it is my hope that they will relieve themselves of the curse of suspicion of appeasement, and it is my hope that the unity, which started out so well in support of the President and in support of the administration, may somehow be found again.
>
> But as Mr. Farley has so well said, he has no part in the appeasement process as exemplified by the unfortunate statement of Governor Stevenson.
>
> He said it did not represent his views and that "the most charitable explanation of

such irresponsibility, presumption, and discourtesy is that his English was poor and my French no better."

Mr. SCOTT. I believe the clerk is still reading from my statement, but I call attention to the fact that the word is "turnquote."

The PRESIDING OFFICER. The Senator from Missouri has the floor.

Mr. SYMINGTON. Mr. President, the RECORD has been read to my satisfaction at this point, and unless the Senator from Pennsylvania [Mr. SCOTT] would like to have the reading continued, I wish no further part of the RECORD read.

Mr. SCOTT. I request that no further portion of the RECORD be read.

Mr. MORSE. Mr. President, I rise to a point of parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MORSE. I have not heard the debate except in the last few minutes. I shall make some comment on my own time shortly. My parliamentary inquiry is this: Is it proposed that the RECORD be changed in any way from what was stated on the floor of the Senate today?

Mr. SYMINGTON. No. In answer to the inquiry of my friend from Oregon [Mr. MORSE], I state that the reverse is now true.

Mr. ANDERSON. I wished to suggest to the Senator from Pennsylvania that the term "turncoat" is an unfortunate term, and also the expression "suspicion of appeasement" is an unfortunate term, and I expressed the hope that those terms might be modified.

Mr. MORSE. Mr. President, I wish to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MORSE. May terms spoken on the floor of the Senate, no matter how unfortunate they may be, but nevertheless spoken in debate, be changed by the spokesman or withdrawn by the spokesman in the absence of unanimous consent?

The PRESIDING OFFICER (Mr. CARLSON in the chair). I am advised by the Parliamentarian that a Senator may correct an error which may have been made, but he may not substantially change the context.

Mr. MORSE. Will the Chair advise the Senator from Oregon the definition of the word "error" under the ruling?

The PRESIDING OFFICER. The Chair will state that such an error would be a misstatement, possibly a misquotation, as to the form of the statement, but not as to content.

Mr. MORSE. Not as to content.

Mr. SYMINGTON. Mr. President, does the Senator wish me to yield further?

Mr. MORSE. Mr. President, I should like to have the parliamentary situation cleared up. So that the RECORD may be perfectly clear, speaking hypothetically, if a Senator makes a statement which is critical of some Government policy or some Government official and then has a second thought minutes later which causes him to wish he had not said what he had said and asks to have the matter stricken from the RECORD, does such request require unanimous consent?

The PRESIDING OFFICER. The Chair holds that such a request would require unanimous consent.

Mr. MORSE. I thank the Chair for the ruling, and I wish to serve notice now that I shall object to any change in today's RECORD.

Mr. SYMINGTON. Mr. President——

Mr. SCOTT. Mr. President, will the Senator from Missouri [Mr. SYMINGTON] yield?

Mr. SYMINGTON. I yield.

Mr. SCOTT. I would like to make clear, so there will be no misunderstanding concerning the remarks of the Senator from Oregon [Mr. MORSE], who was not present when the statement was made, that I have no intention of changing the sense or meaning of anything I have said. If I have made grammatical errors or errors of syntax, I reserve the same right which is available to other Senators to make such corrections; and I will, of course, be my own judge. I say to the Senator from Oregon, as to what changes or revisions I make, exercising the same privilege as is available to the Senator from Oregon. But I wish now to make it perfectly clear that I reject any inference that I desire to withdraw the meaning of anything that I have said.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. SYMINGTON. I yield to the Senator from Oregon.

Mr. MORSE. I assure the Senator from Pennsylvania that I made no implication that the Senator had any intention to change any of his remarks. There was a request or suggestion made that an opportunity be offered to change remarks. To that, I object. I merely wish to say that the Senator from Pennsylvania, under the rule, is free to comply with the rule, but when he says he will be his own judge as to what he will change, I say the Senate will be the final judge in case he makes a change outside the rule.

Mr. WILLIAMS of Delaware. Mr. President, for the past hour and a half we have heard a series of nonpolitical, nonpartisan statements from both sides of the aisle. All of these remarks contained suggestions about what should or should not have been done at the summit, as well as attempted to assess the blame for what was or was not done.

In making these remarks, many Members of the Senate, as well as most of the presidential candidates, have been quoted. However, in listening to these remarks, I note that one very important presidential candidate has been ignored. To my knowledge, he has not been quoted in the Senate today. Yet it is my opinion that this presidential candidate, in his speech on the floor of the Senate last week, made one of the most statesmanlike speeches which have been made in connection with the summit conference, and again, in Indianapolis, Ind., last week made another very appropriate comment, one which I believe every Member of the Senate would do well to ponder before we get too partisan.

I refer to a statement made by our majority leader, the senior Senator from Texas [Mr. JOHNSON], in which, when he was asked to assess blame for the Paris fiasco, he observed:

> Any jackass can kick down a barn, but it takes a good carpenter to build one.

[Laughter.]

ONE LESSON FROM THE SUMMIT

Mr. SYMINGTON. Mr. President, an unseen but potent consideration at the summit tragedy was the administration's fiscal policy of placing expenditure ceilings above military strength.

If this administration had approached the summit conference from a position of relative strength over the Communists, the rude but shrewd Kremlin chief would have been less belligerent.

The Soviet leader, on the other hand, approached the summit with certain knowledge about:

Our small and relatively immobile ground forces with their antiquated equipment.

Their rocket and missile superiority.

Our failure to provide an airborne alert capability and the consequent vulnerability of our retaliatory strength.

Their great numerical superiority in submarines, with and without missiles.

Moreover, the Soviet leader knew that the United States would have been stronger in all of these respects if our military experts, rather than our budget bookkeepers, had been listened to.

Instead major attention has been given in this country toward feeding the American people a diet of complacency, backed up by appealing slogans.

We cannot afford to waste any time in abandoning these policies of weakness. In fact, if we do not act promptly, it may soon be too late, because, at our present pace, and under existing policies, we may find ourselves shortly in a very critical position.

Therefore, I recommend the following program now:

That the Secretary of Defense be authorized and directed, at once, to raise overall expenditure ceilings in his Department so as to carry out this program.

That the Secretary of Defense direct the removal of all overtime limitations on high priority projects and order a sharp acceleration in those projects.

That the Air Force be authorized and directed to take the procurement and crew-training actions for the SAC air alert capability which General Power recommended, and that the Congress appropriate $415 million above the budget request for that purpose.

That the Congress appropriate $360 million above the budget request for going ahead as fast as possible with the B–70 weapons system project.

That the Congress appropriate $1.3 billion over and above the budget request for acceleration of the Atlas-Titan, Minuteman, Polaris, Hound Dog, and Sky-Bolt programs.

That the Congress authorize an increase of Army personnel strength from 870,000 to 925,000, and appropriate $120 million for that purpose. In addition, that $800 million be appropriated over

and above the budget request for procurement of new equipment for the Army.

That the Congress authorize an increase of Marine personnel strength from 175,000 to 200,000 and appropriate an additional $40 million for that purpose.

That the Congress appropriate $465 million over and above the budget request for antisubmarine warfare.

The above recommendations for air alert, B–70, missiles, Army personnel, Army procurement, Marine personnel, and antisubmarine warfare would amount to $3½ billion over and above the budget request for those progams.

This total of $3½ billion is the equivalent of less than 3 days of our gross national product, and would seem to be a small contribution to greater national security in view of the threat facing the free world.

It is hoped that the recent failure of high level negotiations will awaken us to action and, to that extent, make a similar but more permanent contribution to reality than did Sputnik I when it broke the space barrier.

ILLEGAL ACTIVITIES ON THE PART OF LABOR RACKETEERS AND MANAGEMENT

Mr. McCLELLAN. Mr. President, during the course of the hearings of the Senate Select Committee on Improper Activities in the Labor or Management Field, we have on numerous occasions communicated with local law enforcement authorities when our investigations have disclosed illegal activities on the part of labor racketeers or management.

I should like to place in the RECORD an editorial of the Long Island Daily Press, dated May 17, 1960, entitled "Victory and Warning," an editorial of Newsday of the same date, entitled "A Big Victory," as well as a letter dated May 18, 1960, from the district attorney of Nassau County, N.Y., Mr. Manuel W. Levine, enclosing these editorial comments on the successful prosecution of labor racketeers who operated juke box Local 266 of the Teamsters Union.

Both the officials of this union and the owners of a juke box company were convicted of conspiracy. The officials of this local were also convicted on charges of coercion and extortion. These convictions were hailed by the newspapers as a great victory on the side of law enforcement.

I may say that much of the information upon which these prosecutions were based was developed by the Senate select committee.

I wish to commend and congratulate Mr. Manuel W. Levine, the district attorney of Nassau County, N.Y., for the monumental accomplishment of securing convictions of these racketeers after a trial which lasted for 3½ months.

The district attorney in his letter pointed out that it was unfortunate that some of the defendants were freed from prosecution due to inability of the prosecutor to introduce into evidence certain wiretaps which would have proved them guilty of a crime.

I understand that had they been permitted to use wiretap evidence which was available to them, in all probability all these defendants would have been convicted. Those who escaped, escaped upon that one technicality.

These were taps made pursuant to New York State laws and pursuant to a New York State court order. Some States, such as New York State, have enacted laws to enable their enforcement agencies to intercept communications under proper safeguards and to eliminate the dangers of promiscuous and improper use. In New York, for example, the enforcement agencies must apply to the court of highest original jurisdiction for a warrant to permit the interceptions. This warrant is only granted when the court is satisfied that reasonable grounds exist that evidence of crimes will be obtained as a result of the wiretap.

The inability to introduce these wiretaps stems from the decisions in the U.S. Circuit Court of Appeals for the Second Circuit in the case of People against O'Rourke, which follows the decisions in the *United States* v. *Benanti* (355 U.S. 96).

In its decision, the Supreme Court ruled wiretap evidence obtained by State officers under authority of a State law was inadmissible in the Federal courts. The language of the decision left a cloud on the right of States to legally authorize law-enforcement agencies to obtain court warrants to intercept communications under proper safeguards.

The lower courts—People against O'Rourke—have followed the line laid down by the Supreme Court and have indicated that, while not enjoining the State courts, the introduction of wiretap evidence by State officials in State courts would be in violation of section 605, Federal Communications Act of 1934, and thus would constitute a crime.

The district attorney pointed out that the inability to use wiretaps in local law-enforcement cases is a severe blow to the side of law and order. He expressed the hope that Congress would be able to do something in this session so that one of our most effective tools against bigtime racketeers and hoods would not have been removed.

On January 16, 1958, shortly after the decision of the U.S. Supreme Court in the Benanti case, I introduced a bill, S. 3013—85th Congress, 2d session—amending section 605 of the Communications Act, to clarify the right of State law enforcement agencies to use wiretaps to uncover evidence of the commission of serious crimes.

The Supreme Court in the Benanti case did not rule on constitutional questions. The decision was based solely on the interpretation of the intention of Congress when it passed section 605 of the Federal Communications Act of 1934, which declares:

> No person not being authorized by the sender shall intercept any communication and divulge or publish the existence, contents, substance, purport, effect, or meaning of such intercepted communication to any person.

It is my belief that Congress, in the enactment of section 605, never intended to cripple and hamper law enforcement agencies in their efforts to stamp out crime and punish criminals.

When I introduced S. 3013, I predicted that the detection, investigation, and prosecution of crime, particularly organized crime, would be seriously handicapped and weakened by the Supreme Court decision that is proving to be true. In many cases, prosecution and investigation of crimes would be completely thwarted and would collapse were wiretapping to be denied to the law enforcement agencies.

Recent developments show that the court decisions have created an intolerable situation and that there are many cases pending in the courts which the district attorneys' offices cannot prosecute because of the strictures against the introduction of wiretap evidence.

It is my contention that Congress has never intended that it permit the criminal to use the modern means of communication with impunity, or that it intended to enjoin law enforcement agencies from intercepting these communications.

To accept a contrary interpretation would mean that Congress would permit criminals a free license to use telephone communications in the commission of crimes without fear of detection, and thus provide them with a "privileged sanctuary." I say again, this is an interpretation that I cannot accept, and that it is one Congress should correct by appropriate legislation.

In the field of criminal detection and prosecution, the law enforcement agencies are constantly waging a war against criminals who attack society. To do so effectively, it is necessary and essential to intercept their communications.

The Senator from New York [Mr. KEATING] and Representative CELLER introduced, respectively, S. 3340, and H.R. 11589, on April 6, 1960, and with certain minor changes, these are bills which follow almost the exact language of S. 3013, except that they amend title 18 of the United States Code rather than the Federal Communications Act of 1934.

I feel that these are all good bills and I strongly urge that action be taken to pass one of them and give law enforcement agencies a tool to prevent crime instead of affording the criminal element a haven and refuge from detection and prosecution. I have read with appreciation the statements made by the Senator from New York [Mr. KEATING] on April 20, 1960. I am impressed with the almost unanimous support granted in editorial comments of the New York Mirror of April 16, 1960; the New York Herald Tribune of April 15, 1960; the New York Times of April 16, 1960; the New York Journal-American of April 16, 1960; the New York Daily News of April 16, 1960; and the Rochester Times-Union of March 22, 1960, all of which are set

forth in the CONGRESSIONAL RECORD of April 20, 1960, pages 8306 and 8307.

Mr. President, I hope the Senate will give attention to and take action on these measures before adjournment.

Mr. President, may I have a ruling on my unanimous-consent request to have certain material which I have heretofore offered printed in the RECORD?

The PRESIDING OFFICER. Without objection, the letter and articles will be printed in the RECORD.

The letter and articles are as follows:

OFFICE OF THE DISTRICT ATTORNEY
OF NASSAU COUNTY,
Mineola, N.Y., May 18, 1960.

Senator JOHN L. MCCLELLAN,
Select Committee on Improper Activities in the Labor or Management Field, New Senate Office Building, Washington, D.C.

DEAR SENATOR: On Friday, May 13, 1960, a Nassau County jury convicted three union officials of Teamster Local 266, "a jukebox local," of conspiracy, coercion, and extortion. The three officers convicted were Joseph De Grandis, president, Frank de Forte, vice president, and Ernest Zundel, secretary-treasurer. In addition thereto, two jukebox operators, Eugene Jacob and Herbert Jacob, coowners of the Nu-Way Vending Machine Co., were convicted of conspiracy.

The result was hailed by the press as a victory for the decent people of this county and two newspapers circulated in Nassau County, Newsday and the Long Island Daily Press, had editorials.

I feel, Senator, that both you and your committee are deserving a great deal of the credit, since the minutes of your hearings were a great part of the base which we used as a jumping-off place for our investigation. In fact, I consider this to be an example of the proper cooperation between the agencies of the Federal Government such as yours and the law-enforcement officials who have the burden of the prosecution on the local level. I might say, a most effective combination when employed.

It is unfortunate that some of the defendants were let out, but it is my considered opinion and that of my staff, that the primary reason for this was our inability to introduce wire taps, the result of a ruling of our county judge after the decision of the U.S. circuit court of appeals in *People* v. *O'Rourke, et al.*

I might add, the inability to use wire taps in local law enforcement is a severe blow and I sincerely hope that Congress will be able to do something in this session so that one of our most effective tools against big-time racketeers and hoods will not have been removed.

I want to thank you for the very gracious and generous statements you made to me and to the press and once again I am sure I speak for the people of Nassau County when I say we are deeply grateful to you and to your congressional committee for the help and cooperation we received.

Your very truly,
MANUEL W. LEVINE,
District Attorney.

[From Newsday]

A BIG VICTORY

"This shows the underworld goons that they can't set up paper unions out here."

The words are those of Nassau County District Attorney Manny Levine, but the sentiments are those of every decent citizen after yesterday's happy ending to the marathon jukebox rackets trial.

The conviction—and stiff sentences that can follow—of three top Teamster officials in local 266 should prove that "paper" unionism is no basis for coercion and extortion by the goons who run such phony unions. Yesterday's verdict, after 23 hours of deliberation by the jury can result in 17-year sentences for Joseph de Grandis, Frank de Forte, and Ernest Zundel, the three officials of the local.

This knockout blow against paper unions could not come at a better time. Following the directed acquittal of Teamster boss John J. O'Rourke last month, there were those who doubted the goons could be convicted. Yesterday's verdict erased those doubts as emphatically as it should erase the jukebox racket in Nassau County, a racket first exposed by Newsday.

Levine, prosecutor William Cahn and the staff of assistants who worked hard for 18 months deserve the cheers they are getting today.

[From Long Island Daily Press, May 17, 1960]

VICTORY AND WARNING

The convictions of three officers of the so-called jukebox local on charges of extortion, coercion, and conspiracy should be a warning to all who would misuse organized labor's good name to prey on others.

These three Teamster Union Local 266 officials—Joseph DeGrandis, Frank DeForte, and Ernest Zundel—face prison terms of 17 years each. Two jukebox operators, convicted on a conspiracy count wtih them, face a year in jail.

The now famous trial, which ran 3½ months, stemmed from the shakedown of a tavern jukebox owner by the use of illegal picketing to extract dues.

Senator JOHN MCCLELLAN, Democrat, of Arkansas, chairman of the Senate Rackets Committee, has hailed the convictions as a monumental accomplishment. Honest working people everywhere agree. Our congratulations to Nassau District Attorney Manuel W. Levine, Assistant District Attorney William Cahn, who presented the State's case, and the able staff.

DISTINGUISHED SERVICE AWARD OF NATIONAL ASSOCIATION OF BROADCASTERS TO CLAIR R. McCOLLOUGH

Mr. FREAR. Mr. President, recently my attention was called to an address delivered by Mr. Clair R. McCollough early last month at the convention of the National Association of Broadcasters, held in Chicago.

It was at this gathering that Mr. McCollough received the 1960 Distinguished Service Award.

For the information of the Senate, Mr. McCollough is the president and general manager of the Steinman stations, and resides in Lancaster, Pa.

The Distinguished Service Award was conferred on Mr. McCollough for a 30-year "record of industry citizenship unique in the annals of broadcasting." The award citation noted that he had served with distinction as a board and committee member of the association and had never failed to respond when called on for organizational tasks requiring the utmost skill. Additionally, the citation saluted him for being a broadcaster who "has directed the stations and under his management in a manner consistent with the highest ideals of the broadcasting profession."

Believing that Mr. McCollough's address will be of much interest to the Senate, I ask unanimous consent, Mr. President, that it be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THREE KEYS TO STABILITY IN BROADCASTING: PERFORMANCE, GOOD PRACTICES, UNITY OF PURPOSE

(Address by Clair R. McCollough, president and general manager, the Steinman Stations at the 38th Annual Convention of the National Association of Broadcasters, Chicago, Ill., April 4, 1960)

I am pleased and gratified to receive the Distinguished Service Award which is being conferred by my fellow broadcasters of the National Association of Broadcasters.

The award itself traditionally notes the contributions which it is said the recipient has made to the industry and the association.

Such contributions as I have made over the past 30 years would not have been possible without the loyalty and endeavor of my associates in the Steinman Stations as well as my longtime friends and fellow broadcasters throughout the industry. I see many of these faces in the audience today.

Upon this occasion I also recall many other broadcasters whose names were synonymous with industry leadership at the time I started in broadcasting—fine men who are not here because they did not live long enough or retired too soon to see their industry emerge from the age of the pioneer into the age of the plaque.

I think of them often, as do many of you: Chuck Myer, Al McCosker, Johnny Gillin, Arthur Church, Harold Ryan, Harry Shaw, Deac Aylesworth, Ed Klauber, Don Lee, Joe Maland, Edgar Bill, Gene O'Fallon, and Paul Kesten.

There are others—too numerous to mention, too worthy to forget.

Looking through our family album, the names and faces of these people can be related to classic experiences in broadcasting—industry adventures that contributed to the tedious process of carving an important social and economic institution out of the raw stone of invention.

This has been done before, but never quite so quickly nor under such pressure as has attended the growth of broadcasting. It has been done in transportation, in the printed media, in education and in government—but never at such intense speed.

In truth, the evolution has been so swift that yesterday's problems—and yes, yesterday's passions—sometimes are forgotten in the welter of current events.

Most of the vexing problems we have today, we have had before—in one degree or another.

The problem of freedom of speech.

The problem of industry standards.

The problem of legislative investigations.

The problem of regulatory ills.

The problem of advertising surveillance.

The problem of music licensing fees.

The problem of trade practices such as rate juggling, trade deals, competitive policies.

The problem of rigging, payola and perhaps others that have been overlooked by the overseers—phenomena not peculiar to us.

We have had them and—to the extent that law and custom allow—we have made prodigious efforts as an industry to solve them ourselves; to resist the assistance of Government which so frequently, as now, has been offered.

The most effective effort we have put forward in every direction has been through this association, the NAB.

A moment ago I mentioned the names of some of those who were responsible for starting this association, some of those who carried on its work through the difficult days

of the 1920's and early 1930's. Many broadcasters of this same period are still active today.

But with increasing frequency, the baton is being passed to younger men who have more recently entered the field of broadcasting and are taking up the burdens of the NAB.

These young executives represent, in conservative estimate, a clear majority of the Nation's licensees.

By way of confession, I should like to say that I have participated, on occasion, in informal discussions with some of my fellow broadcasters about this influx of young executive talent—this vast homesteading rush onto the reservation which for so long a time has been a more or less private preserve.

There have been remarks, about "Johnny-come-latelies," the "new order of confusion" and similar expressions. It is a truism that elders in their wisdom frequently look upon the young with annoyance tempered by compassion.

BROADCASTING'S NEW GENERATION

But there they came after the late great conflict—this new generation—casting aside their wartime uniforms and acquiring broadcast licenses in all manner of communities around the Nation.

Their enthusiasm and their well-intended zeal have led, at times, to a certain amount of fretful grumbling among their fellow broadcasters.

More recently I have noticed, however, and perhaps you have, too, the emergence from this group of numerous highly intelligent, public spirited, successful broadcasters upon whom must rest the responsibility for the profession's future.

Thus today, presuming upon the prerogatives of tenure, if not of talent, I should like to address a few remarks to three general subjects, in this order: (1) Our trade practices, (2) our performance before the public, and (3) our national association.

It may be that the most important activities in American broadcasting, other than legislative and regulatory, fall within these three general categories.

A PERIOD OF ADJUSTMENT

As we know, any human pursuit, whether in industry, or in art and letters, in government or in education, must undergo a period of adjustment through experience before it stabilizes.

This "experience cycle" in broadcasting has not reflected a steady, predictable curve.

Just prior to World War II, we had reached a comfortable plateau. There was limited competition within radio itself and a consequent prosperity that assured good programing and acceptable advertising.

This placid situation was disrupted, of course, by the postwar radio stampede and the astonishing growth of television; by the consequent changing patterns in broadcast programing; by the dislocation of radio network economy and by the unrestrained performance of some of the newcomers in their anxiety to capture audience and revenue by whatever means at their disposal.

Thus, during the last 15 years, we have found ourselves engaged in a frantic and occasionally untidy search for economic and regulatory equilibrium.

Changing fortunes in radio and allocation problems in television have attended this struggle.

In the subsequent scramble for position—and even, in some cases, for survival—there have been harmful doings.

CONSTRUCTIVE COMPETITION INSTEAD OF GUERRILLA WARFARE

In far too many instances within our own industry, the pursuit of stability and reasonable prosperity has taken on the character of guerrilla warfare, rather than hard-hitting constructive competition.

We have moved from the enervating period of rate cutting to the far more dangerous situation where some radio stations do not have established rates.

Indeed, manifestations of the same practice are now appearing in television.

Are we, in truth, such poor businessmen that we do not know how to price our product and stay with the decision?

Are we not, through such practices, depicting ourselves before our fellow businessmen and advertisers as immature, if not worse?

Quiz rigging and payola per se are not the major shortcomings with which we must contend.

These are symptoms of something deeper—symptoms of certain business malpractices whose only cure is self-treatment.

Among the fundamental, underlying ills of broadcasting are rate manipulations, trade deals, downgrading the competition in our own media and kindred activities.

Until we cure them—and we can only cure them individually, not in concert—we run the continuing risk of loss of advertiser confidence.

More disturbing than that, however, is the greater peril of attracting to our industry the charlatans, the dealmakers, the unprincipled who, by erosion through the years, can destroy the confidence of the public itself.

What I would suggest as a corrective measure is not easy to accomplish. It requires courage, determination, a high sense of business values, and a certain amount of moral rearmament.

AN INVENTORY FOR THE AUDIENCE

All of us should take inventory of our business practices.

Do we have a profit and loss statement for the listeners and viewers we serve as well as for our auditors?

Are we selling a valuable service—or are we bartering it?

Are we selling a valuable service—or are we auctioning it?

Please count me among the first to resist to the wall any effort by Government, or any other outside agency, to dictate our policies, our programs, or our profits.

But nonetheless I think it is time for something more than causal circumspection. It is time for intensive self-inspection.

If such self-inspection, accompanied by thoughtful and determined action, is undertaken by individual broadcasters, then we may attain more surely the stability of business practice that underlies the whole process of sound free enterprise.

STRENGTH AT THE FOUNDATION

In the absence of such strength at the foundation of the broadcasting economy, we may expect further depredations of one sort or another—and consequent injury to our defenses against our detractors.

We must remember always, it seems to me, that individual action is not alone sufficient to the purpose.

In those areas where custom dictates and the law permits us to act in concert, we must allow no abridgement. The broadcasting industry must place great stress upon this "oneness" factor in the days that lie ahead.

Thus, in related context, I would like to speak briefly about the National Association of Broadcasters.

What is a trade association? It is an organization of institutions or individuals, or both, gathered together to pursue common objectives and defend the principles for which its membership stands.

The National Association of Broadcasters was organized right here in Chicago. At that time, the organization included 16 members and the common objective was to do something about music copyright fees. This was a reasonably uncomplicated objective, but not so uncomplicated that it has gone away. It was the first objective but not, by any means, the last.

Since that time, the industry has increased in broadcasting units in the nature of 842 percent and the Association membership in the order of 850 percent. The number of objectives has increased in no less startling manner.

Over the years, the association has encountered and contended with such problems as freedom of speech, tax legislation, industry standards, copyright quarrels, regulatory ills, political broadcasting, editorializing, labor problems, engineering complications, research ventures, and others far too numerous to relate.

NAB FOLLOWS DEMOCRACY'S PATTERN

An association, such as ours, follows the pattern of democracy itself. At times, its members may find it cumbersome and unwieldy. The frustrations that grow out of organized action in a system dedicated to freedom are caused by the very virtue which spawns the system itself—action by consent.

Broadcasting is a large and complicated business, multifaceted in its problems, populated by an extraordinary potpourri of humanity; performers, administrators, salesmen, newsmen, engineers, inventors, legislators, regulators, financiers, and many others. To obtain consent on any given problem in such a complex is a tedious, time-consuming task.

Therefore, it sometimes may seem that the NAB mills are grinding slowly—when indeed they really are, through the orderly chaos of membership soundings, committee recommendations, board actions, and staff implementation.

In any lag that exists between incubation of a problem and unified effort to obtain a solution, some may become impatient and place upon the executors of policy unusual and unfair burdens—when they themselves, the members, are frequently responsible for the lag through inaction or disinterest.

HUMAN RESERVES OUTWEIGH CASH RESERVES

Cash reserves are not as important as human reserves in the success of an association. If the new order of broadcasters will remember this and act upon it, the NAB will grow ever more effective.

There is a trace of dissension among some of you about the multiplicity of organizations in present-day broadcasting.

Besides the NAB, there are the Radio Advertising Bureau, the Television Bureau of Advertising, the Television Information Office, the Clear Channel Broadcasters Association, the Association of Maximum Service Telecasters, the Regional Broadcasters Committee, the Community Broadcasters Association, the National Association of FM Broadcasters, the Daytime Broadcasters Association, 48 State associations and perhaps others.

We need not be perplexed by this situation. It is a known fact that there are more associations in the newspaper business, than there are in ours, and yet the newspaper industry is much less fractionated.

Each of our associations, many of which were generated by the NAB itself, has a specialized job to perform and each is doing it well. The NAB remains the single organization of unquestioned mutual interest to all of us. In the sensitive task of dealing with Government as well as public and economic relations and a myriad of other day-to-day problems, it excels.

If you are among those who, in an occasional moment of doubt, question the vitality of the NAB, listen:

In July of 1937, the NAB Standards of Good Practice for Radio Broadcasters were promulgated.

On March 4, 1941, ASCAP signed the consent decree.

On March 7, 1946, the blue book was issued and fought to extinction by the NAB.

On April 16, 1946, the Lea amendment to the Communications Act outlawing featherbedding in the music field was adopted by the Congress.

On July 1, 1949, the Mayflower decision was rescinded.

On March 1, 1952, the television code was promulgated.

I could continue this list for the next hour.

You name it; the NAB was there.

You could pay your dues to the NAB from now on for the rest of your natural life and still owe money on the obligation.

The NAB performs the most essential function of any organization in broadcasting. Yet, at times, the impossible is expected of it. There are those who would have the NAB negotiate their union contracts; try their cases before the FCC; rebuke their competition and explain their audience ratings.

Times have changed. The NAB cannot be all things to all people. It has a prescribed course and must be what it set out to be—an organization devoted to the advancement of its members' objectives and a protection for their interests. These objectives and these interests must exist in a climate untainted by program interference or any other kind of artificial intrusion.

If we cannot be together on these essentials, in one single forum, regardless of our individual broadcasting problems, we might as well surrender now.

And, if you will forgive a personal allusion to old friends, in this time of your generous tribute to me as their courier, we might as well dismiss the principles for which they fought so valiantly through the years, not alone in their own interest, but in the interest of the public as well.

Broadcasting is a vital industry that demands the capacities of vigorous men with originality, courage, and a dauntless determination to unite in purpose and in action.

STRENGTH OF PURPOSE AND INTEGRITY

We must value self-respect highly, not alone in our conduct before the public, but also in our conduct among ourselves; we must lend to our associated activity the same strength of purpose and integrity of character that we should and must espouse in our own communities.

I, for one, am satisfied that those who hold such beliefs will firmly fix the conditions of broadcasting in the future, and, as our industry marches along the road to destiny, good broadcasters will far outnumber those who do not care.

THE ROLL OF HONOR

The Distinguished Service Award of the National Association of Broadcasters was instituted in 1953 as the Keynote Award. The award was given its present name in late 1959.

Previous recipients were:

In 1959: Robert W. Sarnoff, chairman of the board of the National Broadcasting Co.

In 1958: Dr. Frank Stanton, president of the Columbia Broadcasting System, Inc.

In 1957: The Honorable Herbert C. Hoover, former President of the United States.

In 1956: Robert E. Kintner, then president of the American Broadcasting Co.

In 1955: Mark Ethridge, publisher of the Courier-Journal and Louisville Times and a former NAB president.

In 1954: William S. Paley, chairman of the board of the Columbia Broadcasting System, Inc.

In 1953: Brig. Gen. David Sarnoff, then chairman of the board of the National Broadcasting Co.

CONDEMNATION BY THE NEW HAMPSHIRE STATE COUNCIL OF CARPENTERS, AFL–CIO, OF THE SALE AND DISTRIBUTION OF OBSCENE AND OBJECTIONABLE MATERIAL

Mr. BRIDGES. Mr. President, because of my cosponsorship of Senate Joint Resolution 160 in regard to obscene literature, and my deep concern in this matter, I have been greatly heartened by the public response which indicates a general concern, without which legislative action is almost impossible. Indicative of public reaction is Resolution 11, passed by the New Hampshire State Council of Carpenters at their eighth annual convention on April 16, 1960.

I certainly wish to commend the New Hampshire State Council of Carpenters for their forthright expression on this matter, and, Mr. President, I ask unanimous consent that the resolution may, at this point, be inserted in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 11

Whereas being publicly mindful of the general increase in the sale and distribution of obscene matter on the newsstands and through the mails, and the showing of indecent pictures and programs on the cinema and television screens; and

Whereas the continuous dissemination of this objectionable material has contributed more than anything else in an alarming increase of adult and juvenile delinquency; and

Whereas a condition of this nature being allowed to continue without repression will bring about a general demoralization of our people, thereby making our country vulnerable to attack by an enemy that has sworn to destroy and eradicate from this earth, the Judeo-Christian concept of society; and

Whereas mindful of the many unsuccessful attempts in the past to stop this flow of obscenity in our midst: Now, therefore, be it

Resolved, That the delegates of the New Hampshire Council of Carpenters in its eighth annual convention assembled, do and hereby go on record favoring and supporting the establishment of a statewide committee which will seek to devise ways and means to:

1. Seek the cooperation of all store owners, theater operators and television program directors to sell, distribute and show only decent and wholesome literature, pictures and programs.

2. Refuse to patronize or encourage any establishment that will continue to sell, distribute and show obscene material; and furthermore, be it

Resolved, That we commend and support all those individuals, organized groups, newspaper editors, and public officials who have undertaken a mission to combat obscenity; and be it also

Resolved, That a copy of this resolution be sent to General Postmaster Summerfield, to U.S. Senator H. Styles Bridges, to Mr. William Loeb, publisher of the Union-Leader, and to Hon. J. T. Benoit, editor of L'Action.

CONQUERING THE PAST

Mr. BYRD of West Virginia. Mr. President, British Army bulletins of 1918 tell of a certain Colonel Elkington, who in the early part of the war was cashiered from the army for conduct unbecoming an officer. The public dispatches do not state the nature of this misconduct, but the inference is that it was cowardice in the face of the enemy.

The disgraced man, with his name dropped from the rolls of the British Army, went back to Paris, assumed another name, and enlisted in the Foreign Legion. Wherever the men of the legion went into action, this man was conspicuous for his daring and gallantry. After one of his feats of heroism he was decorated by the Government of France. In some way his real identity was disclosed, and the facts were brought to the attention of the British Government. His commission was given back to him; and, resuming his name and title, he again joined his old regiment at the front. By wounds and daring and fidelity he won back the honors and the rank that cowardice had forfeited him.

Start where you stand and never mind the past;
The past won't help you in beginning new.
If you are done with it at last,
Why, that's enough. You're done with it, you're through;
This is another chapter in the book,
This is another race that you have planned.
Don't give the vanished days a backward look—
Start where you stand.

The world won't care about your old defeats.
If you can start anew and win success,
The future is your time, and time is fleet,
And there is much of work and strain and stress;
Forget the buried woes and dead despairs.
Here is a brand-new trial right at hand;
The future is for him who does and dares—
Start where you stand.

Old failures will not halt, old triumphs aid;
Today's the thing, tomorrow soon will be;
Get in the fight and face it, unafraid,
And leave the past to ancient history.
What has been, has been; yesterday is dead,
And by it you are neither blessed nor banned;
Take courage, man, be brave and drive ahead—
Start where you stand!

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 44. An act to authorize the Secretary of the Interior to construct the San Luis unit of the Central Valley project, California, to enter into an agreement with the State of California with respect to the construction and operation of such unit, and for other purposes; and

H.R. 6779. An act to amend section 170 of the Internal Revenue Code of 1954 (relating to the unlimited deduction for charitable contributions for certain individuals).

A FOREIGN POLICY FOR THE 1960's—ADDRESS BY SENATOR AIKEN BEFORE WORLD AFFAIRS COUNCIL

Mr. MANSFIELD. Mr. President, on May 20 the Senator from Vermont [Mr. AIKEN] delivered an address entitled "A Foreign Policy for the 1960's," before the

World Affairs Council in Boston. It is an excellent statement of the problems which confront us in the years ahead and sets forth a sound philosophy for dealing with them effectively. In this statement, the distinguished Senator, who is a member of the Committee on Foreign Relations, reveals once again the deep human wisdom and the sound grasp of world affairs which mark him as an exceptional leader of this body, beyond party, in matters pertaining to our relations with other nations.

I should like to direct the attention of the Senate to the very fine address previously referred to, and therefore ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

A FOREIGN POLICY FOR THE 1960'S

(Address by Senator GEORGE D. AIKEN, at the World Affairs Council annual meeting, Boston, Mass., May 20, 1960.)

It is my good fortune to be able to spend this time between planes with you this afternoon. I was very glad indeed to accept the invitation of my friend, Chris Herter, Jr.

I approach my assignment, however, with some diffidence and trepidation, not only because of the formidable requirements of the subject but also because of the formidable qualifications of the audience.

Massachusetts has traditionally been at the center of American involvement in world affairs. It has supplied—and is today supplying, perhaps more than ever before—some of our most notable practitioners of diplomacy. I need cite only three or four examples among the many which come to mind, beginning, of course, with the Secretary of State himself, who is bringing grace and distinction to one of the most difficult offices in our Government.

Mention should also be made of Ambassador Henry Cabot Lodge, Jr., at the United Nations, and Ambassador John Moors Cabot, in Brazil, who are ably representing us under circumstances that are rarely easy, often trying, and sometimes impossible. Also we are very fortunate to have Dick Wigglesworth representing us in Ottawa.

I understand your own group here is getting a Peabody Award this year for your excellent television series entitled "Decisions 1960." You indeed deserve the greatest commendation for this effort, because the basic decisions which will determine our foreign policy for the 1960's cannot be made solely by the State Department or even by the State Department and the Congress.

They must be made by the American people, and they will be sound only to the degree that the people have the intelligent insight which is necessary.

In my discussion this afternoon I do not intend to let the events of the last 3 weeks—crucial as they are—divert me from the announced subject of my talk—"A Foreign Policy for the 1960's."

There is no doubt but what incidents influence the course of history, and the incidents of the last few days may be no exception to that premise.

However, until we know more about the circumstances surrounding the capture of the U–2 and its pilot by the Russians, and until we know more about the reasoning back of Mr. Khrushchev's determination to scuttle the summit conference, we must regard these incidents for what they are and not at this time undertake to use them as the basis for a totally new foreign policy.

Although the climate in which our foreign relations are conducted is obviously different this month from what it was last month, the framework for those relations is not, I think, essentially or fundamentally changed. We make a great mistake if we change our basic policy every time Mr. Khrushchev changes from a smile to a scowl or vice versa. We ought not to be diverted from our essential purpose by the ups and downs of this remarkable character's blood pressure.

Personally, I do not believe that the events of recent weeks will have a cataclysmic effect upon the Western World. While the collapse of the summit conference is indeed regrettable it may serve to put the relationship of the Communists and the Western World in a clearer and less illusory perspective.

The ease with which unarmed American planes have been able to penetrate the vaunted impregnable air defenses of Russia is more likely to produce a radically profound effect upon the Government of Russia.

Therefore, I feel that our long-range purpose will best be served by sticking to my original subject, "A Foreign Policy for the 1960's."

However, I shall not be so presumptuous this afternoon as the title of these remarks indicates. I shall not leave you, at the end of this talk, with a neat blueprint of our foreign policy over the next decade.

I shall, however, attempt to set up some broad guidelines and especially to deal with the factors which our foreign policy will have to take into account. It seems to me that an understanding of these factors is the first prerequisite.

There are limits to foreign policy. It is not omnipotent. We cannot order the world to our liking. A realistic foreign policy must, therefore, have limited objectives.

In making foreign policy, we are not given clear choices between black and white, but among various shades of gray; and the problem is to produce the lightest possible shade of gray from a mix into which somebody else is assiduously pouring all the black pitch he can lay hands on.

Robert Browning wrote that "The common problem—yours, mine, every one's—is not to fancy what were fair in life provided it could be, but finding first what may be, then find out to make it fair up to our means."

This is the problem we face—not how to bring about the millenium by 1970, but how to make the 1960's "fair up to our means." It is a problem, really, of how to turn history to our advantage. We cannot repeal history, nor can we reverse the forces which are dominant in the world today. But if we have the wisdom and patience, it may be that we can shape and influence those forces so that they work more to our advantage and less to our disadvantage.

We have to take the world as we find it and then do the best we can to strengthen what is in our interests and to minimize what is opposed to our interests. The dominant forces at work in the world in this decade of the 1960's set forth in no particular order of importance, are these:

First, the growth of nationalism in Asia, Africa, and Latin America.

Second, and closely related in the same areas, the demand for economic development.

Third, the economic strength of Western Europe and the trend there toward economic integration, possibly to be followed by political federation.

Fourth, the industrial growth of the Soviet Union and Communist China.

Fifth, the pace of technological and scientific change throughout the world, but especially in North America, Western Europe, and the Soviet Union.

These add up, I suggest, to a fundamental shift in the position of the United States in the world compared with so short a period as 20 years ago.

I do not want to become involved here in the argument over whether the United States is in danger of becoming a second-rate power. This argument misses the essential point, which is that the world is going through a period of revolutionary change, the like of which has not been seen in at least 200 years. It is stating no more than what should be the obvious to say that in such a period changes inevitably occur and revisions are consequently called for in our attitude and approach.

Americans, of all people, have no cause to be alarmed by revolution. Indeed, of the five forces which I mentioned as being involved in the current world revolution, the United States bears a substantial responsibility for four.

The only one to which we have not made a significant contribution is the industrial growth of the Soviet Union and Communist China, and even here we have unavoidably contributed something in the form of accumulated technological know-how which is freely available in any library or university of the West.

The 20th-century drive of nationalism in Asia, Africa, and Latin America is largely fueled on French and American philosophical writings of the 18th century and frequently seeks to build parliamentary institutions modeled on those developed in 19th century Britain.

The demand for economic development was triggered at least in part of the comforts of home which American GI's scattered over the world in 1941–45. It draws at least part of its force from the technology of modern communications which provide an irresistible demonstration of how the favored one-fifth of the human race lives.

The economic strength of Western Europe is largely a tribute to the Europeans' own work and ingenuity, but a significant part of it is the result of the Marshall plan. It should also be remembered that from the beginning of the Marshall plan the United States pointedly and repeatedly has encouraged greater European integration.

Finally, the research and development which is the basis of the technological revolution has been largely carried out, at least until recent years, in the United States and Western Europe.

It is one of the curiosities of our time that, now that we have started all this, some Americans have a tendency to recoil aghast from what we have done as though we have unleashed a Frankenstein on the world and on ourselves.

This is hardly a proper frame of mind from which to approach our problems. Like Disraeli, "I have ever been of the opinion that revolutions are not to be evaded." We cannot evade this one, nor could we have prevented it even if we had tried.

I am reminded of a member of the ruling oligarchy with whom I talked in a rather turbulent foreign country some months ago. "Our trouble here," this gentleman explained to me, "comes from the fact that we have taught too many people to read."

Of course, when people read, they get ideas, and my informant made it very plain that he found many of these ideas distasteful. The United States has nothing to be afraid of, so far as ideas are concerned.

In the field of economics, you will recall, Gresham's law holds that bad money drives good out of circulation. Well, in the field of ideology, I hold that the opposite applies and that good ideas drive bad out of circulation.

And I have enough faith in American ideas not to be afraid of competition. I also have enough realism to know that, if we are going to survive competition, we have to compete. We can't win wars, hot or cold by waiting for the other fellow to fall on his face.

So, it is quite clear that as far as Asia, Africa, and Latin America are concerned, the primary task of our foreign policy in the

1960's is to protect the nationalist revolution, with its subsidiary social and economic aspects, from the scavengers, whether of the Communist left or the totalitarian right.

This is not an easy task, because the nature of nationalism is such that it resists any kind of external influence, even a beneficent, protective one. On the whole, however, we have not done badly; and as we grow in experience, we can reasonably expect to do better.

I turn now to the problems posed for us by the wholly new situation in Western Europe resulting from the Common Market and the still unresolved relationships between the Common Market, the Outer Seven, and ourselves.

The Common Market is, in part, as I have said, an American creation. It may, but it need not, turn out to be an instrument of discrimination against American commerce and a means of luring American industry from the United States to Europe.

If it is not so to turn out, we had better undertake a hard reexamination of our basic trade relationships with Europe and prepare ourselves for some adjustments.

Experience indicates that the richer a country is, the better trading partner it makes for us, to our mutual benefit. It follows, therefore, that if the Common Market makes Europe richer, we should benefit on balance, but the balance will be the algebraic sum of a number of pluses and minuses.

Our job is to keep the minuses down and build the pluses up, and we should certainly not so concentrate our attention on either the plus or the minus side of the ledger that we ignore the other side and accordingly, but falsely, conclude that the Common Market is either undiluted good or unmitigated evil.

Nor can it be judged purely in economic terms. To the degree that the Common Market makes Europe a stronger and more cohesive entity, it will strengthen the whole Western World.

Equally important, it will, to the same degree, tend to reduce the bipolarity in world power relationships which we have seen growing since the beginning of the cold war between the United States and the Soviet Union.

This bipolarity, in which there are two and only two superpowers in the world, is at the root of many of the world's political tensions and contributes to the danger of inadvertent war.

Our relationship to the Soviet Union, is, of course, at the heart of our foreign policy problem for the coming decade. Here, too, we see great changes in process, the consequences of which no man can foresee.

Of this much, however, we can be certain: the Soviet Union of Khrushchev is a vastly different character from the Soviet Union of Stalin.

Now, what are the characteristics of this new creature? It has an advanced technology supported by a solid and growing base of heavy industry. It is in a position, not only to shoot rockets to the moon and Heaven knows where else, but also to export sizable amounts of capital and substantial numbers of technicians to underdeveloped countries.

Because of the emphasis which its leaders have put on heavy industry, its economy is distorted with consumer goods, housing and agriculture lagging well behind. But it has ruthlessly carried out the priorities it has assigned in its scale of values, and it has got just about what it wanted.

In the process, the Soviet economy has inexorably matured and become more sophisticated. Its inter-relationships have grown more complex. As its capacity to trade has increased, so will its dependence on trade increase.

These economic changes have been accompanied by social changes. A new elite has established itself in the form of a managerial class and the new scientists and engineers.

Education has been made universal, for all practical purposes, and though it is heavily oriented toward science and political indoctrination, the Communist oligarchy—like the oligarchy of my foreign friend whom I quoted earlier—may yet find that it has made a mistake in teaching too many people to read.

But this, if it comes, is far in the future. All we can say now is that the Soviet Union is undergoing a social evolution which has already had some political repercussions and which is bound to have more.

The net result seems to be a trend in the direction of greater conservatism. This is hopeful and should be encouraged by whatever means are at hand. These means are few and, at best, of marginal effectiveness. They include such things as reasonable trade in nonstrategic goods and greater travel by westerners to the Soviet Union and by Russians to the West.

From this point of view—as well as from others, of course—it would be greatly to our interests to be able to conclude a satisfactory disarmament agreement, even one on so modest and limited a point as the suspension of nuclear testing.

It must be admitted in the light of recent events that the prospects of reaching constructive agreements in this field have become dimmed. However, by every means at our command we must strive to convey to the Russian people the fact that we are fully desirous of continuing our efforts to promote a franker and more peaceful understanding between us.

There is some reason to believe that Mr. Khrushchev's behavior in Paris this week is a reflection of the pressures of those forces in the Soviet bloc—found principally in the army and among the Chinese Communists—which are resisting the evolutionary changes taking place in Soviet society.

To the degree that this is true, then the process of social change has been slowed, if not halted. But the dynamics of the situation are such that this slowdown is most probably temporary.

Beyond the Soviet Union, lurking ominously behind the eastern horizon, nine-tenths hidden—like an iceberg—lies Communist China, a restless, growing giant. At some point during the 1960's, we shall have to adjust our foreign policy to take account of this fact.

We shall have to put behind us the passions of 10 years ago and discuss it calmly and objectively—not in terms of appeasement or no appeasement, of a hard policy or a soft policy, but of a realistic policy.

I am not suggesting that we recognize Communist China day after tomorrow, or that we withdraw our opposition to seating Communist China in the United Nations. In fact, it would not be the part of wisdom to do either. Neither Communist China nor any other country should be permitted to blackmail its way into a respectable society of nations.

I am simply recommending that we consider, dispassionately, Communist China's place in the world and our relationship to it. This place is already important, and it is bound to become more so. There are more than 600 million Communist Chinese. Soon, there will be a billion. They are industrious, hard-working people, with their energies harnessed and driven by a ruthless regime which is out to do us no good.

It is not a wholly sufficient reaction for us to stand fast around the periphery of this mass, that is China, though certainly an important part of our policy should be to strengthen the peripheral states, especially India and Japan.

The Chinese Communist regime is not going to collapse. I doubt very much that it is going significantly to change its direction in the next decade. Its power is most likely going to continue to increase. It will have to be reckoned with sooner or later, and we will be better off for doing it sooner rather than later.

One of the interesting possibilities involved in a possible disarmament agreement with the Soviet Union is that any inspection system would have to include Communist China. This might provide an opening wedge to change the basis of United States-Chinese relations.

Although the United States and Soviet Union are agreed that Communist China would have to be included in such an agreement, it is by no means certain that the Chinese would welcome the opportunity.

On the contrary, they might very well brush it off or even resist it. That is a bridge which can be crossed only when we come to it. In the meantime, it is worthy of note that the Soviets see this particular problem the same way we do.

Although it is easy—and dangerous—to jump from a wishful thought to a premature conclusion about Soviet-Chinese relations, I cannot believe that the Soviets view the growth of Communist China with entire equanimity.

Just as it is in the interests of the Soviets to attempt to drive a wedge between the Western allies, so it would be in our interests to attempt to drive a wedge between the Communist allies. It may not be possible, and one should not expect spectacular results soon, but it is at least worth some imaginative thought and subtle effort.

I come now to the last of the five forces which I mentioned as being at work in today's world—the quickening pace of scientific and technological change.

This deserves a great deal more public discussion than it has yet received, because it is fraught with the most incalculable social implications.

It is a the bottom of the social evolution in the Soviet Union to which I alluded.

It is intimately involved in the nationalism and the demands for economic growth which we find in Asia, Africa, and Latin America.

It is one of the things which makes the growth of Communist China so awesome.

It is changing the face of the world and of our own country. I am not at all sure that we have learned how to cope with it.

When technology, even rudimentary technology, comes to a primitive society, it introduces cultural changes and these can be destructive of the fabric of a traditional society, even though in the long run they result in better standards of living.

Increased agricultural production so that a farmer has a surplus to sell means the introduction of money into a subsistence economy, and this sometimes means a rather drastic rearrangement in the social hierarchy of a village.

Industrialization means at least some kind of work discipline—if nothing more than starting and quitting on time—and this frequently disrupts established cycles of work and leisure.

The more primitive the society, the less flexible it is likely to be in adjusting to changes of this sort. All of this, of course, has the most significant political implications.

By reducing the death rate through such things as DDT and antibiotics, technology is responsible for the population explosion which is one of the most dramatic factors of the decade.

Through hybridization of plants and animals, through fertilizers, and cultivation methods, it is responsible for our domestic farm surpluses and it may yet be responsible for a world food sufficiency, even taking into account the population explosion.

Through nuclear fission and thermonuclear fusion, it is responsible for the delicate balance of terror in which the human race lives, and it may yet be responsible for extinction of the human race.

Or it may—if we guide it and control it properly—be responsible for the final elimination, for all practical purposes, of human want.

Technology, in other words, is bringing us closer, at an accelerating pace, to the day when we, as human beings, will indeed have a choice between black and white.

Well, as Ralph Waldo Emerson put it in his essay, "The Scholar," "I have exhausted your patience, and I have only begun. * * * but it is so much easier to say many things than to explain one."

At the risk of exhausting your patience further, however, let me take a couple minutes to try to pull together the many things I have said, or at least talked about.

The essential point, is that in making our foreign policy for the 1960's, we have got to accommodate it to the facts of life in the world—to the nationalism of Asia, Africa, and Latin America, to the industrial power of the Soviet Union, and to the growing power of Communist China.

We cannot undo any of these things, but we can, perhaps, capitalize on the advantages of some and minimize the disadvantages of others.

We cannot do anything to make Communist China weak, but we can do something to make India and Japan strong.

We cannot do anything to keep the Soviet Union from having more scientists and engineers, but we can do a great deal to see that we have more ourselves.

We cannot do anything to quench the desire for land reform in Latin America, but we can do something to help our friends there carry it out in a responsible and democratic manner.

We might as well resign ourselves to the fact that all of this is going to require a considerable national effort and is going to cost substantial sums of money. Our taxes may go up.

The question to be decided here is not, "Can we afford it?" but "Do we want to do it badly enough?"

To sum up, my prescription for our foreign policy in the 1960's is to concentrate on doing what is feasible and to stop worrying about doing what is impossible.

And in this connection, the advice which comes to us over the ages from that wise old Greek—Demosthenes—is still sound:

"As a general marches at the head of his troops, so ought with politicians, if I dare use the expression, to march at the head of affairs; insomuch that they ought not to wait the event, to know what measure to take; but the measures which they have taken ought to produce the event."

INDUSTRIAL SLOWDOWN IN FACE OF COMMUNIST ECONOMIC CHALLENGE REQUIRES CONGRESSIONAL ACTION

Mr. PROXMIRE. Mr. President, as the Senate considers, in these closing days, depressed-areas legislation, housing bills, and other crucial economic legislation, I suggest we take a long, careful, and thoughtful look at our economy.

The bellwether of the American economy is steel. The longest steel strike in history is only a few months behind us; but this morning's newspapers report the alarming news that in regard to the steel industry, which now is down to a shocking less than 75 percent of capacity, market experts are now expecting that the percentage rate of operations will sag to the lower 60's in June, and will probably go lower in July. This means that actual steel production may sink below that of Russia, this year.

At the same time, the National Industrial Conference Board forecast at its annual meeting was announced in this morning's newspapers as an expectation that U.S. economic growth would slow down during the next 10 years. In view of the rising pace of Communist economic expansion in Russia and China, this is deeply alarming. Mr. President, I think this economic situation indicates how urgently congressional action all along the economic front is needed.

I ask unanimous consent to have printed at this point in the RECORD an article entitled "Orders for Steel Below Forecasts," which was published today in the New York Times; and an article entitled "U.S. Economic Growth To Slow Down in 1960's, Industry Leaders Say," which was published today in the Wall Street Journal.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, May 23, 1960]

ORDERS FOR STEEL BELOW FORECASTS—MOST OFFICIALS NOW FORESEE NO BUYING SPURT AND DROP FOR MILL OPERATIONS—USERS CUT INVENTORIES—MAKERS OF APPLIANCES, CARS TRIMMING STOCKS MOST—BUILDING METAL GAINS

PITTSBURGH, May 22.—The expected slight pickup in steel order volume has not materialized and steelmakers look for a series of declines in operations. This trend may be affected temporarily by summer seasonal factors.

Most sales officials are convinced that customers do not intend to step up their buying at this time. The consensus is that many steel users will cut inventories and will continue to buy on a hand-to-mouth basis.

As expected by some of the older steel officials, the market has all the earmarks of the so-called normal markets of years past. That many steel users were able to weather the 116-day steel strike has brought a new and sobering factor into the steel market picture. There seems now to be a strong trend toward much smaller inventories than before.

USERS CUT INVENTORIES

In the last few weeks there have been warnings from steelmakers that customers might do well to take a second look at their inventories and perhaps slow the cutting. The users apparently took the second look and decided to keep going on the inventory cut. That is probably why Iron Age magazine has interpreted the low demand as presaging seasonal cuts of less than moderate proportions in the steel operating rate. Some market experts believe that the percentage rate of operations will sag to the lower 60's in June and will probably go lower in July. Most top steel officials, however, are keeping mum.

The largest cutters of steel orders have been auto and appliance manufacturers. But other steel users are quietly cutting orders and using more of their inventories.

Shipments of construction steels have improved slightly. But in many cases structural units made from steel ordered some time ago were assembled during the bad weather a few months ago. They are now being shipped. However, new structural awards have been trending slightly upward in the last few months. Part of this was said to be because of the improvement in spending for new plant and equipment.

In recent weeks tinplate users have been a little slow in releasing tinplate made and stored for shipping releases. This could mean that tinplate users—especially makers of cans—are well supplied and may be in no hurry to take in large tonnages after midyear.

GALVANIZED SHEET IN DEMAND

Galvanized sheet demand was still strong, but with the unusual capacity that has been built, there has been no tightness in the last month. That was in sharp contrast to market conditions of 3 months ago when deliveries were unusually extended and when all mills had large backlogs.

Few, if any, steel experts see increases in steel prices in the foreseeable future. The softness in prices of concrete reinforcing bars in the Southeast, the East, and the Southwest reflect strong competition with lower price foreign steels. The price change or reduction in special vacuum processed steels reported by some makers was attributable to the combination of domestic and foreign competition and decreased production costs being passed on to the customers in a highly competitive market. There was no evidence that the mill prices of regular steel products had been or were about to be affected by the "special cases" in other steels.

[From the Wall Street Journal, May 23, 1960]

U.S. ECONOMIC GROWTH TO SLOW DOWN IN 1960'S, INDUSTRY LEADERS SAY—INDUSTRIAL CONFERENCE BOARD TOLD BANK LOANS, STOCK PRICES WILL RISE LESS SHARPLY IN DECADE

NEW YORK.—Slower growth faces the Nation in the 1960's in several spheres of economic activity, the National Industrial Conference Board's 44th annual meeting was told.

Forecasts were presented, for example, that bank credit demand and stock market prices may rise less sharply in the present decade than in the 1950's.

John D. Wilson, vice president of the Chase Manhattan Bank, gave several reasons why he expects bank loan demand to be "somewhat less pressing in the 1960's." Among these factors he cited less inflation, higher bank lending charges and heavier corporate debt. Mr. Wilson expects banks to continue to be quite heavily "loaned up" in the 1960's, so that they are not likely to go after lending business as aggressively as in the past decade.

According to Regnar D. Naess, senior partner of Naess & Thomas, a securities firm, the stock market in the 1960's as a whole will show only a modest advance compared with the sharp runup in stock price averages in the 1950's. His reasons: The market in the past decade was pushed up by several special postwar factors, notably the rebuilding of Western Europe, the supply to consumers of goods cut off during the war, and the establishment of a "huge U.S. defense industry."

A number of industry-by-industry forecasts were made to the conference. One of the most optimistic was presented by a spokesman for the electronics industry, Donald C. Power, chairman of General Telephone & Electronics Corp., who predicted electronics sales and revenue would jump from $14 billion to $27.25 billion by 1970. As recently as 1950, he noted, the industry posted total receipts of only $5 billion.

E. B. Germany, president of Lone Star Steel Co., said he expects "the 10 years ahead will be difficult for U.S. steelmakers," due largely to the prospect that steel exports will decrease and imports will increase as a result of lower cost operations of foreign

competitors. He called for a stiffer industry stand on labor to promote greater efficiency and so make U.S. prices for steel more competitive in world markets.

The conference board itself predicted that the annual gross national product—total output of goods and services—would rise to nearly $800 billion by 1970, an increase of 60 percent from the present level of slightly over $500 billion. That would compare with a rise of about 65 percent to $479.5 billion during the 1950's.

The board also predicted in its survey, titled "Economic Growth in the 1960's," that the country's output per man-hour will continue to rise at a postwar rate of 3.2 percent. The board anticipates additionally, among other things, that capital spending by business for new plant and equipment will run about $58 billion annually in the 1960's, a rise from the $38 billion businessmen say they expect to spend on expansion this year.

AMENDMENT OF MOTOR VEHICLE SAFETY RESPONSIBILITY ACT OF THE DISTRICT OF COLUMBIA

The PRESIDING OFFICER (Mr. FREAR in the chair). The hour of 2 o'clock has arrived; and the Chair lays before the Senate the unfinished business, which will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2131) to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia, approved May 25, 1954, as amended.

LIFE MAGAZINE AND NEW YORK TIMES GREAT DEBATE ON THE NATIONAL PURPOSE

Mr. PROXMIRE. Mr. President, America's greatest need today, in the wake of the disaster at the summit and the revelation of Premier Khrushchev as an unstable bully, shouting insults at the United States of America, remains as before. Of course we need the material strength of military and economic power and the educational strength to give it meaning. But, even more, we need a sense of national purpose. Somehow we need to bring to every schoolchild and farmer, every housewife and salesman, a far clearer comprehension of American freedom, its heavy responsibilities, as well as its immense opportunities.

Life magazine, with its vast 6 million-plus circulation, and its tens of millions of readers, together with the New York Times, with its broad national readership, have set out to do this in a series of four articles.

Judging by the quality of the men selected to discuss the national purpose, and by the excellent "kickoff" article written by John Jessup, the chief editorial writer of Life magazine, this promises to be an immense contribution to the national will.

Because the CONGRESSIONAL RECORD represents an appropriate repository of this historic contribution, Mr. President, I ask unanimous consent that the first article of this series be printed at this point in the RECORD, preceded by a letter I have written at the invitation of publisher C. D. Jackson, of Life magazine, in commenting on the series.

There being no objection, the letter and the article were ordered to be printed in the RECORD, as follows:

Mr. C. D. JACKSON,
Publisher, Life Magazine,
New York, N.Y.

DEAR MR. JACKSON: Congratulations on your decision to plunge directly into what so many of us have been vaguely calling for: a great debate on our national purpose by eight leading American thinkers.

An America that has some idea of where it is going and why is even more necessary than closing the missile gap, stepping up the pace of our economic growth, or even pouring more of our resources into education. Quite essential as are these means of achieving our ends, understanding of what our ends are and why and inspiration to spark the desire and fuel the drive must come first.

Since 1945 victorious power throughout the world has come not from planes or tanks or factories or even nuclear power. It has come from people who know what they want and are willing to work and sacrifice and die for it. This has resulted in successful revolutions in Ghana, Nigeria, Guinea, the Sudan, Egypt, Jordan, Morocco, Iraq, Syria, Cuba, Tunisia, Pakistan, Ceylon, Burma, Indochina, India, Israel, Indonesia, and China. In every revolution except Czechoslovakia since the end of World War II, military and industrial power has been on the side of the government in power. But in each case people who understand their purpose well enough to fight and die for it have succeeded.

The initial article by Life's chief editorial writer, John Jessup, surmounts the tough job of framing this cosmological subject in a workable perspective. He provides two vital ingredients of any beginning in arriving at a national purpose: a historical comprehension and a moral framework. This Democratic Senator is reminded of how difficult, but how useful, this is in the painful present—after our grave national difficulty over the U–2 reconnaissance plane and the Khrushchev explosion at the summit. How strengthening now are the words quoted by Jessup from Wisconsin's Carl Schurz in replying to Stephen Decatur's "our country, right or wrong," with "our country * * * when right, to be kept right; when wrong, to be put right." How very pertinent in the decade of this greatest American weakness of privatism to be reminded of Teddy Roosevelt's shout that "the rights of men have to be earned afresh each day."

How central to this inquiry the historical fact that since the Mayflower Compact, whose ultimate purpose, as Jessup says, "was the quest of God's truth"—and how inevitably it follows today in Jessup's words that "it is the highest of man's political purposes to contrive his human institutions in conformity with this order, while realizing that all human institutions are subject to constant change."

I hope that subsequent articles will grapple with the big problem to which Jessup has ably brought this series, i.e., how do we contrive to adjust these institutions to the fantastic change of the past few years of the nuclear age, the space age, and the relentless and brutal march of communism.

The big task is to challenge the American people to the immensity of their power and resources and to the enormity of the task that confronts us armed with these resources. Innovation has been the genius of America's mighty economic system and our Nation's unparalleled material progress. No nation on earth is so richly armed. More important, thanks to our Jeffersonian birth, we Americans enjoy a political tradition founded on the open, searching, reaching mind pursuing justice as well as happiness. Our task is to convince our countrymen that the mountain in all its bristling enormity is not only there to climb but that no men have ever been better equipped to climb it than this generation of still reluctant Americans.

Sincerely,

WILLIAM PROXMIRE.

THE NATIONAL PURPOSE

(The words above, The National Purpose, have begun to sound increasingly throughout the country, stirring up uneasy questions, forcing Americans to reexamine themselves and their aspirations, engaging men of high position in what can be the most crucial debate of our generation.

(But the discussions sometimes produce only earnest confusion or empty declamation. To explore what the phrase has meant to America and what it means—or should mean—today, Life here begins a five-part series on "The National Purpose": what we as citizens and as a nation wish and hope to achieve.

(It is a question important in an election year when the great issues must be brought out by the men who wish to lead the Nation, but it transcends partisan politics. Life has asked eight eminent Americans to explore the question. This week the background of the debate is set down on the following pages. In four succeeding issues "The National Purpose" will be discussed by Adlai Stevenson, twice a presidential candidate; Archibald MacLeish, Pulitzer Prize poet and playwright; Billy Graham, the evangelist; David Sarnoff, chairman, RCA; John Gardner, president, Carnegie Corp. of New York; Albert Wohlstetter, national defense specialist for the Rand Corp.; Clinton Rossiter, author and professor of government, Cornell University; Walter Lippmann, political commentator.

(The debate, of course, cannot be left to the country's leaders. Life invites all Americans to join in. For upon the Nation's purpose depend the lives of all—not in some comfortably remote future but right now and in the years just ahead.)

A NOBLE FRAMEWORK FOR A GREAT DEBATE

(By John K. Jessup)

(The words and deeds that expressed our past purpose are the starting point for discourse on aims today.)

"The critical weakness of our society is that for the time being our people do not have great purposes which they are united in wanting to achieve. The public mood of the country is defensive, to hold on and to conserve, not to push forward and to create. We talk about ourselves these days as if we were a completed society, one which has achieved its purposes, and has no further great business to transact."

So wrote Columnist Walter Lippmann a few months ago. It is a disturbing charge for three reasons. First, Lippmann is not alone in making it. The same complaint is heard, with varying emphasis, from many other critics and leaders of opinion, and also, according to a recent survey of Life's correspondents, from many an average anonymous American as well. Some of them speak like Lippmann of our lost or mislaid national purpose or purposes; others use an older phrase, "the American dream." Thus William Faulkner: "What happened to the American dream? We dozed, and it abandoned us. And in that vacuum now there sound no longer the strong voices * * * speaking in mutual unification of one hope and will." As though he also felt something missing, the President himself has appointed a Commission on National Goals "to develop a broad outline of national objectives and programs for the next decade and longer." So much palpable concern, in quarters high and low, suggests that the vacuum of purpose may be a real one.

Second, the charge is disturbing because if it is true it is new. The United States has hitherto been a country associated with great purpose. If that purpose is now absent, we are not what we were. Is there not a connection between the rise of nations and great purposes, between the loss of purpose and their decline. A United States without a purpose, or no greater purpose than "Don't rock the boat," may well be a United States in decline.

Third, the world needs a purposeful America. Even if the United States could ever be a "completed society," to use Lippmann's phrase, the world is not. Mankind has much further great business to transact—if not with the active leadership of the United States then without it, and probably with the leadership of communism.

It may be argued that Lippmann's charge, even if true, is irrelevant. Does the United States really need a self-conscious purpose in the world? Is not a democracy its own raison d'être, and survival the whole of its duty? Many feel that only individuals, not nations, are capable of high purposes; and that the proper role of the American Nation is simply to provide the political framework in which each American citizen defines and conducts his own private pursuit of happiness, nobly or ignobly, to suit himself. Yet this theory of a passive role for the Nation has not satisfied the growing uneasiness. "Why are many Americans fearful that we have lost our sense of national purpose?" asks Adlai Stevenson. "Why is there a slackness about public problems and a wholesale retreat to the joys of private life?"

Our onetime confidence

If America is in fact an elderly, status quo nation, it has had one of the briefest runs for its money in the history of great nations, and its early senescence will have belied more prophecies and grander promises than any nation ever made. During most of its brief history America has been bursting with confidence in its own unlimited destiny. A French visitor in the 1840's asked one of these confident spokesmen, Senator Lewis Cass of Michigan, "If such is the youth of the Republic, what will be its old age?" Replied the Senator, "Sir, it will have no old age." Cass' bold prophecy is already proved doubtful by the fact that so few Americans feel like repeating it today.

Thus there appears to be a real vacuum in the national will, or at least the widespread fear that such a vacuum exists. To explore this disturbing condition, Life here begins a series of articles which we hope may stimulate a fruitful national debate. Does the United States lack a national purpose? Does it need a national purpose in the world? If so, what should that purpose be?

The present article is a résumé of what earlier generations have felt about the American national purpose, together with a few remarks on the new historical conditions that may have affected these beliefs. How far are the older beliefs relevant to the problems that face our country now, in this strange era of communism, megaton weaponry, fractured empires, mushrooming sovereignties, and continuing moral, social, and technical revolution? The answers hinted at in this introductory article are not offered as definitive. Fuller answers will be presented in the subsequent articles by leaders of opinion.

The motivating beliefs of a nation are to be sought in its deeds and illuminated by the words of its leaders, its spokesmen and its key documents. Deeds and words do not always match, but in America they have matched often enough to show a pattern to those who look for one. Thus when Roger Williams expounded the principles of religious liberty and democracy, his authority did not run beyond colonial Rhode Island; but the practical experience of mutual accommodation among the sects in other colonies eventually established religious liberty as part of the American political creed. Thus, too, township self-government and the common law, which helped to make the Constitution workable, were the slow deposit of English and colonial experience rather than the decree of towering prophets or statesmen. But on occasion sudden flashes of great documentary lightning have also illuminated our beliefs. The greatest of these was, of course, the Declaration of Independence on July 4, 1776.

The Declaration turned what had just a few months before been an Anglo-American family quarrel into a defiance of all tyranny everywhere. Colonial loyalty to the English crown, the dominant American sentiment of 1775, was transformed into national loyalty to the cause of political freedom for the human race.

Thomas Jefferson achieved his masterpiece not by taking an opinion poll, nor yet by sucking the words from his thumb. In writing the Declaration he borrowed some current political ideas from England, from Virginia, from Massachusetts, from Tom Paine and from other sources. He carefully listed the colonists' grievances against George III. But above all he related the cause of American independence to certain timeless beliefs about the nature of man, society and government.
